Its muddy yellow!

Hysteresis

(1)

electro-magnetic
permanent distortion

ferromagnetic
-ing iron molecules

electromagnetic pattern
field distortion —

reverses the electromagnetic
pole & degauss
it out. (2)

hemoglobin — metal

all through the body

metal proximity

field out of alignment with
the B-field

etc
iron
steel
will
cause
a field
disturbance.

metals balanced (3)
~~or~~
unbalanced
outer rings

iodine
unbalanced

outer rings
field distortion

tin even all the way
iron balanced but will line up.

potassium single orbit
mag - well
do something
peculiar.

para magnetic
these μ \rightarrow y

dia magnetic
stuff μ goes
repelled by.

those that
just by
here

gold

odd no.
para magnetic
but not enough to
lock with.

Creation of space argument
imply a set of dimensions
points whose velocity
exceeds c velocity
of light.
flows..

Black for Matter particles
Red for photons
Blue for theta particles

Factors 8, 9, 10
label the three
axes.

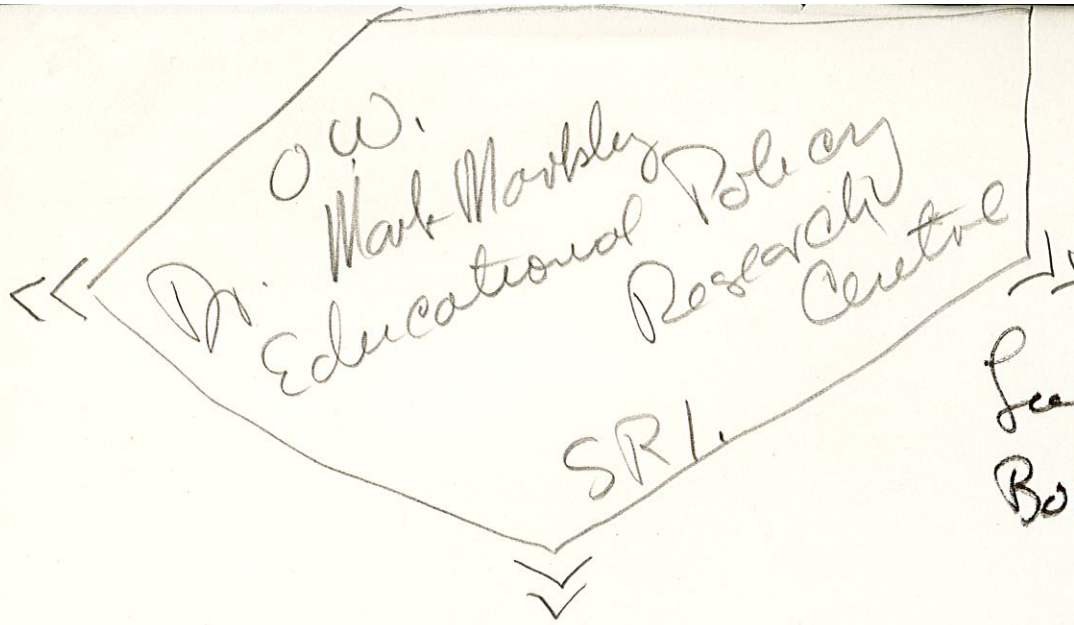

word lengths get finer as
we leave the matter portion

Nature state
Aesthetics
thought
Emotion
Effort
Solid matter

↑ finer

Particles close to the
vertical axis can
be placed into the
future as part as
measured by Merz time

Legend
Bobby

1. May R on IV II ext tactile
2. Havingrossi ~~is~~ duells
3. readings smaller with attention
4. levitation - one counter intention blowing off each day
5. forces $\left\{ \begin{array}{l} + \\ - \end{array} \right\}$ energies are the result of neglect.
the PU | motion can be reduced to
Not to gather
6. Chaos & Motion = Noise

Set up device of electrodes
which can discharge
against each other.

CRU Development 76-77

Ps: Lefo -

Sect on textu + Target's

Symbols is only one
level of awareness - and not
a very important one - transition
+ left hemisphere moderated.

15 March 77

breant & was at an
audition: ~~got a~~ dramatized
being a hustler for director, did
well, and was offered a role.

When does a prediction
become an intention?

pred/intention must be a
counter-int self/obs scale here.
foreseeing.
