

## THE PSYCHIC PSYCHOLOGY OF SOUL/SPIRIT

The biggest problem that confronts the individual (as well as new age humanity as a whole) is just finding out how to get in touch with the deeper psychic psychology of the soul/spirit life unit. People that intuitively sense that there is an upward path have in some measure a restored psychic activity going on within them. But their way is made difficult not only because the psychic psychology of soul/spirit is complex, but there is no adequate road map available for it.

Occult, mystical and esoteric writings -- so wonderful in many aspects -- all have ~~some~~ several common inadequacy. They are over-complexified, over simplified, or only engage a part of the whole. Without any wish to be criticle, for no criticism can be intended in the upward path, (things are what they are in that path), a few esoteric wrigings can be mentioned.

Helena Petrovna's Blavatsky's Isis Unveiled, a best seller in its day despite its two-volume enormous length, was an attempt to unveil the characteristics of the Equalizer, without ever specifying the target or the task. Her more monumental work, The Secret Doctrine, was an attempt to identify the soul/spiritual psychological attributes of the human fabric, and to a large degree succeeded in doing so, if one also already possesses a vast increment of psychic liberation of one's own and can thereby see her large goal which is otherwise left unclear.

Yoga texts concentrate upon how soul/spirit interfaces with the human body, ~~and~~ a profound task in itself, but ~~the~~ leaves the rest of the greater whole to speculation.

, so abundantly read,  
The Seth materials of Jane Roberts concentrate on soul/spirit and oversoul relationships, but do so without juxtaposing these with the fatalness of the human fabric.

Astrology, originally designed to monitor psychic energies and forces, has been degraded to trying to perceive human qualities alone, the worst and most destructive concentrating upon how to use the horoscope and stars to get more sex, money and power -- which we should by now recognize as being identical with the major motives of the equalizers themselves.

~~A map of the psychic psychology of the soul/spirit oversoul is not all that hard to come by,~~

The basic map of the psychic psychology of the soul/spirit ensemble is already within the You, although it might not be impressed into the brain's plate of your current body, or, if it chances to be already there, may be dormant. Like any other map, the psychic psychology map that follows can only give one the general idea of the topography involved, and show the roads and routes that will let one get from place to place within one's own You psychic psychology. At first it will seem very complex, but once you exit the other side, it is really not all that involved.
