## STEPAS EXPLAINS LIFE LINES

You are each walking the tight wire of your individual life lines, stretched between the poles of birth and death. The keynote of progress through any grade of life is balance on your individual tight wire, the life line of your vibration. The trick is for you to maintain balance.

One may think that if you fall on the right side, it would be different than to fall on the left. In either case it is the same distance to the stop. Anyone fanatically religious is an extremist on one side. This is partly the reason we have instructed you to function singing hymns and ballads.

The problem of many of you, is to discover how to maintain your individual balance. The problem of some others of you is to learn how to avoid unbalancing someone on a life line parallel to yours.

As you advance through this grade you may suffer many falls on either side. And you have to start again where you fell off. When you come to the death end of the wire you have to look at the other side of the pole and you discover it is the birth side of another wire fastened a little higher on the pole.

Each time you advance higher the fall is deeper. Of course, you are more experienced in the art of maintaining balance. The higher you get the harder you fall. It makes no difference whether you fall on the left side or the right.

On your particular level, you must maintain the balance between the spiritual and physical selves. In doing so do not shove someone else off balance in order to maintain yourself.

Those who are walking parallel lines are influenced by those on either side of them. In your case, your path through the grade you are now in may bring you into contact with religious people, or people in criminal activities...You will be affected by whoever you associate with or brush up against.

The one way to maintain balance is to do all things in moderation. Make sure you do not interfere with others rights to maintain their own balance and keep your mind's eye ahead of you. You cannot look around...something will distract you! Your goal, is the pole ahead of you; in your understanding marked "death" - in our understanding, marked "advancement."

If you reach the pole, at the end of your life, in an unbalanced state you have not finished the grade --- you are not qualified to move on and you repeat. You are carried back to another rebirth on the same vibratory life wire.

Balance is the keynote of progression. You can only progress by going down the middle upright...taking each experience in your stride and still maintaining balance.

#### MOMENTUM

Have you ever watched a stacked set of dominos collapse and appreciated the sequence of their falling? Did you ever see a set of spheres attached by strings to a frame so when one is impacted it hits the others which causes a pattern of reaction? One such device, which I have enjoyed playing with, is the Newton Cycle Demonstrator created by a friend for research. The impact pattern was always the same varying only by the intensity of the starting blow.

In a way, the Newtonian Cycle is evident in most all things, mental or physical. It is a visible rhythm that is set into motion or into a mental sequence of a thought program. Both rhythmized by a starting impact which must be there even when the evidence of it is apparently lacking; a sequence set up by that first act, which is always present in any beginning whether visible by the eyes or to be realized on some other plane. There is a specific kind of motion required to stem, shift or stir any established momentum. This stop or blocking has it's equivalency pattern as well. Yet, how many ever think of this negative side of motion as having a rhythm of "stop"?

We tend to believe that force is a must .... that to stop any kind of a beginning requires an energy perhaps greater than the initial one of starting. WHAT IS UNREALIZED BY MANY WHO AREN'T SPIRITUALLY ORIENTED is that an understanding or capacity to make use of the momentum through another channel is a better way and uses constructively what could be lost in a countering of forces.

#### MEMBERSHIP

Some of the active folks are sending in their \$15.00 or more for a voting membership.

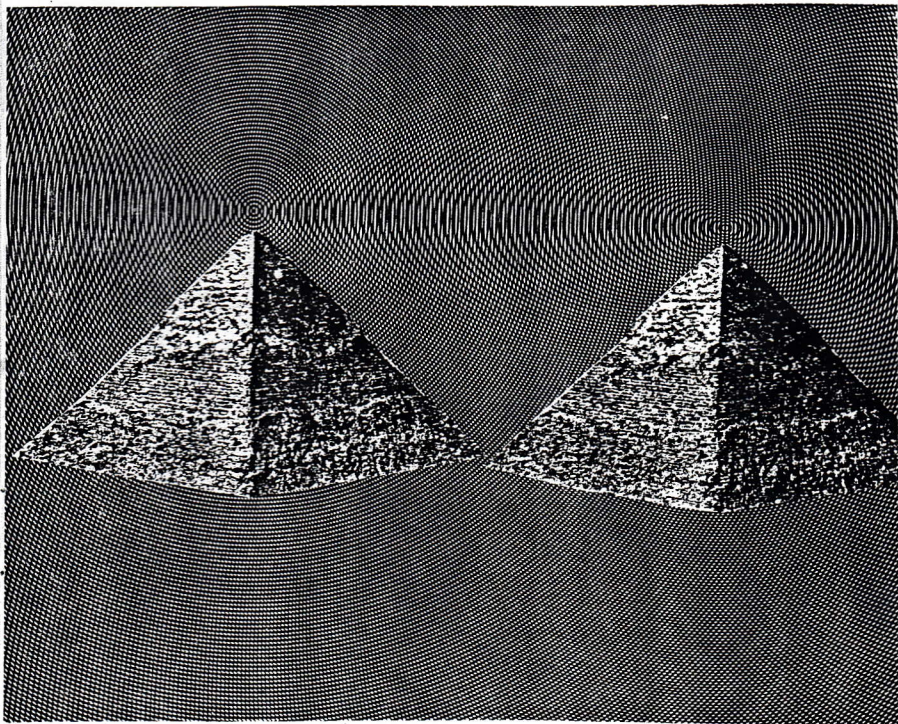

You realize that the money sent in for a proceeding is not necessary, as subscriptions, but keeps us going!

When corresponding for a membership request, be sure to state your request & be sure that the fund you are sending is applied correctly. Also ask to verify that your money arrives to our Ministry of Universal Wisdom. This also applies towards any monies sent in as donations, memberships or Proceedings, or for books & tapes.

## Within Another House

"We need another and wiser and perhaps a more mystical concept of animals. Remote from universal nature, and living by complicated artifice, man in civilization surveys the creature through the glass of his knowledge and sees thereby a feather magnified and the whole image in distortion. We patronize them for their incompleteness, for their tragic fate of having taken form so far below ourselves. And therein we err, and greatly err. For the animal shall not be measured by man. In a world older and more complete than ours they move finished and complete, gifted with extensions of the senses we have lost or never attained, living by voices we shall never hear. They are not brethren, they are not underlings; they are other nations, caught with ourselves in the net of life and time, fellow prisoners of the splendour and travail of the earth."

Dr. Franklin Thorpe *F.D.*

The Pyramids by Steve Emmons of Colorado

"QUOTABLE QUOTES"

"WARNING: Scientists have determined that breathing is dangerous to your health."

"A gentleman remembers a lady's birthday, but not her age"

---

"The computer is a great invention. There are just as many mistakes as ever, but they are nobody's fault."

Sign in finance company's window: "Loans for those who have everything but haven't paid for it yet."

"Best advice to a dieter: "No thyself." .... Truth

"Many who say "Our Father" on Sunday spend the rest of the week acting like orphans." .....Todays World

Speak when you're angry and you'll make the best speech you'll ever regret!"

---

One of George W. Van Tassel's theories is that human cells, like batteries, run down and that the energy loss is manifested as aging.

"We are putting God's eternal laws of magnetism, electricity and ions into practical application. The Bible says 'death shall be the last thing to be overcome.' If this is accomplished, someone has to do it. We are trying."

... George W. Van Tassel

### Comment, Please.

It is important ...where we are as well as when we think. Though there are blendings in any event.

A friend suggested this idea by a comment the other day. He said that he did his best thinking while sitting on the John. We laughed and then started to analyze. The discussion went something like this:

1. The bathroom was private...allowing little interruption.
2. This is a good time and place for basics.
3. Both verbal and gaseous explosions were acceptable.
4. Posture activated freer flow of circulation, lumph and other eliminate forms.
5. The water of the tank and bowl allowed additional activation to "statics".
6. Current of both - and + was relatively continuous.
7. This "grounding" results in all body and mind ingredients trying to balance.
8. Thus an opportunity may have cleared for better pictorial and verbal communication.
9. So external as well as internal sources may find attunement.
10. Spiritual and physical-emotional coordinates may likewise reach significant cohensiveness.

We laughed alot during the discussion but we were not laughing at the conclusion of the evaluation. And I would not be surprised should more than one reader have similar reactions. We appreciate your constructive comments.

Thank You

### NOW... KEEPING THE RECORD

There are those who take and who continue to leach in the name of friendship, as though it were a part and a requirement for their survival.

There are those who quietly attend to the facts and the acts of friendship while remaining close until they can be of service. Your strength is appreciated. **FAITH LIVES ON.**

## VOLUME

Van and I were particularly interested in the Glen Canyon Dam in 1976, and after his write up in October, November and December of 1977, I continued to feel involved with this and other dams across the United States. Many of us have had misgivings as to the safety of areas near earth filled dams, and trust proper considerations have been made by those living around such facilities. We want to believe that authorities connected with these damable sites, consider the earth shaking problems they can generate.

Colorado, Arizona and Utah friends tell us of earthquakes in all of their states. Thus I am continually reminded that in the event one dam were to let-go, water as overflow would reach pollution quickly.

Looking on a large map I note a few communities fairly close to some man made lakes or other earth developed projects. Fifteen years ago I worked with a community who's health problems stemmed from the fact that they were swamp filled areas. Basic health problems were associated in many children as well as adults who were not able to "cope" with the underflow current. A housing project sat on the earthfill and nonvisible tidewater of the area ... I wonder at man's determination to overwhelm God's natural beauty with manstuff and such.

### DDT

DDT, the first organic pesticide, was widely used during World War II to control insect pests in both military and domestic situations.

Dr. Francis A. Gunther, a University of California, Riverside scientist has found that DDT leaves residues in plant tissue. He also developed a technique that will detect as little as one part of contamination per billion 10,000 times more sensitive than earlier techniques and with greater accuracy. His research now is concerned with protecting field workers as well as food consumers.

### TIMELY

Time is a subject much discussed and debated. As we surf our wave of time we most often find ourselves looking back to see whence we came. Even as a river flows over a fall not only does it change direction but speed as well. As we now find ourselves at the apex of the fall, we look back and find little indication of what lies ahead. Turning about and looking forward shows us no river at all and we find ourselves in a state of

(continued on page 10)

vision, we find ourselves in the NOW. Nothing more to grab on to for the river is fast disappearing beneath us.

We must learn to fly NOW! It is not a matter of "if" or "how" for "NOW" does not last long enough to even voice the question. Flying is something one just does, ask any bird that has been pushed from it's nest for the first time. If it is still in it's body you can be most certain that it did not allow much time for the study of aerodynamics.

Survival mechanism within all living forms from crystals to cosmic beings of orders unknown to us exist within the basic nature of the living manifested self.

We as humans have time to study the wonders presented to us until there is no more time or there are no more wonders and we fall.

We find many of great intellectual stature at this point saying "impossible", a few more open minded saying "improbable, and some with vision saying "perhaps". Others with knowledge say "of course" and a few with wisdom saying "lets do it" as they fly away.

Those of us continuing the work of future mankind find ourselves at the apex, for the charismatic charge has met with a short circuit. The universe has been kind, for it has provided us with the opportunity and we are now learning to unfold our wings.

Today is full of the excitement of tomorrow's flight for the vision is with us, the knowledge has been given and the wisdom to proceed is making itself known through the continued support of all those who together say "Lets do it".

. . . Larry Duffy

Dear Old Dad....

When I was still in junior high, my father used to speak about "The Stanley Steamer." Dad was a quiet man, but not when he spoke of this. The enthusiasm and forceful explanations provided many of our communities with something to talk about. Dad did not talk of a potential auto that ran without gasoline or obvious electricity. He discussed into the hours the way that this unique vehicle was able to function. From those days on I could not believe that any gasoline auto was the only way to move about. Now and again I come across other forms of energy. A book written in 1978 gives many other suggestions....Have you read, Proof Positive - Ambassador Jackson? Order through... P.O.Box 1111 Tacoma, Washington 98401

## AGING

Biologist Leslie Orgel's theory of aging makes us think we may have more "erroneous zones" than we knew. He believes aging may be the result of accumulated errors of information processing in the body. These errors, he says, may arise from the DNA source itself losing something in the translation of genetic information between itself and bodily constituents. Thus, there is nothing to be done about it.

Top medical and biological opinion of today is to the effect that "genetic deterioration" may be slowed down, but not reversed. Although they agree that there is no reason, in principle why deterioration of body organs cannot be slowed or stopped, "it's the natural order of things," they say.

Many theories are but a portion of the truth, and we find this theory interesting, but a bit depressing.

Would George Van Tassel have worked for twenty some years on a machine called the Integratron if he believed our switchboards were all fouled up? Would so many people who believed as he, and put their money where their mouth was, have backed such an enterprise as the Integratron? In the beginning of the year 1979, Maharesn Yogi declared that this year would be the year of ALL POSSIBILITIES. We believe, with George and our sources, that the Integratron is one GREAT POSSIBILITY! 1980 LOOKS GREAT.

---

Then there is the young man I met a few years ago who formed a unique saucer shaped craft and was able to move it by remote control. No visible form of energy at all! Although my friend was not able to develop the energy theme because "Big Boys" from the oil industry presented some powerful opposition.... the idea is still around and generating a potent force for a near future where a fear cannot control the vision.

Another team of three are able to electrify a moderately sized auto with a device that could be carried in a ladies purse. Now there is another way to help gals!

One family claims to have enough portable electricity to maintain a city like Salt Lake, and to keep it activated indefinitely. Even my father knew this potential. So do a number of young people today.

In the recent past we used to glorify individuals who had the ability or the potential to do remarkable things in the energy field. But now at long last, we merely encourage them to go to a foreign country for research and then take considerable delight when the idea generates a new system of thinking.

## HOW ABOUT A FAIR "SHAKE"

"The rapid development of solar energy is a must if we are to avoid the catastrophic energy crisis. The Solar Lobby is fighting to safeguard America's future survival as a nation... It can get us headed in the right direction but it cannot do it alone. Favored energy sources have received nearly \$150 billion in federal subsidies; more federal money will be spent on nuclear power this year alone than has been spent on renewable energy sources in the last hundred years!"

"In our fight to get a fair shake for solar energy, we'll be up against some of the most powerful lobbies in Washington, the American Petroleum Institute, the Edison Electric Institute, the Atomic Industrial Forum, the National Coal Association, and the American Gas Association.

"Against this array of forces, a first-rate effort is necessary. If we are to succeed, we must have the help of every citizen concerned about our energy future and the promise of solar power. Won't you take a stand for solar energy by joining the Solar Lobby? Your check for \$15 will make you a member, but I urge you to send \$25 or more if you can afford the sacrifice. Your dollars will enable our staff to lobby Congress and the federal agencies and to build a grass roots network around the country to advance decentralized solar technologies. I hope that you will agree that it is a wise investment...."

Dennis Hayes, 1028 Connecticut Ave., N.W.

"And when ye shall see Jerusalem compassed with armies, then know that the desolation thereof is nigh." St. Luke-21:26

### SPIDERWORT

We learned from a San Francisco paper that plants are a better and safer monitor for nuclear plants. One small wildflower whose blue parts turn pink in the presence of low-level radiation has the potential to keep nuclear power plants in check. A Genetics' proof.

The spiderwort develops pink spots on its three blue petals or pink cells on its 300 blue stamen hairs when in the presence of radioactivity, according to Sadao Ichikawa, a professor at Saitama University in Japan.

When Ichikawa visited San Francisco recently, he lectured on the potentials of the spiderwort's pollution-sensitive properties.

(continued next page)

Spiderworts planted close to, or downwind from several Japanese atomic power facilities showed significantly increased numbers of cell mutations after being exposed during routine operations, Ichikawa said.

While the spiderwort reacted within a week or two, the power company and government officials report no increase using standard instruments. So God is Safer!

Because cells of both the plant and the humans show a "similar sensitivity", Ichikawa believes humans who live near nuclear plants may run an increased risk of cell mutations and cancer that may not show up for years.

The special nature of this native American flower was first examined in the 1960's at Brookhaven National Laboratory in New York...but Brookhaven biologist, Lloyd Schairer, was cautious in his conclusions about the spiderwort. He said more genetic evidence is needed before this link can be firmly established between the plant reaction and those of human beings.

Although Schairer is experimentally using spiderwort to monitor general air pollution, he said some scientists have great reservations about whether human cells and spiderwort cells react in the same way...but do they work with genetics? I would appreciate meeting Professor Ichikawa.

#### RUTH MONTGOMERY CLAIMS

"Strangers Among Us" is another major contribution to literature of the psychic. Ruth Montgomery writes of her discovery of Walk-ins and their role in these last days as we know them. She goes into great detail to reveal these enlightened beings now secretly and anonymously among us who will be guides and spiritually vital mentors through the chaos of World War III and upcoming Earth changes. For the many who have long felt a personal earth mission of special significance, this book has clear purpose.

A review of contents shows: Brotherhoods and Group Mind, Otherwhere, Extraterrestrials, Mystery of Walkins Chaos and Cleanup, The Antichrist, The Shift, and the World to Come. Is This for Real?

Is this for real indeed! Try this bestseller on for size. Its a good conversation awakener we found.

## PROGRESS REPORT

The most interesting sessions so far in my lectures has been in Florida and Nevada areas. There the folks seem to have a lively initiative with such happy and helpful overtones. A hurried gait seems to have come into the Spiritual Groupings in many places now. There is a sadness with it, and disharmony of the members who seldom know their own officers, but merely pay for a membership without an evaluation of either duration or consistency of projected goals. The Ministry of Universal Wisdom has been ongoing the better part of 25 years and until stealing and unabashed wasting was common in public groups, we had the place always open. It was a military request that first closed the doors EXCEPT BY SCHEDULE. They expressed the desire that the advanced information become less available NOW... knowing that certain facts were duplicated in their own research.

For over 25 years visitors have received the courtesy of an explanation of our project. Most long time readers know the reasons for not having free flow of a public through these properties was because of damage done by careless ones or even by childish oldsters who like to have samples of where their feet have been... The cost in time and work to replace damage or stealing was very high. Thus special groups & work- associates were most all who "got to go in the Dome." Since it was not to be even fitted with any essentials until just before public usage or testings were to begin, the benefit was minimal.

GOD ONLY KNOWS  
HE HEARS YOUR EVERY THOUGHT  
AND TWICE JUDGES EVERY DEED

tight

Written on Nov. 29th 79..Mrs. George W Van Tassel

## MONEY KIND OF STUFF

EVERY DEC., utility bill for the building and the Dome on the Incorporated Property is increasing--just as all the telephone, electric and accounts seem to be doing in all areas of the County. DORRIS ASSISTED IN THIS AS DID REAL FRIENDS.

The accent in honesty and sincerity has noticeably increased as noted by the incoming correspondence, in personal communication and phone calls at the Landers site, and also when we meet at numerous other points that our activities take us now.

As soon as we can develop a little more money for publishing the out of print books written by George Van Tassel, they will be printed. Also the 25 years of Proceedings will be printed in 3 volumes. They are now on back order--an expensive but valuable asset on any library shelf.... better as a reference in any active mind.

### CHELATION THERAPY

Hector de la Fuente

More people die of circulatory diseases than from any other cause and it is on the increase! Examples of the causes are: tension of modern living, nutritional deficiencies (especially amino acids), heavy metal poisoning (lead, mercury, arsenic, etc.), polluted air (gasoline fumes, industrial gases, tobacco, smoke, etc.), polluted water, insecticides, refined, devitalized foods, additives, preservatives, and food high in saturated fats. Some of these are even known to be the cause of blindness and deafness.

There is a known treatment for these called CHELATION THERAPY--infusing into the blood stream a substance known as 'disodium ethylene diamine tetra' or EDTA. This therapy has even been known to improve the vision in diabetic retinopathy.

Chelation is a safe procedure when administered by physicians, who are qualified diagnosticians and experienced in the therapy. No side effects can be expected as long as the infusions are not given too rapidly.... preferably over a 2 hour period each session.

The effectiveness of chelation therapy can be determined by urine examination and newly developed instruments.
