TOPIC STUDIED: Stages I  $\Rightarrow$  6

NAME: Tom

DATE: 4 Dec 84

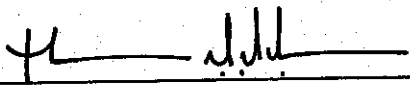

POSITIVE COMMENTS: The system is in!! It works very, very, very, well. I feel I am finished... finished!! I can now tell you what exists and at any coordinate on earth (and maybe beyond). Ingo is a genius, and his system is glorious. (Beside, it is accurate and very capable of producing technical data.)

TOPIC STUDIED: Stage III

NAME: Tom

DATE: 3 Dec 84

POSITIVE COMMENTS: New Stage III really works well. Be on the look out for homonyms such as lite and light. Do not lump different words into one concept (ie. cylindrical, curving, lines).

NEGATIVE COMMENTS: NO.

TOPIC STUDIED: STAGE III (IMPROVED)

NAME: TOM

DATE: 27 Nov 84

POSITIVE COMMENTS: Stage III is much improved when ~~the~~ sketch is based on the data. Sketches and ideograms "from the signal line" add to the ~~definition and produce more~~ data that can be used to produce an extremely accurate sketch "from the data".

TOPIC STUDIED: Stage 5

NAME: Tom

DATE: 29 NOV 84

POSITIVE COMMENTS: Stage 5, works like a champ. Stage 4 produced: ~~at~~  
power generation plant. Stage 5 produced heat, subterranean, silver,  
cylinders and provided: geothermal power generation plant.  
What more can you ask for?

NAME: TDM

DATE: 28 NOV 84

POSITIVE COMMENTS: Read your data. List your data in terms of: structural dimensions, secondary data, details; listing each item just as often as it appears. Start sketch by incorporating all horizontals, then all verticals, and finally all slopes. ~~after~~ Check off each item as it is used. after this is done be sure to include all ~~details~~ secondary data and details concerning the site checking them off as you go. This will produce an excellent sketch of the site!

TOPIC STUDIED: Stage 5

NAME: TSM

DATE: 30 Nov 84

POSITIVE COMMENTS: Stage 5 is well under control. S-5 produces the refined data necessary to name important, complex sites. Stage 5 combined with stage III (improved) gives me a tremendous ability to obtain information from the site. Ingo, your system is truly impressive!

Positive comment: I feel S-5 is starting to become more automatic.  
It is still progressing slowly but I feel after a week of practice  
at home I should be ready.

POSITIVE COMMENTS: Stage 5 is starting to sink in. I feel I need to progress slowly on the drills to insure no errors "sneak" into the system. My understanding is coming along and my confidence in S-5 is increasing.

DATE: 19 SEP 84

POSITIVE COMMENTS: The topic I wish to discuss is Stage-5 and the difficulty of it is the subject. This is "some tuff shit". I feel that if I ever (when I) get this straight the actual session control won't be so bad.

NEGATIVE COMMENTS: I am a little concerned, right now, as to how difficult this may actually be.

HAVE ANY MISUNDERSTANDINGS OR CONFUSIONS BEEN LEFT UNRESOLVED?: I don't know.

POSITIVE COMMENTS: STAGE 5 IS EXCITING! STAGE 5 REALLY DELIVERS DETAILED INFO YET DOESNT  
PRODUCE AOL. IN FACT AOL ARENT EVEN TEMPTED TO ENTER THE DATA. S-S IS REALLY  
AMAZING.

TOPIC STUDIED: Stage 5 NAME: TDM

DATE: 12 Oct 84

POSITIVE COMMENTS: One must always be alert to repeating signals, even in S-5.  
A repeating signal, even a correct one, can cause AOL-D. If one is attentive and ~~not~~  
retrines the "Prior emanations" the AOL-D can be broken and more details may be  
gained. Although S-5 is rather simple in most areas, it will require practice  
and an ever increasing gradient to finish.

POSITIVE COMMENTS: Racetrack (stage 4) came through as a bright Aol Signal.

It was not "brilliant" and I should have noticed that. I will  
obvise aol momentarily in the future and <sup>will</sup> fully realize whether  
it is Aol or Aol Signal.
