THE OFFICAL JOURNAL OF THE
UNCIRCUMCISED SOCIETY OF AMERICA

4 **UNCUT CORRESPONDENCE**

From all over the world, from both the uncircumcised and the circumcised, come comments about skin, the lack of skin, restoration, circumcision, cheese, chewing, observations, exhibitions, etc. In short, any and everything under the sun.

6 **FORESKINS IN THE NEWS**

Heavyweight trials, lightweight antics, information, insights, attitudes, and a global perspective on what's new in lace.

9 **TRUE TALES OF FORESKINS & CIRCUMCISIONS**

From the files of the USA come some first person accounts of their experiences with their skin, and a few experiences about the loss of it.

13 **DADDY'S FORESKIN**

Meet Joe, a mature, kind, sexy, demanding, creative, intelligent, hunky, hung (and then some!) uncut daddy of a man who makes a little history to be FQ's first uncut centerfold.

17 **UNCUT ITEMS & EVENTS**

Geared towards the timely and the material, things and places and occasions where the foreskin takes centerstage.

18 **THE LACE CURTAINS OF TAORMINA**

A fond recollection of the masterful photographs by the transplanted German baron who found paradise photographing the uncut youths of Sicily at the turn of the century.

20 **UNCUT FICTION**

SUMMER OF '69 takes you for a dive into the folds of the biggest foreskin the author ever encountered. PICKUP is an experimental piece of conversation all about what lies under the skin. THE SONG OF THE LAKE GREBE takes a walk through the fields of the past.

23 **HUNG, BLOND & UNCUT**

Our second centerfold could be the companion to our UNcut DADDY centerfold (we think like a scale), and it would be a good start in an uncut lineage. Yes, he's blond, yes, he's hung, and yes, yes, yes, he's uncut.

27 **UNCUT VIDEO**

Yes, you can sit in front of your TV and plug these cassettes into your VCR and feast on the wide variety of foreskins that will parade across your screen.

28 **FORESKIN AROUND THE WORLD**

Here and there, history, fantasy, fact, and photos all about the covering on the end of international dicks.

29 **TELL IT TO THE SARGE**

The department for all you unskinned men with dreams of circumcision. The Sarge has his knife ready, are you?

31 **UNCUT LIBRARY**

From research documents to relaxing jack-off pulps, our books department will tell you where to find the tomes on foreskin, circumcision and all the stops in between.

32 **ACORN & INTACT**

Two friendly rival organizations share some space to tell you where each is coming from, what each proposes, and lets you make up your own mind. Now how's that for objectivity?

33 **USA UPDATE**

Bud Berkeley updates the activity and action from the Uncircumcised Society of America. You might find just about anything here—and you probably will, in abundance, on a regular basis.

35 **DR. SKINNON**

Our resident MD (urology) stays behind his nom-de-newspaper, but gives out solid advice on just about any topic related to the subjects at hand (so, please, no questions about the best cooking temperature for cheese fondue).

36 **THE ARTIST & THE FORESKIN: OSCAR**

Each issue a different artist who exercises his talents in creating foreskin fantasies (and realities) on paper.

39 **UNCUT CLASSIFIEDS**

Oh, are you ready for this? More foreskin waiting to be fondled that you ever though you'd see in one place at one time.

46 **UNSKINNED**

If a picture is worth a thousand words, then we've saved ourselves a lot of typewriter time by closing with... a very natural man photographed by Roy Dean.

UNCUT CORRESPONDANCE

UNCUT DUO

Enclosed are a couple of photos. The one with the pierced foreskin is of me. The close-up is of my lover's

foreskin. Just think, two lovers, both uncut, both very much into foreskins! Lucky us.

—A.G.

COTTONBALL STRETCH

Reading your book, *Foreskin*, I learned how to stretch mine. I have successfully used the "cottonball" method and have occasionally gone out to dinner with that enormous cockhead in my pants and

played with it under the tablecloth in the restaurant while eating. However, I prefer to stretch the skin as hard as I can. Now I can easily put six fingers inside my foreskin and stretch it.

—J.C.G.

FORESKIN ABUSE

Like so many others, my lover is cut and until we met four years ago he had little or no interest in uncut men. Now he cannot get enough. Since we are both very heavy into the leather, S&M scene he has also discovered that the foreskin lends itself to a great deal of endless pleasure and, of course, abuse. We have a very well-equipped S&M room for fulfilling just about any fantasy, but during the past two years we have discovered a wider interest in uncut men to have their foreskin fantasies turned into reality.

During the course of the last couple of years we have sutured foreskins closed for several hours or days, nailed foreskins to tables, placed rings through foreskins,

and, in a number of cases, have placed padlocks through the foreskins and retained the key for several weeks, thus insuring that the individual would return for a medical update every few days.

Unlike some that are only interested in the actual scene, we maintain very sterile conditions prior to, during, and after any piercing, nailing, or suturing scene. We are firm believers that the healing process should not take away from the actual scene. As with any S&M scene, the bottom should always make sure the top knows what he is doing and at the same time feel confident that his safety and health will not be placed in jeopardy during or after a scene.

—The Bachelors

A VERY LONG ONE

I have a passion, almost an obsession with foreskins. I have one, a very long one that I spend a great deal of time stretching. I now have more than 3" past the head of

my dick when you pull it out. On its own, it hangs about 2" past the tip. A lot of guys are fascinated by it. I have invented and perfected several stretching methods.

—Roger

TATTOOED FORESKIN

I'm fortunately uncut with a very good foreskin which I'm in the process of having tattooed, a photo of which I have enclosed.

—Mike

CUT, BUT NOT FORGOTTEN

I have always been fascinated with the question of foreskin/circumcision. I was circumcised at birth during WWII while my father was in the Pacific. I discovered when we went swimming at the YMCA when I was about five that he was uncircumcised. The shock that something had "happened" to me—circumcision—was overwhelming, but my delight at learning that my dad wanted to spend time with me and teach me to swim was also strong. If I am ambivalent about circumcision, this is perhaps the reason. I felt very deep love for my father at the same moment that I

experienced self-doubt. I always sleep on my stomach, more recently on my side, but *never* on my back. I think this is because of a fundamental fear of being sexually abused when I am helpless—perhaps this is caused by neo-natal circumcision.

I've never had any serious complaint about my penis. I do not wish to undo my circumcision, and I do not envy those who still have foreskins. But I *am* very curious. . . I had an uncut roommate in college my first month. We were both doctors' children. I made gay advances toward him, and unfortunately wrecked the relationship. Some foreskins are beautiful, others are not; I suppose this is no surprise, since the same is true of faces.

The only problem I have had is delayed ejaculation—or no ejaculation—with women. This is surely partly true because of my

constant masturbation, even when I have had relationships. I am bisexual, to the best of my knowledge, but I often say that I am gay, because I have had no heterosexual relationships for almost ten years now.

The Finnish sauna was somewhat puzzling to me, since most Finns are uncut. Some Swedes thought a friend and I (both of us well over six feet) were uncommonly large American Jews, not knowing about near-universal cut rates in America. I've met three uncut Jews, and I know one man (a Dane) who had to be circumcised when he married, because of adherent foreskin. A great many American men seem not to know that they are circumcised. This collective amnesia is very strange. I believe that in extreme Arctic areas, circumcision rates should be low, and in the tropics high, unless naked bathing is

the practice.

LETTERS: *Foreskin Quarterly* invites letters from its readers on all subjects, but especially on the subjects of foreskin and circumcision (we'll read *anything*, but we will only print letters that apply to the subjects at hand). Don't bother being brief, use your letter to explore the subjects in as much detail as you wish. We'll edit out the uninteresting and redundant parts. We only use initials for signatures in letters that we print, but you *should* sign your letters and include your address (in case we want to write to you). Send letters for *Foreskin Quarterly* to: FQ/Alternate Publishing, 964 Folsom Street, San Francisco, CA 94107. Matters directly related to the USA and not to the publication should be sent to: USA/Bud Berkeley, Box 26011, San Francisco, CA 94126.

FORESKINS IN THE NEWS

WHEN THE HUN SKINS...

There may be no one in erotica land with the wide spectrum of bizarre sexual states of The Hun, master of mayhem in pen and ink, and few other artists who have as high a quota of uncut cocks among their fantasy figures. In fact, The Hun has been known to create uncut versions of previously-cut figures (and vice versa), which not only let you hang his singular figures in pairs, but prove the adage that, with a little practice, you can have it both ways at the same time. Having recently unleashed *The Hun Book One* on an unsuspecting, but appreciative, world—filled with choice, slimy, dripping, extended foreskins; The Hun has, in his infinite and wickedly fertile wisdom, issued its companion, *The Hun Coloring Book*.

Presented in an awesome 11"x15½" (we're talking big pictures!), *The Hun Coloring Book* contains 48 pages of pure-outline versions of some of The Hun's most popular and famous sexual nightmares. But don't be misled by the choice example illustrated here. Not everything is so SM-oriented. There are other Hunmen in the book in less severe circumstances: like Surfers (in Bondage), Telephone Repairmen (in peril), Accountants (stripped and flogged), Basketball Players (reduced to whimpering mounds of flesh on the dungeon floor), Interior Decorators (turned into hideous forest creatures), and the like. Something for everyone—at least everyone you know.

This coffeetable coloring book is bound in urine yellow and unfolds to reveal work by The Hun and his two proteges: Cirby (primitive) and Skipper (demented). It runs a cool twenty bucks and does *not* include crayons. And it's unlike any coloring book you've ever held in your hot little hands. Want one? You bet your ass you do. Add \$3 for postage (not only is this baby big, but he's heavy!). Order from: Hunhaus, Box 19240-A, Los Angeles, CA 90019. Ask The Hun about his first child, *The Hun Book One* (not for coloring, slightly smaller, just as hot); but ask in a docile, pleading little voice. Then, just wait for the next full moon and the howl of The Hun to come echoing across the moors!

LAWSUIT NUMBER ONE

A lawsuit was filed in July in the Superior Court of Marin County California to challenge the legality of routine circumcision of the newborn.

This case, enjoined by INFORMED CONSENT, will determine whether a parent can consent to the removal of a normal, health, functioning body part of an infant or if each person has an inherent right to his own intact body.

The Defendants, Kaiser Hospital and the Permanente Medical Group, filed a Demurrer stating that the complaint is not valid because the Plaintiff's mother signed the

consent form. INFORMED CONSENT and the Plaintiff argued that the mother was not circumcised and the plaintiff did not sign a consent form for his own circumcision.

In September, the Court determined the case to be valid on two charges: *battery* and *false imprisonment*. The Judge, recognizing this to be a fight for an infant's rights, stated, "Clearly, this is *not* an issue of informed consent."

The Defendants will answer the charges by the end of October and should go before the Court early next year.

According to Dr. Richard Morris, attorney for the Plaintiff, the Defendants have the advantage of a large defense budget—and the Plaintiff has the advantage of being in the right. If you would like more information on this case, or to offer your help, contact Marilyn Milos, Informed Consent, Box 493, Forest Knolls, CA 94933.

SO SORRY IN BEIJING: NO VISA, NO FORESKIN

A professor from The People's Republic of China came to the U.S. as a visiting scholar for a year and decided that he wanted to stay on permanently. He made plans to send for his wife, daughter, and athletically-inclined 20-year-old son.

During preparations for the trip, the son decided to have himself circumcised, so that he would look like (he assumed) all the American guys in school. But since the family lived in Northern China, slightly less sophisticated than the city medical life, infection set in and he had to postpone his trip to Beijing for a passport and documentation to travel. Once he thought he had is on her dedication to vegetarianism—to which she has also recently converted Prince Charles.

Perhaps this will establish a new

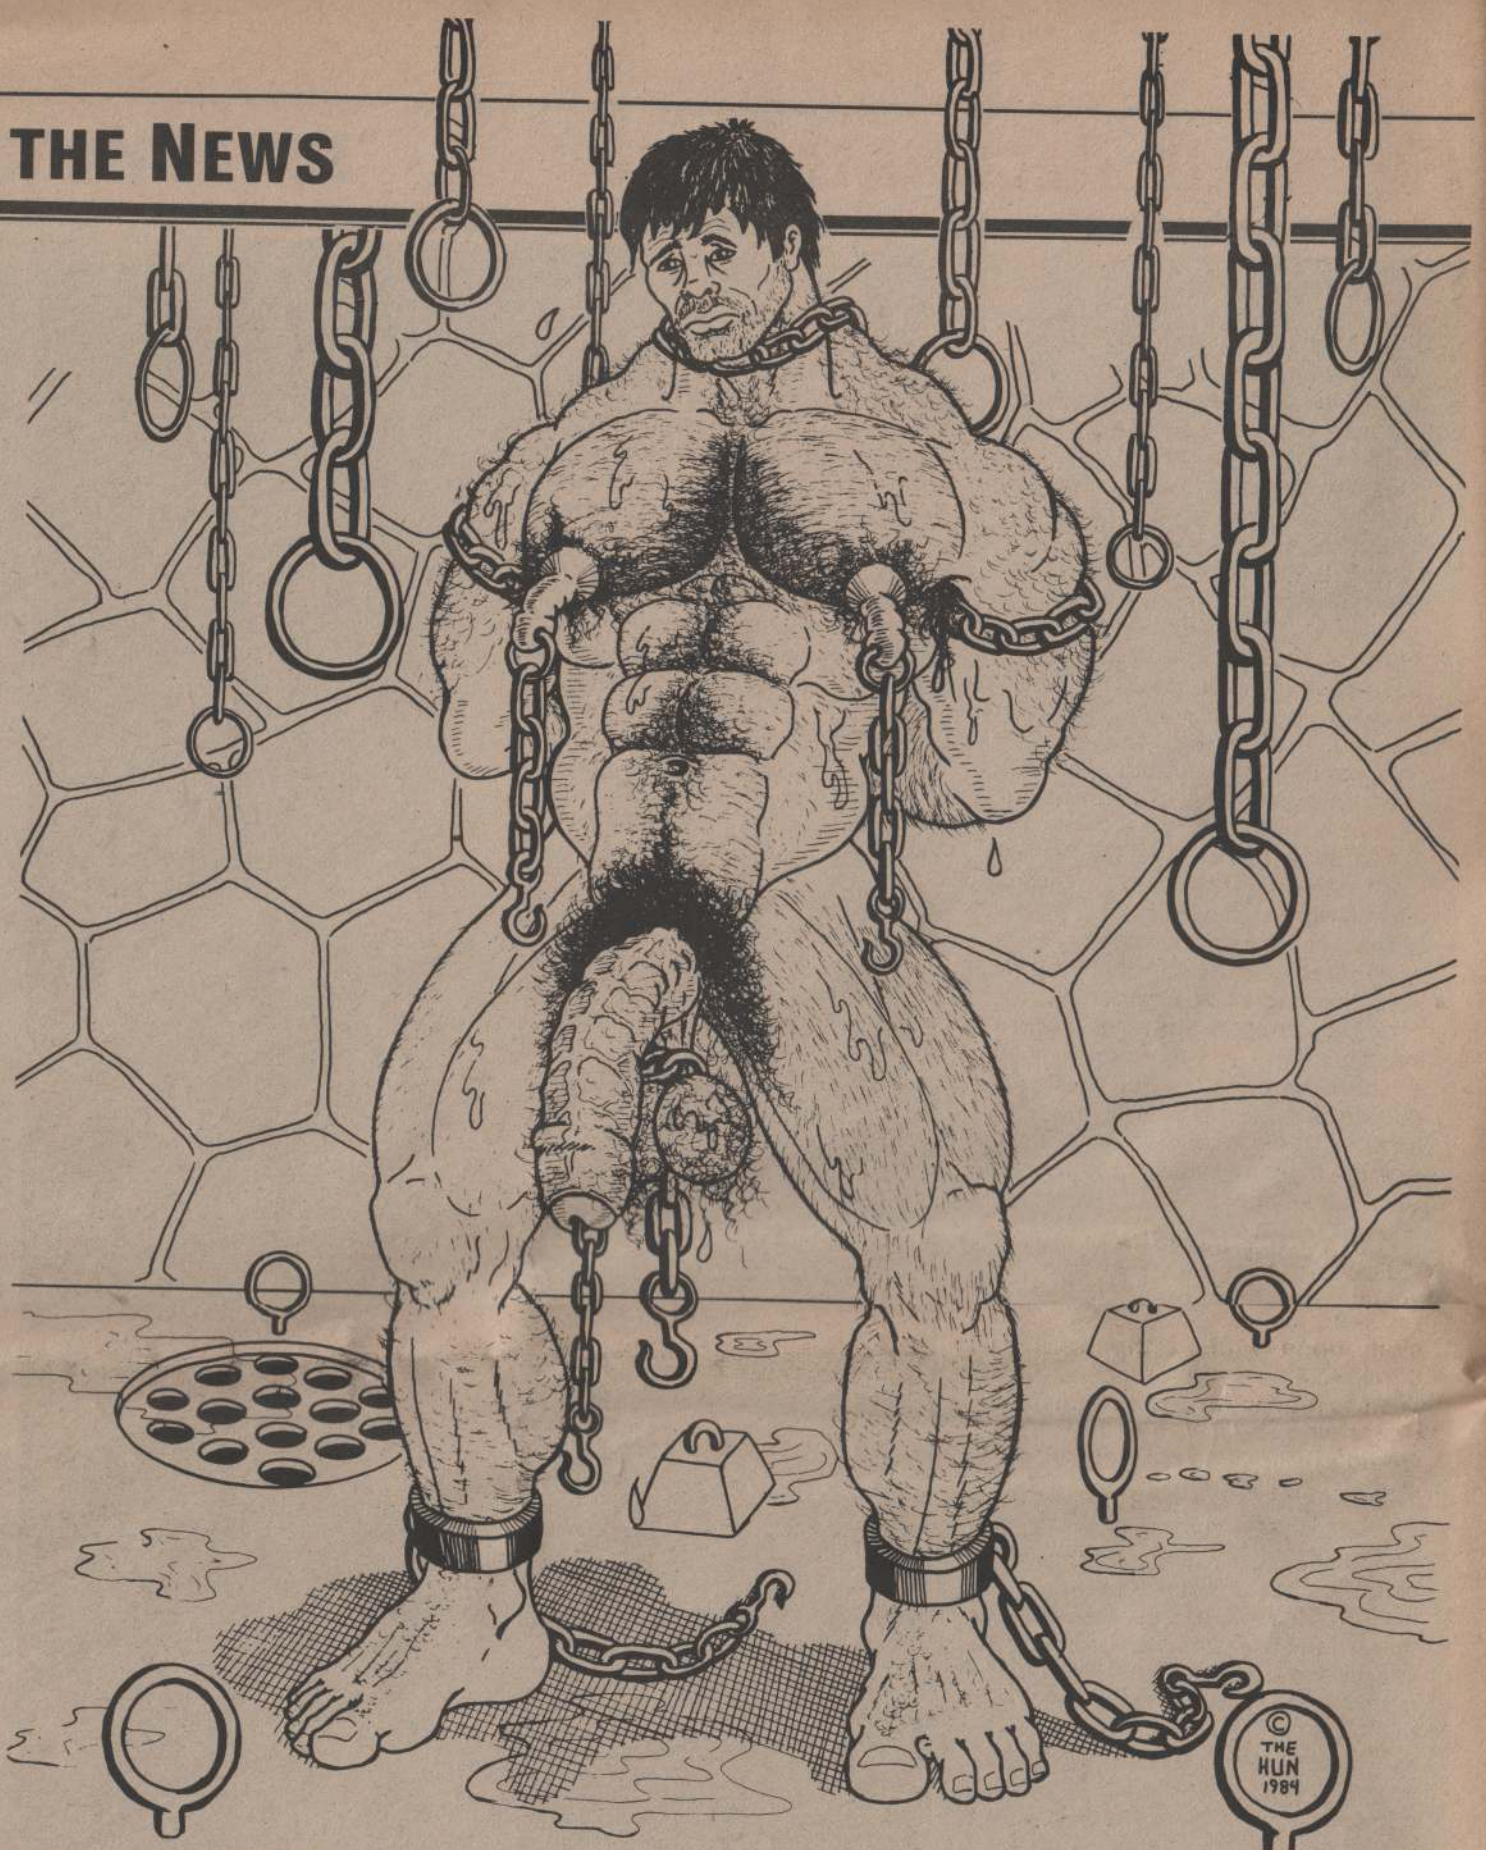

tradition in the Royal Household. THE ROYAL PREPUCE

According to reports published in a recent Toronto newspaper, Princess Diana has convinced Prince Charles that young Prince Willie and young Prince Harry will keep their foreskins. Princess Di is strongwilled on the subject, as she recovered, he found that he had developed *other* genital complications, and had to postpone his second planned trip to secure his exit documents.

Time caught up with him; policy changed in China and exit passports are no longer easy to come by; finally he was denied an exit. His problems with his new-cut wang continued.

Then the professor's year was up—and he was asked to return home by his government.

Net result: sick dick, no emigration, anomalous status for son in Chinese locker room.

FORESKIN RECONSTRUCTION

Foreskin restoration is a phenomenon of the '80s. The editors of *Drummer* and *Foreskin Quarterly* receive more letters concerning the possibility of foreskin reconstruction than we do any other aspects of foreskin or circumcision.

Obviously a lot of our readers are circumcised. When we first published the fact that a lot of American doctors are experienced in the art of foreskin restoration, many men realized that it would be possible for them to *have* a foreskin instead of just dreaming about one of their own.

In this issue we will look at material from BUFF (Brothers United for Future Foreskins) and hear a first-person account.

A note about BUFF. This is an information organization concerned with techniques of restoration. It does not have a membership, publish ads for persons seeking correspondence, nor provide photographs of reconstructions.

This material should not be construed as providing medical advice. The information is general, and does not necessarily apply to a particular individual.

CIRCUMCISION

Few are so dissatisfied with the results of surgery that they want it reversed. An exception is circumcision, done without the person's consent. Routine circumcision is a useless mutilation and circumcised males who are aware of this often would prefer to be natural again.

REASONS FOR RESTORING THE FORESKIN

COSMETIC—Some prefer the esthetics of the natural penis.

PSYCHOLOGICAL—Being "all there" and natural provides more self-confidence and enhances the male's self-image.

SENSITIVITY—When the foreskin is removed, its mucus membrane lining, containing sensitive nerve endings that enhance sexual pleasure, is lost. The head of the penis, now uncovered, dries out, rubs against clothing, and loses sensitivity. Sometimes the sensitive frenum is removed along with the foreskin. Although the frenum and the lining of the foreskin cannot be replaced, re-covering the head causes it to become soft and moist again, and more sensitive.

SEXUAL MANIPULATION—The foreskin acts as a natural stimulator, either through stroking back and forth during masturbation or foreplay, or by gliding action during intercourse, as a natural "tickler".

WHAT TO EXPECT FROM RESTORATION

The results vary with the method used, and with the individual. No method can make the penis as good as new. Amputated nerve endings are gone forever. If the frenum has been removed, it can't be replaced. The new foreskin, although it may be quite satisfactory cosmetically, will not regain all of the lost sensitivity.

Almost everyone who has had his foreskin restored has reported an increase in the sensitivity of the head, after a few weeks to a few

months of having it covered once again. Usually, this results in enhanced sexual pleasure. An important factor affecting the

return of sensitivity is the age at which the foreskin was amputated. Those who regain the most sensitivity are those who were cut later than in infancy. Specifically:

A—The earlier the foreskin was amputated, the longer the head has been exposed and dry, rubbing against clothing, and the greater the loss in sensitivity.

B—If the foreskin was removed at birth, the tender head of the penis has been exposed to the irritating acid urine of wet diapers. This also causes damage.

C—At birth, the foreskin is naturally adherent to the head of the penis, not separating naturally until later. Removal of the foreskin at birth requires forcing this separation, tearing it loose, which causes damage to the surface of the head. Sometimes, forcing the separation tears away some of the mucus membrane of the head, leaving pits that remain throughout life.

D—The amount of tissue removed affects sensitivity. Removing the frenum, the "G-string," under the head often happens, which results in the loss of a very sensitive part of the penis. Most infant circumcisions are hurried and sloppy affairs, and more damage than necessary occurs.

SURGICAL FORESKIN RESTORATION

There are two basic ways of restoring the foreskin, surgical and non-surgical. Most surgical methods use a skin graft to cover the head of the penis. Part of the skin of the shaft is cut loose and inverted over the head to form the inner lining, then covered by skin taken from the scrotum, thigh, or other areas. Some methods require only one operation, and others require more.

Another surgical method, if there is slack in the shaftskin, is a "Z-plasty", which re-shapes the slack to get enough length to cover the head.

Yet another surgical method stretches the skin of the shaft to form a new foreskin. The surgeon implants a ring, made of platinum, stainless steel, or plastic, under the skin, brings it over the head of the penis, and tightens the ring to hold the skin forward. Over time, it stretches to form a new foreskin. This is one of the least objectionable methods, as it involves no foreign tissue grafted onto the penis. There have been problems in finding a suitable material for the ring, one which would be retained by the body long enough to accomplish the stretching. This method led to the development of the stretching method, which uses tape instead of a surgically implanted ring to hold the skin in place.

THERE ARE MANY DISADVANTAGES TO THE SURGICAL METHODS

A—Trying to find a doctor is usually an ordeal. Most ridicule the patient, as did one who said sarcastically: "I take them off, not put them

TRUE TALES OF FORESKIN & CIRCUMCISION

ITALIAN SAUSAGE

I sat next to this hunk on the subway. He was going home from his construction job with lunch box in hand and wedding band on his finger. He had dark twinkling eyes that seemed to constantly smile. He seemed so friendly I couldn't help but speak to him and I got a huge grin in return. He looked Italian and my mind was trying to conjure up his cock. It just had to be uncut! "How far you going?", I asked just to be neighborly and he said, "Wherever you going?" Wait a minute! Is he putting me on? Sure enough, I got off and he followed briskly under foot.

"Wife working late tonight," he said as he smiled.

I didn't know what to say next.

"Any place around here I can get some head?"

WOW! "My place," I couldn't resist. "Thought you would never ask!" he laughed.

Well, I pulled his huge piece of meat out of his pants and it wasn't easy because he had a roaring hard-on even before we got to my place. Hot dude! Big fucking slab of salami, but there was no skin covering it. Too bad. But as I started to work on it I realized there was skin creeping forward. I stopped dead in my tracks and studied his cock up close, and then grabbed the foreskin and pulled it forward. Quickly he shoved me away and pulled his foreskin back out of sight. He wasn't smiling either. But he turned all red in the cheeks. He was embarrassed about being uncut I figured. "Take a hit," I offered him some poppers and his dick was all mine. I chewed and nibbled and pulled at that foreskin until I thought he was going to go crazy. He squirmed like hell, and kept hitting the poppers.

The next time he came around his foreskin was drooping all over his cockhead. His twinkling eyes were telling me, "Chew, man, chew."

CUT AS A MAN

I was 21 years old when I finally got my foreskin clipped off, and I've always sort of regretted it. I was supposed to be "circed" when I was about two weeks old, but I came down with a cold and my parents never got around to it again.

My father is circumcised, and always wanted me to be circumcised like him. He was cut really tight, and has a scar halfway up the shaft of his penis where he was cut "tight".

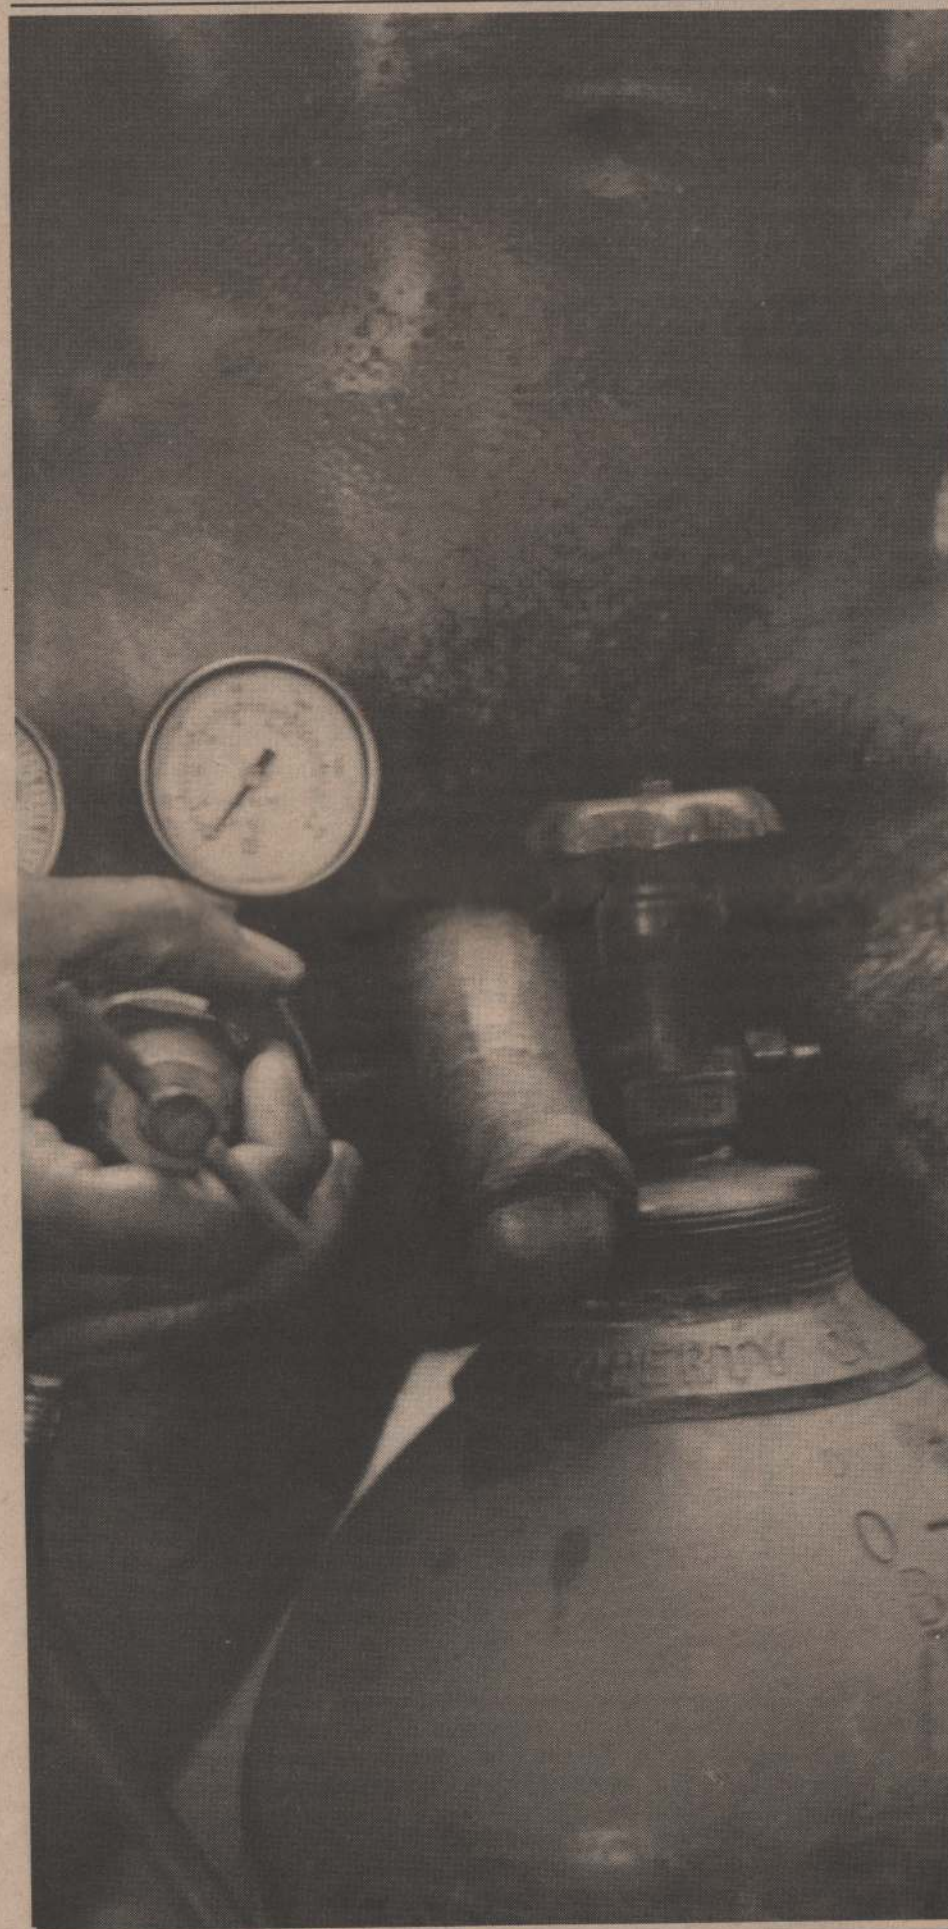

I had a long foreskin, about one-half inch overhang, with a very thick frenulum. The head of my penis, the glans, is about 1½" in diameter, and swells to 2" with erection. I didn't have any trouble pulling the foreskin back when the penis was soft, but the foreskin was rather tight when I had an erection.

Almost all my friends were "cut", and I was asked more than once when I was going to get my penis "cleaned up". I kept my penis very clean during adolescence and up to the age of 21. My parents never told

me anything about keeping my penis clean, and sort of ignored the whole matter. I know that, if I had had to have surgery as a child or adolescent, that my parents would have arraigned for me to wake up without my foreskin, but I was very

my glans more easily during erection. I felt sort of deformed anyway by having this huge head sheathed in a rather thick, heavily-veined foreskin with a frenulum about ¼" broad.

I had great sex with my penis dur-

Photos by Reflex Studio

healthy during that period and was never hospitalized.

I noticed that the frenulum was the most sensitive part of my penis. My parents never told me that I could easily have stretched the foreskin opening to accommodate

ing those years, though, with my girlfriends appreciating my large glans with its attendant foreskin bunched behind it, rubbing the vagina.

I was 21 years old when I broke my nose during college football

practice. The bone was in several fragments, and I was told by the health service doctor that it could only be repaired under general anesthesia. I asked him if he could "clip my foreskin at the same time." He grinned, and said he would be glad to.

I still remember coming out of the anesthesia. My nose and my penis were bandaged. It was three more days before I got to see my penis during the daily dressing changes. The frenulum had been severed where it attached to the glans, and the small fragment left hanging is still the most sensitive part of my penis. The foreskin was completely gone, but I was not cut as tightly as my father.

The surgeon told me later that he had removed the frenulum purposely to decrease the sensitivity of my penis, as was recommended during his residency training. There were still plenty of nerves left in the glans to bring me easily to erection, and it was nearly three months before the head changed color from the deep, shiny purple that it was when I had a foreskin to the dull, red color it is now. It was six months before it lost enough sensitivity for me to let the glans ride "bare" in my jockey shorts.

I am not sure that I did the right thing, but at least I don't feel self-conscious in the dressing room or around my father. My wife is satisfied with me sexually. By the way, I didn't want my two sons to be circumcised, but my wife, being Jewish, insisted on it. I wish that society didn't insist on so much conformity, and that I was more self-determined. I really don't think that very many people would choose to be circumcised if they really had a free choice in the matter.

FORCED CIRCUMCISION

Because of my personal experience with circumcision, I have followed with interest the letters from your readers which you have printed in Foreskin Update. My experience might add to the store of knowledge being developed by the USA (Uncircumcised Society of America), and if it helps to prevent one unnecessary mutilation of a male child, it will be worth it. Mutilation might sound extreme to some of your readers when used in reference to infant circumcision, but that is what it is, no more and no less. An informed decision made by a consenting adult for cosmetic surgery is another matter entirely.

While I was circumcised at birth, the doctor did not remove the entire foreskin from my penis. My parents were divorced when I was six and my mother remarried when I was eleven. My stepfather was a much older man than she, a retired army officer who had grown children of his own.

In short order I was shipped off to a military boarding school to "make a man out of me," and was able to visit home only on limited school holidays and during the summer

break.

When I was fourteen, my stepdad decided to take an active interest in my "development." That summer, he planned an extensive education for me—I was to become an expert swimmer, learn to drive a car like a pro, learn golf and become a good skeet shooter. During our drives to these lessons, my stepdad lectured me extensively on sex education and warned me repeatedly about the dangers of masturbation and how it would prevent me from becoming a "real man."

Well, one day it happened. On a Saturday afternoon when I was sure

that my mother and stepdad were at the golf course, he returned to the house, supposedly for his prized clubs, and walked in on me while I was jacking off.

The next week, when I thought we were driving to a golf lesson, he told me how disappointed he and my mother were in me, and that we had a special appointment to keep that afternoon.

I was rather surprised when he drove me to the office of a doctor who had been at our house on several social occasions, but I prepared for another long, and this time medical, lecture on the evils of

masturbation. How wrong I was! It was obvious that the doctor was waiting for me.

We were immediately admitted to the doctor's private office, where it was explained to me that I was to be re-circumcised because my original circumcision had not removed enough of the foreskin. My stepdad told the doctor that he wanted me cut high, so that there would be no foreskin left. He also wanted my frenulum completely stripped off. I was told to strip, and after a brief examination the doctor said he would do sufficient cutting to please my stepdad.

Over my protests, I was sent to an examination room to be "prepped," amid a lot of crude jokes among the nurses. Soon the doctor, accompanied by my stepdad, came into the room and indicated that I should lie down on the table. Again I protested, but in vain. My stepdad had his way and I was cut according to his directions.

After five days, my stepdad brought me back to the doctor's office to have the sutures removed. He continued to "inspect" me each week that entire summer to insure that, as he said, "we've cut enough of your meat off."

Since I've been on my own as an adult, I've refused to have anything to do with the bastard. I now know that he was just getting his jollies off at my expense—in the same way that service officers do with young recruits! Don't tell me that they have all those young recruits cut for "health reasons"—I know better.

I hope this letter helps someone out there, as I recently learned that my much older stepbrother had undergone a very similar experience at the insistence of his father, my stepdad. Oh my, I hope he gets his one of these days! Even with this experience, I'm neither pro nor con on circumcision for anyone else. Each male should have the option of making this decision for himself—it should not be decided for him by anyone else.

JASON'S REVENGE

My brother Jason was the only kid in the neighborhood with uncut dick. My other brother and I were cut and so were all our friends. Jason loved to show off his dick and sometimes wagged it at us saying, "Want some skin, fella?" Some of the guys were jealous and once at school he was pissing at the urinal when two boys came from behind and grabbed his dick and quickly tied his skin shut so that the piss couldn't escape. His foreskin looked like a balloon. They tied his cock to a door handle so he couldn't get out and held his hands behind. They yelled out for other students to come in and take a look. Jason's poor dick skin was really being stretched and all the guys stood there and laughed like hell. Jason realized he couldn't fight back so he joined them and laughed too. A few days later he showed up in the showers with his skin all full of piss again and a string around the tip. He wagged it at all the fellows as if to say, "See what I can do and you can't, you fuckers!"

BASEBALL CHEESE

I got my first dose of cheese a few years ago and it was a double dose. At the time I thought I would puke, but now I recall it as being my initiation into heaven.

I picked up two hitchhikers who were dressed in baseball player uniforms and mits. They turned out to be brothers in their twenties. This was real rural territory and we had to drive for an hour at least to get to where we were going. Suddenly a violent storm showed up and we took cover in an abandoned farm house. Well, it wasn't too long before I realized I had two horny farm boys on my hand. They

decided that if they had to sit out the tornado they might as well relax and crack their nuts. Long uncut dicks sticking out of baseball uniforms was too much for me. I came up to one and he was ready to stick it in my mouth, but I stopped . . . phew! Trying to be polite I gradually went to the other brother . . . phewee! There was no escape, it looked awful outside. So, I had no choice but to clean up the boys of what must have been several months of cheese each. Well, you know what they say, whenever Limberger cheese crosses your palate, no milder cheese will suffice.

RED SEA EXPEDITION

With our group of dedicated underwater adventures who were mostly teachers of marine biology in Munich we drove our beat-up VW to Suez where we stopped for coffee and a roll early on our first morning.

Everyone in any size town or village stops in the middle of the morning for coffee. In Cairo, it was Groppe's, of course, but in Suez, it was a roadside cafe with lots of tiny tables in front of the place so that everyone could see anyone who walked by, drove by on a camel or in a car or truck.

There were seven of us on the expedition. We were planning on collecting marine specimens for the little museum at their school. My job was photographing the underwater activities.

It was my second time in Egypt. Three years before I had made a television documentary about Cairo at night. The first week there was uncanny because it was the first city that I actually felt like I was a real foreigner. I couldn't even read any of the Arabic numerals or the signs on simple shops like store or pharmacy. It didn't take long, however, to begin to learn. And, it also helped to have an Egyptian friend which I met at the Hilton Hotel sauna. After each of us got our massage we went for a coffee and began talking. First thing I knew, I was invited to meet his mother and then the members of his Cinema Club. Egyptian movies leave a lot to the imagination, especially when both the hero and heroine race across countless miles of sand in every reel. Anyway, meeting Mamoud made a great difference to my thirty days or so in Cairo working on the film.

It was in a hot-spring resort just south of Suez that I met the Germans and arranged with them that I'd meet them two years later in Athens for this adventure. I planned on filming it for a travel adventure story.

So, while sitting in that small outdoor cafe in Suez I faced a hot looking Egyptian wearing a galabaya, that's a long robe open at the neck to the navel and down to his ankles. He had a beard and some face fuzz. The more I glanced at him the more I saw a tent pole rising between his legs. As I continued to glance at him he would pull the hem of his robe up until finally, in a position that only I could see, he revealed the main attraction, his immense cock—completely cut. I won't say it was a foot long, but you've heard of the

"home wrecker" size, no doubt. This was the model for it.

I didn't speak any Arabic and he didn't speak any English except he knew how to say in a stage whisper, "five dollars, Mister American." At that moment a waiter came by and the discussion was terminated and our party took off in the old VW.

We drove along the coast and camped along side the Red Sea every night. Between the small towns we never saw a soul, not even a wandering camel. However, almost as soon as we set up our camp, an Army patrol would appear out of no place and the captain, who always rode in a Jeep, would demand to see our passports. Then, after a lot of examination and his soldiers poking around, he would have a small card table set up and do his thing. This consisted of stamping our passports. As we learned, the one great thing in an Egyptians' Army life is to know how to stamp papers and documents. It doesn't matter so much about what he's stamping as long as he can use his stamp pad and official stamp. What we eventually learned was that Nassar, who was the head man in those days, was waging a small war, or supplying arms and soldiers to South Yemen south of Egypt. It was all very unofficial and hush-hush but when a line of trucks passed us three times a day heading south you know they weren't out for a joy ride. Besides, the official Army people stopped us from going any further than Mersa Alam, about a thousand or so kilometers below Suez.

It is the soldiers that brings about this story, however. Every twenty or so miles we saw a camel corps installation along the seashore. At each campsite was a small hill and at night, after it got dark a fire was built on these hills and signals were passed up and down the shoreline. During the day, a single rider would pass us each day from either direction. Usually, if it was near lunch time or we were about to barbeque a fish we'd speared they were happy

to stop and join in with us eating whatever.

As we got used to seeing these soldiers riding their mean-tempered camels a couple of us never put on our shorts as they approached. We swam naked all the time because the air temperature was in the low 100's and the water was almost 90°. And, it was simpler to go naked into the water than put on salt-encrusted swim shorts. Fresh water was very short and we had to get five-gallon cans filled in the town when we passed through to the next campsite. I noticed the soldier would always stare at us but he didn't say anything. Maybe he couldn't speak too much English.

After a couple of weeks I was swimming a mile or more up and down the shoreline filming small fish and coral reefs. My underwater camera housing had enough space inside to carry two extra rolls of film so I would shoot, come ashore and reload my camera.

On one occasion I had a small silk hood over my head to keep out as much light as I could when changing my film when I noticed several pairs of Army shoes surrounding me.

I finished loading and locked the camera housing and looked up.

There were five or six soldiers standing around all grinning at me. I stood up and tried to explain by pointing to the camera, the ocean, and my flippers and faceplate that I was swimming and taking pictures.

Nothing was said for a moment and I thought, "Oh, Christ, how am I going to explain this."

Then, one said, "You like Cairo?" I nodded, I liked anything at this point. "Yes, it's a very nice city." They were all grinning and finally one younger soldier said, "You come have coffee."

I tried to refuse indicating I didn't have any clothes on and I wanted to get back into the water.

"It's okay," he said, and he took my arm and led me to the top of their small hill where a piece of canvas had been strung into a sun-

shade. Beneath it was the captian and an orderly making a pot of Egyptian coffee (read: *Arabic coffee*).

A cup was handed to me and we all drank in silence staring at one another. However, I could see it wasn't the coffee they wanted me for, but that small flap of skin no Arab has after his tenth birthday, my foreskin.

With what little English they knew and what few expressions of greetings we managed to discover that they all liked Disneyland, they had heard about Hollywood, New York City, Palm Springs and, of all places, La Jolla. I learned that all of Egypt was to them, Cairo. Then it happened.

One of the older men reached out and pulled on the tip of my cock. The foreskin stretched slightly and I just grinned. "You are not circumcised," he said. "No, we don't do it to everyone in America," I answered. He kept his fingers on it and then a second man reached out and felt it. Then, another and finally, each of them took a good pull on it. By this time it was beginning to get hard and I was thinking, "I wonder if they think I'm going to let them remove it."

When I was fully erect they all stared at me (or it) and smiled. Standing next to the captain was the youngest man in the group, a boy about seventeen or so. The captain reached up, pulled down the boy's khaki shorts, his white boxer skivies, and showed me this boy's cock. It was cleanly cut and it quickly came to full attention. I examined it as closely as they had examined mine. Finally, I stood up and said I had to work. They all thanked me, in broken English, for joining them for coffee.

That night I noticed the fires burning rather late so they must have spread the word because every day after that when I changed my film I had to join some camel corps for coffee and allow them to see my uncut cock both soft and hard.

DADDY'S
FORESKIN

*When Daddy tells you to
take care of his skin, you
can bet your bottom he's
talking about his foreskin.
And our Daddy, Joe, has a
lot of skin to take care of.*

*Daddy likes to have his
foreskin cleaned by an

UNCUT ITEMS & EVENTS

MODERN CLASSICS

Returning to 1984 cocks, we found *this* masterpiece. Actually, it belongs to USA member John Fludas. If you are looking for pro-produced cock shots (and this one is very much uncut!) with exceptional color, you will really get off on this series. Clear and vibrant and what a hot piece of meat! John tells us that his big, fully-foreskinned meat has been photographed from

all angles, and from sexy soft to rock hard. While he has been advertising his photos in gay magazines for some time, John wants all readers to know—including those who have bought photos from him in the past—that he has a complete new series available, including some extreme close-ups. A set of six 4"x6" color photos is \$14. Information, write to: John Fludas, Box 262, New York, NY 10113.

FORESKIN EVENTS

FQ will routinely publish information on events and organizations for uncut men and their admirers. The host group or the host individual must be an active member of the USA. Such events are the responsibility of the host, however, and not the *Society*.

JO exhibitionist gatherings give us all great opportunity to observe (and sometime more) the uncuts among us. Of course, some USA meetings are meant to be anti-circumcision activist discussions or lectures—where your penis doesn't have to show itself off. Whatever type of gathering you are planning, be sure that we have ample notice. Information for FQ No. 2 (January 1985) must reach us no later than December 15, 1984. Information in that issue will cover the period of Jan-March '85.

Here's the information on upcoming events:

UNCUT PROFESSIONALS OF AMERICA

An intimate group of uncircumcised professionals and semi-professionals, will meet in the Cleveland/Akron area to discuss mutual interests in mid-December. For information, write: U.P.A., Box 6363, Cleveland, OH 44101.

JO/EXHIBITIONIST CLUB

Fairfield County (Connecticut) starting to form. If interested, contact: Abbott W. White, 7 Skyview Lane, Norwalk, CT.06851.

U.N.C.U.T. CLUB OF LOS ANGELES

Next meetings set for Sunday, November 11, 1984 and on Sunday, December 9, 1984. Both events are "Permissive Socials for Uncuts and Their Admirers."

U.N.C.U.T.'s "First Anniversary Permissive Party" will be held in January 1985. All events are held at the M/B Club, 4550 Melrose, from 3-8 pm. Door fee: \$6, includes beverages. For information on the U.N.C.U.T. Club or their activities, write: UNCUT CLUB, Box 2842, Los Angeles, CA 90078.

USA CLUB

Chapter forming in metro area of Virginia, Maryland, and District of Columbia. Interested? Contact: Tom (000) 336-1514.

SEE THE TRUTH (ON VIDEO)

Marilyn Milos, R.N., director of INFORMED CONSCENT, is one the nation's most active anti-circumcisionists. She is also a consistent supporter of the goals of the USA. She has produced a video tape depicting an actual circumcision. It is 9½ minutes long and is prized as an anti-circumcision documentary by activists throughout the country. Go ahead, see it. It will motivate you! Send an SASE for information to: Informed Consent, Box 493, Forest Knolls, CA 94933.

Something To Hold On To: And very representative of the kinds of meat you meet at the U.N.C.U.T. Club gatherings in Los Angeles. These de-panted, but unskinned men were on hand (so to speak) at a fall U.N.C.U.T. Club event. All photos by Joe Tiffenbach.

CLASSIC FORESKINS

Photoclassics is featuring the illustrated classic young man (with his classic uncut cock) as part of its *Multiple Exposure* series. The photo will be easily recognized by many of our readers as one of Baron von Gloedon's Sicilian masterpieces (see *The Lace Curtains of Toramina* in this issue). Brad Lemery, curator at Photoclassics, deals in 19th and 20th century photography of the male nude and obscure homoerotic material. His line of greeting cards is great; very unusual and sensitive. This unique series, *Multiple Exposure*, is available at \$5 a dozen. For more information, write to: Brad Lemery, Photoclassics, Box 1216, Northampton, MA 01061.

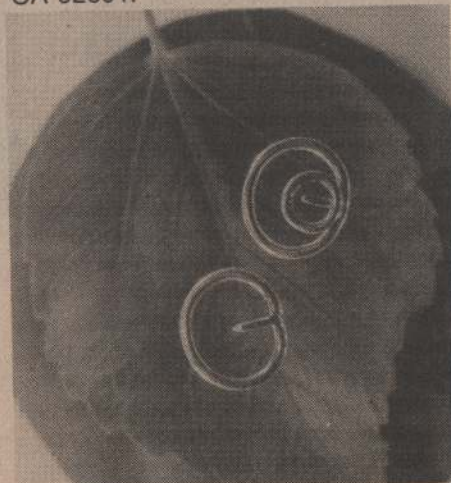

WEAR YOUR DIFFERENCE!

USA pendants, cut and uncut, the official logo of the Uncircumcised Society of America, are being produced by Aureus.

Aureus are the jewelers who have long been advertising the anti-circumcision pendant (crossed-out scissors) you have seen in numerous gay publications. Aureus is offering this distinctive new design to USA members at the lowest possible price, \$18 for silver and \$65 for gold—the the same price for the cut or uncut symbol.

The circle within a circle plus a slit and dot represents the uncut cock. The single circle represents the circumcised cock. Take your choice. And if you drop by the shop, Aureus will gladly check you out to see which one you need (but they will gladly sell you one of the superbly handcrafted pendants by mail).

For more information, write: Aureus, 23906 Sofia, Mission Viejo, CA 92691.

The Lace Curtains of Taormina

Baron Wilhelm von Gloeden, an only boy in a family of five, was born near Wismar in what is now East Germany in 1856. University educated, known at the court of Kaiser Wilhelm—Von Gloeden was a socially-correct, wealthy, attractive member of society. But his own interests lay in the arts, not in politics or empires; and his health was somewhat enfeebled by one of the many "consumptions" that affected most middle-Europeans at the time. His doctors suggested a warmer climate. By sheer chance, in Berlin, Von Gloeden met a painter, Otto Geleng, who told him of a wonderful island off the coast of Italy where the weather was gentle, the people gentle, and the opportunities to discover "Greek ideals" in the physiques of the local youths... ideal.

It was enough to send Wilhelm von Gloeden packing. Otto and he set out for the journey in a matter of days. For Von Gloeden, because of the advice of his doctors, it was, on the surface, a search for a place of better health. And almost immediately Von Gloeden knew he had found paradise. With the exception of one short trip, he stayed in Sicily for the rest of his life.

Von Gloeden lived the quiet life of an artist and an intellectual, soaking up local history and culture along with warm sea baths and "taking the air" of the semi-tropical island.

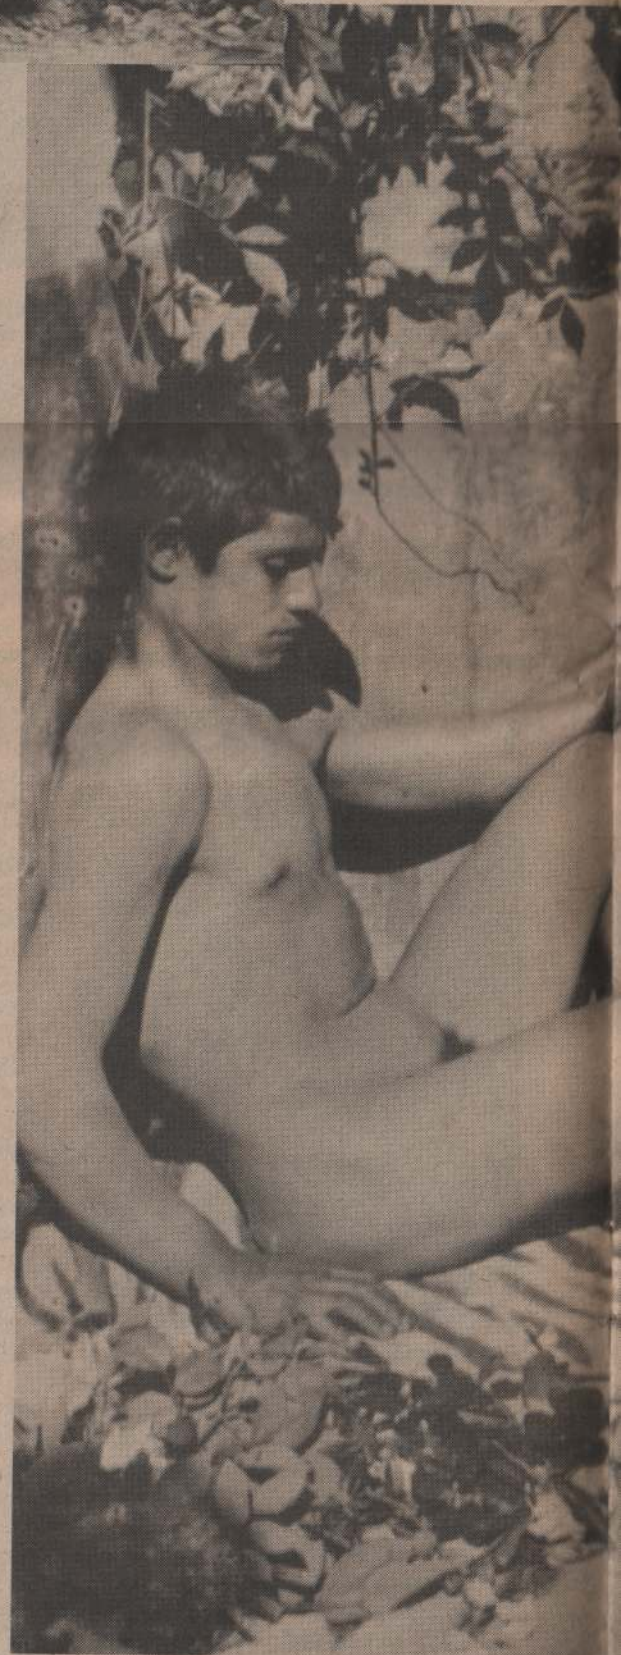

It was Von Gloeden's cousin, Wilhelm Pluchow, who turned the young Baron's interests to photography. Pluchow had become a master technician, but totally without any artistic sense. Once Von Gloeden mastered the craft of the camera, he infused it with his classically-based sensibilities, turning out what were—for his times—the supreme evocations of the "Greek ideal" as it was understood.

Von Gloeden was set: an expression for his artistic self, an environment that had a pronounced effect on his returning health, a wealth of willing young subjects to pose for him. He sent for his sister, Sofia, to join him. With this element of "family" (Sofia remained with him throughout the rest of his life)—Von Gloeden settled down to a perfect life, producing an amazing body of work that captured an entire generation of a small Sicilian village.

Since circumcision was extremely rare, the majority of Von Gloeden's models were uncut and

more than a few of them carried the Sicilian distinction of being very well endowed. Mostly Von Gloeden photographed teenagers, although a few younger models were part of his tableaus based on Greek and Roman history and myth. And, on

occasion, a grown man would appear in the photographs as either the father of a character, or the protector of some mythological youth.

Wealthy Europeans with a bent for this kind of photography flocked to visit Von Gloeden and buy prints,

usually in the form of "cabinet cards" (similar to a modern post card). It goes without saying that Von Gloeden was gay and chances are the majority of his customers and visitors were gays from the ruling class and the great families of

European aristocracy. But, given the times and the temperament of the times, selling photographs is probably all that happened. Von Gloeden would have, of necessity, had to decline any requests by his visitors to be "introduced" to a par-

ticular model. To think otherwise would run counter to the fact that the families of the local youths trusted Von Gloeden completely—and he had endeared himself to the entire village.

A compelling biography of Baron

von Gloeden (now out of print) has been written by Charles Leslie, filled with sterling examples of his work. The images used here are from that volume and from the private collection of Brad Lemery of Photoclassics.

The Summer of '69

by Sabastian

I had just turned 18 in March of that year. I had also just graduated from prep-school and instead of going to summer camp as usual, I opted to stay home and to try to make some friends for a change. When you're in prep-school, you have very little chance of meeting the kids at home except for the occasional holiday.

My mother was a young widow and a successful businesswoman which necessitated a great deal of travel on her part. So I was, more or less, on my own for the better part of the summer.

Aside from the housekeeper and my mother's driver (who was a young and very handsome black man) I was virtually alone. It didn't really bother me too much as I was inclined to be a bit of a loner.

One particularly hot day I decided to spend at the pool. Since it was the housekeeper's day off, there was really no reason to wear swim trunks. Besides, I loved to swim in the nude. I threw a towel around me and headed for the pool. As I was passing the garage, my mother's driver, who's name was Albert, was polishing her car in his shorts. I stopped to talk to him, noticing at the same time that his balls and the head of his huge, uncut black meat were hanging below the edge of his very brief shorts. I could hardly keep my eyes off it, and I was sure he noticed because of the grin on his face. I suggested he join me when he was through. He said that he might.

I quickly jumped in the pool, did several laps, pulled myself out, stretching spread-eagle on the diving board. The sun really felt good as it began to dry the water off my hairless, swimmer's body. It also caused my nine-inch uncut cock to get hard. Lying there and thinking of my old roommate back at school with his hefty, uncut dick, which I use to suck on regularly, I began to jack my completely hard man meat. I would get it just about to the point of cumming and stop, and with my finger I would lift off the pre-cum from the piss slit and lick it off. I've always loved the taste of cum and I was a veteran cocksucker with a passion for uncut cocks.

Luckily I went to school in Switzerland where most of the boys were Europeans and were naturally uncircumcised. I didn't, however, pass up the cut ones, especially if they were big—I suck off anyone just to get my daily quota of fat cock and their loads of cream.

Soon, the sun and my boiling balls conspired to send me off to sleep. I don't know how long I slept lying with my legs spread off the sides of the diving board, with my hard dick pointing straight at my navel, but I was awakened very pleasantly with the feel of Albert's mouth sliding down my cock and his own beautiful weapon hanging down over my face, already dripping pre-cum on my lips. Grabbing him by the hips and opening my mouth as wide as I could, I pulled him into my thirsty throat. I couldn't take all of him, mainly because of the position, but—as I later learned—because he had a 14" cock with a huge mushroom-head. His foreskin was fully-retracted. I was beginning to gag, so we retired to the grass and quickly maneuvered into a sixty-nine position and ravenously began to eat each other's cock and balls. Although it was a tough assignment and my jaws were aching and my throat was getting sore, I managed to take his whopper down my throat. At that moment, we both flooded each other with gushers of sweet and heavy cream. We slept there for about an hour, still holding each other's cock in our mouths.

When we woke we changed positions and, facing each other, began kissing and licking what dried cum still remained on the other's lips and chin. We kissed wildly and rolled all over each other, biting tits, licking flesh, cock and balls. We were soon both rock-hard again. I took his tool in my hands and pulled the foreskin up as far as I could and then stuck my tongue inside and swabbed the cum and juice from his cockhead.

"Suck that cock all the way, let's see how good you really are," he said.

Slowly I edged that massive mushroom-head into my mouth and, taking a deep breath, slowly but surely rode my way down his pulsing shaft until all of it was in my throat. He groaned and moaned and I could feel his balls begin to tighten up in their full, thick sac. I knew he was going to throw another load down my throat. I worked the muscles of my throat and didn't have to wait a minute before he was pouring out a steady stream of cum. I greedily swallowed every drop, coming up slowly so as not to miss an ounce of that man's sweet juice. I kept his mushroom-head in my mouth for several minutes, to make sure all of his man-cream was out.

We swam and played with each other under water, diving down to take a few sucks on the other's cock and balls. It wasn't too long before we were both getting hard again. At the shallow end of the pool, Albert began probing with his fingers into my hairless, puckered asshole. He told me he wanted to fuck me the first time he saw my tight, white, round ass cheeks. I told him I had been fucked in school a few times but never by anything as gigantic as his dick, but that I was willing to

give it a try.

We went to his room and he greased up my hole with Nivia and lathered his own horse-cock. Then he told me to get on my hands and knees, that he wanted to fuck me dog-style. Slowly he eased the head of his cock into me. The pain was immense and it felt like he was splitting me in half, but the pain soon vanished as he began to ride his extra-long shaft into my rectum and I began to move against him, meeting every thrust. I was loving this assault on my ass by this monstrous cock.

I could feel his massive balls banging against mine and suddenly my own cock began jumping and pulsing on its own. I gripped the mattress in my hands and began slamming my ass against his cock, and I knew I was about to shoot. He

could feel it too as my rectum tightened around his shaft and he rode me harder, his cock shooting jet after jet of white, hot cum inside me.

It was the great summer of my life. I spent most of it with Albert's cock down my throat or up my ass—never got around to meeting any of the local kids my age—but I did meet some of Albert's friends. We fucked and sucked every day, usually two or three times a day. By the time summer was over, I had gotten so comfortable with the size of Albert's meat that he could come up behind me and, if he had already greased it, slip it right up my bowels, all the way, in one stroke. And I could swallow his oversized meat on the first try.

It was, like I said, *the* great summer of my life. □

Say, listen you got things all wrong, fella... I want it, honest. I want this thing, skin and all.

No, damn it, you're not going to get any... not for a while, anyway! Telling me "Don't you think you could use a shower..." Like I was some snot-nosed punk you'd coaxed in from a stickball game down the block. You couldn't wait for me to get my clothes off... but then? Like most of you cut jerks, you get one look at this big, untrimmed meat of mine and start sniffing at it, start hinting that maybe it isn't clean enough for you!

You gotta admit it smells pretty fucking ripe, but I only asked you to shin it back for me... so I could see it better. That thing is a beaut!

Yeah, so you could see if I got a lot of cheese under the skin, huh?

Naw, I want it! Cool down, man, and let me... let me take it now, just like it is, to prove I want it! I wouldn't care if you had a ton of cheese hidden down there, I want it! I want you... I've got to have it.

I could have just shut up and washed it for you; I could still wash it, but I'm not gonna now... instead, I'm gonna let you find out—the hard way—what a prick ought to taste like. No, not yet! I'm gonna make you wait for it now until it's really ripe smelling, funky tasting, under this long foreskin! So quit trying to get at it man, I'm serious! If you gotta lick something, lick on my nuts a while. Spit in my hand. I've got a load in there just hurting to let go... right about now, and that's the way I'm going to let it go, by hand. My hand, not yours... so get your fucking fingers off it!

Aw, don't! Don't jerk it! Let me lick it, huh? The closer I look, the more I smell, the hungrier I get for it! Just put it between my lips... please.

Oh? Well, you're late in offering to suck it, you're gonna have to wait a little longer to get so much of a stinky taste of it! Get your face away from there so I can jack it... Mmm! But I don't mind if you keep lapping that tongue on my balls, keeping 'em juicy. It won't take more than a few strokes to make it shoot. Come on, man, keep my balls wet and sloppy!

Jeeze, you taste good. That's some beautiful cockhead you give me a peek of now and then... just let me wet it for you once.

You and that greedy tongue trying to sneak yourself a sample! Well, that's it, no more! If you play it smart, you'll get to taste this dick

when I'm ready to let go with load number three. My first two, forget it!

Aw, please! The smell of that covered-up knob's driving me crazy! Let me clean it out, let me swallow all of it, please!

No use begging for it! Your ass is gonna get to suck my cock... taste my jizz, before that sneaking, fucking mouth does! Sort of changed your tune, huh? A little whiff of it, now you like this raunchy smell, now you're going ape for some of this mellow, natural taste? Well, suffer, fuckface! I'm almost off!

You are off! It's shooting, you bastard! Don't I get any?

Not a drop. I'm gonna need every slimy gob of this stuff. Don't cry over spilled spunk, baby... plenty

more where that came from. Now, get that worthless tail of yours up here, spread those cheeks, I'm going to use my cream to fuck you with! Now, damn it, while I still got a hard-on! Yeah! This is great ass, and it's just as thirsty for my slimy, uncut cock as your mouth is, huh?

Sure, but please, let me get my face up on it once more, let me smell it up real close, please!

Eat your heart out, man! Can't trust your sly mouth. Feel different now about what a man's dong should smell like, huh? Like the smell, don't you? Well, wait until I do give it to you, shove it all over your face, and you get the full flavor of a natural dick. You won't be able to go back to those clipped little

cocks again, they'll taste like soap compared to this ripe, tasty piece. Christ, what a tight fit! My prick was made for this asshole. You may really have to work for that third load.

Just don't fuck me so hard that I come. I want to save it until I have that cheesy head in my throat. I want to blast when you unload that uncut hose in my mouth! I'll bring you around for the third load, I guarantee it!

Yeah, man, sure. Sure you will. You'll work for it. Mmmm! God, what a tight channel. Feel how my juice has made your asshole slick and wet? Yeah. Hold tight, baby, I'm gonna blow your socks off! □

The Song Of The Lake Grebe

by Michael Endicott-Ross

June, 1948. Victor.

He was a little dusty the first time I saw him, alighting from his black and dusty car; his cream suit made of cotton, wrinkled, and his hair cascading down on his forehead, almost touching his eyebrows.

He was selling something, I wasn't buying. But I was being coy enough to get him to ask for a cool drink. I had cool things to drink in the icebox and I wanted to invite him inside.

It was a very warm summer's start—the air was alive with the heat of the overhead sun and the chirping of the baby grebes in the rush. I left the front door of the cabin open, with just the screen closed to keep the flies out, and it must have looked like a mighty cool cave to him, because he didn't hesitate to follow me inside.

His coat off and on the back of a chair, his shirt sleeves rolled up, he was the picture of the Arrow Man gone a little seedy. Class with traces of corruption around the edges.

A tall glass of ice tea, which I had made from the herbs in the garden

by the lake, another attempt to explain just what it was he was peddling, and then we settled down to the task of getting to know each other. Questions, questions, a hundred questions. This is how they summed up:

I lived alone; I was a painter; and I spent every summer at the lake. Winters I spent struggling to escape New York City. I was twenty-five. I had never been married. My parents lived on the East Coast... somewhere.

He was thirty and working his way to the West Coast. He had been married once, but it didn't work out. He was a loner, not looking to settle down too much in one place forever. He fancied that he might be an actor, or a writer, or a pearl diver. He had been to college and had been to Europe for The Grand Tour. He loved the country, but it was hard-pressed to make a living from, so he settled for the city. He was driving across America, selling... something... making his way in bits and pieces. He liked meeting new people and having new experiences. Could he spend the night?

I thought a bath might be refreshing for us both. Out here, there is little in the way of indoor plumbing, and oft times I swam away the dirt and grime in the lake. I could bring an extra towel for him. There were no neighbors; he needn't worry about being spied on.

He wanted to see my paintings. I went shy, but wanting to show them off, pulled two or three from their shelf. Ones I thought were my bet-

ter pieces. One, a Greek country garden, completely from my imagination, but detailed, with accurate Doric columns, especially caught his attention.

"It looks like something is missing," he said, in the quietest voice, "shouldn't someone be walking in the garden?"

I contemplated his observation. I wanted to answer him, pleasingly if possible, holding out for the compliment, rather than try to explain why the garden was empty of man or beast, "I never had anyone to pose for me."

He stared into the picture as if he were memorizing every stone and plant. "I could see myself there," his voice still low and soft.

I smiled. "Not dressed as you are now."

He looked up from the painting and, seeing my smile, returned it. "No, I suppose their wardrobe was a lot simpler."

His eyes went back to the painting, "No, I suppose this is the kind of garden you would want to walk around in buck-naked."

...

It was still early afternoon when we walked down to the lake, towels under our arms, my scrub brush and a cake of soap in his hands. I brought a jug of ice tea and the glasses we had drank from.

A grebe hopped out from a stand of rush on the side of the path as we passed. He stopped and watched the squat bird clumber over the ground.

"Grebes don't walk well," I told

him. "They swim better than they walk."

"Do they fly?" he asked.

"Better than they swim or walk."

The stillness of the day made the lake an almost unbroken circle of blue set into the ground.

He shucked off his clothes and let them drop in a pile next to where he stood. I disrobed, piece by piece, attempting to make some order of my pile of clothing. My artistic sense, perhaps.

When I looked up, myself stripped to the skin, he was standing a few feet away, looking at me with a smile. "You look more like a farm hand than an artist."

I blushed a bit. I did a lot of manual labor around the cabin. My body was slender but solid, with long, stretching muscles. His physique was not quite as chisled, but there was not an ounce of fat anywhere. His shoulders were quite broad, almost like a swimmer's, and his flat chest was graced with a small mat of blond, curly hair across the pectorals. His stomach looked like a washboard made of human muscle, though, as if all the marks of the sculptor had been concentrated there. He was long-waisted and long-shanked, a classical line to his waist and groin, with only the smallest patch of equally-blond hair capping his member; itself hanging down like a thick, blond sausage between his legs, the foreskin coming to a rounded end below the head of his penis.

HUNG,
BLOND &
UNCUT

Tall, dark and handsome may have been the calling card of the 50s, but ever since man discovered suntan lotion and Southern California beaches, blond, hung and uncut has been the order of the day.

Our uncut all-American beach regular has enough foreskin to cover the glans even when he's fully hard—but as you can see—it also slips back nice and easy to uncover a sensitive head.

So the next time you skin back a surfer, remember—they like it!

UNCUT VIDEO

LACE AMID THE ACORNS

Looking for uncut cock in the hundreds of video tapes already on the market (and in the flood that are released each month) is like looking for references to Socrates in a library without a card catalogue. They're there, but you have to go through a lot of non-essential material before you find the gems. While I can't guarantee that this column will become the Dewey Decimal System of foreskin, it will at least tell you what books (rather videos) to look in.

The logical place to start would be videos geared completely to uncut sex, and there are two superb examples from Adam & Company titled *Foreskin Fantasy I* and *Foreskin Fantasy II*.

Both videos are made up of individual segments that look at uncut cocks in very different ways. In *Foreskin Fantasy I* the episodes involve (1) a man jacking off his big uncut cock while looking in a mirror, (2) a man in a black robe jacking off while looking at photographs on a table—Japanese style, and (3) some uncut men sucking each others uncut cocks in front of a seamless backdrop. Very simple, very elegant, and very beautiful. Adam & Company's innovation goes even further: each shot, each angle, all worked out toward a seamless perfection. The cocks are each beautifully-formed perfect examples of uncut men, full-veined natural men lovingly caressed by the camera.

Adam & Company achieves this brilliantly executed result through even, but dramatic lighting; sharp resolution (these guys are obviously using high-quality, state-of-the-art equipment), and creative editing.

In *Foreskin Fantasy II* the same formula results in different ends: in the first episode three men engage in a mini-orgy on a bare mattress on the floor; (2) a man ties up his uncut cock and balls and beats off; (3) a man dreams he goes through a hole in his wall to an alternate world where uncut animal-men seduce him.

Where Adam & Company went for stark simplicity in the first video, in *Foreskin II* the trend is toward complicated (in the final episode) story ideas where the ability to stay locked-in on the unique aspects of the video, the adoration of the foreskin, takes the view along uncharted, but highly rewarding avenues.

Elsewhere. In *Three Nude Black Champions*, two of the three black bodybuilders are uncut. Since this tape, from French Company, runs 90 minutes, that gives you an hour of uncut cock, if only on two guys. The emphasis isn't on the fact that either of these men are uncut, but the presence of their foreskin while either is posing or jacking off is abundant. French Company has a large number of titles, and would probably tell you which ones contained uncut models. In this tape,

the two uncut black men pose their impressive physiques—the second does a dance routine with scarves that is alternately erotic and silly—jack off their equally impressive uncut organs—the second has a thing about dildoes and spends a lot of time shoving them up his ass—and come for the camera.

Old Reliable likes uncut models, but this company doesn't limit itself to any one thing—so in the 25 video tapes they have released in their *VT Series*, an occasional uncut stud pops up here and there. There are some particular numbers that deserve attention: *VT 13* is an anthology of the first six VT tapes, cut down to two hours, with many uncut solos amid the twenty or so guys who jack off for Old Reliable's camera. *VT 18* is also an anthology video of highlights from tapes number 7 through 12; again, a number of foreskinned dicks amid the crowd. Otherwise, *VT 15* has two uncut models, Bob Crane and Wayne (blind meat); *VT 20* also has two, Dirty Ron and K.C. (the first video with a cheesy uncut dick). Old Reliable points out, in its brochures, when a model is uncut, for the most part, the Old Reliable video tapes are of street boys and other sundry straight types, all doing solo jack-off turns in an unedited fashion for the camera. Each tape runs about two hours and features four to six models. Old Reliable has produced on all-black tape, *VT 22*, on which two of the models are uncut.

Young Samurai is a thirty minute Japanese video (in Japanese) about two guys having an afternoon of fun and games that are visited by two more guys who join them in a four-way. All four are uncut, and all four have medium-sized equipment (one may actually qualify as large). Quality is good, action is tame by American standards, but very uncut indeed. *Tokyo Studs* runs an hour and is a cross-section of types and action: some duos, mostly solo masturbation, and about 80% uncut, all Japanese—of course.

The Private Pleasures of John C. Holmes was the legendary 14" wonder's first gay film (first real gay film) for sheer size, and this is the biggest foreskin on record. Holmes alternately shoves it down the throats or up the asses of his willing subjects in a sort of 1001 Nights tale that never gets outside the sultan's bedchamber. A lot of foreskin fans have suffered through reams of straight porn movies watching mighty John shove his uncut telephone pole in quivering snatches—never getting to see the draped head as long or as close-up as they'd like. There's more of it here (if that's not redundant) than you've seen anywhere else.

Ranch House Video tapes aren't necessarily about foreskin either, but a lot of it comes into focus throughout both 90-minute tapes from this erstwhile young company: *Ranch House I* and *II*. Designed as streams-of-endless

sex videos, there are almost nothing but medium-to-tight shots, so when an uncut member appears, the viewer gets nice long stretches of it. Try one, if you like it, try the other.

Although not a lot from Europe has been made available on the American porn market, would that it were—there would be a wealth of

uncircumcised cocks! A few French titles by Jean-Daniel Cadinot have been released by either Buckshot or marksman and the notable ones to watch for are: *Becoming men*, *Sex Bazaar*, and *Dream Boys*. Again, the emphasis is not on foreskin, but with a cast that is 90% uncut, there is a lot to look for.

FORESKIN AROUND THE WORLD

A SCOTSMAN IN LONDON

I am a Scotsman living in London. The subject of foreskin is very much after my own heart. I hope you realize that in general the Scots are an uncircumcised race. The whole problem of penile mutilation in Britain is a problem of class. That is to say, the abominable practice seems to have been brought in from Germany with the Monarchy. Whether it was with the Hanoverian Georges or, to my mind, more likely with Victoria's husband, the pristine (admirable but intensely boring) Albert, is not certain. Certainly it is a fact that the children of the Monarchy (including the humpable Andrew) are all shorn. It would be difficult to find any product of our public (your private) middle-to-upper class schools who had not been similarly docked.

University changing rooms, and the loos of the more fashionable London night clubs, are infested with the stumpy products of the butcher's knives. It may have something to do with the fact that Britain's finest hours have always occurred under the sway of a Queen. Nowadays, of course, to justify the ridiculous fees that surgeons can charge for allowing mothers to wreck this havoc, all sorts of arguments about cancer and phismosis are raised.

Anyway, I should point out that the Scots have always been a poor race and have therefore not much interest in non-essentials. The

Scottish people are not circumcised, and if you ask a Scotsman what happens under the kilt, he can always say that it is not cold, because the end is well covered.

MEXICO: NORTH & SOUTH

First, you must remember that the majority of Mexicans are Catholic, and there is no religious reason for the practice of circumcision. However, it has become a practice with doctors to routinely circumcise young baby boys, allegedly for hygienic reasons. In major cities, most babies are born in government hospitals, that means city-born males tend to be circumcised.

There is a social stigma attached to being uncut in the southern cities that shows up in school showers and among gays who feel that uncut dicks are dirty. I am speaking about the southern part of the country, from Guadalajara to the southern border. In the north, things are completely different. There are many more uncuts, the majority are uncut. Also better hung.

AUSSIE STATISTICS

The results of circumcision in Australia is exactly the opposite of most other countries: it is more common in the rural areas and less common in the cities. Overall, it is declining.

1973-74	49.6%
1974-75	48.6%
1975-76	43.7%

However, this decline is itself from a high reached in the 1970s, when the percentages by geographic area were:

Victoria	30%
New South Wales	40%
Queensland	40%
Tasmania	40%

But to go even further back, the circumcision rate in Australia in 1944 was a soaring 90%, so a drop to half of that over a half century shows some real, if small, progress.

CUTTING RITES IN KENYA

I have just returned from Africa where I had a rather interesting experience. In Kenya, I discovered that the major tribe, the Kikuyres, practice a form of circumcision as a manhood ritual on boys around 14-16 year of age.

Jomo Kenyatta, in his book on Africa, indicated that the circumcisor was careful to leave enough foreskin to cover the boy's cockhead. However, I have learned that Kenyatta himself comes from a tribe that lives at the base of Mt. Kenya.

I spent an evening in the company of a member of that same tribe, but from the Mt. Kilimanjaro area. I remarked seeing a number of Masai (another tribe in the same area) boys dressed in black, evidently recently circumcised. He was quite eager to discuss the ritual of circumcision and first described his own.

He was 14 at the time, and his circumcision group consisted of

about 20 boys of various ages. They sat around naked in a circle on the ground. The circumcisor picked one of the boys (18-19) as the first one. He made a short incision lengthwise in the boy's foreskin and then, with another incision, removed a small piece of foreskin. All the men and the boys in the village watched.

The circumcisor then moved to the next boy in the circle and repeated the procedure. He then went on to the third, until he had completed the entire circle. When returning to the original boy, he removed another piece of foreskin via incision. Then he went on to the next boy, repeating the same step with each, until he had cleared the circle a second time.

This was done again and again until a total of nine small pieces of foreskin had been removed from each boy.

The medicine man applied herbs and herbal powders to each boy to stop the bleeding and apparently there was no infection.

Note: This section will deal with aspects of circumcision and non-circumcision throughout history and from various cultures. Information comes from our members and correspondents, and from published reports. Everyone is invited to contribute to this department, and illustrative material like photographs and artwork/charts are especially welcome.

Next Issue: Circumcision in Islam, non-circumcision rate in Europe, and more.

Tantra Procession of Uncircumcised Men: An annual procession of Hindus that march through the streets of Calcutta in India is captured in this photograph from the British Museum. Date unknown.

TELL IT TO THE SARGE

Several weeks ago this letter arrived in Bud Berkeley's P.O. Box:

Dear Mr. Berkeley,

This is your circumcising Sarge here asking you a favor. I have these here letters from a bunch of skinheads who spotted my ad in the magazines. They all want Sarge to trim them off military style. Well, Bud Berkeley, my duties have taken me overseas so my favorite passtime will be curtailed until I get new duty. I can't help these skinheads now. I was wondering if you

could write to these skinheads and explain to them why they haven't heard from me and why I can't skin their dicks for them. Wish I could. You know my motto which is "you can't make a marine out of a skinhead." That's what I tell each and every recruit I find in line who's still got his baby fat hanging onto his manhood. I tell these cunt-faced little bastards to report to bay on the double. They get turned into Marines quick. It's a dirty shame I can't help these skinheads who wrote. They need it bad. I was wondering if you don't feel like writing them or if you are too busy why

don't you tell them about that anonymous club so you can't count on me anymore. When these skinheads find a good clipper like me, make sure he gives them a little hell before he starts tooling off their skins. I find skinheads like preliminaries. Shit, did I tell you about the stupid skinhead who got cold feet in midstream. We had him all strung up and he began telling he wanted down. It was too late as far as I was concerned and began to tool his dick. He started spitting on me so I couldn't work. So we hung the bastard upside down and you should have heard the idiot holler while I

made a man out of him. Well, Mr. Berkeley, I'll keep in touch.

Sarge

Gulp! Well, gentlemen, you have just heard from a prepucephobe. He seems to think that any uncut man just naturally wants to get circumcised. When I first started writing columns for *Drummer* I was amazed at how many readers wrote requesting a story about an adult circumcision (with photos); some of these readers claimed to be avid anti-circumcisionists! Well, I certainly understand the love/hate fascination many men have with the

subject of circumcision, and the sado/masochistic elements and the fantasies. So, I contacted Sarge, after seeing his "still uncut?" ad. I entertained the idea that, if he had a subject who insisted on getting circumcised, we might do a story on it. Well, Sarge seems to be in parts unknown at present. Now, it is true, ACORN (which has been extremely closeted) is making itself known. So, maybe we will get the story yet. In the meantime, FQ feels it to be important to explore the circumcision fantasies both Sarge and I have received by our correspondents. They are a very real part of the sexuality of many men. I used to think such fantasies could only be created by Americans; uncut men who became masochistic about their foreskins out of guilt for being the only boy in town with skin. But I

have been receiving such fantasies from England, Germany, Finland and Mexico. It seems to be part of our gender psyche...after all, circumcision does go back a long way. Frankly, I doubt whether many of these fantasy writers would actually go through a circumcision. But then, 90% of the pro-circumcision mail the USA receives comes from men circumcised at their own request, mostly to satisfy erotic circumcision fantasies. Two things have struck me in my correspondence with these men; they all want another circumcision and they still have the fantasies. I am glad to report that all uncut men don't have such fantasies...in fact, very few actually do.

For the vast majority of happily uncut readers here's a warning: read only at your own risk.

You might get angry. But for all you "cunt-faced" skinheads out there who need it "military style"...

Dear Sarge,

When I got out of college I had a choice to either go into the Navy or take a great job which was offered to me. The only reason I was considering the Navy was because I knew they would circumcise my dick. But I took the job instead and still have my fucking foreskin. I know that you must be in another branch than the Navy if you are in the service. But here is my Navy clip fantasy.

I get my first duty after boot camp and sent to a small ship far out in the Pacific. When I arrive aboard I am immediately told to report to the commanding officer's quarters. He is studying my medical records on

his desk, then looks up and tells me "At Ease." He asks me if the records are correct about my penis because it says I am uncut. I say yes. He phones the ship's pharmacist mate and tells him to come to his quarters.

The pharmacist mate shows up and tells me to strip. I stand there with my uncut dick sticking out in the middle of the room, both officers studying it. "Will that one be easy to circumcise?" the commander asks the pharmacist. He answers, "Yes, Sir, I can skin this one back to the balls easily," as he picks up my dick in his hands and slowly slides the skin back off the head. "See how far the skin scats back, Sir? Is that far enough, Sir?" The commander says to me, "Mister, we don't allow uncut penises on this ship! I am ordering the Chief Pharmacist Mate to circumcise you at noon tomorrow and when I order a circumcision I mean a tight one. I want your penis to be circumcised so tight that you won't be able to pinch a bit of skin on your shaft. Understand?"

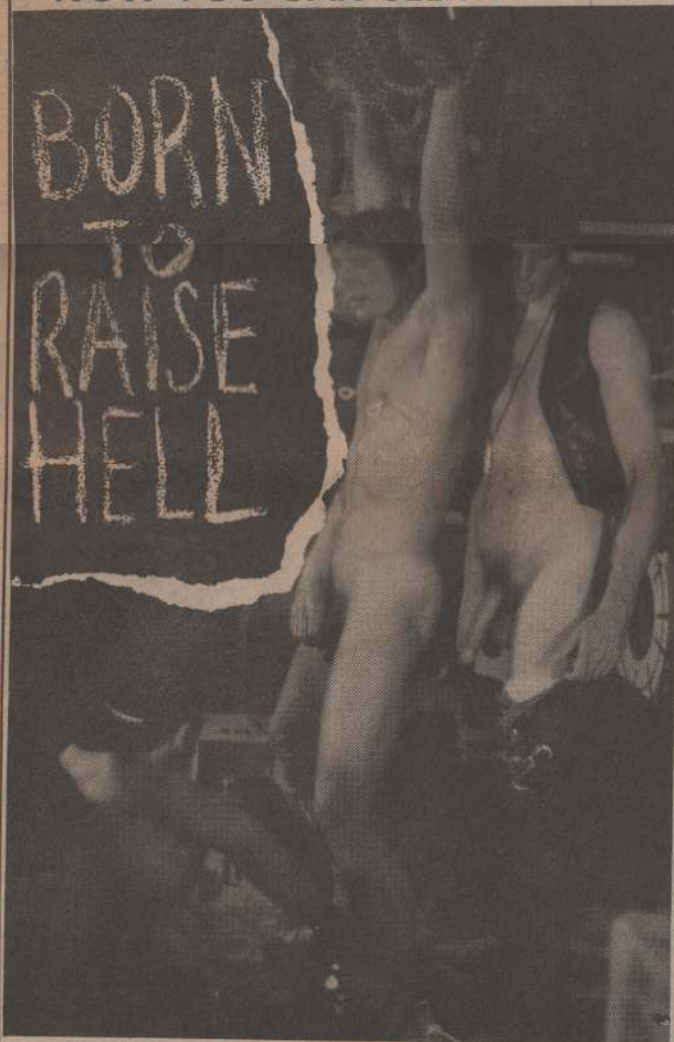

I said, "Yes, Sir!" The pharmacist left and I was alone, naked in front of the commander. He ordered me to come close to him. He put his face real near my penis and said, "Jesus, I hate the looks of those things when they haven't been circumcised!" For some reason I began to get erect. He suddenly reached up and grabbed my hardening shaft and squeezed the hell out of it giving it all the pressure his fist could muster. Then he ordered me to sit on his desk facing him with my throbbing, uncut dick sticking into his face. He gets his fist on it and beats the holy hell out of it while he asks me questions like why I never got circumcised and how much he hated uncut cocks.

Then he picked up the phone and called in the ship's officers. He said to them, "Here is the penis we are going to circumcise tomorrow. I want you to take turns loosening up the skin." And each officer took his turn beating my meat and telling me how much he hated uncut cocks. Then they told me I was going to shoot off my balls for the last time with an uncut penis between my legs. They made me stand up on the commander's desk and jack myself off while they all watched and beat on their circumcised dicks. I shot through foreskin for the last time.

The next morning at mess all the enlisted men on the ship kept looking at me and sort of giggled. Then one of them whispered, "You're next, huh?" I asked what he meant and he said, "Didn't you know by now? All the men on this ship got circumcised here. The commander has our foreskins preserved in jugs. We were all given this duty because our medical records said we were uncut. Well, at the moment your prick is the only one aboard which still has skin. But not for long, huh?" Then I understood.

That afternoon I was circumcised atop deck with all my buddies watching. The commander walked to his quarters with my foreskin and I joined all my circumcised Navy buddies and enjoyed the duty, especially when the next recruit came aboard.

NOW YOU CAN SEE IT!

BORN TO RAISE HELL is a seventy-minute hard-on. At least that is what I had the night they screened it for me. It is a classic in Leather SM moviemaking.
Robert Payne DRUMMER

Now, see for yourself the film that made a star of VAL MARTIN. Originally in four parts, this videotape is the complete theatre film and includes The Bar Scene, The Shaving Scene, The Dungeon Scene and the Cop's Revenge Scene. No collection is complete without it and we are extremely happy to finally be able to offer it for home viewing. Running time: Feature length, 70 minutes.

JESUS' FORESKIN

Even a child can detect discrepancy when looking at Christian art while remembering some of the hazy facts acquired at Sunday school. It is the kind of discrepancy not easily resolved because in order to frame an unacceptable question for presentation to a hostile or equally ignorant adult. Why Renaissance artists chose to go contrary to common knowledge or elementary research and indiscriminately portray biblical luminaries with intact genitals can be a puzzlement. Conjecture might lead one to believe the artist was thoughtlessly conveying the anatomy of a contemporary Italian model instead of an ideal from antiquity. One imaginative friend suggested that artists may have been attempting to spare the sensibilities of a populace prepared for artistic display of a penis, but not an unhooded one since that might distressingly hint of arousal.

A more satisfactory answer is contained in a book published in March, 1984, *The Sexuality of Christ in Renaissance Art and in Modern Oblivion*, by Leo Steinberg (Pantheon Books). Dr. Steinberg, who teaches at the University of Pennsylvania, has larded his book with the kind of information not likely to be encountered in sermons or art courses, because it has been tactfully ignored, he asserts, for half a millennium. No Christmas pageants I ever attended mentioned that the Wise Men made their journey to view the genitals of Jesus to prove to themselves that he was "complete in all parts of a man." Some paintings duplicated in the Steinberg book depict Wise Men staring at the holy groin from very close up. It was Christian emphasis on the idea of perfection and completeness that apparently persuaded artists to present Jesus, John, David, and all the rest as unpruned ("when anything is made less, it cannot be called perfect," St. Jerome). Sculptors and painters willingly paid the price of inaccuracy to spare revered bodies the blemish of imperfection at a time freespoken St. Catherine of Siena was claiming the Lord's prepuce as her betrothal ring, and several Italian churches said they owned the skin.

Abhorrence for visual evidence of circumcision was not a sentiment that surfaced at the time of Michelangelo. As early as the first part of the third century the Church Fathers were commenting on "the disgrace which is felt by most people to attach to circumcision." The penis as a life-giving organ was regarded at that time as too sacred to be altered artificially. It was the "nuptial weapon," the most powerful member of a man, that fought with death, restored nature, and perpetuated the race.

Focusing specifically on Jesus as a baby, some Renaissance artists were so symbolically minded they portrayed him with a hard-on as a pun suggestive of the resurrection of the flesh. Dr. Steinberg notes that a baby's penis in erection stiffens and levels without change in size. When artists portrayed a mature Jesus and wished to suggest the

same erection-resurrection idea they gave the figure a billowing, yards-long loincloth that inexplicably elevated itself into angles and arcs, a development in painting the author calls "wings of excess."

Dr. Steinberg's book is a seminal, one with 246 illustrations. One full-page woodcut is the "Holy Family" by Grien, dated 1511, that depicts Saint Anne shamelessly manipulating the genitals of the Christ Child, a liberty Steinberg says is without parallel in Christian art. The Steinberg book is also without parallel.

In the Punjab they had already started. The roads and railways of what had been the best administered province to India were unsafe. Sikh hordes roamed the countryside like bands of apaches falling on Moslem villages or Moslem neighborhoods. A particular savagery characterized their killings. The circumcised penises of their Moslem male victims were hacked off and stuffed into their mouths or into the mouths of murdered Moslem women.

In Lahore one evening a bicyclist

raced out of an alleyway past the crowded coffee shop where the city's most renowned Moslem criminal held court. He hurled an enormous, bell-bottomed brass pot onto its packed terrace. The pot went clanging through the coffee house, sending its occupants diving for cover. When it failed to explode, a waiter opened it. The pot contained a gift to the Moslem criminal from his Sikh rivals in crime in Amrisar. Stuffed inside, instantly recognizable, was a supreme provocation: scores of circumcised penises.

FORESKIN

"One of the first promises I made when I took over this column was that I would, at all cost, avoid the use of the word "I" and the phrases, "In my opinion" and "I think." Not only can those words sound bitchy, but they scream for such queries as, "Who the hell are you?" and "Who needs yer opinion anyhow?" The time has come for me to employ the first person singular because it's time for me to eat a little humble pie. When I was handed this book to review, my immediate thought was, "Oh no. I cannot be bothered with this when there is so much more out there that needs my attention." Egos are amazing. What I said aloud was, "Oh, puh-leeze, does the world really need a book on foreskin?"

"Just look it over, will you?" asked my editor.

"OK, but I plan on doing two reviews. One will be just for me. I can't get through this any other way!" I said, clawing the air with my outstretched arms. I had already decided I didn't like the subject and since a book about something so inconsequential couldn't be worth the time it takes to flip through it, I felt that: (1) I would probably not give the book a good review, (2) I was "mad as hell and wasn't going to take this anymore."

My humblest apologies to my editor, to Mssrs. Berkeley and Tiffenbach and most certainly to the readers of this column for my narrow-mindedness. It will not happen again; no more judging of books by their covers.

Unfortunately, the title of the book is misleading. Plainly speaking, it *sounds* like another porno rag—which, through florid prose and redundant narrative, is generally nothing so much as a sophomoric attempt to titillation. *Foreskin* is not that. It is the first step in an envisioned series of books exploring the idea that erotic, social, religious and Oedipal urges contribute to man's proclivity toward male circumcision. Mr. Berkeley states, "This thesis is not meant to be an advocate for circumcision or its abolishment, nor is it meant to be a judgment on any aspect of human sexuality. It attempts to reveal the true antecedents of routine circumcision in the U.S.A." The objectivity of the authors in this regard is most refreshing. They *remain* true to their word. There was not one single word to indicate whether the authors were pro or con.

ACORN

SIRcumcision anyone? ACORN is looking for a few good men who need to be SIRcumcised and we are looking for some good SIRcumcisers.

What is ACORN? ACORN is a secret "foreskin anonymous" group. We are men who made it through puberty with foreskin intact. Some of us have since been circumcised, some of us are still waiting to be SIRcumcised, some haven't decided and others just want to watch. What we share in common are circumcision fantasies. Some of us share the experience of adult circumcision, knowing the thrills of cock change. We share our thought, knowledge, experiences, fiction and dicks in regard to circumcision. Growing up uncircumcised we are special among Americans. We are thankful that we had, or have skins to cut off. We think of SIRcumcision as being the ultimate initiation a man can experience. We want to help others, who still have foreskin, face up to their fantasies and join us in our unique brotherhood.

Man has been circumcising cock ever since he first learned how to use the knife. Circumcision has been performed at puberty (or earlier or later). Boys have learned to look forward to the moment of their circumcision. They have usually been circumcised in public along with others of their age group while the older men celebrate. They look forward to watching the next crop of boys become men. Since antiquity circumcision has been one of the most erotic experiences for the male.

Today circumcision has been reduced to a sterile and meaningless clinical procedure at birth. Men circumcised at birth are deprived of ever knowing what it is like to have a foreskin or ever to understand the eroticism of adult circumcision. They often judge an adult who is considering circumcision to be sick. Yet doctors are busy circumcising adults every day all over the country, and seven thousand years of puberty rites cannot be dismissed. For some men the desire to get circumcised cannot be denied.

ACORN is not for everyone. It is for those uncut men, those cut later in life and for those cut as infants who are in sympathy with our circumcision attitudes and whose cocks get stiff just thinking about joining us in a SIRcumcision. We especially invite you if you have a long and loose foreskin on a big cock we could use in one of our demonstrations. How about us putting you through your fantasy for real? We also invite qualified and experienced SIRcumcisers. We say we are anonymous and we mean it. We are only known by our cocks. We are ACORN Number 1, Number 2, and so on. No names. Our meetings are secret. We never force an uncut man to give up his foreskin during our rites. In fact, our initiates must beg for SIRcumcision and our decision to give him what he wants depends upon his hard-on as he

looks into the face of his SIRcumciser. But that is all we can reveal at this time.

The editors of FORESKIN QUARLERLY have invited us to prepare a regular column. You will hear more from us. If you are interested in ACORN or need a SIRcumcision, or want to do one, write to us about your desires. ACORN must be absolutely convinced of your sincerity and your sympathy to our pro-circumcision attitudes before we consider your cock as being an ACORN. We worship the proud, manly, uncovered acorn (acorn means glans penis in latin), the BIG BROTHER ring of circumcision around skinned shafts and the sleek look of the circumcised cock. If that cock sounds good to you let us make you an ACORN. Write to: ACORN No. ONE, Box 542, 633 Post St., San Francisco, CA 94109.

Here's the true story of an ACORN:

I have been circumcised since the age of 15. In fact I had another circumcision at 18 (I was dissatisfied with the first operation being that it was a partial circumcision and I wanted to have my foreskin totally removed). I don't want you to think I don't like uncircumcised penises, it's just that I wanted to be circumcised. My father wasn't circumcised and neither was my grandfather, so I was unaware that it existed. That is until I entered school and saw that most of the other boys had different looking penises. Asking my parents

about their different looking penises, they explained to me about circumcision. After being told how it was done, it only heightened my fascination about circumcised penises. At age 7 I became involved in sex play with other boys and girls and I was the only boy who was uncircumcised. We were intrigued by the differences in our penises. At age 14 I bought the book, *Advice to Men*, and read about males who were unsatisfied being uncircumcised and were happy after they had it done. It was a relief to learn that other uncircumcised men thought the same way as I did and there was nothing wrong with being circumcised later in life. I was becoming increasingly alarmed that I had an ever growing desire to fondle the circumcised penises of my male friends instead of being interested in girls, so I thought if I got circumcised I would forget about penises. I was wrong.

After my first circumcision my appetite for penises grew stronger and now I was even thirsting after uncircumcised ones, but there weren't any in my part of the country anymore. Mine was the last one. Since before my circumcision, even at 13 years of age, all I thought about when I masturbated was either being circumcised or other boys' penises getting circumcised. At age 16, I finally fell in love with a girl. I thought for sure my penis fetish would abate. I was wrong. The more I made love to her the more my sexual desire became for both her and men. For the past six years (I am

now 22) she is the only woman I have truly had sexual attraction for. After we started having sex, I told her about my circumcision. She told me about the penises of all her past boyfriends and what she thought about them. I was so happy to have someone to talk circumcision with, but she soon lost interest in the subject. She couldn't understand that the only time I could ejaculate while making love to her was when she was appealing to my circumcision fetish.

It was at this time I decided to have another circumcision and that caught her fancy. So I got a nice tight circumcision and two weeks later we had sex and I had the most satisfying sexual experience ever. I can still remember the raw sensation of pain as my newly acquired circumcision scar was stretched tight by my erection and the massaging of my scar against her vagina as I slowly and carefully slid my penis in and out of her as she moaned how nice my tightly circumcised penis felt inside her and how

happy she was that I had it done just for her. After the novelty of my circumcision wore off, our relationship quickly deteriorated and to make a long story short she left me for another woman. Now I am in love with a great guy. He is circumcised and likes my circumcised penis. He doesn't understand my circumcision fetish though. But he has learned to take me as is, and part of that is that I get real horny when I read all about circumcision, circumcising penises and looking at photos of uncircumcised penises and fantasize about them getting circumcised and what they will look like and how far back they will have their scar. I still haven't had sex with an uncircumcised man, though. That is an experience I'm still looking forward to. My lover understands me with my fetish now. He knows I'll have it all my life.

If you want to write to me about your circumcision fetish, write to the ACORN box number. I am ACORN No. 9.

INTACT

Dedicated to Preserving Freedom of Choice:

INTACT stands for "Infants Need to Avoid Circumcision Trauma," a conviction that is shared, in view of recent medical findings, by a growing number of people.

Established at Wilbraham, Massachusetts in 1976 by Jeffrey R. Woods as a local resource, this grassroots organization has attracted the devoted efforts of concerned individuals nationwide, achieving recognition by health care professionals and lay persons alike for its clear insight into what is rapidly becoming regarded as one of our society's more significant human rights issues. Unencumbered by either religions or anti-religious partisanship, the scope of the Foundation's work encompasses the symbolic aspects of both circumcision and non-circumcision, shedding critically-needed light on an area of controversy too long enshrouded by ignorance and superstition.

Available on request is a catalog of publications that cover topics ranging from the history of circumcision to care of the intact infant, including medical journal reprints and personal accounts. When writing for a copy of the catalog, please include a self-addressed stamped envelope. Intact Educational Foundation, Box 5, Wilbraham, MA 01095.

What They Say

Since its inception, INTACT has received a lot of mail—mostly for the information we offer; aside from that, more than a few people have gone out of their way to express deeply personal feelings that question, if not condemn, the practice of routine circumcision. It is as if our existence has provided these people an opportunity to express sentiments heretofore taboo in American culture. The inspiration

provided to INTACT by these unsolicited remarks is well worth sharing, and we have selected a sampling from the letters we've received:

"From my own experience with four sons, ages 4 to 20, I think one of the most critical matters is (for doctors) to stop solicitation of parents for circumcision. Even as a doctor, I had to be subjected to the humiliating circumcision "pitch"—I regard it as highly insulting, and detrimental to the well-being of my wife and children. Why should we have to put up with something as degrading, and so deeply contrary to our moral philosophy?"

D.S.

"In regard to my own foreskin, nothing has given me more physical pleasure. I find that the foreskin provides one with a very high level of sexual expression, thus enriching life's experiences."

J.H.

"I was successfully "restored" through plastic surgery to being uncircumcised. The return of sensitivity week by week increased my awareness of the incredible butchery this country performs."

R.H.

"I believe that a foreskin is a beautiful, natural and healthy part of the normal male anatomy, and efforts to mutilate and amputate it are repugnant to me."

T.B.

"I am afraid that circumcision will remain popular until the fee for the process is abolished and we all work as salaried physicians for somebody or another. As long as the insurance companies are willing to pay for the operation, then we shall only make slow progress..."

Editor Bud Berkeley is the keeper of the files for the *Uncircumcised Society of America*. His foreskin/circumcision question and answer column has appeared in *Drummer* magazine in the *Foreskin Update* series. He draws his answers to your questions from replies to the USA questionnaire, personal interviews, research material submitted by club members and his own investigations in the *Middle East and East Africa*. FQ will continue his column under the USA Update series.

Dear Bud,

My uncut dick is really beautiful. It is the long, cylindrical type and has a foreskin which comes to a pointed tip, even when I'm erect. I always get compliments for it and one of my friends makes me strip when I come to his house and he just sits and looks at my dick while we light up and watch TV. Recently I have been into mutual J/O because of the health crisis and got into it with a real hunk who was circumcised. He just couldn't figure out how to beat my uncut dick and said, "Your foreskin is in the way. Why don't you get circumcised?" No one has ever said that to me before! I didn't know how to answer him. What could I have said?

Dear Cylindrical,

Your cock sounds like a classic to me! So do you. But while you are having your meat stroked I am sure you were not in the mood to recall the reasons listed in my book, *Foreskin*, for keeping foreskin. Here they are:

- (1) Your foreskin is loaded with erogenous-producing nerve endings which are super-sensitive near the tip and disperse down the shaft and stop where the hair starts down toward your balls. Who wants to lose those sensations?
- (2) The foreskin protects the glans from abrasions and loss of moisture and massages the glans with no friction...its sliding motion giving a gentle, slow, velvety build-up towards an incredible orgasm.
- (3) The foreskin helps maintain the temperature of the genitals...the uncut guy is supposedly 1° hotter.
- (4) Foreplay versatility. There is so much you can do with a nice, long, loose foreskin. You can stuff it with food or your partners' cockhead. You can nibble or chew it or prod fingers into it. For the cheese connoisseur you can provide a feast. You can roll your overhang over your partners' toes or tits or nose, etc. By this time, your cylinder should be rock-hard and ready for

real action.

(5) Penis fashion. Foreskins are IN, as you no doubt have experienced. Of course, there are men who don't know how to handle them...but they can be educated.

(6) Masturbation. OK, so your handsome trick didn't know how to handle foreskin. Actually, pumping uncircumcised penises is much easier than beating most cut ones. The long skin is nature's pumper. There are three ways to do it: the short stroke for those uncuts with rather tight skin and a super-sensitive head which they don't like to have uncovered; the long stroke for guys like you with loose foreskins who like to have the skin rolled back off the head as far back as possible and slowly brought back up to the tip covering the head again; and then there is a wonderful stroke for those uncuts who are curious about what cut cocks feel like...all they have to do is to hold the skin at the base of the shaft, grab some lube and beat off over the bared head and skinned-back foreskin. Next time you make it with this trick why don't you start with the last stroke...he should understand that one! You'll have him converted in no time.

Dear Bud,

Your comments seem to be telling us that circumcised men have been castrated. I resent my circumcision very much, but I think my cock is pretty and it gives me satisfaction. My argument is that I had no choice in the decision to skin my dick. Maybe you are right; maybe I did get castrated.

Dear Castrated,

Christ! I hope I don't give that impression to my readers! Obviously, you have not been castrated. Circumcision seldom alters the functions of the penis, except to cause a change in masturbation techniques. Penises are beautiful...ALL of them! How could anything that gives such a pleasurable avenue of communication be anything but beautiful. Every man has a beauty when he fondles his own penis; every man has a whopper when it is stiff in his fist; every man has the most magnificent dick in the world when his is sharing it with a lover. Castrated because you were circumcised? No. Castration complex, maybe. Robert Cartham writes in his book, *Advice To Men*, "All men have a subconscious fear of mutilation. This fear can be kindled by a parent catching a boy masturbating, exclaiming, 'If I catch you doing that again, I'll cut it off!'" According to the USA files, many neonatally circumcised men feel castrated and in most cases it was because of a boyhood idol, or first lover, who had a "whole" penis, uncircumcised. On the other hand, many uncircumcised boys develop fear of castration by parental threats of circumcision, etc., or by being the only boy with an uncut cock at school. They develop guilt feelings for having foreskin and

some look forward (or fantasize about), masochistically, to being punished with circumcision. Guilt and punishment have become so entwined with post-Victorian sexuality that they have become part of our sexual enjoyment. In any case, my friend, all of us, whether cut or uncut, have our problems with the castration complex. That's nothing! In the next question we will look at men who REALLY have castration problems!

Dear Bud,

What is the purpose of foreskin stretching? I have a lovely foreskin and I wouldn't want to stretch it out of shape.

Dear Lovely Foreskin,

Foreskin stretching can be both therapeutic and erotic. One of our members reports a case of one of his friends who has a 16-year-old son whose foreskin is too tight. The family is against circumcision, so their doctor instructed the father in stretching the boy's foreskin, which he had to do methodically each night. Much to the boy's embarrassment, and the father's amusement, the kid developed an erection soon after his father started to finger the end of his foreskin, and, before the allotted stretching time was over, ejaculated into his father's hands. After the first session the boy wanted to stop, preferring to get circumcised if need be, but his father promised him that no one would ever be told.

Reportedly, in remote mountain villages in Sardinia, the older men routinely sit around and stretch their own foreskins while they discuss the day's events. After long ago losing interest in "the old lady" and giving up sex, these men knew that their foreskins might tighten up and shrink from lack of use, and their mutual stretching is an accepted therapy in their native folk-medicine lore.

Does stretching work? Penile skin is very elastic—to say the least! From USA reports, stretching can make the foreskin bulkier, add up to 1½" overhang on some penises and give the skin a much stronger tone. As Dr. Skinnon suggested in a recent column, some troublesome foreskins, which bruise easily, can be strengthened by stretching to lessen the incidence of injury. However, USA stretchers report that they must keep stretching periodically or their foreskins return to their previous dimensions. So, for those of you worried about "getting stretched out of shape," reports indicate that such results would be temporary and by controlling "stretching sessions" you can control overhangs.

Why is stretching erotic? Remember the mucocutaneous end-organs and the Vater-Pacini corpuscles you have in your foreskin? These are nerve receptors whose sole purpose is to give you erection sensation. They produce these sensations when your foreskin is stretched back tightly over a rock-hard, throbbing shaft. The

"backward thrust" of the uncut cock is what gives its owner such a thrill, and an immediate impulse to withdraw, bringing the foreskin forward again, ready for the next plunge and another stretch of those foreskin nerves. Most uncut men are not aware of where these sensations are being produced. (Who stops to analyze while the penis is throbbing?) Anyway, since the "backward thrust" does such a good job stretching those nerves (many uncut men get hard only with a single retraction of the foreskin), why not try an "outward stretch" bringing those nerves to the same excitement. You can do it by yourself, but being the gregarious animals that we are, it can be nicer when a friend's hot fingers get in there and pull your skin gently off the head in two directions at once. WOW! And, why not try a "downward pull"—stuffing your foreskin with cotton (or, as one USA member does, stuff it with bee-bee-pellets) which weighs it down as you clean house on Saturday mornings in the nude, insuring a good "Saturday Night" overhang.

Dear Bud,

I was amazed to read how the military allegedly forced so many GIs to submit to circumcision. I was in the Navy and came out uncircumcised. Same with my brother and, now, my nephew (whose penis I saw during his last leave a few months ago). I do recall sailors getting circumcised, but was not aware of any pressure on them to do so. Of course, it was a subject we didn't discuss. Maybe I just lucked out.

Dear Lucked Out,

Yes. You lucked out by being in the Navy at the right time and place...or else your foreskin is not too tight or not too long (redundant, in military eyes) or else you keep the cheese scrubbed out. I have received loads of letters about military circumcision and half the writers said it didn't happen to them and half said it did...or also it happened to their friends or they were in the medical corps and participated in circumcisions. No, I doubt whether any military branch has standing orders to circumcise all uncut recruits, etc. But many of my readers, unfortunately, fell into the hands of individual medics who did make circumcision a part of their policy. After all, these medics were supposed to keep the men under their command in combat-ready health...and in their training they were taught that circumcision prevented VD, etc. Combat situations (in Jungles, deserts, etc.) during which hygiene was difficult and disease a problem have caused occasional "all uncircumcised personnel must report to sick bay immediately" orders, according to several of my correspondents. Then, of course, some GI penises got in the way of a medic (or officer) who had a circumcision fetish...and probably contributed their foreskin to his collection. One such medic (according to one of my

readers who served with him in Korea) especially liked to circumcise good-looking soldiers. When asked whether he was queer he denied it, saying that he aggressively sought out and circumcised handsome men because he was jealous of them and this was his way of getting even. Hmmmmm! Must be a form of "foreskin envy!"

Military circumcisions are free and I am sure many GIs, growing up uncut among cut peers or being embarrassed by remarks during short arm inspections, elected to join the circumcised crowd. If you are still doubting all this, let me quote from *US Naval Medical Bulletin* (Vol. 42, No. 5, May 1944): "Circumcision is one of the most commonly performed surgical operations in the Navy... At a relatively inactive foreign shore station the candidates for (circumcision) are numerous; the men seem to feel that it is an excellent opportunity to have (it) performed without loss of time." Hmmmmm! Sounds like a modern-day form of Phallicism!

Dear Mr. Berkeley,

I have been told that it is illegal to circumcise in the Soviet Union and one of the reasons some Soviet Jews have been harshly treated is that they circumcise their sons. I assume Soviet Moslems have become athiests and have gladly discontinued circumcising. Do you have any corroborating material concerning the USSR. I am curious about how many foreskins one can expect to find on Soviet penises.

Dear Curious,

90% plus! Atleast, among European Soviet penises, slightly over 90% have foreskin... according to a doctor contact I have in Europe. Circumcision is not illegal there if it is for medical reasons. Circumcision as a religious rite is illegal, but I understand the Jews there stopped circumcising several decades ago and just take a tiny nick out of the foreskin during their bris (8th day circumcision). Many of the Jews emmigrting are uncut and I have been told that a clinic in New York had been set up to give them free circumcisions. However, the Soviet Moslem is a different story! According to the book, *Muslims in the USSR* by Abdulla Vakhobov (1979, published in English for distribution by the Soviet Embassy in Washington), "During Friday services sermons on theological, dogmatic, and social subjects are read in mosques all over the Soviet Union. Aspart from the sermons in mosques, Muslim divines visit the homes of the faithful on occasion of such rites as circumcision, name-giving... State agencies and officials have no right to interfere." So, the Moslems can but the Jews can't! How do you figure that one out? The only thing I can imagine is that circumcision is a religious rite for the Jews, but is considered to be only a cultural custom among the Moslems. Frankly speaking, I am inclined to think that Russians don't give a shit about Jewish penises... they just don't want to lose Jewish brains to other countries. Right?

Dear Bud,

In a recent *Drummer "Foreskin Update"* you told about a dude who got circed and asked for his foreskin back, but his doctor refused to give it to him. He should have signed a release. I did when I got circumcised in 1976 and now I wear my foreskin in my belt buckle. It is between two pieces of plexiglass and has aluminum foil as a background. The pathologist at the hospital told me how to preserve it. I wear it to all biker events. Hell, I wore it on my dick for most of my life... now its out front where everyone can see it. Tell you something, though, I wouldn't do it again. Too hard to jerk off without skin on the dick.

Dear Buckle,

Well, that's what I call "out-front!" Personally, I'm inclined to dig foreskin on cocks, but I'd sure get a kick

out of viewing your buckle. You didn't say why you got circled in the first place... did you need a new belt buckle or something? Only kidding, pal, you've got guts. So you have to carry lube with you in case you feel like jerking it... that's not such a bad trade-off considering all the attention your buckle must get!

Dear Bud,

As a circumcised man who has had a lifelong fascination with uncut cocks (even though I am straight) I must ask you this question: what does it feel like having foreskin on your penis?

Dear Fascination,

You can't believe how many circumcised correspondents ask that question! Well, how do you answer it? The foreskin is just there... like your finger or ear. But, roll the overhang between your thumb and finger and you KNOW it is there. Piss through the overhang or pull the skin back to clear the stream and you almost feel like getting a hardon. But, the best of all is slowly skinning it back over a hard, throbbing rod and you get the most

exquisite feeling an uncut man can get. Roll it forward again and the foreskin tip likes a gentle chewing or prodding fingers. Yes, the foreskin is loaded with erotic, sensation-producing nerve endings and provides wild sensations by itself. But I suppose the best is when the skin is sliding over the glans when the balls begin to climb... the interplay between the glans and the skin is almost too much to describe in words. But, while you are at work earning a living the foreskin behaves itself... it's just there.

Dear Bud,

I read about the frenum in your column but I can't figure out what it is. Where is it on my cock? I'm cut, by the way.

Dear Cut,

Frenum, or frenulum, according to Webster's dictionary, "A connecting

inspection? I read about it in your book. Sounds hot to me.

Dear Hot,

Obviously, you have never been in military service. Well, let's recruit you and line you up with a bunch of Marines. The Drill Instructor orders every man to pull his short arm out of his pants. Now, what are you going to pull out? Think! Right! The D.I. wants to see your cock hanging out in mid-air along with all the other recruit-cocks. Then, the medic and his corpsmen slowly come down the line to give each recruit's short arm a thorough inspection. And, when he comes to you he is going to command you to "scat back" (assuming you are uncut) and what are you going to do? Yank back your foreskin quick on the double so he can examine your tender cockhead. Why? Well, he's looking over the short arms in case anyone has VD, etc. He's giving your's a special once-over just in case he finds cheese. I hope you swabbed out your skin, mister, because if you didn't you are going to get shit! Right in front of all the circumcised recruits. Next time your cockhead is going to be polished like your boots... or else. Get the picture? Still sound hot?

Dear Bud,

Why do you allow circumcised men in the USA and why do you allow men with partially-circumcised dicks to list themselves as being uncut? If I see a handsome man I ask him if he's circumcised and if he says yes, I'm turned off.

Dear Turned Off,

The purpose of the USA is to promote the eroticism of the foreskin AND to be involved politically with the subject of circumcision. The most avid anti-circumcisionists are men who were neonatally circumcised... the leaders of the nation's anti-circumcision activists groups are mostly circumcised men. Conversely, most of the pro-circumcision sentiment comes from men circumcised after infancy. The average uncut man simply wants to enjoy his foreskin... and to share it. Now, many uncuts will confirm that some of the best action their skin has seen has come from cut men who are into foreskin! It's all a matter of learning how to handle foreskin... and if you really want to learn you can become expert whether you've got one on your own dick or not. Right men? Yeah! Now, partially circumcised men; foreskins come in all lengths and some which were never trimmed can be pretty short. Many men who were circumcised at birth, or later, still have overhanging skin (to varying degrees) over their glans. With many such cocks you'd never think they were ever circumcised. On the other hand, I once was very embarrassed in Italy when I asked a very handsome trick why he was circumcised (since it is so rare in Italy) and he got very indignant and said, "I am not circumcised!!" Well, you could have fooled me. See what I mean? C'mon, share it with the next handsome guy who says he's circumcised. □

Dear Bud,

What in the hell is short arm

DR. SKINNON

Photo by Reflex Studio

Dr. Skinnon (not his real name) is a practicing urologist, an anti-circumcision activist and, having a foreskin of his own, understands the eroticism of the uncircumcised penis. FORESKIN QUARTERLY will feature a regular column by Dr. Skinnon to answer your questions.

Dear Dr. Skinnon,

My glans is too sensitive. I would really dig having some dude peel my foreskin way back off the head and suck on my bared glans. But I couldn't stand it for long. My foreskin is not too tight, it covers the head completely when soft and mostly when hard. My head is usually very moist and almost purple. I used to think my supersensitive head was due to my being uncut, but I've met other uncuts who were not nearly so sensitive. What can I do to toughen my cockhead?

Tender

Dear Tender,

Sexual tension is what we all feel when we respond with a roaring hardon and a desire to savagely stroke the unit. You are provided with nerve endings on the glans which provide pleasure and heighten the tension. Fortunately, there is a built-in "modifier" or, without it, we'd squirt great gobs of

heavy cream after 4 or 5 pumps. That "modifier" is the most important sex organ in the body and it is between your EARS, not your LEGS. Put your brain in motion, as well as your penis. Concentrate on something unrelated and let the dude yank back your foreskin and work on the bare glans. If necessary, produce an external stimulus that will override the dude's action, such as steadily pinching your arm until it hurts. Re-program your response to the situation. There is no reason to de-sensitize your supersensitive cockhead. Lotions are to be avoided; they are not very effective anyway. Just be grateful you have a purple delicacy and LEARN how to enjoy it!

Dear Dr. Skinnon,

A few years ago I pierced the underside layers of my foreskin and placed in it a tiny gold ring. It rests inside my foreskin just under my frenum unless the skin is retracted and then it comes into view. I like the feel of it in there and seems to be a turn on to others (I am straight). However, I have noticed a buildup of scar tissue forming around the hole. It is mostly unnoticeable now and no problem, but will it eventu-

ally build up and become unsightly and uncomfortable? If so, how can I get rid of the scar-tissue.

Gold Ringed

Dear Gold Ringed,

You have nothing to worry about as long as you maintain good personal hygiene. If you are into extra days of "flavor" on the ring, it might be a problem. The ring is, after all, a foreign body and some reaction to it is inevitable. Just as with pierced ears and earrings; some people get scar in the ear lobes more readily than others and the same would apply to foreskins. If you are tidy with your toydee, you should be okay.

Dear Dr. Skinnon,

Blue Balls is the biggest problem in my life. If I don't get a good load off my damned nuts ache for days. This doctor told me it was because I was coming too quick and I should get myself circumcised so I could pump on it longer. Hell, I don't want to lose my skin but if this doc is right about it I might go for a clip job. First, can you give me a second opinion? What causes blue balls? If circ doesn't cure it what will?

Sore Nuts

Dear Sore Nuts,

Blue Balls is never a problem if you fire your load regularly! You have already discovered that, and the cure is obvious. Cut and uncut guys both have the same reasons for getting blue balls and circumcision does not affect the situation at all. Just keep the tank drained and that's not a bad prescription.

Dear Dr. Skinnon,

I am uncircumcised and recently became a diabetic. While I was in the hospital I spent considerable time remembering a statement from somewhere, "Some men prefer circumcision as a solution." I don't know where the statement came from or when I read it. What I am referring to is the fact that a circular band of my foreskin contracted while I was in the hospital as a result of my first diabetic coma. Can you give me any information about this? My doctor was no help.

Need Help

Dear Need Help,

Your description is not unknown and, in fact, not unusual among diabetics. It has the frightening medical name of *balanitis xerotica obliterans*. As you can tell from the third word, the end of the process is obliteration of the pliability of the foreskin. Unfortunately, it is usually progressive and circumcision is the

ultimate event. If you have caught it as soon as the contracted circular band became evident you may be able to forestall such progression if: (1) Your diabetes is well controlled; (2) You have a loose foreskin to begin with; (3) you make every effort to be scrupulously clean, and; (4) you daily use your fingers (up to four of them) to stretch the tight ring and use vaseline if necessary (soapy water in a hot tub will also work as the heat helps to loosen the skin). Alas, in your case I do not prescribe any fingers other than your own for this procedure.

Dear Dr. Skinnon,

When my wife was pregnant we were bombarded with pro-circumcision literature, statements and demands to sign the circumcision release should she give birth to a son. Such sentiment came from all sides: our doctor, his nurses and our families. I refused. I staunchly believe that every male should make his own decision about circumcision once he is in his twenties, or older. Well, we had a son. Two days later I received an emergency phone call from my wife who was still in her hospital bed. She said that the nurse told her that the child couldn't urinate unless he got circumcised immediately. I couldn't get to the hospital at the time so I phoned the doctor and told him to do anything he felt necessary. Well, of course, he circumcised my son. Later I learned that the nurse simply couldn't retract his forekin. I accepted the diagnosis at the time, but learned that most boys are born with unretractable foreskins but can urinate anyway. I get furious just thinking about it! Do you really think circumcision was necessary in this case?

Mad

Dear Mad,

You got ripped off worse than your son did (well, almost)! He had a completely unnecessary operation that you paid for! New born males—virtually all of them—do not possess a retractable foreskin. Even so, urination is not obstructed. The foreskin may be ballooned out by the force of the urine and filled much as a sack might be until the foreskin opening loosens... but the urine will always come out. This type of foreskin filling is healthy and among adult water sports enthusiasts it can be a playful, exciting and "warm" adventure... but, of course, that is a story for another column. □

(Continued on page 40)

It, his shaft, jumped a trifle and swelled a fraction. He continued to stand and look at me, his eyes going over every inch of my body's surface like they had over the painting of the Greek garden. I felt that familiar rumble in my testicles and nearly turned away in embarrassment. Not that I minded him looking me over, I was more than fairly blessed in all parts of my anatomy, but because I could not remember having ever been so openly observed and the feeling inside was a mixture of excitement and shame.

The tip of his tongue ventured out and made the slightest move across the center of his lips. He was looking wholly at my genitals now, and they were responding to his visual attention: my testicles rising a hair from their sac, my own organ swelling and filling out, faster and more tellingly than his had done—although I concentrated on his face, fearing that to look downward again would give me away completely.

As he gazed upon my privates—and neither of us moved a step—he said, "You must get lonely for companionship out here." His voice was all warm and honey-sweet and a little breathy.

He couldn't notice my small, almost invisible nod of the head. But in that finite nod my eyes glanced down to his groin. His member had grown considerably. It would be fatter than mine, although maybe not quite as long (if I am any judge of these things). The tip of the head dared to peek out but from the slightest from inside the folds of his sheath. I felt myself hardening rapidly, I did not have to look down to see it happen.

He was to me in two steps, his arms around mine, his lips crushed against my lips, his tongue forcing its way inside my mouth. I felt my heart quicken, and my lips give way immediately. There was such power in his tongue as it probed, scraping the roof of my mouth, stretching itself towards the back of my tongue, his arms squeezing my frame within their grasp. His organ, now jumping with the flush of blood filling its veins, danced against my stomach, just about the spread of my own dark pubic hair. I felt my own manhood rise out straight and curve upward, the foreskin skinning back as it went its full length and measure, spearing up between his legs and pressing against his weighty balls.

His tongue dove deep, almost filling my mouth. His hands began to search out the landscape of my body, running themselves down my back and over my hips. I raised my hands to his sides and slipped them over his meaty frame.

He half-stepped, half-pushed himself a foot back; his eyes never leaving mine. Then, as suddenly, he sank to his knees in the rush, staring at my jutting rod. His tongue flicked out to graze the end of it, then—his hands holding onto my hips, he moved on it, taking fully half in his mouth. I nearly sank with a sudden rushing of warmth that radiated throughout my being. He

retreated until just the head was lost in the cavern between his lips, then the tip of his tongue dug under my skin-covering and moved around the head, stopping once to change direction and move the other way. I realized he was encountering, and cleaning away, any residue that had gathered since my last washing. Then, his lips met my groin and he engulfed all of me in one effortless move.

I felt my knees buckle and his hands grab hard my hips as he eased me down on my back, never letting my tool escape from his mouth's caress. I lay back with eyes closed, completely lost in the rapture of sensation, and he again began to move up and down the length of it, now standing straight up from between my legs. My head whirled with the pleasure he was bringing to my whole body by his attention to just this one part. I reached down and held fast to his shoulders, eventually guiding him into long, slow strokes that brought the blood rushing even faster in that region.

Eventually I opened my eyes and raised my head to see his administrations. The top of his head with its golden sheath of hair was all that I could see of him, and the shaft of my organ rising up to be lost underneath the wave of hair that hung from his forehead. The broad acres of his shoulders and back filled out between my thighs and legs, and his small, rounded buttocks arched up further down.

He came off my member of his own accord and crawled up over my stomach and chest until his face was against mine and his wet lips and tongue met my own. The taste of me on him was strangely sweet, mixed with his own juices, and this time I dug my tongue into his mouth to taste more of me.

Arms clasped around each other, we rolled over until I was atop him. I started a parhway down his frame, stopping to kiss parts of him as my mouth sought out his throbbing organ, I found it jumping against the underside of my chin and raised so that I could meet it. The skin was still stretched over the head, and remembering his devotions, held on to the shaft while my tongue went to its duty of cleaning away the findings underneath the skin. I was amazed at the taste, slightly like a crumbled cheese, with the sharp bite of urine and sweat mixed in. I admit that I greedily devoured all of him, anxious to fill my mouth with as much of his weapon as I could manage. I started with the encased head, the foreskin moving back as the organ went into my tight-fitting lips. It was a broader tool than my own, and nearly every inch as long, and I worked to accommodate more and more of it, taking time to savor the taste as it grew in my mouth and met my throat, moving up and then going a little further down. I was almost home to the base of it when I realized that it was already beginning to snake into my throat and that to swallow all of it would make breathing hard, and perhaps impossible. I concentrated on relaxing the

natural reflex of my throat muscles until I could sink all the way to the small crown of blond hair sprouting from his crotch. I could hear a long, deep moan escape from him when I finally had all of him inside me. His hand quickly grasped my shoulders to stay me, pleading that I not move until he could regain control of his passions.

I followed his purely-physical instructions and let him, as he had let me, dictate the manner and speed with which I should please him. I felt his whole body begin to curl around and turn me over on my side. His hands and mouth sought me out at the same time, taking me into his mouth as steadily as I had him in mine. Then, slowly, we developed a stroke that matched beat for beat; I found this position made his size more easy to accommodate. Together we worked at the other's organ, speeding up and slowing down in unison, silently agreeing to reach our respective orgasms at the same moment.

Eventually we did, or we both passed the point of no return and each sought to increase the sucking on the other to insure that both explosions would be vented at the same instant.

It was as if my heart had stopped and I am sure I saw my life cascade before my mind's eye as the first bolt left me and was taken by his eagerly working mouth; and at the same time I felt and tasted a stream of sweet liquid pour from the end of his member, which equally slipped down my throat. Then another jolt as I felt another flame burst from my testicles, and a second stream filled my mouth. It was the third that seemed less like dying, and his third that seemed less copious to my trans-secitearless throbilus to my tongue. Then both of us were still and quiet, holding this private part of the other in our mouths, almost as if waiting for an aftershock.

My heart raced, and it seemed none of the blood had left my shaft; so did it once in a while throb with aching pleasure. And his, although softening some immediately at the climax, stayed large and firm and locked within my lips.

At almost the same time, we parted, each laying back on the warm grass, lost in our mutual, but independent, physical relief and exhaustion.

We lay like that for a long time. The still air still warm and the day unbroken except for the distant peeps of the grebe chicks in their nests.

I turned and rose to my knees and looked down at him. His eyes were still shut, his head tilted to the side towards me, one hand on his chest, the other on the ground, his legs spread slightly, his organ hanging between his legs still half-swollen over his testicles.

He did not move, and I squatted there for as long, looking at every inch of him, memorizing every play of sunlight on his skin, every curve and angle of his body, my mind's eye erasing the landscape around him and instead seeing this naked, sleeping man laying in the center of my painting of the Greek garden.

"John Preston has produced an
SM masterwork... Mr. Benson
hits the mark with a body blow."

—Phil Andros

Mr. Benson, the Book: Penthouse named it one
of the "Top Ten" SM novels ever written.

Mr. Benson, the Man: "One of the great figures
of gay literature... awesome, forbidding,
almost godlike," writes Jesse Monteagudo in
the *Miami Weekly News*. "He is the ideal Master...
No wonder gay males went out looking
for Mr. Benson in droves."

No wonder indeed—as you'll discover when
you read *Mr. Benson*. Originally serialized in
Drummer, this trade paperback edition has
been completely revised by the author—with a
revealing new epilogue from Mr. Benson
himself.

**SLAVERY WAS ABOLISHED IN 1863
BUT NOBODY BOTHERED TO TELL HIM**

SLAVES FOR SALE

Meet the man who is dedicated to carrying on that age old tradition. He gathers them up one way or another, hunky men from all walks of life, and brings them to The Compound. They are stripped, shaved, branded... or worse. They are brutally trained, shackled, abused, then offered to the highest bidder. There is no escape...

It was done a hundred years ago and it is being brought back in this Robert Payne fantasy, *Slaves for Sale*, that will hold you attention from the first gripping moment to the last explosive orgasm.

In two parts, each tape runs one hour. Starring Ken Bergquist as the Dungeon Master, and a cast of extraordinarily hot, hung, hunky captives that includes Mr. Drummer '84, Mr. Rocky Mountain Drummer '84, and the winner of the Biggest Dick in San Francisco contest. Plus many, many more exciting newcomers to the video screen.

Three Journeys To Erotic Worlds Beyond Your Wildest Imagining!

Presenting: Three classics of illustrated SM—erotic fantasies that will take you from the decadence and luxurious depravity of ancient Rome, to the high adventure and futuristic fantasy of Sado Island, to the timeless ordeals of the slave known only as Q...

Aaron Travis' SLAVES OF THE EMPIRE

Illustrated by Cavelo

Follow the epic adventures of Magnus the gladiator as he seduces his way through a dangerous maze of sadistic senators and captive slave-boys, brutal warriors and passive eunuchs. First serialized in *Drummer*, now fully revised and expanded by the author, *Slaves of the Empire* belongs in every library of the finest in one-fisted reading.

Drummer Presents The Zeus Collection's SADO ISLAND

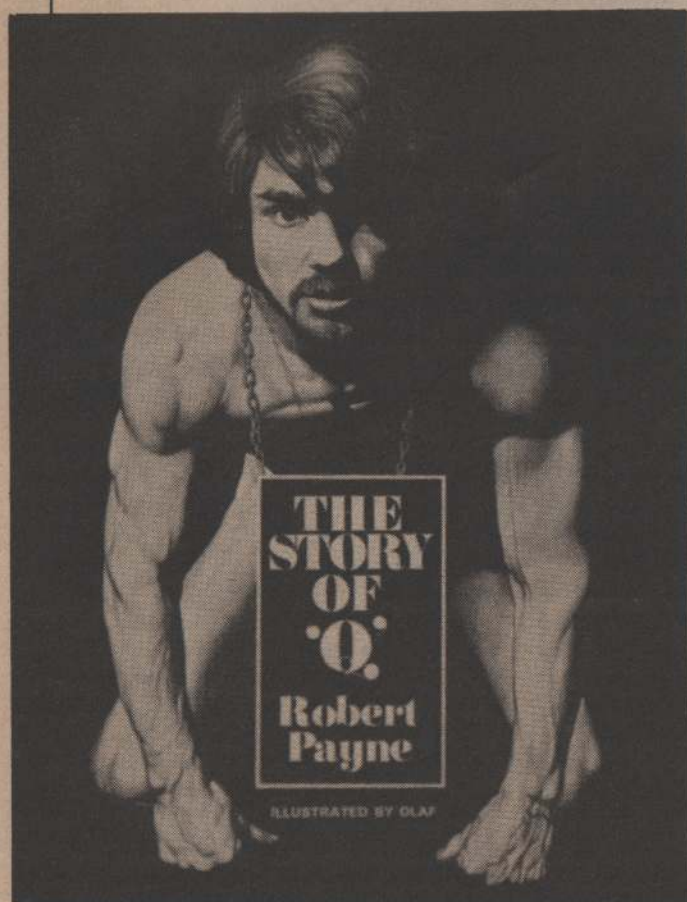

Illustrated by Matt

Science fiction as you've never seen it before—a hardcore, action-filled SM epic. Join Planet Population Police cadets Morgan Greystar and Joe Buck Golden on a deadly mission to the heart of Sado Island, stronghold of the notorious Dr. Heinrich Von Sado and his black leather army of muscular sadists. A bizarre *tour de force* of high adventure and high-tech SM.

Robert Payne's The Story of Q

Illustrated by Olaf

Modeled on the classic *Story of Q*, Robert Payne's dark fable of a young man's descent into total slavery has become a classic on its own. Olaf's extraordinary illustrations represent the best work ever created by this internationally famous erotic artist. To celebrate this reissue, we're pleased to offer copies personally signed by the author at no extra charge.
