Imagine how many millions of foreskins have hit the floor since the fall of Communism.

I'm responding to an anonymous letter that was published way back in FQ 18. It was about a Portuguese man who sacrificed his foreskin for money to buy drugs. This raised some interesting questions in my mind.

"Every man has his price," the saying goes. In the movie *The Last Emperor*, it was pointed out that several thousand Chinese men sacrificed their sex organs in exchange for sinecures. I would wager that any Mexican crossing the Rio Grande would trade his foreskin for a green card. I suspect most men would surrender theirs to save their own lives.

So, my question for your readers is: How much is your foreskin worth? It's just a little piece of skin. Most American men aren't even aware they have lost anything. I have known men who think they are not cut when in fact, they are. Doesn't it make having one more exciting, knowing that if someone named your price, you would sell out? So, name your price: \$10? \$100? \$1,000? A case of Jack Daniels? A Porsche?

Most Americans don't know that circumcision is also a common practice within Islam. It isn't done neatly during infancy, as most Jewish people do, but just before puberty. One Arabian man reported that he was done by his uncle, while standing, with his father pinning his arms behind him. During the Crusades, if a Christian knight surrendered to a Moslem warrior, he was held by one or two soldiers, while a third, his captor, did the honors. The skin was pulled forward as far as possible with the captor's scimitar passing through the skin just ahead of the glans. The captive was given the choice of having the cut there or through his neck. If he returned home, circumcision was proof of infidelity to the Church by the Inquisition, so he faced being burned at the stake. Perhaps the

neck was the better choice—better to go down fighting.

With the suppression of religion under Communism in the Soviet Union and eastern Europe, circumcision was forbidden even among Moslems and Jews. With the fall of the Soviet Union and Communist bloc, the practice has resumed. In an article in the local paper, one rabbi told of travelling around Poland with his mohel circumcising men and their sons. They would do them in groups of thirty. Imagine the shock the victims felt when they realised just how much it hurts, and for how long. Fully one third of the people in the former Soviet Union are Moslem; whole republics, such as Armenia, Azerbaijan, and Uzbekistan, are Moslem. Imagine how many millions of foreskins have hit the floor since the fall of Communism. After eight years, they must have done nearly everyone by now. Imagine all of those millions of suddenly bare cockheads rubbing on that rough, Communist-era clothing. It must feel like wearing burlap underpants!

Ouch!

How much is a foreskin worth to an uncut man? Another interesting question to ask: How much is a foreskin worth to a circumcized man? Many men are purchasing devices and even having expensive surgery to have something resembling a foreskin once again.

Perhaps I should have added this question in last issue's questionnaire to figure out the total worth of our readers' foreskins. I suspect it would be in the billions of dollars.

I've noticed there seem to be a lot of uncut Hungarian men in porn these days. Is this just my imagination?

Howard
Georgia

UR MIND?

It isn't your imagination. Since the end of Communism, Eastern Europe has become a great source for models, particularly uncut men. One-third of all pornography in Europe is now being published out of Hungary. I never imagined that the fall of Communism in 1989 would mean so many wonderful images of uncut men in the 1990's. Your humble editor here has always seemed to have a thing for Hungarian men anyhow.

As a female lover of gay porn, I'm very happy with your magazine. Do many women read FQ? I love the cocks in their natural state. Reading your magazine inspired me to join NOCIRC. I'm now on a mission to fight circumcision.

Let me also say that T.J. Donovan took my breath away. He's got the most beautiful cock I've ever seen. But then again, your publication always has the most beautiful men!

Diane

I'm often amazed by the wide variety of folks who read our magazine. We do, indeed, have a few female readers that I know about. I'm grateful that the issue of circumcision gets a wide audience, and I appreciate your efforts to spread the word.

Thank you for the opportunity to express my opinion in your FQ Questionnaire.

I was born in Ireland and maintained an intact foreskin without complications until my parents moved to America. At the age of nine years, American doctors convinced my parents that American boys shouldn't remain as made by God and nature. They told my parents that the foreskin was a disgusting, dirty, dangerous item and should be amputated and discarded. My poor, rural parents thought American doctors knew all and allowed this mutilation. In Ireland in

The image shows the cover of the 28th issue of Foreskin Quarterly. At the top left, the logo 'FQ' is displayed in a large, stylized font, with 'FORESKIN QUARTERLY #28' written below it. The central focus is a black and white photograph of a man, Jackson Reid, who is shirtless and looking directly at the camera. He has a serious expression and is wearing dark pants. Below the photo, the name 'Jackson Reid' is printed in a large, white, serif font. In the bottom left corner of the cover, there is a small graphic of a magazine cover with 'FQ \$6.95' and 'ADULTS ONLY' written on it. In the bottom right corner, the text 'Kent's Uncut Masterpieces' and 'Kristen Bjorn's Manwatcher' is written in a white, serif font.

particular, and in all of Europe, such atrocities are nearly unknown. This common American practice has had a terribly deleterious effect on my life since. I have been using stretching techniques for over ten years now to try to regain some similarity to normalcy. I am embarrassed when back in Ireland or other European countries to show my mutilated, scarred penis in the baths, saunas or clubs. Ireland has no legalized gay life, and saunas, bars, and clubs are popular, especially in Dublin. The Irish view amputation of the most personal, private, intimate part of a boy to be criminal, and to be avoided at all costs. They cannot, as I, understand why Americans allow

and perpetuate such brutal and inhumane abuse.

Testimonies like yours, I hope, will make parents reconsider circumcising their sons. Thank you for sharing your sad story.

I just got my issue of FQ 28. Jackson Reid is fuckin' hot! These are the kinds of men I'd like to see in FQ in the future.

Keep up the great work! I really love the direction your magazine is going!

ED'S SHED

FICTION BY MICHAEL GRAYDON
PHOTOGRAPHY COURTESY OF LE SALON

Working summers in the family lumberyard dropped me squarely into the world of real men. Unlike the buffed brats popular today, these guys had bodies hardened by work, not work outs. Hairy, tanned and sweat soaked, with worn faces and hands, these were workin' men. With dozens of Italians, Portuguese, Greeks, and French Canadians humpin' wood all over the yard, there was plenty to see. Add to this the occasional fair-skinned Irish and Scandinavian, plus men of all shades, and I had fodder for jack-fests every lunch hour and coffee break. Though I'd drop bone-tired into bed, one "bone" insisted on one last stroke. Doesn't every 18-year-old's cock demand this much attention?

Beards and bellies were common, and a few guys were really stacked. They all had solid arms and legs, nice square butts, and weathered hands I craved on my ass. Summers meant most went stripped to the waist, wearing only cut-offs and boots. Meaning, I often saw a one-eyed snake hanging out or a pair of bull nuts that had swung loose.

Like most “men only” places, guys were forever goosin’ each other and horsing around. Nobody was shy about takin’ a whizz where they felt like it. More than once I’d been talking to a guy and seen him haul out his hog to piss right there.

After weeks of mind-numbing work at the band saw cuttin’ 2x4’s into 1x2’s, I begged my dad for a break. Anything to get away from that screaming machine: see the yard, and (hopefully) see more guys.

Garbage detail wasn’t exactly what I had in mind, though.

Monday morning I got the keys to an old tractor and wagon and was told to “clean the yard.” Scrap lumber, metal bands and junk lay everywhere, and I had to haul it to the yard’s dump. If not for getting to choose where to work—usually, in proximity to a guy I wanted to check out—and finding the odd porno mag, I’d a’ begged to be back in the saw shed.

The rail siding at the yard’s far end was the worst. Even train crews dumped their shit there. Lucky for me, however, it was there that Ed worked. As yard carpenter and tool sharpener, he had a place to himself, a space designed to fit his needs. In every way.

That morning I parked out front and walked in to say, “Hi” before heading ’round back to start cleaning up. After several summers bustin’ my ass as hard as any, I’d been accepted. No longer the

“boss’s son,” Ed gave me a warm greeting, nearly shaking my arm off in the process. Like most guys, Ed was deeply tanned, with a weathered look. Just over six feet, he had a few inches on me, but about a hundred pounds more meat. Tall yet stocky, he was just the kind I liked. Now in his late forties, hair going gray, his ’stache remained jet black and bushy. After years of work, he had a good build, not too defined, but solid as the steel blades he sharpened.

“Glad you’re around, kid,” he said, “gets damn quiet this end.”

“Yeah,” I said, “I’ll be around a week or so. Sorry to say this, Ed, but you must have the biggest pile of crap in the whole yard behind your shop.”

“I should,” Ed laughed, crossing the floor to pull open the rear door, “all I do is toss it out here.”

Pulling the door closed, I saw he’d screwed on a wooden plate on the interior side. Once closed, it swung downward, revealing a neatly cut hole in the door.

“What’s that for?” I asked, pointing.

“That’s my indoor/outdoor plumbing,” he said with a grin. “If I gotta piss, I just stick it through there and let go. I ain’t gonna haul ass up-yard to piss.”

The image of Ed’s meat hanging out back filled my mind only slightly faster than it filled my cock. Shifting nervously to shake the drops of piss... I mean, shake the image from my mind, I turned away, saying, “Well, I better get started.”

With a slap on my ass, Ed said, “Take ’er easy... come have lunch with me, and oh, yeah—if you’re gettin’ wet, it may not be rain.” Ed’s deep laughter followed me out as I hopped on the tractor. Moving down a ways from him, I rounded a wood stack. Once behind, it was all I could do to yank down my fly and haul out my drooling, uncut dick before shooting. The image of Ed’s dick pissing, that slap on the ass, put me over.

Flickin’ the jizz from my fingers I pushed my bone back in my shorts. Jizz hung in ropes from the plywood. My dick pulsed—ready again. Down, boy, I thought.

A few hours later I’d ’bout filled the trailer. Heading around the stacks to see if I could find anything else, I looked down towards Ed’s shed.

A QUICK KNOCK ON THE WALL AND HAULING OUT MY MEAT, I STOOD THERE

Even at 20 feet away, the sound of Ed's pissing hose could be heard. Halfway up the back door I saw his meat hanging out, piss flowing in a steady stream. Fuck, I thought, a river is more like it. Standing there, meat trussed up around my sweaty nuts, I watched as the flow slowed, spurting a few times and died. Ed drew back inside.

"Shit," I said aloud, "I wonder how many times a day he does that?" My dick throbbed, hoping it was plenty.

Over the next days, I worked down towards Ed. Loading the trailer, I "unloaded" more times watching Ed piss. As I got closer I got better views of his meat. Even at a distance I could tell it was one meaty prick, and uncut too.

Sometimes he'd piss with the skin forward; piss streaming out the folds. Other times the skin would roll back, showing a greasy knob. Watching that dick in action, I tried different names on it: dick, dong, rod, prick, snake, bone. Dick and bone fit best.

The morning I knew I'd start working behind his shed I shot twice before work—once humping the bed as I awoke and again in the shower, soapy finger running in and out of my butt.

"Well... I'm ready to clean up your shit, Ed," I said over coffee and donuts.

"So you're 'bout done, eh?" Ed asked.

"Yeah," I said, "then I work my way up-yard."

As I headed out, he said, "I'll give 'er a knock before takin' a whizz. Wouldn't want you gettin' all wet," laughing all the while.

Wet, I thought, I'm wetting my shorts all day 'cause of you!

Collecting years of wood, metal and garbage kept me occupied, busy enough that when I heard the rap on the back wall, I wondered what it meant.

I was about five feet away when Ed's dick slid out. The skin hung heavy over the knob, as it stretched downward. It sure was fat. Veiny and dark skinned, it filled what must have been a four inch hole easy.

Fat and full of piss, Ed's dick twitched, starting the flow. Pouring out his foreskin, the piss stream flowed strong before drying up. After a few squirts that made his cock jump, it stopped, and... nothing. It just hung there, dripping.

After a few seconds I went quietly closer. Leaning forward I got a look and a good whiff. Man, it smelled good. Uncut myself, I could appreciate the smell of blind meat. The skin was thick and rubbery, hanging well over the knob and ending in a dark, glistening opening.

Ed's bone jerked once and... started to fatten out! The shaft thickened, sending the big warhead forward. Bending closer, I was mesmerized as his piss slit emerged from between the folds. The gaping, wet opening begged to be... Ed pulled it back inside and closed the hole.

Frustrated, I stood frozen to the spot. Ed's bang on the wall signaling all clear, brought me around.

An hour later the scene was repeated. As soon as I heard the knock, I moved close. Standing right by the hole, I saw a sight better than any porn mag as Ed's meat slid out, skinned back this time. The knob was a bloated purple, with a high, proud ridge. It looked greasy and wet. With a hard jerk, his slit widened and piss poured out. Putting out a tentative hand I let it splash on my fingers, shocked at its heat.

Once again after finishing, it hung there, slowly filling out. This time it stretched out farther, the shaft pressing against the walls of the hole. Bending down to within inches I breathed deeply from his meat. The smell of sweat and raunch hung over it as my tongue instinctively moved out. My tongue within range... Ed pulled back. I heard an audible grunt as Ed struggled to get it back through the hole.

With my cock hard and leaking bung hole twitching, Ed banged the wall, shouting, "All clear, buddy!"

OUT IT CAME; HEAVY AND FULL. ANXIOUSLY... WAITING. AND... NOTHING.

He knows I'm back here, I thought. Maybe the breeze makes it stiffen up. Does he want me to see it?

After emptying the trailer up-yard, I took back Cokes for us. Over lunch we shot the shit about work. Ed gave no hint anything was going on.

Without breaking our conversation he causally went to the door and opened the hole. With his back to me, he squatted slightly, fishing his cock of his pants, and fit it through. Fighting the urge to run out back, I said, "Uh... today's the last day for me," I said. "This end's 'bout done."

Turning around, Ed put his dick in his pants and zipped up. He didn't let it hang there this time, I noted.

"All done, eh... too bad. It's been nice having a buddy around. Guys only come here when they want something... otherwise nothing. Don't forget to say 'bye 'fore you head out," he said turning back to work.

Heading 'round back, I hoped I'd see Ed one last time. I didn't have to wait long.

A quick knock on the wall and out it came; heavy and full. Hauling out my meat, I stood there anxiously... waiting. And... nothing.

It just hung there, skin bunched over the knob. Putting out its own heated smell, it remained still. Dick oozing, nostrils flaring, I thought, come on, Ed, what are you waiting for? Let it fly!

The floor creaked as Ed shifted his weight. More of his meat emerged from the hole. If the hole had been bigger I'm sure his nuts would have followed. This thing must be a good five inches soft, I thought—'til it got bigger, which it did.

Quickly Ed's dick lengthened out, the shaft darkening, its veins filling up. Spreading to completely fill the hole, it jerked, rolling the skin back. The heady smell of unwashed, sweating bone hit me hard.

Straining, it arched upwards, piss slit opening and closing. Fuck, I thought, this thing breathes on its own. Dropping my shorts and jockeys, I stepped out. Dick in hand, I moved directly in front of Ed's prick. Because the shed sat on a raised platform and the ground behind it sloped down, my face was practically level with it.

After a shudder I could follow from base to tip, I watched the slit spread open for a glistening drop of precum. Sliding forward, the drop grew heavy before falling onto... my tongue. Its salty slickness coated the inside of my mouth.

With a movement perfected on my best buddy's cock, I opened my lips and swallowed the bloated knob in one gulp.

Having forced the skin back to expose it, I locked lips over the ridge. Moving my tongue over the knob I then dug deeply into the slit. The salty juice flowed out over my tongue and down my throat. The sheer heat of the cockhead was amazing.

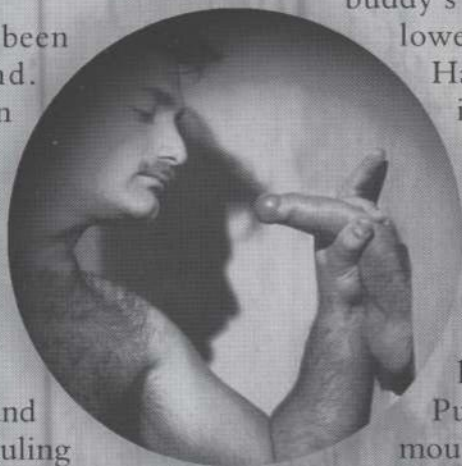

I heard Ed sigh. "Yesssssssss," he hissed as the door bulged outwards.

Pushing more cock into my hungry mouth, I breathed out, opening my throat to take in as much as I could. Proudly, I knew this was quite a bit; my best buddy had a nice long one. But Ed's was way fatter.

Ed's cock grew steadily stiffer, wider, filling my throat. Gasping, I pulled back to slather the exposed knob with my tongue. Digging deep into his slit, I sucked hard, mining it for juice. Wrapping my free hand around it (my fingers barely met), I squeezed, milking it.

Bringing the skin forward, I docked it over my nose, tongue working underneath to torture the sensitive ridge. With its streaming precum, my nose was soon covered in clear goo.

I felt Ed trying to pull it back; no doubt preparing to plunder my throat. Pressing my mouth down, I followed his meat, vowing to take it all. Ed winced, the skin catching on the wood. Pulling off, I saw it was so swollen it couldn't possibly

"EASY KID," ED SAID, "SLIVERS WOULD BE HARD TO EXPLAIN THE WIFE."

be pulled back. The hole was a hell of a cockring, I thought, one with slivers.

"Fuck, kid," he gasped, "it's stuck. You'd better leave off... let it soften up some."

There's only one way you're goin' soft, big guy, I thought, plunging onto his cock. Concentrating, my throat flowered open to the max, allowing his length inside. Ed grunted in response, threatening to break the door with his weight. With my nose pressed against the door, my tongue swirled around the base. My throat worked his knob. Drooling a mixture of spit and precum, I set up the best suck-action I knew how.

"Okay, fucker," Ed yelled, "if that's what you want." With a audible crack I heard Ed slam hard against the door, forcing the final inch home. Now I grunted in response, my throat fucked full.

Waiting 'till I virtually saw spots, I pulled up. Working my foreskin over my own fevered knob, I drew Ed's between my teeth. I'd dart my tongue between the folds, into the piss slit. Finally, I pressed deep, wedging it inside to tongue fuck it.

"Jesusssssss," Ed sighed through the door.

With a jerk, Ed's knob pushed into my mouth, my tongue relentlessly working the slit. With his skin pushed back, my lips locked over the exposed ridge. Ed's dick bulged, the door shook, and the slit widened as Ed let go.

Hot, salty jizz pulsed out. Thick gobs of cum slid over my tongue, five or six jets at least. Having filled my mouth, Ed sighed in pleasure at feeling his own cream bathing his meat. What didn't fit in my mouth or slide down my throat, poured out; landing bull's eye on my own slick knob. Covered with hot, gluey cum, my dick finally gave up. My balls

emptied onto the door, my boots and the piss soaked ground beneath me.

Ed's dick lurched one last time, a thick strand of cum flowing onto my tongue—one last shot of the white stuff to savor. Probing the slit for more, Ed yelled, "Enough... you got it all, you little cum-hound!"

Pulling back, I let his knob fall out my mouth. The weight of his cock made a soft thud against the wooden wall. Soft enough to pull it back, I reached out a cum-slick hand to lift it up and into the hole. "Easy kid," Ed said, "slivers would be hard to explain to the wife."

Stepping back, I brought a hand up to lick the cum from my fingers.

Maybe I am a cum hound, I thought—for Ed's anyway. In mid-lick, the door opened out to reveal Ed, work pants around his ankles. His heavy, drained cock hung out over bull nuts. The whole package surrounded by dense, matted, sweaty hair and framed by slab-like legs.

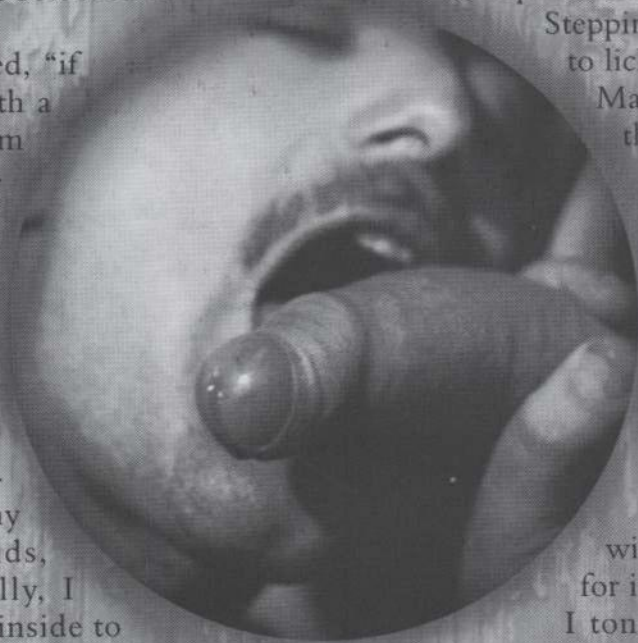

"Holy shit, kid," Ed said with a grin, "you're a real pig for it, aint ya?"

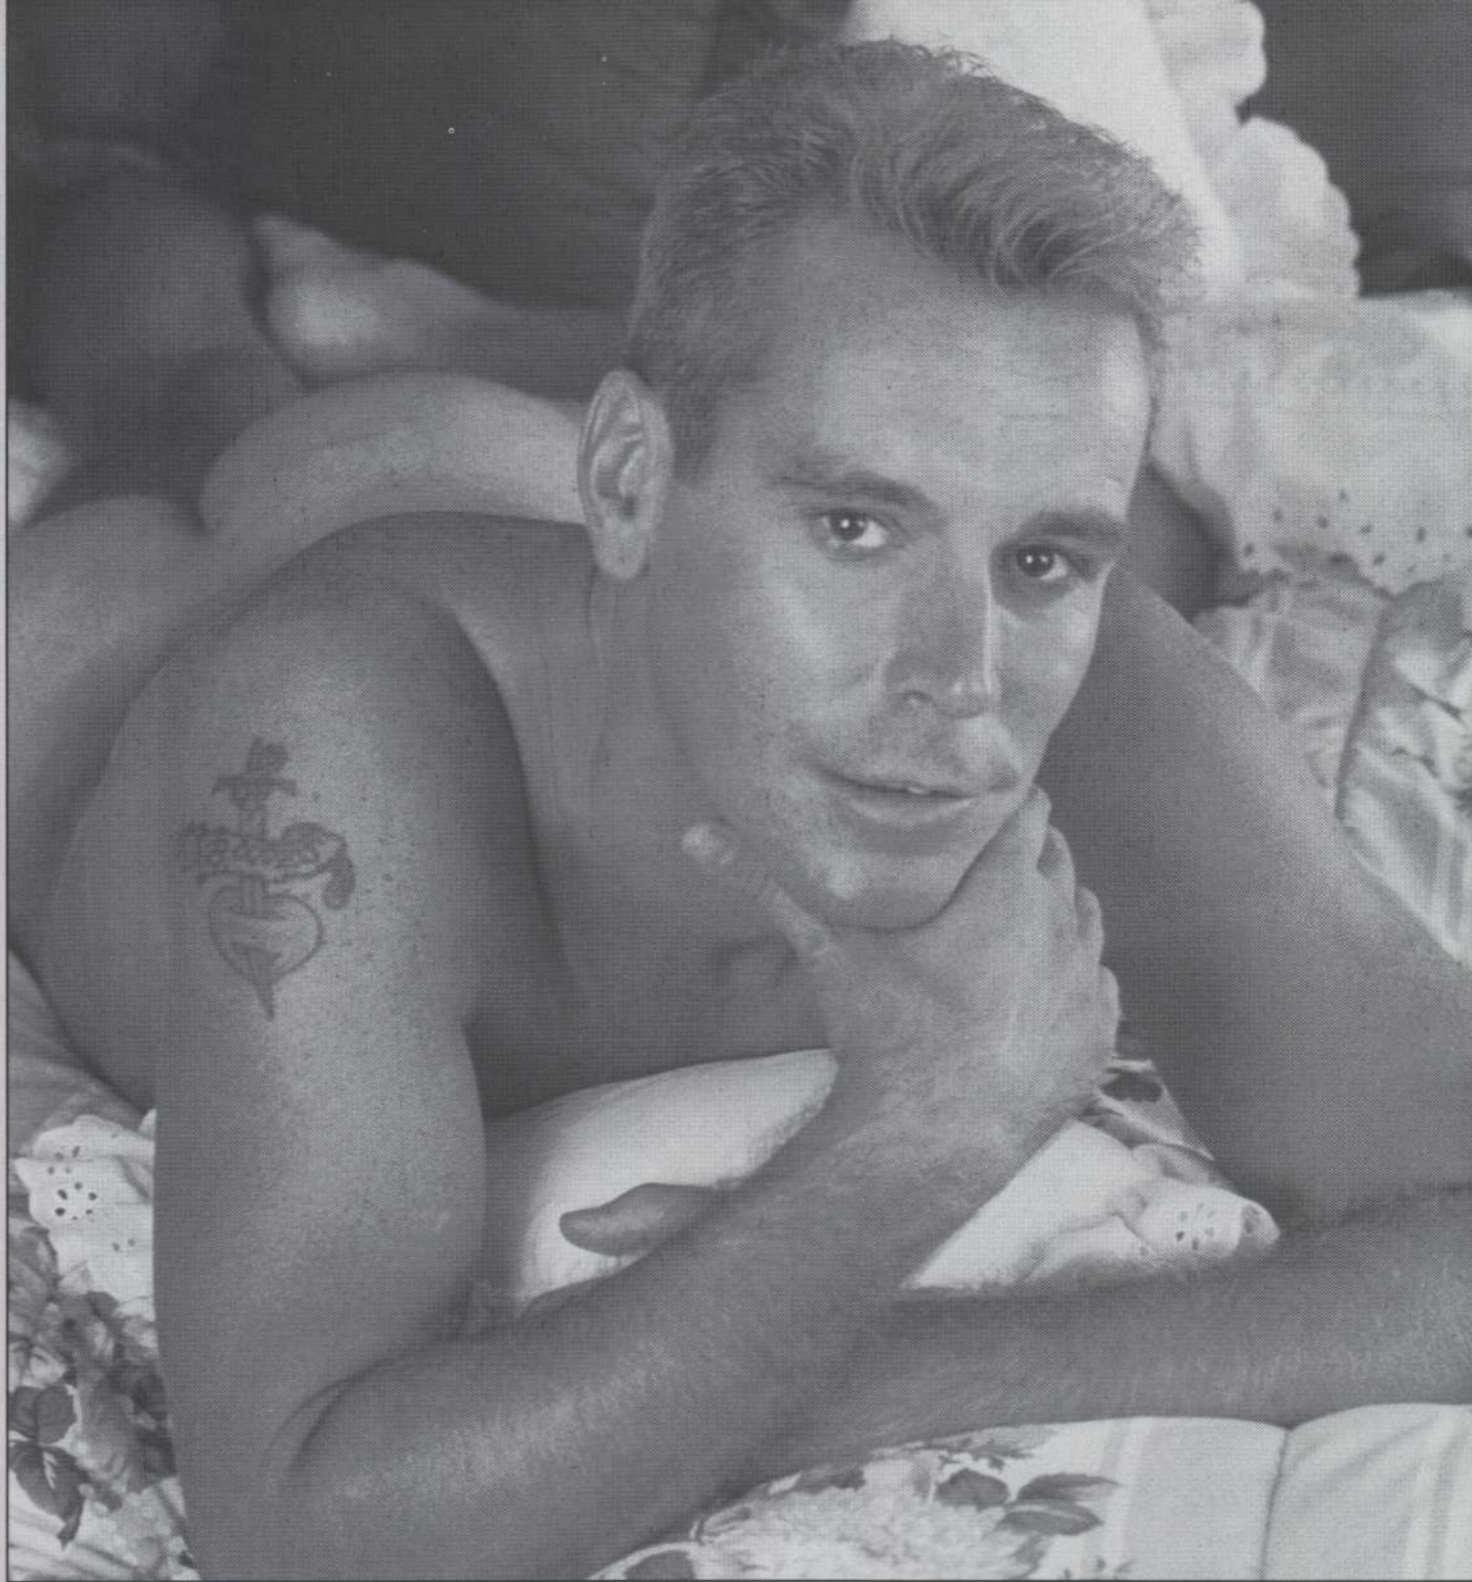

I tongued the webs of my fingers in response.

Reaching out a powerful arm, Ed grabbed my T-shirt. Lifting me up, he hauled me inside, pulling the door shut with his free arm. Pulling the hand from my mouth, he wiped it across his 'stache, breathed deeply and plunged my fingers into his mouth.

"I don't think you're quite finished cleanin' up here... are ya?" he asked.

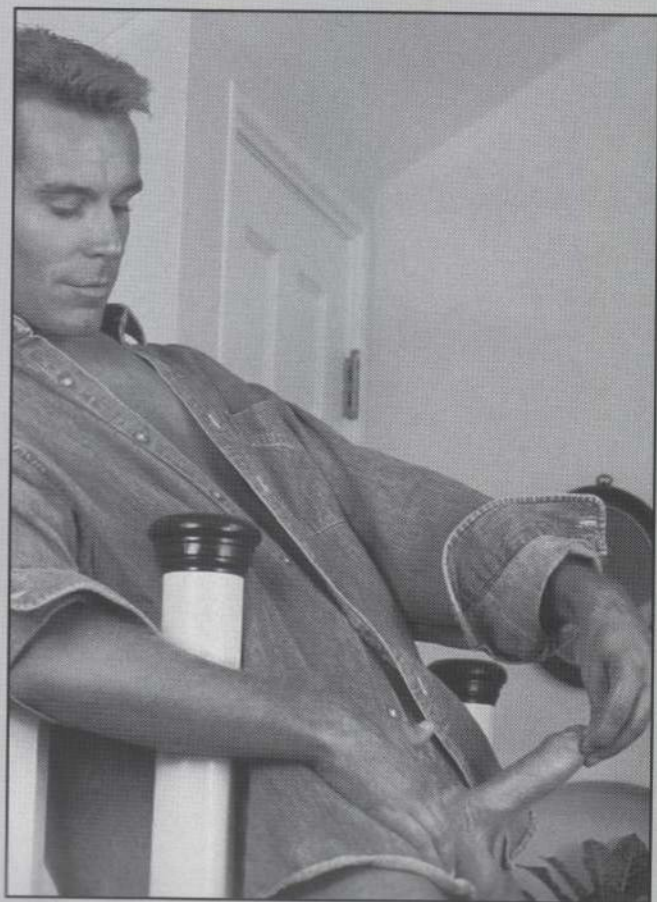

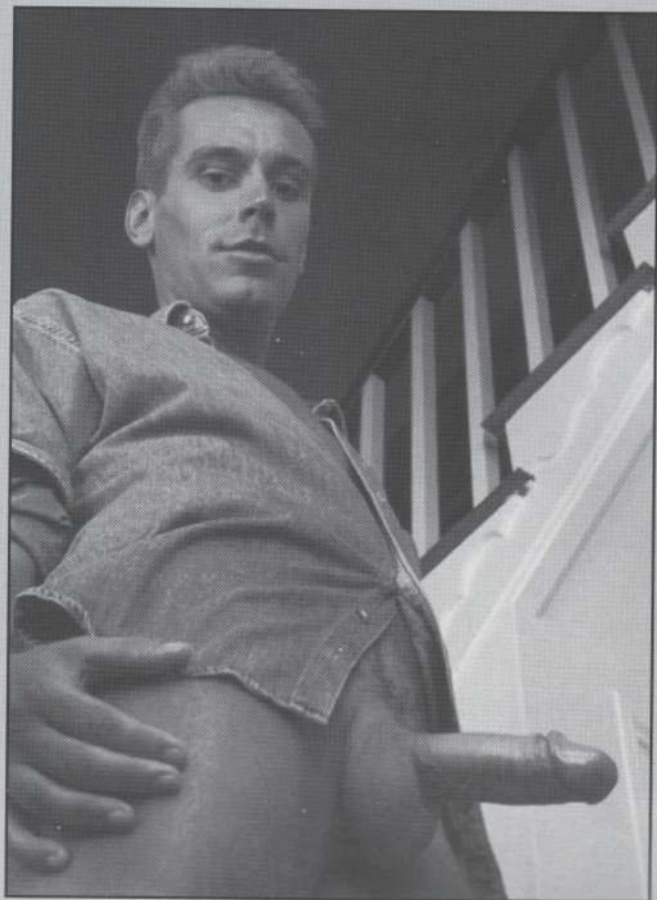

Pulling my fingers from his mouth, I shook my head. As he ran a tongue over his lips and 'stache, his cock stiffened. My eyes on his, I slowly turned to reveal my pink buttocks. Reaching to pull them apart, I looked back at him and said, "Yeah, there's plenty left to do." **FO**

Having watched both intact and circumcised men masturbate, I've noticed there is a vast difference in the amount of stimulation needed to reach orgasm.

Q I am a twenty-six-year-old uncut guy with a problem. Every time I masturbate, my glans penis gets inflamed, with tiny red dots on my cockhead. I would also like to have more foreskin hanging over my cock. Is there any advice you can give me for these two problems? I would like to be able to masturbate again naturally without circumcision robbing me of my natural manhood. Thanks for your time.

Dwight
Florida

A How do I let out a blood curdling screech in black and white on a flat surface? I haven't found out yet, but please do not get circumcised! You will lose 50 to 85% of your shaft skin. In addition, all of the ridged bands that give you pleasure rolling back and forth over the corona of the glans. Plus, you will lose anywhere from 20,000 to 70,000 nerve endings that excite your body and really turn you on, make you hard, and oh yes, they help you cum too. Circumcised men have a glans which is "calloused" over, called keratinization. It would certainly in all probability hide the papilla with all of the hard outer covering but it also desensitizes the glans under many layers of "dead" tissue.

The glans penis is a type of mucosal tissue which some thought at the turn of the century to have Tyson's glands on its surface which secrete an oily (sebaceous) matter. However, other anatomists have challenged that theory. There are definitely papillae on the glans, similar to those found on the tongue. Maybe that is why both the tongue and the glans like each other so much. Hmmm! All of us are unique, and the differences are quite varied. Some men will have very small and hardly visible papillae, and others, like yourself, have large ones that, when you get

excited and hard, puff up for all the fun involved with them.

You can certainly get a longer foreskin. Some intact men have wanted to get it down to their knees, and with some time and persistence, I suppose that is possible. A young boy in Spain (six to nine years old) just pulled his foreskin up under his brief's waist band and got what the report said was a "megaprepuce." (Would you believe his mother found out and had the doctors cut it off? Gross!)

So you can lengthen yours. I have found the use of weights to be the most fun. FOREBALLS or TUGGERS are available commercially, or you can make your own. The FOREBALLS can be fun in that you can spin them around on your glans to have some daytime pleasure every now and then. Other devices can be made from elastics and tapes to put traction on the skin. Or you can relax at home, watch TV, and have your partner, or yourself, pull on the foreskin and stretch it "tight" (Don't make it hurt, but feel the pull) and hold it there for 15 to 25 minutes. If you lose your grip, reach down and pull it forward again. You can do it with or without a hard-on. Tissue expansion is lots of fun, and the results are most "becumming!"

If you contact NORM (The National Organization of Restoring Men), they can send you information on how to do it and an evaluation of the devices available.

Q I am not thinking about getting circumcised, but just what is removed when someone is circumcised and how does that affect pleasure?

A Your question is quite timely. At the Fifth International Symposium on Sexual Mutilations: Medical, Legal and Ethical Considerations in Paediatric

YOUR 'SKINQUIRIES

Practice, held at Oxford Examination College, England, the first week of August, a paper was presented on the structure and location of the various nerve endings of the penis. I am only giving my remembrances of this presentation. The paper will be published by next spring. And my apologies to the authors if I have stated anything inaccurately.

I will try to describe the distribution of the two major types of sensory nerves and their functions. One type, found all over the body, is a temperature/pain network in which the nerve endings are all linked from net-like receptor endings into a common nerve cell and transmitted to signal hot/cold/pain, etc.

The other type of nerve is Meissner's corpuscles. They are also called tactile corpuscles. These are neurovascular papillae or bulbs which transmit through a single nerve cell to the brain. These are the transmitters of tactile stimulation which trigger sexual pleasure. The density and distribution of these corpuscles give a better idea of what excites an intact man.

When we look down at the top of the penis with the foreskin covering the glans, the prepuce lips have on the inner side, a ring of these nerves of medium density ($10 \pm$ per micron.) The inner sides at the base of the foreskin, where it attaches just under the glans corona have about eight corpuscles/micron. The corona of the glans have about six/micron. The rest of the glans has none of these corpuscles, which prompted Dr. John Taylor to report in another paper that the glans is a dumb organ compared to the foreskin.

When you look at the ventral or underside of the penis and retract the foreskin, the frenulum, which is the web from the apex of the glans down and out, becoming the foreskin, goes around the penile shaft and has the most dense distribution of these papillae, which number

about 17 per micron. When the mathematics are done, the estimates total close to 100,000 of these neurovascular "pleasure sensors."

So when a circumcision is performed, a boy/man loses virtually all of these Meissner's corpuscles except what remains of the mucosal tissue between the circumcision scar and the glans, and the minor amount of them on the corona. Although psychological compensation and the mechanical manipulation will eventually cause ejaculation, most all of the pleasure leading up to that is not present in a circumcised penis. Yes, with a circumcised penis, we can procreate, but not have as much fun in the process.

Having watched both intact and circumcised men masturbate, I've noticed there is a vast difference in the amount of stimulation needed to reach orgasm. Many circumcised men must, in my words, vigorously manipulate themselves to reach orgasm, and that is what they are trying to achieve to have pleasure, whereas the intact man, with gentle stroking, has considerable pleasure all along the course to orgasm and many have said that they would rather enjoy the trip than have an orgasm.

Q Can you provide me with information on restoration of foreskin without surgery for myself? Are there publications which assist in techniques for pleasurable sex with a man who has a foreskin? My partner claims I'm not pleasing him. Thank you.

Mark, via e-mail

A You should contact The National Organization of Restoring Men for information about restoring. There is also a web site, NORM.org, and a number of other sites which have some specific methods described. I believe they are linked. The book, *The Joy of Uncircumcising* is also available about nonsurgical restoration.

As far as publications on how to please a man with a foreskin, I can only tell you what I like, as everyone is quite different and is turned on by different things. You need to ask your partner what pleases him. Sexual relations are more than just physically reaching orgasm or the pleasure all along the way. They involve personalities, likes and dislikes, desires, fantasies, compatibility and all of the intricate interpersonal relations that please both partners. Good conversations about what pleases each other the most will clear the air and give each an understanding of what turns them on. No one should expect his partner to automatically know what turns him on. We are not all born perfect pleasers. We need to learn those things by our relationships.

I would hope that all of the readers would write and tell me what they like and how they like to do it or have it done. We might just have to publish a compilation of all the ways to please your partner physically. Since the most sensitive parts of the penis are the frenulum, the tip of the foreskin and the inner lining as well as the corona of the glans, working on those parts with fingers, mouth, teeth and tongue are pleasurable. One's balls and perineum and perianal area, as well as the pecs and tits, don't forget, are very stimulating. Of course one must not forget the rest of the body, from head to toes, is arousing for many to various degrees. That doesn't leave much out, does it, so the communication on how you can please your partner must come from talking about it with him. ☺

All Worlds Video's *Americans in Paris*

Photography by Domini

Regular readers of our video reviews should be familiar now with one of the best tactics to use when you're looking for uncut men on video: go European! European men are *far* more likely to enjoy intact cocks, and this is certainly a video that proves they know *exactly* how to use 'em.

REVIEW • FQ VIDEO REVIEW

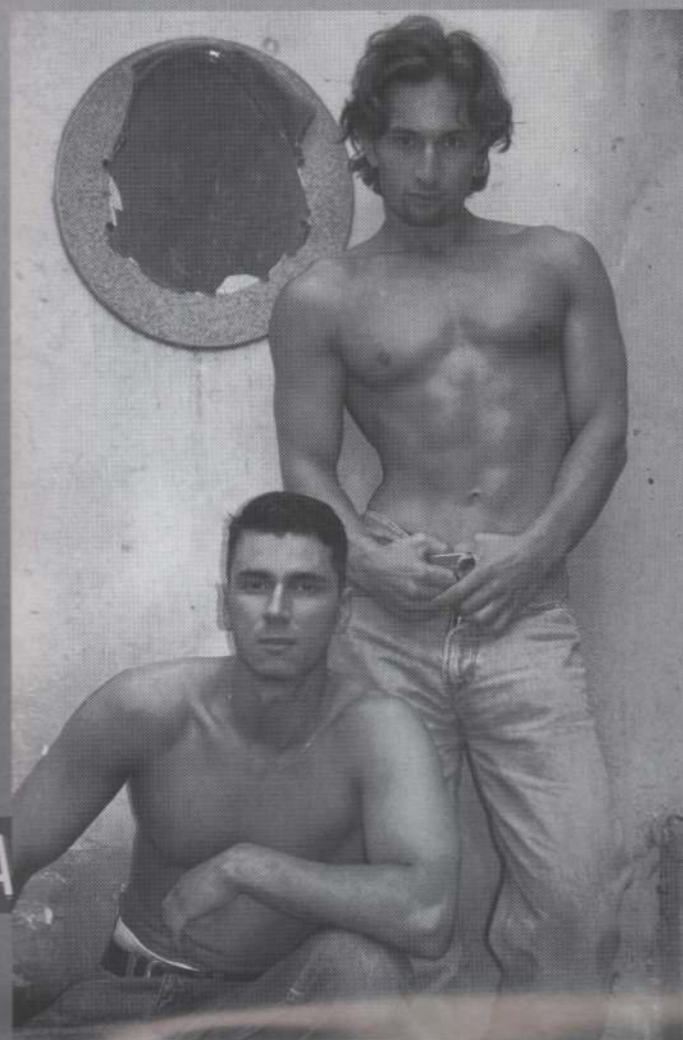

The story centers around two visiting Americans discovering the wonders of Parisian men. The entire video was filmed in Paris, and to drive home the point, they use a few shots of the city to put the sex into context. There are four main scenes, all of which include mostly uncut men. Two of the scenes, in fact, show the “suckee” discovering the joys of European foreskin. It was clear that during the production of this video, the presence of foreskin would be a big draw, so they capitalized on it by having a couple of nice stretchy-foreskin play scenes. These men are *definitely* uncut.

The soundtrack in this video is pleasant enough. It is fairly unobtrusive and serves to remind you: “Hey! Don't forget. We're in Paris!” If that weren't enough, there's plenty of moaning and French dirty-talk to remind you.

The final scene is rather lengthy and starts out with mostly sucking and rimming, and escalating to some pretty brutal ass-pounding. Here again, the sounds certainly drive home the point. The scene finishes off with a mass jack-off scene with all of the actors cumming in turns—much like the big finale you'd see in a fireworks show.

Most foreskin fans will not be disappointed by this video. It underscores the fact that European men really do have it good when it comes to the foreskin department! **FO**

MINE

FICTION BY GREG NERO

ASSIGNMENT: Poland

I'm a freelance photographer—not, I hasten to point out, a member of the paparazzi—and I'll go anywhere and shoot anything or anyone for a buck (big bucks, actually). You name it and I've recorded it for posterity with a camera.

I've been around the world more times than I can count, met everyone from peasants, street people and prison inmates to rock stars, business tycoons and heads of state, and taken pictures of everything from ho-hum scenery and everyday objects to emotional family gatherings and momentous, history-making events. I've had a blast doing it, too. In fact, you wouldn't believe some of the weird and wonderful things that have happened to me over the years while I've been on the job.

For instance, a couple years ago, I went to a small town in eastern Poland to take the photos for an American magazine that was putting together an article on how the government there is trying to modernize its antiquated coal mining industry. Sounds pretty boring, doesn't it? I thought so, too, until I met Andrzej Ostrowski, one of the miners the author wanted to profile in the piece (adds a nice human interest angle).

Talk about a surprise! I just about had a heart attack when I first saw him and then my stomach did flip-flops when we were finally introduced. The blond, blue-eyed, young hunk had the facial features of a top male model and the jaw-dropping body of a pro linebacker. He stood a commanding six-foot-three-inches tall, weighed in the

neighborhood of 240 buffed, beefy pounds, and had to be one of the hottest men I had ever

seen in my life. He was a knockout!

For all his imposing size and strength, Andrzej had a ready smile, an infectious laugh and was obviously well-liked by the other guys on his crew (all older, who often made him the brunt of their good-natured jokes). I can't speak Polish and he couldn't speak English, but I knew right from the start we were going to get along just fine, especially after he caught me checking the big—no, make that *humungous*—bulge in his pants. The mischievous wink said, “come and get it!”

For the first couple of days, nothing happened between us. Nothing could. I was busy taking the various shots the writer wanted for his article, and Andrzej was busy busting his hump clawing the coal from deep within the bowels of the earth. It was dangerous, dirty, backbreaking work, made even more difficult because the mine was old and decrepit and the equipment totally inadequate for the job. But Andrzej toiled like a demon, doing the work of two men, and never once complained. He actually seemed to thrive on the exhaustive manual labor, and really got off on pushing those big, hard muscles of his to the limit of their endurance. He was amazing!

He was also a tease. He had me pegged right from the start and did just about anything and everything to drive me crazy. When we were squeezed into the cage with the other guys on the shift, descending down the mine shaft elevator to get to the working tunnel, he'd “accidentally” brush his hand across my ass or coyly push his crotch against me and hump my leg. Then he'd grin and back away as best he could if I tried to return the favor.

FUCK

Down in the working tunnel, when no one was looking, he often made a big show of grabbing his crotch and giving his basket a good, hard squeeze. Something told me he liked to feel the family jewels roughed-up a bit and set a-throbbing. The harder, the better, that kind of thing. Got me hard, alright.

Sometimes he'd stroke the mouth-watering mound of his horse-sized hard-on through the threadbare, mud-spattered jeans until I thought he was going to shoot a load right then and there in his pants, he looked like he was enjoying himself so much. You know, a couple of times, I think he did pop a nut, he got so carried away. Yeah, just shot a big load right there in his pants and smugly carried the congealed spunk around with him in his foreskin for the rest of the day. What a pig!

Other times, he'd turn around before bending over to pick something up just so I'd have a clear view of his beautiful, wide-load, powerlifter butt. Then he'd clench his glutes and wave his caboose in my direction until it was all I could do to keep from running over and sinking my teeth into the twin globes of his tantalizing tush. Or, even better, ripping the pants off him and plugging his cockteasing hole with my yearning, burning plunger.

Occasionally, he'd rub his nipples through the sweat-drenched, coal-dust-covered T-shirt stretched across his massive pecs until they hardened to the size of plump, juicy raisins. Playing with his nips seemed to be a real "on" switch for his libido. Fuck, how I wanted to flip those switches and turn him into a quivering mass of tit-tortured manstuds myself!

Then there was the time I happened to see him take a leak. He stopped near where I was reloading a 35-millimeter, wrestled the gargantuan, uncut fudgepacker out of his pants, pulled back the luxuriant foreskin to

expose a large, plum-sized knob and let go with a torrent of piss heavy enough to put out a raging forest fire. What a fucking hydrant. If guys like him are continually relieving themselves like that, I thought, no wonder it's so damp and smelly down in a mine!

By the third day, the brawny Polish powerhouse had me so hot and bothered I could barely hold onto my camera, much less focus a lens. Not a good condition to be in if you're a photographer. I was still wondering what to do about it when, right out of the blue, the writer came up to me and said, "Andrzej's going to take you to one of the played-out tunnels the company uses as a mechanical graveyard. I want some shots of the junk they've tossed in it over the years."

Andrzej gave me a sly, lascivious grin and motioned for me to follow him. We took the elevator up three levels and walked about a mile down an old, equipment-strewn tunnel. The lighting wasn't the best, but I got the shots the writer wanted. I also put Andrzej in a couple of them to give the reader an idea of the machinery's size (some pieces were actually pretty damn big).

Andrzej *loved* being in front of the camera. While waiting for me to reload, he got a major hard-on just by flexing his pecs and playing with his nipples. I could see a big wet stain spreading down the left leg of his pants as the precum dribbled from the head of his aroused cock. The glint in his eye told me he was ready.

I took a few shots, zeroing in on the bulge in his pants, the wet stain down his leg and the erect nipples straining against his T-shirt, and Andrzej got right into it. A little while later, without me even asking, the lusty stud peeled off his T-shirt and proceeded to pose

in a series of highly erotic and very provocative poses. The guy was a natural!

I just about lost it when, grinning that seductive, sexy grin of his, he popped the buttons on his jeans, hauled out his raging, rock-hard boner, leaned back against the old coal car and gave me some of the hottest, raunchiest and most incredible beefcake poses I've ever captured on film. He waved that monster cock of his back and forth like he was swinging a baseball bat, played with the abundant overhang of his tantalizing foreskin, tugged on his hefty, low-hanging balls, and pinched his turgid tits until they glowed a bright red. Then, after pounding his enormous Polish pud for a while, he turned around, pulled his pants down to his ankles and showed me not only his ass—fuck, what a gorgeous, beautiful ass!—But his perky little asshole along with it. Yeah, just pulled those big ol' buttcheeks apart and kept them spread while I got right in there with my camera! The guy was a pro!

It took me almost an hour to get through six rolls of film. By the time I finally put my camera down, we were both covered in sweat and our hard, aching cocks were begging for relief. You should have seen Andrzej's boner at this point! The throbbing, vein-popping super-schlong was oozing more precum than most guys shoot in a whole orgasm. The dude could've been out greasing machinery, the flow was so thick and copious!

Andrzej gave me a wink and beckoned me over to him. I didn't need to be coaxed. First, we sucked face. Andrzej's a big man with a big man's mouth, and when he kisses you, you fucking know it! He's a fantastic kisser, too, who just loves long, deep, death-defying kisses with plenty of tongue and lip action. Man, I could have drowned in the wet, sloppy kisses he was dishing out!

When he wanted a change of pace, Andrzej took hold of my head in those large bearpaw-like hands of his and dragged my mouth down over his mountainous pecs until he had it positioned over his left tit. I went to work and sucked on the rubbery nub harder than a calf at its mother's teat. I added some teeth for good measure and soon had the big palooka moaning and groaning in agonized bliss. Then, just when I thought he was going to lose it, he pushed me over to the right nub and I had to do it all over again.

As much as I like titwork, I couldn't stay glued to the blond behemoth's nipples forever. Not with a dick as big as the Hindenburg slapping against my leg. I could even feel the overhang whipping around as it banged into my thigh. I gave the tenderized tits a last, heartfelt chew and then dropped to my knees to worship the Big Daddy of all cocks. Taking hold of

the Herculean shaft with both hands, I took a deep breath and attacked. I was a ravenous, sex-starved, cock-hungry pig and Andrzej's precum dripping slab of swollen, uncut mean was just the thing to satisfy my craving for cock.

I did everything I could think of to Andrzej's monster dick. I licked the shaft and spit-shined the head. I swallowed as much of the prodigious prick as I could and fought against the gag reflex as I choked on its length. I pulled the foreskin back and lapped at the big, mushroom-shaped knob. Then I pulled the foreskin forward and nibbled on the thick-'n'-chewy overhang. I tickled the wide, gaping pisshole with my tongue and massaged the sensitive glans with the inside of my mouth. The more I got, the more I wanted. You name it, I did it. There wasn't an inch of that tasty Polish torpedo that didn't get my full and special attention.

I didn't forget Andrzej's nuts, either. The whole time I was blowing his dick, I was tugging and twisting on the bull-sized balls dangling in the silky-smooth sac between his legs. The man did, indeed, like it rough, which was fine with me because his nuts were so big and responsive that I kind of got carried away. I had him grunting and groaning in no time.

He struggled to prolong the cocksucking experience as long as he could, so it took a good, long while to get him to the point of no return. But, when he did finally cut loose, fuck, Andrzej's orgasm was incredible, the stuff of legends. I was sucking on his dick and twisting his balls when, suddenly, without any warning, he let out a loud gasp, his face contorted into the same kind of pained expression a guy gets when he's taking a dump, his whole body contracted and then—KABOOM!—his nuts exploded and his throbbing cock erupted.

I ducked out of the way and let him shoot the first couple of wads into thin air (it's always interesting to see how much force a guy has below the belt). I was stunned at the power of Andrzej's bazooka. He shot clear across the width of the tunneled without any trouble at all—BAM! BAM! BAM! And let me tell you, it was a wide tunnel and they were big, heavy wads! I moved back in front of the spurting cock and—SPLAT! SPLAT! SPLAT!—Got it right in the face. What a pounding! What a drenching!

When he had squeezed the last drop of jizz from his spent, but still rock-hard tower of power, Andrzej helped me to my feet and gave me a long, passionate kiss. The whole time he was glued to my lips, his hands fumbled with my jeans until he finally got my own pulsating prick out. Then, still panting from his earlier exertions, he turned around, bent over the rusty coal car and pushed his ass out, making it clear

what he wanted me to do. I didn't need a translator for what he had in mind.

Grabbing the condom and a tube of lube from one of my equipment cases (hey, I'm *always* prepared), I quickly stripped down, rolled on the latex, poured on some lube and then stepped up behind Andrzej's waiting, creamy-white ass. He was so hungry for tubesteak, he was practically begging for it when I rubbed my eager dick up and down his crack. Not only that, but, I swear, his asslips made little smacking noises when he tried pushing back on my cock. The man wanted to be fucked in the worst way!

Who was I to say no? I positioned my dick at the puckered portal, took hold of Andrzej's hips and slowly but surely popped the seal and pushed my way in all the way to the balls. I gave Andrzej a few moments to get used to me (I'm not as big as he is, but I ain't exactly petite, either) and then I plowed him. I mean really *plowed him!* I started off nice and slow and easy-like, but, well, he had such a tight, beautiful butt, and he liked to keep pushing it back on my dick, that I got carried away. I turned into a crazed buttfucking fool.

I shagged him long and hard, saving any kind of style and finesse for later. It was mindless, instinctive, down-and-dirty, basic buttfucking at its best. It was a good thing Andrzej had that coal car to hang onto, because I pounded the shit out of him and gave him the ride of his ever-loving life!

I'm not sure exactly how long the fuck lasted, but when I popped my nut, I think it caused a minor earthquake in Poland, Russia, and parts of the Ukraine. It was a chain reaction. An invisible hand took hold of my nutsack and savagely twisted my cum-bloated balls until I thought I was damn-near going to pass out. This caused me to fuck all the faster, pounding like a madman into Andrzej's slick, steaming shitcute. The pressure built in my balls and my cock seemed to get bigger and bigger and bigger until, unable to take it any longer, a mind-blowing detonation went off in my nuts, and my cock exploded with all the power and force of an erupting volcano.

I thrust into Andrzej as hard and as deep as I could just when my balls blew and the first was of red-hot cum rocketed up my shaft and spurt into the protective love-glove. Andrzej reared back like a frightened stallion, grabbing his cock and launched into his second cataclysmic orgasm of the afternoon.

Omifuckinggod, it was awesome. AWESOME! There I was, arms wrapped tightly around the Polish giant, trying to hold on as best I could with

my cock buried deep within his ass, shooting an unbelievably huge load of cum up his chute. At the same time, he was bucking and thrashing and spewing another unbelievably huge load of his own. I swear, the man's a cream machine. I don't know where all his jizz comes from.

It took us a long time to calm down and pull ourselves together. We would have gone at it again (God knows we wanted to), but sanity prevailed. We figured if we stayed away from the rest of the guys too long they'd send someone out looking for us, and that could have led to a very awkward situation.

Once over our initial shyness, Andrzej and I got to know each other *really well*. We never got a chance to fool around in the mine again, but we did spend every night together sucking and fucking our brains out for the rest of my stay in Poland.

The man was insatiable, a real animal, and we had an incredible time together. Not only that, but when we weren't fucking, I was busy taking pictures of the hunky stud in just about any kind of pose imaginable. He was a born exhibitionist!

You know what? After I finished that assignment, I rushed all the photos to a friend of mine in L.A. who owns a major gay modeling agency, and he totally flipped out when he saw them. He not only bought all the photos I had (I made a small fortune on the deal) but he turned Andrzej into one of the biggest and most successful porn stars in the world.

He's got it all now: fame, fortune, friends and, believe it or not, happiness—just for doing what comes naturally (of course, having a spectacular body and being hung like a moose doesn't hurt). What's even better is that he hasn't forgotten who helped him get to where he is today. We're really close now and, despite our hectic schedules, still manage to get together a couple of times a year.

It's nice to know that, even after his transformation from excavation engineer to porn superstar, you can take the man out of the mine, but not the miner out of the man. There's nothing Andrzej likes better than going deep in a warm, wet hole and pounding away with that heavy-duty, oversized equipment of his until he strikes paydirt and busts the motherload wide open. My sore, fucked-over ass is testimony to *that*.

OK, guys, that's all for now. I have a plane to catch for my next assignment, so we'll have to continue this story later. Bye for now. ☒

PUBLISHER'S NOTICE

DON'T BE A VICTIM

While almost all classified ads are submitted by honest and sincere men, we feel it is worth repeating the obvious: some ads can be invitations to financial scams or other frauds. Beware of anyone requesting financial favors or other "help." Brush Creek Media strongly advises the use of utmost caution and can not be held responsible for any loss or injury that may result from contacts with classified advertisers.

MAIL FORWARDING: Properly prepared letters sent to your box number will be forwarded to you unless you check the no mail box in the form at left. (See #1)

RESPONDING TO AN AD BY MAIL: Put each response into a regular envelope, mark the box number (starts with #2) on the back of the envelope, pack up your response envelopes plus \$1 each in an outer envelope and mail to: **Brush Creek Media, 2215-R Market Street, #148, San Francisco, CA 94114.** We forward your response directly to the boxholder.

Note: First 75 words of PERSONAL ADS are free.
ABOUT HAVING YOUR PHOTOGRAPH APPEAR WITH YOUR PERSONAL AD: New regulations are making this more complicated. Even if your photo was previously published in FQ Personal Ads, we are now required to have on file a release statement, list of your stage names and aliases (if any), and a photocopy of your age-proving ID.

① **FOR OUR RECORDS:** This info is needed so we can send your Voice Mail box # and such to you, and so we can reach you if there is a problem with your ad. Use your legal name and, if possible, a daytime phone. This information is kept confidential.

② **AD PLACEMENT:** Choose your home state unless you travel widely (Nationwide) or are interested only in contacts on the basis of the respondent's circumcision status (Cut, Uncut, or Cut or Uncut).

③ **BOLD HEADING:** Print up to 25 characters including spaces, absolutely no more. When counting the words in a personal or commercial ad, do not count the words in the headline.

④ **AD COPY:** Print it out very clearly. Don't bother using abbreviations—we're counting words, not letters. Tell 'em what you want and what you've got to offer. Every personal ad will automatically be issued a Voice Mail box number for the Brush Creek Media Personals system on which the FQ Uncut line is one of five menu options. You may include your address in your ad, but we can no longer publish phone numbers in personal ads. If you wish to have your photograph published along with your ad, you must do the following: 1) write *Released to Brush Creek Media for publication* and your name and signature on the back of the photo or on a piece of paper taped to the back of the photo, 2) write on a separate sheet of paper any aliases or stage names you have also been known by, 3) include a clear photocopy of your driver's license. There is no charge for photos published with personals. You have to be 18 or over to place an ad, and you may not mention or suggest sex with minors or animals. Otherwise, you're on your own. Write what you will and we'll publish exactly what you write (so print clearly). **Deadline?** Whenever your ad arrives, it will go into the next issue of FQ.

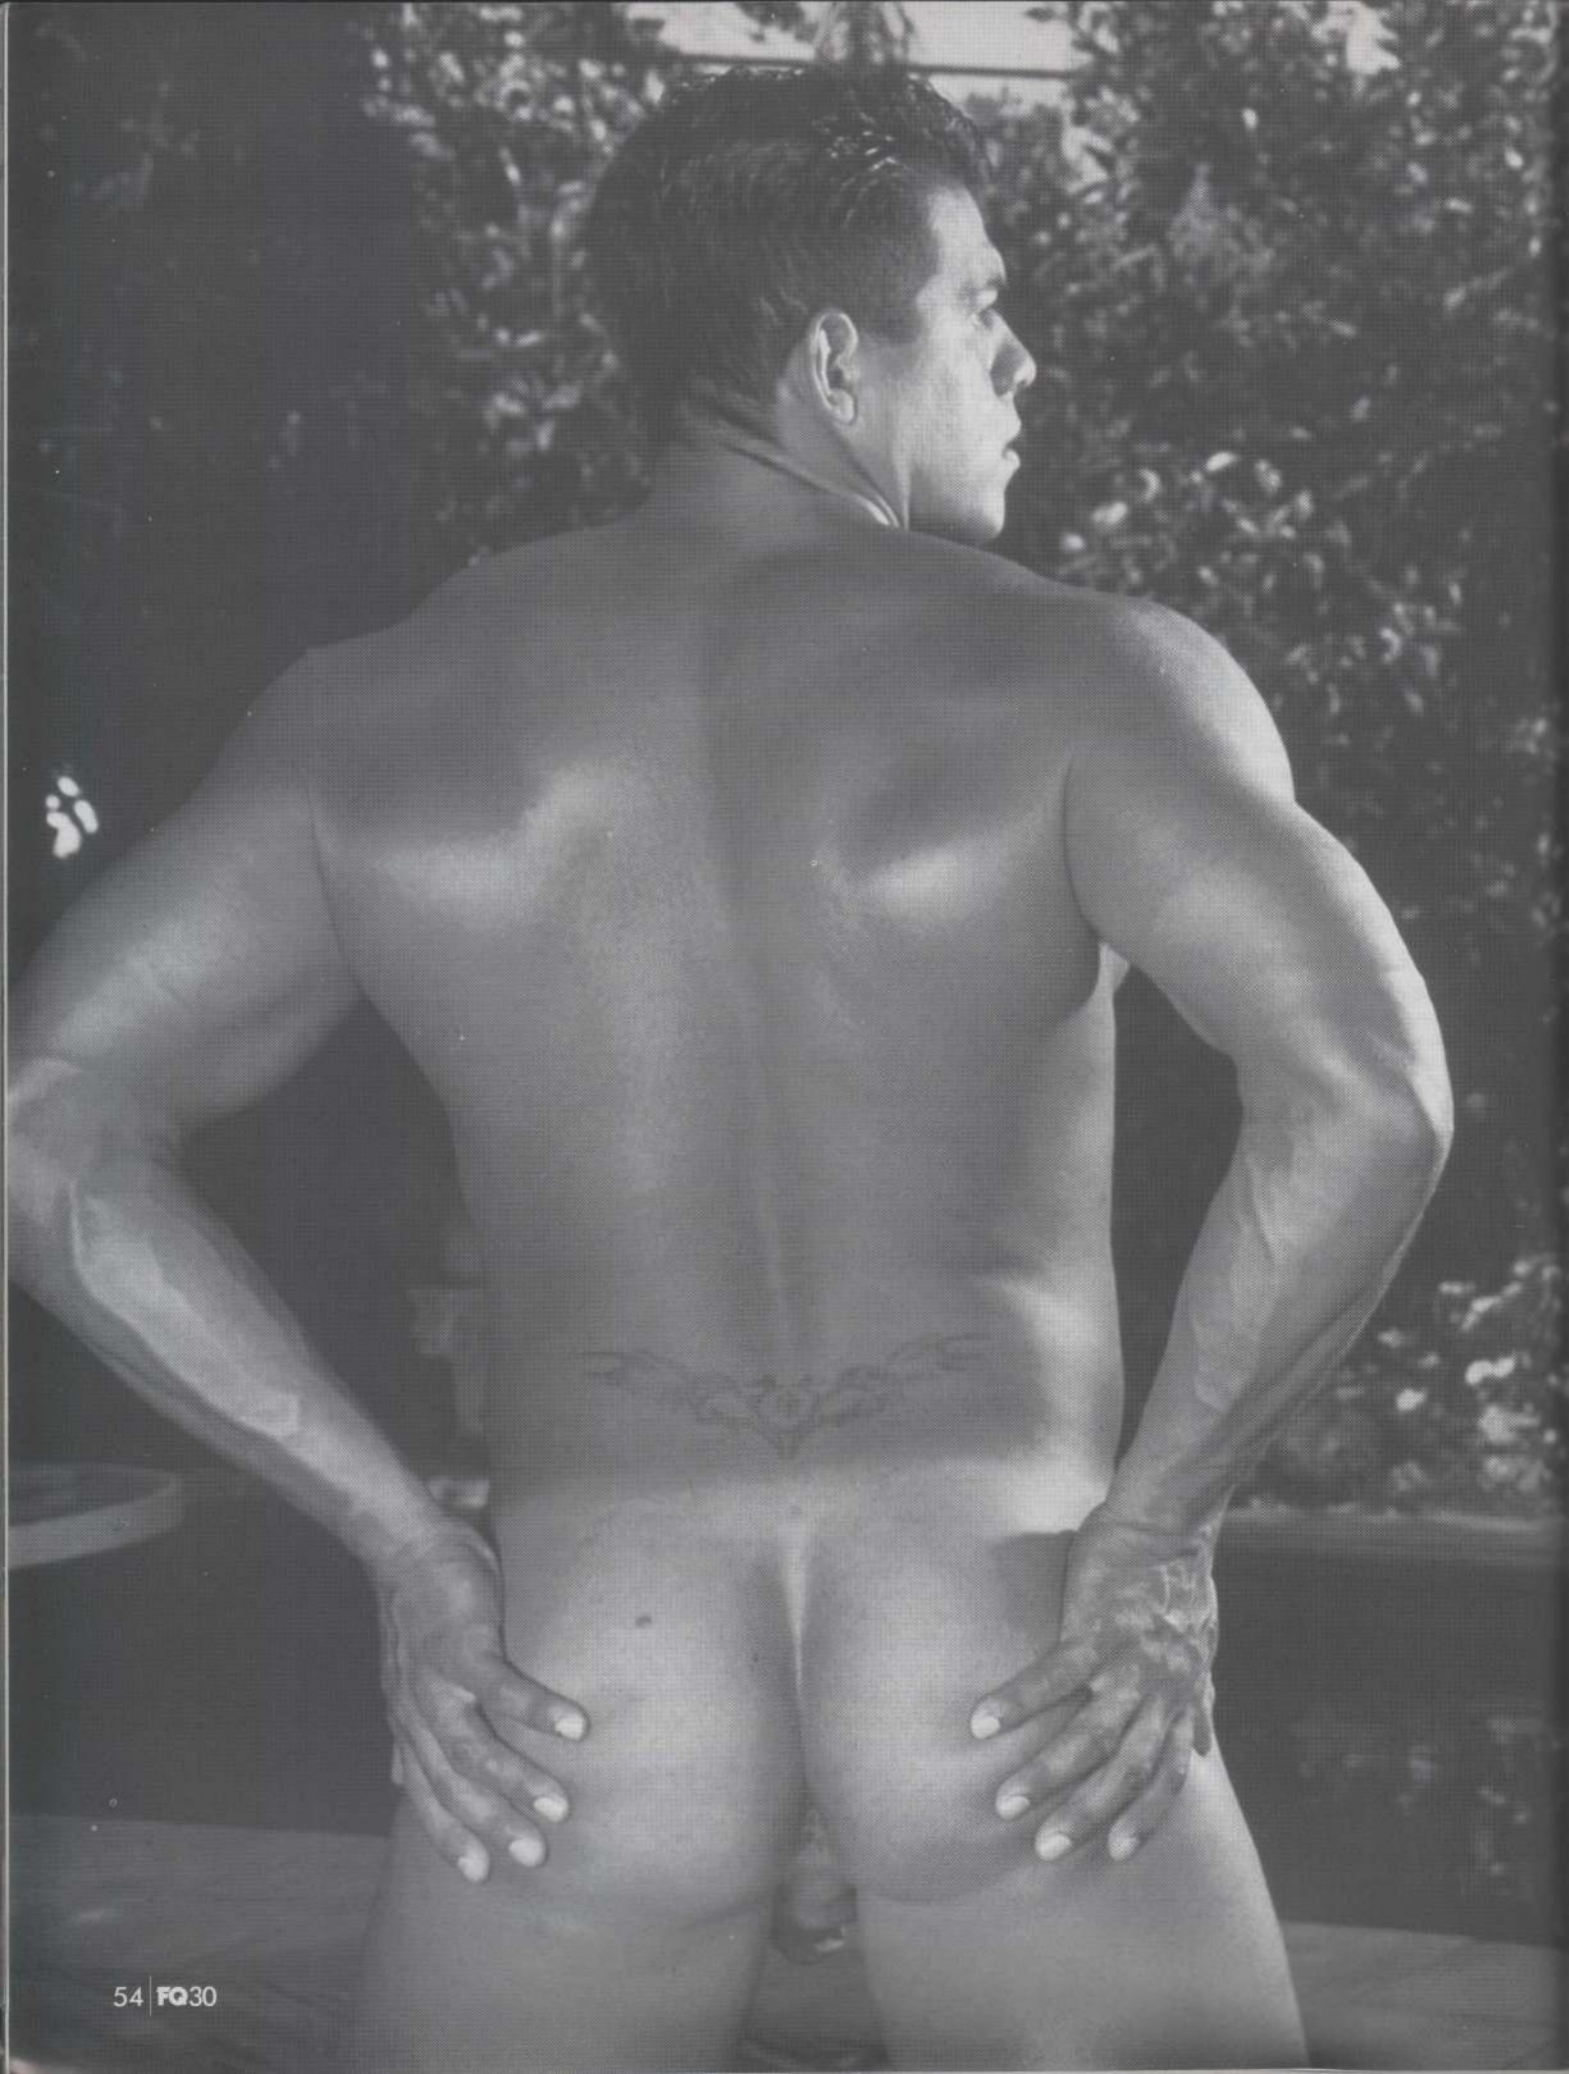

⑤ **HOW MUCH?** Add up the words, not including the headline, and pay 25¢ for each word in a commercial ad, and for all words over 75 in a personal ad.

⑥ **PHONE NUMBERS:** Sorry, we can not publish phone numbers in personal ads except verified numbers of telephone devices for the deaf. Phone numbers in commercial ads are acceptable, but must be verified. Verification costs \$1.

⑦ **RUN IT AGAIN?:** Free personals will run at least four times, concurrent with your subscription. Personal ads over 75 words: Pay for additional insertions of your ad's extra words. Commercial ads: multiple insertion discount as shown on coupon below.

⑧ **PAYMENT:** Check, money order, Visa, MasterCard or American Express.

⑨ **SIGNATURE:** Required for all classified ad placements.
