I survived through The Apocalypse

I survived through The Apocalypse

You either prepare & execute what's necessary or you suffer the *consequences* {i.e. death/ in \_Agony --- as essence}.

**You've got no-time, literally to -prepare as the {events} are coming rapidly & the-temperature {heat} is rising very fast, NOW [as of February 2016- }.**

Therefore: -prepare {by executing protocol contained in the book} *or die*.

**A frog dropped into a boiling water would jump-off it, quickly.  
The same frog dropped into a water with the-temperature steadily rising: will cook itself without  
her *even* knowing {die}.**

## WHY IT HAPPENS/ & WHY I MUST: EXECUTE THE PROTOCOL

### 0.01. BEGINNINGS OF UNDERSTANDING

**In order for the Humanity to survive: The World Population has to be reduced at least by the level of 70-90%/ & it has to be organized in a way which would *promote* the Development<sup>3</sup> of the Human-specie in the way to become a meaningful Important-player in the intergalactic-sphere.**

In essence:

**You'd be brought to your-knees in The-Chemical-Attack period *before* you know-it {as if you've failed to notice that -3 years back ALL was poisoned, i.e. to name a few: clothes, bottled water & tap water, food {packings} with even items such as paper/ toilet paper & All-the-rest}.**

## -1. [NON-POISONED] WATER SUPPLY

As of ~1<sup>st</sup> March 2016 tap/ {bottle} water is poisoned. Your head already probably hurts [[or you've got so adjusted to being *chronically* poisoned by now that you've ceased to pay-attention]].

**HOW TO DETECT POISONED/ NON-POISONED SOURCES** {of water/ food i.e. How to distinguish}

The protocol is easy:

1. First you touch\* with your non-dominative hand/ {starting} last-finger (like shown in this picture {bottle plastic, B/S}):

- A) You then wait 1-5-3-5' minutes to ASSESS if there exists ANY / if there are like on the right →
- B) Then you repeat 1) + 1A) [[execute the same, but for the Label!]].

2. If ALL is clear: you buy 1.

3. Then you have to consume a "viable-amount" i.e. 0.3-1l [[liter]]:

to ASSESS if there are ANY body reactions [[i.e. head "hurting"/ something "pumping"/ attacked (enlarged) lymph nodes/ ANY other body-reactions – sensations which shouldn't be After Consumption/

NAMELY: divergence.

\* It has to be noted that this hand has to be / clean / {wash it with 10% [with a sip] of non-poisoned [white] vinegar/ & pour a non-poisoned water/ if it isn't}.

---

I've bought a non-poisoned bottle recently / drank it [little]] / & got [perhaps] -poisoned after 20-30 minutes. Though being 70-90% sure: "If the water in the tap is –poisoned: assess safely that ALL is poisoned" {being on Chlorella BIO 3.5g a dose + Horseshell BIO #1 basically the sole-one I've eaten in my life/ #3.95+ which burns Lyme in the eyes i.e. [literally] NOT FOR HUMAN CONSUMPTION {up-to: 1/4<sup>th</sup> of a mini-spoon sends you into a coma}: look their toll so / you reject / those waters (it's a common problem when you're -ALL-poisoned (All is –poisoned so' IF UNSURE [[LESS THAN IN 100% [ABSOLUTELY] SURE]] — REJECT.

**THE TOXIN [[PESTICIDE]] ABSORBS -SO QUICKLY THAT YOU IMMEDIATELY EXPERIENCE POISONING: SYMPTOMS [[like kidney pain,**

**ACT NOW!**

- [0] Buy ALL expiry<sup>8</sup> date: 2016-12 – 2016-06 [i.e. "old waters"]].**
  - [1] Buy / some / glass-waters.**
  - [option: 1A] Additionally buy some 100% cold-pressed juices [[pasteurized & not]].**
- {test<sup>9</sup> them All: before the purchase}**

<sup>7</sup> I typically walk in the shop scouting for the new products to buy [[but Never touching them!]].

<sup>8</sup> It's just an expiry\_date of the bottle as water never spoils/ they would be safe perhaps up to a 1-year after as the plastic would start to brake down and leak petrochemicals to the water itself [[it would be experienced {beyond that \ extra \ term} in the –poisoning:taste but none serious would happen]]. Waters stored in glass are valid virtually indefinitely if the cap is not re-sealed or damaged {the expiry\_date [in\_reality] is a "guarantee" by the producer of product freshness – a time where it stores the / quality / promised /// in ALL food products [[in fact: it insures the product will sell/ & be consumed, in time which increases the+profits for the first}].

<sup>9</sup> You buy just 1 piece of the item you're going to buy [[in bulk]] & test+ All of them 1 by one / with 5-7 minute breaks in\_between.

I survived through The Apocalypse

I've secured myself / before /

&

/

In essence: over 90 non-poisoned<sup>10</sup> [verified 100%] 6l bottles [[plus glass-water!]]/ & about x100 noodles [[now the stashes of food had been expanded significantly/ #1(Apocalypse)]].

LEARN

**If you've got –resources which keep you START.AHEAD/**

**You're safe & basically<sup>11</sup> “can die” and it's ALL about it {therefore you always prepare:before/ any of such events-cataclysms happens {{i.e. fun}}}**.

/

<sup>10</sup> They're secured over many locations [[in pictures are just shown some/ visit +xernt[directory]/3.3B\_Agenda.anonymous\_logs.pdf] for more].

<sup>11</sup> I refer to it as 'peace of the mind' which is an –enormous.advantage.

-Psychiatric.hospital place is my source of drinking water when my supplies end. **Though, 3 km distant: I'm required to be going there @ 06:00-06:30 {leave} MAX & 20:30-21:00 due to reason of missing All those who have placed/ seen me in the department and who might question me. I'm planning to carry there 2 bags & a backpack with empty 6l bottles<sup>12</sup> {to conceal the purpose of visit} (where 10-15, 21 bottles would be left). The water itself has to be drank w/o touching the "neck" with my mouth (due to bacteria that grow on it & spoilage/ nasty smell of the bottle itself). I plan also to carry a 1.75l bottle from which I would drink directly {the water was never poisoned in [the-state-of-the-Art] hospital {now & in the past}: since they've got a separate<sup>13</sup> [water] source and those neighboring flats have also shown no-indication of water poisoning {was in dentist for tooth removal during the time of the stay: there & water seriously had no-signs of tampering when I was ordered to wash my mouth}.**

-/ If you've got none such [free] water source or have no knowledge about it yet: you're left with [[except for the waters found in the shop/ i.e.]]/

1. They've put up a "100% [pressed] apple-juice" in a [carton-box!] which is a *novelty* in Poland since n0body buys [bought, like:never] so/ such expensive [the cost is -outstanding as 11.99 PLN {2.8 EUR/ for 3 liters of 100% apple-juice}: I've paid for [a single] 6l water: 1.79 PLN {0.42 EUR; see previous-pages}.

You've got also 100% juices [[with NONE addition of the -poisoned-water {that's the point!}]/ which are pasteurized {[ultra-fast] boiling juices/ i.e. pasteurization causes Vitamins {& more All-else/ read All about it in #3.1+ chapter of The.

Luciferian.Doctrine.pdf] to be destroyed [[rendered *useless* for the body/ though present in the product]]. Therefore: **If you'd suffer some vitamin-poisoning (which in overdose causes symptoms and [perhaps] leads to vomit {as in the case of foods}: ALL you have to execute is to boil<sup>14</sup> those non-pasteurized juices to turn them into a 'color' [tasty] water {like it is done with the milk/ for instance}.**

**{If there is X condition there Always pops-up something to counter-act it i.e. there is forever the solution to -any. Though, because you've refused to -prepare:before --- you'd be *now* paying extra {& as I say: A poor {due to being unprepared and/or lack of \$} losses up to x10 times.}**

<sup>12</sup> To get 18l/ 19 qt every 3 up to 4 days.

<sup>13</sup> Update 2017-03-17. I've took water from that [marked]:tap & I've got -severely poisoned. I presume it's due to chemicals that were used to clean it [[since it acted like sprinkler]]. I would get there though in up to few+weeks and would take water from the [sink] tap near [[did it already & water was OK]]. I'd probably be in a \_requirement to buy a food-grade rubber-pipe but I would get there {in the\_end}. The -protocol for water-testing in such cases/ is \_wait up to 35 minutes after the initial-sip [[followed in 10-15 minutes with up to 1.5 "sip"]] {& observation/ #-1(Apocalypse)}.

<sup>14</sup> In a new [[never-used]]: pot (cookware)/ see #1.X(Apocalypse).

## I survived through The Apocalypse

### 2. There are also those waters in the glass/

Though they're just 0.50 PLN {0.12 EUR/ as bottle is given-back}: they contain over 3,400mg of minerals/ per 1 liter {you get high by drinking them perhaps due to [natural] fluoride contents so they must/ should.be: diluted or used as a safety for up to few a day}.

I've also found those [other] 0.33l glass-bottles but they were just few of them and they've cost 1.49 PLN {0.35 EUR}. No-other [glass-bottles]] were present at my current location and the 2<sup>nd</sup> where they've might be some non-poisoned glass water is in a city 25km near so it requires a car {trouble, so stick – with.what.you've.got.currently!}.

They should stay safe<sup>15</sup> [[to the End/ i.e. end of 2016/ Jan 2017]]. {They would stay-safe *indefinitely!* See

#-1[Apocalypse]:footnotes for more on expiry\_dates of glass[water]}

[3:] There is also a possibility of –buying those “experimental” waters which are quite expensive but which might play the/ 13.99 & 19.99 PLN {3.27 & 4.67 EUR} for 5 liters/ They've might be valid {non-tested, though} because they're placed in {paper/ cardboard} cartons {which were never-poisoned in the past}.

[4:/ ignore]. I've also once, being drunk --- in the water:poisoning period {few years ago} spoke with a guy who 'bragged' how much he'd earned in his job selling antibiotics to hospitals but when it came to water: lived in the city-center with no running water so they've took it from the –WELL: which is well-accessible in any time of the day & night with no-security AND they've used this water for drinking purposes {last-End.Times, option/ :more is required but it leaves you with a *possibility* to find such --- in your.area [[All you have to execute is to buy some beers & ask for information –in.exchange]]}.

/ You must keep this book: when you're in a requirement – to use the relevant information.

<sup>15</sup> & They're unlikely to be –poisoned[ever] since while in the case of petrol-based products: ALL you require is to just add some chemical [[on the bottom of the vial that is then “pumped” into shape]] or wash them in pesticide-chemical soup to distribute Worldwide: glass is harder to be tampered with due to –control.

I survived through The Apocalypse

The 3<sup>rd</sup> step to / *persevere* / in the \_moments {ANY psychological “issues”} like this is/

**The+Truth is that my\_mind requires drugs [dope] to function at its best.** The substance of choice [currently] is DXM [Dextrometorphan] /// NFO. It has to be \_pure/ i.e. it never can contain any extra-substances like painkillers that are frequently added or it would kill you [[harm liver, etc.]]. In Poland the / cure / is sold as “Acodin” (I’ve paid for it under 5 PLN [1 Euro] in the years before/ now, the price has doubled to 10 PLN — it’s what #inflation is about [prices rise, but you earn the+same or a little bit more/ it has to be noted that products are very often priced a bit each passing year or are downsized as for instance years before I’ve bought a beer for 1.69 & it had 7.2% : now the \_same beer costs 1.79 PLN and it has “only” 6.6% [[or you get instead of a 1 Liter of juice/ i.e. 0.9L]]). / In order for the drug to perpetuate its job [[i.e. RESET[you]:MIND!]] it has to be used at a dose of YOUR\_WEIGHT x 2.5mg so for a 70kg person the MAX\_DOSE is 175mg so I’ve took 150mg. / It’s forbidden to mix it with \_ANY [[including \*any pharmaceuticals [as for instance: anti-depressants, herbs, alcohol, etc.]]. You’re forbidden also to use chestnut oil.

I’ve took it immediately (yesterday) in pharmacy [[I always took drugs in such places since they’re safe/ similarly as I drink in a shop/ etc.]]. You never think [[as you’ve did the thinking, before/ as \_forever]].

Thoughts to-the-trip: NEVER avoid to panic [when it loads]. IGNORE everything else [[NO/ you would never die from such dosage/ if you have followed guidelines stated above]]. // You have to also have in mind that if you’d go to the doctors: you’d be laughed and sent back home [[with such dose]]. I mean: programs take up to 90 tablets of it at once [[protocol is 7 tablets per 7 minutes to avoid vomit]]. Oh & avoid to vomit because you won’t [[waste of time]]. NObody has ever died out of such “dose” and you’d be fine. The “high” [[I experience no “high” in the strict sense/ i.e. #1.1 but I take it because I must // to function, at my+best (you’re never supposed to understand it / ). Therefore: calm down/ It lasts about 2 hours [[peaking at 1.5-2h]] and then it basically wears off though ~~the-trip~~ the effects might last for the next 2-4 hours/ -end.

It also nullifies your+tolerance for drugs [[so instead of taking 1g of Amph. : to have the-same effect/ you might now be taking half of it]].

It’s what I’ve required/ though: enough is \_enough & you’re supposed to take this drug up to 1-once/ a month (I take it 1-2 times a year/ up to this time). For me it’s an Anti-depressant and it basically “straightens” your brain-homeostasis” [let’s say it like this] so you’re clear to go (first-use / A day After: I’ve opened a fridge and laughed to meat as a prime example). / It’s just [my\_]pharmacy.

U

**Use UP+TO[!] 10x 15mg tablets [[150mg of / pure / DXM [[Dextrometorphan]] at once/ per month. Females 8 tablets MAX (optional but \_required).**

Last words/

ACT NOW!

1.

If you use any pharmaceuticals: you MUST discontinue them / completely / because there would be :NO – possibility to take them “After The Fall”/

It specifically includes All psychotropic:drugs (as for instance: benzodiazepines can’t be discontinued rapidly...).

> It’s your problem/ #3.1 chapter provides All Human Health cracked in 100% (diabetes, cholesterol/ heart, etc.).

2.

If you’ve got unregulated membership to-the-army / or a category which makes you fit for the service: it’s in your interest to change it via various means to any other [un-fit]:categories.

> I will ignore the service if I’d be [ever] drawn {disappear} / i.e. All that can be told.

## **SURVIVING THE-CHEMICAL-ATTACK:PERIOD [[BEFORE THE APOCALYPSE/ I.E. 2016-02 TILL 2016-11/ 2017-01]]**

Before you engage – you MUST:plan [[to EVERY single/ smallest/ possible: details {variation/ of events}].

### **1.01. THINGS TO REMEMBER**

It's required from you to avoid as much –poisoning as possible.

1. Therefore, because they drop gold-like [chemtrail] particles in hours 09:00-15:00 & 21:00-03:00: you're *forced* to work IN BETWEEN those hours.

If though you're forced to perpetuate actions in those hours: -if [[on]] any sign [notice] on "needles" [[anything]] remotely 'touching' your lungs from the inside {a feeling like you'd breathed

something/ "some particle(s)" [[All you have to be cautious about: is to –pay.attention]] --- step back & *wait* till it passes (particles drop to ground).

2. Know & adapt/

#### **KNOW & ADAPT!**

1.

**You're forbidden to use any tap-water [[for any purposes!]]**  
/ Which also includes –recent.bottled water/ #-1(Apocalypse).

It means you *resign* [forever] from cleaning/ washing yourself .now [[it includes hands, washing & cleaning cookware, –Any house\_cleaning, etc.]].

It's 15 March & if you really require to wash yourself: use [non-poisoned] bottled<sup>19</sup> water [[see #-1(Apocalypse) chapter]] or just wait some time to get on a –secure."lake" with an [old-bought] soap to wash<sup>20</sup> yourself.

You're **forbidden** to wash ANY clothes in this water nor any [[pack them/ those non-poisoned, .now to the bags [[#.x1(Apocalypse)] which you'd place high above the eyes in your safe[ty]\_room.

2.

**The windows in your room & doors: have to be –ALL.time locked.** You're forbidden to [ever] let in *anybody* to your\_place where you sleep & have got non-poisoned items for your safety. **You're required to put a :lock on those doors if you live with anybody.**

<sup>19</sup> Which you'd cut & use directly from the bottle. You can use a pail/ bucket or a baby:bathtub.

<sup>20</sup> You can –easily can get up to 1.5-2.5 months with no cleaning/ so you've got the time.

## 1.1. SECURING FOOD FOR THE NEXT 9-11 MONTHS/ FOR AFTER THE FALL & PROTECTING YOUR\_SPACE

You must think & prepare [[in\_time]] things to survive you'd \_require.

### 1.11. (NON-POISONED) FOOD:SECURITY UP TO THE FALL

@1<sup>st</sup> March 2016: water was poisoned Worldwide, so basically *Every* food-product made with the use of water like: [potato] chips, –cheddar is destined/ will be –poisoned, too.

NOODLES (PASTA, RAMEN) is the –least.expensive food item available in my\_area so, I've bought/

~250x 400g [[14.1oz]] packets of it. I've tested it *before* for its validity. I've bought \_ALL: items in shops for up to 01-2019 [[expiry\_date]] [about x100 noodles for 0.99 PLN each {0.23 EUR}].

It is important though to mention that [[in the same time]]: they've added new\_series of the same product but with the expiry\_date changed by –1 year & / when the water became poisoned / I've found that mother bought 2 pasta's from that:series [[02-2018 C3AS]] for 0.99 PLN in that promotion (so technically the product couldn't be poisoned from there in Jan 2016 when it was bought) and with the influx of funds: I've cleared –ALL 5 [network]shops with that pasta {pasta of those #series} [[as there was none [other] expiry.date-before [those] pasta's & my[program]:mother provided me with details of the purchase which were *congruent* with what I've spot --- i.e. those pasta's were released with new \_expiry:date).

In the picture on left: you've got a (sample) of concealed stash [[of 30/40 pasta's]] which I've spread over whole my\_home.

I've paid in overall about 300 PLN {69.91 EUR} for the food which would serve as my –safety.pillow<sup>21</sup> i.e. consuming it would allow me to sustain \_myself for those next 9-11 months before the Fall.

ACT

**If you aim to have a similar-plan in place: ask [the\_manager] for those “old” pasta's who were delivered to the Wholesale/ shop: by date 11-2015/ 01-2016 (as those are [perhaps] safe). Buy 1 [[just one]]/ –pour a non-poisoned water [[#-1(Apocalypse)]] to a <sup>22</sup>brand-new pot (cookware) and put it to a boiling point: then add the pasta (& check for “divergence” [[if any poisoning-symptoms appear/ #-1(Apocalypse):1<sup>st</sup>]]. If they show no-signs of being –poisoned: you buy the whole cartons of that #series [[it's time-sensitive!**

{You again pay, because you've *refused* to execute it before}

<sup>21</sup> If I would have no-other[safe] food for consumption in that period: I would \_survive just by eating pasta everyday.

<sup>22</sup> 1-time you pour water [[even a bit]] to a vessel: it's basically GONE / FOREVER --- You *won't* rather make it ever!!] cleaned out of the toxic-chemical {which is a direct evidence for the Ultimate(Last): poisoning before the Fall!}.  
- You're forced to buy new [[or use those who haven't been spoiled/ by tap.water]].

## SELECTION OF FOODS-TO-BUY/

- **CANNED BEANS, LENTILS, PEAS,**

**CORN BEST BIO:** as buying any other is like playing a Russian roulette/ particularly dangerous in the times of poisoning.

- With **CANNED [WILD!] FISH** you MUST be thoughtful because they've might be Radioactive. / I've once entered a shop and found – suspiciously:priced sardines. I mean: they've costed 1.99 PLN {0.47 EUR} for a tiny-can but the usual.price was always around 2.50 PLN {0.58 EUR} so it –immediately drawn my red light{attention}. I've bought 2- cans & ate them/ over an hour later I've become poisoned [[feeling of / changed\_ [internal]:state / sleepiness & All.the-other symptoms follow/ → you would.know if you'd only focus on your\_ internal:feelings<sup>23</sup>]].

- **OLIVES** [[those & **–ANY other: You MUST Find Expiry\_Dates Which Are Up+To A Certain Point {Of Time; See The Next Page!}** with non\_ poisoned

water [[**–USE plastic-cutlery for –ALL foods**<sup>24</sup> for this period]].

- **ALL-NATURAL [RAW] BIO:PRODUCTS** like seeds, grains, beans {they MUST be –tested before & / in my\_ area / none of them were poisoned in the time of their packing/ like a –last.year season} [[**–put each such food into a cold water for an hour** [[discard the water]] & then wait 12 hours before its cook-time {with the exception of raw:buckwheat where the time is 20 minutes for up to 45 min. MAX}/ then you.must MIN. cook each for 15 minutes at boiling-water:temperature until they're soft & tender/ #3.1+ for full.table [[to those items included are [raw] nuts/ dried fruits& vegetables of the same-company/ TIME-SENSITIVE!]/

- **ALL [OLDER<sup>25</sup>] GLASS-CANNED ITEMS** [[LIKE CHERRIES, CABBAGE, BEETS, /& **ALL THE OTHERS** {–Include to this diet fresh raw foods which might be opened [[in gloves/ without risking poisoning / like: bananas, pomelo, [& those are *only* available in my\_ area].

},

**I'VE BOUGHT A / SEPARATE<sup>26</sup> / [[IT HAD ONLY LEFT] POT FOR COOKING PURPOSE OF –SOLELY:PASTA** [[SEE PREVIOUS PAGE]]. It would be just used for cooking this 1-type item:food. {IF I'd be *starting* to cook / raw\_ natural:Bio / products I'd be in a requirement to buy...

–/ As though to the question of / **how much to eat** [[in order to survive]] /: it's indicated by the [TRUE]:**hunger you\_experience** (but NOT the 1 caused by false:empty stomach/ as there's a *true* distinction).

Lower calorie intake would *significantly* contribute to your\_ longevity.

<sup>23</sup> This poisoning was however *different* to the 1 of Mercury [[“needless” to the –arms/legs {limbs} are experienced]].

<sup>24</sup> **Due to poisoned.water: / EVERYTHING / that gets in touch with it: gets.poisoned** [[forever]].

<sup>25</sup> Released *before* the water-poisoning occurred [[–1<sup>st</sup> March 2016]]: Worldwide.

<sup>26</sup> I've bought it at[premium] @ a local shop where they / sell / 2nd:sort[quality] items which would be rejected in the West [[they carry little damages but none of them actually matter in the end {for the\_purpose}]].

#### 1.14. (NON-POISONED) FOOD:SECURITY AFTER THE FALL

You MUST: prepare yourself for the incoming --- to survive.

In order for you to have a 'food:security' for **The<sup>30</sup>+Next+Decade**: you'd require:

- 1,9 tonne<sup>31</sup> of Raw, Hard-Winter Wheat(berries) [[a {raw} cost of about 1,400 PLN {327 EUR}]]

All packed in a Heavy-duty[7mil] Mylar:bags.

/

You'd probably had never eaten a whole-seed wheat.

It has to be soaked in cold water [[7h soak &/ 45 minutes cooked: in a boiling water]]/

GRAINS <sup>505</sup>	TIME TO SOAK TIME TO BOIL	TIME TO SPROUT
Wheat Spelt Kamut (durum)	7 hours 45 minutes	2-3 days

/

NOTE. This diet would work for everyone except for those with a blood type 0 [[High Protein: Meat Eaters]] as they require: meat/ fish as the / staples / for their diets (inability to follow so would result in their poor health/ they would look weak & long term [..]/ #3.1+)

Though: such plan in work might actually work also in their case under the condition that they will substitute<sup>32</sup> it with fresh prey [[human flesh of those [freshly:]dead might be used {it's also meat}/ for instance]].

*-/ First assemble knowledge about the foods which you'd be packing /-*

---

<sup>30</sup> As presented in #1.11(Apocalypse).

<sup>31</sup> It would ensure you'd get EVERYDAY for the-next-10-years time: a portion of 0.5kg cooked wheat [[1,500+ kcal]]/

<sup>32</sup> You should buy/ Native American Pemican (as a meat long-term storage food/ i.e. "JUST dried raw meat pounded JUST to fibers not powder and mixed with JUST fat to last the longest").

**FOODS FOR THE NEXT DECADE WITH INDEFINITE/ ~25 YEAR [SHELF-LIFE]**

**I'VE GOT SECURED [NON-POISONED]:**

[1] FOOD FOR 9-11 MONTHS/ #1.1(Apocalypse)

/

**IF I'VE GOT SECURED #THOSE: First --- I [IN ORDER OF IMPORTANCE] PURCHASE:**

**#1<sup>ST</sup> RAW HARD-WINTER WHEAT [[BERRIES]]**

See previous [[I've bought 1,9 tonne of wheat...

- 7h soak [[in cold water/ 45 minutes cooked in boiling water!]]

*-/ THIS: IS --- THE MOST IMPORTANT FOOD TO STORE SINCE IT HAS AN -INDEFINITE LIFETIME & IT CONTAINS ALL THE VITAMINS [[SPROUTS<sup>33</sup>!]] & MINERALS /-*

**#2<sup>ND</sup> RAW WHITE RICE [[VALID ALSO TO RAW: WILD, ARBORIO, JASMINE & BASMATI RICE {USE THOSE SPARINGLY/ I.E. 70-90% RAW WHITE RICE}]]**

If you buy white rice: it MUST be BIO (organic) as the majority of white+rice is GMO:poisoned/ #3.1:

- Up to 25 years shelf-life.
- 8h soak/ 27 or 30 minutes cook [[in boiling water!]]

---

<sup>33</sup> Of BIO (Organic) Wheat only.

### #3<sup>RD</sup> RAW [ALL] DRIED BEANS

White, Kidney Red, Black, Adzuki, Mung [[Pinto, Borlotti & Other{beans!}]]:

- Up to 25 years shelf-life.
- 12h soak/ 35-60 minutes (depends on the age of beans)/ cook for: 45 minutes.

*They must be cooked in a boiling water for at least 10minutes to remove the natural toxin [[Phytohaemagglutinin]] which causes -poisoning!*

### #4<sup>TH</sup> POWDERED MILK IN NITROGEN-PACKED CANS {/ ALREADY\_PACKED! /}

If you buy milk: it's best for it to be BIO (organic) as cows might be fed<sup>34</sup> GMO's / #3.1:

- Up to 25 years/ to -indefinite shelf-life.

/ If it starts to stink or turns-yellow: throw it away.

---

If you buy \_ANY foods which are NOT:organic --- you MUST test them before {by buying them/ soaking in a non-poisoned water {#-1(Apocalypse)/ cooking in [new [fresh], but the+same] non-poisoned water/ EAT them & look for "divergence" from the / normal / state --- if they're poisoned you'd know it in the time of up to 5-5.5 hours<sup>35</sup> after consumption.

In the case of Non-BIO foods: they have to be additionally tested for the pesticide -residue [[you'd experience it when eating/ i... If there is possibility: it's *best* to choose organic [[it has been explained why it's worthy to pay for -organic/ in #3.1+ {Valuable foods as they've had to fight for survival against fungi, viruses, bacteria, parasites and because of it: they contain elements required to prevent diseases. /// They also *never* harm you gut flora which results in/ **You Live, are happy.**]].

---

<sup>34</sup> Milk produced after ~1<sup>st</sup> March 2016 is [perhaps] poisoned due to -toxic tap water [[which cows would drink]] {has to be verified/ #-1(Apocalypse).

<sup>35</sup> \_ALL beans have to be cooked in a boiling temperature for 10 minutes to ~~redue~~ destroy completely toxin naturally found in them/ #3.1+. {If -poisoned/ #3.29L/

A note/

I'm BOUND by my\_Agenda/ #2 [[it means that I perpetuate *only* those things/ & actions which...]].  
{When you're in The+Process/ #2, later} I've got a hot-line response of "Wait & prepare for the  
leave {which obviously includes -living for those / 9-11 months i.e. \_required / to be...}'/

I was hinted through some [paranormal, you'd say but there's no-paranormal]: which gave me  
100% confirmation to my further+fate/ & / stacking\_up / food -explained.below goes Beyond  
my\_Agenda/ #2 which indicates that there might be -some [unknown] elements which might pop-up  
& with which: you may have to deal, by yourself {though: unlikely as it's simple}.

In essence: {The -brief.below might be incomplete because I'm prohibited by my\_Agenda/ #2  
to stack+ food [for beyond The Fall/ i.e. this way] [[I'd be moved/

## HOW TO PACK FOODS IN \_MYLAR:BAGS {INSTRUCTIONS}

{BASE+COST}

1. You \_require to buy: x150-x350[-x450](recommended: \_minimum) **Large Heavy Duty Mylar<sup>36</sup> Bag - 48cm x 74cm (19 "x 29")** [[7mil (178 microns) Thickness]] {5 Gallon / ~19 Litre}

A [base] cost of x150 (150 bags) is 2050 PLN {477 EUR}.  
Though recommended is buying x350[-x450] if you are after surviving a decade.

2. You \_must buy to them: [a matching\_size of] **2,000cc Oxygen-Absorbers**.

A [base] cost of x150 (for 150 bags) is 655 PLN {153 EUR}.

<sup>36</sup> I'd buy some of these [[minimal\_order]] in order to test them/ if they were NOT coated in pesticides/ #-  
l(Apocalypse).

3. **[OPTIONAL!]** While buckets are optional, because mylar:bags would keep the food safe: they won't protect against rodents, punctures [[of the bags]] which are easy to get nor any other damage to them.

Any 6-Gallon/ 23-25 Litre buckets would be fine [[if no-chemicals were kept in them]] but the most prevalent are: 10x 6-Gallon Pail With Gama Air-Tight Lids AND 10x (min. 23 or) 25 Litre Plastic Buckets With Lids And Metal Handle, Hard Wearing Bucket.

**It's recommended to have at least x10 of those pails [[close-tight, lid buckets]] as when you'd open a mylar:bag with food: it has to be closed [tightly] after every use to prevent any spoilage [[contamination of the food!]]/ & any mylar\_bag(bucket) is equal to 1-month, 0.5kg/ a day ration.**

A cost of x10 is 327 PLN {76 EUR}.

4. **[OPTIONAL!]** It's optional to put packets of moisture-absorbers into food [[at the bottom]] to prevent:spoilage {The last has to be dry}/ i.e. 100g Silica Desiccant Sachets.

A 50-pack costs 436 PLN {101 EUR}.

## HOW TO BUY FOOD

“I purchase organically grown whole wheat berries (Winter wheat) from a natural foods grocery store that sells in bulk. Whole Foods Market is a national chain that sells bulk foods but there are others including local sources. Rather than buying from the bulk department of the store, I place my order with the store manager and receive my wheat berries in 50 lb bags.”

{foods that are meant to be stored long-term MUST be [professionally] pre-cleaned to be pre-packaged}

At the same time EVERYONE who might spread those movies || for them to go viral which includes mails of the / worst / “chatters” whom she knows !! and many of the Unknown to her addresses/ so she’s got basically a guarantee of becoming a celebrity [[ruining her “reputation”/ i.e. “WHAT THE PEOPLE WOULD TALK ABOUT SYNDROME”]:

I also would tell her I’ve dug and redistributed #password-secured archives of her to various people [[in the past & present/ when she was \_gone]] {if you :perpetuate such actions because you must: you’re \_REQUIRED to “block \_All of the ways-out” for the Y to...]}.

**ALL I require from programs is the politics of non-interference** [[ignorance of all my actions]].

-/

KNOW & ACT -

When the pesticides would be –released<sup>45</sup>/ #-1(Apocalypse) & everything coated: you’re bound to return to your room & put those used {perhaps: –toxic.already} clothes in a safe.spot. You \_must track what you put & where/ best –is to never.put anything –poisoned {pesticide-coated or any} near your safe\_place! I already grab *everything* through paper/ foil {newly-used: gloves} [[when the water was –poisoned/ You should also be *thoughtful* about :never-contaminating<sup>46</sup> yourself as it would spread like a wildfire [[you won’t know even why]] and just stay this way.

**Conceal [hide] {forever!} \_ANY: items of your survival so n0body could see them [[in your\_home[room] and \_Any other places!].**

Your old books might be used as a resource (toilet paper/ for grabbing [poisoned] items).

<sup>45</sup> Update 2016-03-17: they were \_already released [[source: unknown]] {though it might be previous-year leftover/ –either.way with the poisoning of water [first\_item]: take / :no\_chances / and assess that more will +follow}.

<sup>46</sup> Keeping others away is 1 method to achieve this success.

## 1.7. BUYING GEAR/ TOOLS/ EQUIPMENT {NECESSITIES} FOR SURVIVAL

If you've got / already / those: save the money for food & be prepared [[in\_time]]: to survive.

### NECESSITIES OF SURVIVAL

I'VE GOT SECURED [NON-POISONED]:

[0] WATER: SUPPLY/ #-1(Apocalypse) [[+∞ water:bottles]]

[1] FOOD FOR 9-11 MONTHS/ #1.1(Apocalypse)

[1A] FOOD FOR **THE NEXT DECADE**<sup>47</sup> {PACKED<sup>48</sup> IN \_MYLAR:BAGS!}/ #1.11X(Apocalypse)

/

IF I'VE GOT SECURED #THOSE: *First* --- I [IN ORDER OF IMPORTANCE] PURCHASE:

#### #1<sup>ST</sup> HUGE[-AIRPORT] BAG

ALL of the #1<sup>st</sup> importance is packed there:

- 3-4x of ALL/ The+Best (non-pesticide/ non-toxin poisoned [[i.e. non-washed/ safe]]): clothes and underwear/ [[35x thin & 3x thick]] socks/ but also a pair of [extra] suit-shoes {swimming-pants} (clothing).
- I've also added [[due to reason of the journey/ #1.1X(Apocalypse)]: Ozonator, MMS, Zapper, Enema bag (all packed in a black-bags). DVD's with -The.Luciferian. Doctrine.pdf[book,www.foreverTheMostImportant.com-site.rip].plus+Extras & All-other utilities (on a DVD tray). Nail-cutters, Flops, Toothpastes/ a brush, Hair+Trimmer will be packed when I'd leave.
- I've put except trash-bags also a mini[compact]-bag & a mini-backpack there.
- 15m 0.5mm nylon[strength]-rope [military, Mil-tec] + 2m rope, reflective-vest, new-gloves [[#1.17:picture]] & All the - miscellaneous:rest has been packed & some of it: you've got -it.refernced below.
- {For shaving I'd put electric+razor, but you MUST be:prepared by buying best/ Gillette Proglide [Manual] Gold + 50 (best 70) [Original!] Gillette Proglide blades [[a cost<sup>49</sup> of ~410 PLN {95.5 EUR}]]}.

+ PLUS

+

<sup>47</sup> Which is also *the-time for which you prepare* when packing everything [important] like [for\_instance] tools for shaving, etc./ excluding -ALL.electric utilities.

<sup>48</sup> & Dug [[deeply hidden, concealed/ -secured i.e. protected from people/ rodents, elements, etc. 100%]].

<sup>49</sup> A highly-expensive investment, but will suffice with 1 shave per 2-3 weeks and *once* every 3 months on head & penis/-area: for a decade.

## #2<sup>ND</sup> HUGE HAND-BAG

ALL of the #2<sup>nd</sup> importance is packed there:

- 3-4x of ALL (non-pesticide/ non-toxin poisoned [[i.e. non-washed/ *safe*]]): clothes and underwear/ socks/ but also a pair of [extra] suit-shoes (clothing).
- Toilet paper, towel, [[a backup 1:1 copy of the DVD's]] & more with come [[if the space allows for it {+2 & 1 here 5-day [sealed] burning grave[candle]-cartridges}]], etc.

## #3<sup>RD</sup> HUGE BACKPACK

It would be used to take foods with me &

*You should [ MUST ] buy best: **Chlorella BIO/ #3.7 & Bear, Wild Garlic BIO** [[till they're still available & begin to use them, immediately!*

-/

For hunting you'd also be in a requirement to **take with you:**

- *(fish) Hooks [50-70 of various sizes], line [strongest; 1-2 long reels], swivels, small weights & drift-nets.*
- *(game) [50-70] Survival snare traps.*

*-All to best used only After The Fall!*

-

[[MILITARY ASSAULT BACKPACK: TYPHOON 36L MIL-TEC/ 129 PLN {30 EUR}]]

/

With fishing you'd be running several lines simultaneously: each tied with a baited hook {a live worm, maggot, bug} and best attached to a low-lying branch of a tree over a lake, stream or pond. You run 10 worms on hooks, 10 crawling bugs and 10 flying bugs on 10 next hooks, etc. Vary height of those in the water: with 30-50 [baited] lines you'd catch eventually something/ be prepared for a few hour wait, though.

You might also use drift-nets which you've might set on a [[running]] stream or any other place.

-/

You set up snare traps on a 'highways' the animals use: you perpetuate so by making a loop for the size of the game which you aim to trap by / setting\_it / up to the size of their neck or leg [[& placing in a place where it's likely to be caught {think of it like you'd be speeding on a motorbike through a highway and somebody would set up a [steel] line hovering over the road at the level of your neck /- you [execute] the same but with a loop over neck/ animals\_leg(s)}]]. You must then withdraw & check those places regularly.

## SURVIVING THROUGH THE APOCALYPSE [[I.E. END OF 2016/ 2017-01 –TO 2023-2025]]

Before you engage – you MUST:plan [[to EVERY single/ smallest/ possible: details {variation/ of events}.

### 2.01. WATER

You survive with no water for up to few days & you die with none of it {but if you go beyond a day with no water: your thinking seriously degrades, so pure, non-poisoned WATER is your: Highest priority<sup>50</sup> over any other requirements for survival/ of All-time).

After The Fall: there would be no-shops/ #-1(Apocalypse) ability type-of-purchases maybe for except the –WELL “[#4]” mentioned [[most automatic pumps would [perhaps] cease to work due to lack of electricity]].

THE+WORST case scenario is you: having None [running] Water. The last is –poisoned in the majority streams and rivers [it contains pesticides, chemicals, animal-agriculture manure [[shit]], bacteria, viruses and –All: / nasty. Though: the worse is when it contains ‘hydrogen sulphide’ [[in higher concentrations you’ve might sense a stench of ‘spoiled eggs’ but if you take it from the “source” of stream: it might carry no-smell or taste but the poison would still be there]]. Take a look at the table of sample –poisoning:symptoms/

POISON	SYMPTOMS [[CONSEQUENCES]]
Lentils [[{ALL:not-BIO/ in.reality}]]	After ~5 hours from consumption something in your <u>intestines</u> cracks open & you experience pain[heartburn] –poisoning {due to GMO:lentils).
Lately [–recently] –poisoned water [[which includes also <u>ALL</u> foods made with the use of this water & <u>ALL</u> vessels who came in contact with it).	Feeling of being unwell [[with experience of pain/ brain-[toxin]:destruction]] & also "changed mental state"/
Hydrogen Sulphide (present in [“natural” <sup>51</sup> ] water)	[low-doses] <u>dryness</u> of mouth, [[unprofessionally told: "something" in head {is happening} i.e.: “noise”, “tampering” and might result in pain [poisoning]]]  [higher-doses] difficulty to breathe [[you SUFFOCATE]] {as the prime-example/ you’d be focused on} & a -sizable [lasting] headache {by toxin-caused: brain-damage /destruction}  {high-dose} death {asphyxiation?}

-/

<sup>50</sup> View/ #-1(Apocalypse) for details how to prepare:yourself.

<sup>51</sup> The I you might take from a “source” of stream/ for instance.

## I survived through The Apocalypse

Therefore if you pick those locations to survive: it'd be best if they were near a 1-st<sup>52</sup> grade:class of purity-lakes/ i.e. for drinking:purposes {best Huge, with an abundance of wildlife –set in an environment with no farm fields, far from any agriculture; in a secluded area/ where n0body gets to [with a constant water flow]}.

-/

Location with an underground [best: very deep] running water source fit with manual:pump/ checked for the quality[purity] of water {including –pesticide/ -toxic chemicals present [[which get to the water from the above and flow with it]]/ inc. hydrogen sulphide [contents], etc.}: would also make a –perfect {if only fully\_stacked/ #1.14(Apocalypse) & 100% protected} place to stay.

**Water is of #NO1:Importance, forever**

YOU

**If you aim to pick the location for survival: it has to be near a [safe]: water\_source.**

**-Any water that you drink from lake/ or any other source: MUST be brought up to a boiling point and left [[cooking]] for the next few minutes.**

Never eat when you have no [pure-]running water.

///

The location you pick **has to be –INLAND** and avoid [best] places as: US, Russia & China territory<sup>53</sup> as ~2018 year there would be an – ENORMOUS:Earthquake which would cause/

MASSIVE →

## 2.1. EDIBLE PLANTS

You must know & be prepared [[in\_time]]: to survive.

### EDIBLE PLANTS

-

[[SAFETY-MEASURES:

-ALWAYS BEGIN WITH THE / SMALLEST / POSSIBLE DOSE OF THE NEW-PLANT/ SUBSTANCE/  
FOOD YOU'RE CONSUMING<sup>54</sup> AND AFTER 24H: YOU'RE ABLE TO INCREASE IT TO MORE {it's

#### #1. DANDELION

ALL-parts of the plant are edible: tops (yellow flowers due to their anti-microbial effects must be consumed in moderation in those who for instance suffer on Lyme Disease/ #3.95B), leaves --- can be eaten raw. Root has to be [[peeled or cleaned]] and cooked.

It's distinct & won't be mistaken with any other plant.

-

*{non-tested: leaves, root}*

#### #2. [STINGING] NETTLE

It has to be cooked in a boiling water [[parts above the ground]].

You recognize it by its distinctive look & it stings [[it also occurs in groups]].

-

*{non-tested}*

---

<sup>54</sup> Protocol is in/ #3.29A.

### #3. PLANTAIN

Young leaves can be eaten raw. Though older leaves can also be eaten raw: it's better to cook them. Seeds might also be eaten raw or cooked.

-  
{non-tested}

### #4. CATTAIL

You dig the root [[which looks like giant insect-legs]]: you peel it & it has to be cooked.

It looks like a hot-dog on a stick {to\_recognize}.

-  
{non-tested}

### #5[BONUS]. MOUNTAIN-ASH

Raw fruits are toxic but after a frost or being blanched/ i.e. soaked/ cooked in a boiling water they're edible.

-  
{non-tested with raw [[bought in a shop/ & eaten]]}

It will be to your-advantage if you'd test those foods.

### 2.93. RULES OF GROUP-ACCEPTANCE [[WHO YOU'D ACCEPT TO YOUR\_REALITY[TRIBE]/ ETC.]] {BY THE ANONYMOUS\_AUTHOR}/

I Accept *only* those who contribute to the advancement of my Agenda/ #2 (currently from 3 years in a row there is n0body):

- Family {Any} is immediately rejected {All of them are of n0-use/ All my enemies}.
- Every1 with a tattoo {any tattoo/ i.e. a dot is accepted at most} is rejected {indicated a mind-programming/ #0.1 flaw being also a sign of low\_morality/ #1.1+ in past & future so refuse, immediately /// if words fail: use [..]}.
- Anyone with past or present [[but also future/ i.e. advanced]]: grudge is [immediately!]: rejected {they will work to conspire & undermine you}.
- In general females [[in any groups/ besides raising babies and collecting berries]] are worth Z-E-R-O. Any female which is NON[confirmed]-virgin has a negative value [[independent of beauty/ All the others]] {they stick with the leaders of the group & basically [commonly] sow disrupt and intrigue}.

For WHO to look: it basically *never* matters who-he-is unless he thinks in a way similar to you i.e. to the Agenda/ #2:

- If they hesitate/ -to.kill in order to protect what's theirs [yours/ group] [[but with a sense of morality/ ^& LOYALTY to the group]]: they're of ~~little~~ none use {You never invest in losers}.
- If they argue but with no-[other/ better.plan] just for the sake of [ego/ their animal – within/ nature/+ question leadership [+ might sow distrust / “whims” / -> are generally: *imperfect & fail to improve* [[over & over as time-to-time it might happen {i.e. fail to take medicine when offered like DXM/ #0.1:THIS}: let them go {with\_bags} after [several] warnings.
- In essence: **you accept *solely those who are of significant VALUE to the\_Agenda/ #2*** {& it's All about it}.

Keep it fun.

## X. EXTRAS

### XI. HOW+TO ACQUIRE [PURE] WATER IN SPRING– [[to Winter/

1. You find a tree:

#### A) MAPLE TREE

(or its variation) [[The sap flows from as early as January to as late as May dependent upon location/ but usually it's a ~month time of window]] AND/ OR

#### B) BIRCH TREE

You identify those by its characteristic [[white with black-stripes) bark [[sap available is beginning of March where the temperature is 8-10 °C/ 46.4-50F (for few days) and up+to 18-20 days before the tree would release its buds).

## I survived through The Apocalypse

2. You make a [shallow] puncture:

The sap should start to soak (in some cases it might take up to few minutes!).

3. You connect a tube:

Either: inch copper pipes might be used, but also things like a piece of bended metal sheet, metal pens and others which serve the purpose {which you attach to the tree to collect the sap into a vessel}. In the case of lack of any: you puncture a hole with the top side of your knife & attach a wooden-peeled stick.

4. You place a [best: 4-5 litre] pot/ plastic [[non-poisoned]] water bottle under the funnel for the water to be collected.

In few hours you can collect at min. 3 liters of water from a [single] tree {make sure to cover those bottles [from\_others] with a bark}.

*[Walnut trees also produce [consumable] sap like many others]*

## X1A. HOW+TO MAKE A CONTAINER

1. Cut the birch bark as shown in the below image.

2. Punch it [with other wood] from all the sides to –peel(take) it off.

3. Cut now an equivalent for the bottom of the container & peel it to –make.fit & wha la!
