Sexy, Charismatic, Annoying

Theresa "Terri" Hopkins, better known as DJ Psilocybin, is a 26-year-old hyperactive, flamboyant, and eccentric DJ from England.

BACKGROUND

Born in the quiet town of Stotfold in Bedfordshire, England, Theresa Hopkins was the eldest daughter of a devout Christian family. Her parents were reserved but loving, and raised her with rigid values: modest dress, church every Sunday, and a future they envisioned would involve a teaching job, marriage, and staying close

to home. But Theresa had other plans. From a young age, she gravitated toward raves, electronics, and Electronic music. By 16, she was pirating software to make beats, sneaking trance music through her headphones during youth sermons, and stashing rave flyers under her mattress.

The tension exploded when she turned 17. After a particularly harsh argument about her "degenerate lifestyle," she ran away from home, taking only a backpack and a cheap MP3 player. She drifted through squat parties and warehouse raves, eventually becoming a groupie for a regional EDM act. She started off sleeping in vans and carrying gear, but her talent behind the decks didn't go unnoticed. Within a few years, she'd reinvented herself completely as DJ Psilocybin a neon-clad, big tittied rave queen obsessed with psychedelics and trance basslines.

Her public persona was wild, vulgar, and impossible to ignore. She bragged about her breast implants, made horny jokes on mic, and openly flirted with fans of all genders. Her signature look — tight crop top, layered tutu, ripped fishnets, and bright blonde pigtails — became synonymous with her chaotic sets. Though she kept in touch with an estranged younger sibling online, she never contacted her parents again, despite checking their Facebook page obsessively from burner accounts.

DEATH

Her biggest show yet, in a packed London warehouse. Halfway through the set, between chugging flavored vodka and screaming into the mic, she crushed up a cocktail of ketamine, 2C-B, cocaine, and a dropper full of something no one could identify.She tragically died mid-performance after a fatal accidental overdose. The lights strobed. The bass hit. And then she collapsed behind the decks, her hand still on the fader, By the time someone realized she wasn't moving, it was too late.

AFTERLIFE

Now in Pripyat Purgatory, DJ Psilocybin continues spinning like she never missed a beat. She's technically unassigned, but serves as the go-to fixer for all things music, sound, or tech. She never speaks of her life before stardom. But when she's alone — or thinks no one's watching — she stares a bit too long at old photographs. The regret isn't loud. It's quiet, When the music stops, the guilt comes back. Maybe she just doesn't want to stop dancing.

Trivia
