The "Proceedings" is mailed free to those people who request it and financially support its printing by contributions. There is no subscription rate. All donations, checks, money-orders, contributions, and bequests should be made to the Ministry of Universal Wisdom, Incorporated.

"PROCEEDINGS" is published by the Ministry of Universal Wisdom, Inc., at Yucca Valley, California. Printed in U.S.A. Business and Editorial offices: College Office Building. George W. Van Tassel - Director; Darlene J. Wing - Secretary-Treasurer; George W. Van Tassel - Editor. All rights, including translation, reserved. Manuscripts and photographs from our members or friends must be accompanied by a self-addressed, stamped envelope. As we do not employ solicitors or representatives, please address all correspondence concerning "Proceedings", contributions, donations, bequests, etc., directly to:

THE MINISTRY OF UNIVERSAL WISDOM, INC.
P.O. Box 458, Yucca Valley, California 92284
U.S.A.

Our 23rd year of publication

THE INTEGRATRON AND OTHER RESEARCHES.

Many other researches around the world are verifying the information relative to the function of our "Integratron".

We are not dealing with disease here but rather with regeneration of the body cells. Our findings, over the years, conclude that a vital body cannot be sick. It is only when the electrical charge of the cells in any particular organ, or gland, are diminished, that malfunction occurs.

Those organs we call vital, which must operate to stay alive, never get a rest as they go twenty-four hours a day, year after year.

Although some of these other researches are for physical responses in medical science, they parallel our regenerative principles.

The electron is not matter as such; it is a center of field activity. As such it has demonstrated the ability to maintain its electrical charge over thousands of years. Plants that have died still show the electrons charged in the dead plant and even continue actively in the ashes if the plant is burned.

Seeds, found in ancient tombs, several thousand years old, have been planted and grow as if they came from last year's plants.

Spirit is the electrical nature of life that makes organic creatures live.

The cilia, little antenna-like hairs that line the respiratory system in the breathing creatures, like humans, extract the electrical charge from the atoms in the spectrum that we call oxygen. This electrical charge is then picked up by the cells in the blood, which are capacitors. As they circulate in the blood throughout the body, they in turn discharge electrical

energy to the other cells as they require it. People, and animals, plants, insects, birds, fish, and other life forms all operate on universal electrical principles.

The electron maintains life in spite of extremes. In Jalisco, Mexico, 40 miles west of Guadalajara, green moss grows in water with a temperature of 235° F. This is 23° above the boiling point of water.

Humans live from 75 to 120 years of age in volcanic areas simply because the igneous rock crystalizes under pressure and produces a mass piezo-electric field.

In the Coral Islands, arthritis and other deteriorating diseases are rampant. Hardly anyone living there lives to be 65 years old. Coral contains little electron field force because of its composition.

Fish have never been known to be sick unless they encounter man-made pollution of the waters. Of course they live in water, which shields them from detrimental sun rays.

Current researches show negative polarity ions to be beneficial to health, and positive polarity ions to contribute to many of our ills. This is why photon positive polarity emissions from the sun cause skin cancer with overexposure.

Research has demonstrated that positive ions in the air aggravate pollenosis, asthmas, rhinitis, and sinus infections. Each cubic centimeter of air shows approximately 1200 positive air ions as opposed to about 1000 negative ions.

Dr. Igho Hart Kornbluh, Department of Physical Medicine, Graduate Hospital of the University of Philadelphia, in years of research, established, "Notwithstanding all shortcomings, there is substantial proof of the therapeutic value of air ions and at the same time, well established evidence of a complete absence of undesirable aftereffects."

Dr. Kornblueh states that negative ions soothed the pains of burns so greatly that no narcotics were needed for 85% of the victims treated in a negative ion room.

Dr. Robert McGowin of Philadelphia's Northeastern Hospital stated, "negative ions make burns dry out faster, heal faster and with less scarring. They also reduced the need for skin grafting."

Dr. Walter H. Eddy of Columbia University, took 60 mice especially bred to be susceptible to lung cancer, and separated them into two groups of 30 each. One group was kept in ordinary atmosphere, the other group in a room with a high negative ion content. At the end of 2 months, 22 of the thirty kept in ordinary atmosphere developed lung cancer and died. Of the group in the negative ion charged room, only 2 died and the other 28 showed no sign of lung malignancies. This type of ion therapy is used in more than 100 Russian hospitals.

At the University of California, and in Russian research, tests were run on the nervous system which is responsible for respiration and heart function. Positive ions caused serotonin to be released faster, which causes pains, cramps, irritability, insomnia, stress, and general discomfort. Negative ions stimulated enzymes which destroy serotonin and bring about healthy conditions in the body and feelings of well being.

Dr. Maki Takata, M.D. and Professor of Toho University, in Japan, found that negative ions bring about sound sleep, healthy appetite, rapid recovery from fatigue, optimism, normalizes blood pressure and gives relief from allergies.

Dr. Takata believes that negative ions retard the aging process to such an extent that anyone using negative ions will live an active life until 90 years of age.

Dr. Taichiro Akiyama, M.D., reported that negative

ions have proven most effective as a cancer preventive.

Dr. Fredrick Golla at the University of London, proved that the brain, like a condenser, stores electricity in its nerve cells.

Medical science has come to realize that every functional change in the body is associated with electricity, but they are uncertain of the source.

Why is the individual citizen, in the United States, prohibited from buying negative ion machines by the Food and Drug Administration? What do negative ions have to do with Food and Drugs?

Sears, Roebuck, and Company sells an electronic air cleaner which is listed in their catalog. If you buy one of these "air cleaners" and removed the positive wire in the screen system, you would have a negative ion machine.

Jeno and Madeline Barnothy, and other researchers, are getting the same results as the negative ions are getting, with magnetic fields. Actually the magnetic fields polarize the ions and the ions get the results.

Your body contains uncountable numbers of ions in the hydrogen atoms in the water, in the body.

In our "Integratron" we give a one-shot instant polarization to every ion in the cells of the body, and bombard the exterior with billions of ions with magnetic fields that pass through the body enhancing enzyme reactions.

Russian research shows that negative ions can be assimilated through the respiratory system, but also verify our principle that they can be assimilated through the skin.

Quoting from the Los Angeles Times of August 13, 1977, in an article titled, "Soviets Aiming for Lifespans of 400 Years.": "Dr. L. Sukharebsky, director of

the Public Institute of Juvinology, says 'I don't want to cause a sensation, but I want to tell you something that may shock you. Scientists believe that the human being can live not just 100 years, but 400 years and even more.' "

L.V. Komarov, a biologist at the Institute of General Genetics, says he has doubled the life span of houseflies by feeding them magnetized sugar. Komarov said, "that by concentrating so heavily on conquering the diseases associated with old age, researchers are not spending enough time on the real problem of old age itself." Komarov says, "Ultimately the key to longer life would be passed genetically from parents to children."

Russian research is financed through the Soviet Academy of Sciences.

We are aiming higher than the Soviets. We are aiming for at least a 900 year life span with recharges of the body every 10 to 15 years.

Our research started nearly 30 years ago, and we are coming down the home-stretch with proven electrostatic magnetic ionic principles that do not involve shots, chemistry, or pills.

Our policy is to enhance the electrical energies that cause biophysical life, not add chemical changes that have side-effects and after-effects which become new problems.

All of these researches, and many others, verify our principles here.

Age is the loss of energy that cannot be replaced by normal resting. Aging can only be regenerated in the battery-capacitor body by charging it both electrically and magnetically.

The "Integratron" is designed to charge up to 10,000 people daily.

Why are beneficial things in life so hard to finance?

NOTICE

Since Mr. George W. Van Tassel no longer owns Giant Rock Airport, the upcoming U.F.O. Convention, on October 15 and 16 at the airport, is not his activity, nor is the Ministry of Universal Wisdom, Incorporated, involved.

Jose Rodriguez, and his wife Dori, are the new owners, and are staging this U.F.O. Convention. They can be contacted by writing to Box 1000, Yucca Valley, California, 92284.

ANNUAL DIRECTORS MEETING

The date for the Annual Election of the Board of Directors of the Ministry of Universal Wisdom, Incorporated, has been changed from the 8th of October to the 1st of October, for 1977.

The meeting will be held in Yucca Valley, California, in the Community Room of the Allstate Savings and Loan Association, on the 29 Palms Highway (SR 62), at 8:00 P.M.

Voting members of the Ministry of Universal Wisdom are those people who receive the "Proceedings" and have contributed \$12.00, or more, within the past twelve months, dating back to October 1, 1976. As a 30 day notice is required, the closing date for eligibility is September 1, 1977.

Guests are most welcome.

THE TIME IS HERE

"Woe unto them that call evil good, and good evil, that put darkness for light, and light for darkness; that put bitter for sweet, and sweet for bitter." Isaiah 5:20.

Moral degradation, child-sex movies, legalized drugs, bombings, hostages held to ransom revolutionaries, sauna sex parlors, XXX-rated movies, authority-approved "gay week" for homosexuals, commercialized churches, payoffs for contracts abroad, riots, skyjacking airliners, graft, robberies, stores looted and stock destroyed, bankrupt cities, courts that make deals before the trials, cars called back because of poor engineering; can anything be more wrong, or opposite, or good for evil? All for greed and power.

"Pride goeth before destruction, and an haughty spirit before a fall. Better it is to be an humble spirit with the lowly, than to divide the spoil with the proud." Proverbs 16:18-19.

Now who is "an humble spirit with the lowly?" Preachers? Politicians? Television? Newspapers? None. They are all dividing "the spoil with the proud."

"Behold the former things are come to pass, and new things do I declare: before they spring forth I tell you of them." Isaiah 42:9.

Dam breaks, earthquakes, Watergate, airline crashes, blackouts; all predicted by psychics before they occurred, and the people were told of them through the publishing media.

"Verily, verily I say unto you, Hereafter ye shall see heaven open and angels of God ascending and descending upon the Son of Man. St. John 1:5.

This doesn't say they will contact the dark materialistic satan lovers. It says they will contact the

Son of Man which are the creative, God loving people. The "Son of Man" is the creation that was given dominion over all things. Things are the humanoids who look like Man, but are upright bipeds who are the offspring of men and have no principles or morals. They are the ones who seek authority, and corrupt the world with their satanic crossbreed legislation and loophole laws for the mighty. They are the ones who are God fearing; attending churches with the guilty congregations with the hypocritical hope that the church will save them and sneak them into heaven.

"He that soweth the good seed is the Son of Man; The field is the world; the good seed are the children of the kingdom; but the tares are the children of the wicked one. The enemy that sowed them is the devil; the harvest is the end of the world; and the reapers are the angels." St. Matthew 13:37-38-39.

Those who are righteous are the Son of Man. Those who "do unto others". Jesus is called "The Son of Man" many times in the Bible. Those who follow, in practice, the teachings of Christ are the Christians, not the ones who attend church for vanity and front, or fear.

"And what will you do in the day of visitation, and the desolation which shall come from far? to whom will ye flee for help? and where will ye leave your glory?" Isaiah 10:3.

This is "the day of visitation", with U.F.O.'s ascending and descending. "The desolation which shall come from far", (atomic missiles). "To whom will ye flee for help?" To the government? To the church? Ho! Ho! Ho! You might as well flee to the Jolly Green Giant.

"They come from a far country, from the end of heaven, even the Lord and the weapons of his indignation, to destroy the whole land." Isaiah 13:5.

This is fighting fire with fire. It will be necessary to destroy the destroyers before there can be a heaven on earth. The last several administrations in government could have made a heaven on earth with the

money spent for weapons of war. This proves that the world authority is not creative: not God loving, or God fearing. They are under the destructive influence of mammon (money) greed and power.

The military has taken over the world. Civilians are only the geese that lay the "golden eggs". (Taxes). They just staged a military mock war here on the Twentynine Palms Marine Base. It involved 25,000 men; trucks and jeeps in convoys by the hundreds, jets, helicopters and tanks. They spent enough for this one maneuver to build the "Integratron" a hundred times. The government cries "save fuel" to civilians, and then burned millions of gallons of gasoline and diesel fuel on this one exercise, which didn't do a bit of good for the people who paid for it.

"And when ye shall see Jerusalem compassed with armies, then know that the desolation thereof is nigh." St. Luke 21:20.

Whether one takes Jerusalem, the city, in the Middle East, or JerUSAlem, the United States, here, as the place surrounded by armies, we know both places are the plums of the destructive forces and both are the targets of destruction.

Then in the midst of all this conflict comes another Biblical prophecy.

"As birds flying, so will the Lord of hosts defend Jerusalem: defending also he will deliver it, and passing over he will preserve it." Isaiah 31:5.

"Passing over", "as birds flying", has to be in the sky. U.F.O.'s, angels ascending and descending, and the things happening now, relative to prophecy, indicate "the time is here".

Prophecy gives us no time for the return of Christ except that "every eye shall see him". Today we have world-wide television through satellite relay, which didn't exist before.

FRONT PAGE PICTURE

The "Integratron" stands out as a landmark in the picture on the front page. To the right of it is the Van Tassel home. The picture was taken from the air by Kenny Bradford from a plane flown by his father, Ken Bradford.

THE "PROCEEDINGS", AND THE "INTEGRATRON"

It behooves us, at times, to give our readers and contributors a little reminder.

Our files show that many of you have not written, or contributed to our purpose, and communication media here for some time.

If there is an X in the address box of this issue of the "Proceedings", it means we need to hear from you. It hurts us to have to put your cards in the inactive file.

The "Proceedings" is a paper unlike any other in the world. We mail it first-class so you may receive it promptly.

First-class postage amounts to over \$300.00 to mail out each issue worldwide. Printing costs have continually gone up. It now amounts to over \$470.00 to print each quarterly paper.

Please let us hear from you before the next issue doesn't arrive in your mail box.

The "Integratron" income has slowed down to the point where one man had to be layed off. With the hope that we could have the machine finished by some part of 1978, this time will also have to be extended, unless people are inspired to support the cost by their voluntary donations.

WHAT'S GOING ON

About a hundred years ago an editorial article was printed in the newspapers as follows:

"A man was arrested yesterday, charged with attempting to obtain money under false pretenses. He claimed he was promoting a device whereby one person could talk to another person miles away, by means of a small electrical apparatus and some wire. Without doubt this man is a fraud and an unscrupulous trickster and must be taught that the American public is too smart to be the victim of this and similar schemes. Even if this insane idea worked it would have no practical value other than for circus sideshows."

Shortly after this, in 1876, Alexander Graham Bell patented the telephone and today people can talk worldwide.

Then came radio, the automobile, airplanes, television, atomic energy and men on the moon, all in one generation of people.

In the 1920's, Barney Oldfield said he was going to drive a Stutz Bearcat automobile 60 miles an hour. The horse-and- buggy people laughed. They said a person couldn't live at 60 miles per hour. Now we've raced cars at over 600 miles per hour, and orbited men around the earth at 18,000 miles per hour, and accelerated men to the moon at 25,000 miles per hour.

In spite of colored television pictures in the home, which are accepted as commonplace, and men going to the moon and returning safely, there are still people who will refuse to accept new things because of their retarded thinking; or the new science will rock the economic boat, and such instant progress must be blocked because the economic world cannot adjust to it.

Electrostatic magnetic propulsion, and gravity nullification have been hidden, by governmental security

for 20 years. Hidden from the people who footed the billions of dollars collected through taxes, for these secret purposes.

The Biefield-Brown effect is not taught in the Massachusetts Institute of Technology, or the California Institute of Technology, our two most advanced technical colleges. Why? Because this principle of electrostatic directional-propulsion would eliminate the present day automobile internal combustion engine. For almost 50 years this principle has been withheld while we propagate oil energy crisis war scares.

Gravity nullification in cars, and spacecraft, has been successfully used in secrecy since the 1950's. Why? Because these principles would eliminate tire companies, paving construction, chemical firms, steel company products, and gasoline stations.

Secrecy is the tool of destructive influence. Time, which reveals all things, has got the devil by the horns and forced him to look back - and what did he see? The 360 degree rebound - the law of reciprocation is about to catch up with him from behind with the three pronged fork. The three prongs represent economic collapse, public tax rebellion, and indignant revolution.

How will this backfire work? Just test it.

The President has just condoned one of his appointees getting million dollar loans from two different banks using the same collateral for both loans. Now that this has been officially declared not illegal, here is how the little man could use it. If you owe a mortgage on your home to one bank, go to another bank and get another loan on the same property. Then pay off the first loan with the second loan, and file a clear deed of title and record it. The clear deed of title will not show the second loan against it. The second bank cannot collect it's loan against the property, which shows a legal paid in full ownership, because the second loan should not have been granted on the same collateral. You then own the property;

clear and legally. The President said this was not illegal, but what is it going to do to the banking system? The taxpayers are already paying for a defunct New York city, by this same hokus pokus.

If Washington says it's O.K., it doesn't matter whether it's illegal or not. If Washington decides to withhold information on developments paid for by the taxpayers, they also say they have that right under national security. So they perpetuate energy crises over oil while they withhold energy principles for 20 to 50 years. These principles of energy propulsion and directional control are non-polluting to the atmosphere. There goes the respiratory ailments in people, and doctors and hospitals go broke.

National Security is the maintaining of control over the economic condition of the country in spite of anything.

Security is order. Law is not security. So what can a government composed mostly of lawyers do about scientific progress that they don't understand? Hide it under the official carpet. Hope things will get better. Put out official statements that are either confusing, mean nothing, or are lies.

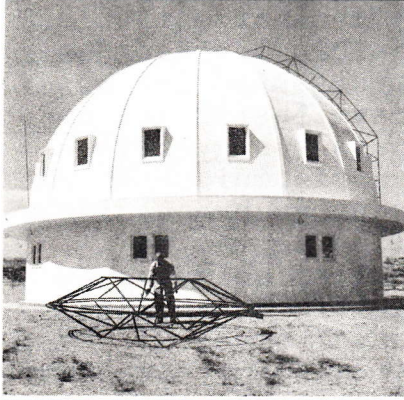

Who sets the policy in this program of bureaucratic chaos? The President? The C.I.A.? The Congress? No! The money system sets the policy! Why? Because without money everything stops. The water won't run out of your faucet. The light switch won't turn on the light. Your car won't run without gasoline. The mechanic won't fix it without pay.

So money is the monster responsible for secrecy, welfare, unsocial insecurity, loans, national debt, interest, international trade, phoney energy crisis, and war.

How do the legal, law-trained, elected, and appointed officials of government correct the situation? Get the hell out of Washington and let some scientific, mathematic, futuristic, horse-sense people straighten the mess out.
