Profile

Swedish Goth Hacker

Freya is a Swedish resident for Pripyatory

She is a resident in Pripyat Purgatory.

PERSONALITY

- Cold
- Vegan
- Tech-Savvy
- Apathic
- OCD
- Loner

Freya Larsson was a Swedish political hacktivist, best known online under the alias Bitrate. She became prominent in underground hacker communities for exposing corruption, leaking confidential data, and targeting both state and corporate institutions. Following her death under suspicious circumstances, she became a resident of Pripyat Purgatory.

BACKGROUND

Freya was born in Gothenburg into a politically liberal yet emotionally cold household, where she grew up detached but intellectually sharp. By adolescence she had already broken into school systems and government databases, cultivating a reputation for both brilliance and trouble. Repeated expulsions ended her formal education, but she found belonging in underground activist and hacker circles. Operating under

the handle Bitrate, she became a known figure in the grey-hat hacking world: leaking footage of police violence, exposing corrupt contracts, and sabotaging corporate secrecy. Despite earning respect from activists, she kept her distance, maintaining an air of cold cynicism.

In her twenties, Larsson established herself within grey-hat hacktivist circles under the handle "Ph0lcU5". Her operations included releasing evidence of police misconduct, data-mining government contracts, and exposing corporate malfeasance. Although she was praised by activist movements, she remained socially withdrawn, preferring solitary work. Her health declined due to stress, chain-smoking, and dietary restrictions linked to veganism and celiac disease, but she remained active in the scene.

Her health faltered under constant stress, chain-smoking, and the strict limitations of her diet, but she continued working with obsessive drive. Her greatest act was also her last — a massive leak exposing collusion between Scandinavian officials and multinational oil corporations to drill in Arctic territories that were supposed to be protected.

DEATH

Freya was found dead in her Gothenburg apartment. Authorities reported it as an accidental overdose of benzodiazepines and opioids, yet the drugs did not match her known habits. To those who knew her, the overdose was no accident but a silenced execution dressed as burnout.

AFTERLIFE

In Pripyat Purgatory, Freya persists much the same as she lived: withdrawn, restless, and skeptical. She resides in a locked, underground apartment with blackout curtains, padlocks on drawers, and a digital blog where she writes compulsively. She smokes endlessly and avoids all communal events, speaking only when forced, her words clipped and dismissive. She's not very fond of people.

She assumed the purgatory is an extended dream, that she's in a coma of some sort, some residents think she's crazy, others think she's just lonely. Freya occasionally aids others through encrypted notes or data dumps, though she never admits to it. Some say she's watching everyone. She say she's trying to wake herself up from this place by breaking the system from the inside.

Trivia

- She's obviously based on Lisbeth Salander from "The Girl with the Dragon Tattoo"
- Her face was based on Marylin Manson features
- She runs the blogpost "Sh1t&G1ggl3s" where she shares her bizarre claims like a hidden child-trafficking island, cancer treatments being corporate financial loops, and foreign intelligence agencies
