POSITIVE COMMENTS: Hot Dam! I had a dam today. I reached a point where I felt like it was useless to go on. I had such total access to the site that it was like I was looking at a picture about it. I stated it was used for power production and not for agriculture which was 100% correct. Stage 4 is great.

POSITIVE COMMENT: Today's site was a hospital and I named it as such. I had a few AI and numerous EI. The EI were in the form of physiological sensations such as tiredness and exhaustion. I must have had some undeclared AI. At the end of the session I was totally exhausted, I yawned for about 15 or 20 minutes and when I went back to my hotel I fell asleep on my bed. I feel I am really learning the intricacies of RV.

NEGATIVE COMMENTS: NO.

We discussed this phenomenologie via a lecture as of 8 Dec 83.

POSITIVE COMMENT: one session, one long session, one long drawn out session, structure stayed in, content was eventually very good. I eventually learned something from this one very long very drawn out session. I learned if you keep going, although the pace of the data may slow, you will continue to get information from the signal line.

NEGATIVE COMMENT: NONE.

Comments: One very good to excellent session. Stage 4 did the refining of the basic elements which provided the real intelligence. Data was provided in clusters of S-2's, D's and T's. Good sketches were also provided.

Negative Comments: medication is having bad effects: dizzy, groggy, hungry, sleepy, etc.

Positive Comment: One very good session. Stage 4 has allowed me to enter buildings and to access the information within. Stage 4 has brought out people and people allow a great deal of information to be acquired. Stage four is easy and fun and really provides a great deal of data. Three cheers for stage 4.

Positive Comments: I learned that no matter how many things are happening in your life (mind) if you stick with structure all will be well. AI and EI are very important. EI lead to T and I and these are the true data we seek. One cannot intellectualize this process, it must occur automatically in structure.

H. J. J.

Positive Comments: long session MMM. I am in the throws of learning the differences in "feelings" (AI, EI, I). There are subtle ~~but~~ differences which I must learn to break-out.

POSITIVE COMMENTS: 3 sessions: I was pushed to increase pace. By doing so less Aul were produced and the same quality data was provided concerning the site. Last two sessions took only 1/2 hour each. Ts were being placed into S-2 column etc indicating that I am well into the confusion curve.
