DAILY PROGRESS REPORT

Topic studied: Keeping a hand on Name: Rich
multiple - double ideogram Date: 5/10/82

Positive comment: I must keep my attention on having
my hand (pen) on the paper when drawing
ideograms so that I don't miss them!

Rivers are wavy waters between land.

Negative comment: _____

Have any misunderstandings of confusions been left unresolved: _____

If so, what? _____

Suggestions: maybe you could give me a single
ideogram site again ... just once for "practice".

I feel like I'm "tuned in" to double ideogram
drawing right now. Eg. Am I drawing double because
I expect to, or because I really get two? (confidence problem??)

Topic studied: INTRODUCTORY LECTURE

Name: RICHARD

Date: 11/16/81

Positive comment: I was fascinated by the levels of complexity that we will be exposed to during the training. I guess I had expected a less stratified, or less defined classification.

~~for as to the~~ I'm happy with the organizational content.

Negative comment: none (...yet)

DAILY PROGRESS REPORT

Topic studied: "LETTING IT OUT"

Name: RICHARD

Date: JAN 15

Positive comment: I am learning to release
control of the teleogram drawings. Then
I intend to objectify my thoughts +
feelings - not being afraid to speak
up (being wrong is not speaking up)
Give more BS.

Negative comment: _____

DAILY PROGRESS REPORT

Topic studied: AOLS + CATCHING
signals -

Name: Richard

Date: 26 - FEB

Positive comment: the telegrams are coming out
easier - I like this CRG work better
than ever before. I feel I can do it!
interesting I seem to do better when not
relaxed: e.g. when pursuing work are "conscious"

Negative comment: feeling the telegram has been
difficult this week(?) maybe too
much analysis + not enough feely

Have any misunderstandings or confusions been left unresolved: _____

If so, what? _____

Suggestions: Practice city telegrams

DAILY PROGRESS REPORT

Topic studied: multiple ideograms, A&S

Name: Richard

Date: 3/23/82

Positive comment: The objectification process really works!

The subjective process is very ~~interesting~~ interesting in that the analytical part tries to evaluate the signal and influence the result (the B). By objectifying, Analysis is trained to "recognize" the appropriate channel, and allows the next signal to be released & available for impact.

Negative comment: The multiple ideograms, I feel, nicely help express the complexity of the site - not that it must be a complex site - but it allows for a better interaction with SZ sensations. This is great.
