UNCUT CORRESPONDENCE

Dear Bud,

FQ and the Foreskin Finder list has been the answer to my dreams!

I have met and corresponded with so many wonderful people that care about saving and restoring foreskins! Even though I am *very anti-circumcision*, I have a fantasy about having it *both* ways if I could be restored to my natural state in the blink of an eye, which explains my ad in *FQ*. I'm especially turned on by guys that have a partial circumcision who are stretching to restore their foreskin, and am stretching my own to get a longer foreskin like I had when I was a kid, before my penis grew in proportion to my naturally shortening foreskin. It was so much *erotic* fun to pee through!

I.S.

Dear Bud,

FQ is truly a masterpiece. This magazine brings out in the open and discusses what everybody is thinking about (the male penis) but are afraid or embarrassed to talk about. I hope it goes monthly. I am sure it would truly expand if you advertised (maybe you don't want to) in the other adult magazines such as *Penthouse* or *Hustler*. The info in *FQ* is too valuable to be kept a secret. Myself, I am pro-circ (was cut at age 27 and glad I was) and I find the Sarge column and the Acorn column a treasure. This makes *FQ*, as far as I am concerned, the truly knowledgeable document on the subject of foreskin and circumcision.

I applaud you for your stance in the letters coming in against covering the circ info. This is why I am renewing and will always renew my membership to your unbiased and complete magazine on this subject. I also have joined Acorn as a result of the info in *FQ*.

Dear Bud,

I have a complaint about the fiction in *FQ*.

But first let me say I agree with you about retaining Acorn and Sarge. I do think circumcisionists should be heard and their views aired. I'll never change my anti- views and I think I've lost all battles to keep grandson's foreskins. I know my uncut cock will remain my

chief treasure while pulse and breath go on.

But back to the sex in the fiction. Just about everybody in it gets fucked or does some fucking, takes a load down his throat or puts one down somebody else's. Now surer'n hell these four activities are the chief routes to date of the spread of AIDS. No way can any of them be described as safe sex.

The implication is that safe sex cannot be shown in fiction in any satisfying way. I doubt that.

Of course, I'm influenced by my own prejudices. I will never like *any* dick up my ass, however small. The one of two times I've tried, it hurt like hell for days and there aren't going to be any more attempts.

Dear *FQ*,

My boyfriend picked up your magazine in a bookstore and brought it to me. I am a foreskin fan, and he thought your readers would be interested in how I got that way. My personal story may be unusual.

When I was a kid, I lived in a little western town far out in the mountains. I was a tomboy and thought boys did all the neat things. I used to follow them around, one little gang of teenagers in particular. Most of them were not crazy about having a smaller girl hanging around, but one of the ringleaders took my side. One time he and I were sitting alone in the shade of a canyon and I sort of snuggled my hand up against his crotch. He got horny and asked if I would suck his cock. I had never done it before, but I was more than willing. I liked him and adored playing with his prick.

For a while this was just a secret between the two of us, but it was too good to keep. Some of the other fellows wanted to try me, and before long I was taking care of them all. Now I was a regular member of the gang, a sort of mascot. They all looked out after me. Other people did not pay any attention to me. I dressed like a boy, looked like a boy, and fit right into the crowd. Since I was too young to be viewed as a girlfriend of any of the boys, I was even allowed to go along on campouts with the group.

Probably for this same reason none of the boys ever tried to screw me. I was just an inconspicuous tagalong.

The grownups never dreamed that I was sucking more cock than any woman in town. We had a kind of clubhouse in an old miner's shack down by the river a mile or so from town. The boys would often go swimming while I held forth in the shack. We had a couple of chairs and some camping pads that we could arrange for comfortable positions. Usually I took one at a time, but a few of the boys liked to be watched or to watch me show how I could bring off another fellow. I did not mind this at all; in fact, I got a kick out of seeing another boy jacking off while waiting his turn.

Everyone today asks me what I got out of sucking cock when just a youngster. It is true that I did not get the kind of thrill I got later when I matured. But it was fun and I hardly ever got tired of doing it. Every cock was different, different sizes, different shapes, and different sensitivities. I learned to work each one differently to get the best effect. I felt very possessive. These cocks were my pets. Some of the boys brought all their hard-ons to me, and I felt very important that they were dependent on my tongue. It was all fun and no problems as far as I was concerned.

Indirectly, I suspect I was the cause of a lot of girls in that town becoming cocksuckers, particularly after I moved away. I may have been a hard act to follow.

From the very start I swallowed every drop of cum. It did not seem right to take it out at the most exciting moment, and also we did not like to get spots on our clothes. I never spilled a drop. Then I came to have the belief that cum was good for me. I admired the strength of older boys so much, and when I saw they came to me full of vitality and left me feeling drained, I concluded that their strength passed into me with their love juice. Some boys came very quickly, and some lasted a long time, especially on the second time around.

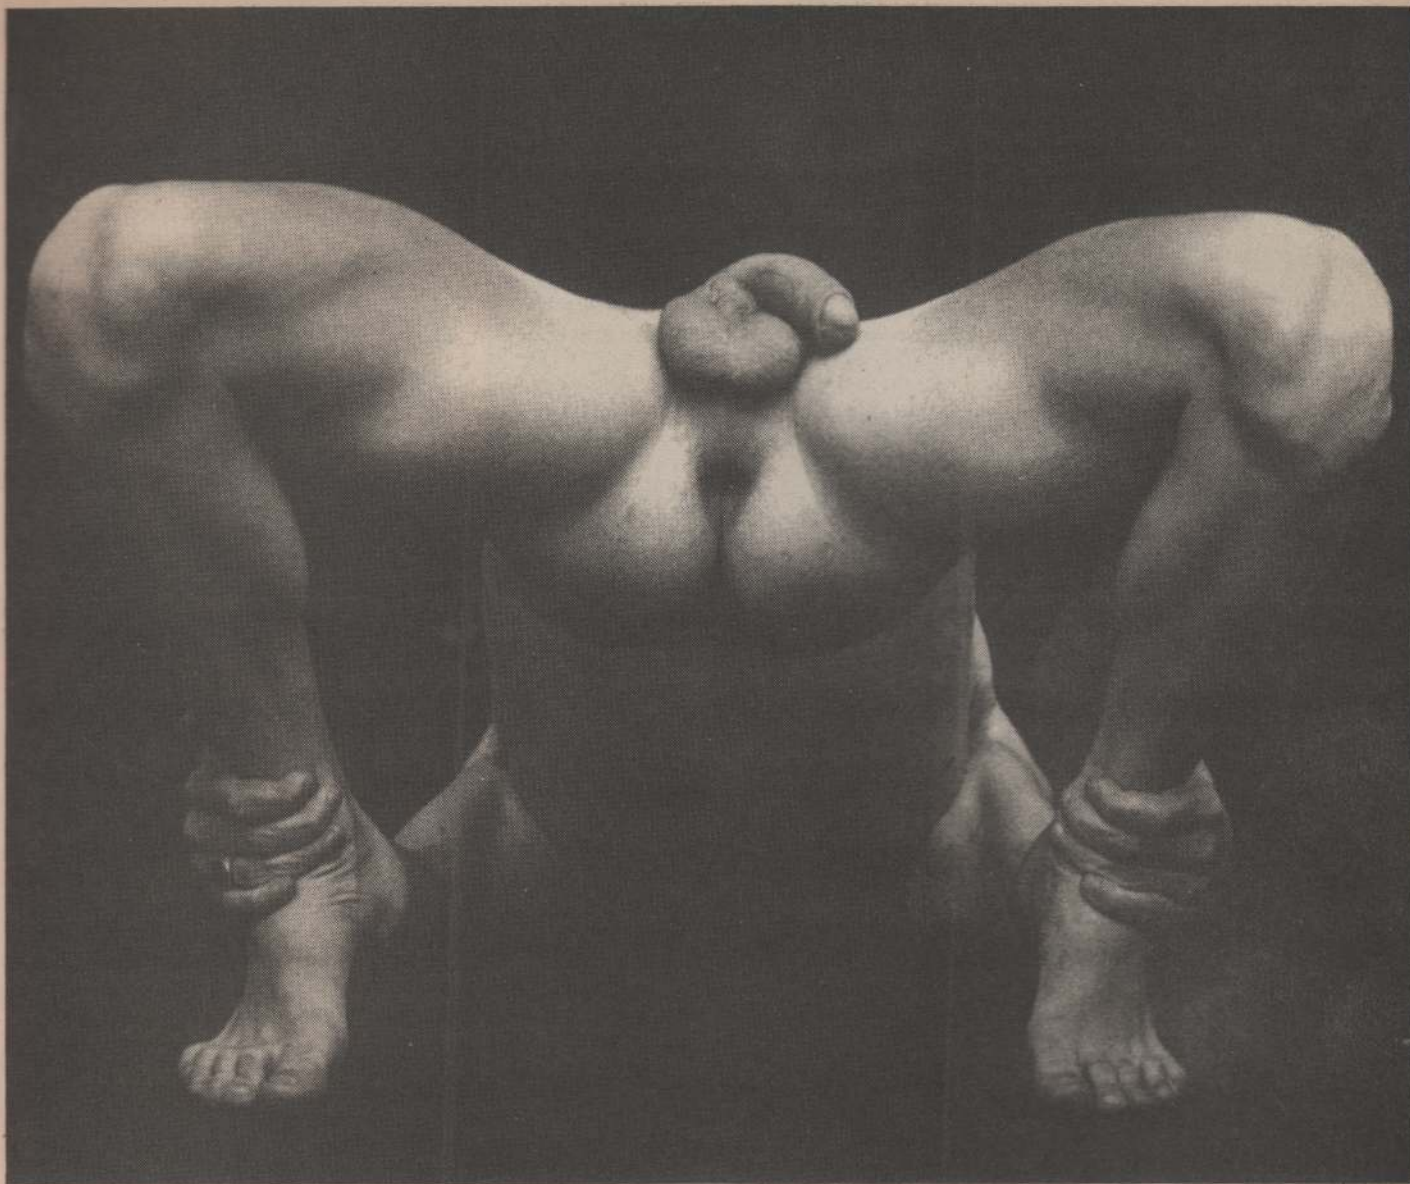

All of my friends had foreskins. The reason was that there was only one old doctor in the community, and he did not believe in circumcising baby boys routinely. The foreskins had different personalities just like the cocks. I liked to play with them, both with my hands and with

Dear Bud,

After receiving your paper, so far I am really impressed with the work you and your staff have done over the past year and I surely hope it continues for many more to come.

Upon receiving your last issue I noticed it contained a quantity of interesting information and photos—great work!

Your second issue on "Daddy" with that beautiful, overhanging foreskin just turned me on, but the stories were not that great.

You came along with the fourth issue,

and I think between the pictures and stories, I must have read it at least six times so far.

In one of your issues, one topic spoke of one person being able to do auto-fellatio and he said that it was safer to do oneself and that way it would cut down the chances of getting infections, etc.

To me, the art of auto-fellatio is a great turn-on. I go to a lot of movies and am a great collector of films (mostly uncut cocks) and I see auto-fellatio every chance I get. Could you print a few pictures and also inform me as to where I could obtain such?

I thank you for the hours of enjoyment which I have gotten from your papers, and please keep up the excellent work.

Dear Bud,

I just recently finished reading my very first issue of *Foreskin Quarterly*, Fall 1985. I was quite unprepared for the wonderful surprise of the contents in your

magazine. Having an interest in foreskins had led me to wonder if there were any magazines or material published catering to the uncut men or to those who admire a beautiful, uncut cock. I happened to discover *FQ* one day while browsing through a bookstore. From the moment I picked up my first issue of *FQ* I couldn't get home fast enough to see what was between the pages.

Reading each page of *FQ* was a hot, turn-on experience. To find a magazine full of uncut men is a wish come true. I applaud *FQ* for a very stimulating magazine and I'm looking forward to reading the next issue. My cock throbs at the thought of looking at those big, uncut dicks in the next quarterly issue of *FQ*. It's refreshing to pick up your magazine and find the uncut men I'm looking for rather than thumb through others hoping to occasionally come across an uncut shaft. At last, the only magazine I can read over again from cover to cover and still get a hard-on.

FORESKIN IN THE NEWS

GLADIATOR FORESKINS PULLED

In FQ2 we announced that Aureus, the jewelers who make the USA symbol pendants (circles representing the cut and uncut cock), were working on a *fascinus* with foreskin forward. The *fascinus* is the penis-shaped amulet worn by the classical Romans as a good-luck charm. The Romans worshiped the reproductive powers of the phallus and, as a result, their *fascinus* was always erect, depicted with the foreskin retracted. The Aureus reproduction announced last year was authentic, in that the foreskin was retracted.

Now, by popular demand, they are offering a *fascinus* covered with a luxurious, full-forward foreskin (see photo). But that is not all. Aureus is also offering the *fascinus* in several stages of foreskin retraction (a particularly enticing one clearly shows the urethra peeking through the skin) and they call it the "retraction" series. The carms come 1 3/4 inch long and are made of silver. They weigh one ounce and, as with all Aureus jewelry, are beautifully crafted. Smaller versions of the *fascinus* are in the works. For information write: Aureus, 23906 Sofia, Mission Viejo, CA 92691. You can call them at (714) 855-8088.

MUSLIMS DEMONSTRATE FOR CIRC IN BULGARIA

ATHENS, 1985. Members of three Muslim families who escaped from Bulgaria across the heavily guarded Bulgaria-Greek border accused Bulgarian authorities of killing members of the Muslim-Turkish minority. The Associated Press reported there were "at least 11 persons killed and more than 30 injured" in a single demonstration against Bulgaria's ban on circumcision.

In an attempt to force assimilation on the Muslim minority, the authorities have demolished mosques in at least 15 villages. Turks traditionally circumcise their puberty-age boys. The Bulgarian ban on the practice has strained relations between Bulgaria and Turkey. It is reported that up to 800 members of the 900,000-strong Muslim Turkish minority living in Bulgaria have been killed resisting the ban on circumcision.

NATIONAL CIRC RATE DECLINES IN 1984

The National Board of Health Statistics has reported that the hospital circumcision rate in 1984 was 62 percent. The figure indicates a steep decline in newborn circumcision, although the incidence of the operation varies widely in specific regions and hospitals.

In Tulsa, Oklahoma, circumcision was performed on 80 to 90 percent of the boys born at St. Francis Hospital and St. John Medical Center in 1984, while only 70 percent of the newborns were circumcised at Hillcrest Medical Center and 57.5 percent at Oklahoma Osteopathic Hospital.

Dr. Eddie Abbott, a Tulsa obstetrician-gynecologist, an anticircumcision spokesman, contends, "Routine circumcision is almost like extracting teeth to avoid having cavities."

BLUE SHIELD OF PENN TO REFUSE CIRC PAYMENTS

Beginning July 1, 1986, the Pennsylvania Blue Shield will stop paying for medically unnecessary circumcisions. Defining circumcision as "a solution in search of a problem," the Medical Affairs Committee of Pennsylvania's Blue Shield's Board of Directors recom-

mended that the health insurance carrier discontinue coverage for neonatal routine circumcision in 1984 and the Board voted to cease such payments last August.

The Board's directive stated that, "(routine circumcision) is no longer considered a medically appropriate service." The national Blue Cross and Blue Shield Association is preparing a medical necessity policy to no longer routinely pay for pathological examination of the tissue which is removed in circumcision. However, no other Blue Shield Plan is refusing to pay for the operation, taking the Penn Plan into "a leadership role on behalf of its subscribers." The 1986 date was set to "allow time for efforts to educate and persuade subscribers and providers" in an attempt to avoid potential adverse reaction to the decision.

HAWAII ANTI-CIRCUMCISION BILL CONSIDERED

Anti-circumcision legislation, aimed at protecting the rights of newborn boys, is being considered in the present session of the Hawaii State Legislature. Backers of the legislation have issued a plea for help in order to justify the bill in the way of reference materials, medical opinion and personal experiences. Such material can be sent to: P.O. Box 17965, Honolulu, HI 96817.

INFORMED CONSENT CHANGES NAME

Informed consent has applied for non-profit status with the state of California and has changed its name to: NO CIRC. Starting Jan. 1, 1986, the organization will be known as National Organization of Circumcision Information Resource Centers. NO CIRC is the organization which has instigated legal proceedings in California against specific hospitals on behalf of newborns who were routinely circumcised. NO CIRC can be reached at: NO CIRC, P.O. Box 369, Corte Madera, CA 94925.

USA UPDATE

Dear Bud Berkeley,

In answer to the letter from Bare Glans (USA UPDATE, FQ4) I just want to say that I am one of those guys who keeps his foreskin forward at all times and that is where I prefer it!

I don't understand why an uncut guy would want to train his foreskin to stay back off the head. He might as well be circumcised. I consider my foreskin to be beautiful and my glans to be private. My glans is super-sensitive and very responsive to my lovers and turns vivid red during sex. My glans is for my lover and I and not for public view! Besides, if I was in a public shower and my glans was uncovered, I would feel naked. With my foreskin forward I feel clothed, even though I am in my birthday suit.

One more thing, I piss with my foreskin forward too. I let the stream go right through the funnel. It feels good that way and I have no problem with my aim. I don't even want people seeing my glans when I am pissing. I am not embarrassed by the appearance of my glans, it's just that I don't like being naked in public.

Up Front Foreskin

Dear Up Front Foreskin,

Yes, one of the nice things about being uncircumcised is that we do have a choice of how to wear our foreskins... we are convertible. We can keep our tops up, down or anywhere in between. Of course, FF, we really can't generalize on this point because foreskins come in a huge variety of shapes and lengths. Some foreskins simply refuse to stay forward, especially as the penis comes to life, and others can't be pushed back for love nor money! However, as we have discussed in earlier columns, most foreskins can be stretched, or trained, to the desires of it's owner.

The point in your letter that really caught my attention is your feeling about being unclothed with your foreskin shoved back off the head. Amazingly, Sitzfleisch (a German anthropologist) has theorized that the human practice of wearing clothes derives from the foreskin. Eichelschultz Hautlob, in his recent magazine article, "Clothing and the Foreskin" (published in Clothes Dick, Vol. 2, No. 3) further theorized that, since nothing springs from the human mind except those things already patterned by nature, the idea of clothing came from the only natural covering the human body possesses, the foreskin, and that early man perceived both the foreskin and clothes to be sexually enhancing. He claimed we adopted clothing not for protection from the elements but for the purpose of erotic intensification.

This thesis is easily demonstrated by the progression of "clothing" worn by

those Stone Age groups still living. The most elemental form of clothing is still worn by some Melanesian Islanders... they merely insert their "prepuce heads" (foreskin forward) into sea shells and consider themselves to be fully dressed. Evidently, the different-colored and -shaped shells draw attention to the concealed foreskin and at the same time hide it... leaving something to the imagination. No other part of their body is so hidden; only the foreskin.

The next step in clothing can be found among other Melanesians whose clothing consists of penis-wrappers. In their case, the entire penis is covered with leaves or leather and they consider themselves to be dressed... although their scrotums are left to swing in the air.

Next comes the Papuans on New Guinea who insert their penises into long gords and, get this, wear them in an erect position, tying the gords to their waists or shoulders. How suggestive can you get! The long, long gords certainly give room for imagining about the concealed penises.

Next comes the Eastern Brazilian Indians who take clothing one step further, suggesting both an erotic need for clothing and a utilitarian one. They tie their foreskin overhangs shut with beautiful bows of knotted cordage, thus protecting their glans from accidental exposure... and go otherwise stark naked through the jungle. Makes your mouth water!

Next we come to the ultimate in suggestive menswear; quoting Hautlob, "Some Amazon peoples use simply a tight cord, around the waist or rather below the waist level, under which they tuck their foreskins, simultaneously intensifying the sureness of the head staying covered, showing the head (in reverse) in more definite outline, and keeping their cocks in an ever-upright position. Simple means, by no means, show a lack of sophistication."

So, Up Front Foreskin, this discourse is to let you know that you are not alone... men have always felt "clothed" with their foreskin forward; naturally. You sexy, uncut devil!

Dear Bud,

Your literature saved my foreskin and I'll thank you for it as long as I live! I had grown up feeling insecure about my uncircumcised penis, thinking it to be a sign of immaturity—a little boy's cock.

I never felt that I was a real man around my circumcised peers. I graduated from college last June and was engaged to be married soon thereafter. I had planned to get circumcised sometime during last Spring so that my cock would be healed and ready for action on my wedding

night. Well, I found your book, *Foreskin*, under the bed of my college roommate and read it fervently from cover to cover. To my surprise, my uncut dick was straining in my pants long before I finished the book. When I read about the erogenous-producing nerve endings in the foreskin and how they give off sensation when the foreskin is pulled back over a rigid shaft, I had to pull my boner out and give it a try.

You were right, Bud, I realized immediately that the backward motion of my foreskin gave me my greatest erotic sensation and the forward motion over the head gave me the second greatest sensation. Needless to say, I had to jack-off and did so that night with the full appreciation of my foreskin for the first time. What an orgasm I had! I immediately cancelled my circumcision appointment. I wasn't about to deny my bride the best cock I could give her. The honeymoon isn't over yet!

Hot Husband

Dear Hot Husband,

Hey, Hot, thanks for the testimonial! All I can say about the S-T-R-E-T-C-H of the foreskin is... yaaaa!

Dear Mr. Berkeley,

Do any of the American Indian groups perform circumcision as a tribal rite? What about the Russians? Does the Soviet government consider circumcision to be a state secret and guard the fact as classified as one of their top-secret codes?

Skin Snoop

Dear Skin Snoop,

Ah yes, the penises of other men has fascinated mankind throughout history.

Well, our colonial forefathers certainly didn't overlook the cocks of the native "savages" because they duly noted the circumcised penises of the Aloquin tribe of northern New York and named the tribe "The Lost Tribes of Israel." However, as far as I have determined, the Aloquins were the only North American Indians to practice universal circumcision.

Indian lore suggests that elsewhere many tribes fostered "secret societies" of young braves and sometimes the young warriors were circumcised together thus bonding them as "blood brothers" to establish unbreakable relationships.

There are also reports that some tribes used circumcision as a form of torture on many a hapless Yankee pioneer, scalping him at both ends, so to speak. Several of these torture methods have been described to me in correspondence and they mostly utilize the "strangulation" method of tying off the foreskin with a string

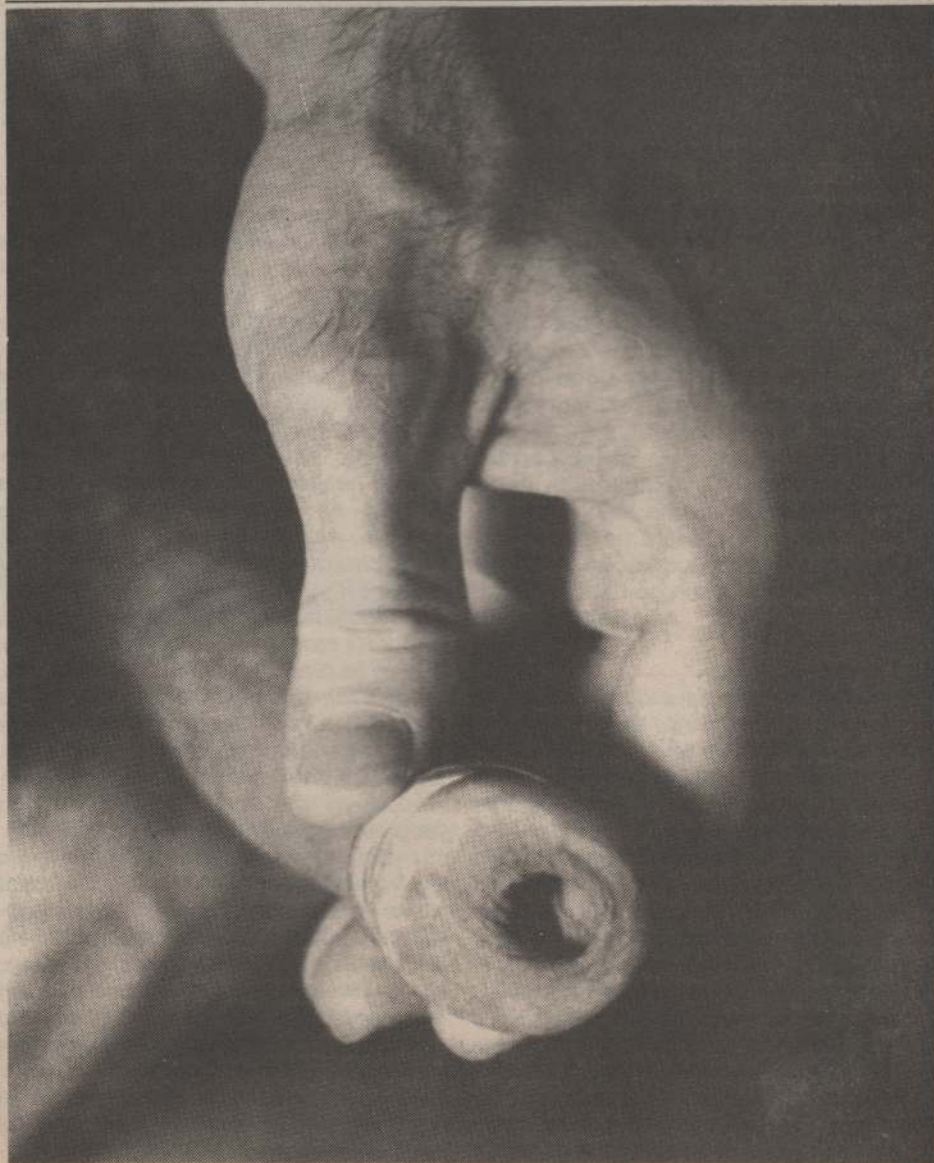

of gut, staking the naked prisoner in the hot sun for several days while his foreskin dried up and dropped off. Of course, I would think that the Yank suffered additional indignities besides circumcision while he hung on the post.

The early Spanish took back stories of circumcision among the Aztecs, whose religious rites seemed to have been particularly violent. However, Joseph Campbell ("The Mythic Image") wrote that the Aztecs actually didn't cut off the foreskin of worshipers but, instead, had a yearly ritual in which a vertical slice was made in the prepuce of each male and, after a few years, foreskins were shredded appendages on the fierce Aztec's cocks.

Today, most American Indian tribes seem to be resisting the routine circumcision forced on their infant boys in federally funded hospitals. Columnist Jack Anderson exposed the wanton destruction of Navajo foreskins by government nurses a few years ago...the Navajos complaining because they had a secret ritual during which the foreskin (intact) of their youths were very important. I also had a contact in the US Navy who claimed that one man under his command was a Cherokee with an extremely long foreskin which, of course, made a particular medic's mouth water. As it turned out, my contact intervened before the Cherokee's foreskin fell to the medic's knife because he found that, at one time just after WWII, the Navy made an agreement to cease circumcising Cherokee GIs because, again, that tribe had a secret ritual in which the foreskin (intact) was necessary. Hmmm!

The Russians are not quite so secret about circumcision. They flat-out arrest anyone who performs religious ritual circumcision...which is the reason many Jewish men emigrating from the USSR are uncircumcised. Circumcision as a health therapy for phimosis, etc., is performed in Russia and it is estimated that the USSR has a ten percent male circumcision rate.

Now, it is important to realize that much of the vast Soviet territory is inhabited by peoples of Moslem tradition and, according to the book, Muslims in the USSR by Leon Emin (distributed by the Soviet embassy in Washington, D.C.), the Soviet government allows these people to circumcise their puberty-age boys...supposedly considering the tradition to be cultural rather than religious. As far as I reported in an earlier column, a famous Russian spy trial in Canada ended in conviction when it was proven that the imposter had an uncircumcised penis while the Canadian he was impersonating had been circumcised as a boy. You don't think the KBG will make that mistake again? Yes, there are rumors in diplomatic circles that those handsome, young James Bond types chosen in Russia to be groomed as

spies in America land here fully circumcised. After all, in this modern world, as in the ancient world, it is hard to hide your penis from fascinated eyes.

Dear Bud,

I enjoy the FQ very much, but I have been concerned about some of the fiction in it. I don't think it is a good idea to describe scenes of anal sex, glory hole cocksucking, watersport pissing and things like that because of the current health crisis. Don't you think such literature encourages unsafe sexual practices? I think you should be promoting masturbation, and God knows, the foreskin and masturbation go hand in hand.

Healthy Hand

Dear Healthy Hand,

Well, Hand, you are right about one thing! Masturbation and the foreskin are made for each other and, of course, JO is safe. However, the question of erotic literature and the role it plays is debatable and it has been debated long before the health crisis. As a journalist I have a keen aversion to censorship of any kind, but realize that we must also take responsibility in the literature we publish in light of the seriousness of AIDS. But the question is this: Which came first, the porn or the urge? Does reading erotic stories create desire or does desire cause the reader to choose erotic literature? Does reading FQ lead you into the streets or does it keep you home pumping on your dick? Personally, I think sexual desire

comes first... it is innate.

Hell, if homosexuality was a learned behavior how come most of us had fantasies about sucking cock long before we found out that other men were doing it too? Very few of us grew up in gay lifestyle homes or schools or were raped by a "dirty old man." Now, I like to think that FQ is promoting the visual beauty of the uncircumcised penis... and the visual component is very important in safe sex. However, "visual" is not the only component a health man needs. He needs his sex to be wild and rough; sweaty, muscle-wrenching, thigh-pumping, cock-churning action... if only in his fantasies!

Raunch, piss and all that doesn't hurt a good JO session either. I hope that FQ, as well as other male media publications, is creating such wild sexual fantasies that hands are pumping foreskins, or skinned shafts, all over the country. Beyond a good penis-pounding, it is obviously up to every man to use his best judgment about health precautions.

I receive a great deal of letters from USA members concerning AIDS. Most of these letters describe methods of keeping the body in top shape in order to help it fight in case it does meet the virus; mega-amounts of vitamin C has been suggested, avoiding drugs, giving up smoking, keeping the digestive system well-oiled with bulk and fibre, etc. Several USA members include a package of condoms in all their correspondence, which is very thoughtful.

A few USA members who are physicians have suggested that anal sex is the only way the virus can enter the blood stream by sexual activity. Others have expressed concern about open wounds in the mouth (gums, etc.) if semen is swallowed. The point is... no one knows yet! Most official safe-sex guidelines suggest that fucking with condoms and sucking without cumming in the mouth is possibly safe. Keeping this in mind most men can enjoy each other and not take stupid chances. Besides, watching a pulsating penis pop its load into the air can be so sexy!

One last comment about AIDS and I'll drop the subject. The Bay Area Reporter (San Francisco's gay weekly) ran a letter to the editor recently claiming that the AIDS epidemic is caused by circumcision. The writer's thesis was that the rough-edged corona of the circumcised cock caused abrasions and bleeding in the anus, thus opening the door to the virus.

I thought the thesis to be ridiculous and that it would be irresponsible to mention it in FQ. Then a reader submitted a copy of a letter to the editor published in the New York Times (Nov. 22, 1985) written by Professor Ralph Levitz, anthropologist at a major Eastern university.

Professor Levitz was responding to a news story about the spread of AIDS among heterosexuals in Africa; "During almost two years of research in western Kenya and adjacent areas, I recorded cultural practices sometimes found in Africa but less commonly, if at all, in the United States. Some of these might have bearing on heterosexual transmission of the AIDS virus... thus clitorrectomy (female circumcision), and occasionally excision of all or parts of the labia, is fairly widespread in central and East Africa. In some areas women practice extensive manual stretching of the labia majora, with the consequent thinning of the epidermal layers. Male circumcision and, less commonly, subincision (splitting the underside of the penis along the urethra) are also practiced... I believe (the operations) may be of special significance because (they) usually cause extensive scarring and damage to the adjacent area... exposing (both the circumcised woman and the subincised male) more easily to hemorrhage and infection by contaminated blood or semen... Mapping those tribal areas in Africa where such ritual practices may still be found... would be another step toward discovering whether transmission may be related to exposure through rupture of minor blood vessels in either homosexual or heterosexual intercourse. The incidence of AIDS among homosexuals and bisexuals practicing anal-genital intercourse in the United States has suggested such an explanation to researchers."

Let us hope that 1986 will bring us answers, a vaccine and a cure! □

SUBINCISION

THE UNKINDEST CUT OF ALL

Subincision is performed as a birth control measure by primitive Australian Aborigines, far worse an ordeal than circumcision, and is performed as a ritual attended exclusively by male members of the tribe. A flintstone cutting blade is used, as is, with their prerequisite adolescent circumcision. The ritual was also a test of manhood, and failing to submit could mean punishment by death. They endured this lesser evil, rather than the dastardly consequences—"A tough lot of bastards" (an Australian endearment).

At the moment of ejaculation during private or ritual intercourse, semen from a subincised penis is no longer deposited into the woman's vagina but outside her vulva, thereby becoming effective as a form of birth control.

The tribal Aborigine was concerned with keeping his numbers down to an acceptable level, owing to his harsh and uninviting environment. Being subjected to drought, natural plagues, bush fires, etc., this necessitated a close watch on tribal numbers, to ensure survival, which after all, is the prime instinct of all species in life.

The Aborigines devised an ingenious method, abhorrent and barbarous though it might be, to limit impregnation by subincising adult mature males who had wives. The adolescents were only circumcised at this stage and did not go through subincision, naturally, just in case the tables turned and an increase in tribal numbers were sought.

The Aborigines have an unique mind and they are masters of survival. They devised many tools that were based on pure aerodynamics, the boomerang being one of them. Their culture goes back many thousands of years, God only knows how long, as they were one of the earliest known species of Man, and they practiced circumcision and subincision well before the ancient Egyptians.

Subincision remains today and is practiced in some very remot areas by "diehards" hanging onto tradition. However, possibly by the turn of this century "whistlecock-ing" (white Australian slang term used for subincision) will be a lost art and a thing of the past. Be it better or for worse, what do you say, USA? At present, all but a few Aborigines have succumbed to the trappings and benefits of being absorbed into our civilization and are drifting to the "Big Smoke" (cities).

WARNING—Any of you good folk in the USA or the U.S. for that matter who are into self-mutilation for beautification or just for kicks, DO NOT ATTEMPT THIS ONE without consulting your doctor first. Whistlecocking had its many fatalities in its tribal days due to shock, septicaemia, fly blo, etc. Maybe, if you don't mind the jibes, your family doctor will oblige. □

Further to the article on Aboriginal Subincision, I would now like to inform members of USA of the method in which subincision was generally carried out.

The Aborigines would select a fine bone which was smooth and blunt at one end. The bone being from one of the small animals they had hunted for their food.

The smooth, blunt end of the bone was inserted into the meatus of the penis, through the urethra and down to a point just above where the scrotum attaches to the penis shaft. The purpose of the insertion of the bone was quite obviously to give the penis rigidity, for ease of manipulation, as the initiate, trembling in fear and apprehension, would find it

impossible to get his shriveled and limp penis to rise for the occasion. The bone also separated the roof of the urethra from the underside, thus preventing damage when the underside of the penis was severed along the urethra by the stone-flint knife.

It is said that subincised males, partaking in ritual ceremonial intercourse, ejaculate immediately when the penis is inserted into the vagina—whereas, in areas where circumcision only (not subincision) is performed, males remain erect for a longer period and have to move their penis vigorously within the woman's vagina. This indicates that subincision causes premature ejaculation. □

DR. SKINNON

Dear Dr. Skinnon,

I am towing around a lot of scars about my penis. As a child I wasn't around many kids because I am a country boy and have only one brother. Well, what got me off to a bad start was one night when me and my brother were shring a bed and I woke up and what did I see? It was my brother's big and fat circumcised penis sticking straight up in the air. He didn't know I was awake and I just lay there staring at the thing and trying to imagine what it would be like to have such a big cock. You see, even though I am older than him, my cock wasn't near as big as his a mine never got circumcised neither.

Well, what really got me off the track was one night when my cousin came down from Savannah. Being how that bedding space was scarce, guess who ended up in my bed? Right! It was my cousin who is just my same age. We had hardly seen each other before that night and talked into the night like two innocent boys do until he fell asleep snoring.

I rolled over and before I could get to sleep I felt something poking me in the back. We were still wearing our jockey shorts and I could feel that his penis was straining to get out. I carefully put my hand behind and ran it down into his shorts and got my fist around the real thing! I just couldn't believe what I was feeling. I quickly sat up and pulled down his shorts and the biggest, fattest, circumcised cock popped out that I ever imagined could exist. Shit, fuck, man, my cousin's dick was even bigger than my brother's and it made mine look tiny.

I began to stroke it to see what a big one would feel like in my fist and it woke him up.

He said, "Oh, so you want some action?"

Well I had never had sex with anyone ever before that night and what happened next I never dreamed could be possible. My cousin went crazy with lust and his big dick was all over me and in me and down my throat so many times during the next few hours I lost count.

Now, here's my point, doctor, since that night this size thing has been the biggest thing on my mind night and day. I went to our family doctor and he said to just relax and make do with what I have and don't like. He told me my dad had an uncircumcised penis like mine and I should discuss it with him.

Hell, my dad never let anyone ever see his cock and he wouldn't talk sex to anyone and that's no lie! So I tried penis pumps, vitamins and some exercises I read about, but the little fucker only pushes out to a puny 5½ inches to this day. I even tried sleeping with my dick tied to a rope (behind the head) which

was tied to a ceiling fixture so that every time I moved in my sleep it would stretch my penis, but I was afraid Mom would come in and surprise me some night.

Now, doctor, this is where I need your help with some questions. What do you tell fellows who come to you for bigger penises? Do you have medicine, vitamins, exercises and other advice for them? I need to know one important thing and that is: if I get circumcised like my brother, would that help make my dick bigger? I am desperate and will do anything!

I just turned 21 and have a hankering to go into town and get some sexual acts but I am afraid of being rejected because of my little dick and being uncut.

Little Fucker

Dear Little Fucker,

Your cousin probably had as good a time as you did and, for starters, that's a very exciting letter!

Ceiling fixtures, ropes and any other exercise will not lengthen your 5½ inches and they truly might damage your unit. The genetic pool cranks out eyes, hair, etc., in various colors and shapes contributed by your parents and that goes for cocks, too! What you get is what you got!

There are people who would love to get into your pants for your money and offer gadgets promising a bigger cock. There are also people who would love to get into your pants for your uncut 5½ inches.

In fact, your penis is not little; it is average size. Average sizes make it much easier to bury your face in pubic hairs without getting gagged and choked.

Now, getting circumcised would only cut off a part of your penis and how can cutting off add anything? Believe me, circumcision does not a bigger penis make; that is a common falacy.

So, Fucker, go on to town with the assurance that your 5½ inches can do everything the bigger ones can do and some super-nice things besides, because your penis still has its foreskin. You might be carrying some scars, but at least they are not between your legs. I believe "getting some sexual acts" might erase those scars between your ears. At least you will have something besides "size" to think about!

Dear Dr. Skinnon,

I would appreciate it if you could discuss balanitis. I cannot find any information on the subject. Six years ago, I lost my beautiful foreskin because of a diagnosis of balanitis. Thank God my doctor took off as little foreskin as possible (asked him especially) and I do have some nice, loose skin.

In fact, thanks to Bud Berkeley's book, *Foreskin*, I have learned how to stretch the skin and have recovered a great deal of overhang and sensitivity. But before other men have to go through all this, can you tell us what causes balanitis and how it can be prevented?

Missing Skin

Dear Missing Skin,

Balanitis is inflammation of the glans penis. Posthitis is inflammation of the foreskin. Balanoposthitis is therefore inflammation of the cockhead and apposed foreskin surface. Just as you can get appendicitis, which is inflammation of the appendix, or pharyngitis, which is inflammation of the throat, you can also get inflammation of the glans and foreskin. There are a variety of causes of balanitis; often they are bacterial but they can occasionally be venereal.

Balanitis can always be treated non-surgically with one exception—diabetes. Diabetics are especially prone to this and what they do with their penis and where they put it is of considerable importance to them. If diabetes is your problem, Missing Skin, good personal hygiene is the watchword and continued foreskin stretching with carefully washed hands is the avenue for you to recover your perfect tool. I am not saying you have to be squeaky clean. You can allow some very good substance build-up, but when you wash it, do it with gentle stretching.

Balanitis is often associated with phimosis. True adult phimosis is very rare. If the foreskin is merely tight and can be retracted, it can be loosened for easier cleaning (to prevent bacterial infections) by regular foreskin stretching with fingers. If balanitis does occur, a urologist must be consulted, because it might be symptomatic of Balanitis Xerotica Obliterans, which is a true disease. This disease, if progressive, is also known as Stuhmer's Disease. It will require circumcision. However, shop around quickly and find yourself a concerned urologist who will preserve what foreskin is not involved in the disease process. You can then begin stretching the remaining skin back into shape and soon you will recover your drool tool.

Dear Dr. Skinnon,

Now that "safe sex" guidelines tell us to beat the hell out of our meat and enjoy it, I have really learned how to get into my own cock. It is a beauty; 7½ inches long, tapered, and my semitight foreskin overhangs ½ inch erect, but slides back easily over my semimoist, sensitive cockhead.

Enjoying your own cock means some innovating and imaginative masturbation sessions; like cooking up new fantasies, reading FQ and looking at photos of

other uncut cocks and experimenting with new JO techniques. For an occasional change of sensation I rubber-band my foreskin down the shaft and work my naked glans over real good with oils, some of them heated with menthol, etc. I never come that way because for me the only good orgasm comes with the skin sliding over the cockhead. It almost gives me an erection to think about it!

I have two questions for you: (1) How safe is rubbing alcohol on the cockhead (I have been tempted to try it just for the variety of sensation)? (2) How safe are rubber bands (or other restrictive rings) around an erect penis shaft?

Safe-Sexer

Dear Safe-Sexer,

Imaginative techniques that are meant to enhance must follow your suggestion to be safe. Rubbing alcohol, cologne, after-shave, etc., burn your face after shaving and they will burn your penis as well. The membranes in your penis are far too sensitive for such a rude application; they can be desensitized, which is hardly desirable for future meat beatings.

There are some heavenly lotions that will give you delicate sensations, but you will numb your cock if you use lotions which contain alcohol. However, rubber bands are safe and can be fun on an uncircumcised penis as long as you are not drunk or stoned to the point that you can't feel when they are getting too tight, or pinching. When you feel that they are ready to come off, take them off! Otherwise, enjoy your naked glans by the hour!

Restrictive rings are something else; never use them if they are tight during erection...not everyone has a hacksaw ready to free your purple peter!

Innovation and imagination are certainly useful for masturbation and getting the most out of your own cock. Your common sense is your best guide to safe techniques as long as you don't get too carried away!

After all, safe sex will keep you healthy, but you also want to keep your cock healthy for the next session. The penis can certainly take a lot of good, old-fashioned "beating" and, unless you insist on dowsing it with alcohol, it will never lose its delicate sensations.

Dear Dr. Skinnon,

I feel that it is about time FQ discusses a subject which is close to home to many of its readers and that is phimosis. You might think this is a letter about "a friend" and it is, in fact, about a very good friend. My friend has a phimosis condition and his embarrassment is so bad that he's actually ashamed of his cock.

He's got 7 inches hard and is a great-looking hunk of a guy. He's been to doctors about it and they uniformly recommend complete circumcision, but

he doesn't want to lose his skin. Who would? This guy's foreskin absolutely will not retract; when he has a hard-on the skin is stretched tight over the glans and ends in a tight pucker. The pucker begins with a tight, fibrous band of darker tissue and ends with about 1/2 inch loose overhang. The phimosis ring is so tight that you can't even stick your index finger up past it. His piss stream makes a slight flare and the cum sort of oozes out of the pucker.

Obviously, he can't clean his cockhead. The condition makes him "pissy," he holds a towel in front of him in locker rooms and he has received a lot of derogatory criticism (some of it cruel) from potential sex partners. He's basically afraid to initiate sex because of his condition; it took him nearly a year before he agreed to show me his cock and we are good friends.

In addition, sex (especially safe sex, like masturbation) is difficult for him. He has to be careful of his foreskin because any vigorous jerking hurts. Because you can't jack him off in the usual way, you have to kind of knead his cockhead between your palms until he comes. I want to help my friend but don't know any techniques to lessen the negative effects of his phimosed condition. I have hope that you, my favorite expert about the foreskin, might be able to give us some advice. Is there anything you can suggest?

Phimosis Friend

Dear Phimosis Friend,

The foreskin should be a movable feast! Movement is what is necessary to get the erotic sensations the foreskin's nerve endings offer, and your friend's foreskin simply doesn't function as a mobile sheath. Of course, total circumcision would do away with the feast forever, so a dorsal slit is essential for your friend. It will allow the proper movement and his glans will be seen for the first time! However, some people are not satisfied with the aesthetic results of the dorsal slit and if you and your friend want further work on his foreskin, find a selected urologist who will remove only enough of the foreskin to be rid of the phimosis ring, leaving the remaining skin to stretch back up over the glans.

Phimosis is common in infancy, as the foreskin is not separated from the glans at birth. By age three, it should move well. If it does not, normal sex play in childhood will help. By the time vigorous jacking-off occurs, it should be loose and limber. Masturbation is the natural way to prevent adult phimosis. And, since most teenage boys spend long hours "beating their meat," true adult phimosis, therefore, is fortunately and naturally rare.

Editor's note: Since those things in life which are rare often become "choice," I would say that our reader's friend would find a great many admirers among FQ readers...even before the dorsal slit. Right, men?

TELL IT TO THE SARGE

"Still Uncut?" the ad in *Drummer* reads. Running for several months in *Alternate Publishing's* magazine, Sarge has been offering his special brand of circumcision for anyone who qualifies by sending him their circumcision fantasies.

Well, Sarge is temporarily unavailable for his services, having received duty elsewhere. He has allowed FQ editors to accept his letters, include our "Tell It To The Sarge" column and to promote the cause of circumcision for those who are seeking it for erotic reasons. If you have such fantasies and want to share them with FQ readers, please send them to the editor (Bud Berkeley, PO Box 26011, San Francisco, CA 94126). Your confidentiality is safe and anonymous letters gladly accepted. At this time, successful letter writers will not commit their foreskins to Sarge's talents (contact the ACORN society for such commitment, address elsewhere in FQ). We feel that uninhibited self-expression of our reader's sexuality is an important ingredient in FQ.

Dear Sarge,

I think you had a predecessor here in Seattle. He was in the skid-row section of town and ran a "sex museum" for men only. I was just a kid when I went in there wide-eyed and awestruck.

The proprietor was a quack who cured "lost manhood" and all those Victorian problems young men were supposed to have in those rather innocent days. The museum was filled with wax figures much like those in any of today's historical museums, but his figures all had chancres and other sores on the penises and warts on the pussies.

He narrated for me, probably thinking that he was educating a young morsel in the evils of sex. Then he led me to two huge, perfect representations of penises; one circumcised and the other uncircumcised. He pointed out the differences and then proceeded to give me a long lecture on why all men should be circumcised. He asked me whether or not I had been circumcised yet and I said no. Then he led me into a back room and pointed to a shelf of jars in which, he said, were hundreds of foreskins he had cut off his clients in that very room!

He took down a jar and let me examine it. I was very impressed. He said that the young men whom he circumcised were cured of all their sexual problems and were good husbands and fathers. Then he took down a jar which was half-filled and said that he would be very happy to add my foreskin to the jar that afternoon. I said I wanted to think about it and he gave me a list of fourteen reasons for circumcision and some very crude

before-and-after photographs of penises he said he had circumcised.

Then a bell rang and he left me in the room to think about it while he gave a newly arrived client a tour of the museum. I seriously read the list and will never forget the photos and decided to let him circumcise me so that my foreskin could be in the museum jar.

The door opened and in he walked with the new client. The fellow was a young sailor who appeared as wide-eyed as myself at what he was seeing. I can clearly recall his amazed expression as he was shown the foreskins.

Then the sailor said, "Yes! I want to be circumcised just like that wax penis out there."

The proprietor turned to me and asked, "And you, young man?"

I said "Yes," but when he told both his young victims to remove their clothes, I got scared. In those days people just were not used to being naked in public! So, while the sailor was stepping out of his uniform, I said I changed my mind and wanted to leave.

The museum proprietor was understanding and said, "Well, think about it more and come back in a few days."

As I was led to the door I couldn't resist a quick glance back at the sailor and he was naked and his penis was erect. Needless to say, that experience left a huge impression on my mind although I never went back to get circumcised. A few years later, I made up my mind to go back to the museum, but learned that it had been closed down by the city.

Disappointed, I felt deprived of my circumcision experience. My mind had been set for a circumcision, but I had no medical reason for the operation.

Then I recalled that on the proprietor's list of fourteen reasons for circumcision was the fact that extra-long foreskins were considered to be "redundant" by the medical profession and should not be allowed to remain intact. So, I began stretching my foreskin. I was determined to make it "redundant." After a few years of pulling and tugging at my foreskin I had a good inch overhang during erection.

Then I had an occasion for my physical exam through my employment and during the exam the doctor remarked, "My, you certainly have an redundant foreskin!" I knew my stretching was successful as I watched the doctor write on my records: "uncomplicated redundancy; circumcision required." Believe me, I went to my circumcision thinking about that museum wax model of the circumcised penis and, just like that sailor several years earlier, entered the circumcision room with an erection.

Dear Sarge,

I am a warlock (male witch) and am looking for a circumciser to perform at our rituals. You see, the old Druids circumcised teenagers because they felt that an uncircumcised boy attracted poltergeists. They kept foreskins in apothecary jars to be used when young girls attracted poltergeists. They placed the foreskin jars in the rooms where the nature spirits mischievous nature spirits were throwing things around hoping to scare them away.

Note of this Druid practice was made a few years ago in the British movie *The Wicker Man* when the camera carefully scanned the shelves of a chemist (druggist) shop and there was a jar labeled, "foreskins." I am now reviving that ancient Druid practice in my coven because people are coming to us for help in exorcizing poltergeists.

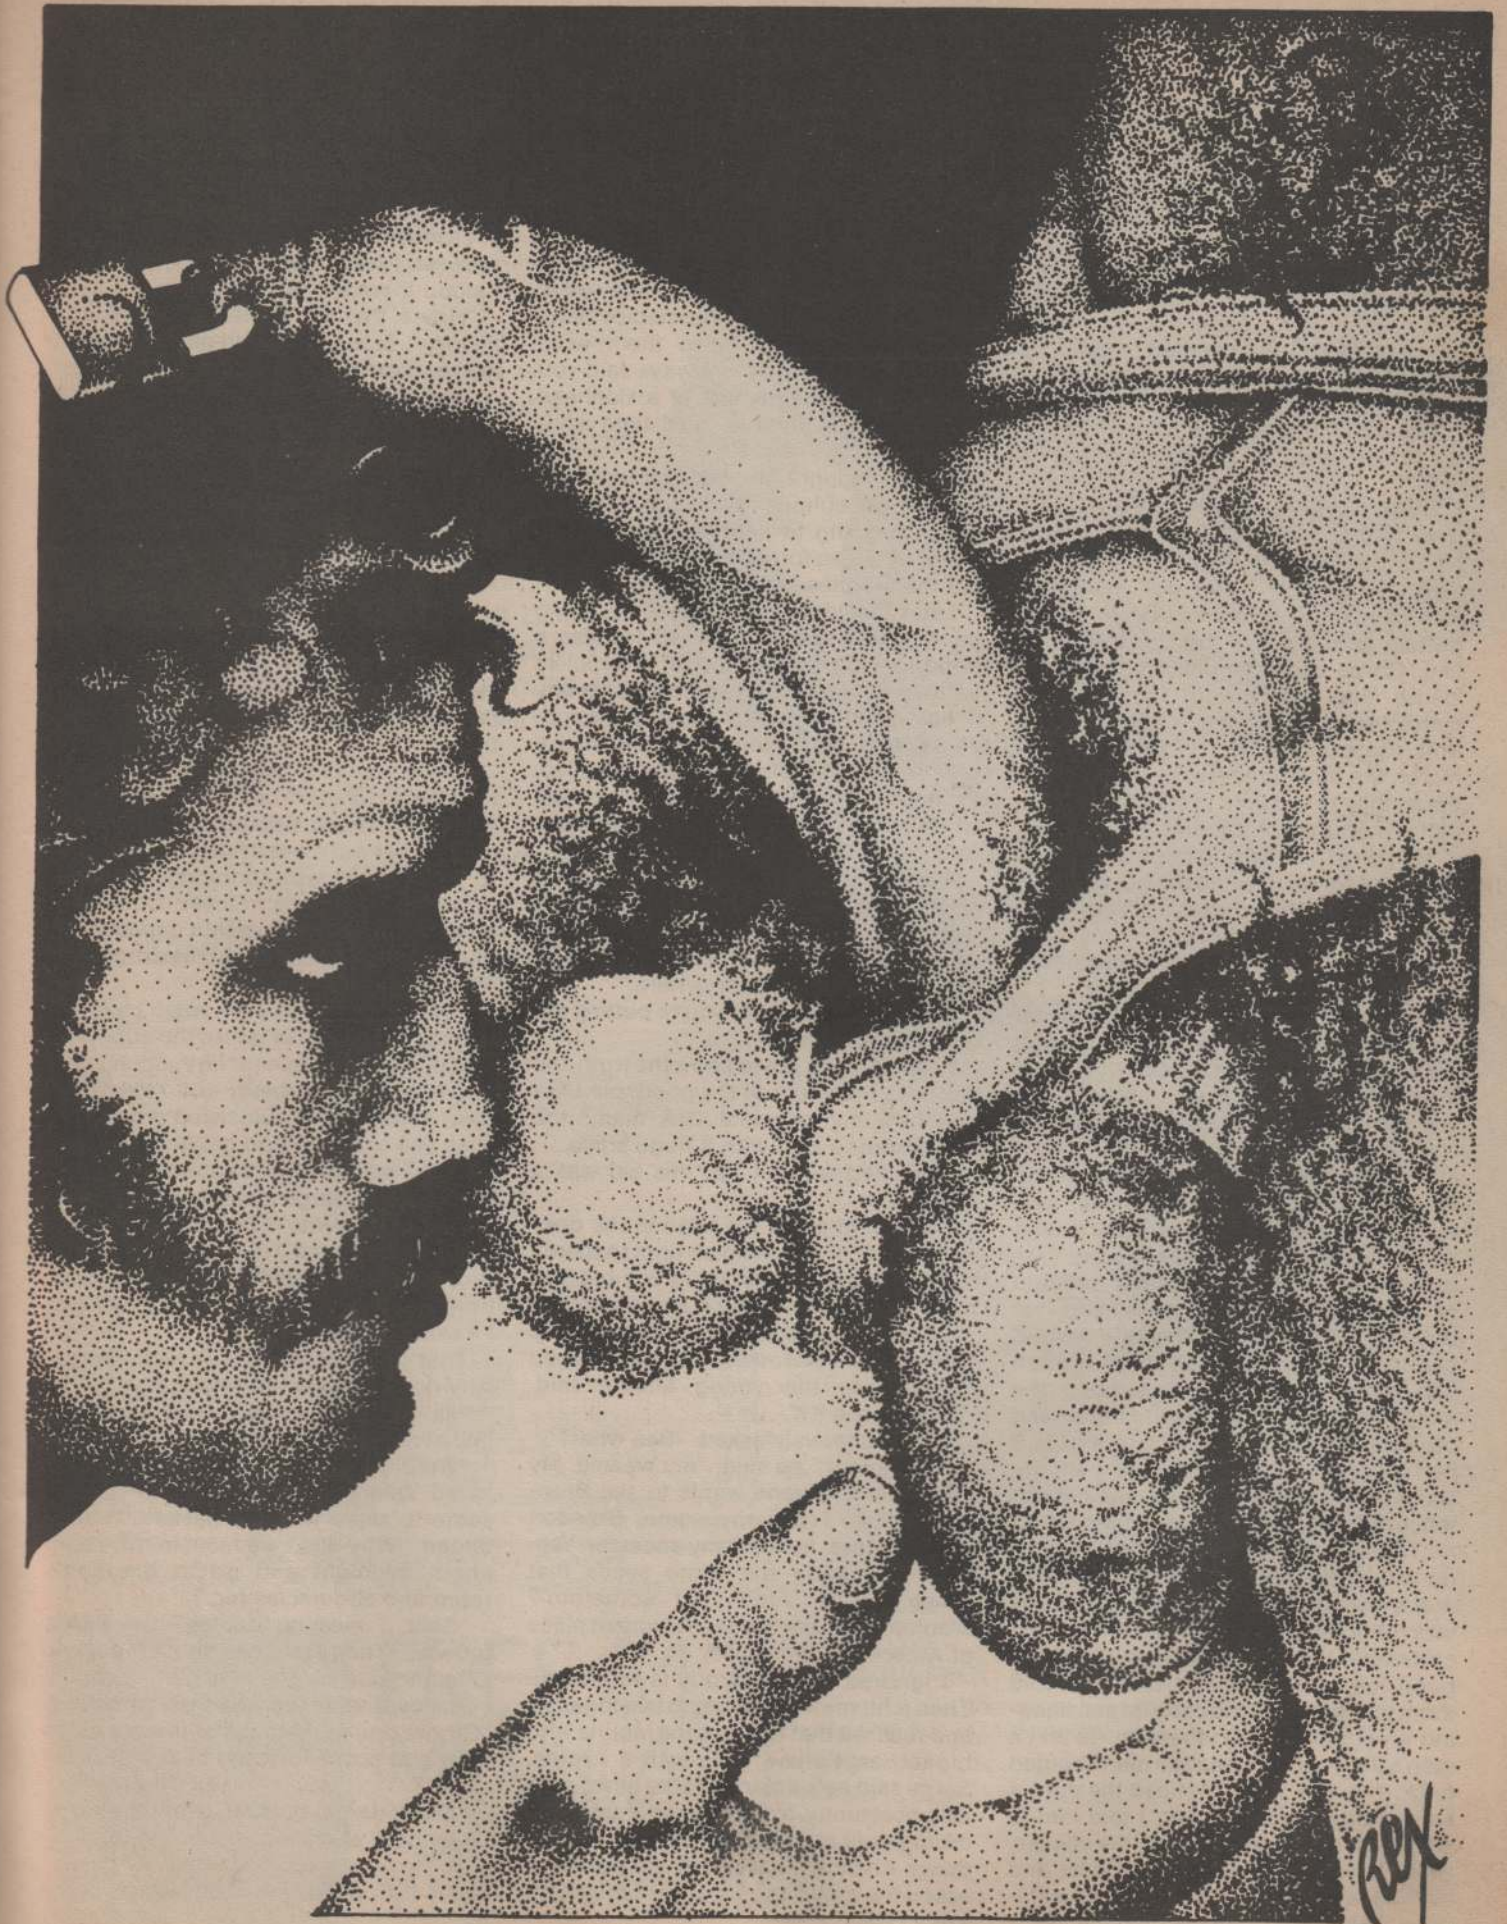

How about it, Sarge? Do you think you could give up your Marine uniform and cigar long enough to rid a few local warlocks of their foreskins? We have foreskins to spare here in Scotland. This place has lost its Druid tradition and we can't find circumcisers. You would be doing us a great favor by coming over and we promise you all the foreskins your mean, old heart desires!

From the anonymous author of "The Circumcision Ship" fantasy (FQ4), in which we assisted the Sarge in the mass circumcision of about twenty college jocks in a campaign to perfect the new Laser Circumcision Tool, we are now taken back in time a few months to our first meeting with the Sarge:

Day after day, one young fresh-faced Naval recruit after another was led to the hospital's unique circumcision auditorium, secured face down on the circumcision board overhead and his set of genitals descended through the hole in the ceiling over the heads of the audience. One by one, one Navy penis after another was circumcised during a demonstration of the Laser Circumcision tool while visiting medics, military brass and allied officials watched.

The tool was almost perfected, but it still was too slow a process to rid Arabia of all those unwanted foreskins on allied troops stationed on the Arabian desert battlefield. The Arabs were getting impatient and threatened to withdraw funds from the project. Hospital officials didn't want to lose that money, of course, but then another problem was developing. The Navy was running out of uncut recruits.

The governor, hearing about the crisis, offered to send us the state's park rangers to circumcise. Our inspectors

BEN

were quickly dispatched to the local parks where wary rangers obediently allowed their genitals to be studied. Sure enough, at least fifty of them still had foreskin on their cocks and the program was saved for another few weeks. But after "ranger month" where will the next supply of uncircumcised penises come from?

Meanwhile, I was attending to my routine hospital chores. While using the new x-ray scanner on a patient with a broken jaw, I got bored and decided to strike up a conversation. "Where are you stationed?" I asked, just to be friendly.

The old leatherneck grumbled through his broken jaw, "At the brig on Goat Island."

I was startled! I didn't know the Marines had an installation on Goat Island. Upon questioning further, my patient said, "Hell, yes, we've got the dregs locked up there. Bunch of asshole punks getting kicked out of the Corps and the like. Corps doesn't publicize the place 'cause they don't want those fuckin' peace freaks raising a fuss about it. I'm a drill sergeant on the island, see. We march the fucking hell out of the prisoners so they're too tired to screw around at night, if you catch my drift."

Thinking that the brig might be a good supply of foreskin when the hospital had gone through the rangers, I asked, "How many men are in the brig?"

"Who in the shit knows? Thousand or so," Sarge shrugged his shoulder.

I wondered if our commanding officer in charge of the circumcision program knew about that brig? Wanting to get more information from my patient, I said, "I'd hate to see the fellow who broke your jaw, Sarge. How'd it happen?"

"I was marchin' this platoon of shit and heard giggling behind my back, see. Then I realized it was one punk acting real cutelike, mocking me or something. I ordered him front and center and told him he was acting like a pussy and that real Marines were men. Then the bastard had the audacity to reach for his crotch and offered to show me how much of a man he was. Well, I called his bluff and ordered him to pull out his short arm, if he had one, and show it to the platoon. Damned if the goddamned punk didn't reach into his fly and pull out his joint.

"That's the kind of thing I have to put up with at the brig! Well, I took one look at the kid's dick and I knew I had him! He was a goddamn fuckin' skinhead, for chrissake! I ordered the men to take a good look at the punk's dick and told them to observe all the baby fat still hanging on it. I shouted to the men, 'Is that a man's dick or not?', and the men shouted back, 'No, Sir!' Well, I noticed the punk's smirk began to fade when I told him to scat back and show the men his cheese. Shiit, he came at me like a bullet and decked me cold. Damned punk skinhead. Jesus, do I hate skinheads!"

I was fascinated by Sarge's story but was somewhat taken aback by his vehemence concerning uncircumcised men. Anyway, I thought this was my chance and I asked, "Are there many skinheads on Goat Island?"

"Shiit, yes! The Corps is full of them. We get the goddamn dregs. Trash! No one took care of them when they were kids and now they swing those filthy skins around the barracks as if they were normal. Beats me why the medics don't round them up and give them what they've got coming! I've always said you can't make a Marine out of a skinhead and I mean it! Jeezus, do I hate skinheads!"

Wow, I thought, this old buzzard is a true prepucephobe. Well, the hell with him, I'm going to keep my mouth shut about all those foreskins on Goat Island. Let the Marines keep their rolls.

Later that day a new patient came to my lab with a broken wrist. He was a good-looking fellow, sort of cherublike baby face, clean-cut type who'd be pretty if he wasn't so husky. Huge arms, covered with soft, blond hair. He had a great smile and his blue eyes twinkled. Probably about twenty. I was surprised when I learned he was a prisoner at the brig.

A guard was stationed outside the lab door. I asked the patient who the guard was and he said, "Just some queer who wants to eat my meat. I am so cute he follows me around everywhere."

I said, "C'mon, man, you're putting me on. Who is he really?"

"Well, if'n you got to know the truth, my daddy is President of the good, ole USA and he's my personal CIA man," the blond Marine said with a huge smile.

I decided to shut up, this kid was a smart-ass.

The guard stuck his head in the door and asked, "Everything all right in there? If the prisoner gives you any trouble give me a call. Bastard struck an officer."

Somewhat shaken to realize I was working on a prisoner, I decided to keep quiet. Then the young Marine said, "Want to see it?"

I spontaneously asked, "See what?"

"You know," he said, "my weenie. My meat roll. Everyone wants to see Brandon's dick. That's my name, Brandon James. Jesse James is my ancestor. Yep. My rod shoots the same seeds that Jesse's shot. Ain't that somethin'? Wouldn't you like to see a historical piece of American manhood?"

I ignored him. This guy is too much! Then it hit me. I put two and two together and realized that this was the Marine who broke Sarge's jaw. Hey, wait a minute. Sarge said he's a skinhead. I'd never pass an opportunity to look at an uncircumcised penis on a patient, so I decided to take a chance. I walked to the door and asked the guard to go and get some more x-ray film.

When I returned to the patient he said, "I know why you did that!" He reached down and began fumbling around for his penis. "Git ready for a real treat," he grinned as he slowly pulled his cock out of his pajamas. Well, Brandon's penis was one hell of a piece of voluptuous meat and it was covered with thick folds of cascading foreskin that flowed to a fat, rounded tip and a good inch of overhang. I stood there transfixed.

"How's that for a piece of American history," Brandon smiled as he waved it at me. "Want to touch it?"

"Yes." I brought my hand down on it quickly and slowly began to retract the foreskin.

"Stop! Don't push it back!" Brandon protested softly.

I continued to push, but just as I was about to unveil his cockhead, he yelled, "That's enough! Let it go!"

I continued to push and just about cleared his pisshole when he jumped up and yelled, "Didn't you hear me? Stop skinnin' my dick. No one sees inside my dick, understand? That's private in there."

I wasn't about to give up and continued to slide his foreskin back when he shouted, "Queer!" and decked me out cold.

I was flat out on the floor when I came to. The guard was running in and the prisoner was yelling, "Queer! Queer!" as he was tugging his foreskin forward and in ran my commanding officer shouting, "What's going on here?"

I was furious! However, when I told my commanding officer about the supply of foreskin on Goat Island, he suddenly forgot about my problem and said, "You have saved our circumcision program. I shall see to it that you get a medal!"

After I left his office I entered the room in which the Sarge was recovering.

"Well shiit! Who'n hell gave you that shiner?" he roared. I told him about Brandon and he growled, "Why that fuckin' no-good skinhead punk bastard asshole. I'll skin him alive."

That gave me an idea. I said, "Sarge, why don't you skin Brandon alive?"

His eyes narrowed and he said, "What'n hell do you mean?"

"Well, you told me how much you hated skinheads and we both have a score to settle with the bastard," I continued. "Why don't we meet in this room about midnight and go to Brandon's room and circumcise him?"

"Shiit, I ain't no doctor," the Sarge growled. Then I told him about the Laser Circumcision tool.

His eyes widened and then narrowed, "Git me one of them tools! I've got more than one score to settle back at the Island."

"Okay, Sarge, but first we get Brandon. I'll be here at midnight with the tool."

TRUE EXPERIENCES

BRITISH SKINS

A student called on me a short while ago to pick up some books. I like him a lot. Jeff is part Dutch, blond and tall and very much into the health kick. Jogging and swimming and wholesome food. We actually met at the pool. I told him about my homework. He wanted to brush up on European literature. He is very bright for an eighteen year old.

We had never talked about sex. Strange, that, because his face and body positively radiate with it. No, so far his one and only interest (apart from health) is getting an English degree. Until today.

I had a copy of *FQ* on my desk and Jeff picked it up. Of course, he has always know that I was gay, but just accepted it. Besides he has this girlfriend here in London and they go walking together on the weekends. I have not seen her, apart from a holiday photograph, but I guessed that their relationship was going just fine. No hang-ups from Jeff.

He leafed through the magazine while I made some coffee. When I returned from the kitchen, I noticed the tell-tale bulge in his pants and he was obviously excited. He asked me if photographers paid very much for nude shots. I explained it was similar to any kind of modeling, the quality of the magazine, the reputation of the photographer. Good models, I said, get good work and good fees. I also told him that the accent is on genitals.

He unzipped his pants and pulled out his uncut cock. He grinned when he asked me if he had the "right quality."

I am not usually taken by surprise because, in my experience, boys need very little persuasion to display their cocks, but Jeff is a little different. Different?

We'll, let me put it this way. I had no idea, even from seeing him in a swim slip that he was so heavily endowed. And another thing, unlike many of my brotherhood, cock size is of no great importance to me... it's how it is used—right? So, I'm staring at the biggest horse-collar foreskin on a prime meat roll! Jeff has not only come out of the closet, he has come out of the castle. He has one of those specimens that diminishes to an acorn when not in use, but under stimulation it increases in volume, stature and personality. It obviously has two lives. Super-cock!

I told him that he would qualify for the front page of *Time*—at any rate, his noble swell would definitely make a top center-fold. I read him the letter addressed to you. It was the first he had heard of my buddy Charlie and the story about the teacher hit the right note.

Off came his pants, shirt and shoes. We were on the bed together bullock naked and wrestling, flexing our bodies, admiring and smoothing, clenching, 18/*FQ*

kissing. Then at the right moment I slipped that foreskin over my tongue and swirled that royal crown. And I could taste a rainbow. Our next trick was a re-make of the double pipe connection. His tube enveloped mine. Great plumbing.

Finally, we sixty-nined, fingers up each others asses, and cock-swallowing our way up the dreamy river.

STRAIGHT UNCUT

As one of your uncut straight readers, I had to respond to the letter from "Silly Questions" on page 33 of the USA UPDATE column in the Summer '85 edition.

During my early years (four to about 14) I was the only one to my knowledge that was not circumcised. My earliest recollection of another penis was when I was about three or four. My cousin, who lived next door, and another kid that lived up the street and I were playing "doctor." At that time I noticed I was different. Over the next few year in locker rooms at the pool, etc., I took to looking at other guys and I never did recall seeing another uncut guy. The last straw was when I was in seventh grade. One day in our boys Health Ed (we all called it the sex class) the teacher came to the subject of circumcision. He asked if there was anyone who had not been circumcised. Out of about 35 kids, I was the only one who raised my hand. He told me in front of the class that I should talk to my parents about having me circumcised.

The next year in eighth grade, when we had a regular gym class and we all had to take showers, I was the only kid out of the hundreds I observed that still had a foreskin. Needless to say, I was the subject of much comment and typical teenage kidding.

Also, of the 10 or 12 guys that I ran around with as best friends, I was the only one that was uncut. I was so much of a novelty that during our adolescent sex play, circle jerks, etc., the other guys would want to "do" me. In fact, the guys had heard about smegma and asked me not to wash under my foreskin for a couple of days so they could see it firsthand.

Now, with that background, I'll get to "Silly Questions" reply.

The next year my parents moved to another section of town. I decided that, rather than put up with the embarrassment and ridicule in the locker room at my new high school, I would retract my foreskin whenever I was in the nude with someone else. To make a long story short, I ended up keeping my foreskin retracted permanently. My foreskin became "trained" to stay retracted. The head of my penis became less sensitive, and I really felt circumcised. Even at the University of Utah, where during our swimming classes we were all nude and

everyone's cock shriveled up to almost nothing because of the cold water, my skin remained behind the head.

I could never figure out why something that felt so good should but cut off, but when you keep hearing over and over the cleanliness, the prevention of cancer of the penis and cervix, etc., etc., I bought the story. I was too chicken to go and have a circumcision, but thought if I ever had to go to the hospital for anything else, I would have them cut me at the same time. Fortunately, I never did. I always knew that if I had any sons I would have them circumcised.

I went about 18 years with my skin fully retracted 24 hours a day. Then one evening we were traveling through Canada. We (my wife and children) were in a town in Ontario. We were staying at a Sheraton Hotel, and I decided to take a sauna. There were two other guys in the sauna and they were both uncut. A couple of minutes later, 13 boys from a soccer team from Finland came in and they were all uncut. Here I was with my retracted foreskin, and the only one of all of these guys that looked circumcised. I decided right then and there that I would start wearing my foreskin the way that it was meant to be.

Since that time, I have traveled extensively in Europe, Latin and South America and it has been good to know that I am not really the "freak" I thought I was in my early years.

The head of my penis has become more sensitive again, and in the few years that I have been wearing my prepuce in its natural state, our sex life has been better than ever. We are enjoying sex more than we did, and more often than even when we were newlyweds.

I go to the gym three times a week to play racquetball with some friends, and I'm proud to go to the showers with my "complete" cock. From some of the comments and the publicity lately regarding the decline in the circumcision rates, the more sensitive uncircumcised penis, I'm sure my friends and others are at least curious, if not somewhat envious of my intact equipment.

I know I have rambled a lot, and have gotten more involved than I had planned, but I have never before put my thoughts on paper. I hope I have shed some light on "Silly Question's" questions.

RUBBER LOVER

My foreskin is the type that just covers the glans, with no overhang, for which I'm very glad. I know some guys love to see the overhang, and do everything humanly possible to stretch theirs, so they can flip it over their shoulder, or kick it aside to keep from tripping over it, but I like mine just the way it is.

I always wear a rubber everytime I jack off, and it sure is nice to have that skin, so I can jack off with the skin in place (even erect, it covers the head, or I can peel it back for an entirely different sensation). I discovered how erotic a rubber can be for jack-off at fifteen when I saw the neighbor boy (17) using one.

It was late at night and the shades were up in his bedroom window. Our house was very close to theirs, and I'm sure he thought no one was home at my place. My bedroom window was opposite his, and I was in bed with the lights out. At the time, I knew very little about rubbers. I just knew it was something a guy wore on his cock to keep from getting a girl pregnant. I had never heard of using them for jack-off. The whole thing really turned me on. Watching him slowly roll it on, the nice, tight fit, the way it made his cock look shiny (he was cut, by the way) and the best part of all was seeing him shoot off into it, and to see his load swirling all over the head, and part of the shaft!

I could hardly wait to try it, but I didn't know where you bought them, how much they cost, if they came in different sizes, etc., but I damn quick made it a point to find out.

Much to my delight, about two weeks later, while walking home from school, I found a box of Sheiks with two of them in it. I ran all the way home, praying no one would be home. They weren't. I went to the bathroom, and totally undressed except for my jockstrap which I wore daily to hold down unwanted hard-ons, locked the door, and just in my jock, I stood in front of the full-length mirror on the bathroom door.

My young cock in the confines of the jockstrap pouch was already rock hard with anticipation. I opened the box and took a rubber out, tore it out of its foil wrapper, and I swear, just looking at that little rolled beauty, I could have shot off! I held it up to my nose and inhaled the odor. I love the smell of a rubber and the sight of latex working together with cock. Then I pulled the front of my jockstrap down and under my balls and proceeded to slowly roll the rubber on. I was afraid it might fit a bit loose, but it fit very snug and felt great. Right away I noticed a sort of tight, pressury, clingy feeling all over the entire surface of my young cock, and it felt sort of sexy and slinky on my bare cock flesh.

I had left my foreskin in place. It wasn't until years later that I decided to try jacking off with the skin pulled back. When the rubber was on good, I dropped my hands to my sides and stood, profile to the mirror, and really got turned on watching my hard cock throbbing and pulsing while encased in the tight rubber. It was plainly telling me it liked it, and wanted to shoot off. I instantly found it to feel highly different with the rubber on, and I really liked it and knew I had to

get more of these. I was so turned on that I knew I'd shoot right away, so I tried to prolong it.

When I'd reach the about-to-cum feeling, I'd take my hand away and let my cock cool off as it bounced and throbbed in the rubber. Of course, the best part of all was the shoot off. And this too felt one hundred percent better with the rubber on. Instead of spurting out and shooting through the air, I felt it gushing and spurting forth only to be instantly trapped by the tight, sheer, lubricated rubber and swirling all around the head and part of the shaft. My orgasm was so strong and intense that as I was pumping my boy juice into it, I literally sank to the floor on my knees in front of the mirror. While still on my knees, I continued to play with it and feel the load of cum between the cockhead and the rubber, and soon I was hard again. I stood up and really jerked like crazy. My hand practically a blur, I very soon put a second load into it. From that day on, I was hooked on using rubbers for jack-off.

It was years later that I tried doing it with the skin pulled back. For awhile, the head now exposed was just too sensitive even with a lubed rubber on, but then I tried lubing my cock extra lavishly, especially the head, and the groove just behind it, with K.Y. then taking the rubber, I'd unroll it about one inch, and pinching that extra space between two fingers, I'd roll the rubber on, thus, when making the shaft pumpings, on the down stroke the loose rubber would be pulled over the head, and on the up stroke it would slide off, so while pumping, I was also stimulating the sensitive glans with the lubed inch of loose rubber sliding back and forth over it. Then, at shoot-off time, I'd pull the rubber down tight so the loose end was snug over the glans, so I could feel the warm cum swirling around the head.

I've found too that if I jack off with the skin in place, instead of pulled back, and leave the rubber on for an hour or so after shoot-off, when I do remove it, the uncut cock smell is terrific!

Though it is not very easy to do now that I'm older, when I was much younger, I could easily shoot-off by pulling the foreskin back on my hard cock, putting on a rubber, and wearing tight Levis (no underwear). Just walking around with the super-sensitive underside of the glans rubbing against the rough denim material was enough to trigger ejaculation with orgasm. That was really hot...walking down the street, and shooting off into my Levis with no mess to worry about because of the old, trusty rubber.

So, as you can see, I've been enjoying rubbers for many years, long before the worries of herpes, AIDS, etc., and needless to say I enjoyed using them for blow-jobs and fucking too. All you macho guys out there who were brainwashed into

thinking a rubber dulls the sensation, and that it's like "taking a shower with a raincoat on" don't know what you're missing, and there is nothing "juvenile" or "sissy" or "vanilla sex" about using a rubber. What could be more masculine or butch than a rubber? It is as macho as a jockstrap, cockring, Levis, boots, leather jackets, etc.

If anyone is interested, there are some very hot rubber action scenes in Christopher Rage's videotape *Outrage*. Tapes with rubbers used do exist, but they are very hard to find.

FIRST UNCUT

The first uncut cock I ever saw up close was on this dude who picked me up. I was hitchhiking north of San Francisco in the Redwoods and it was getting late. The road was almost empty of cars and I was beginning to think I would have to bed down in the forest. Then this BMW rolled up and offered me a ride.

I just wanted to get to the nearest motel for the night. We passed a couple motels that said, "No Vacancy." The dude said he was driving through to Portland and I was welcome to stay with him. So, I put my jacket up next to the window to get some shut-eye while he drove.

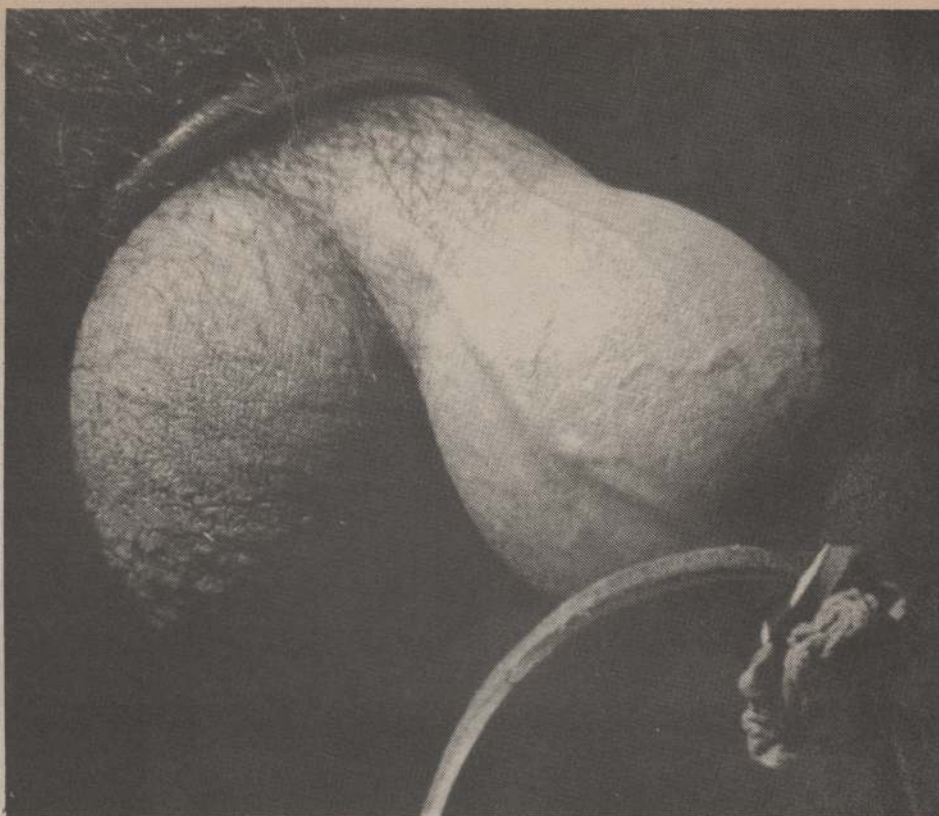

No sooner did I have my eyes shut than I felt something on my crotch. The dude was feeling me up. Well, shit, why not. He was a decent-looking guy about 40 but didn't look gay to me. Probably just horny from being away from home.

I pretended to be asleep but while he prodded, my dick got stiff in my Levis. He started prying at my fly and swerving the car so I helped him out and pulled my dick out for him. He got a flashlight out of the glove compartment and put the light on my cock. He said he liked what he saw and asked if he could suck on it. I said yea. Who doesn't like have his meat eaten?

He pulled the car over and turned out its lights. He handed me the flashlight and told me to hold the light steady on my dick while he ate it. Then he stopped slurping on it long enough to get his own dick out of his pants and it was right in the light and my mouth flew open. He was uncircumcised. He had a full bone-on and his skin still covered the whole so I could watch his dick.

I almost forgot how good my dick was feeling I was so fascinated by watching his cockhead pop in and out of the sin. He asked me if I was close to cumming and I said, "Wait a minute. Let's change places for a couple of minutes. I want to get a good look at your cock. I've never seen an uncut one up close before. Do you mind?" He was surprised but got up on the seat while I got down between his legs.

I put the flashlight on his dick and his foreskin was not more than three inches from my face. I told him to start beating his meat for me real slow. Then I told him

to speed it up for me. I could see his cockhead get redder and it began to flare out as the skin rubbed over it faster and faster. In no time at all he shot right into my face. I told him to relax and I held his softening uncut dick in one hand and studied it closely while I shot all over my Levis. He left me off at the next motel because I had to stick my Levis under the shower before I got to my parents home.

MATTRESS TESTER

I'd been away for ten days and when I got home, the most recent *FQ* had arrived. I sat avidly devouring every eyeable—also looking for my ad—when the doorbell rang. I've had my house on the market for some time and it was an agent to show the house to a couple. She: nondescript except to look bitchy. He: A knockout! Lots of black hair on arms, legs and a huge tuft peeking out over the top of his T-shirt; blue eyes, long eyelashes; about 6 feet tall and a stunning smile. Talk about make my day! He was very friendly and it was very obvious she was jealous as hell with him. Every time he asked a question she managed to step between us and stay there. After a tour of the house, they all departed and I resumed my one-handed reading.

About two hours later, the doorbell rang again. I zipped up, put the mag under the *Times-Herald* and opened the door. What to my wondering, lust-filled eyes should appear, but the "gentleman caller" of earlier, sans wife and real estate agent. He seemed very nervous.

He said he'd really liked the house and especially the furniture in the Master bedroom and had wondered if I'd consid-

er selling it with the house. Needles to say, we went in to take another look at the furniture and, also, perhaps, needless to say, we ended up *in* the bed—testing the mattress, of course!

Well, the dude was nervous as hell. He swore he'd never been in bed with a guy before. He told me his wife said he was "built too big" and hurt her. Said she hated his hairy body and uncut cock. The poor dude was really miserable.

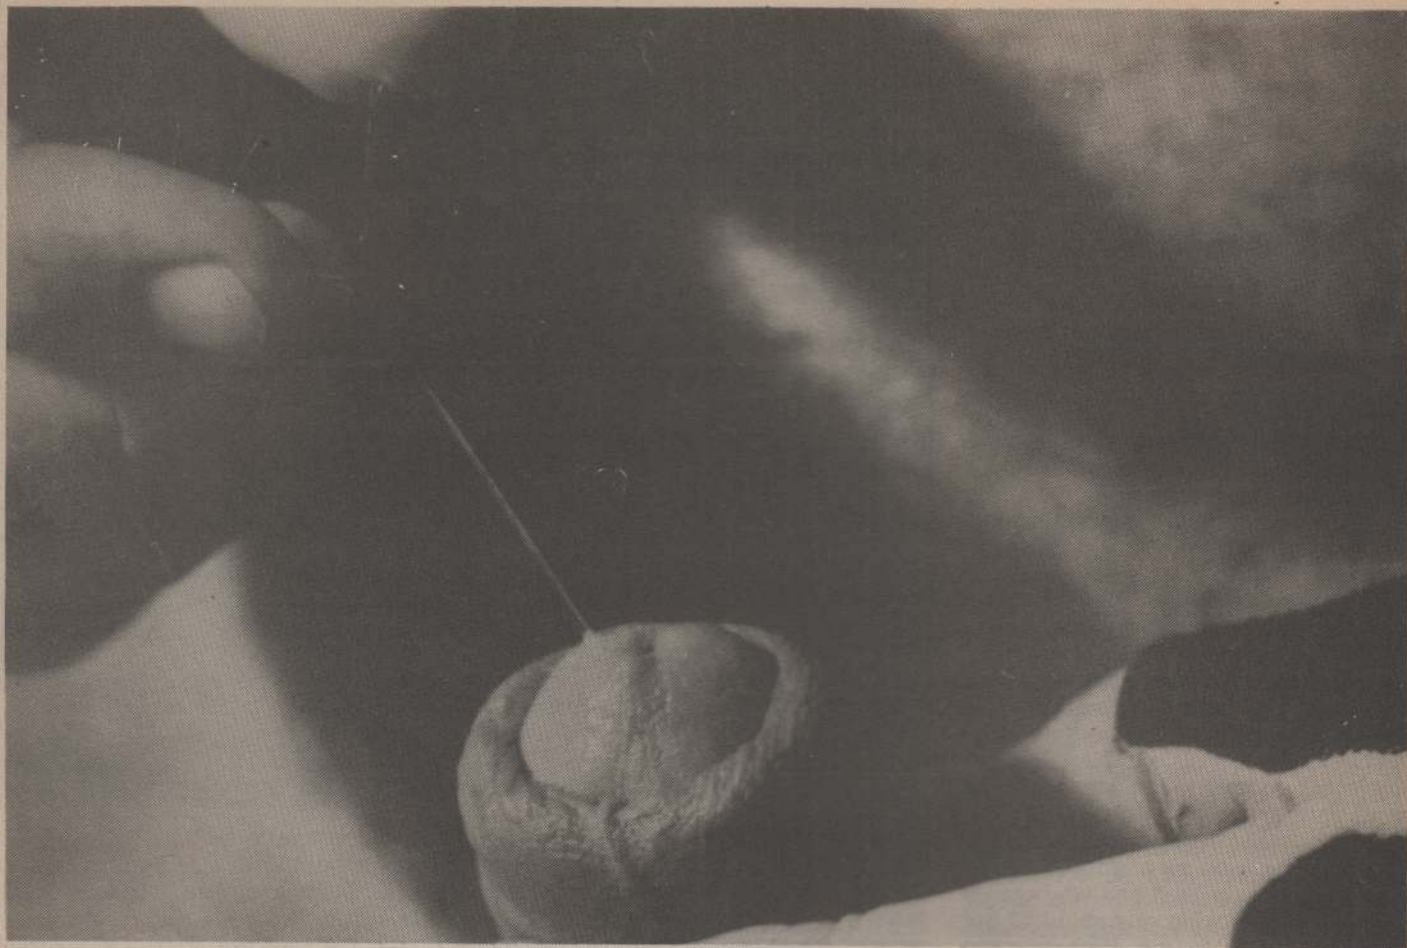

He was big—about nine inches in length and about as big around as a Coke can. His foreskin was one to write home about. Hard as a rock, that glorious skin came up and covered the enormous mushroom head and hung out about two inches. He said he masturbated a lot and loved to stretch his skin. I believe it.

After two hours of driving him up the seven-foot-high headboard by chewing, sucking, stretching, pulling and making love to his foreskin, huge cock and bulb-balls, not to mention licking and pulling on every black hair on his chest, belly, balls and crotch, I finally let him cum. To say he shot a lot of ball juice is putting it mildly. The guy virtually erupted. He was all over the bed with me hanging on to his cock with my mouth.

When he finally caught his breath, he grabbed me, kissed the hell out of me, literally threw me on my back and gave me one hell of a blow job. He was an amateur, but made up in enthusiasm what he lacked in technique. I was his first, but he swears not his last.

Needless to say, I hope he and his wife don't buy my house.

P.S.: We never did discuss a price on the furniture.

UNCUT VS. CUT

We had a beer bust at our fraternity house and everyone got pissing drunk. I mean everyone kept pissing and pissing. Some of the fellows passed out, but all of us pledges were still hanging in there guzzling the suds when the upperclassmen told us to get to our dorm on the double. Three of us were uncut and five cut.

We decided to have a pissing contest; cuts vs. the uncuts. The cuts had to eliminate two so we measured cocks to eliminate the two smallest ones, the idea being that they didn't have as much chance to hit the wall as the longer ones. We were all standing there bursting with beer in our bladders waiting for the team to be chosen.

First, it was an uncut pledge who stood up to the chalk line, pointed his cock at the dart board on the wall, yanked his foreskin all the way back so that his glans was bare and pissed like a horse. He hit the wall but not the target. The cut guys complained it wasn't fair because he shoved his skin back to get a direct stream. The pledge said he always shoved his skin back all the way when he pissed so it was fair.

Then came a fat-headed cut cock to the line and let go like Niagra. He pissed for a good three minutes and hit all over the target but not near bullseye.

Then an uncut pledge cock came to the line and the cuts demanded he keep

his skin forward. The pledge said he will piss like he always pisses and pulled his long overhang back just so that the pink tip of the glans showed and he let go. He hit the target and got closer to the bullseye than the cut before him.

Then the second cut cock came to the line and we all had to laugh. The pledge was a big bruiser, but he held his pisser so dainty, pinching some extra skin between two fingers and hanging his dick by the skin. We thought he was assing around, but he said that is the way he always pissed and fair is fair. He hit the

wall on one side of the target and then on the other but couldn't aim it right.

Then the third uncut dick came up and he had a funnel of skin you wouldn't believe. One cut guy said he watched this pledge piss before and he didn't pull his skin back and that was the way he had to pledge this time. The uncut pledge said, "No problem," and aimed his skin funnel at the target and sprayed the whole fucking room while we all ran for cover.

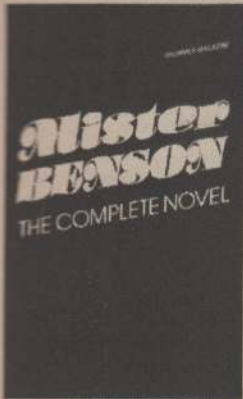

The last cut cock stepped up to the line and he had a real hose-pipe coming out of his pants. It practically reached halfway to the wall, it was so long. We all thought the contest was over, but his piss didn't even hit the wall. So, the second uncut pledge won the contest and the losing team had to kiss him on the ass.

Then one of the eliminated cut guys said he couldn't hold it any longer and stood up to the line and out of his fat-headed, short-shafted pisser came a bullet of beer and it hit the bullseye. So, the uncuts had to kiss his ass.

It was my turn, but despite my bladder full of beer, my circumcised dick was standing straight out in front of me when I got to the line. It didn't matter, because the other pledges were passing out on their bunks. So, I j/o'ed and hit the jackpot, too. I was so hot from watching those three uncut pledges piss, especially the one who sprayed the room. Next time, I'll wear my bathing suit and get a real bath. □

HE AIN'T HEAVY, HE'S MY LOVER

Had enough of whips, chains, and heavy-duty SM? You won't escape them here—but you'll rediscover them with a decidedly humorous twist, along with Carlo Carlucci's glowingly humorous look at every other aspect of gay life, from the pangs of coming out to a Thurberesque cartoon series "War Between the Machos and the Sissies" that will have you in stitches!

Gay cartoon books have come and gone, but this one is really special. "A must-have cartoon book," says the *Baltimore Gay Paper*; "a sharper wit could not be found!" *Cruise Magazine* says it's "the kind of book you'll read over and over, getting a fresh chuckle or grin each time." And the *San Francisco Review of Books* declares that Carlo Carlucci "has the talent of Thurber."

SLAVES OF THE EMPIRE

by Aaron Travis
Illustrated by Cavelo

995

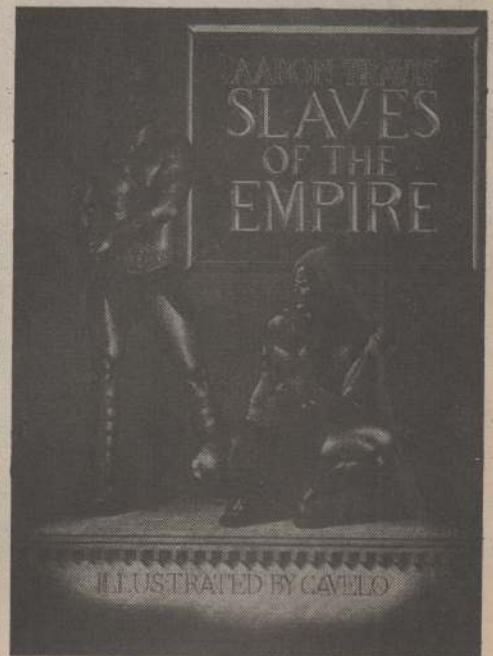

Hot off the press—the long-awaited paperback edition of Aaron Travis' SM Roman epic, with twelve richly detailed illustrations by the master of erotic fantasy art, Cavelo.

Set against the barbaric splendor of ancient Rome at the height of its empire, **Slaves** seduces the reader into a steamy world of flesh and steel, where a famed gladiator must ultimately choose between his own brutal nature and his love for a pair of twin-princes, while a sadistic senator plots to enslave them all.

John Preston calls **Slaves of the Empire** "a wonderful mythic tale," and Phil Andros has called it "taut, tense and absorbing."

"With hardly a pause," says the *Bay Area Reporter*, "Aaron Travis torments us from sex scene to sex scene, each building higher than the one before, all satisfying, original and leading surely to the hair-raising last chapter... I got bruises just from reading."

Lavish, unusual and compelling, **Slaves of the Empire** is a novel you'll read more than once—the first time for its suspenseful story and, after that, for lingering fantasies and pleasure.

HISTORY OF RESTORATION

Foreskin restoration is a phenomenon of the eighties. The editors and authors of *FQ* receive more letters concerning the possibility of foreskin reconstruction than we do of all other aspects of foreskin/circumcision. Obviously, most of our readers are circumcised. When we first published the fact that several American doctors are experienced in this procedure, many men realized for the first time that it might be possible for them to have a foreskin. However, the reconstruction of the foreskin is almost as old an operation as circumcision. In this section, we will review the history of restoration.

Attempts at uncircumcision have been made since at least the second century before Christ, although not on hygienic or medical grounds. Uncircumcision has appeared in history at three periods, each time as a result of social and political pressures on the Jews.

THE HELLENISTIC PERIOD

The rapid spread of Greek culture following the conquests of Alexander did not leave the Jewish nation in Palestine untouched. The Hellenized Jews adopted not only the Greek style of dress but also their methods of training the young and their interests in athletic games. Public nakedness became commonplace throughout Judea; in Jerusalem itself, baths and gymnasias were erected within sight of the Holy Temple. The Hellenizers, in their desire to destroy all evidence of their barbarian origin (in the Greek sense of the word), tried to remove the evidence of the Covenant of Abraham. Circumcision was then not standardized: the Oral Tradition was ambiguous, and frequently a large fragment of the prepuce was left behind. The Hellenizers pulled this fragment forward manually, stretched it, and even applied blistering agents thereto, in order to make it cover the glans. Josephus says: "...they hid the circumcision of their genitals so that even when they were naked they might appear like Greeks." One of the causes given by the later Rabbis for the destruction of the Temple is the practice of uncircumcision: "The hallowed flesh is passed from thee"—that is, they attempted to hide their circumcisions.

THE ROMAN PERIOD

Following the successful revolt of the Jews against Antiochus Epiphanes and the establishment of the Hasmonean Dynasty in 141 B.C., the practice of uncircumcision disappeared in Judea. The Romans, who soon became the overlords of the province, regarded circumcision as an interesting and amusing custom. Not quite three centuries later,

however, circumcision was prohibited by the Emperor Hadrian, and uncircumcision again became practiced.

The opposition of the Jews to the introduction of the Roman Eagles in their holy places and the repeated uprising of the Zealots culminated in the destruction of the Temple in 70 A.D. and the dispersion of the Jews. The exiled Jews wanted to take advantage of the luxuries of Rome and to avoid the payment of the onerous "Fiscus Judaicus"—a tax levied against every Jewish male. They began to use a special sheath over their penises in the bath. Eventually they invented the "Pondus Judaicus," a bronze sheath worn so as to pull on the skin of the preputial fragment to make it recover the glans.

A reaction against the assimilationists developed with the growth of the Rabbinic academies. The Tanniam, the Rabbis who first committed the Oral Tradition to writing as the Mishnah, set themselves the task of rebuilding a religious base for Judaism by making the Law "a fence around Israel." About 140 A.D., they finally standardized the technique of circumcision, effectively eliminating the previously used methods (methods many Arab tribes use today—methods which remove only part of the foreskin). In Shabbat 19:6 we read: "This shred (of the foreskin) includes flesh that covers the greater part of the corona...if he waxes fat (and the corona is covered anew)...or if one is circumcised without having the inner lining torn, it is as though he is not circumcised." To obviate the leaving of excessive preputial tissue, the preiah was instituted. After the excision of the foreskin, the mohel was instructed to seize the inner lining of the prepuce still covering the glans and, with thumb nail and index finger of each hand, to tear it so he can roll it back fully over the glans and completely expose the latter.

MODERN TIMES

The plight of the Jews under the Hitler terror made uncircumcision no longer a question of social conformity but a matter of life or death. No matter how good the visage nor how well-forged the *Kenknkarte* (identification documents), the male Jew carried with him incontrovertible proof of his origin. Blackmailers and extortionists known as "schmaltzorniks" (fat) used circumcision as the criterion of Jewishness. Bernard Goldstein, a Bundist leader who lived on the "Aryan side" (outside the Ghetto), describes their activity vividly: "These scum would approach their victims with the words, 'Hand over your fat.' Jews lived in constant danger of these dregs of Polish morality, who made a business of Jewish lives. They would pull their victim into a

doorway and rip open his trousers..." Even Christians became their victims. Respectable Poles, when asked to expose themselves, tried to give the hooligans money to avoid the disgrace.

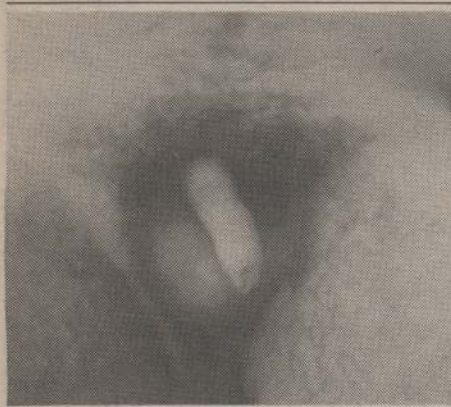

Through illegal sources circumcised men could obtain documents stating that circumcision had been performed because of phimosis. German doctors, however, prided themselves on their skill in distinguishing between circumcisions performed in infancy (hence, ritual) and those done in adult life. Ingenious surgeons devised methods of reforming the prepuce for tremendous sums.

Commenting on foreskin restoration is Dr. Joseph Tenenbaum: "Circumcision certainly proved to be a boon for the Nazis. Being a doctor myself, my professional curiosity made me interview dozens of (European) doctors and examine the end results of these operations (on European Jews). One of the physicians, himself Jewish, said to me in great bitterness: 'Jews have had all kinds of international conferences, but though Jewish doctors were the pioneers in the specialty of urology, not one Urological Congress was called for the purpose of standardizing the circumcision repair techniques.'" □

ACORN

The Acorn Club is a "foreskins anonymous" club made up of men circumcised as adults, men interested in being circumcised, men interested in the subject of circumcision and men who worship the all-American clean-cut cock. As a result of our FQ column we now have developed a line-up of men interested in watching, or being SIRCumcised at our festivities. If your penis tells you you should join our club, please write to: Acorn Number One, Box 547, 633 Post Street, San Francisco, California 94109. Here are a few of our recently received letters:

Dear Acorn,

I just heard about your club and that you do circumcisions. I am a baseball player and the fellows call me Pointer. Our fans think I got named that because I'm supposed to have the habit of pointing at the ball for the infielder, but I got named that because of my uncut dick. I've got a real pointing foreskin on my dick and I get ribbed about it all the time. A couple of the fellows offered to pass the hat to pay for my circumcision. Of course they are only kidding, but I know damned well they would like to watch me get my dick clipped. I have in truth always wanted to be clipped like everyone else and am thinking it might be fun to make a party out of it. Do you guys allow outsiders to watch the proceedings? I'd like my teammates to be there dressed in their baseball uniforms and I'd like to be circumcised while wearing my cap. I just want to be sure that whoever you have do it carves out a great-looking circumcised cock for me. So when do we pull this off?

Dear Acorn One,

When I see or hear the words circumcise, circumcised, or circumcision, there is a definite quickening of my pulse rate. Also a perking up of my alertness, and for sure there is an increase in the amount of adrenalin that is flowing through my system. By this time, I'm sure you have concluded that I am very much PRO-CIRCUMCISION. What's as Ameri-

can as apple pie? Yes, you guessed right—a cut cock!

You wondered about my getting cut. I was about four years old when I made the discovery that all little boy's cocks are not the same in appearance. My cousin, Ritchie, and I were running under the lawn sprinkler on a hot summer day, and when it was lunchtime, we went into the house to get into our regular clothes. In the bathroom, we had pulled our swim trunks off, and were toweling down, when we made the discovery that Ritchie's pee pee did not look like mine. Whereas mine had skin all over it, his seemed to have a "frame" around it. What I was seeing, of course, was the glans, and the rim of the corona, because the foreskin had been removed.

I can recall, during my gym days in high school, how I looked with envy at my classmates who were circumcised. Of course, it was pure fantasy on my part, but to me it seemed the circumcised guys were always the smartest, or had the most athletic prowess and were generally ahead and better in everything.

It was during this high school time that I had my first mutual JO with a close buddy of mine. His cock was cut, and mine was the first uncut cock he had the pleasure to examine, explore, play with and fondle. It really interested him how the skin could be slid back and forth, up and down over the cock head.

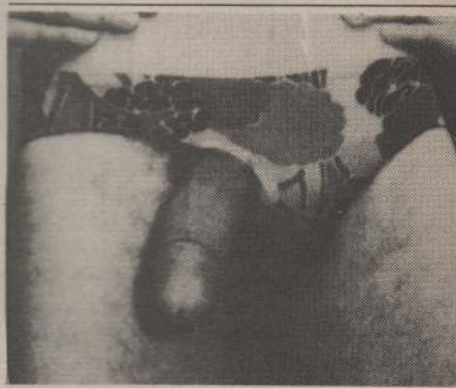

His cut cock was the first one I ever minutely examined and explored, and I checked out every inch of all the curves and roundness. It was at this time that I discovered that the head of a cut cock feels like velvet. You've probably noticed, how when your crotch area is sweaty, or if a guy has just taken off his briefs or jockstrap, and there is perspiration in his crotch—or if your hands are perspiring, if you touch and rub your cock head, the feeling is more accurately described as "rubbery." But when the moisture on your cock—and your fingertips evaporates—and they are both dry, then the feeling is much like velvet when you rub the head lightly with your thumb and finger.

To this day, it is such a turn-on for me to lightly touch and rub the head of a circumcised cock and enjoy the sensation of this velvety texture. Even when a guy has a hard-on, and the shaft of his cock is rock hard, the head still maintains this feeling of velvet. I love to do this on another guy's cock—especially when it's hard. Or to touch and rub my "velvety" head really drives me wild. We had a lot of happy times during this high school age—jacking each other off.

I have a sister about two years younger than I am. While she was still a senior in high school, she started dating this 19-

year-old fellow. Tom and I became fascinated with each other from the moment we were introduced. Of course, he had to keep up pretenses, and we mutually agreed that he should keep dating my sister, even though he was primarily interested in me. There's not quite ten months difference in our ages, and Tom was the first man I ever fell in love with.

A few months before Tom (who was also uncut at this time) turned 22, we noticed that he had a growth developing on his cock. It seemed to be on the inside of his foreskin, down fairly low, and at first was not visible when his skin was

over his cock head. But within a month, it grew as large as a navy bean, and you could actually see the bulge of it through his foreskin.

Tom went to a doctor, who urged him to have it removed as soon as possible. He explained if it was not skin cancer, it could develop and become malignant if ignored.

So Tom went to the hospital for the surgery involved. It was necessary to circumcise his penis because of the position of the tumor. Tissue tests were done, and they found that the growth was benign. The whole episode scared the hell out of Tom (and me too!).

I talked to Tom's doctor about the chances of something like that starting on my penis. He said it was very unlikely, but if I really did want to be circumcised, he would do it for me at his office.

My answer, of course, was yes, but I had a frank, detailed discussion with him first. In playing with, examining and enjoying many cocks up to that time, I came to the conclusion that many of them had too much skin removed. When they had a hard-on, the skin on the shaft of many of them was very taut and tight. (I guess this is a very personal reaction on my part, as I am aware that many of my fellow ACORNS think that a perfect circumcision is one where all of the skin has been removed, and the shaft is tight as a drum.) I explained to the doctor that I wanted to have the entire corona exposed, but wanted to have just a slight amount of skin left, so that there would

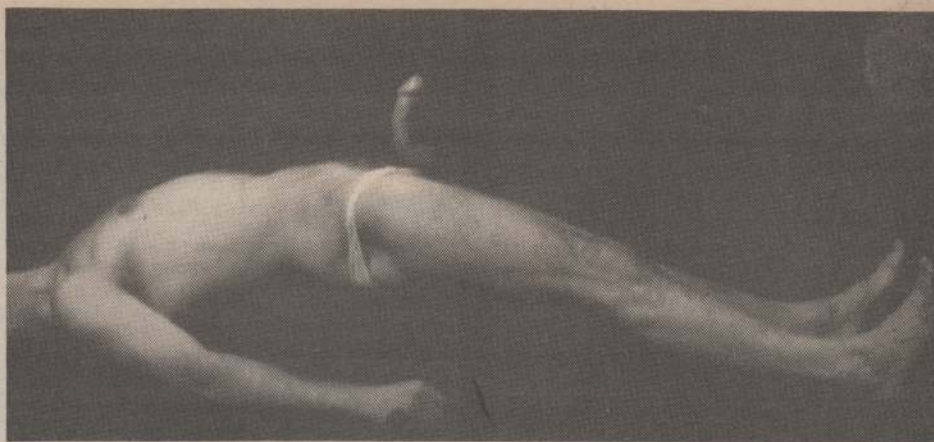

be "play" back and forth on the shaft of my penis. I must say I am very pleased with what he did, because he followed my request precisely. (See enclosed photos.)

At his office, the doctor applied a solution of what must have been primarily alcohol (judging from the aroma) to my entire groin and crotch area, including my cock and balls, to sterilize the necessary scene of the operation. He injected a local anesthetic at several places in my cock. He told me I would feel a slight pricking sensation the first time he put the needle in my cock head. He waited a moment for the anesthetic to start taking hold. When he did the additional injections at various places on the shaft of my penis, I didn't feel anything. In just a short time, my entire groin felt numb. There was no pain or discomfort whatever, and rather than close my eyes, I decided to watch the procedure.

The method the doctor used is called a dorsal slit, and apparently is the procedure most commonly used when circumcising adult males. I had a partial erection during most of the operation, and the doctor could tell I was somewhat embarrassed. He tried to reassure me that this was the most natural thing in the world to happen and that I should not be concerned. He used an instrument I believe is called a Kelly clamp to crush the skin tissue and mark where he would want to do the cutting. Then he cut from the top edge of my foreskin down to the area of my corona. He then put in several stitches, and explained that some of them would be the kind that dissolved, and the others he would have to take out in about a week. Then another cut was made around the base of my corona.

When he had all of the stitches in, he covered the head of my cock with an ointment that had a consistency similar to a light vaseline. This was then covered with a light gauze. Then he helped me get into a jockstrap, and helped me press my penis upwards against my belly. He said I should be careful not to disturb the sutures when I urinated and gave me a tube of the ointment he used to apply around the top of my penis. This I was to do before I positioned my penis up against my stomach and put the jockstrap pouch and waistband around it. He said I was to do this for three days, and then just wear my regular jockey briefs. On the sixth day, I went back to his office, and he took the stitches out—and that was it!

When I was in the doctor's office, and the two of us were chatting, as he got the instruments and things ready for my circumcision, he kidded me about how I was going to "blossom out." He explained that medical science didn't know exactly why it happens, but it is a proven fact that when the glans of a penis is not covered with a foreskin, the rim of the corona flares out. It took about six

and "cool down" a bit, and then commence again with stimulating activity. So months after my circumcision for my "mushroom head" to "blossom out." I guess what I should say, now that I am an ACORN, is it took about six months after my circumcision for my "acorn head" to "blossom out."

I'm sure it's 90% psychological, but as much as I enjoyed sex before I was cut, it is even more pleasurable now. I seem to have just as much feeling and sensation as I had before I was cut, but when I had a foreskin, it seemed that I became aroused very quickly and came to my climax quite rapidly. Now I can enjoy foreplay longer, and when I am close to an ejaculation, can ease off on the action

I have much better control over the time when I do have a climax and shoot off.

I have enclosed a couple of close-up photos of my cock before it was cut. It's hard for me to believe how ugly my cock once looked. One shows the skin forward covering my glans. The other shows the foreskin pulled back just to the edge of the corona. Notice how the diameter of the coronal ridge is the same as the diameter of my shaft. The larger photo shows my cock after circumcision and after my "mushroom head" has "blossomed out." Notice how the diameter of the rim of my corona is now larger than the diameter of my shaft. I'm so proud and happy I now have an "acorn" head. □

COP WORSHIP

We've never offered a strictly one-man narrative tape before, but this one is so good we decided to make an exception. It's one guy's cop fantasies, his true-life obsessions, his dreams of what might happen if that super-hot cop he's had his eye on for months should bust him, force him to his knees to suck not only his cock but his partner's too, as the two cops stare at each other in the eye. All the guy's pent-up desires come out: slurping cop cum out of rubbers, swallowing gallons of cop piss, wallowing under dominant cop attitude. If you're into cops, you'll listen to this tape again and again.

PART 1 THE KID'S FIRST TIME WITH DAD

The kid's been bad (chicks and drugs) but Dad knows just how to handle him. Dad shows his son who's boss and gives him the punishment he deserves. It's a horny kid's introduction into the male world of cock-sucking, armpits, piss and, most of all, hot, masculine attitude.

Dad's been waiting for the right opportunity to corrupt his oversexed boy and tonight's the night. He knows he shouldn't do it, but those hot ass cheeks and adolescent cock are too tempting.

KID VS DAD—WINNER TAKES ALL

Ever wrestle with your old man? Ever wonder what would happen if those sessions got Dad hot—too hot—and he overpowered you? Ever wonder about all the different things he could force you to do to that sweaty body of his before he pins you on your stomach and forces that horse-dick of his up your ass? It's all on this tape!

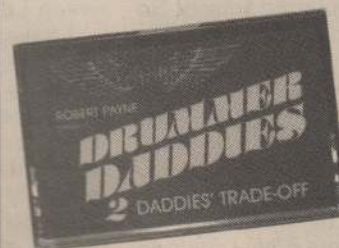

MY DADDY WAS BAD

The kid comes home to find his dad asleep after a hard day's work. He could stand there forever at the foot of the bed, rubbing his crotch and watching his dad's hairy chest, meaty thighs and swollen dick. But when Dad wakes up, matters come to a head and the kid gets taken on a wild sex trip that culminates in a super-hot scene.

DADDY BREAKS IN A NEW BOY

Patience and understanding go out the window and Daddy starts training his boy with the tried-and-true adage, "spare the rod and spoil the boy." It is heavy-duty training in an actual session. Both the boy and you will be better for having been there.

DADDIES' TRADE-OFF

Two daddies trade boys. Daddy #1 takes boy #2 home and Daddy #2 takes charge of boy #1. Each daddy tries to show up the other's training and the boys are hard-pressed not to embarrass their Daddy. Good, firm action on everybody's part.

TAPE 1 THE INTERROGATION

This tape is featured on the cover of *Drummer* magazine. Model Brutus is a mean Master who knows how to deliver some heavy abuse, both physical and mental. On side one he talks directly to you, forcing you to suck his big cock and worship that incredible Master body. On side two we hear an authentic session where he works over a slave. Plenty of humiliation, and heavy, heavy abuse.

TAPE 2 THE TRAINING BEGINS

Brutus lays it on as his recruit responds willingly and unwillingly to the abuse and humiliation of his training. Not even allowed to beg, he submits to the DI's heavy hand and busy belt. Breathtaking!

TAPE 3 PUNISHMENT & REWARD

When Brutus speaks, men listen, as will you when he tells you how it is and how it is going to be. Whether the punishment is its own reward, or the reward is merely more punishment, only the lowly recruit can say. One hour of intense verbal abuse.

LEON

LEON, our second USA artist this month, contributes these far-out, beautiful, hot and uncut specimens for your pleasure. Leon is a professional artist who produces handsome greeting cards out of his Gallerie Leon in Denver. His men are rugged cowboys, leathermen, etc., and they are uncut...

Next issue FQ is pleased to encore the work of Dan Boyle, who last appeared in FQ4. Dan is a world-renowned figure sketch artist and we are excited to present his new works.

SHAVE IT!

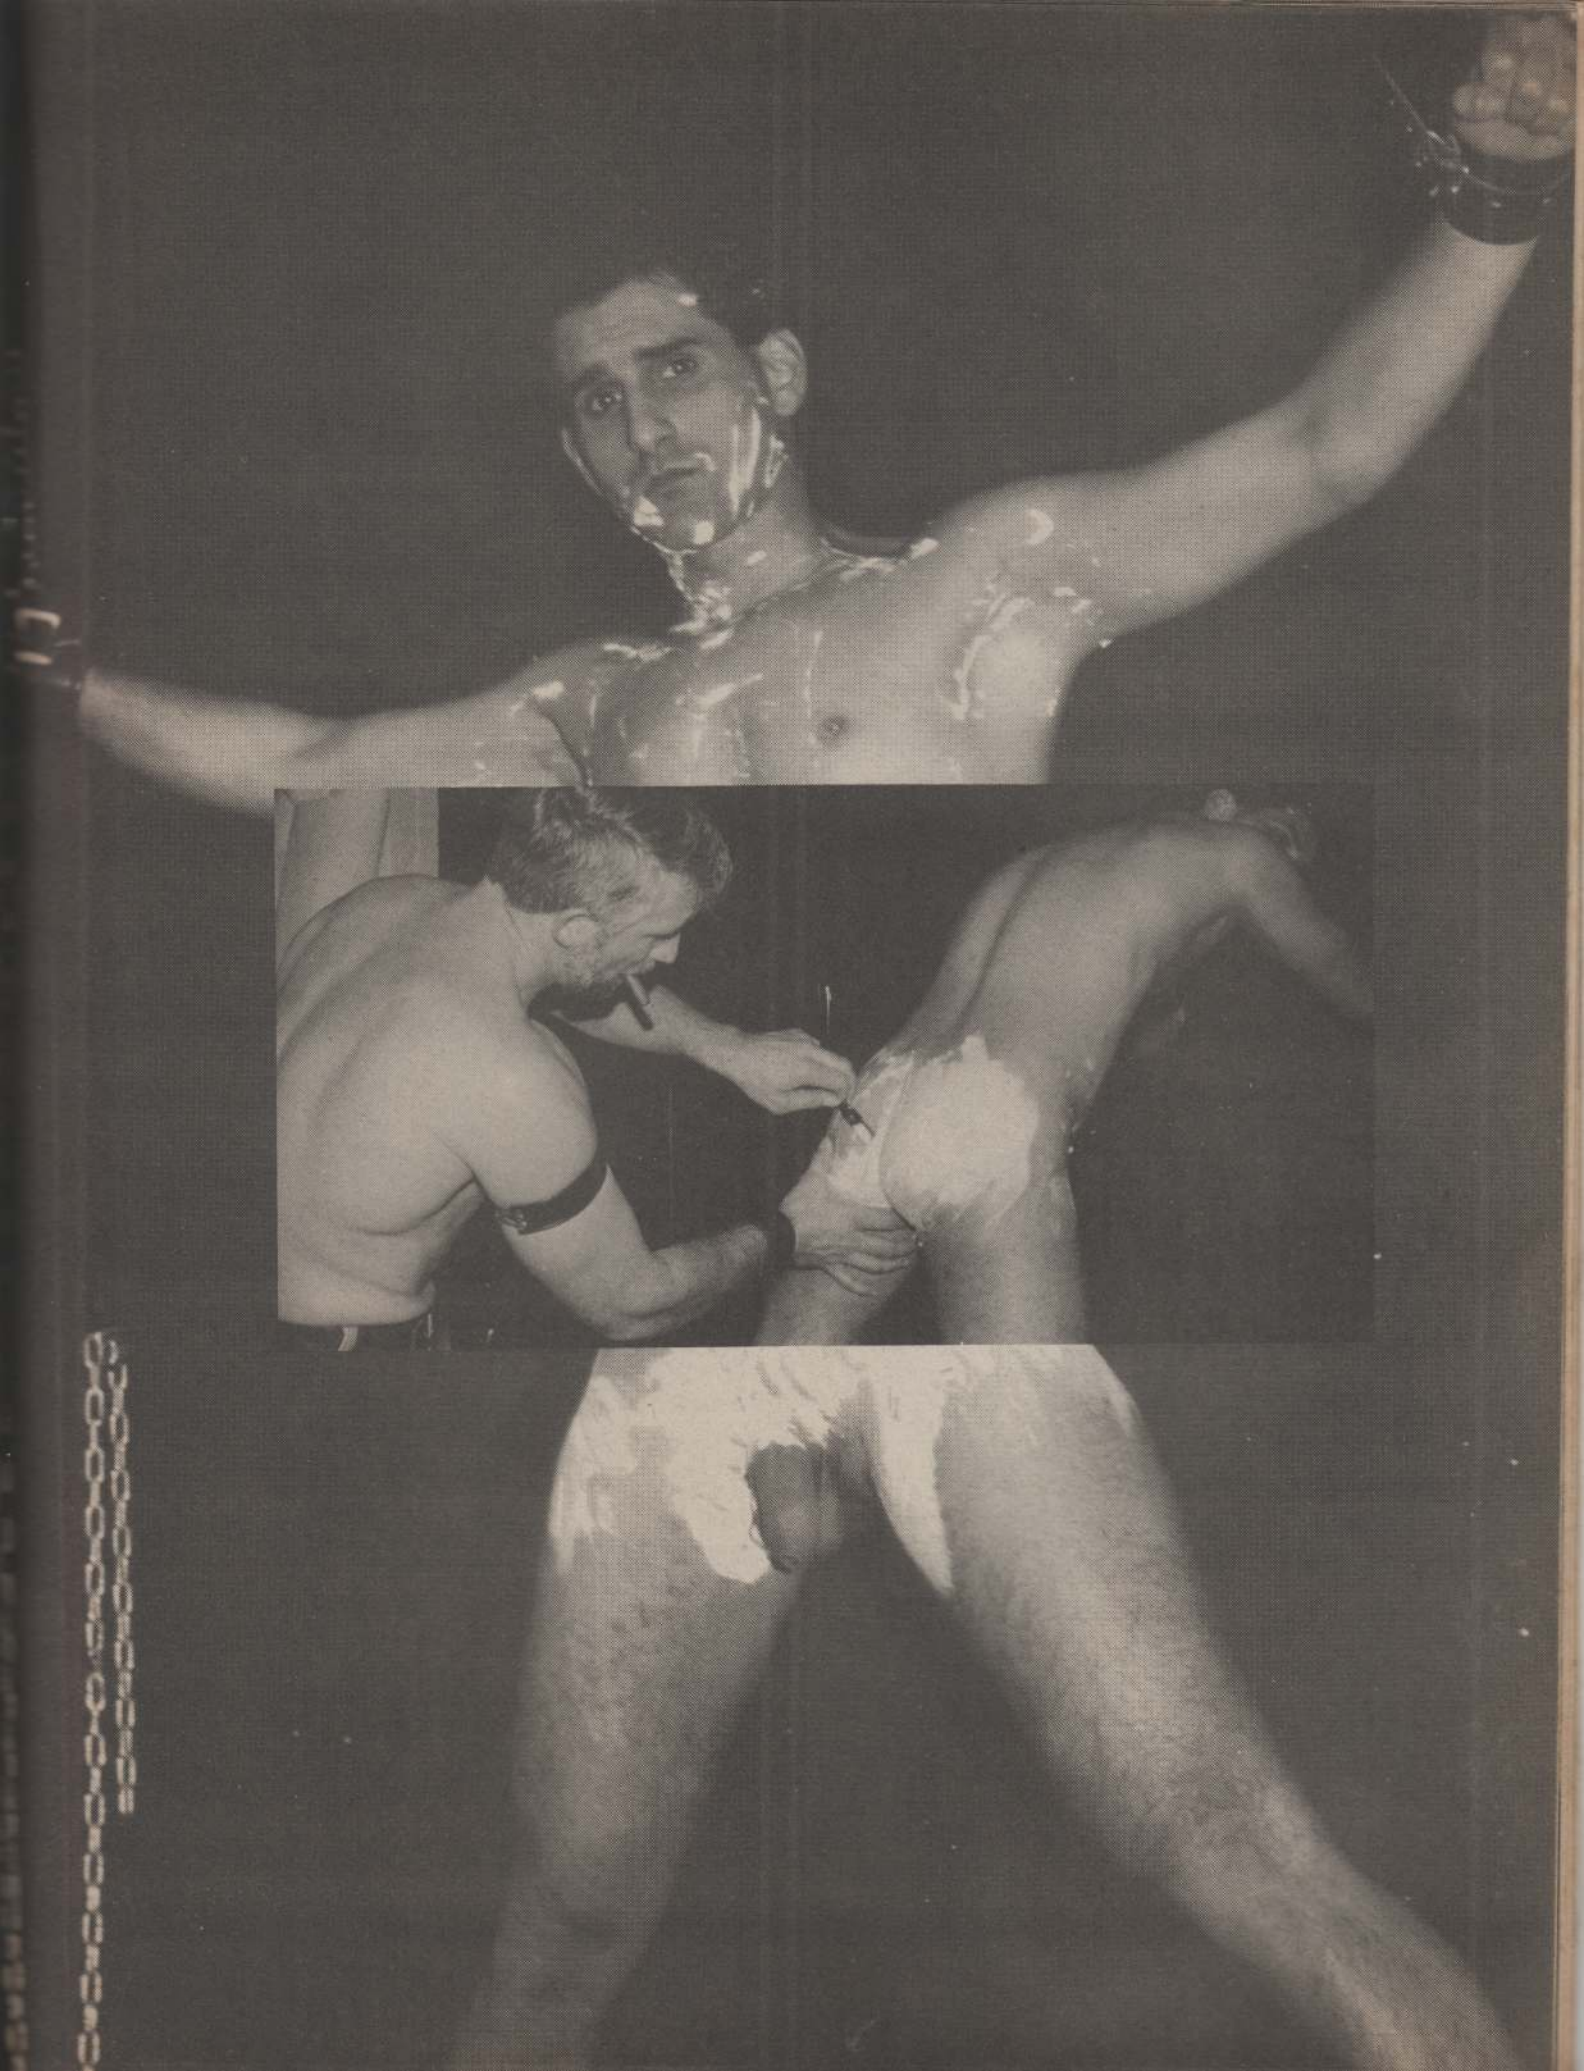

Whether you are cut or uncut, hung small, medium, large or extra large, there is a turn-on you probably haven't tried. It certainly doesn't require a partner, although like most erotica, it can be enhanced by a second person to actually do the work or at least witness the results. And if there ever was a fetish that could be considered safe sex, this is it. All it requires is a can of shaving cream, a good razor, perhaps a pair of scissors and some hair on your, or somebody else's, crotch. And ass. And belly. Chest? Armpits? Or whatever else turns you on as you get carried away with your new hobby.

But for the moment, let's limit ourselves to the pubic area. One result of a good shaving session down there is that everything in that vicinity looks bigger. You won't recognize your balls without its stringy hair and your other jewels will glisten as never before. Not since puberty will that private area look quite as powerful (or vulnerable, depending on how your mind works).

In Wings Video's movie, *MASTER BARBER*, the shaving is done in a dungeon setting with the shaves strapped to (a) stocks, (b) chain swings, (c) beams or anything else that will support and restrain them while they enjoy the barbering being done on them. Oddly enough, that shaving was genuinely spontaneous. It was during the taping of *CARE & TRAINING OF THE MALE SLAVE* when DI Ken Savage, who had one of his recruits sitting on a peg-equipped chain swing, decided the fellow would look better with a haircut. Grabbing some professional barber clippers, he gave his man a fast GI haircut then, carried away with success, started on the body. Most of the action eventually centered on the crotch area and after clipping, it all got shaved with a straight edge.

The recruit was still in shock from his haircut so it wasn't until later that he began to truly enjoy his newly hairless crotch. Ken made him drop his pants at every occasion to show what an excellent, if unexpected, shave and a haircut he had gotten as a bonus for the day's work.

Of course you can use a depilatory, like women use on their legs. There is less nicking, even a lot less work. Make sure you aren't allergic to the stuff and follow the instructions completely. The hair dissolves and all comes off in the shower afterward, then either way will start to itch after a couple of days.

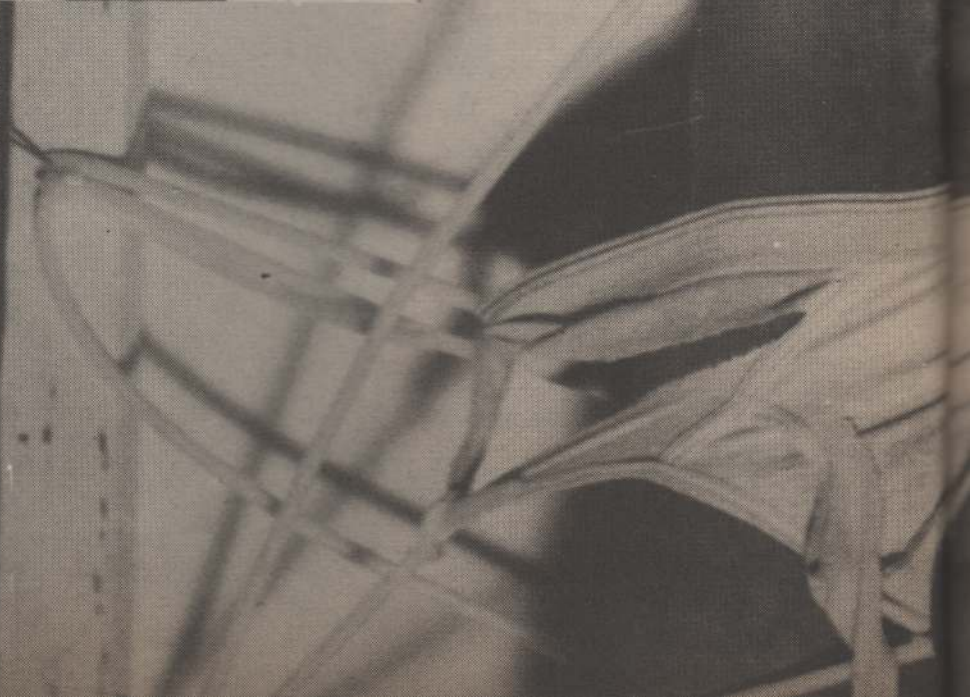

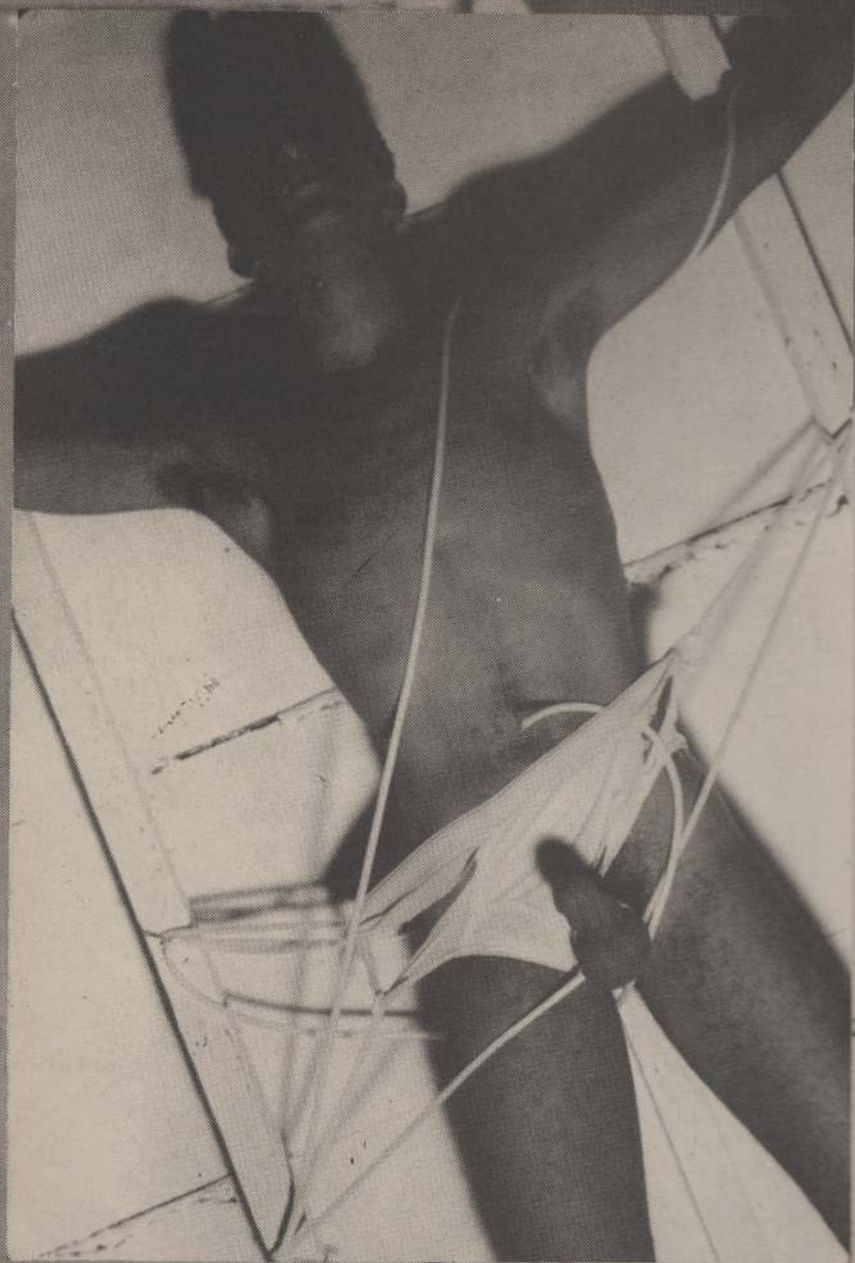

Go ahead. Let somebody give your family jewels a shave. Then there will be no hair to get in the way of the snaps of your cockring. You can become a showpiece as well, depending of course on the extent of your recently departed hair.

A no-nonsense gentleman of our acquaintance has shaved his young lover from stem to stern and delights in showing off his handiwork at every opportunity. We were having drinks at his place the other night, served by the shorn lover who was ordered to drop his pants (which, to tell the truth, was all he had on). He is well endowed, uncut with low-hanging balls. He stood before me to allow me to examine him more closely (I always pretend I am nearsighted in such cases). I ran a hand over flesh that had very recently felt the razor's edge. He was ordered to turn around and I ran the same hand over some very smooth buttocks. The result was very pleasing and while his sizeable equipment didn't really need accenting, the appearance of it shaved was spectacular. In fact the size increased considerably as he stood there for my appraisal. Obviously having to exhibit himself at his friend's whims was a considerable turn-on for him. And for me, except that my privates weren't on display, thank goodness.

His lover is so pleased by the results, physical and psychological, that he is considering having him ringed through the tip of that magnificent foreskin.

But that is another fetish and one we will have to discuss perhaps next time? □

BLACK LOVER

by Sebastian

It started out a day like any other day. A Friday in March in Manhattan. Spring was just around the corner and it looked as if it would be a beautiful day. I left my building at 75th and York for my office on the West Side of town. West 45th Street, to be exact.

I spent the morning looking at yesterday's rushes and then met a friend for lunch. Just after returning to my office around two, the sky became ominously black and then great crashes of thunder and lightning and the sky opened up in torrents of rain. In minutes the streets were flooded. Of course, no one was prepared and people could be seen ducking into doorways and whatever for shelter. You could tell it wasn't going to let up any time soon. So, I decided to brave it and run to the shuttle train on 42nd Street—that would take me to the East Side connection.

Getting a cab in Manhattan on a day like that is called "forget-its-ville." By the time I reached the shuttle I was already soaked through to the skin as was everyone else. I took the shuttle and reached the East Side platform which was, needless to relate, teeming with soaked humanity. As the train pulled in you could see that it was already packed with more humanity. The doors opened and expelled many of them but just as many more jammed themselves into the cars.

I was holding on to a center pole facing a very handsome black man. We were both forcibly squeezed together—cock to cock, hip to hip. Neither of us could move if we wanted to. As it turned out, neither of us wanted to. By the time we arrived at the first stop my cock was hard and I could feel that his was too. We both sort of grinned at each other and then we started making small talk. Then, two stops from mine, I suggested that we get off there and go to my place for a drink or two. He accepted.

Seventy-seventh street stop came up and we squeezed our way out and up the stairs. As luck would have it a cab was letting two people out at the entrance and we grabbed it. It was still pouring and we would have had to walk another six long blocks to my building. We were both shivering already.

Once inside the apartment I suggested that we get out of the wet clothes immediately. The apartment was already nice and warm and I put on the oven where we hung our wet suits on hangers to dry and, stuffing our shoes with paper and setting

them on a chair in front of the stove, we scrambled to the shower.

The hot water felt good, and before long our bodies were back to normal. We took turns at soaping each other and exploring every orifice. We pulled on each other's foreskin, played with each other's big balls. He had a good ten inches with a beautiful, mushroomed, fat cockhead that glistened when the foreskin retracted. His cock was almost the same except I only have nine inches and about six in circumference.

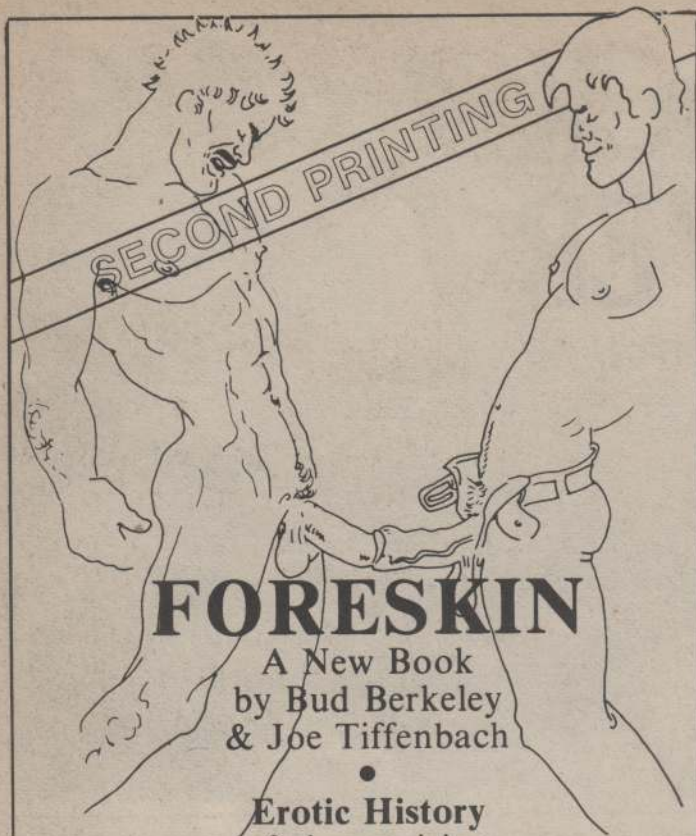

We cut off the water, toweled off and proceeded to the bedroom and my king-sized bed. I had picked up a box of poppers from the fridge on the way.

Once in bed, we soul-kissed for quite a while, rubbing our bodies together, our uncut cocks pressed together. Then, I began giving him a tongue bath from top to bottom. First, down the left side to his toes, which I sucked on, and then up the inside to his balls, licking them and sucking them into my mouth one at a time. Then, handing him a popper, I began licking his shaft and on up to the glistening, mushroomed head that was already exuding precum, which I hungrily licked up and then, pulling his foreskin forward, I began my favorite sport of chewing on it.

I took a sniff of the popper and began down the other side of him, ending up of course with his weapon in my mouth and down my hungry throat. With that we switched around in a good old-fashioned 69 and fucked each other's faces as if there were no tomorrow. Our first emission of sweet man cream came within minutes and we flooded each other's mouths and throats with what seemed like buckets. We rested in each other's arms for a while and then we decided that a drink was in order. I pulled him out of bed by his still-hard cock into the living room and made us a scotch and soda.

We sat and talked for some time, all the while fondeling one another, and every now and then stopping to lick the precum off his or my cockhead. We both had pretty much the same type of body—hairless swimmer's body—a matched pair of salt and pepper. I was very blond, and he was a beautiful ebony color.

Before we finished our drinks, we were back in the bedroom, and this time he decided to give me the treatment I had given him before and more. He was driving me wild and while I was

taking another sniff from the inhaler, he threw my legs in the air and began to eat my ass with a passion. My cock was dripping like mad on my chest and I began taking my fingers to it and putting the juice in my mouth.

After he had my ass well lubed with his spit, he slowly eased his throbbing pole into my manhole and he fucked me with a vengeance for a good ten minutes before he blew torrents of cum into me... spurt after spurt which triggered my own cock to unload all over my chest and neck and which he licked off as fast as he could. We soul-kissed some more and I could taste my own man juice in his mouth. After resting a bit again, we decided to take another shower.

After that we returned to the living room and I poured us both another drink. It was still pouring outside and I suggested that he stay the night at least, and he allowed that that was a good idea but that he would have to call home as his mother lived with him and would be worried. It seemed that he had bought one of those very old and beautiful townhouses in Harlem on Hamilton Terrace and that he had had an apartment made up in it for his widowed mother.

There was a very good pizza house in the next block, and I ordered one in. We put on some music, ate the pizza and had a couple more drinks when the telephone rang. It was my neighbor, a Scandinavian and a very famous male model whom I had told my guest about earlier. Practically the whole building was gay, even to two of the doormen. The model and I had made out several times before, which I had told my new friend Irwin about. Steve, the model was well known to Irwin from seeing him in fashion magazines and the like, and he had told me that he would love to meet him.

Steve was at loose ends and wanted to know what I was doing, and I told him, suggesting that if he was interested he could join us.

He lost no time in showing up at the door in his robe. He too had been soaked by the rain and hadn't been as lucky as we had been to catch a cab.

He came in and after the introductions I relieved him of his robe. He too was a blond and built like a body builder, with a cock very much like mine, except he had a great deal more foreskin.

I fixed him a drink and he sat between Irwin and myself on the couch. His beautiful uncut man meat rose to attention almost immediately and, surprisingly, so did Irwin's and mine. I told them to go on into the bedroom while I straightened up a little and get acquainted.

By the time I got back to the bedroom, they were in a 69 and slurping each other's beautiful pieces of uncut meat. I sat on the bed and watched for a while, playing with my own meat.

After a while they stopped and disengaged from the 69. I got on my knees between Steve's legs and went down on him while Irwin got in back of me and began to penetrate my ass again. Steve turned around and got between my legs and began sucking me as I was sucking him, and at the same time watching Irwin's huge cock fucking the hell out of me... his huge balls banging against mine.

Steve was a good cocksucker and the combination of his expertise and Irwin's and I was soon brought to the brink, as I knew they were. Within a minute or two, we all three erupted into each other. We stayed in that position for quite a while, catching our breaths and me greedily chewing on Steve's excess foreskin.

Right after that Steve had to leave. He was catching a plane at midnight for the coast as he was going on an extensive shoot in California. It was still pouring outside. Irwin and I took another shower and made another drink.

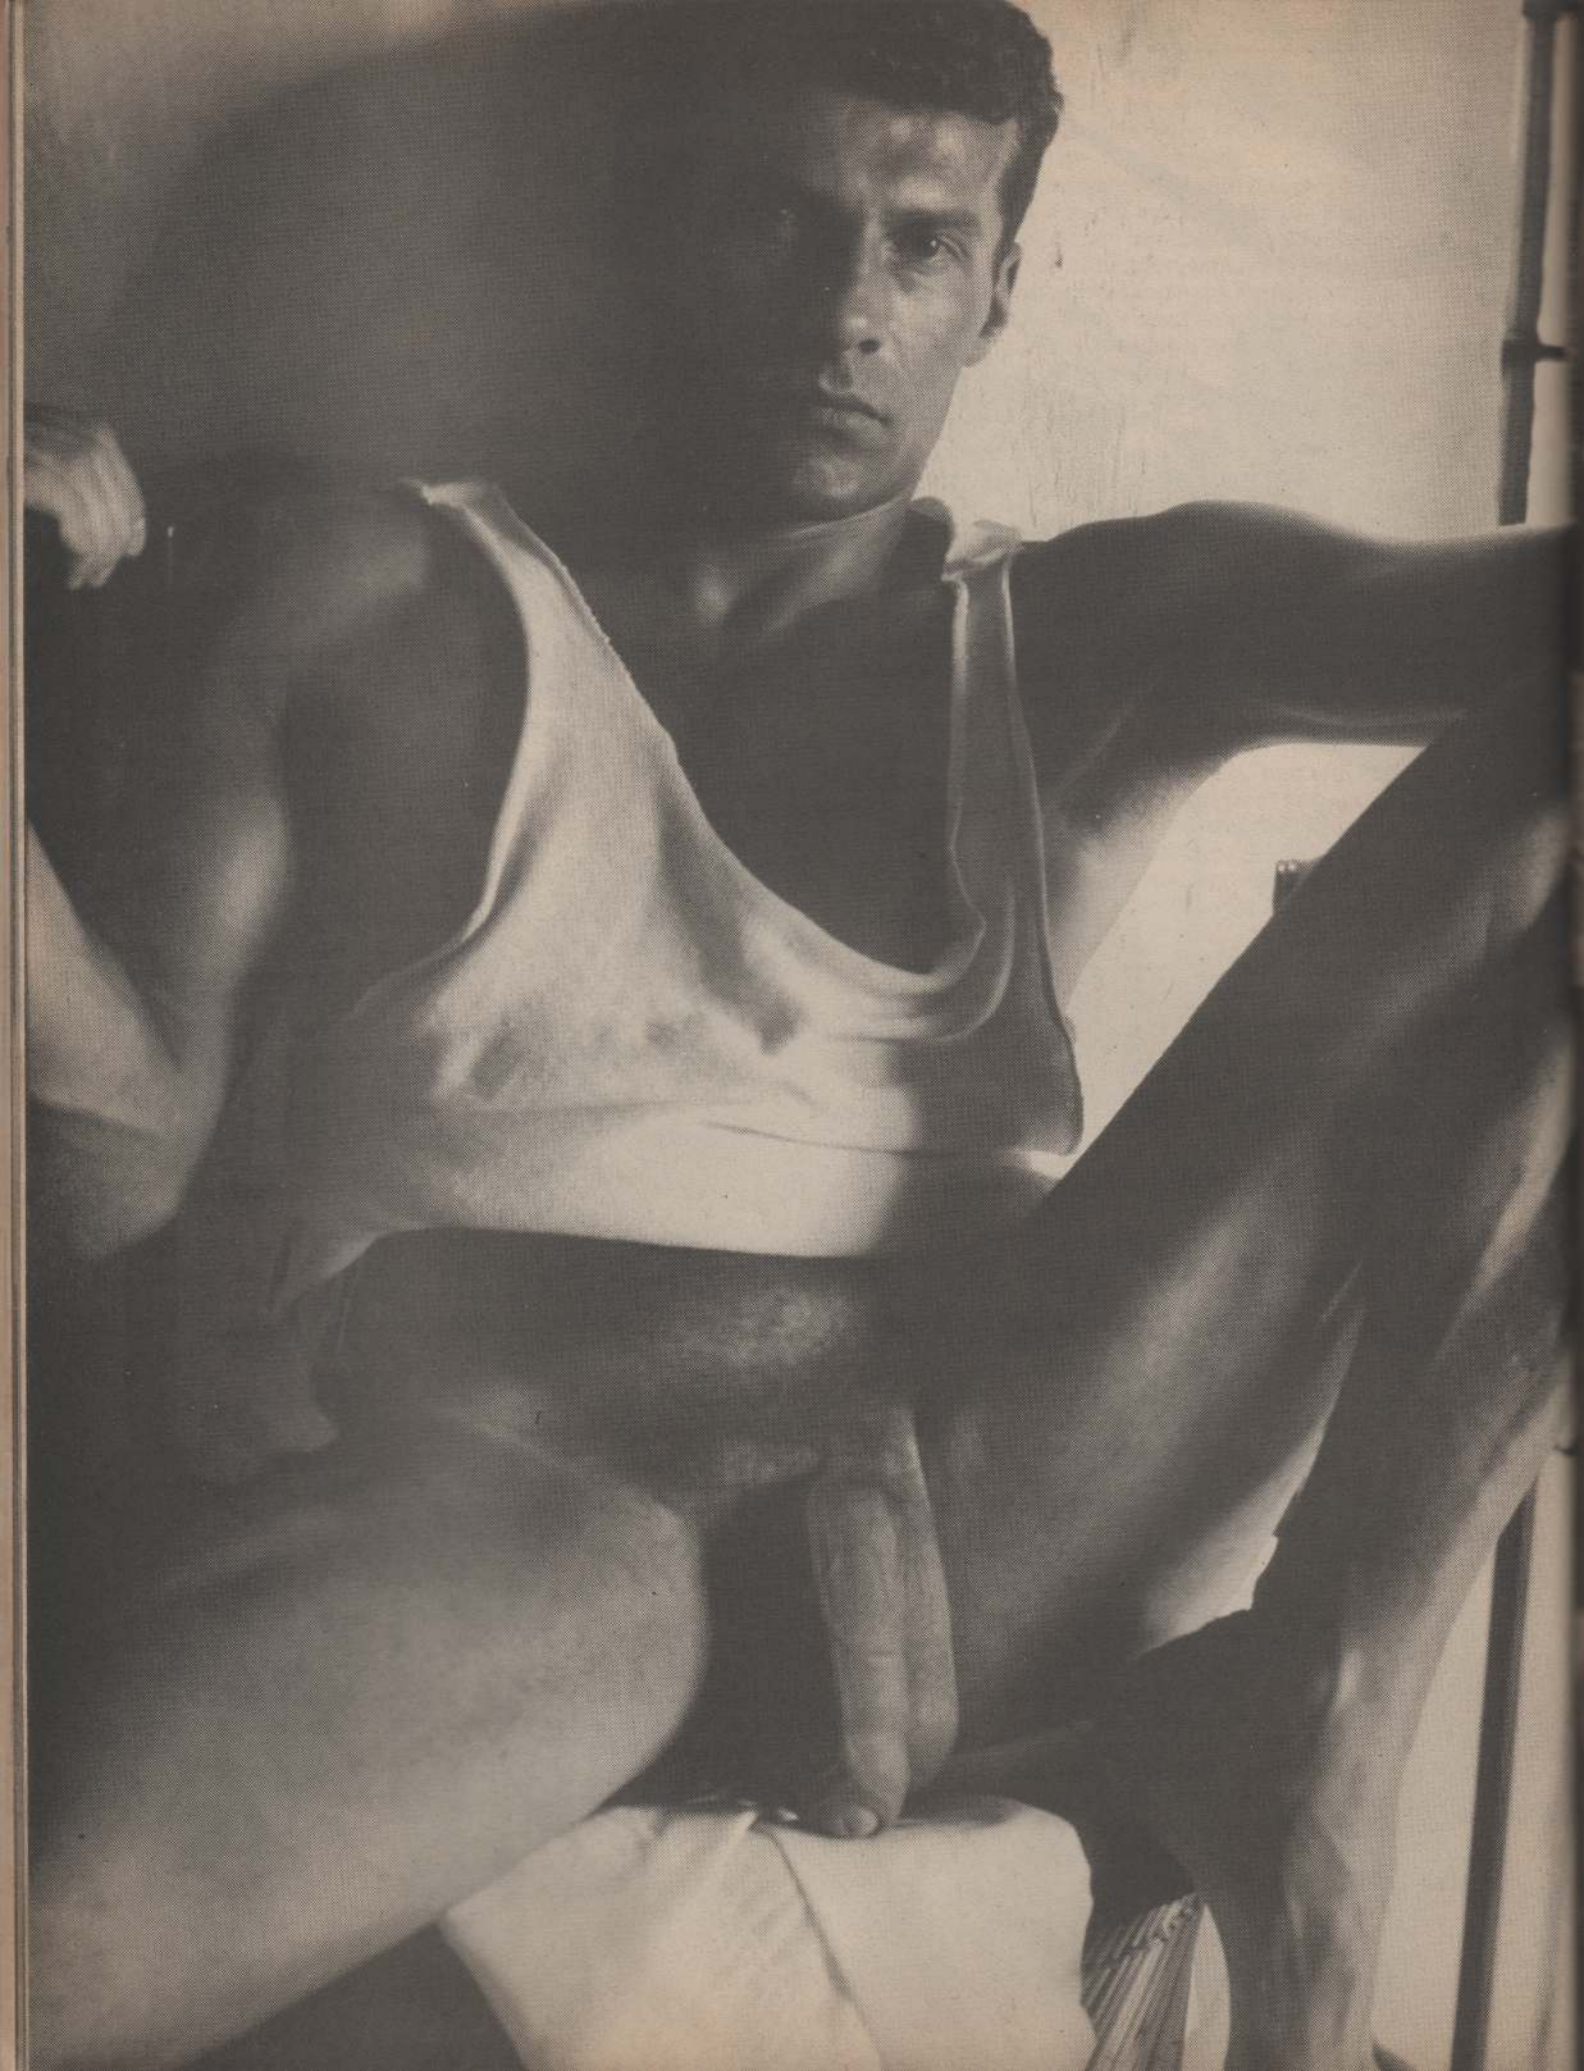

We got very little sleep that night, or for that matter, half of the next day. We were insatiable. Finally, however, the rain let up and Irwin left for home, but not before inviting me to his home for dinner and to stay with him for the night.

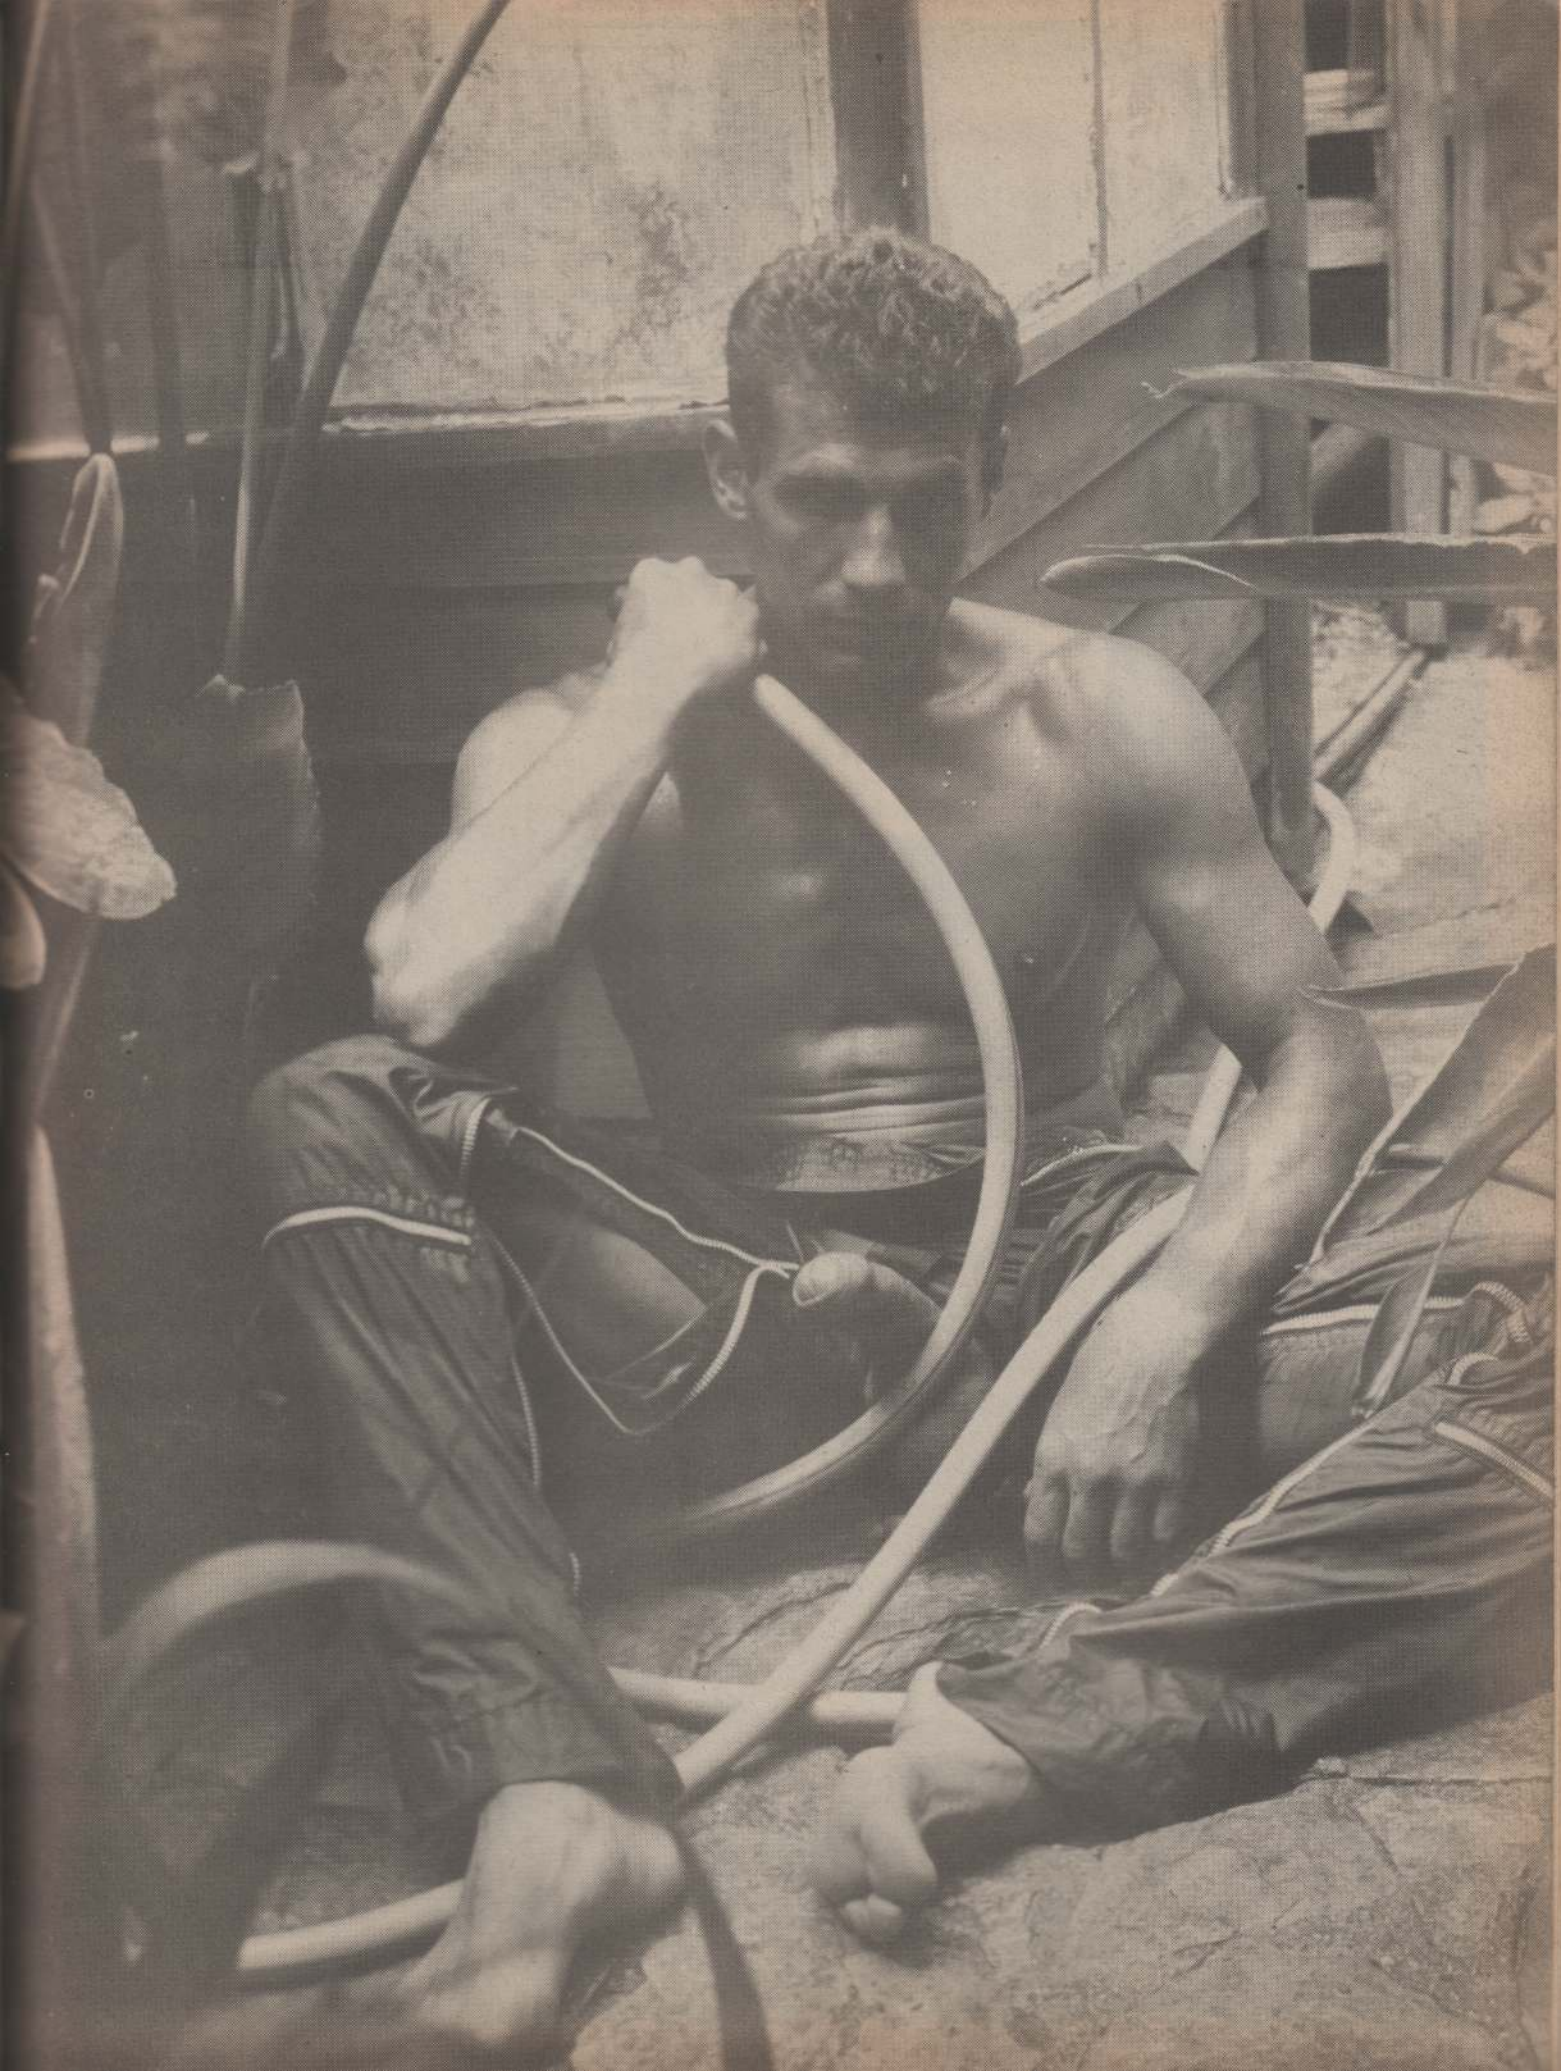

Irwin and I never lived together, but we saw each other constantly, either at his place or mine. Sometimes we had other people join us like Steve, but usually just ourselves. □

SUMMER FANTASY

by Sweet Dick

A hunk is seen driving, from the back. He has thick, sexy, blond hair, no shirt, a golden tan from his tender back and outstretched arm on the seat. His name is Alexander.

In front of Alex, say two blocks diminishing, on the right side, is a very cute guy...very well-developed pectorals with large, walnut-colored nipples, bronze skin and thick, black, curly hair.

In his right hand is a sign held up for hitching a ride. It says, "Sunny Acres." In his left hand is his very humongous and protrudent crotch, barely covered by a super-stretch nylon bikini deep pouch.

Alex felt very horny since he woke up. It was also sweltering hot. He had put on the least he had to prevent arrest. He also brought along all the conveniences as if going to the beach.

Alex pulled up beside the hitchhiker, who was still fondling his divine gift of nature. "Hi!" Alex said. "Hop in."

"Hi, my name is Mike."

They looked deep into each other's eyes, gave a very warm handclasp and they were on their way.

"My name is Alex. I'm going to the nudist resort at Sunny Acres."

"So am I," said Mike, his eyes wide open and pleased.

"You're feeling horny too, I see," said Alex, eyeing the young man's fondling.

"Being we are both nudists, you wouldn't mind if I shucked these pants off, would ya?" asked Mike. "I hate any kind of restriction on my dick."

"No," answered Alex. "Go right ahead and make yourself as comfortable as you want." Alex could feel his loose-fitting jogging shorts getting very tight and uncomfortable in the front.

Mike noticed the activity. He picked himself up slightly, bracing against the back and peeled his bikinis completely off. Mike's humongous penis shot out and straight up, once relieved of the cloth. He then rolled down the window and tossed them.

"Wow!" said Alex. Mike was extremely embarrassed by his own nudity being exposed, but it made him feel all the more erotically sexy and super-horny. He knew that disposing of any means of penile cover, he wouldn't be tempted back into the inhibition of clothes-wearing.

Alex himself knew this feeling. He also knew the more embarrassed a naked hunk could be by others' words and behavior, the more horny he would get, so he really gave Mike the treatment. Mike responded gratefully.

Mike positioned himself with his back against the door, legs as open as possible, exploiting his manhood to Alex's every optical advantage.

Mike's seemingly 50-pound penis was very soft and supple to the touch. It nestled in a thick patch of black fur. Alex knew that if Mike's penis weren't so hard, there would be a very delectable foreskin overhang.

Alex could smell the sweetness of the meat so well it burned

in his heart not to have immediate access to it. He thought to himself, "I have 20 miles to drive yet, and this dude is already got me shaking inside with hunger." Mike was starting a humping motion for Alex's benefit. Mike jutted out his jaw to offer more virile perversity—for want of a truer, more loving adjective.

Alex's eyes shifted back and forth from the road ahead to Mike's awaiting dessert. Mike took Alex's willing hand and brought it to his penis. Alex couldn't resist the gentle genital feel. His hand couldn't get enough, wishing it was his mouth receiving the treat instead. And then he stopped...removed his hand.

"We're here." There were already several man/woman couples jiggling, flopping and bouncing around. Alex parked the car before the gate. He left his shorts on, even though his penis had gotten so hard it hung—or say protruded—half exposed. It bounced as he walked to pay his fee at the office, with Mike at his side.

Mike had his wallet and his shoes on, everything else was enjoyed by the hungry eyes of all he met. "Whoooooo! Hey, sexy!" went the calls as they were seen. Mike's huge bag of balls swung left to right and around, slapping sensuously and gently against his inner thighs. He had very rounded, soft buttocks which Alex palmed as they waited in line for registration. Mike gave Alex's penis a couple of strokes in answer of appreciation. Some onlooking and very narrow heterosexuals gave the snub for it, but there were many more who enjoyed seeing the sexplay and crained their necks to see more.

Alex and Mike both received loving tugs on their meat the whole day from passing fellow nudists, and returned winks or kisses. There was plenty of hot sun to spotlight Mike and Alex as they lay together by a manmade lake. They enjoyed the sauna, had a picnic, watched some adult films while stroking their selves or each other, sometimes bowing for a lick or suck.

"Where do you live, Mike?" Alex asked.

"In Lanceville," was Mike's reply.

Alex looked at Mike very excited. "So do I!"

"Oh, wow!" they both said. The two hunks embraced tight, tasting each other's flesh with their tongues. Even their meat was getting acquainted rubbing, balling...They had an audience, which they didn't realize until they felt several fingers trying to get in on the action.

Alex and Mike bounced their cocks back to their car after the twelve-hour day. "This has really been heaven," they agreed.

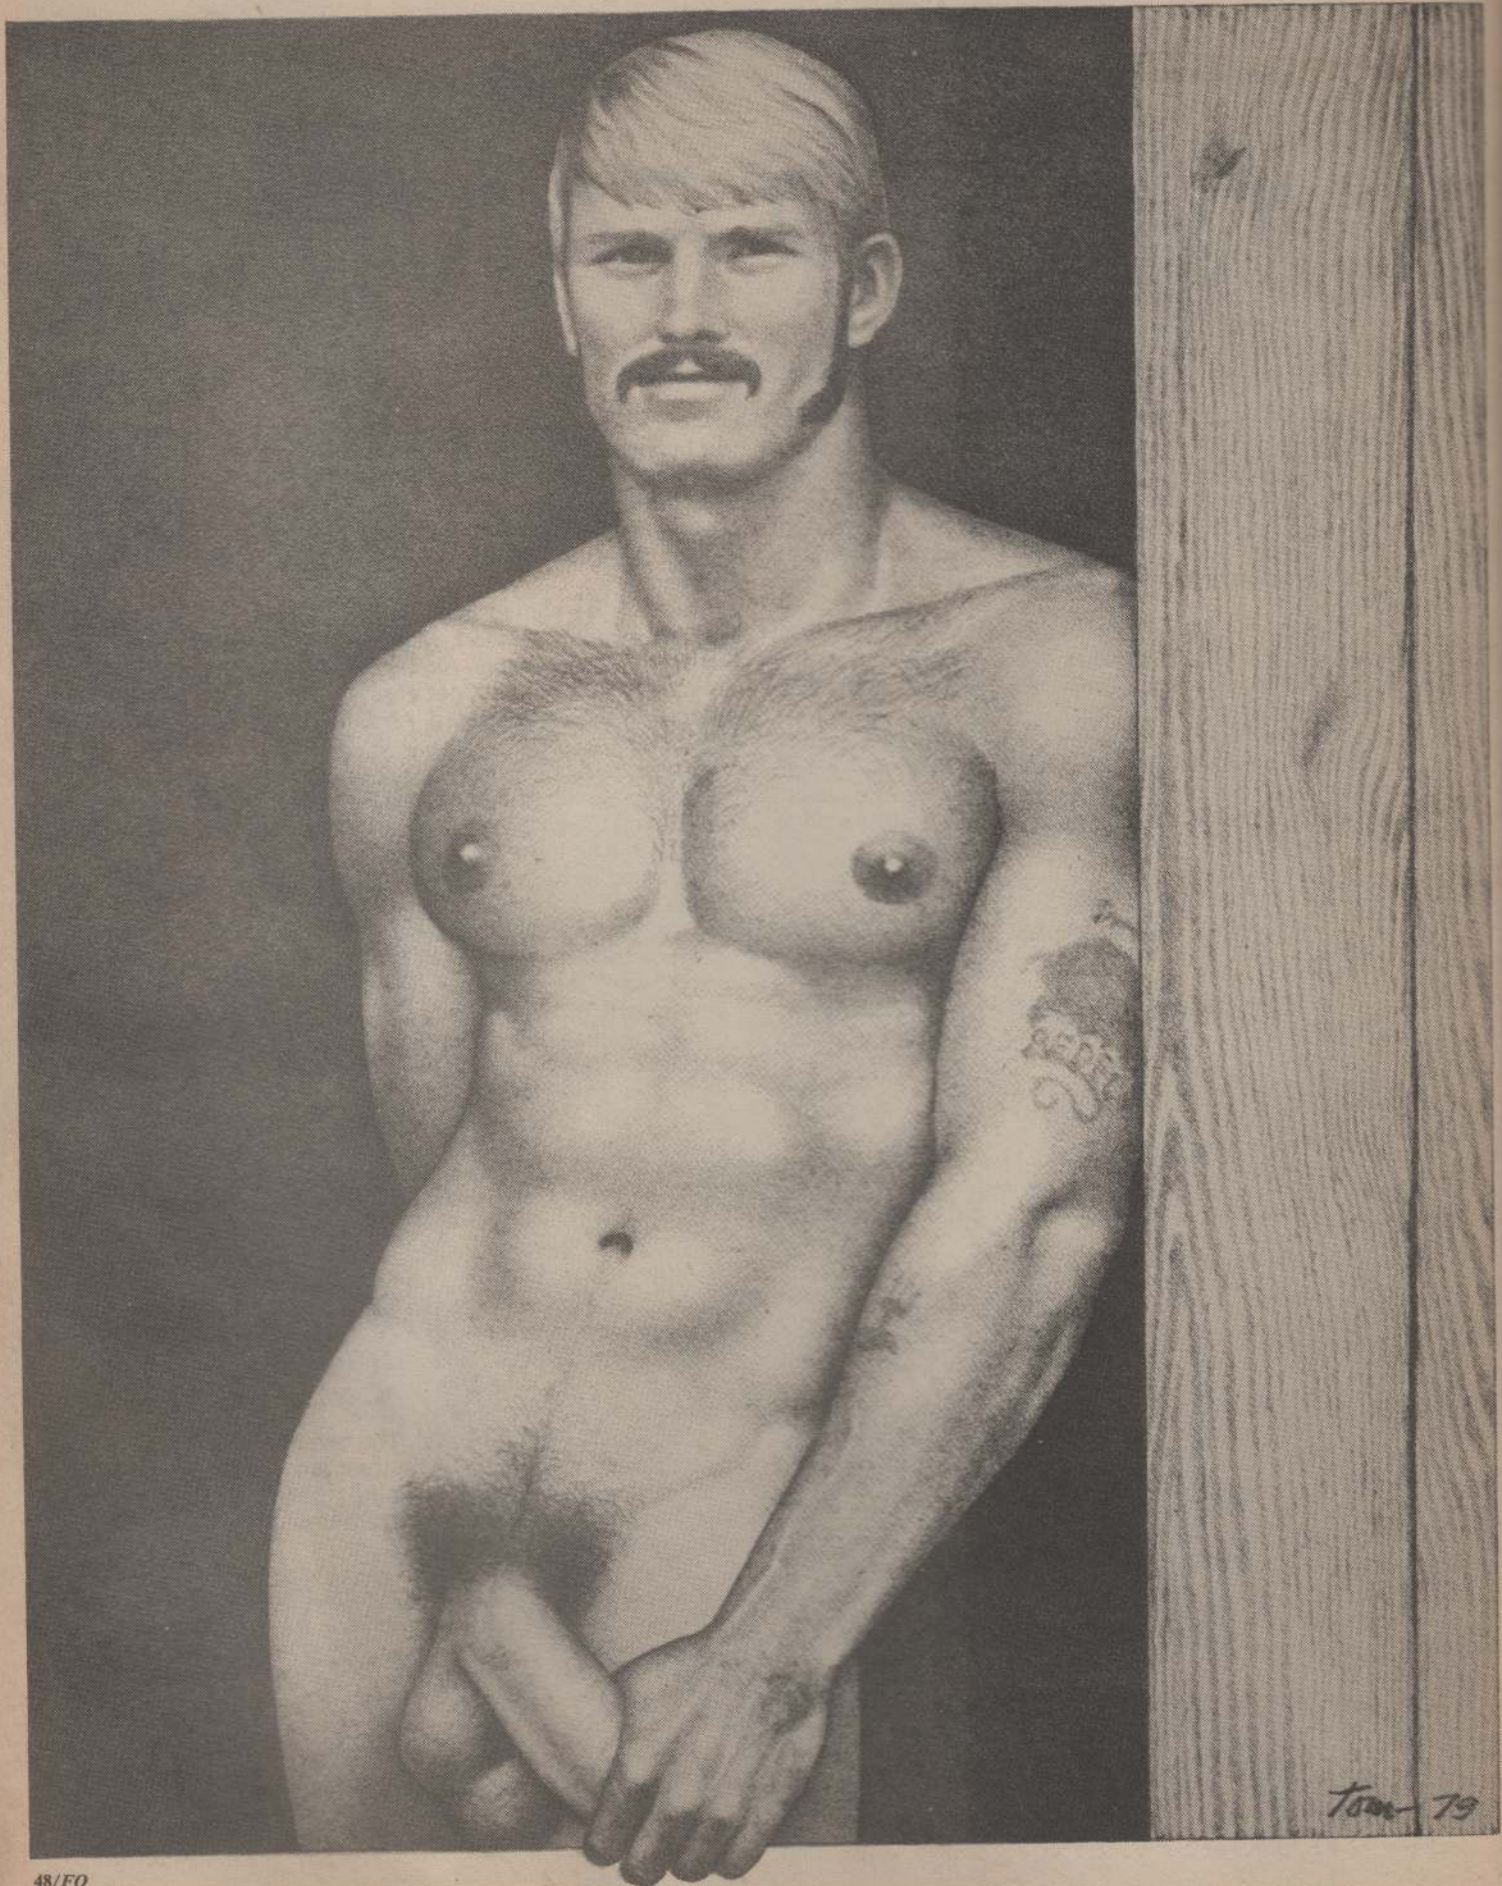

"Hell, you don't have any clothes to wear home," said Alex.

"That might be a problem," said Mike, "but it's dark. I may be able to sneak in unseen."

"Better yet, I've got this sheet we laid on. You can spend the night with me," offered Alex.

"Thanks a lot, Alex." Mike gave Alex and stroke on his penis and played with his balls. Until halfway home, they remained complete nude except for their gym shoes.

"No one will know...it's too dark." □

LONG SHOREMAN

by Michael Agreve

The biggest dick I ever worked on was attached to a guy I met one morning on New York's piers. Long before I actually walked close enough to where I could see it, I was focusing all my attention on the way his pants crotch stood out a mile from where his legs met his torso. I always was a good crotch reader. And everything about this guy told me that I was about to get a look at something that should have been in the Guinness Book of World Records. But even though he was on the piers, milling around like all the other would-be cruisers, I still decided to play it cool for a while. Instead of going over and striking up some kind of a conversation, I decided to stand around, as if I had nothing better to do than watch the barges and tugboats meander up and down the dirty river.

At least that's what I thought I'd do. But when the guy reached into his pulled-down zipper and decided to pull his wang out to take a leak, I stifled every thought of caution. The man had a genuine donkey dong; something that I had only seen a couple of times, and something that I had only had an opportunity to do something about once in my lifetime. With my own stiffer reaching up to new heights, there was no way I was going to waste any time being subtle. I had to have a taste of his prick, and I had to do it before any of the other guys cruising nearby caught sight of its super length.

So, without wasting another precious second, I sauntered over to where he was getting rid of a hot stream of cockjuice. I made sure that he could catch sight of my stiff meat, just in case he wasn't as much a piece of trade as he looked. It wasn't easy acting natural with that mammoth stiffer in my line of vision. I stared up at the cloud formations and shuffled my feet like some hick kicking shit. Then, after I saw that I was getting nowhere fast that way, I looked down directly at his half-erect piece of meat and continued to stare at the humongous rod.

For the first time, I noticed that the man attached to the meat wasn't half bad either. It was hard to figure out what the bod under the baggy work clothing looked like. But I could at least appreciate the chiseled lines of the almost-boyish face and the reddish-blond beard that looked like it had just decided to sprout. The buttons of his work shirt were open all the way

down, revealing a fine mat of chest hairs that grew around what promised to be a hefty set of pecs. But it was more the attitude in the face that got my attention. I was never one to turn on to your average gay guy. Rough trade was more my stock in trade. And this guy was as rough as they came, baby face or not. He shook the last remaining drops of piss from his oversized stiffer with the kind of cockiness that comes from knowing that you've got plenty of meat to shake the piss off of.

I imagined how he'd look standing a foot away from a urinal, with his dong almost touching the porcelain wall. That thought alone gave me goosebumps. But the fact that he was taking his sweet time shoving his meat back into his fly was turning me on even more. I smiled at him knowingly. Then I let my glance fall back onto his overripe cock.

"That's some piece of meat you're packing there."

He looked at me with a combination of indifference and disgust. It was a look I'll never forget. Just like I won't forget the way my cock started dripping lube juice the minute he stared into my face.

"I been told that before."

He was cocky in more ways than one. I guess I would have been too, if I had so much meat to display. But I kept the conversation up anyway.

"You work around here?"

I was fishing real hard for some way to lead up to the cock sucking I so desperately wanted to do on his joint.

"No. I just play around here."

He reached into his shirt pocket and drew out a cigar that almost matched his dick in length. He bit off the tip and spit it out into the water below. Then he took out a cigarette lighter and lit the cigar slowly and deliberately. He inhaled deeply, then sent clouds of acrid smoke in my direction. I held my breath until the smoke was lost in the sticky summer air.

"I'd give you a smoke but this is my last one."

I was grateful for that. I could turn on to watching some hump puff on a phallic cigar, but puffing on the stuff myself was something else.

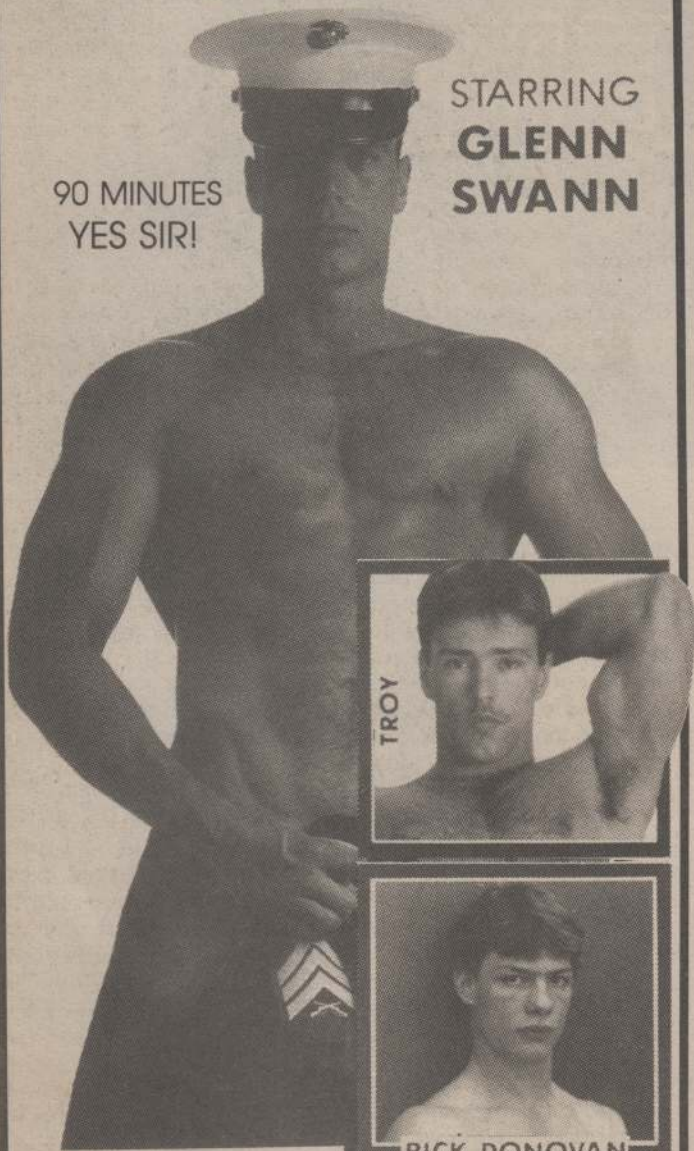

"That's okay. I never was much of a smoker... grass maybe,

but nothing heavier than that. I got other bad habits, though... lots of them."

He still hadn't reeled his rod back in. I couldn't blame him for wanting to air the thing out. But the sight of it was driving me up the wall. He must have known how badly I wanted to suck on it. But he was keeping me at arm's distance, like a cat playing with a mouse just before it's ready to pounce. Then, as I stood watching the heavy smoke curl around his well-shaped lips, he reached down to his enormous wang and started stroking the extra-long meat slowly.

"Why don't you tell me about some of those bad habits? Maybe I got some of them myself."

I took a deep breath, inhaling cigar stink as I thought about where I would begin. Then, as I watched his dong rise to heights I never dreamed imaginable, I knew that I had to let him know in no uncertain terms that I wanted one thing and one thing only. So, without bothering to think about the consequences, I reached down to where his hand met his slammer and began to stroke the rising flesh in unison with his own hand. I waited for a reaction, but he kept staring out in space passively, seemingly unmindful of the fact that I had grabbed a handful of his dick. But slowly, as an inch or two of ash began to form at the tip of the cigar, he stared down at where my hand had joined his around his cock. Then, he stared into my face with the combination of scorn and pleasure that only straight men could give you.

"Looks to me like sucking dick is one of your bad habits. Is that right?"

I felt like a kid being interrogated by one of his parents. I had been through a similar scene with my own old man. Only he hadn't given me the chance to wrap my wrist around his hefty manmeat.

"I don't call it a bad habit. It's made a lot of guys real happy."

I could see the inevitable wetness forming around the half-hidden tip of his cock. I knew that he wanted to shoot a load real bad. But I also knew that he wasn't about to let it drip into my mouth right off. It would be cat and mouse all the way, or spider and fly. And I knew just exactly who was the spider and who was the fly.

"Is that so? Well, you ain't the first cocksucker to make a play for my meat. I guess it comes with the territory. You can't have a big dick without somebody wanting to get his licks in. Ain't that so?"

There was no doubt about it in my mind. I had always been a sucker for the big boys. And this guy was packing about the biggest I had ever laid my eyes on.

"Why don't you cut out all the small talk and get down on my dick? I ain't got all day to shoot the breeze."

I half-expected him to say something about being on his lunch hour. Instead, I grabbed a handful of his stiffer and started stroking the oversized club. I could barely get my hand around it. Like so many whoppers I had seen in my day, this beauty matched itself in thickness as well as length. It started out from the base of his crotch with average thickness, though. I imagined how it would look with a leather harness gripping the heavily veined flesh. But once you got past an inch or two, the guy's dick swelled out to a fantastic girth. It was only at the tip of the extra-long slammer that it tapered back to what would have been the normal thickness for most guys. But while I couldn't help turning on to its cigarlike shape, it was the dickhead, and overlap of uncut skin that caught my attention and made my mouth water. Someone had had the good sense not to clip the sizable overhang of skin that kept the cockhead concealed in a layer of edible flesh. I knew that the thick membrane would never retract over the pisshole. And that was just fine by me. I would have to work extra hard to lick his slit. And with a couple of years of hard-earned experience under my belt, I knew that I was more than able to meet the challenge.

"If I wanted a hand job, I'd do it myself. If you don't think you can do the job right I'll give it to some other cocksucker."

His words broke my reverie. I wished that I could spend

hours staring at his clublike meat. But he was itching to get his rocks off, and wasn't going to wait until I had finished memorizing every inch of his stiffer. So, without bothering to find out if anybody was looking, I lowered myself onto my well-used kneecaps and planted my face a few scant inches from his tantalizing dong. He responded with an erection that made his joint jump up to attention. I could see his lube juice creeping slowly out of the shrouded piss slit. He would be one of those guys who lubed your mouth with slime juice before filling it with equally juicy cream.

"You know what to do with that, don't you, fucker?"

I looked up into his flushed face, realizing that he was getting off on throwing attitude at me just as much as he was getting off on the thought of the impending blowjob. Figuring that his question was a rhetorical one, I seized his stiffer with my waiting lips and supplied the answer in stroke after stroke of dick worship. He responded with puffs on his huge, phallic cigar. It didn't take a genius to sense that his stinkweed was a close substitute for the cock he would have otherwise dangled in his mouth. But with my face stuffed full with manmeat, I didn't have more than a few brief seconds for analyzing why he was feeding me his dork. I just sucked my breath and drew his rod deeper and deeper into my throat as his phymosis tickled my waiting cavity.

With the detachment of a man watching a summer rerun, he spread his powerful legs wide and leaned his rock-hard body up against the rough stone wall. He stared out at the ships moving up and down the stinking river as I rode up and down on his stiffening dong. He didn't make a sound as I lapped up inch after inch of his manhood. Only now and then did he make a motion to scratch at his thatch of crotch hairs or drop an inch or two of ash around my feet. His aloofness was driving me crazy. I tried even harder to make his dick jump as I ran my tongue up and down the oddly shaped meat. He must have known how desperately I wanted a reaction from him. But with his face clouded in dense smoke and his eyes wandering into the blue-grey river, there was no way he was going to let me have the satisfaction that comes with feeding a man pleasure.

"You better hurry it up. I gotta get back sometime today."

I wanted to worship his prick forever. I would have gladly paid him whatever he would lose in wages, if only he would just remain and feed me inch after inch of his donkey dick.

"Why don't you try putting some power behind what you're doing?"

I didn't know how I could possibly have given my cocksucking any more energy. But then, just as I was about to almost give up, I remembered the poppers that I had stashed in my jeans pocket. I took out the tiny brown bottle and held its contents up to my nose. Then, I breathed in deeply and let the fumes work their way into my brain. I handed him the bottle and he grabbed it like a kid getting a lollipop to suck on. He placed it under his nose and drew in his breath. After a few seconds I watched his face turn red and take on a look that filled me with a combination of fear and lust.

"Okay, sucker. Since you can't seem to play with that meat the way I want, I guess I'll have to teach you how to take it."

With that, he grabbed the back of my head and pushed it onto his overhung prick. He forced its full length down my throat and held it there even while I gagged on the cheesy tool.

"Now, eat it like it was the best damn piece of meat you ever had down your throat."

That part was easy. It really was the best prick I ever slobbered over. But even more than the feel of its fat nine inches was the way I was being forced to take the oversized dong. I was turning on to the feel of his rough hand pushing my head deeper and deeper onto the shaft. And the cold indifference with which he let me play out my fantasies on his prick was sending my mind into new and amazingly hot areas.

"Come on, cocksucker, chew on that meat. Treat it like the piece of sausage it is."

With that, he pushed my aching head around so that my teeth mangled the heavily veined flesh of his shaft.

"That's it, fuckface. Make me feel your mouth on it."

Something in me snapped. I started chewing on his manmeat like it was a juicy hamburger screaming out "Aren't you hungry?" at me. I bit into the long overhang of skin, not caring whether or not I left teeth marks on his uncircumcised prick. Then, with each gouge into the rock-hard flesh, I wiped my tongue over the point where I had just bit into. Slowly, the man whose dick I was massaging with my mouth began to moan and order me to sink my teeth into his dork harder and harder. His whole body came to life as I poured all my pent-up passion onto the most beautiful prick I had ever stuck between my lips. Suddenly, he was matching me passion for passion. His free hand slapped across my ass, making me bite into his dick even harder. As he hurled a heavy stream of abuse at me, I responded by gouging into his stiffer. I couldn't believe how much punishment his cock was taking.

"Come on, man. Make me feel that mouth of yours. Bite into that dick. Chew that manmeat."

I didn't need any further instruction. I reached up and grabbed a handful of balls, noticing for the first time that they had been shaven smooth as a baby's ass. There was more to this fucker than I had first thought. He could take it as well as dish it out. Without bothering to think whether or not I was hurting the fucker, I pulled on his massive nuts as I squeezed the sacs inside them harder and harder. My ass exploded as his hand came tearing across my butt. I responded by sinking my teeth into the cockhead, making sure that I let him know in no uncertain terms what his foreskin was for. We pounded each other's bodies, him with his powerful fist across my ass, and me with my mouth taking deeper and deeper bites out of his pod. Suddenly, when I thought that both our bodies would break up into shreds of raw flesh, his muscled arms gripped my head and began pounding my throat up and down on his piece of pork. I swallowed inch after inch of his dripping dick as I pulled harder and harder on his nuts. Then, as I felt his precum sliding down my throat, his body began to vibrate in a cacophony of moans and orders for me to suck harder. The half-demolished walls of the pier reverberated with the sounds of our animallike noises. Heads turned to watch us as we rutted on the remains of the once-bustling pier. Then, as the sounds of hungry seagulls pierced the air with their staccato cries, the man whose dick I held in my mouth with a deathgrip, suddenly cried out.

He had released his pent-up load down my throat. His entire body was one huge spasm as spurt after spurt of thick jism came spilling out of his hidden pisshole and came to rest deep inside my gullet. Without releasing his still emptying cock, I grabbed my meat and began pumping on its stiff seven inches as I buried my tongue under the thick, manly foreskin. He shook spastically as I rimmed the tender cockhead with the tip of my tongue, all the while pumping on my heavy-laden dick. Then, with the expertise gained from worshiping foreskin for years, I pulled the thick overhang of cockflesh down with my tongue and clamped my teeth on the juicy phymosis. I pounded my meat as I looked up at the almost unhuman dick filling my line of vision. Its owner stood with his legs spread wide. With his pod drained of its juices, he resumed his old stance. Thick clouds of cigar smoke filled my nostrils as I beat my meat to the sounds of the waves crashing against the pilings of the pier. Suddenly, a stream of hot liquid dripped out of the sides of his clamped foreskin. I let the hot liquid drip down my throat as my nuts churned up their contents. Then, as I swallowed his piss greedily, I pumped my dick to the point where it could no longer hold its contents anymore.

A thick stream of milky white jism fell at my partner's feet. It mingled with his still-dripping piss as I released the end of his oversized dick from my mouth. A pool of mingled cock juices lay at the point where my knees almost touched his heavy work shoes. I moved to get up, but one of those work shoes came down on my head, forcing my face into the still-hot mess. Lips touched cum and piss as they tasted the tangled splinters of the rotting pier. I struggled against the heavy

leather sole as clouds of smoke made my head swim.

"You messed up my shoes, asshole. . . Now, lick them off. And do a good job. I don't want to see a single drop of grunge left on them."

There wasn't much I could do. I started lapping up piss and cum with my tongue, all the while trying not to get slivers of wood stuck in my tongue. His heavy work shoe made sure that I didn't pick my head up until the leather was spit-shined. From the corners of my eyes I could see guys watching us in action. I knew that bootlicking wasn't anything new on the piers. It wasn't the first time I had gone down at a guy's feet either. But the sting of the humiliation was all the sharper as I thought of how I had chewed on his overlong meat just a few short minutes before.

"You can stop now. I guess they're about as clean as they're going to get."

I stood up slowly. Every muscle ached. But more than that, I felt my cheeks burning with shame as I realized how low I had stooped just to get a taste of another man's dick.

"I guess I ought to thank you."

His attitude was relentless. He stood only a few inches away from me with his magnificent meat still dangling way down between his legs. His cigar was down to its last few inches. He didn't seem the least anxious to roll up his humongous dick and stuff it back into his work pants. I thought about all those guys who had given a parting hug or even a rolled-up piece of paper containing a phone number. This fucker was giving nothing, not even an ounce of praise after I had spent so much time eating his dick and lapping up stale cum and piss.

"I'm gonna hang around awhile. One thing about having a big dick. . . you can let a lot of guys suck on you before it feels like you got your rocks off."

I got the hint. The shithead wanted to pass his prick around some more. Well, I couldn't blame him. I guess I'd have plenty of attitude if I had a stiffer that came close to resting on my knees. And I know that I'd want to get it worshiped from sundown to sunset. But I still couldn't help feeling like I had been used.

"I guess I better get going then."

He ground the end of his cigar into the wooden flooring, just at the spot where I had dripped spit onto his heavy soled work shoes.

"Suit yourself. It don't bother me to have guys watching while I get sucked off."

With another guy I might have been tempted to stay. There was enough voyeur in me to enjoy watching somebody else getting his mouth stuffed with dick. But as I watched my partner shake a few remaining drops of piss onto the pier, I realized that our scene had been played out. He'd find somebody else to chew his foreskin.

"Maybe some other time. I've got some more action to get into myself."

"Yeah, I guess maybe you do."

We both knew that I would saunter off back home. After I ate dinner I'd jerk off thinking about the biggest, fattest stiffer I had ever munched on. Eventually, I'd remember only the cock and its shape as it tore down my throat. His face would be just another one among the parade that passed through the piers, got their rocks off, and left. Without bothering to give any further goodbyes, I packed my meat back into my pants and headed down West Street. But before I turned to head east, I took one last look back at the pier and at the man who had come so close but remained so distant.

His outline stood in shadow against the open doorway of the pier. His wide-legged stance contrasted with the sharp angles of the caved-in building. Only one shape stood out against the darkening sky. I watched as he took hold of that shape and let it rise to its unbelievable full length. Then, slowly, I saw another shape float by. I knew that soon the second shape would swallow up the first. Before I had the opportunity to make my hunch a certainty, I turned left and headed home. At least I had one hell of a memory. □

ACTUAL SESSIONS

THIS IS FOR REAL! You might call these "outtakes" from CARE & TRAINING OF THE MALE SLAVE. During the shooting, KEN SAVAGE got carried away and decided that one of the models needed a haircut, GI style! The fellow didn't like the idea but there wasn't too much he could do about it. He loves it now and Ken had another volunteer for a head-to-toe cut and shave.
