

A gift of the future, it remains to be seen if Arkhom is ahead of its time. When looking at the big picture there is no time. The common denominator of this group is that we are all futurist idealists. With a few 'ist' for good measure. Reverend Buelher's contribution is towards elucidation of the meaning, historic (pre-- post) use, and potential of the Arkhom geometry. Showing us Arkhom as an engine of esoteric power, Bill alludes to Arkhom's potential and power to shift consciousness. From the Oritronic (present mind set) to the Metatronic (future heart set) to occur when 40% of humanity become Lighted souls, LP40. From here on in your on your own.

22: Metaphysical Ark

Arkhom: A Gift from the Future

by William Stuart Buehler

Foreword

This story will be strange even for seasoned mystics. Strange as it is there still exists the Reshel patterns in the land and temples as testimony to its reality at least in the minds of ancients and more recently the Knights Templar and early Masons. Since I am not a Mason, perhaps I may be permitted a certain freedom in discussing what must have once been their innermost secrets. However this is the time that the secrets are shouted from the rooftops and their general knowledge is *needed* for the evolution of the Race and whole continuum. The details of operating time gates however would still be guarded or available from spiritual source based on a need to know. This is as much for the protection of the users as for the organizations using the gates. Inept time implosions can virtually destroy light bodies and chakras. However correct usage with highest intent under inner planes supervision is safe and "timely."

Open to me the GATES OF RIGHTEOUSNESS;
I will go into them and I will praise the Lord; this
GATE OF THE LORD into which the Righteous shall
enter.

I will praise thee; for thou hast heard me and art
become my salvation.

The STONE which the builders eliminated has
become the HEAD-STONE of the CORNER.

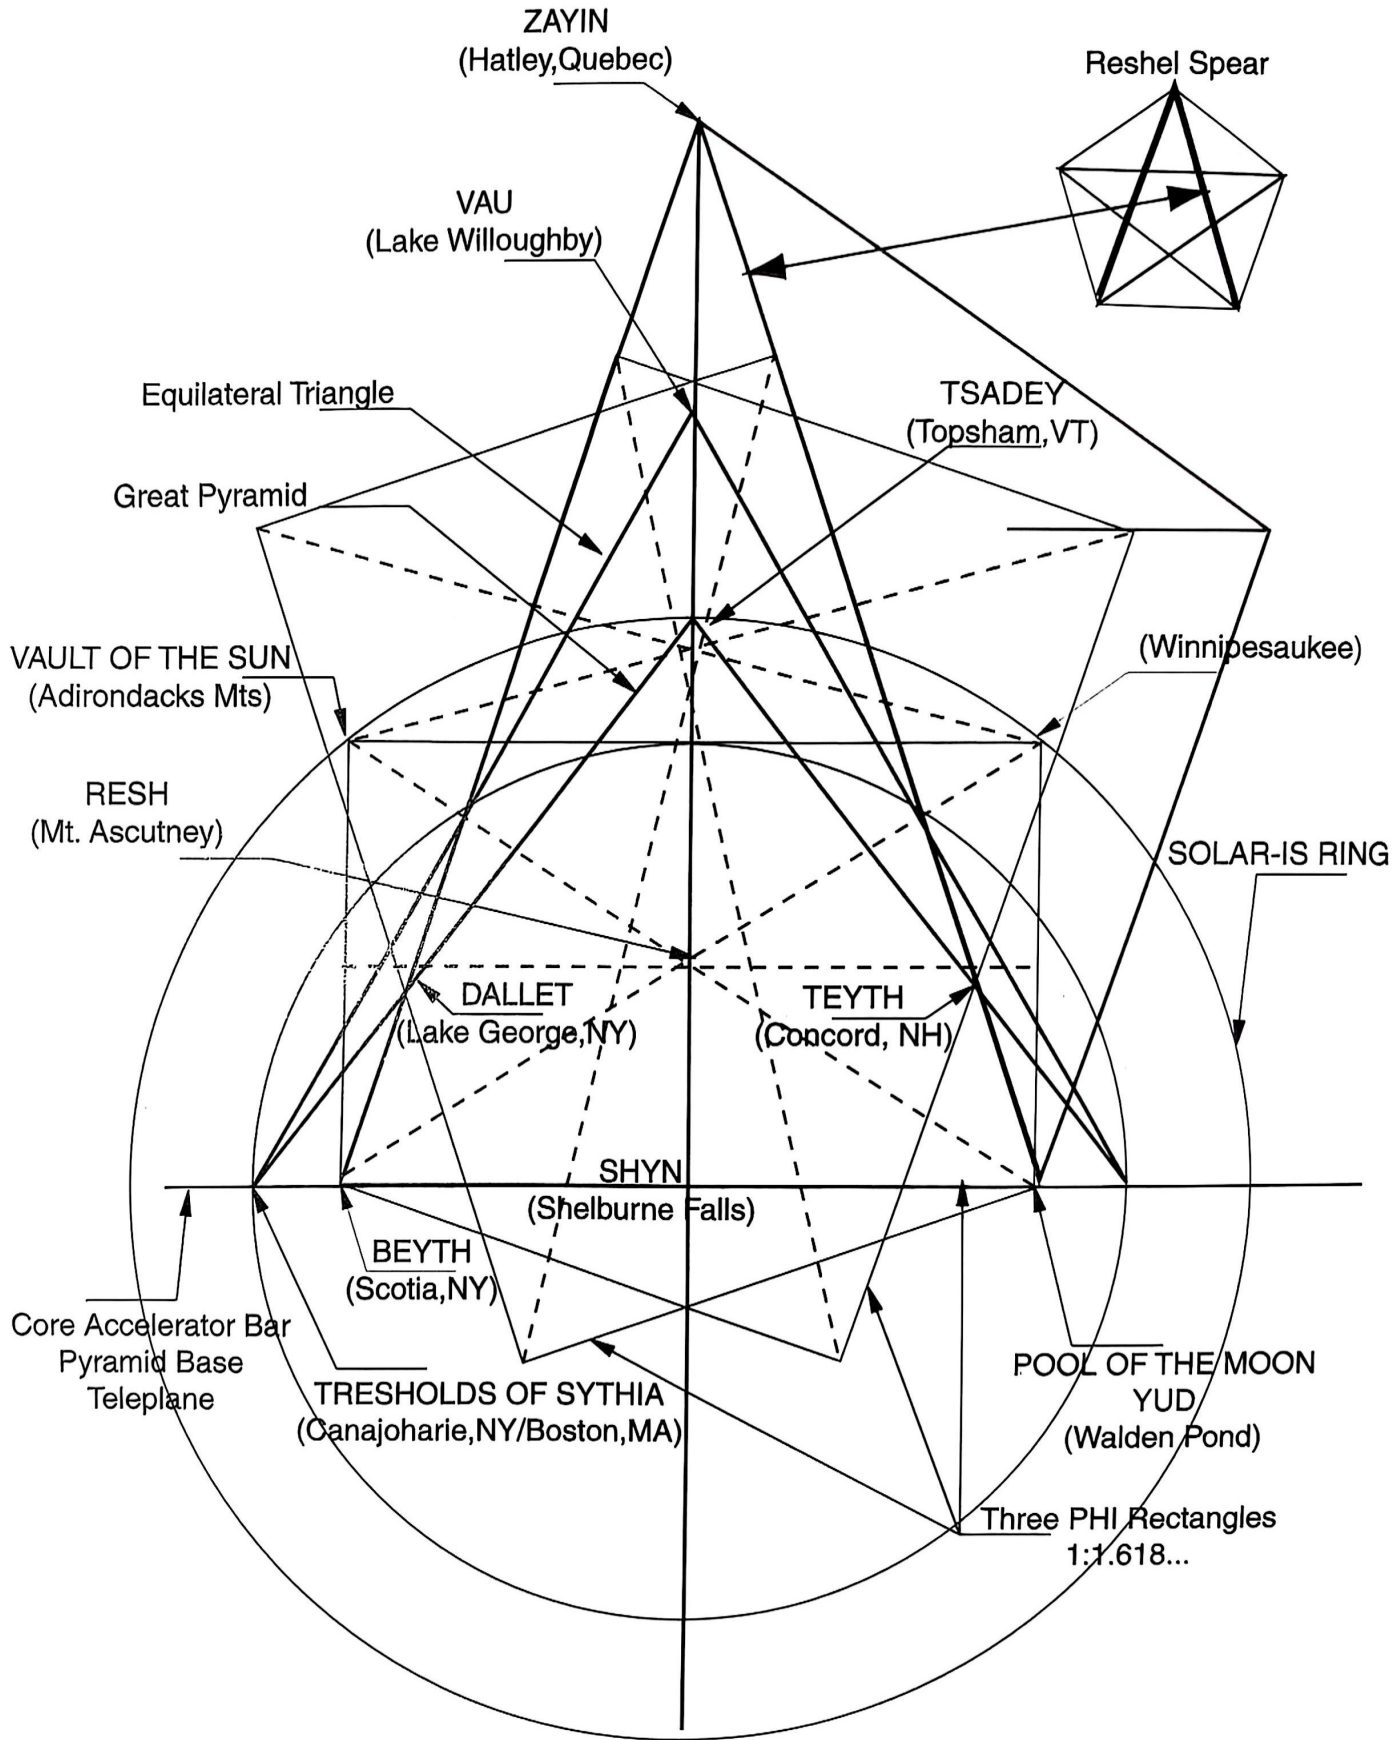

This is from the Lord; it is marvelous in our eyes.

Psalms 118: 19-23

punch on horizontal stone outcrop. Circa
1398 CE, probably by Sinclair Expedition.

22.2 Resh--"The Chief Headstone".

Preface

The above passage refers to an ancient grid which contains two sets of Time Gates ostensibly noted in the Psalm. The gates are in the geometry of a golden ratio rhombus and use the "L" shape or "corner" as the short version of the rhombus. The grid is called the RESHEL, Hebrew for the "Chief Head Stone of God" and the controlling pole of the grid is called the RESH (Chief Head Stone). Thus it was shown us by the inner planes illuminary, Thoth Hermes₁ or "Thoth Raismes of Aphra" as he wishes to be called. The grid was provided to our light groups to facilitate restoring the presence of the "fallen Female Pillar" and to assist the groups in more efficient time gateing. We used the grid as a group configuration but since that time I have found that the Reshel is found in major temples and in the Earth Grids. ARKHOM is one such.

The "L" format is more than only a notable gateway system within the Reshel, it is an energetic and consciousness matrix resonant with one of 24 Breastplates of Metatron. Metatron is the highest archangel whose level of consciousness and state of being is used to describe the quality of the new time continuum into which we are presently evolving. We are now moving rapidly from a continuum of fallen or "Oritronic" light into a full-light spectrum of the same level from which we fell. This higher, Metatronic level is called the RANNA TIME WAVE. There are therefore three time continua...all existing concurrently in an "all-time, no-time" mode... which have always occupied most of our spiritual organizations in their work of keeping all three glued together and their evolution moving forward.

Yeshua, the Messiah, has been likened to the Chief Head Stone₂; it is emphasized that use of the Gates and Reshel Grid must be in resonance with the Christ and the Righteous...with Metatron. *Anything written here concerning the use of the grids should NOT suggest that they can be used by any group or individual without very clear Christic intent and clear communication with inner dimensional agencies, Hierarchical or angelic, at the Metatronic/Christic level.* These gates must NOT be confused with any project or process used by the Montauk Project.

I had studied Reshel Earth Grids, as well as group application, for a number of years when my friend Dan Winter enthusiastically told me of a grid that covered the whole East Coast and I'd better right away touch base with its discoverer Peter Champoux (in team with Susan). When Peter sent the diagram of ARKHOM I found that the Reshel grid fit over it with amazing exactness. This was exciting for me since this was the first such grid found by another person not having any conscious awareness of

22.3 Arkhom Geometry

the complex Reshel format. Although we had discovered a correlation with the Rennes le Chateau grid₃, the ARKHOM discovery is much more detailed and advanced in complexity.

The Gift

So far the story is not strange but now it begins. Quite a few synchronistic events then rapidly began to bring things together. I had recently begun to work on the Reshel geometry of the famous Clan Sinclair ROSSLYN Chapel south of Edinburgh and that also led to learning of the WESTFORD KNIGHT₄ in the Boston suburb of Westford. I found that the Reshel fit Rosslyn Chapel perfectly both in its horizontal plan and its vertical elevation. I also found the same to be true for Chartres. Both use the L-Gate in the same manner and both were designed as remarkable "time temples."

I saw that the Westford Knight also carried Reshel codes punched into stone. I also knew that the Knight's design was a grid schematic and not simply a funerary marking for a knight buried beneath the stone. Understanding the carved Knight's coding and placement is critical to understanding Arkhom in the 1398 CE "upgrade." The Knight's position, function in ARKHOM is as its major code insertion as far as the 1398 Expedition was concerned. It is located in the EASTERN pole on the Arkhom E-W generating axis of the grid. The eastern pole contains "intent" or the inseminating codes and purpose of the grid. The codes in Boston's energy sites supplement the Knights' codes and will provide upgrading formats. The SHIELD or "ARMS" always contains vital programs whether a shield of an aboriginal native or knight. The shield is carried in front of the carrier, supplementing the codes carried on that person's vestments. The persons' chakras are the basis of the vestment-shield combined matrix and will be physically matched. The primary device on the shield is the Arkhom grid; thus I see Arkhom as a main interface and empowering mechanism. This is commented on below.

These are the Knights' vital carved codes with summarized interpretations:

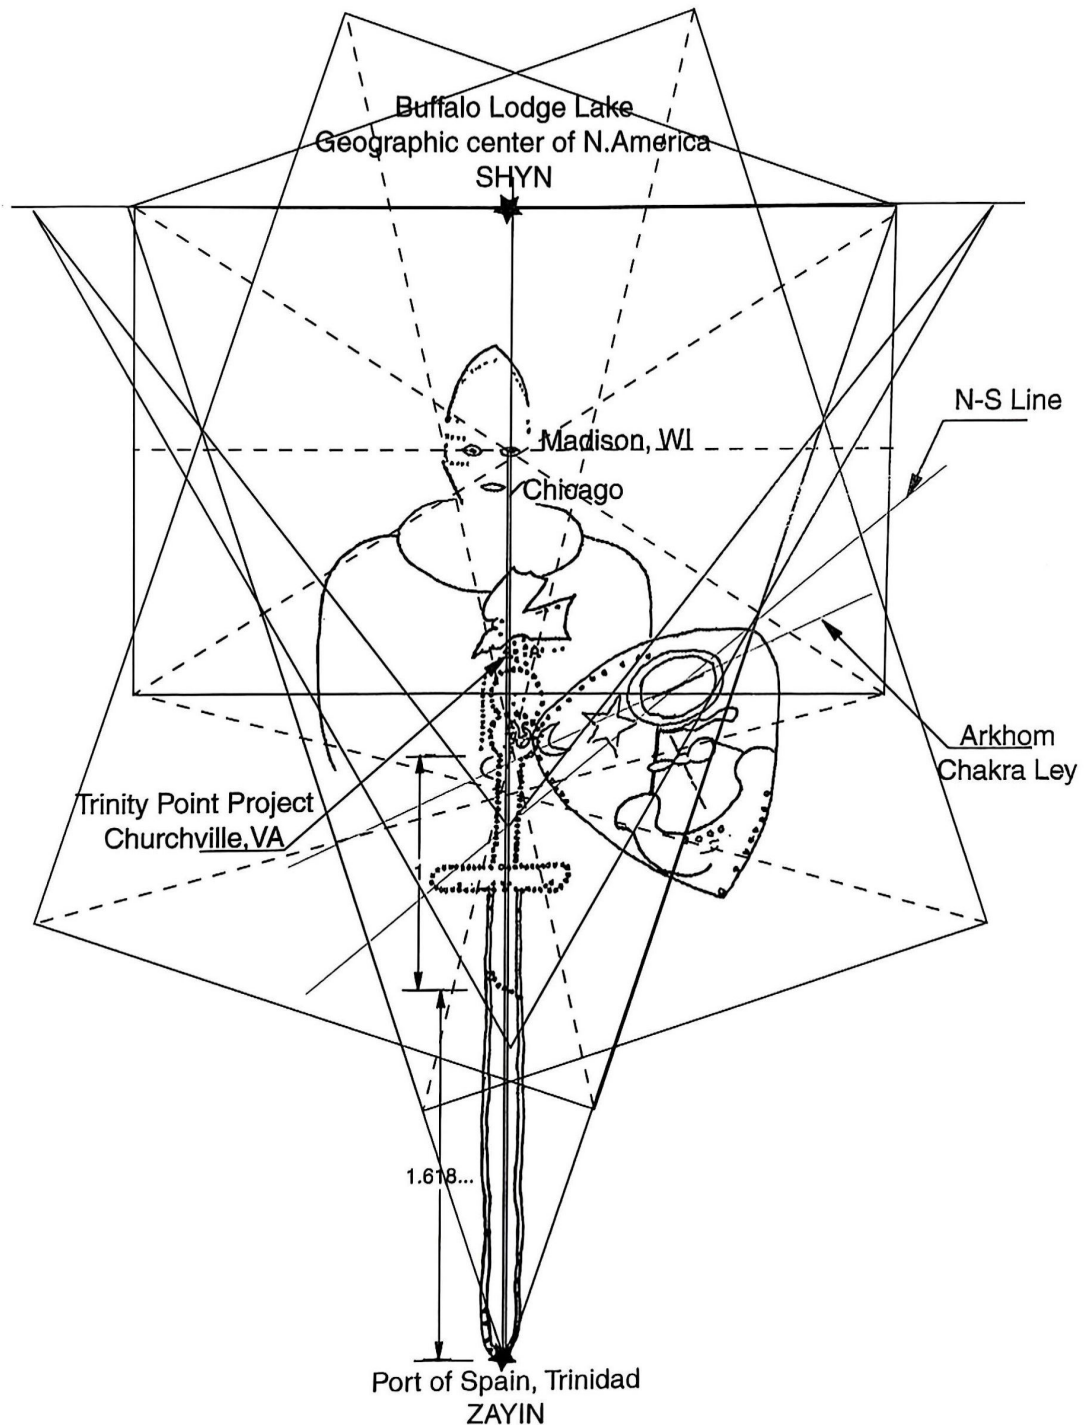

•SHIELD: Two concentric rings and heavy axis line: This is a critical reference lock over which I placed the two key rings of the Arkhom's Reshel grid and aligned the shield glyph's axis with the Arkhom's axis. This gave me a huge intercontinental grid. It locked onto a "Templa Mar" site Thoth had our groups install on the Mogollon Rim a few years prior so I assumed that the grid was correctly placed and sized.

•SHIELD: A crescent and 5-pointed star: This is the basic symbol for the Reshel grid. Ironically it is also related to the establishment of the power and presence of the Goddess or as Thoth put it, "for the re-erection of the fallen Female Pillar". This symbol confirmed that the Reshel grid was the key system.

•SHIELD: Single masted ship seen as a crescent with the Arkhom-rings above it... the two viewed as a Reshel crescent and star, Arkhom being the star. The Ship's main mast appears to identify Block Island which is the main power controller of a three-island "resh" or control system. Montauk Point is the time gate controller (reason for the Grey incursion in that area via human "Montauk Project") while Newport Island is the knowledge-wisdom controller. The 1398 Expedition built a tower in Newport which still exists. The main mast or "main power line" aligns with the Knight's eye which is also the main resh pole in the huge "Bakhira Grid" that covers North and South America. This vital pole is at Madison, Wisconsin.

•**SWORD:** The sword is a “two mouthed”, double pommel type typical to the period. The sword’s main symbolism is found in Hebrews 4:11-13 which also says that the Sword or Logo of God is alive and active. A knight’s sword is broken at his death. Both are resurrected eventually. The Sword has a break in it at a 51 degree angle. This break is also at the golden ratio point (1.618) between the sword’s point and the base of the pommel. The 51 degree line tells us that the Great Pyramid is located there and that the sword’s axis is a reality frame or “teleplane” creating some sort of cosmic containment field based on life rhythms (Pyramid sockets). The golden ratio dynamic is a life supporting and definition system. Thus, to bring the sword back to “life” and wholeness the Pyramid and golden ratio must be activated. These two

22.4 Bakhira Grid

systems more than any other together form the generating or "Glory" pole for the Reshel Grid. This pole is effectively the best Grail Core geometry, using the Bethlehem Triangle of 26.3 degrees that I have found yet. It is the core matrix of the Metatronic Arieopax (Reshel upgrade).

✦ **SWORD:** The upper limit of the dual pommel. The main axis of the sword makes a 3.5 degree offset from the quillon (cross piece) to the tip of the pommel. At the top of the pommel is a great bird carrying a serpent...corresponds with the bird-serpent staff archetype. This archetype is Moses' Serpent Staff that healed the tribes; Yeshu the Messiah correlates with the same staff related to second Birth (John 3:14-15) and it is also the Serpent Staff of Aesculapius, the Caduceus of Thoth-Hermes, the Feathered Serpent. Mastery of this redemption dynamic opens all 13th rays and aspects.

Thoth agreed with the design as shown and added that it also contains something Thoth called an EDEN STAR with a vibration of "18." The offset axis links into a site named TRINITY POINT which was discovered by Mr. Philip Khnopp. The site has three mounts arranged in a 51 degree Great Pyramid geometry. There is also a great bird seen in the hills' contours, the bird "carrying" the river as a serpent correspondent. In considering the Eden Star, "18" in Hebrew is the word "chay" which means "regenerating life." "Eden" in Hebrew (there are two spellings) means "strength, controlling foundation, sockets." Thus we have a very complex archetype directly corresponding with the Sword's regeneration. Trinity Point is that place where the whole transcontinental Bakhira Grid axial energy from its offshore center comes ashore.

Both the Sword and Trinity Point site have the Great Pyramid dynamic appearing. Note that the translation for "Eden" relates to "controlling foundation, sockets." A little known aspect about the Pyramids' sockets is that they are carved into the bedrock at various sizes and depths. Bernard Pietsch found that the differences would chart the Circadian Cycle. (This is a daily cycle that plants and animals revert to when denied sunlight.) I also noted that the numbers roughly relate to the four human biorhythms. Thoth later commented on the sockets' values, or the observed rhythm as being cosmic. He also remarked on the Capstone's number: 50. I believe that the Pyramid and the golden ratio describe a vital

life support system that is universal and that any reality frame or continuum must contain this format. I think that the Hebrews 4:11-13 reference mentioned above, to the two-mouthed sword best describes this coding of the Knight's sword.

✦ **KNIGHT'S LEFT EYE:** The Knight's left eye is on the main grid axis. This is the operative "resh" pole. "Resh" means "Chief Head Stone" in Hebrew. This eye or resh pole and the sword's point give us a lock on the Reshel's positioning by placing the "resh" pole in the Reshel on the eye and the "zayin" pole on the sword's point. The left eye in the Hebrew alphabet is found in the protosiniatic glyph used for the letter Resh, #200. This was drawn as a head showing its left profile (right brain). The use of the "eye" as a Hebrew archetype also relates to the letter Ayin, #70 which was drawn as a vesica with a dot in the center. Ayin means "eye, fountain or well" and is one of the

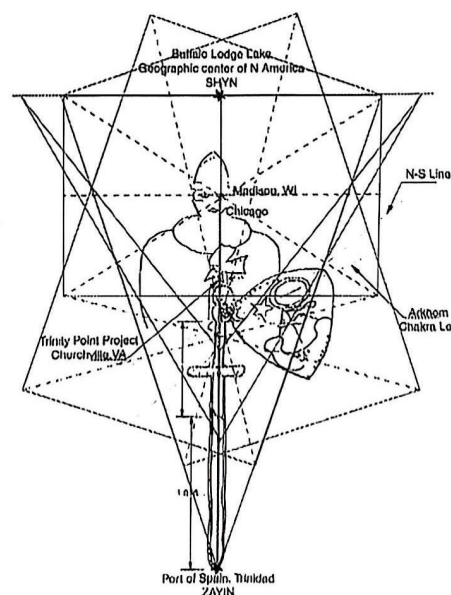

divine letters along with Aleph, #1/1000. As it turns out the eye's position is Madison, Wisconsin, which has a large lake and University.

When the vast Reshel format, called the BAKHIRA GRID by Thoth, is spun in its circular "spinner" dynamic the eye swings over the former position of the HOLY ISLE OF RUTA in the Faraday Seamount area on the Atlantic Ridge north of the Azores and even with Paris. This alignment is probably the most important of them all and is a basic positional check.

SUMMARY OF THE SINCLAIR KNIGHT'S CODING: It may perhaps be strange for the reader to imagine that a vast intercontinental land area could be influenced or "coded" by alchemy contained in and around a stone the size of a kitchen table yet that seems to be the case. The coding is within a larger mechanism, located in its coding section (East). The power modem is Nova Scotia linked through the three Reshel or control islands: Long Island at Montauk Point, Block Island and Newport Island. The Eastern "knowledge" or coding pole is modulated by Newport Island and the Expedition Tower placed there.

The codes are boosted and actualized by the E-W GENERATING AXIS which includes the base line or EVENT HORIZON of the Great Pyramid dynamic. This contains the sockets and defines the "teleplane" or continuum. The capstone of the Pyramid generates the golden ratio spirals which create the whole form. The ARKHOM grid then can be thought of as an interface system that in turn codes the intercontinental BAKHIRA Grid which is also a resonant Reshel system. It should also be remembered that all of Europe has the same grid system and is the GAIA right forebrain which expresses as the right brain North and South American identical system. The small stone outside of Boston at Westford resonantly links into this very powerful system both in its energy form and the cosmic nature of the codes. In this context the ARKHOM E-W axis is much like a large antenna picking up the GAIA transmissions being relayed from the Sun and divine agencies.

Part of the Reshels' codes (and therefore ARKHOMs') contain the BETHLEHEM TRIANGLE which uses the "2618 Numeric" or 2.618 as the golden ratio (phi squared) and also the 26 degrees, 18 minutes of the Bethlehem Angle. This is another vital function of the Great Pyramid which is built into its two main ascending passageways. The angle is also found between the Pyramid to Bethlehem line and the Gizeh latitude line. The energetic includes the dynamics of "Absolution, Resolution, Evolution" as the Bird-Serpent Staff of the Greek god of healing: Aesculapius. Yeshu the Messiah also likened Himself to this Staff where it correlates with Moses' Staff in John 3:14-15. This dynamic relates to healing and to regeneration of Life and is a Grail action. The Bethlehem Triangle appears as two: the female Shekinah and the male Christos systems. The two triangles are base-to-base in the usual grid geometry and is found in Great Britain stretching between Edinburgh and Glastonbury.

The Clan Sinclair controlled the main Reshel poles in the Thurso, Edinburgh areas and effectively translated this main Grail core geometry to the Americas via the Knight's coding and other energy sites on the East Coast of North America. These grids in Europe and the Americas were put in place by the priests of the Holy Isle of Ruta anticipating THIS PHASE OF OUR EVOLUTION!

Any study of the Bethlehem Angle should include the Hathor Temple at Dendera and its astrological ceiling. The Angle appears between the Serpent-Bird axis through Rigel in Orion (Osiris) and the Tem-

METATRON'S 3RD BREASTPLATE

SHOWING THE SHEKINAH (FEMALE) HALF. THE SYSTEM INCLUDES THE DYNAMICS FOR THE GREAT PYRAMID, STAR TETRAHEDRON, TIME OR "L" GATES, PENTAGON, BETHLEHEM ANGLE/TRIANGLE, 6 MODES OF THE ARIEOPAX, LAYOOESH PILLAR.

22.5 Metatron's Breastplate

ple axis through Gemini's female partner. The Temple axis should include Sirius even though it is a few degrees off the axis. This separation is what is called a "Selah Axis" or a spinning spoke of divine Silence or Life which empowers all systems.

The Reshel

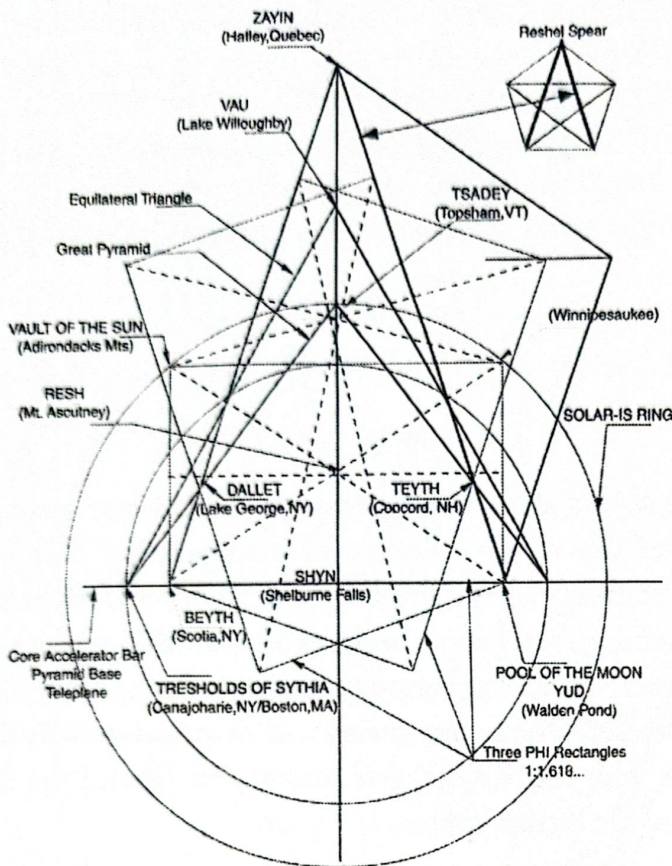

(CHIEF HEAD STONE OF GOD)

A SUMMARY

BACKGROUND: Ten years ago our groups in the Midwest, about 80 persons in half a dozen synergically unified groups, were going through "time glitches" due to our collective increasing energy. This is common in group work. Time instability is due to increasing energy breaking down temporal mental forms, so the continuum is not as well defined in the local vortex. People begin to bilocate, things disappear and return (sometimes) and other minor annoyances occur. Part of our synergic technique was to use sacred geometric configurations in the groups' processes. Due to our energy and consciousness level Thoth Raismes offered his assistance by providing us with the "Reshel" grid format. He labeled the 9 poles using Hebrew letters; the gradually refined view of the system appears in Figure.

Thoth gave us the system for three main reasons: (1) to give us the kind of Metatronic system that would assist us in the next phase of our growth and smooth out the time anomalies, and (2) reinsert into the Racial Mind the major system for reestablishing the "Fallen Female Pillar", that is to rebuild the seriously damaged female Presence and Authority, as well as (3) provide the main LP40 (Transition) mechanism: the "Techad" or "Arieopax" as the 3rd Breastplate of Metatron. We didn't know all this in the beginning nor did we know the great history or massive application of the Reshel system.

GENERAL TECHNOLOGY: The Reshel, also called the Eye of ISIS and Eye of Ra is a pentagon or 5point star. The Reshel's pentagonal "Spear" or triangle in Figure shows one half of the system, the Shekinah or female half. This is characteristically an ascending system that "weds" with the other male or Christos half. We know that the Templars and their Masons knew something of this Templa Mar format since we see evidence in the layout of Chartres and Rosslyn as well as many earth grids. The Templa Mar or "Temples of the Emerald Mar" are "time" temples, that is they have the Reshel capability in their design and function. This includes major Earth Grids found, for example, in Rennes le Chateau, Edinburgh, Bornholm Island, all the BarSheeba grids in Europe and Great Britain, the Arkhom Grid in America. The "ASCENSION GRID" related to the continua transition or LP40 has four levels: (1) the highest is the METATRONIC Grid seen as a complex MStrat or Metatronic molecule within a double octahedron form, (2) the ASCENSION Grid seen as (presently) 7 chakra sites around the planet capable of carrying the transition Metatronic charge and function, (3) the TEMPLA MAR system, and (4) the RESHEL system for grounding and processing.

22.6 Eye of Ra

RESHEL SUBSYSTEMS: The Reshel uses a number of complementary systems. The geometric patterns shown in the Figures are "consciousness schematics", that is, they may be installed in temples, earth grids or groups to create resonant harmonics with universal dynamics. These dynamics are more related to thought forms than physical forms. They are the same thing in the Ranna continua where "what you think happens" but in this half light realm the same principle may apply but here the patterns are more "facilitators" for encouraging things to happen. Much depends on intention combined with physical resonant patterns.

(1) The Great Pyramid creates the basic form or "teleplane" as its base. Its sockets contain codes for duplicating the Circadian Rhythm which is our local system's expression of a much larger cosmic life supporting rhythm.

(2) The Pyramid's apex or "TSADDY Pole" also called the "GLORY Pole", synthesizes the above cosmic codes and organizes a basic seed core expressed as a pentahedron using the "Bethlehem Angle" of

26°, 18'. The base of this pentahedron generates golden ratio spirals that create the rest of the system, terminating in two "Pools of Life" or "Pools of the Moon" located in the base "Event Horizon" for the Reshel.

(3) The EVENT HORIZON contains the main spiritual reference ULTA Point. It is the time continuum or reality frame for whatever is being created. The Event Horizon has two planes that resonate with the two bases of the two Reshel Spears that are in constant movement. The SHIYN Pole in each Spear downloads the Ulta Points' codes regulating the whole event.

(4) The spirals converge above the Pyramid to create the VAU Pole or apex of a tetrahedron system. The two tetras create different forms of the "star tetrahedron" also called a number of things including the DWELLER OF DIVINE FIRE where the Lords rule. This locates the Thrones of the Elohim and their physical representatives (ultra terrestrials, Hierarchy, devachan). This star tetra is also the first of several forms used in creating the LAYOOESH PILLAR which connects the Oritronic and Metatronic realms. It is the "Pillar in the Temple of God" or "Key of David"

(5) The Eye of Ra is a system for interlinking "ley" lines in all time continua, thus the time gate function is important. The "L-gate" often seen in grids is a short version of the more complete Eye of Ra. The Eye of Ra is a rhombus both 1.618 and 2.618 values. In the Reshel it has its minor axis in the Event Horizon and its main dual rhombus' poles in the Pyramid apex or Tsadey pole (1.618 point) and the KRONOS Pole (2.618 point) above the Vau pole in each Spear. There is also another sub system of L-gates or Eyes of Ra in each Spear. The 90° bend of each L is found in the DALLEY and TEYTH poles on each side of

the RESH pole. Each Spear has a double L format controlled by the Resh or "Chief Head Stone" (in Hebrew). This system is called in Ps 118:19-23, the "Gates of Righteousness" in verse 19 and the main system is called the "Gate of Yahway (Lord)" in verse 20. The "head stone of the corner" is the Resh controlling the "L" function. The Christ has been called the Chief Head or Corner Stone that can not be ignored.

(6) The ZAYIN (Zion) Pole is the apex of the pentagonal Spear, synthesizing all poles related to the Pentagonal format. The Shiyn, Dallet, Teyth and Tsadey form the "4" dynamic, the beyt, Yud (Pyramid sockets on the Event Horizon) and Vau poles are the "Haepathia" dynamic related to the tetrahedron and form the "3" dynamic. Together these poles create the "7" and the Zayin pole is the 8th aspect. The Resh is the 9th or ENNEAD pole controlling all actions.

(7) The Resh pole is the apex of a Bethlehem Angle pentahedron whose base is in the Event Horizon and is the same as that of the Great Pyramid. Thus the Pyramid has two apices of considerable power: the Capstone at the 51.8 degrees slope angle and the Resh at the 26.3 degrees slope. There is another point in the Pyramid called the MIDDIN CHAMBER in the middle of the Pyramid's cube. The slope angle for that is 44.497 degrees (the added bit to make 45 degrees is a Selah spoke, or divine spinning energy "beam"). This chamber does not appear in the Reshel grid but is a part of its advanced application.

(8) The SOLARIS Ring is a ring or sphere generated by spinning the Glory or Tsadey pole. It is the primary Sun or divine generation pole for life and life support systems, hence the association with the golden ratio spirals which are a major life support system. Where the SolarIS Ring cuts the golden ratio spirals we have a "Sacred Vault of the Sun." These are located in direct alignments with the Pools of the Moon/Life.

ILLUMINED "L" FROM LINDISFARNE GOSPELS:
"L-GATE" SHOWING THE PRIMARY CONSTRUCTION LINES AND SACRED CHORDS.

22.7 L-Gate

When the two Spears' resh poles merge in the center, remember that the Spears are constantly cycling, the Pools of the Moon of one Spear merges with the Vaults of the Sun of the other Spear...in effect creating an eclipse. This opens a major Gate, called the LION GATE. In Reshel terms the two double gate or Eye of Ra systems come together on the Event Horizon creating one system of two gates or L's. The main central gate or pillar system then forms when the Spears proceed to next merge shiyn poles. The two outer pillars (L's) are the archetypical two temple pillars best known as the Boaz and Yahchen Pillars in Solomon's Temple. These are also called the Pillars of the Abode; they stabilize the central pillar or Layooesh.

There are many variations of energy patterns open to the cycling Spears. An infinite number of systems can be created within the Spinner field.

RESHEL SYMBOLS: The main symbol is the Crescent Moon with 5point star above it most often seen as Islam's logo. It was once found as the logo for Proctor and Gamble until the Christian Coalition forced them to change it. The Templars used it with an additional two stars. It is the protosiniatic Hebrew letter glyph for Aleph, the bull, chief friend, etc.... It was drawn as a Taurus sign with circle and crescent. The Jews once related to God as the "Unseen Rider over the Bull." That is, the Glory pole or "Tsadey" over the crescent. The Reshel system is a primary format in the Hebrew alphabet, obvious when studying the original pictures used as letters. The woman standing on the Moon's crescent is another. Another symbol is the decapitated head or skull, much used by the Templars. The "double resh" then shows up as the head or bird with two faces or two heads, the split stone or mountain, or split head.

WHY TIME GATES? And what is "this phase of our evolution" all about?

When our light groups, still in training, were boosting their frequencies and stability the matrices defining our time continuum were beginning to become hazy and we were experiencing time glitches. This is an indication of inefficient processing and it could become dangerous if the wrong moves were done out of ignorance or without proper communication with Metatronic inner planes mentors. This had occurred once in earlier years when a group tripped out of this continuum and their room disappeared for several minutes, the members experiencing vertigo attacks from the inner ear problems associated with inept time transport. (Their mentors had permitted it to occur as an object lesson.) Thoth provided our groups with the Reshel format as noted above but he also set up educational experiences demonstrating our ignorance of what was going on in the realm of time traveling. If we were going into serious light work we needed to know who the players are and what issues are driving the action. We dramatically learned about the MONTAUK PROJECT and its abominations. We learned about the Kumir ("Grays", non en souled ETS), Lucifer and his fallen angels, who the bad guys are and why as well as the good guys₆.

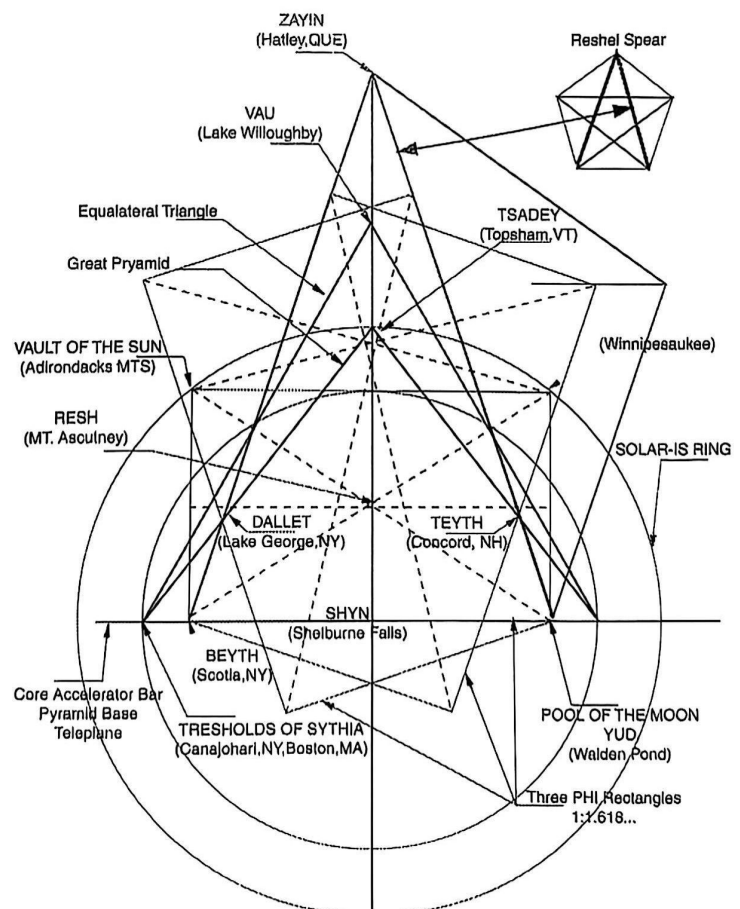

The summarized story was noted in the Preface and is this. Our time continuum is a fallen, half light ("Oritronic") spectrum with racial consciousness also at the fallen level. We dropped out of the RANNA TIME WAVE which is in the full light, Metatronic, spectrum. (Metatron is the highest archangel; the quality of consciousness and being of the Ranna Wave is best described as "Metatronic.") The Fall was

keyed by the time implosion in the Lucifer Star Gate induced by a suborder of the Melchizedek Order whose ideas were larger than their intelligence. This mother of time implosions keyed into the ("future") Crucifixion and then into a number of other harmonic implosions including those of the Montauk Project. In effect we have been working in three continua: the First, that we dropped out of, the Second, fallen one, and the Third which is our future formed by the best wisdom of both the First and Second. Our *PRESENT EVOLUTIONARY MOVEMENT* is the return to the Metatronic Ranna Wave albeit at its lower frequency range.

The bad guys have been trying to break up this evolutionary jump since the beginning of the Fall. Their usual pattern has been to scare humans into believing there will be a comet strike the planet, and/or a terrible plague. "BUT never fear! Help has arrived with our higher ET technology we can save you and give you great technical gifts (which by the way make really great weapons!)...sign up here!" Their strategy is also to guide relatively aware persons and groups into positions of "locking in" in the higher Oritronic range with the idea that they've "made it" and there is no need for more ascension. The old ways are resurrected and the "Oritronic Ceiling" begins to solidify in the Racial Mind further influencing all concerned. The good guys are called the SOLARIANS and are known as the "Shepherds" or "Eagles of Starr." They have a number of programs which work throughout the three time continua in creating avatars, messianic programs and actions providing us with a level playing field (still honoring Free Will). The Solarians are humans, that is ensouled beings inhabiting the stellar worlds and suns. There are angelic orders that also specialize in assisting the Solarians.

The Solarians work out of the main Central Sun of the future called MAZURIEL which will be located in the area of Denebola in Leo. Mazuriel has always been there but did not fall with the rest. In all intra continua work however Mazuriel is a viable and necessary primary factor. To keep their programs glued together with good communications the Solarians have established notable temples throughout the three continua called "Temples of the Emerald Mar" or "Templa Mar", relating to "Temples of Time." Chartres, Rosslyn, and other well known temples are such. We find in them specific geometries related to the RESHEL format. In many ways ARKHOM as a whole is such a temple however it is more a "harmonic" in view of its size that facilitates the overall consciousness and stability of minor time gates in its area.

Systems that parallel the Reshel are those others of the 24 Metatronic Breastplates. So far the Reshel has been the most inclusive that I've found. We know of three at the time of writing. The priests of Ruta put the Reshel grids in place

before Atlantis finally went down. These grids have always been a jump ahead of the collective Racial Mind in their areas and always have provided a strong Metatronic vector, thus making spiritual organizations more effective even when still operating in the Oritronic range.

These grids are designed to be fully activated in the Metatronic, in the lower manageable ranges, at this time when we are rapidly shifting continua. There is presently much written about the stellar races and cosmic history. Most of this is water under the dam and is more in the way than is helpful. Except that information that is bringing forward the refined wisdom needed in the Third Continuum. The Nephilim (fallen angels) via the Grays, other stellar human agencies, as well as our own confused humans have seriously damaged Arkhom via their Montauk Point contamination and control. This influence and damage will be progressively cleaned up by Solarian programs. Its left for us to do our best to continue in the ascension vector. Not to be lulled into complacency or ego arrested ideas that we have no more inner work to do either in ourselves or in helping our mates in this time-ship...the ARK-HOM.

Conclusion

In summary, there is a Solarian organization on an island base in a distant future sea, the EMERALD MAR; that island is presently known as Masada in Israel. It is called Korbola in that future time. The Solarian Korbolans have many notable programs that span back through the three continua which are designed to work with the Hierarchy, angelic orders and Ultra-Terrestrials in facilitating the redemption and evolution of this fallen continuum and the unification of the three. This present phase of the Transition from the second to the third continuum is critical. One of the systems put in place by the ancient Atlan priests of the Holy Isle of Ruta, as a part of the Solarian effort are the specialized "Reshel" grids which have a strong Metatronic vector and are in fact intended to be fully Metatronic when working at their full potential... thus are designed for now and for the future. The grids may be employed as group formats, temple geometries or the same covering large areas of the Earth. They do not control people but they are important in enhancing and facilitating spiritual programs.

That Grid now called ARKHOM is one such system. A major one. Having been "rebooted" by the Sinclair Expedition in 1398 CE, resonating with the same systems in Europe, it would have been of assistance in influencing the creation of the Iroquois Confederation and then follow-on the European North American colonial establishment. This expanded the Confederations' program which is reflected in the American Bill of Rights, Constitution. Arkhom's grid influence would have inserted a Metatronic vector into the mixed culture frames of New England that provided a thread of spiritual continuity from ancient times into the present ascension phase. This vector would also effectively facilitate ways of group thought and action that would carry over into the new continuum immediately before us as well as easing our transition from here to there.

Footnotes

1 Much of my information is based on Thoth's commentaries given via Reverends Maia and Simeon Nartoomid of the Church of the Johannine Grove of the Machenaim in Crestone, CO 91131. I have done extensive interpretation of the basic information and it should --not-- be assumed that Thoth or the Church agrees with my ideas appearing above. If the reader wishes direct access to the basic information it is available in the Churches' *TEMPLE DOORS* periodical.

2 I Peter 2: 4-8.

3 *Genesis*; by David Wood, Baton Press, Tunbridge Wells, Kent, England; 1895 Rennes le Chateau in southern France is an ancient major time gate area using the Reshel grid system. This was known to the Templars and more recently by the two priests in that area, Fr's Sauniere and Boudet in the early part of the 20th century.

4 *The Sword and the Grail*, by Andrew Sinclair, Crown Publishers Inc., NY, 1992. This excellent book shows the outline of a knight punched into stone. The stone was engraved by those of the Henry Sinclair expedition of 1398 CE to Nova Scotia and the US East Coast. The expedition also built the NEWPORT TOWER which still exists at Newport RI.

5 *Voices in Stone*; by Benard I Pietsch, self published, Rohnert Park CA, 1973.

6 For more information, very readable, order the *KOALA* pamphlet from the Church of the Johannine Grove of the Machenaim in Crestone CO. The E Mail address is johgrove@fone.net or call 719 256 4057. This is the best explanation I have seen that describes these grave issues at the high level it deserves.
