The "Proceedings" is mailed free to those people who request it and financially support its printing by contributions. There is no subscription rate. All donations, checks, money orders, contributions, and bequests should be made to the Ministry of Universal Wisdom, Incorporated.

"PROCEEDINGS" is published by the Ministry of Universal Wisdom, Inc., at Yucca Valley, California. Printed in U.S.A. Business and Editorial offices: College Office Building. George W. Van Tassel - Director; Darlene J. Wing - Secretary-Treasurer; George W. Van Tassel - Editor. All rights, including translation, reserved. Manuscripts and photographs from our members or friends must be accompanied by a self-addressed, stamped envelope. As we do not employ solicitors or representatives, please address all correspondence concerning "Proceedings", contributions, donations, bequests, etc., directly to:

THE MINISTRY OF UNIVERSAL WISDOM, INC.

P.O. Box 458, Yucca Valley, California 92284
U.S.A.

Our 23rd year of publication.

IONS - AIR AND IDIOTS

Air, by volume, is composed of approximately 79% nitrogen and about 21% oxygen. Air pressure varies with altitude and pressure at sea level is about 14.7 pounds per square inch. The atmosphere of air is the gas ocean, surrounding the earth, that we live in on the bottom, wherever we are.

Nitrogen, and oxygen, are the life-giving gas called air, that are required in order to live, by all breathing creatures.

Nitrogen oxide (nitrous oxide, nitrogen monoxide) is used as an anesthetic, and is sometimes called "laughing gas". This is one of the reasons people laugh so much in smoke-filled rooms, where ventilation is usually poor, oxygen is all breathed up, and the sodium nitrate in cigarette paper fills the air.

Oxygen is colorless, tasteless, and non-toxic as a gas. Liquid oxygen is strongly magnetic. Oxygen occurs combined with silicon (the most plentiful element in the earth), aluminum, iron, and other metals in all rocks. The average of the solid crust of the earth is 46.7% oxygen. The oceans are about 85.8% oxygen. Remember oxygen is a requirement to live.

About two-thirds of the human body is oxygen. Oxygen is very reactive and capable of combining with all the other elements, except the inert gases and fluorine. Oxygen and nitrogen have the identical electrical conductance in microhms at .00006.

Ionization is caused in atoms, or molecules of gases like air, by various forms of radiation, high temperatures, or fast moving electrons.

All of these causes occur in atomic bomb tests and atomic reactors. This is what is changing the world weather pattern and causing heavy snows, temperature extremes, floods, droughts, more tornadoes, more earthquakes and damage to crops and property. These

destructive conditions will continue to increase as long as idiots perpetuate their jobs regardless of who suffers. Atomic fission, and fusion, in reactors and bomb tests, whether underground, or shielded, create weather reactions by induction.

Since the atmosphere, and the earth's crust, and humans, and the oceans, are composed of atoms of oxygen and nitrogen in a major quantity, this composite of fluids and gases is being altered by atomic induction.

The power of an atomic test is rated in kilotons, or megatons of force, relative to a ton of T.N.T. The difference is that T.N.T. is a gas expansion explosion and atomic reactions are electrical.

Since the solid crust of the earth contains 46.7% oxygen, underground atomic tests convey the radiation into atmospheric reactions, storms, weather extremes, etc.; by "resonance radiation".

"Resonance radiation" is described in scientific terms as octaves and frequencies similar to sound, as on a piano if an "A" note is played, all "A" strings in other octaves vibrate. The same thing occurs in the air, when radiation causes disturbance, or destruction, of oxygen atoms in the earth's crust.

Now maybe our atomic trained President might exert his authority to prove that any electrical reaction creates destructive conditions by electromagnetic induction.

E-pluribus Idiocy.

NEW BOOK

Again we ask our readers not to order "When Stars Look Down", from our office. Mr. Van Tassel's personal mail box is P.O. Box 3867, Landers, Ca. 92284. Please send your order, with \$7.00 per copy to his mailing address.

WHAT'S GOING ON

"What's Going On" is written because today will be yesterday , tomorrow.

President Carter won the election because he said he would reveal the U.F.O. information to the public. The U.F.O. voters put him in office, not the black vote.

Economically the nations of the world are going broke. This is largely due to the heavy expenditures of money for military purposes. All military bombs, weapons, ships, aircraft, missiles, and electronic equipment, are only valuable to the military. The housewife, the farmer, industrys, or transportation, in our civil society, cannot use this vast array of super-expensive equipment.

As we go to press, the word is out that the Soviet block of nations is arming as fast as possible. Some of our military brass say the Soviets already, are way ahead of the so-called "free world".

Free-dumb has become a commodity, money is a paper front, and "human rights" are used in world diplomacy. Energy is an economic weapon for blackmail, and coffee is a luxury. Social security is a tax burden. Welfare is a way of life. Crime does pay. Insurance is a tithe to operate. Loans have more interest than principle value. Government has become a multi-billion dollar a year deficit. The ones who know who have the jobs of authority; and the ones who know how can't get a word in edgewise.

The materialistic world is about to meet itself coming in the back door. The inspired world has little time left to get out of the major cities.

Geophysically, if you live within 50 miles of a major earthquake fault, you have a decision to make.

Economically, get out of the credit crunch or lose everything.

Atomically, if you are within 100 miles of an atomic reactor, you won't have time to scam, if anything goes wild.

Politically, so what. The same people run both parties.

Militarily, eat, sleep, and make merry. Your pay check ends with a war.

Socially, have fun; who knows what tomorrow may bring.

Spiritually, develop awareness and use of "the Golden Rule". It will be the only scale to measure the future by.

ANNUAL DIRECTORS MEETING

The date for the Annual Election of the Board of Directors of the Ministry of Universal Wisdom, Incorporated, has been changed from the 8th of October to the 1st of October, for 1977.

The meeting will be held in Yucca Valley, California, in the Community Room of the Allstate Savings and Loan Association, on the 29 Palms Highway (SR 62), at 8:00 P.M.

Voting members of the Ministry of Universal Wisdom are those people who receive the "Proceedings" and have contributed \$12.00, or more, within the past twelve months, dating back to October 1, 1976.

Guests are most welcome.

LIGHT ENERGY VISION

The act of seeing is generally accepted as a simple function of the human body by most people. All vertebrates and mollusks have eyes.

The complexity of the retina has only recently been analysed through high power microscopes. The retina is composed of a layer of nerve fibres on the inner surface which converge to the optic nerve, and various cellular and fibrous layers.

There is the inner reticular layer; an inner nuclear layer; an outer reticular layer; Henle's fibre layer; the outer nuclear layer; a limiting membrane; the layer of rods and cones; and the pigmented layer.

High powered microscopic examination reveals approximately 148 million cells in the retina, are photo-electric cells. These compose the rods and cones. Of this vast number of cells, only about 7000 record color.

The "limiting layer" acts as a separator between the inner layers and outer layers, making a galvanic battery of two plates.

The 148 million cells each have a nerve converging on what we call the optical nerve to the brain.

Can one imagine evolution creating this complex system of order in billions of billions of eyes?

Thank God for your batteries of vision that operate on spirit power.

MAGNETIC CLEANSING

To keep your car engine, and radiator solution clean, fasten a strong magnet onto the outside of the lower radiator tank, with cord, or wire.

DNA - RNA AND L.F.A.

DNA is the short letter expression for deoxyribonucleic acid. Recognized biologists, like Crick and Watson, who discovered the DNA principle, unraveled one of the great secrets of heredity in life, and intensive research is being carried on.

Linus Pauling, noted for many outstanding radical theories, had proposed that his structural a-helix was the carrier of hereditary genetics. He was right as far as he went. Pauling is probably the greatest authority on the structural chemistry of ions and their polarities.

RNA is ribonucleic acid. Research into RNA revealed that specific ions were the key to the duplication of macromolecules.

DNA and RNA are the interchange that make physical things manifest life.

L.F.A. is our own designation of Life Force Action and is based on the creative principle.

Acids themselves may be conductors, duplicators, and transmitters of genetic messages that result in both physical life and heredity, but they do not create the Life Force Action that causes them to respond.

The configuration of the double helix is not only the pattern of DNA, but is the end product of the alchemy of the "Emerald Tablet", the "wand of Hermes", and the principle of gravity nullification.

Since the ions are involved in the DNA life manifestation in the physical, and hydrogen-base atoms are involved; it becomes obvious why we use both ions and the caduceus double helix winding in our coils in the "Integratron".

Biochemistry has never established where the source of the intelligent messages comes from that is

received by the DNA helix and transmitted through the RNA to make L.F.A. manifest.

Life Force Action is not only the result in living moving cells, but it is the source of the intelligence that causes the cells to accumulate in forms of life and it's many complex parts.

Two identical double helix (caduceus) radio antenna, one for transmitting and one for receiving, will lock in on each other at any distance and work without interference from other sources.

Thought manifests through action. People can sit and think continually and will accomplish nothing, and will eventually become confused in their thinking.

One can think of a single thing, and act upon it, and accomplish the result of the thought through the action.

The double helix winding, on a coil, produces a zone of absolute time (static) both perpendicular to the electric flow and the magnetic pattern. This time zone responds to thought.

The DNA helix time zone also responds to a thought. The infinity of absolute space and time contain all of the thoughts of all of the principles by which life manifests in the physical, from infinite thought.

The unseen governs the seen, and genetics is the reproduction of the unseen into the seen. When the seen manifestation dies, the unseen continues on until it manifests again through the L.F.A.

Thought causes the DNA to transmit through the RNA and reproduce itself with variations according to the time reference and the parents. Some heredity may rub off on the newborn from the parents, but in many cases it is entirely different than either of them.

In a cartel of destructive world thoughts, only destruction can result. Then infinite thought brings

the parts together again for a new try at the same old opposition.

Life Force Action is received by the negative coil of the helix and transmitted by the positive coil of the DNA. The RNA is the circuit that carries the message to the genes, chromosomes, and cells, on what kind of a form to make.

The universe is not evolutionary. There is too much order and intelligent organization. If there was a "Big Bang" that started the universe forming; what set off the "Big Bang?"

There was only one creation and we were all created at the same time. Then God rested and turned dominion of all things over to Man. (Not human).

Gravity, electricity, and magnetism existed long before the human discovered them. The laws of electronics, radio and television, existed in Caesar's time. Everything that we can discover in motion, space, and time has always been there to know.

The human race has followed the minority of power, profit, and greed, and contributed too long to their own downfall for a small share of the profit.

Life Force Action does not only make life manifest over and over again; it reacts through its laws of reciprocation when the principles are misused.

The DNA principle does not change in its principle. RNA continues to serve its purpose. It is only the composite forms of these eternal laws that continue to violate the laws of nature.

Life Force Action only instigates the action of life. It is neutral. Thought that wants more profit, is why cars are called back to correct defects by companies that have been making cars for 70 years. Pollution and wars are the products of wrong thinking.

The principle of life will continue in spite of all odds. Think to the DNA in your system. There are

billions of them in your body. The Life Force Action is static in its essence, waiting for your thought, so it can activate the DNA through the RNA to all of your parts and pieces.

Love yourself!

THE "INTEGRATRON"

The only way one can see all of the 64 dirods extending outward from the armature on the "Integratron", at once, is by looking straight down. Our front page picture gives a good view of them.

This photo was made by Kenny Bradford, from a plane flown by his father, Ken Bradford.

We are continuing to make progress.

QUOTE

From " A Report To The Consumer" by Ida Honorof, P.O. Box 5449, Sherman Oaks, California, 91403. The May - 1977 issue:

"Dr. John Gofman, author of 'Population Control Through Nuclear Pollution' and coauthor of 'Poisoned Power'; and former director of the Atomic Energy Commission's radiation research laboratory, testified that 'Cancer, birth defects and leukemia have increased among residents of areas near nuclear power plants' (4-21-77)."

WHAT'S NEW

In the January-February-March, 1977, issue of the "Proceedings", we said we would keep our readers informed of new breakthroughs.

Associates, Gene and Mary Ann Condon, of Clearwater, Florida, owners of an eight-man submarine, have just laid out their itinerary for exploration under the sea.

In the "Proceedings" of April-May-June of 1976, we printed a picture of a pyramid under the ocean, east of Bermuda, that had been located by sonar.

This pyramid has since been studied and found to be orientated North, South, East, and West.

Starting near the end of July, 1977, the "Condon Program" calls for further undersea study of this pyramid by submarine and instrumentation.

Next on their program is the undersea photography, and research, of an entire city submerged under 450 feet of water, off the coast of Equador, near the town of Esmaraldis.

Following the Equador expedition, the Condons are taking their submarine to Japan, where the ancient Japanese capitol city of Yma Da has been discovered in the ocean, also under 450 feet of water.

Information about these three undersea expeditions will be extended to our readers, by the Condons, as they are explored and photographed.

The finding of so much evidence about cities sunken beneath the sea, leads one to wonder which modern cities will soon join them.

HOLY SCIENCE

It becomes more, and more obvious as we examine the Bible, that much of the original writing was the work of scribes who copied old records. Much of the Old Testament, was evidently script from a previous advanced scientific civilization, that was interpreted into the religious records, because the scribes could not comprehend the phenomena.

Scientific records thus became part of the religious theme, because of superstition. Most things that came down through time were believed to be manifestations of either God, or the devil.

Michael Faraday evolved his "Faraday Cage", from the description given in the Bible, of Ezekiel's Temple. There is much more to be analysed from the many dimensions, capacities, and inductance descriptions given in the book of Ezekiel.

"A cloud by day and a fire by night", in Exodus 13:21 - "And the Lord went before them by day in a pillar of a cloud, to lead them the way; and by night in a pillar of fire, to give them light; to go by day and night."

The Bible says, "in the latter days all things will be revealed." This is the latter days, as many of the prophecies given for this time are being fulfilled. To the people of that time, when horses and chariots were the best form of transportation, how could they understand someone flying overhead with an electrostatic corona around the ship, (visible as "fire by night"), and ionizing a cloud around the craft described as "a cloud by day".

The New Testament tells us in St. Mark 9:4-7 (inclusive), that E-li'as and Moses appeared unto Peter, James, and John; and Moses and E-li'as talked with Jesus. Then Peter suggests to Jesus that they build three tabernacles; one for Jesus, one for E-li'as, and

Ezekiel

one for Moses. Did Moses and E-li'as reincarnate in Jesus' time? Could they have landed from the ship overhead? Why build tabernacles? What was so important about tabernacles? In verse 7, it tells about the voice coming out of the cloud that overshadowed them. How could the scribes of that time describe a public address system, transmitting from a craft with a loudspeaker, and a cloud ionized around it? Or, was it a beam transmission to the inner ear, which is a transducer that normally converts sound to the brain by electric impulses?

Were the tabernacles small "Integratrons", that Peter suggested would make it possible to keep E-li'as and Moses, and Jesus in physical bodies indefinitely without ageing?

In verse 8, it reveals that E-li'as and Moses suddenly disappeared. Jesus did this in crowds, according to the Bible.

We had one of the space-people demonstrate this to us, before nineteen witnesses, at Giant Rock Airport in 1953. He explained that this device, which he called a "crystal battery", could release energy into their bodies which prevented light from reflecting off of them, therefore we couldn't see them. He explained that our narrow range of vision, from about 4000 to 7800 angstroms, prohibits us from seeing the entire electromagnetic spectrum. The man didn't dematerialize. He was still there, because the third time he disappeared I had my hand on his shoulder, and he was solid; still there under my hand.

Exodus 40:38, says, "For the cloud of the Lord was upon the tabernacle by day, and the fire was on it by night, in the sight of all the house of Israel, throughout all their journeys."

Here again was the same corona by night and the same ionization of the cloud by day around Moses' tabernacle on the ground, that was described "as the cloud overshadowed them" in the sky several thousand years later.

In St. Matthew 9:4 it says, "And Jesus knowing their thoughts said, wherefore think ye evil in your hearts?" So Jesus could read their minds and communicate by thought.

What is taking place today with U.F.O. landings and contacts all over the world, is also prophesied in the Bible in St. John 1:51, when Jesus said, "Verily, verily I say unto you, Hereafter ye shall see heaven open, and angels of God ascending and descending upon the Son of Man."

When you take the aspects of Jesus predicting "landings", reading minds, and disappearing in the midst of crowds of people, even as E-li'as and Moses did, the phenomena of U.F.O.s ascending and descending today, then all the other things that are happening in the world begin to tie in and make some sense.

President Jimmy Carter, said before he was elected, that he would reveal the U.F.O. phenomena to the people; I expect him to disclose the information about the super-secret fact, that our own advanced research has been flying some of these electromagnetic gravity-nullifying ships. Of course this explanation would be expected to explain away all of the craft that are not from the earth, and have been sighted down through history. This would really create a communication gap between the government and the millions of people who know better.

The latter day prophecy "that all things will be revealed" means all things, including coverups, illegal bank accounts by public officials in all countries, and prearranged secrets that are kept from the people.

Scientifically, much of the religious records can be explained today, when we strip away the superstition and dogma, and accept that there is someone out there that is smarter, and older, and truthful, and doesn't want to stick their clean nose into our dirty mess here.

Religion is a reality of facts, based on faith, that the Creator knows all about what is going on.

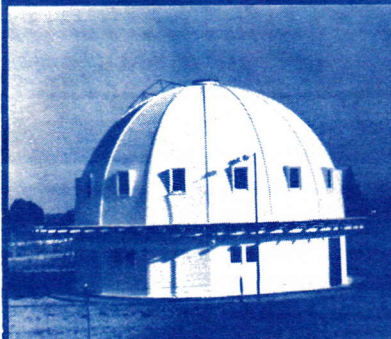

Let the peanut shells fall where they may.
