Introduction

Published 1995

ISBN 1-885-186-83-5

There are people on the Earth today who hunger for knowledge of the mysteries of life. They may have sought to satiate their thirst for Truth through paths of science, art, philosophy, psychology, religion, or social services. Many, at the close of a long career in such fields, hear the hounds of death at their heels while their spiritual bellies ache with emptiness. They go to their deaths longing for the unknown, trembling with angst.

It may seem preposterous for this book to presume to fill some of that void by bringing to the reader the fundamentals of the natural Laws of the soul. Indeed, few people have ever considered that the soul of man has a type of matter, not unlike his flesh, although existing in a different octave of being. Few people are aware that there are principles, similar to known physics principles, that control the dynamics of spiritual matter. Furthermore, such spiritual Laws have a watershed effect upon the physical body of man and the Earth.

Looking out upon the sea of disorder within the major cities, one cannot help wondering why violent crime is becoming increasingly prevalent, and what could bring it to a halt. During the sixties the cry of liberals was for more social services, as though money or food could be the panacea. Others cried for gun control, more prisons, or other material solutions. Despite all attempts at controlling societal disorder the ghettos swell with violence, and the traditional family structure is almost gone.

There are some idealists who look into the heart of this disorder as though it were full of signs of wonderful societal transformation for the better. And yet, teenage pregnancies, AIDS, infections, robberies, rapes, and murders all continue to increase in number. By what criteria are these idealists measuring their success?

If one looks back over recorded history, pockets of societal peace and order rise out of the pages with haunting similarities of belief systems. Within each religion can be found keys that lead to the inner teachings of the fundamental Laws of the soul and of life itself. The fighting between religions has been due to clinging to differences rather than searching for similarities. The obvious similarities are merely echoes of the underlying mysteries which have traditionally been reserved for an inner circle of the spiritual elite.

The knowledge of the inner mysteries of life, held within the core of each religion, was withheld from the masses because of the danger of sorcery if the principles were applied without integrity. Any power that can transform a man's soul can also destroy his body if directed with malefic intent. It was safer to allow the alchemical mysteries, which were the core of each religion, to be watered down in a harmless fashion, in a way that could possibly change man's behavior through fear or promise of heaven. It was assumed by the spiritual forefathers that a man who lived decently might learn to think decently. If a man thought in a decent manner, then, later he might be able to control the spiritual forces with integrity and not run amok with unbridled passion.

For this reason, most religions focused upon behavioral instructions, rather than the reasons that certain behaviors could block the path to spiritual power. People have, by and large, decided that the behavioral instructions are no longer valid and so have developed many blocks to the higher teachings.

It is now time to reveal the inner teachings, in hope that humans can understand the reasons for behavioral sanctions and thought control.

The Laws are immutable. Man cannot break these Laws, but can break himself against these Laws. This is happening today on a massive scale. A man can tell himself all day long that fire is not hot, and yet burn himself, should he put his hand in a flame. Just as there are lower laws of the visible component of fire, there are higher Laws of the unseen components of fire. Many a man has thrust his own unseen components into fire and burned away part of himself.

It is possible to heal oneself through the application of higher Laws. If humans can bring healing order to their own lives, then they can begin to bring order to their families and to their own culture. If they do that, they can start to bring order to the world.

Healing the world must start with healing the self. This book holds the ancient mysteries through which personal transformation is made possible, if the applicant is sincere and willing to change. The dilettante will benefit little, except through some intellectual titillation. This book was written not for dinner table discussion, but at great price, and with great courage, by a traveler within such mysteries, in hope of helping humanity out of chaos. Since it merely recites the principles of the mysteries, it shall be considered anonymously and gnostically written, for man cannot hope or presume to create the Laws and Virtues. This is not a “channeled” book, but a book reflecting the experience of the traveler through many realms as real as the one before your face.

If you also dare to be a traveler into unseen realms, this book will guide you safely.

1993 DECEMBER LECTURES BY ANONYMOUS

The following class lectures are transcribed either verbatim from audio tapes or from class notes unrevised by Anonymous. These lectures and written lessons were given by *Anonymous* to audiences familiar with the general background of Spiritual Science. The emphasis was in the dissemination of knowledge that was normally hidden from the general public, but has had a haunting recurrence throughout the millennia.

NOTE:

- 1) All LESSONS, LECTURES and CHARTS were given in class, created by Anonymous.
- 2) Class Notes were taken by an auditor and not corrected by Anonymous and for these, it is suggested the reader also refer to the original, unabridged audio tapes.
- 3) Please keep in mind that this library is missing many of the original audio tapes (of which there were at least 50+ per month during a three year period) as well as some of the dowsing charts, Class Notes and Lessons. These books are compiled from the resources currently available to this library.
- 4) The best introduction to the dowsing system may be found in the Advanced Esoteric Spiritual Dowsing Books, I, II, III.

“Lessons” and “Letters” were composed by Anonymous

“Class Notes” were typed during the lectures and were unrevised by Anonymous.

NAGUAL ANATOMY

LESSON by Anonymous: December 1, 1993 (estimated date)

New Waveforms; Color Traits; Auric Structure

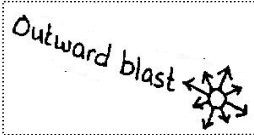

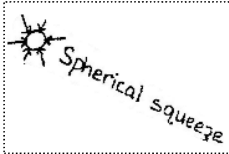

NAGUAL ANATOMY

Directions: (Add to charts)

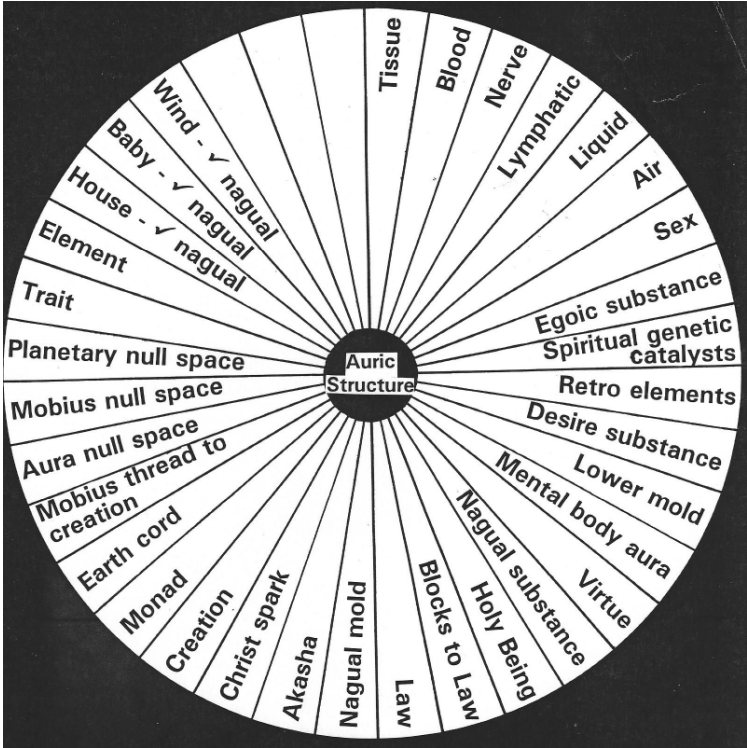

Besides North, South, East, West, Up, Down, the new soul types have:

- Up and Clockwise
- ◀ Centrifugal spinning
- Outward blast ▶
- ▼ Centripetal spherical squeeze

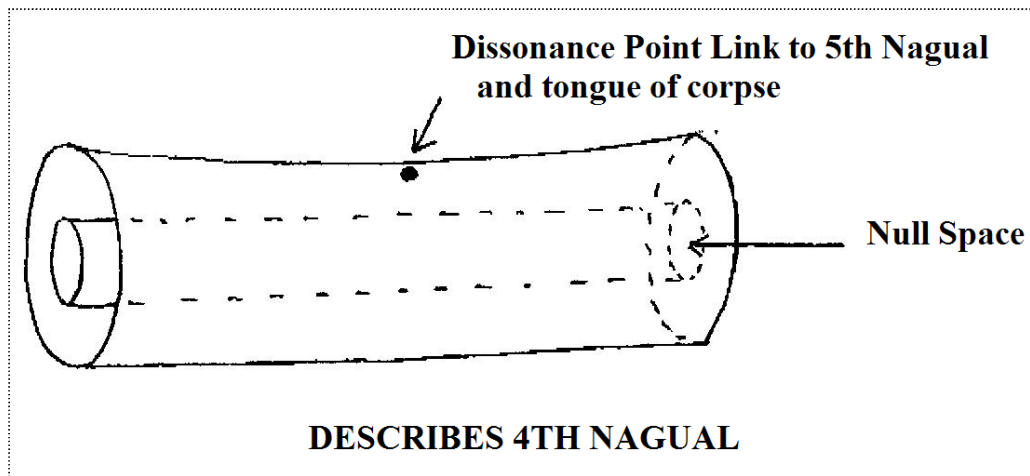

COLOR TRAITS:

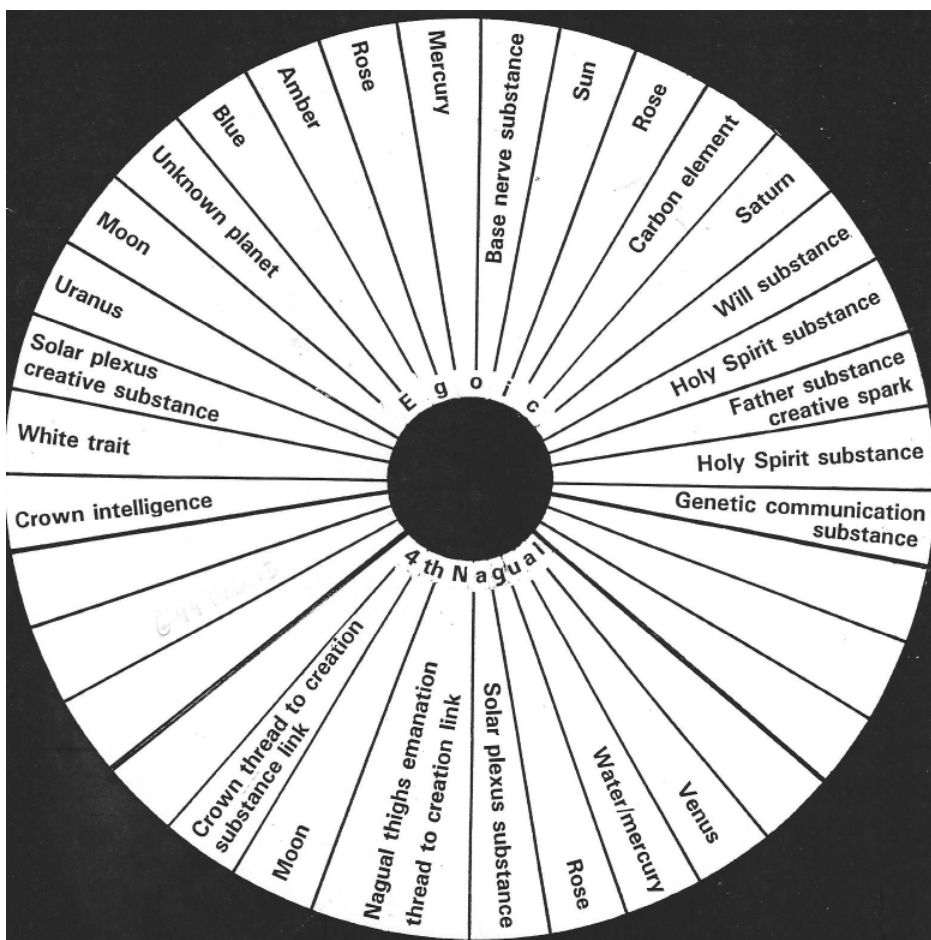

Split Time (Feet)	Amber (T1)	Green (T2)	Coral (Cerebral Cortex)
Void (Back of legs)	Rose (T9)	Air (C7)	Peach
Cecil (Vestigial Tail)	White (T8)	Water/Mercury (C3)	Pearl
Black (Itch Gland)	Violet (T6)	Aquamarine/Rose Quartz (Hypothalamus)	Purple
Red (Coccyx)	Orange (T5)	Citrine (Pineal)	Indigo
Magenta (L4)	Blue (T3)	Peridot (Pituitary)	UNLISTED

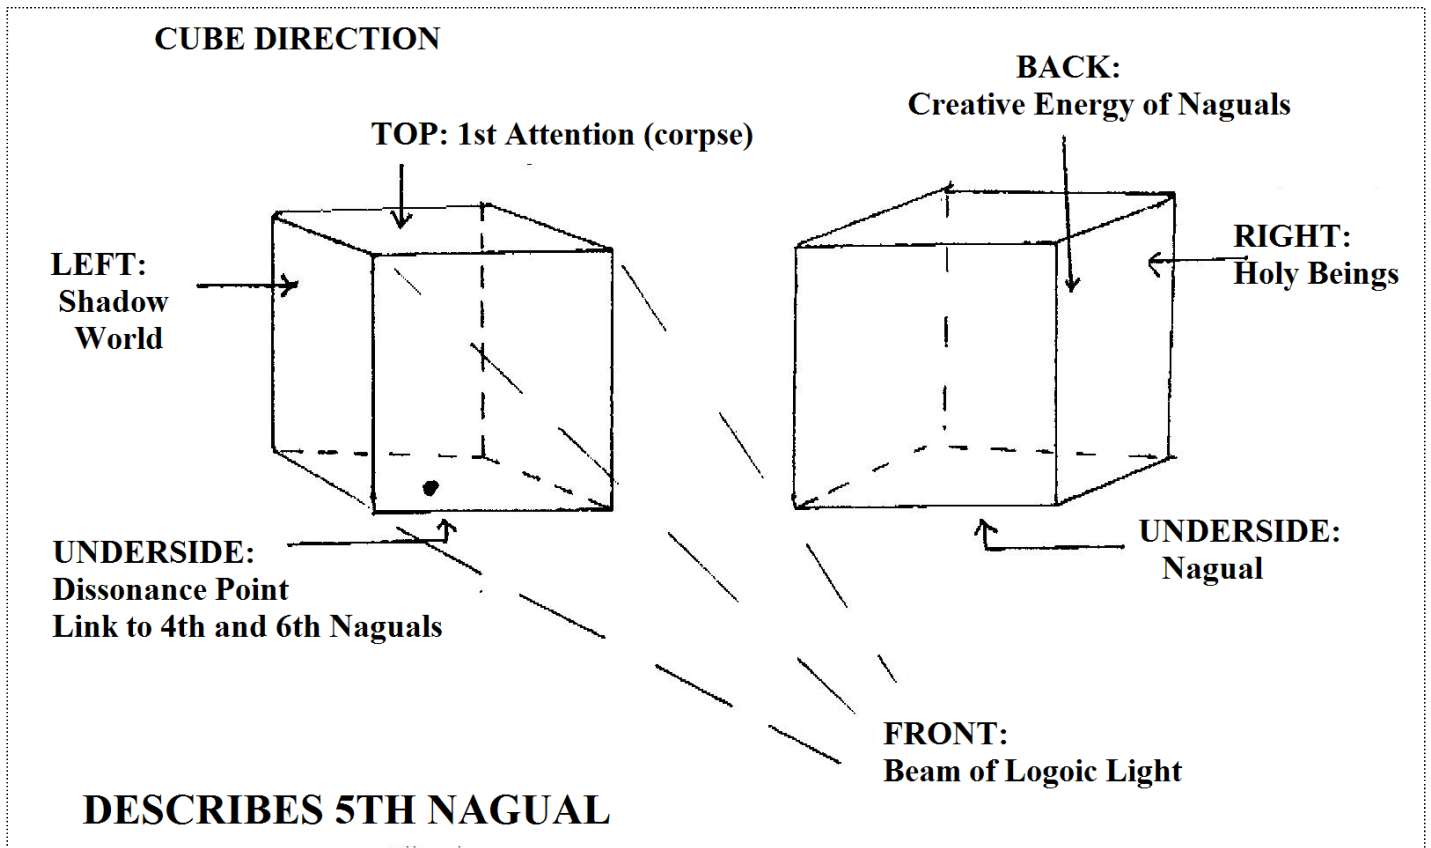

There are additional NAGUAL DIRECTIONS as follows:

TUBE DIRECTION: Inter-dimensional tube direction which is a doorway between worlds with a null zone in the center, associated with a *Green Trait* and the 4th Nagual.

CUBE DIRECTION:

It could be called a cube but it is a **direction**, correlated with **Magenta Trait and the 5th Nagual**.

The first attention walks on the top face, the nagual walks on the bottom face and the Holy Beings on the right face.

On the left face is a shadow world, the astral mist between the first attention and the nagual.

This is a desire world, a danger zone with a yin and a yang thread connecting the first attention with the nagual.

These threads are ruptured by desires. This is the mist between worlds.

On the back face of the cube are angels, creative angels to do with the creative energy of the nagual.

On the front face the whole side is filled with light, like a beam of light from the Logos to the front face of the cube.

Filaments of light go out over the seams of the cube. This is the **Nagual Lymphatic Cube**.

The TUBE compares to the Air Aura of the nagual.

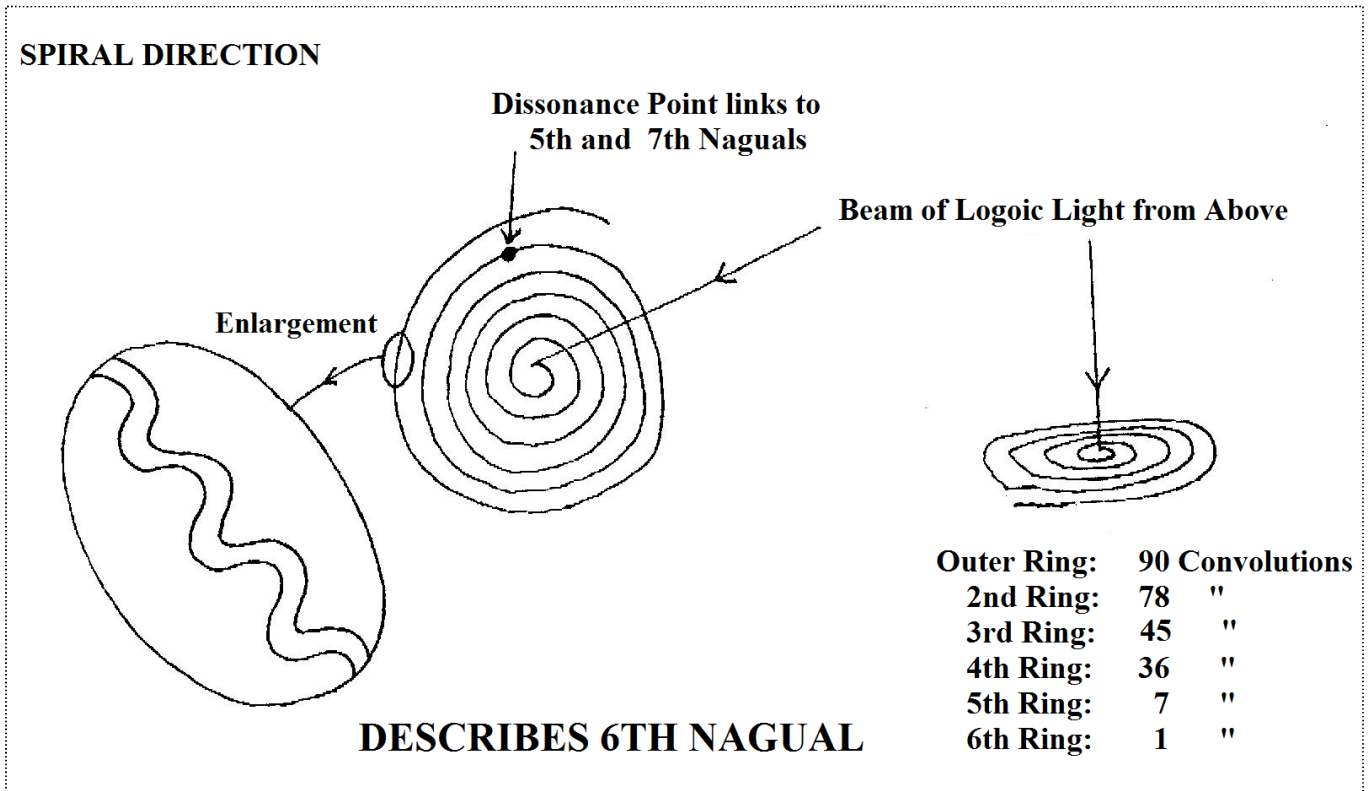

There are fundamental similarities between the 4th, 5th and 6th Naguals,

But the 4th is fundamentally the air focus,

And the 5th is fundamentally the cube focus.

They are the same being in different octaves, as if more than one beingness is able to operate independently.

Two fifth (naguals) means the ability to operate on two faces.

SPIRAL DIRECTION:

Starts outside and goes in counter clockwise six rings. Has a blue emanation and is the direction of the 6th Nagual. Each ring has a number of convolutions, like a bell curve or a snake, giving more surface area to each ring:

- Outer ring should have 90 convolutions
- 2nd ring should have 78
- 3rd ring should have 45
- 4th ring should have 36
- 5th ring should have 7
- 6th ring should have 1

There is a **Creation Thread** which is like a beam of light coming down from the Logos to the center of the spiral. The light hits on the convolutions and causes refractions.

The convolutions relate to the virtue aura and are made of virtue substance.

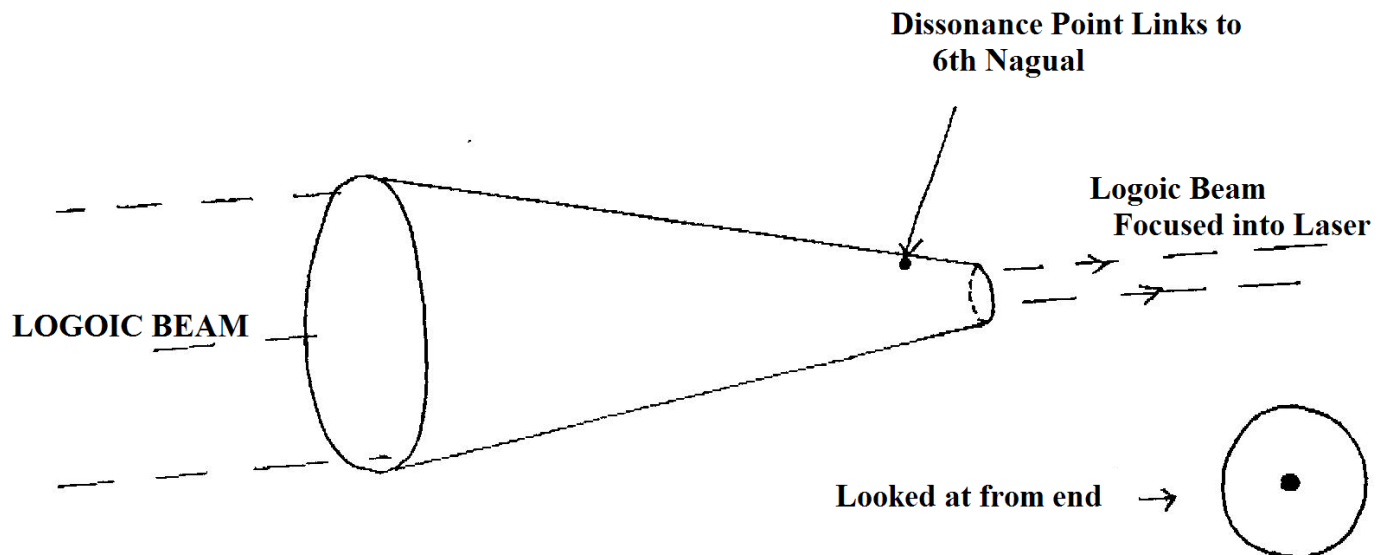

The very middle where the light hits full blast has 79 virtues.

As the nagual approaches perfection in the virtues, it approaches the beam of power.

This is the 6th Nagual shape.

The 6th Nagual has a strong correlation with the glossopharyngeal nerve; they are attached in the area of the mouth, throat and sinus. Because it has link with Logoic light, the 6th Nagual substance burns lower soul type people if it gets on them. It can burn out the soul cord of Type 2 and Type 3. The 6th level substance must be called back as it is very powerful and dangerous. 6th level Naguals should avoid being in public if unbalanced. Loss of substance occurs if 6th level Naguals resonate with a lower soul type and this will burn out their own cords too. We have got to keep a coolness about our emanations.

CONE DIRECTION

DESCRIBES THE 7TH NAGUAL

CONE DIRECTION:

This has to do with the left eye in the female and the right eye in the male.

It could be drawn like a circle with a dot in the middle. Like a cone looked at from the big end.

Logoic light shines on the big face and is concentrated and beams out of the small end in a very strong focused beam like a laser.

The color trait of the outside of the cone is closest to violet.

The consciousness of the 7th nagual is on the outside of the cone as if the outer surface of the cone is the surface of the Earth, and it can walk to the light or down to the laser.

There is a dissonance point on the cone, one tenth away from the laser end, on the top and forward slightly.

That point is where the 7th nagual links with the 6th.

There is a thread from this point on the 7th to the 6th for communication and guidance.

There is another thread from the same point on the 6th to the 5th.

The dissonance point on the 6th is on the 2nd ring in near center.

From the same point on the 5th there is a thread to the 4th, at a point in the center of the outside surface of the tube. Another thread goes on from this point to the tongue of the corpse.

We may develop a 3rd nagual. This is a bit like a dreaming body but different. This is the basis of the concept of the “double” in (the books by Carlos) Castaneda. It forms out of the substance of the desire aura of the first attention if this is very tightly controlled. It can go into form and connect with matter, can conceive holy beings if there is an intact link between the 3rd and 7th naguals and if the 3rd is sufficiently aligned, controlled and refined. It can create holy beings such as Karma Transmuters. This is why (T2) swells up so much as the 3rd nagual is so close to the physical.

Overall Strategy

December 2, 1993, Class Notes

OVERALL STRATEGY

At this point another Holy Being is present. More Ensoulers are connecting to the pineal gland. A power to command (is) put in, powers relating to Law and Virtue; strengthening of threads (is given) to aid the synergy power (of the group).

There is a male system of which the Earth and solar system and the Milky Way (correspondingly) is the female system. The male galaxy appears to be Andromeda. The **New Star** is the counterpart of the sun and the **Unknown Planets** are the male counterparts of our planets. The creation of split time on Earth wreaked havoc in the male system and the male Earth was destroyed in April/May of this year. The collision of worlds was with the male Earth. The renegades also came from the male system.

There has to be a transfer of consciousness from this planet to a parallel system that has a male and a female. It exists in the same space but with different waveforms. This is the **New Earth**; it is differentiated from this Earth by waveform and complexity of form (*See illustration from A Prophet's Story at the end of this lesson*). Only beings that are able to resonate with the waveforms of the parallel world will be able to transfer. It might be possible to move the whole Earth itself to that frequency and complexity if there was an overwhelming sound of the New Heaven/New Earth choir sound. It is unlikely that we could achieve this even if it were desirable. It is possible for naguals to usher people through a portal into this other place, but not just anyone. They must be able to withstand the waveforms. Our goal should be to usher people through so as to leave disorder behind. No zombies or diseases. It is like Noah's ark; take them two by two between worlds.

We will prepare people primarily with the book Virtues, Laws and Powers. The books will emit a frequency and become a radionic device. They should not be spiral bound as it emits a frequency that throws off the effect. If this book could get distributed it will have the effect automatically. As we gain in power we will be able to turn the waters of the world to Holy Water. Most important at this time is the ensouling, this will go on for about 10 weeks for both Type 2 and Type 3 souls. The sooner we can get past a certain number the better, as it inhibits writing.

There is a thread from the 7th nagual to all the nagual couples. The 7th nagual is the primary consciousness (the teachers); their corpse is really their 2nd attention. They branch up through 8th, 9th, 10th and 12th naguals (no 11th). From the primary dissonance point on the 7th there is like a carousel of threads to the 6th naguals in the party. If someone has only a 4th nagual, the connection is from (the teacher's) 5th nagual.

There will be a break in ensoulment for 2-3 days, starting in the later part of the 18th of December and covering 19th and 20th of December. There is a kind of **intergalactic eclipse** which is a natural phenomenon that takes place at this time. If the Earth and its twin system are the eyes, then this eclipse will cover the head. Freak creative centers will die in the eclipse. There is a correlation with Jesus going to hell for three days after the crucifixion.

The common conception of Paradise is not Heaven but Purgatory. The earthquakes and eclipse after Christ's death were the shadow of this event falling forward. To the Mayans this event would have been considered the end of the world. The eclipse will affect many star systems. It is a natural phenomenon that has to do with seasons, like the solstice of the mega system. It is the ending of a major cycle.

Everybody will probably feel strange at this time and some of our group will tend to instability. La and Do should visit as planned. Ram should stay with Le and P.

It will be a time to see into other worlds with great caution. At the end of the three days each nagual should have more power and a new trait will develop. It will be like the fire trait but with knives; increased power and danger. A trait of the 5th nagual, the **Fire/Knife Trait**, will follow Will and Intention. Poor control will cause the knives to rain back on one and destroy the 6th nagual. It is of monumental importance as matter can be readjusted with this trait, primarily thought matter. It can be beamed with a holy emanation and change mass consciousness within Law. Zombies have no real free will. **Free will** exists as the sun exists above a cloudy sky; it is there but is not seen because of the clouds of disorder between the zombies and the sun. We will be able to break up and dissolve the grid clouds of disordered thoughts so people can hear Truth. T1 used to be able to hold off the grid for a time but it would fall on her when she was exhausted.

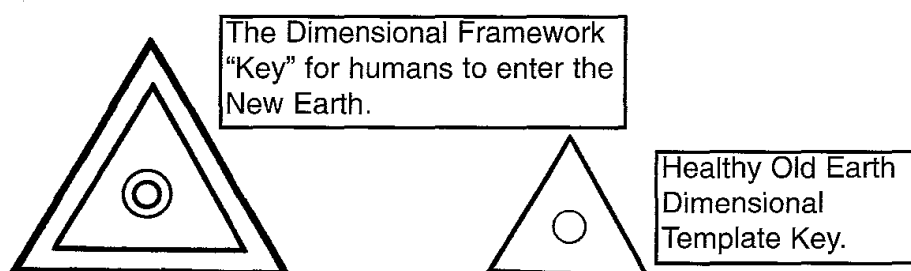

We need to find ways to help the naguals to keep track of their auras. Dowsing "Past" means resonance with someone or self in the past; re-energizing akasha files that are gone.

We need to learn to rapidly close all windows.

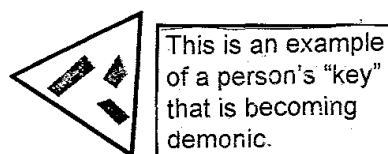

Information of the "Rapture Key" from 1995 A Prophet's Story:

THE PROPHET'S TEACHING ABOUT THE RAPTURE KEY

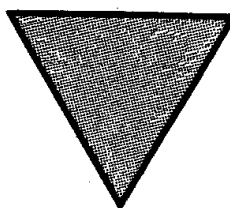

*Your own template must
match the HOLY KEY of the
New Heaven and New Earth.*

The speed of degeneration of the Dimensional framework is regulated by how much generative substance is fed to the fallen beings. The more substance that is fed, the faster the individual will decay.

Black areas indicate the percentage of individual identity that has been turned over for use by fallen beings. Some fallen beings devour the Air aspect, some the Fire, and some the Water aspect of the sense of self. They do this only if the six anti-Christ doors are open.

This is the HADES KEY that is present in humanoids who have accepted the seeds of the anti-Christ and who serve the Asuras who stand at the six anti-Christ doors.

Further Notes on AURIC LAYERS CHART (See Appendix)

Some more key words like House, Baby, and Wind auras:

The key word for the lower sexual aura is Fabric. Ask "How contaminated is my fabric?"

The key word for Blood aura is Amber

For Null space it is Vacuum

Nagual substance is Whistle or Wind Echo

SOUNDS TO CHECK FOR: Archetypal evil grid patterns have a distinctive sound.

Check: for your toxicity on each of the following;

Ask: especially for “Who has each type of portal?”

Moaning of fornicating baboons – associated with Cc and Yeti type energy, especially affects the sex and liquid auras

Whinnying horse – JMcB

Cat mating screech – Dor especially-- this affects sex and liquid auras

Lizard Hissing – Jg especially affects air aura

Moose rutting – Lesbian grid, especially affects sex aura

Possums mating – Male homosexuality grid

Blue jays/Crows/Kookaburra screech – Ensouled abortion grid sound, especially affects liquid aura

Crocodile/alligator devouring – Greed grid

Angry hornets – Desire to humiliate with words; cunning stinging speech, especially affects blood and air auras.

Sound of a gun – Fl (who was a tuba at birth); Ji (who was a violin at birth).

Screaming gargoyle sound - Bird/dog/caracara sound

Cabbage fart sound – The swarthy factor (*Note: “Swarthy” describes a cloudy/darkened auric structure*).

Bird/Dog/Caracara

Rats digging up a grave

Teeth tearing flesh

Vulture dragging a carcass

It is essential to check on all auras for tendrils:

How many people am I?

How many corpse malefic links do I have?

How many tissue resonance links do I have?

How many nagual powered malefic links do I have?

On the subject of "crucifixion" vegetables: IMMEDIATELY reduce the current intake of this group (cabbage, broccoli, brussels sprouts and cauliflower) to NOT MORE THAN one third of the intake of vegetables--not including grains etc.

Excess intake of these increases our tendency to resonate with zombies and destabilizes the group. (Current intake is 85% at the Monastery). We have reduced enzymatic activity as our spiritual bodies are busy, out working. Cabbage causes the spiritual bodies to be called back to aid in digestion. They learn to ignore this as a false alarm and so proper digestion does not take place. Root vegetables and legumes are fine. Tomatoes have a neutralizing effect on cabbage fart. Frozen or pickled okra is excellent and very strengthening at this time.

The key words for each member of the party are the sounds of our auras as follows:

T2	Piccolo	T3	Bow/Arrow/Harp
La	Brass wind chime	E	Cello
Do	Clarinet	Da	Bassoon
Ram	French Horn	Jas	Oboe
Fo	Pipe Organ	Si	Harp
St	Dulcimer	Ma	Cymbal
To	Snare Drum	D	Harpsichord
Mag	Piano	Ir	Reed
Du	Anvil/Cymbal	Jac	Bongo drum
Gr	Harmonica/Mouth organ	Rap	Cow bell
Le	Cough	B	Double bass
C	Cold wind through the hills	Po	Treble recorder
No	Glass wind chimes, piccolo, glass bottles with water		
Sn	Cane with thorns and beans, waterfall sound		
P	Metal tapping on wood, tap dancing		

TO DOWSE:

Check: Level of *contamination* of the sounds listed above.

Level of *toxicity* of sounds

Toxicity on the *auras*: (See also big list)

House...Baby...Wind...Fabric...Amber...Vacuum...Whistle...Wind Echo

Cranial Nerves for intactness and age (ideal is a healthy 25-30)

Virtue Bell Curve (See chart below) for alignment and age of: Cranial nerves...Nose...Mouth...Throat
Eyes...Planets...Heart & Lungs...Spine (each vertebra)...Color Traits...Generative organs (each part)

Recap of the last few days dowsing: CHECK:

-Over auric structure chart and body chart for *missing/foreign and holes*

-Were-animals

-Nagual eye substance out—liquefy

-Old Charts: *evil cabala*, *demon list* (all 22 pages; see *A Prophet's Story*) and succubus/incubus

-For *bridge* cracking open (which aura)

-Ages of body parts (where do I have a body part that is over/under 25?)

- Add “Unlisted Trait” to Trait chart

-Pull “*babies*” out of soul’s eyes (obsession babies)

-Tendrils in/out on all auras

ASK: *How many corpse malefic links do I have?*

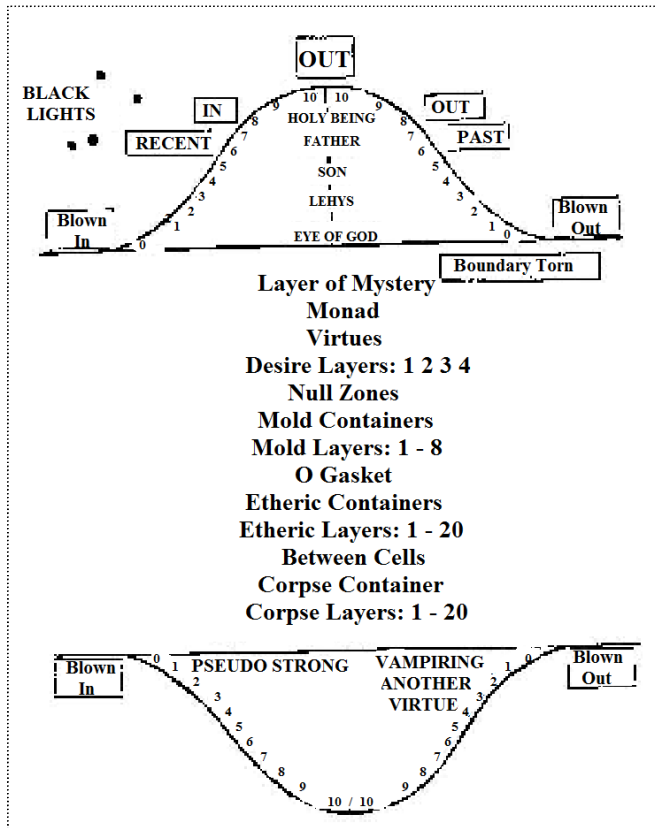

How many tissue resonance links do I have?

How many nagual powered malefic links do I have?

How many Holy Being malefic links do I have?

Virtue Bell Curve Chart with auric structure:

The Mystery of the Mobius

December 2, 1993 (*Original draft copy*)

The keys to understanding the creation of the universe rest in studying concepts such as the shape of the mobius.

The mobius shape is interesting in that it is a continuous ribbon with a twist that allows the top to become the bottom. There could be a right hand twist or a left hand twist to the ribbon. Using the mobius as a metaphor for a mold of man, one could say that one side of the mobius represents the Virtue powers and the underside represents the Law powers. At the point of twist, the powers intersect, forming a type of creative combustion.

The most primal creative mold shape is a dot inside a circle, therefore no mobius. The inner dot represents the yang, dense force of direction, while the outer ring represents the yin expansive boundary. The Will of the Father rests in the center dot as an assemblage point, or dissonance point, and six other points exist within the circle. The points represent dimensional spaces. The dissonance point is the first attention consciousness point contained within a dimensional space on a mobius layer. (*See Mobius designs on 31 levels page 22*)

The key point of consciousness, hereafter called the dissonance point or Name, can either be aligned with the Will of the Father at each step of evolution, or be aligned with death. In the lowest form, the dot within the circle, there is only one point of dissonance, but life of the soul cannot exist if the consciousness remains at that level, or if that point strays from center. Physical health, also, depends upon the center point staying in this center. This reflects an aspect of the Law of Gender, as reflected upon the physical form.

The lowest aspect of creation is the dot within the circle form, and it cannot support a soul consciousness, for it is a primal shape designed to be a springboard for higher evolutionary consciousness shapes. Even plants and animals must have an overlay of a mobius shape for their spiritual selves to exist. Otherwise, they would be bereft of auras. The dot within the circle is like the seed of the corpse. Only zombies have only the dot within the circle auric component.

The second and third auric overlay patterns are mobius patterns that can be said to lay on top of each other. The second layer is a mobius with nine dimensional points, and a key dissonance point that is not accessible through the nine dimensional points. In other words, it does not intersect the nine dimensional points. This is to reduce astral sight, and to preserve sanity. If this point is asunder, psychosis can result. This mobius is key in that Sun soul corpse auras should resonate with this mobius design and dissonance point, and animal man desire aura should be so aligned. Animal man's corpse aura should resonate with the simple dot within the circle.

Connected to this second design is a third mobius, similar to the other mobius, but with a different dissonance point. Connecting the two is a thread to Logos forces with a special dissonance point that is also one of the 31 dimensional locations relative to the third design. The corpse aura of Saint's souls should resonate with this third design and dissonance point, while the animal man monad and Sun desire aura should resonate at the same location. The key dissonance point of this third form is not the thread to creation, but is on the mobius ribbon.

Saint soul desire auras should be fixed upon a fourth auric overlay that also contains the 31 dimensional spaces, but has a center dissonance point. Dissonance points could be compared to assemblage points of the aura, but exist in overlays of each other in increasing complexity, depending upon the spiritual advancement of the individual.

Species of man depends upon whether he starves the higher mobius overlays until they rot, leaving him with a lower animal pattern, or whether he grows a more advanced pattern due to his resonance with sainthood. There are people in the world who have starved their souls to death, or who have reduced their souls to animal patterns, by their resonance with animal behaviors and thoughts. There are also people who have grown from simple soul structures not much different than a pet cat's to the soul structures of saints, because of their holy desire and hard work to align with the plan of God. This does not mean that Darwin was right. It means that man can align with God in such a way as to be shown divine Grace, in that he will be given a higher pattern so as to do more good in the world. The reason that some people have maimed or animal-like spiritual patterns is that they did not aspire to greatness, but were soothed by the siren of materialism. They fed their minds or bodies, and forgot to feed their souls.

Man was created originally in the image of God. The pattern, or image, is represented by ever increasingly complex mobius patterns that are part of the human aura, in the ideal state. The point of consciousness on each layer could be called the Name of God. The full Name of God would be the sounds of 31 dissonance points, or mobius layers, in perfect harmony.

The Virtue powers could be compared to the fabric cut to fit the pattern of the mobius ribbons. There is a correlation between dimensional spaces and Virtue powers, and increasing numbers of both with the more advanced mobius shapes. Thus, the Virtue fabric becomes more refined in the more complex mobius shapes. It could be compared to white cotton in the first shape, and go to linen on the second, and silk on the third design. As colors and patterns are added to the fabric, the dimensional spaces increase in number.

The degree of alignment with Law on each layer of the mobius can only be compared with the alignment of the dissonance point and the degree of deviation of the mobius from the design of God. Therefore, the overall structure shape, directional orientation, and primary consciousness point of each mobius reflects the degree of alignment with the primary Universal Laws.

The level of the mobius (how many are stacked on top of each other) depends upon the ability of the individual to align a point of consciousness with a corresponding frequency and complexity of pattern of God. Human evolution is determined by how many levels of consciousness one climbs, like Jacob's Ladder, into the awareness of the higher worlds. This has nothing to do with psychic ability, which has no correlation with holiness, one way or another.

Psychic ability can arise from inverse world connections with demonic forces that lead one away from alignment with perfect mobius layers, or can be a type of animal sight springing from a torn auric layer. Many dogs sense danger, or an approaching visitor, or the presence of spiritual beings, and yet those dogs are not evolved.

The sensing of spiritual phenomena becomes more complicated, as the layers of the mobius patterns stack up, in an evolved person. A thought may seem like a thing, and an emotion can feel like a knife. It takes a lot of work to clear a room of egoic elementals enough to truly see, in a psychic sense, past the garbage.

Holy, Gnostic spiritual sight depends upon the degree of refinement of perception of the dimensional fabric colors, the ability to sense the Virtue textures, the ability to detect directional nuance of Laws, and other things. Many people have lost all their colors (dimensions), their fabric is torn (Virtues) and they don't know which direction is up (Law).

The overwhelming tendency in modern society is to sink to the lowest common denominator of consciousness, which has brought our society to a near animal state. Species of man has nothing to do with race but has everything to do with desires, thoughts and behaviors. You can judge a man's desires and thoughts by his speech and choice of music or entertainment, by his associates and by his behaviors. Every man who chooses to live like an animal brings society one step closer to annihilation. The tendency to think of animalistic humans as victims has brought even greater disparity between the species, as the animalistic people gain support (financial and otherwise) for choosing despicable behaviors. The common belief that what someone else does is *their* business defies the very reality of their influence upon the young people, upon the thought form grid, and upon the fabric of the universe.

The salvation of humanity depends upon the choices that we make that allow us, and others, to align with the mold of God. Dissonance point, or pattern disturbances, create a disparity between the overlay of the God pattern, and the one that man chooses. The cord of creation that exists between the mold of man and the mold of God is then strained, and may tear asunder. The more disparate the two forms, the more likely that man will rip himself away from his creator, and lose his soul.

The more refined the soul, the more balance the individual must have to keep the soul. An animal man soul has a connection to God, and is fairly easy to align with the simple pattern. The Sun soul is more complex, and requires some attention to Law, and refinement of Virtues. Most difficult of all is the Saint soul.

There are former saints in the world who have fallen to alignment with animal man, and so have become animal man. Some of them thought they were doing God's work through some type of mission, and yet they could not resist the Law of Vibration, and became like their charges. This is why many holy people in the past chose to live cloistered lives; to avoid resonance with people of base design.

We have reached a time when saints are greatly needed, and yet the pressure on a saint soul is almost unbearable, given the spiritual animalistic climate. It is not enough to merely think good thoughts in a room full of foul egoics, because exhaustion of the spiritual bodies sets in, allowing a foul resonance at some point. This is the point when cords to the Logos rupture, and the person is pulled ever downward to a baser design.

Society must find ways to allow people of holy intention to study Laws and Virtues away from such egoics and animalistic locations. The aspiring saint must not stress his auric bodies by assuming he is safe from defilement because he wishes others no harm. The person wedded to Truth must be willing to face what is not true to the form of God. In other words, he must be willing to recognize evil.

The refusal to recognize evil is a major reason that many people have lost their souls. The Laws of Gender and Polarity are the roots of the mobius mystery. The desire to create one's own reality causes the vain man to spurn the shapes set by God, and turns a deaf ear to the ancient holy teachings that are the core of the major religions. The loss of personal responsibility to align with the shape of God, because one thinks that he just has to let a holy being do it for him, has caused the loss of many a soul.

There is a yin aspect of the mobius reflecting the Virtues, and a yang aspect reflecting the Laws. Refusal to live within one's own gender identity is death to the soul, because it does not follow the pattern of God. Hatred for authority figures or a parent also reflects upon hatred for Virtue or Laws. Therefore, hatred for authority is death to the soul.

Many people want to believe that the soul cannot die, because they don't want to go about the work of watching over their souls, or worrying about the souls of others. Jesus said, "Fear not the man who can kill your body, but fear the

man who can kill your soul.” Jesus knew that souls could rot and die, and yet such teachings have been overlooked by many who call His name.

The layers of the mobius worlds, as shown in the next page, reflect the layers of evolution possible for humanity. The ability to keep ones alignment of consciousness point with the mold of God is necessary to climb Jacob’s ladder. At the very least, one should not fall to resonance with animals or zombies.

Even animal man must have three auric layers to have a primitive soul connection to God. The more auric layers added through higher alignment, the higher the soul evolution. Holy beings usually exist on no lower than the fourth design. Therefore, it takes a fairly evolved human to access holy beings as intercessors for humanity. A person of evolution beyond the fourth mobius may have developed creative threads to holy beings on those levels, and also has a thread to creation on each of the higher mobius designs. If he gets a spiritual injury on those layers, then the holy being may be torn away from him. A person doing spiritual work must pray for healing of any torn threads to creation, which usually are at the dissonance points.

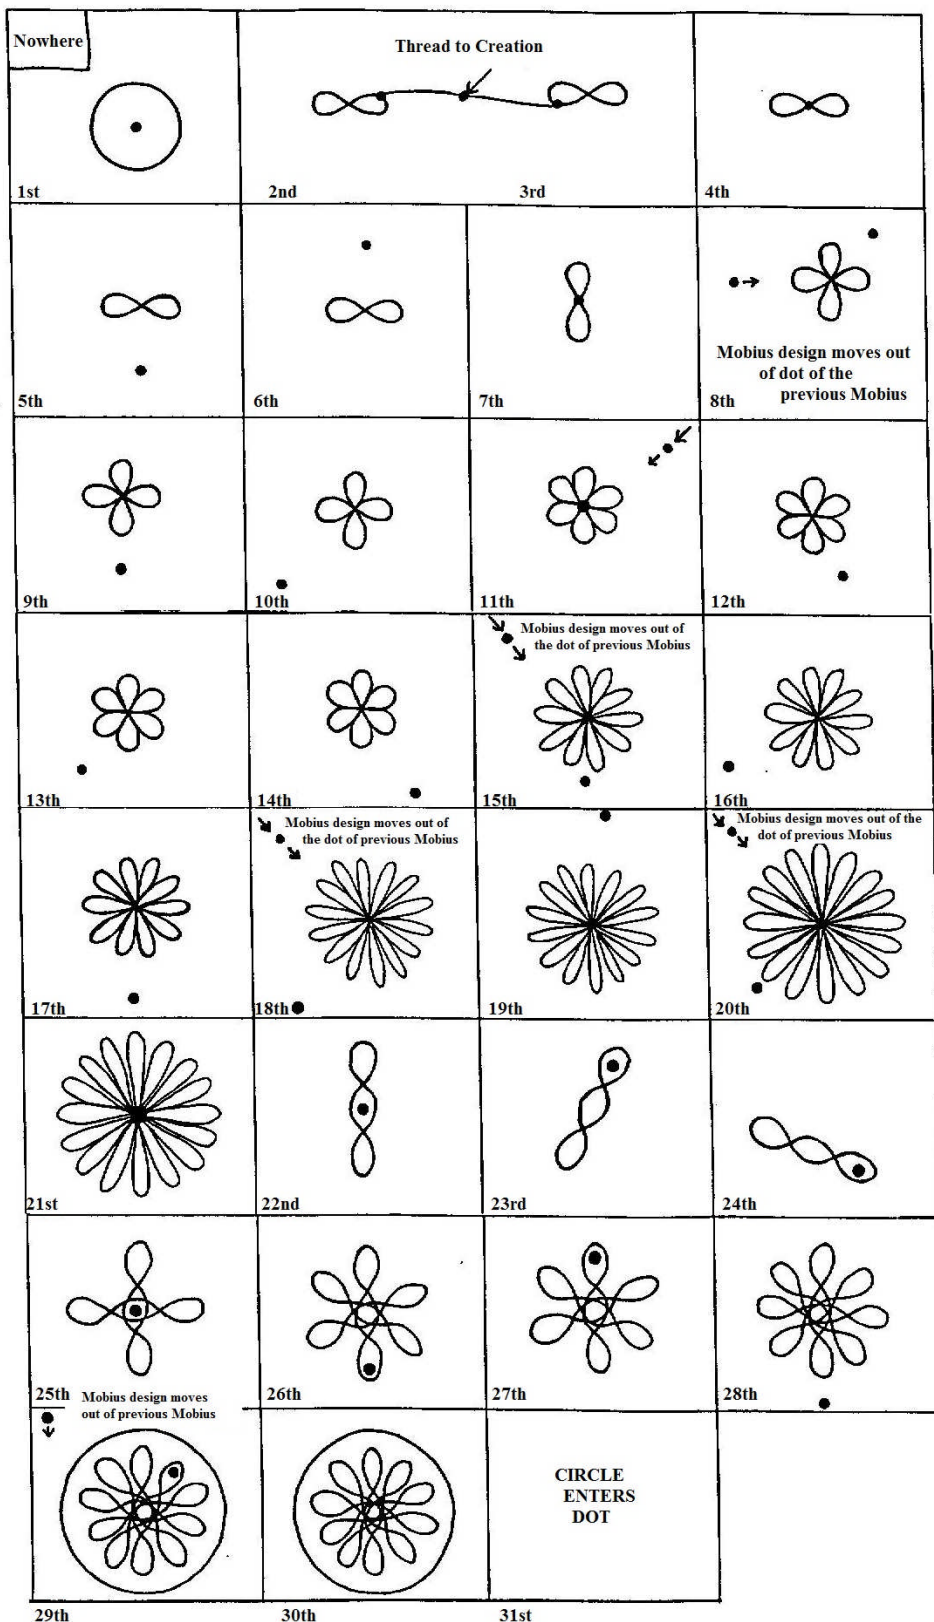

A person of great soul progression retains all the lower mobius designs, and any holy beings attached. For instance, a person whose soul is aligned with the tenth level mobius retains the first through ninth mobius levels, and can receive injury on those levels. Injury can result in separation from holy beings or in a bleeding stump from a torn thread to creation at a dissonance point intersection.

By far, the most common cause of rupture of the spiritual bodies is circular thinking. A second cause is exhaustion of the spiritual bodies by associating with animalistic people or soul-less people. The most devastating cause is hatred for that which is holy, or strong hostility for a person. It is possible for a soul-less person to gain a soul, unless he has hate for someone.

There are powers in the heavens awaiting the call of someone who aspires to be a saint, or a Sun, or even a decent animal man. Today many people are soul-less, and don’t even care to call out to the heavens, because they do not believe in God. Many of these people go to church for social reasons, and yet can not see beyond their own flesh or mental arguments.

Holiness is reflected by the consciousness of a person, and a holy consciousness can aspire to be a great soul. A person is not his corpse body, or his thoughts, but his point of consciousness, whether great or small, simple or divine.

This is the correct version of MOBIUS CHART.

It reflects the thread to creation between the second and third mobius, as well as the lack of a null zone between the second and third mobius.

The lines between each mobius could be said to represent the null zones.

NULL ZONES can be dowsed by directions: *North, South, East, West, Up, Down, In (Centripetal), and Out (Centrifugal).*

Dowsing the Mobius Chart and Soul Types

CLASS NOTES: December 2, 1993

To dowsing over the mobius chart:

Check: Each auric layer for its current mobius resonance.

Where it should be and clear any contamination that is preventing its proper location.

You will have to determine what is causing the improper mobius resonance.

Check for threads to Holy Beings on each mobius level and

The location of the dissonance point on the mobius

The proper dissonance point would dowsing as being in the Right quadrant of the Complexity Density diagram (See below).

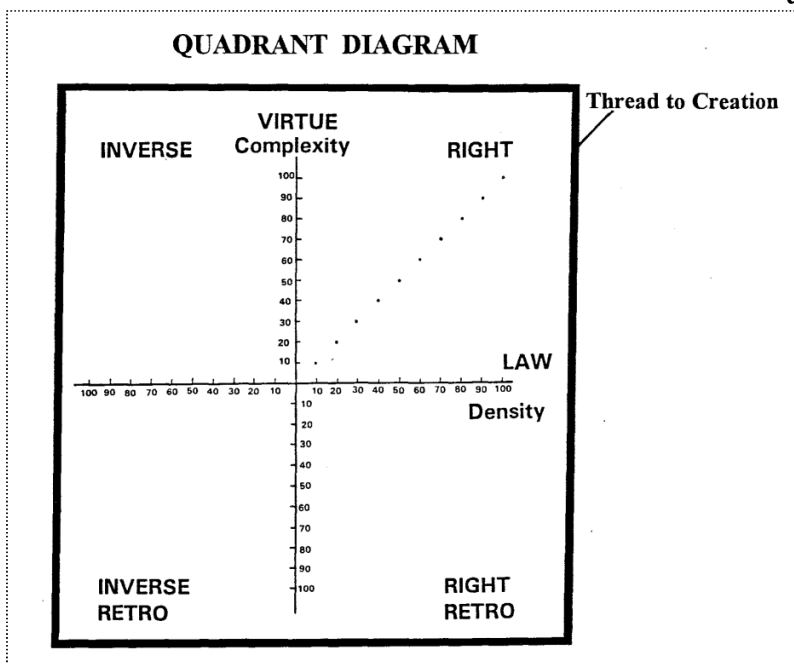

Any improper point would not be in the Right quadrant.

Null zones are the layers between the mobius levels.

Naguals Exist on the Monadic Point of Consciousness

LESSON December 2, 1993 (estimated date)

Notes on today's problems

Naguals exist as a type of holy being off of the monadic point of consciousness mobius. Resonation with animal man or zombies causes the nagual threads to creation to rupture. Depending upon the level of development of a nagual, the more stress is placed upon the threads to creation of that nagual, since all the lower mobius designs apply.

Nagual egoic/desire elementals left hanging out often glob onto zombies and then form deadly portals for all of you, and can be traced to a "renegade link" demon (not the other renegade type). Leaking Threads to Creation on any mobius level also produce globules, like soul blood, that spill out from the bleeding stumps, forming holographic portals to zombies.

You must locate all stumps and seal them off. **Check** each mobius layer on the body parts diagrams for leaks. What dowses as werewolves is coming through holographic connections from bleeding stumps on many mobius octaves relating to many body systems. These will keep eating till they eat your soul. Poor thought/desire control and links to zombies reflect upon null zone toxicity, g-protein toxicity, and retro-substance toxicity on one or more of the mobius layers. We have had a tough time trying to keep some of you from rupturing.

The group clearings, at this point, will not work if one of the members has an open window from a desire/egoic of the past/present/future out to anyone. You would just keep sucking in more disorder. The next few days, I am going to concentrate on condensing the Laws, Virtues, and Powers to book form, and less on spoken teaching. As I pull it together, I will fax lessons. I don't have the energy to do both and also work with ensoulers. I ask all of you to remove all agitated mental states, try to dowse over the charts for mobius levels to avoid zombie resonation on your desire egoic, or physical level, but especially check your monadic resonation. **Two pages of charts** (*Currently not available.*)

INSTRUCTIONS

Do not do group clearing for now.

A. Clear **retro substances (A-G)**

B. Pull back **egoic/desire substances/elementals** to body parts and aura layers.

C. Practice locating **auric ruptures** using DETAILED *complexity/frequency*;

Asking which *body parts* and *male/female* .

D. Clear all **null spaces** and heal **boundaries** between the auric layers afterwards.

Also: healing will not hold until null spaces are clear and egoics are returned.

E. Group clearing is worthless if **windows** are open.

Ripe vampires

Saint Globules on House Aura

Sexual prana vampires in...

Sucker world cysts hatching in some of us...

Desire threads: into the Po who then funnels stuff into us

Nagual demons (unusual quantity produced today).

Monad: When the monad is in the first dot of the first mobius, the dot being in the periphery, it is a death sign. When the monad or aura is found "Nowhere," it is often encased in a sucker world.

Soul type: Add "Werewolf" to the list:

"Warewolf" = zombie empowered by nagual created globules.

This is why so many naguals were chewed up this morning.

Soul type list:

Saint...New Sun (type 2)...New Animal (type 3)...Werewolf...Zombie (no Nephilim)

A line (was found) from No to the Po

Clo is "nowhere." Enclosed in a sucker world, is splitting, leaking and vampiring some of us.

Inverse retro sucker world on Wol's House Aura

Li is being affected by a werewolf. In his case, the werewolf seems to be a teenage girl. Our neighbor, O, is vampiring Li. She is fueled by a globule which would eventually run out of fuel from a sucker world originally created by one of our nagual members. Li has only had this for about one day. To do: disintegrate O's sucker world which is feeding her werewolf.

Example: Why was that sucker world created? A member was leaking soul fluid and wherever he walked he left a trail. A lot of our members have this leaking on them. This sucker world seems to originate with Clo and carried around with all of us. To clear this disorder; pull to throat and blast and go to point of creation.

Pull Clo's holy being back. Dowse over the student chart to see who has this disorder globule. Virtually everyone has it. Remove also from A.

Fo and Si have several werewolf connections. Si has 4 at least. Locate on the body chart.

Ask: specifically for "How many type 2, type 3, saint, werewolf, zombie, vampire, or other type connections you have?"

Check: Cranial nerves are very important threads to creation. Many are split. Check condition.

Students:

Sn: there is severe danger for her relating to vampires from her having 5 sucker worlds around zombies who then are becoming vampires to others as a result.

Ab has some vampires as well, due to globules out. A lot of this problem is succubus/incubus related.

Wol has werewolf energies coming from 2 people due to egoics out. A stump is bleeding at the spine level; 16th virtue/3rd cervical dripping out of Wol.

Ram has 27 vampire connections due to desire tendrils out during the last 2 days.

Jac has 5 vampire connections due to egoics out.

Former student is dowsing as Pa but who is in fact Ji/G and is a portal for werewolves. She has 37 werewolf portals into the group.

Fl has 8 werewolf connections into our group into Ir, Du, and Si, Li, Fo etc.

Raf has 5 vampire connections in this group. **Mag** has 3, **Jg** has 7, **Ni** has 83, **Dor** has ---, **Cc** has 53, **In** has 69.

Jas has 25 vampires in him. **Wol** has 24 vampires in him. **Mw** has 26 werewolf connections. **An** has 35; **Lu** 15.

Ask: "How many of each of the above connections are affecting any parts of my spiritual anatomy?" Disconnect. The biggest problem causing great disorder in our group right now is due to bleeding stumps of the aura resulting mainly from hate elementals. What happened was that our auras got globules in them over the last few days partly because Sn was having grudges and leaked nagual creative substance all over the place. Du got cranky which made things worse. Hate elementals breed. You have to get rid of them because if you start resonating with them, it causes big holes to appear in your auras. You must not own them.

We cannot allow any irritability or hostility to creep into our group because of this reason. Naguals can create demons out of hostile thoughts which then start a chain of opened wounds that then create werewolf and vampire portals.

Jas is leaking nagual substance a lot.

Ram has a tendency to feel a hate elemental. She imagines a whole scenario of murder and creates a whole sucker world out of the scenario. She created 5 of these sucker worlds recently. They have damaged Jas, Si and For because of her uncontrollable fantasies in reaction against the presence of hate elementals which originated with Sn.

Li is leaking nagual blood aura. There is like a nagual overlay that he is leaking. Li has a downward spiral because of globules from Ram that she brought with her.

Gr's monad is leaking due to zombie resonance. She also has 57 vampire connections from past nagual substance left dripping everywhere. She has 37 werewolf connections still present.

Wol: 23 werewolves on Wol's threads. This has to do with Mal having some of his substance on Wol. Werewolves are coming through Mal's substance on Sn. It is like malefic holy being connections.

NOTE: *You should check not only nagual substance out, but also monadic, corpse complexes and your Holy Beings out.*

Mal also out to Jac due to eye substance.

Sn's globules are on To. Sn's Holy Being is on No and has gone crazy. It has to be destroyed. Sn has nagual substance on Mag. No and Gr have egoics with Sn.

Si has nagual substance on Ram and some hook into Wol's nerve aura.

Clo has monadic drips on Du. **Jac** has an egoic on Du. **Li** has nagual substance into Mal. **Sn** has a lot of nagual substance on Du. **Du** was agitated because there were hate elementals in that substance. **Li** has monadic leaking on Ram.

Ab's Holy Being is on Mag. His monad is leaking and he has werewolves on him. He has nagual substance with Jas. He is vampiring No's blood aura.

Se has nagual stump drips in several locations where she has been and a Holy Being is leaking.

Gr has nagual globules on 75 people.

Ask: "What kind of 1st mobius contamination do I have?...2nd?...3rd? etc.

"Which body part on the 1st mobius is disturbed?...On the 2nd mobius?...Etc." Go up to 31st mobius.

ADD TO CHART:	Split	Boundary	Holy Being	Body
	Werewolf	Other soul type	Nagual	Wrong point..point gone

T2 is scanning the students to see where the major portals are at the level of each mobius (body parts, Name, House, Baby, Wind, etc.): **NOTE:** There is a lot of sucker contamination at the mobius level.

Gra: Blood system is affected at the 5th mobius level through a globule.

Wol's: Holy Being is injured at the 8th mobius and sucker worlds are eating his Holy Being on the 8th mobius and werewolves.

Clo: has several cranial nerves split relating to her Holy Being on the 7th mobius, having sucker world's globules on Wol. She has 79 werewolf connections due to her essence being out to zombies (i.e. her nagual substance which has been leaking upon zombies because of her desire/egoic connections).

Se has a lot of contamination from Gr.

Si has a 9th mobius Holy Being contamination with werewolf connections at the brain level, and sex aura contamination of her Baby aspect affecting nervous tissue.

Top has Wol's Holy Being on the 9th mobius relating to her glossopharyngeal nerve and relating to Wol's bladder and former nagual globules with 7 werewolves at the 9th level mobius. She has a House problem at the brain level relating to sucker worlds of the 9th mobius originating from Li's nagual's solar plexus that has at least 8 vampire connections.

"**FI**" sex aura contamination is on R at the 10th mobius level from the plug-in nagual that she had. She would dowse as a nagual vagina on T3's monad with 9 werewolf links on the 10th mobius.

Top: Ex-nagual substance from Top affecting Si's 10th mobius. Si's Holy Being is being eaten by 35 werewolves and 37 vampire connections from Top's old nagual substance on her.

For has foreign sexual aura contamination; Holy Being 10th mobius contamination from 5 vampire connections coming through Se's egoics.

Se has a Holy Being 10th mobius problem affecting Jas's lymphatic tissue and Jas's sex organ with 78 vampire and 14 werewolf connections.

Top has her monad leaking and a Holy Being crisis at the 10th level mobius leaking on Li's nagual causing it to split. Seven vampire connections are affecting Li's nagual.

Nob has part of someone else's split crazed Holy Being at the 10th mobius. It needs to be dissolved.

Ram: A relative of a student is coming through Ram's tissue aura, 12th cranial nerve, 10th mobius nagual link.

Nob: An older nagual globule is on her father and a 10th level mobius Holy Being is associated with this. Fifty seven werewolves and threads are out from this.

Gra: Her 11th mobius/5th cranial nerve Holy Being is on Si's nagual; the 8th cranial nerve is severed on Si's corpse as well.

Ram: Has an injury to the Holy Being on the 11th mobius, brain level monad and Holy Being. Four werewolf connections are through Li's nagual substance leaking.

Li's 11th mobius Holy Being is split due to 45 werewolves from Clo's zombie connections or through her nagual's leaks.

Ram's Air aura is split at the 11th mobius due to a foreign crazed holy being with 54 vampires and 13 werewolves resulting from her nagual substance being out to Ri; and to Ji---35 vampire connections coming in on the 11th level through Ji to the group on the 12th Mobius, of T3's 6th cranial nerve.

Jas: Holy Being of Jas on T3's 7th twin nagual with 13 werewolves.

T3's 7th twin nagual point of boundary is ruptured with damage to the yin 7th twin nagual at the fallopian tubes. 7 cords are severed. 46 werewolf connections to the naguals are coming through Fl at 12th level.

Fl has 57 plug-in nagual substance werewolves and 82 vampire connections, maybe more, on the 12th level affecting T3's bladder, his 8th nagual and all his other naguals. A ripe vampire is coming through 12th mobius holy being of T3 with a zombie, bringing 57 vampire connections and connecting to Li's corpse at the pancreas.

Jac's 13th mobius, 7th cranial nerve has a ripe vampire and 35 werewolf connections due to desire tendrils out to zombies and Jac is leaking monad substance at 13th level to zombies.

T3's 14th Mobius, 9th cranial nerve has a ripe vampire coming through the 10th nagual Mercury planetary disturbance. 8 demons must be disassembled, chopped and returned to point of creation. A nagual injury is on the 14th mobius, 10th level nagual out to Ram.

Gr: her 15th mobius, 12th cranial nerve, House contamination, intestinal level holy being (by Gr's old nagual substance with attached 13th level holy being substance) who must be destroyed because it has 92 werewolf connections and 82 vampire connections linked into Mal, T3 and Du's sexual auras; corpse level.

Li's 16th mobius, 5th cranial nerve is split relating to a former student's holy being gone crazy. Disintegrate the holy being attached to his urinary tract. Li has line to Rap needing to be dissolved.

Jac has the same thread in him, with 24 vampires of female vagina anatomy and skin of the solar plexus.

T3's 8th nagual has a 16th mobius toxicity of eye/brain toxins relating to monadic dripping of Ir.

Ir's Holy being needs to be pulled back, with retro substances on Si at the 16th mobius and a split thread relating to Gr's monad at the 16th mobius.

Li's Holy being thread is going to him as well. Li's holy being injury is reflecting on 56 werewolf clones coming through Sn at the 16th level.

T3: his 7th twin at the 16th level has a ripe vampire affecting the 10th cranial nerve and spine. 8 werewolf connections through Si's body skin connection to St who has a point off on the 16th mobius holy being linking Si's body skin connection to St who has a point off on the 16th mobius holy being. One holy being linking a (desire tendril) to Nob with a sucker world and 96 werewolf connections linking also to Gr with 7 vampire connections affecting Ram's Baby level thymus (in fact it starts from the thymus of Ram's Baby).

Clo: Solar plexus holy being problem from Clo. It is split from 16th level mobius linked into Li's corpse with a desire tendril and 10 werewolves.

Ex-student hooked into T2 at the 7th twin nagual level. 16th mobius with globules is throwing T2's 16th point off with ripe vampires due to a holy being left with them, who must be called back.

Ji's nagual vagina on T3's 5th nagual. Future holy being is split at the 16th mobius linked with Li and following through to Sn with werewolf connections.

Li: 17th mobius, 6th virtue/6th thoracic vertebra; 2 werewolf connections with a nagual vagina of a former student on Li's nagual feet which split his cord at the 5th connecting to G's 8th nagual causing a holy being split connected to Gr and 2 vampire connections.

Alp: her 18th mobius, 12th cranial nerve of an holy being is affected by Mal's old nagual globules throwing the point off of the holy being with 9 vampire connections and 7 werewolf connections.

Rap's solar plexus has 9 nagual globules affecting a holy being of the 18th mobius level. The brain of the nagual of an ex-student is on Rap's head on the 18th level. In fact it is a crazed holy being connected to the nagual which needs to be destroyed.

Si: The brain of Si's holy being, 18th mobius is affected by an ex-student's nagual substance causing a monadic leak with retro substances; a spiritual attack, a werewolf and 23 vampires with a thread to Ram's monad and Se's nagual at the 9th cranial nerve.

Ex-student's vagina on Sta's lungs on the 18th mobius at the holy being level.

Se's holy being at the 18th level mobius, 5th level nagual, contaminated with the vagina of a former student.

Gr's holy being 18th level, old nagual substance to be dissolved on it with 36 werewolves connected and 2 obsession demons. A downward pull is on Gr's 19th mobius.

Ir: A Holy Being of Ir that needs to be pulled back.

Rap has rotting old nagual stuff and a thread going out to Sn, St, Li, Wol, Se and another one to St linking to 5 werewolves.

Ripe vampires on the 19th mobius is coming through Nob's corpse level with a thread to Li's corpse level. She has old nagual substance with an attached crazed holy being at the 19th level contaminating Nob and Li. It is needing to be destroyed.

Ripe vampire on the 20th mobius on G is coming in through Si's nagual desire tendril linking to Ram. Another ripe vampire joins up there and goes to Du to Top to Alp to Mal. Another ripe vampire joins there, goes to Li, to Kimo to Se to No to Pa to No. Another ripe vampire joins there, goes to Nob to Li to the Po to Se to Top. Another ripe vampire joins there at the 20th mobius with an evil power source pseudo Anti-logos right, linked to Ir's old nagual substance contaminated with obsession clones on Ir. There is an evil left power source (pseudo Anti-logos left) and another ripe vampire linking to Ram.

These are all connections: nagual vagina substance of Ram on Nob to Pa to the Po to Li, to T3 to Jas to Li to G and causing a holy being to rupture on G's 20th mobius.

Ripe vampire is on the 20th mobius holy being of T3 and old nagual rotting substance with a thread to Ir. Rotting nagual vaginal substance is connecting to Mal's thymus, Wol's nose, Jas's holy being and Jas's nagual at the spine with obsession demons and to the throat of G at the 8th twin nagual level with obsession demons connecting to an evil power source.

Evil cabala link is coming in through T3's brain from a ripe vampire connection to a person being ensouled. This person seems to be Ji---another ripe vampire from Ji to T3. An evil left power source connection is coming in through T3's bronchial tubes and an evil left source is coming in through T2's intestine from a person being ensouled. Another evil power source on the 20th mobius level is coming from Ji---T3's epididymis power source and T3's right lung obsession clones---another ripe vampire is connecting there through an egoic.

Top is connecting to (the teacher's) genitals into Ram's nagual's pancreas into Du's sex aura with a ripe vampire connection there to Ir's brain. Old nagual substance is on Ir's brain connecting to Pa's holy being through a globule, Top's uterus, Se's holy being and 4th naguals.

Evil left source from Ji affecting Se's 9th cranial nerve. A ripe vampire with Pluto clones is connecting to T2 7th twin nagual: obsession demons. Another ripe vampire connecting to Ji and to T3's monad: a ripe vampire to Ji. 79 werewolves are needing to be removed before Ji can receive a soul and 35 vampires are siphoning into T3's monad. There is old nagual rotting vaginal substance in T3's urinary system, an unknown evil left power source to Ji and to the soul toilet. 7 obsession demons to T2's 8th nagual intestine to another ripe vampire in Ji's urinary system, plus 65 more vampires there connecting to T3's 7th twin. Another batch of 13 vampires: evil left source, future world fuel (is found).

24 vampires to Ji and an evil human connecting to Ji's hypothalamus and monad (that she is trying to receive, we should say) and 5th lumbar vertebra are hooking into Li's corpse blood aura. Old nagual vaginal substance of Ji, a soul toilet evil left source, is affecting Mal's kidney and the nerve aura of Jas with a ripe vampire.

Old nagual substance is on Gr, Du, Li and Sn. 45 vampire links are there connecting to Si's sex aura on the 20th level. Old nagual vaginal substance on Jas needs to be dissolved on the west aura of his nagual. Evil human on the holy being of Ab linked to Ji's old nagual vaginal substance. Ji's old nagual vaginal substance is on Wol. A ripe vampire and 14 vampire connections are linking to Wol's 1st virtue and his monad with obsession clones to Wol's 7th virtue. Obsession clones on Mal draining his nagual's testicles. Jas has a skin contamination with old nagual substance, with an evil left source to Ji, and old nagual vaginal substance attached to Gr's pancreas.

Li's ripe vampire and Duke's urinary system are all linked with the nagual substance. Ram has an evil left source to her monad.

It is extremely important to control essence, and especially hostility. Hostility is the worst. Circular thinking should be avoided as well. We are having problems with people still putting out a lot of nagual egoics. Once the nagual substance is out, it may take a lot of work to track it down because it is a high level of mobius holy being substance. A person who didn't control her emotions caused holes in members' auras and caused leaks infecting the whole group with globules. Uncontrolled sexual circular thoughts from (--) caused a lot of sucker world problem.

NOTE:

- You have to make sure you are not leaking before you do group clearing in order not to spill essence or substances on people of the group. Check threads in particular.
- Help disintegrate the old nagual globules on Sn.
- On the chart "Vampire but holy OK" is a person being ensouled, sucking holy substance from intercessors during ensoulment. This causes physical weakness, cloudiness and exhaustion when it happens.

Dowsing Problems Defined

CLASS NOTES December 4, 1993

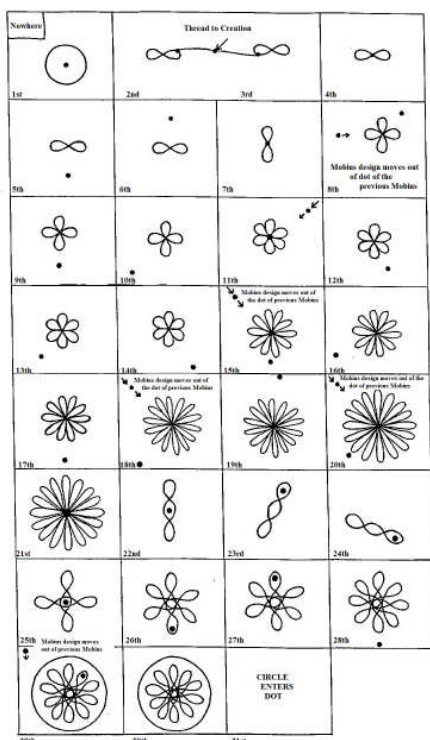

Zombie connections: Many of you in your dreams are traveling and having zombie connections. Virtually all of you have zombie connections of this type. There is like a body-cause dream state producing these links. The connections may result from an old relic of yours which went out and was activated. Dreams might have to do with parts of self, wanting to come back--in particular nagual globules that had been embedded in people in the past, when you did not control your thoughts and emotions appropriately.

Retro substances: All substances, including Holy Beings and nagual substances exist on one or several mobius layers. If the mobius is not aligned with God, then it becomes disfigured or in the worst case satanic and becomes a reverse mobius.

Determine direction, mobius, null zone of origin, etc. and disintegrate.

Werewolf connections reflecting on retro substance contamination: Retro substances shut the function of the neurotransmitters in the brain. Milk the uvula.

Inverse/retro/not-going-toward-correct-mobius null zones: There is supposed to be a null zone between each mobius layer of the aura. A null zone keeps two auras apart. Think of your auras as stacked upon each other. Between them are like two magnets facing each other causing like a sponge layer of resistance like a pressurized zone. This is a null zone, which might be also called a dead space. If the poles flip, there can be a collision of the auric components similar to what happens with planets. The null zone then ruptures which causes the substances to switch polarities (retro substances) and to get disfigured. There should be a null zone between each mobius layer, like a line.

Thinking of the line ask: "Where on this line do I have a rupture?"

There appears to be desire elementals out or in.

Check: Direction...mobius...null zone...where the elementals come from, etc.

Do: Disintegrate. They contain a kind of memory bank you don't want to keep.

Any Old Nagual/Sun Rotting Debris from the past (may dows as future).

Residual Old Nagual Mold Essences/Substances: Include sucker globules dowsing as future

Relics forming Portals. Dissolve.

Agitated new nagual elementals: Use soul blocks chart (next page) to determine the tendency (murder, hostility, hating a gender, etc.) of the elementals.

Directional contamination:

Ex. 1 Ask: "Where do I have a north/south/east/west/up/down contamination?"

Use To Do chart.

Ex. 2 Ask: "How many NSEWUpDown werewolves or vampires do I have?"

Ex. 3 Ask: "Downward Pull—which direction?...Centripetal or centrifugal?"

Your old nagual globules/elementals: Were embedded in other people and are coming back to you now as a natural process. According to Law, elementals of a certain type tend to come back to their creators when it is the season.

Wind-related elementals/Baby and House-related elementals:

Ex. 4: "Where do I have any old Wind/Baby/House aspects of self, coming back?"

Check: Body Parts...Mobius...Elements...Direction...Complexity/Frequency

Elements: Look at your elements and ask "Which ones have a downward pull?"

Use each section of the elements chart separately (1-100 then 100-200 then 200-300, etc.)

Ex. "At the 1st Mobius level, which of my elements have a downward pull?" or

"On what mobius do I have 1-100 elements with a downward pull?" (See: Elements in "October 1993")

Parts of Holy Beings, leaking stumps, etc.: Determine mobius level, direction and **Color Traits (Ref: page 1)**

Ex. "Where on this mobius do I have a water/mercury disharmony? What direction is it coming from?" or

Ex.: "What trait contamination do I have on this mobius? What direction?"

Ex.: "How many blocks to clarity do I have on rose/blue/fire...trait on this mobius?"

Check: Complexity...Frequency...Direction. **Do:** Disintegrate all blocks (mainly globules)

Mobius layers: Each mobius layer has a different directional focus.

Months and Planets in relation to mobius are composed of traits and directions from the core, the Sun.

Use mobius problem chart to check condition

Mobius Problem Chart: Left...Right...Abnormal...Foreign...Too large...Too small...Former self...Blocked

Thread to Creation connecting dissonance points between 2nd and 3rd mobius:

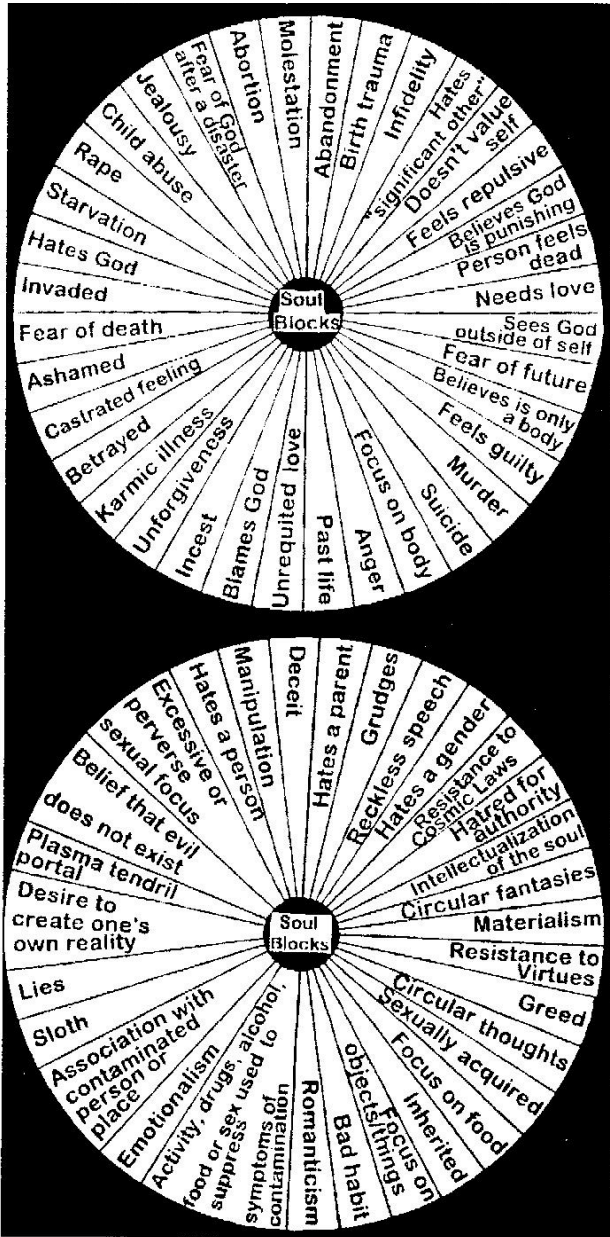

This thread maintains the soul. If it is not there, it is impossible to maintain the soul. A minimum of three auric layers is necessary to have a soul (Father, Son and Holy Spirit). If a person hates males, females or a parent, the thread to creation between the yin and yang arms of the third and second mobius would be disturbed and destroyed. Hating Law would destroy the first mobius. Hating the Mother would destroy the third mobius. Hating the Father would destroy the second mobius. Hating authority would destroy all three. **The overwhelming focus** would be Law for the second and Virtues for the third mobius. If a mobius flips inside out it causes everything to go out of kilter. This is why the rotation of each mobius is key.

Check: Rotation of each Mobius...The Dissonance Point...Shape...Any foreign matter...Direction
And % of Intactness of Thread Between 2nd And 3rd Mobius.

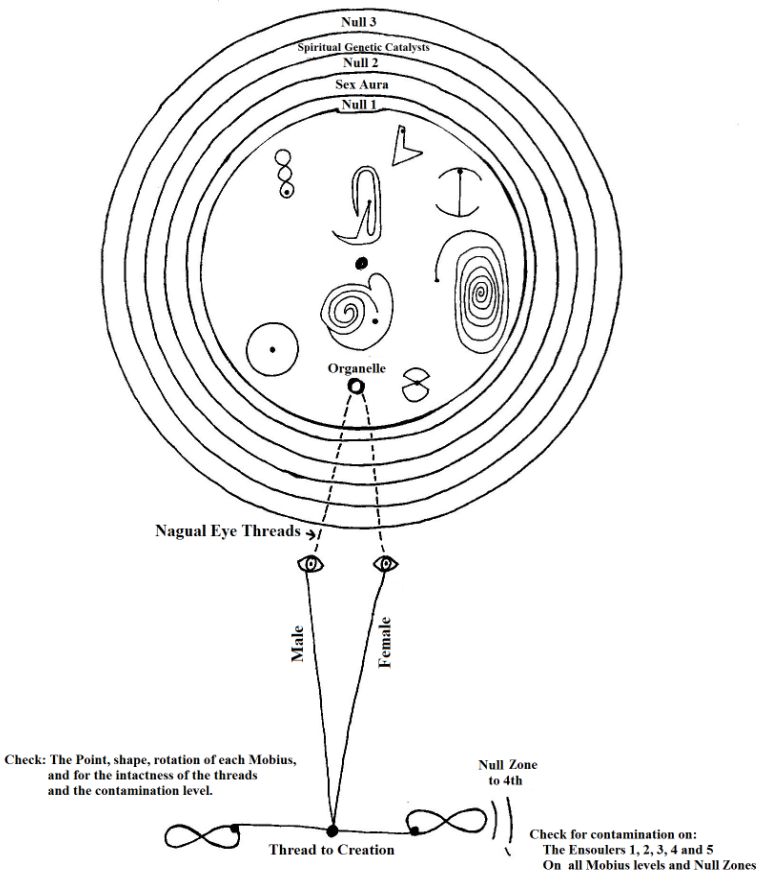

NOTE: There is no null zone between the 2nd and 3rd mobius

MOBIUS CHARTS OF THE PLANETS

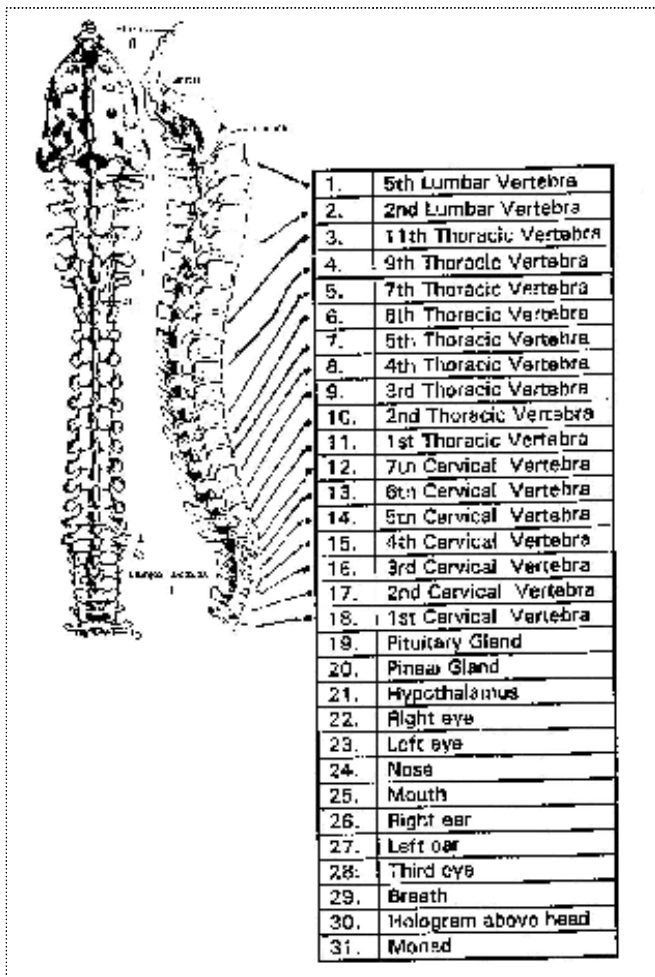

The planetary energies of the corpse are too small in some of you. There seems to be a key location or position of the planets which would promote physical health. It seems that each planet has a specific shape. The planets seem fairly fixed on the mobius layer. Their location does not seem to vary from person to person.

1. Jupiter, Mars, Moon, Saturn, Neptune, Venus, Mercury and Sun are located on the 1st mobius (see new planet/mobius chart above).

Example: "Where is my Venus?" **Do:** Correct the position, direction, shape and dissonance point.

Example: "In 1993, how deviated from the correct position is my Venus?" **Do:** Correct as indicated above.

2. Pluto has a point on the 2nd mobius, Uranus on the 3rd, Vulcan on the 4th, Unknown planet #1 on the 6th, and an Unknown planet #2 on the 16th at a balanced angle on the upper right-hand side.

Virtues Associated with Spinal Column Chart

VIRTUES ASSOCIATED WITH SPINAL COLUMN

Virtue/spine location planetary contamination:

The relation between the virtues and the spine has to do with planetary contamination. Each of the planets has a mobius layer which can be pretty high because Holy Beings are associated with them. When the virtues get contaminated, your spine hurts and the organs associated with the affected vertebrae also.

Example: "Do I have Mercury malefic energy relating to a Virtue/spine location? What location? What mobius? What associated body part or system?"

Example: "Where do I have a Mercury disorder along the Virtue/spine line and 18th mobius?-Associated body part?"

(1) Main (reality) assemblage point: On the first mobius is the key reality assemblage point of a man. This allows a man not to fold inside out. It has to do with physical health and includes a core that has to do with gender, too. Holding the balance of yin and yang is very important for physical health. This point should be in the center of the mobius or close to it, depending on personal planetary influence.

TO DO: 1) Visualize a sphere.

2) See where your dot is and determine where it should be.

3) Use directions to locate this point with precision.

4) Locate affected corresponding body part/cause of deviation.

5) Check % of deviation from correct personal location.

For example: if you have a "believing that God is punishing" block on a globule from someone on your corpse, the emanation carried by this globule will move your core dot to the west and to the resonation point of this globule and affect a

body part as well.

The cause of deviation may be found on any mobius. Also, there might be an east deviation having to do with hate, fear of God, or some kind of thread going from person to person and nagual substance on a mobius layer affecting a body part. Living with a really mean person who is always picking on you would pull your dot from its location and cause a rupture of the aura at a specific location relating to the type of thought impressed on you. **NOTE:** a point outside the sphere (circle) would mean a death frequency.

(2) Main (reality) assemblage point:

(Both of the teacher's) consciousnesses have been floating to the 30th density level. There, seven Judges are trying to explain something about the human body and its maintenance and health in relation to the spiritual forces and why people lose their corpse auras. The main (reality) assemblage point has a size and a type of substance. It is not only a hole. It is like a navel or better, an umbilical cord. There is like a reservoir, like a big placenta which would be called like an Earth energy. The navel taps into that big placenta. It is a new placenta since split time.

Your ability to draw earth energy depends on the diameter of your umbilical cord which would be your main dissonance point. There is like a network of blood vessels all-around you that then goes out near the area of your mouth with the umbilical cord to tap earth energy. The placenta is like an overlay of the earth extending up 10 feet above the ground from the earth. Even saints have aspects of this cord in the earth but their overall primary consciousness (monadic) is above the first mobius. Type 3 consciousness would be in the first mobius.

Specific aspects of wrong speech like blasphemy (which is bad speech against a holy person) especially, shrink the diameter of the cord. Anything having to do with the misuse of breath and grudges would have a narrowing effect. Certain fantasies like hate thoughts and visualizing murdering someone would also reduce the diameter. Watching a movie does not seem to have an effect. Being around homosexuals or perverts decreases the size of the cord; so does materialism. Ways to increase the size of the cord positively are: walking, running, because of the left/right movement; being outside in the sun; any old fashion stout or dark beer like Guinness would be good because of the fermentation. Cherries and especially cherry juice would be very beneficial. These two foods have the strongest ability to stimulate the expansion of the size of the cord.

Example: Ask: "What % of ideal openness is my earth cord diameter?"

Nagual Notes

LESSON December 4, 1993 (names are altered)

It came to my attention that the ensoulment was being impaired by contamination of old nagual substance on various auric components. I asked La to draw up the various anatomical locations that were contaminated in us, and T3 and I worked on clearing as many contaminations as possible.

Some of you, especially B, are continuing to leak nagual or monadic substance, therefore forming portals, null zone contaminations, and bleeding stumps. It seems that old grudges are the biggest reason to crack, for a nagual person. Pray for healing of all old grudges out or in, so as to allow your nagual to heal.

Circular thinking about a supposed wrong seems to be the worst. This is why Du lost his nagual. (Don't mention it for now to others.) Sexual obsession residuals continue to show up from ex-students who misused the nagual creative forces, and dropped substance everywhere. Nagual substance continues to generate links for some time, and dowses as an old relic.

I found what dowsed as a spiritual FI infection on the nagual eye threads and dead spaces (null zones, see diagram) on T3. This was due to an old thread from her to us that still existed.

All of you need to check for:

- 1.) *Nagual substance blocks on null spaces*
- 2.) *Erosion/contamination/leakage of cords*
- 3.) *Contamination on one or more of the five Ensouler holy beings reflecting on any of the mobius layers.*
- 4.) *Nagual organelles (soul creative aspect linked to lower form) contamination on the first mobius design.*
- 5.) *Nagual eye thread contamination, splits, or on the thread to creation between the second and third mobius.*
- 6.) *Null zone contamination between the third and fourth mobius*
- 7.) *Succubus/incubus globules on any location above*
- 8.) *Werewolves and vampires on any of the above locations due to parts of a nagual or former nagual who dropped substance on a zombie.*
- 9.) *Planetary contamination with old nagual substance*

It is very important that we clean these areas up, avoid all disordered thoughts or emotions, and be vigilant to keep an eye on our dual naguals. Without the dual nagual energy force, the organelles that are in the corpse aura of the first nagual mobius cannot create the sparks needed for new soul creation. Nagual teams are like new soul baby factories: that is part of their function. Some of you are producing a lot of soul sparks, and some of you are non-functional because of blocks in the above spaces. Type 2 souls cannot perform this aspect of ensoulment, but they can pray to be intercessors in other ways. The holy beings must use the bodies of saint naguals as portals for ensoulment, and the naguals carry the sparks, which are endowed by the Ensouler holy beings with other properties upon leaving the organelle, to the person being ensouled. It appears that T3 and I do the carrying, but the nagual teams that are clear enough do some hatching of sparks. I know this is rough metaphorically, but you know this is hard to express.

Our first priority now is ensoulment; and the contamination has been a burr in our saddle. Please do your best, and focus on all the directions, in relationship to pulling back old egoic/nagual substance and reducing it to cosmic dust. Our second priority is to get the teaching materials ready. I thank all of you for your hard work.

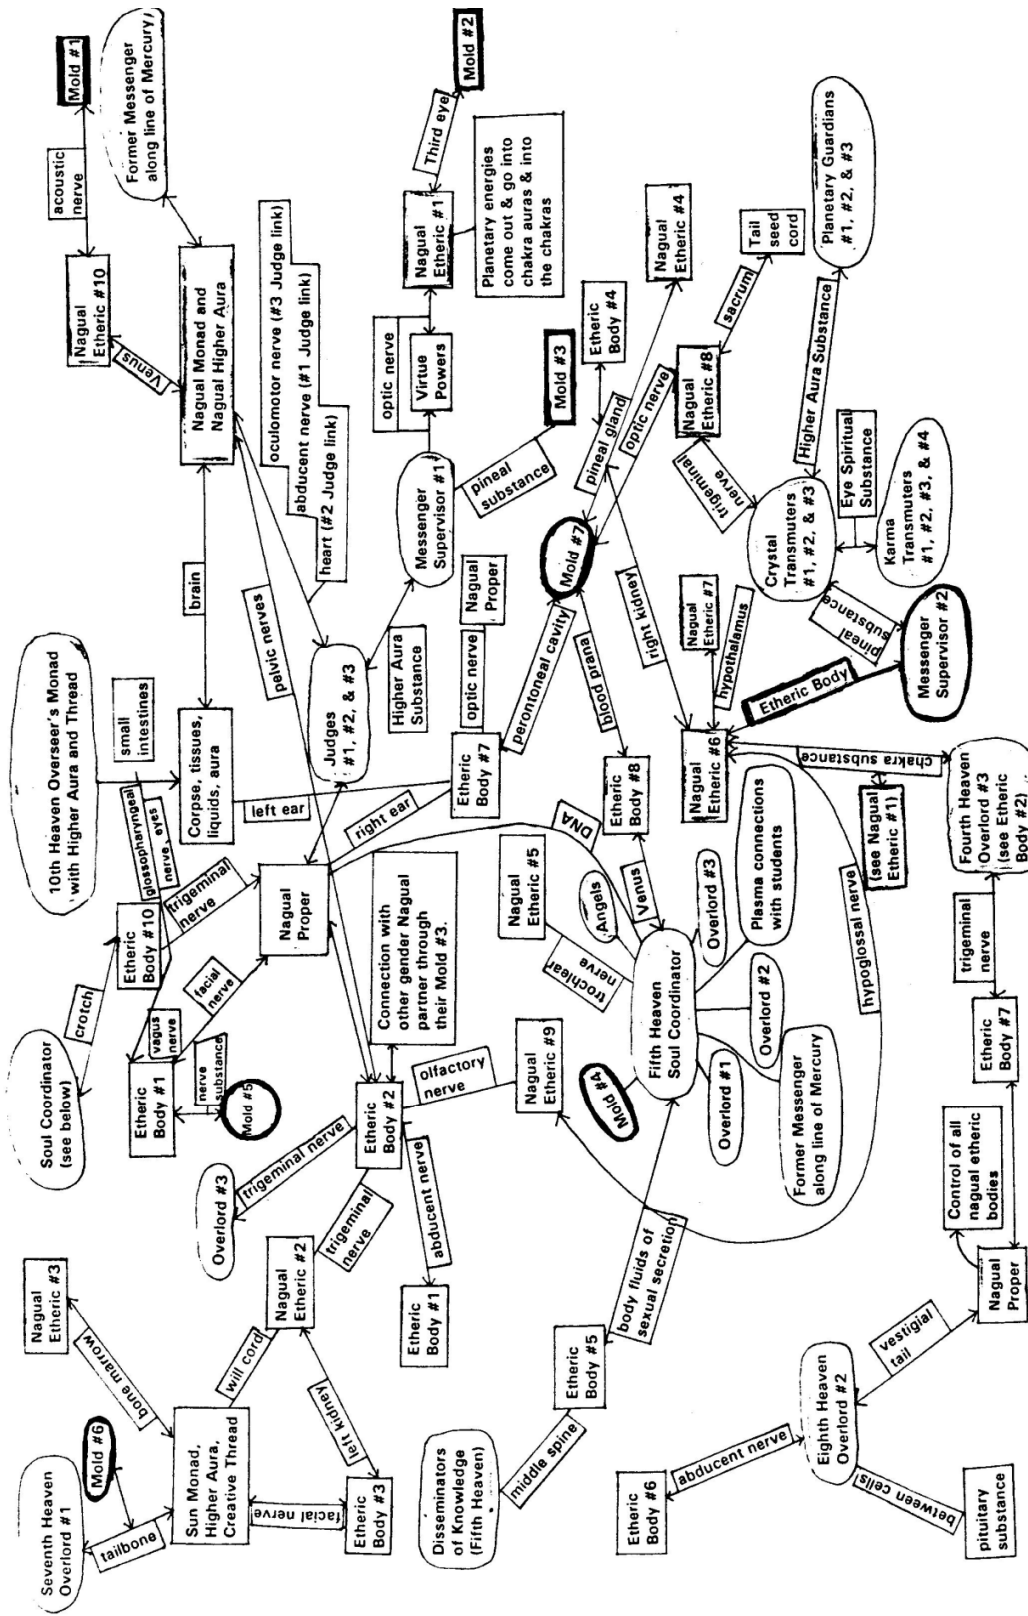

A couple of the students are having a rough time, and this information might make them leak worse, as they get filled with anxiety. For that reason, please keep this to yourself for now, as information must not be given too early in people who cannot handle it.

All of the students will stabilize if we get rid of the stray nagual substance and prevent loss of future substance.

Power of Interlocking Forms; Nagual Synergy; Some Dangers

LETTER December 4, 1993

As you know, two interlocking patterns are more powerful than if separate. For example, 10^2 vs. $10 + 10$. The more octaves within a pattern, the larger the base system of power. A ten base form combined with a 12 base form creates a unit ($10 + 12$) which is weaker than a 10^2 or 12^2 , but better than the 10 base power alone next to the 12 base power alone. (See *"Law of Interlocking Forms"* in *"Lectures: October 1993"*).

This law has been adversely affecting the members of our group. It is very important to consider that this very same law is part of how power is generated in evil sources as well as good sources. I have seen that in the past there might have been in a couple of cases in our group someone having a sexual relationship with a person with evil intention. This created interlocking forms within our group because there was a resonance. They created a synergy due to the nature of the sexual energy. It is very dangerous for a warrior to have sex with virtually anyone. (One student) had a pretty good set of virtues but she split her virtues to merge with a zombie. By doing so, she was reduced to the most common denominator. This is what is going on now in our group in two cases.

If a 14-virtue person joins a 10-virtue person sexually, he tends to 10 and 4 or 10 and 14. If someone creates a $10^2 + 4$ there is danger in the whole set up. Partners must be impeccable or be celibate. You can destroy yourself sexually rapidly especially if you unite with a person of lesser virtue. If you imagine yourself sexually united with a person you get the same result. In doing so you can break up your own system by the disparity, as in the case of a nagual who had a dual soul and spent time fantasizing about a zombie or a type 2 or 3 sexually. The naguals are aligned according to virtues in order to generate the highest amount of power.

It is intensifying the power if the nagual couple is married but being married is not vital. Naguals have a life and power of their own independent from the sexual life or from being together physically. The most important thing is matching virtues.

Now, we have had a couple of cases in which there has been a matching of antithetical virtues synergistically with type 2 or zombies. Today, I tried to understand what the impediments to the re-ensoulment process were. Having grudges (past/present or future) tends to form a synergy pattern becoming an evil power. Fantasizing sexually about zombies or a person of another type is the second worst factor.

Most of you here in this room have been fairly harmless. The people who developed these behaviors seem to be doing better now. We must keep our sobriety and do not get side-tracked by any emotional issue because it is slowing us down. We must be able to keep creating holy creative sparks and do our ensoulment work. We must support each other and help each other get through. There is a lot of stuff coming back to us from the past that we have to deal with sobriety. Try to dissolve all relics and to clear the thread to creation between the 2nd and 3rd mobius.

Ask God what you are supposed to do today. As saints, you have the great responsibility to monitor your thoughts and emotions. The absentees are doing better in this too. I am very optimistic. Our first job has to be the re-ensoulment. The holes had to be found. Jac was severe today. Kimo, too. Help them clean what is coming back to them. Everything, here, is working together very nicely.

Remember that evil can use the law of synergy very easily. The resonance power for a grid of interlocking synergistic evil can create a strong force-field of evil. This is why, in the past, I advised certain students to move to this place, even if it is not comfortable. Big cities are like big puzzles that fall on you like a fisherman net of evil. It is very hard to not get caught in this net.

To be a saint, it would be very hard to work full time with zombies because of the overwhelming resonance. You would tend to think like them. If you start thinking that there is no evil, that everything is a question of personal choice, you will become like zombies. Think whether the law of synthesis is being applied to you in any manner because you lived or are living in a certain area or with unholy people. Sometimes, people just get tired of holding their purity. They just try to be normal, go out and get a man or a woman, and this is it. If you just start thinking that people might be right, they got you in the grid, by the gonads. And out of this all evil springs.

The absolute worst is imagining homosexual acts or having homosexual fantasies. There is so much of a grid of hate over the large cities that as soon as you start hating someone or fantasizing you automatically hook into the overall evil resonance of the large city you live in and may be dragged down.

The group clearing was good because it was a manifestation of the law of interlocking forms by a holy group of people with holy power and pure intention.

This has a lot to do with a synergy form of the right-hand path or of the left-hand path. Taking care of AIDS patients is dangerous because of the law of synergy. It is very easy to fall into the pattern of illness and get AIDS by resonance.

We find a synergy form of the left-hand path in the love/hate type of relationship in which a woman hates her man but won't let him go. This type of relationship is evil as is what most people call romantic love. Romance is based upon a materialism of the flesh and an ownership concept. A healthy male/female relationship is not a pulling out and a pulling back. It is being sweet to each other, kind and loving at all times. It is fidelity, trust, love of the soul of the other one. One person cares about the soul of the other one and about one's soul path. One wants the other person to align with God and helps the best one can, but always respecting free will. Only a holy person can love truly.

The disciples and Mary were in a state of celibacy because it was easier to be wedded to God than to a human. It is helpful to have couples in a nagual team for power but sexual union is not necessary to access that power. It is helpful but not required. It is very easy to fall in the trap of sexual power. Think of MsK and Fal.

Our highest choice is that our members align with God and that they won't love any person more than God. Relationships with children, family and friends are important but your alignment must be first and with God only. You don't want to run the risk of being dragged down into the soul toilet. The life of a saint is a lonely path even if you are with someone. In the end, you must struggle independently no matter what the odds are. The alienation is overwhelming. Because of that, you must be really impeccable and not think that zombies are looking better now. If you did, they would get you.

Evil Breath seems to be a contamination coming back often today.

Check which of the mobius you have evil breath on.

Use TO DO chart to clear.

Reports from the Night Shift

December 6, 1993 LETTER Sent to core group

Each of the planetary energies has a null space that must be checked for retro-planetary energies/contaminations. Also, each planet must be checked for its rotation and dissonance point position.

Hating anyone causes the planetary energy boundaries to rupture, and old self residuals form retro-debris within the null spaces of each planet.

Any medications that upset the glandular system tend to disturb the planetary energies, as well such as birth control pills, amphetamines, thyroid medication (sometimes) and some menopausal estrogen replacement medications.

Planets are associated with body parts. The testicles and uterus are associated with the Moon and Sun, the pancreas with Mercury, the thyroid with Jupiter, the pituitary with Venus. The kidneys and adrenals are associated with Pluto, the gallbladder and liver with Neptune, the spleen with Saturn, the pineal with Uranus, the ovaries and epididymis with Mars, the area in front of the pelvis, out three inches, with Neptune and time travel and the vagina and penis with the Moon.

You should check each of your organ systems for their age resonance, and try to clean up egoic influences to bring them to no older than 30 years of age. If you resonate with someone 100 years old, then some of your organs get old. You must resonate with the younger people, so as to keep your auric organ emanations healthy, and therefore your body. In a couple of mixed ages, the older person should remove all desire/egoic connections on his or her organs, and bring each organ to the age of 30. This is especially important for naguals, because the nagual power is dependent upon strong planetary powers, as reflected in the age of 30 for each organ, and echoing upon the nagual body.

Fourth level naguals intersect the normal spiritual Saint aura through the fourth mobius design, which includes the lower designs. Since the first design is dependent upon planetary health, the fourth mobius health cannot be found without health of the first three. Lately, some of our members have been given fifth level nagual bodies. These intersect in a non-mobius future time through a wave-form that looks like this:

(Design currently not available.)

Fifth naguals will have to practice both the one to four mobius designs, and also the new wave-form design.

Genevieve December 6, 1993

Note to the Arkansas group:

It looks like Jas and Mon were damaged by the Sn/Du hate elementals, but are pulling out of it. All of you were given fifth level naguals last night, and you still have your fourths. P and L were made fifth level naguals, but have no fourth at this time. B, C, and Mag are looking like Type 2, while Top, Ir, Pa, Du, Nobles Oblige, and Rap are looking like type 3. It looks like those people had too poor self-control in the thought or neediness department to be 2s. Gr looks like a 3 now, due to living in homosexual village. Even more dismal is that it looks to me that Br might have slept with his old zombie girlfriend, or at least hooked back up with her somehow, or someone like her. He is looking like a real confusing picture of multiple identities; I hope he doesn't end up a zombie when the smoke clears. Sn, as well, split her type 2 cord, due to hatred for T2, after hearing or reading recent class mentioning of her lack of control in the hostility department. She is a zombie now, and unless things change, will be evicted. It looks to me like the P and DL are zombies. Da is looking very wobbly this morning, and is splitting, due to a resistance to the Laws of Change, Synthesis, and Polarity. He cannot seem to recognize good or evil at this point. I will keep you posted. Let us just pray that God's will be done.

I was in a coma for 12 hours and received the opportunity with T3's seventh nagual to entreat certain holy beings for mercy for the ensoulment: the fifths are the result. We can at least be joyous in that the fifths should double our ensoulment potential.

Later,

Genevieve

You should **check** each of your organ systems for their age resonance, and try to clean up egoic influences to bring them to no older than 30 years of age. If you resonate with someone 100 years old, then some of your organs get old. You must resonate with the younger people, so as to keep your auric organ emanations healthy, and therefore your body. In a couple of mixed ages, the older person should remove all desire/egoic connections on his or her organs, and bring each organ to the age of 30. This is especially important for naguals, because the nagual power is dependent upon strong planetary powers, as reflected in the age of 30 for each organ, and echoing upon the nagual body.

Fourth level naguals intersect the normal spiritual Saint aura through the fourth mobius design, which includes the lower designs. Since the first design is dependent upon planetary health, the fourth mobius health cannot be found without health of the first three. Lately, some of our members have been given fifth level nagual bodies. These intersect in a non-mobius future time through a wave-form that looks like this: *(Drawing not available at this time.)*

Fifth naguals will have to practice both the one to four mobius designs, and also the new wave-form design.

Note to the (on location) group:

I was in a coma for 12 hours and received the opportunity with T3's seventh nagual to entreat certain holy beings for mercy for the ensoulment: the fifths are the result. We can at least be joyous in that the fifths should double our ensoulment potential.

CLASS NOTES

December 6, 1993

Null zones of planets have werewolf energies.

Multiple identities: Check this morning; many identities are from parts of old self (found) in other's planetary null zones.

(Notes are as originally typed):

(T2 saw an) image of standing and looking out of a window in a grey mist and an astral (body) appearing between astral worlds in a world where there were a lot of species not of this earth (sic). A holy being was praying through the mist in a dimensional space---a 12th level being. A window was opening for mercy. Certain planetary conditions allow certain holy beings to be accessed. Starting at 7PM last night, (it took) 12 hours for 5th level naguals (to be endowed).

A future window: it exists in the future and it is here simultaneously, from the future. The window opened, because the ensoulment is so important. 7th level naguals could entreat mercy for any nagual power deemed worthy to increase the rate of ensoulment. Other changes are possible in the group and in the process and some members will get a 5th nagual or they are in the process of being attached. T2 has had a lot of trouble with residual nagual hate stuff as it is causing a lot of damage on members.

Check: Planetary null spaces.

Ask: *"How many people you are with the student chart?"*

Do: Dowse yourself by looking at your own face. Put *"Werewolf...Vampire...Zombie"* on the student chart.

ASK: *"Relating to sun energy, who would dowse as being you, and who would you dowse as being?"*

It is a directional thing, and you may have something in/out.

"For null space retro substances and dissonance points off?"

"What percentage of the earth cord is contaminated, and what is intact?"

"For primary thread connection between 2 and 3 mobius; % contamination and intact?"

For naguals the most poisonous thing is hostility, it causes the planets to rupture. If the first mobius goes, the connection to nagual and the thread to creation will rupture. Even one outburst will produce it. If a person is then graced by a Type 2 soul, even after a mistake like an outburst of hate--ie Ji---then if a Type 2 should focus a hate thought upon a nagual, they will lose their soul.

The heavens are infinitely merciful in the desire the holy beings have for humanity is that everyone be ensouled and have an opportunity to redeem themselves. If it is possible, a Type 2 at this span of time could be made a nagual. If they had lost the nagual and had true desire for purity, they would have an opportunity to serve as naguals if they were in contact with this party. The problem is, if a Type 2 has a contact with this party and they blow their nagual with hate, then they are given another soul---even though they lapse again into hating. (But for them to have a) focus on naguals is deadly (for them).

Type 2 have an ability to direct egoic energy and if they hook into the power of a nagual, especially a strong nagual, it blows them up. You don't tangle with a brujo. She (the student) knew that before and she blew herself up by her actions, even with a less combustible soul. Type 2's don't go down readily unless they are hostile to a brujo. Holy powers will crush the assault, and the assault doesn't have to originate from the brujo. (The brujo is like) a mirror; if a Type 2 directs a beam--- and it gets shot back, (it will continue) until it "kills" them (the soul aspect).

Type 3's by nature tend to have less power. The power bounced off (the mirror) would take longer to destroy them. It is why those who are involved with this party are in more danger. It took a long time for (some) children to get over the hostility of being separated from their mother. It is still best to not be around them and the danger would be great as they would lose their souls. If a child is not given to hate or rage, they are better able to hold their souls if the parent is a nagual. It is a burden to be a nagual, be very careful to shield yourself (so as not) to make the children angry with you. You don't want them to lose their souls. Most kids don't have enough sense to believe you. Even if they believe (they had lost their soul) would they regret it? For example Ji (as an adult) admitted feeling her soul had left before, but she would not ask for help to restore it, she was too hate filled.

We have a problem. A person like an ex-student, was infected from a relative, but she took it and ran with it (sic). The implications are severe in that we need to clean up all residual nagual poison, and look in null spaces. Br has terrible contamination in the null spaces/hate. Communicate with B and K to **check** on *"Who would dowse as them?"* *"How many people and planetary spaces? (sic)"* and especially B, needs to have complete self-control of any emotional uprising. He should not be irritable at all right now with anyone, his aura is very wobbly. Try to help B and K.

Br needs to be very careful with romantic entanglements because whether it is a mental or physical, or a romantic attachment to an old girlfriend, there is some major contamination threat in him now to an extreme degree. Ask him what color... blue... to use for his photograph. Will remove all nagual energies for the next two weeks regarding Sn's contamination, because it is slowing down the writing and the ensoulment (by a) week from her hostility.

"Werewolf" is part of a nagual essence out or in; yours or others, which forms a portal. Clear up old rotting stuff as it seems to be in the null spaces of planets, which is in the first mobius, or one can't do any spiritual work at all. Put your finger on the werewolf design and a student's name, and start clearing. (*See Werewolf and other purification designs at the end of this lesson*).

When you think of "werewolf", you are either out to place or zombies or they have someone else in them. Check both the directions and in and out. You could have a piece of self on a zombie or an actor in a movie. Or someone in this party could have nagual essence in you or an ex-member; directed in vs. out. It doesn't matter if you know whether it is in/out, from/to. It is important if you are not aware of it, due to an over attachment. (That is when) the aura opens and spills itself out. Maintain a brow and crown focus vs. an emotional focus and we won't tend to lose ourselves. The only way to help someone is to help (them gain in) sobriety. They then may not be able to (do this) due to free will so we have to be unattached. We help others within law with an unattached manner. If someone chooses to go against what they know, then there is nothing to do, we have to let them go down.

How does a person get out of control? You can trace it to materialism of money or things. Say someone has hurt something of yours, a possession, a house, a car or by some materialism regarding relationships---it is as if you think someone is going to interfere with your relationship with another person, your romantic fantasies or you think someone has wronged a child or someone one is fond of---it is all a form of materialism. If you are so attached to a relationship, then you can't have the sobriety to be materially unattached to the outcome of what that person chooses. If a person chooses to make a certain decision one way or other, if they have a romantic agenda, it can throw you off and you can dowse what you what to see vs. the truth---money, things, cars, houses, people, relationships and ideas of lower self. If you think someone has insulted you, it is a form (of materialism). No one should get you irritated or unruffled because it means an attachment to who you think you are. If they can insult you, they can control you and then you are powerless. If you are powerless to control yourself, then you are dangerous in the realm of the nagual. If you find yourself irritated, look at it as a personal problem and not the problem of others. If you are irritated, retreat to a quiet place and assess your personal weaknesses with sobriety and (view it as) materialism. Money is the least of materialism problems. Possession of people is more dangerous than possession of money and it could be a sense of competition---or example if Ir asks K for a walk instead of another person. It may be a reenergizing of ties to the past---for example B was mad at Mar and was out of control. She dowse as being his mother and she reminded him as he was as a child. Whenever you are irritable, whenever you see (ie. your mother) remove all parts of yourself and the mother from you with an act of will. Be very grateful for a petty tyrant because if you don't have one, then the teacher has to be one. That is the rule, and they can be bad (sic).

Check the age of body organs. Some teenagers identify with their grandparents. They dowse as the wrong age. Bring your organs to the right age (as it) reflects on the physical health. Even animals reflect this, for example Rita (the dog) dowse as three years old, and she is only one---due to egoics from a child. Look on the body charts and ask where system is older than thirty, and bring it to the right age. Anyone under thirty should be their own age. Most of all check the generative organs. Check the planetary energies for age. Check for elements above age thirty. They can get contaminated with ties to identity and materialism. If you have an egoic conception of self in a rocking chair, the elements will age. Pull the elements to an alignment to 30 years of age and the physical body will be stronger. Check for any traits over 30 years and check auric structures. For example nagual substance contamination: whose identity are you with nagual globules on? First check overall age and then each of the body systems, cranial nerves in particular.

If you dowse as younger (than 30), you might have nagual essence on someone. No one over thirty should pull themselves below thirty and T2 does not know why---it may be an attachment to self in an earlier age. ASK: Where on the body parts are you under thirty? You may have teenage relatives that hate you. You may find stacked null zone planetary contaminations, you may clear one and it swing to another age. Usually (this is due to a) part of you out to someone. It is unlikely that a non-nagual would be as powerful, but check both ways; the identity will shift out or in. Disintegrate that tie. If a part of you is back to where you were at 25 and that was a time of promiscuity, you would energize that portal with the same pathological people. You don't want a stuck 25 year old penis.

Cocaine blows out the planetary null zones. If you ever took it you may have greater problems. (This includes) speed, glandular replacement therapy or anything that imbalances the glandular system. Coffee and skullcap does not (affect these). Clearing this will speed up your overall clearing. Clear body parts and planet null zones and pieces of yourself left behind. You will look younger if you remove the younger parts because of the portals which make you age.

Hair and toenails are antennas.

Check the chromosomes and amino acids to see if they are over thirty. Remove anything from the age of thirty as well, don't assume it is always good. Remove contamination from 30 as well, and then will it to a 30-health resonation.

Check months of the year.

Check planets to see if each are too big or too little, and the age.

Check virtue and spine correlations for age. Egoics are changing the ages.

Do: Clear up the egoics from all time and if you are clear you wouldn't lose yourself. You would have a calm mind and keep from agitation. Clear off what you collect from others.

When going to sleep it is easy to will the egoics and you will get to automatically start clearing them. To remove the egoics from yourself in the morning, pull-back, disintegrate globules and what other people have put on you. Clear in the night so as not to go to sleep with egoics as they will influence you and cause worse dreams. Clear yourself in the morning and what has spilled out in uncontrollable dreams. Hopefully later the dreams will get more controlled. Help Br, B and K for age on body parts as a lot of werewolf is coming out from them.

Pray God's will be done in regards to Sn and that she has a true tissue resonation and a consciousness decision to not hold any grudges and to align with law and virtue. Don't desire for her to be ok to such a degree that you destroy yourself. For example, if someone is agitated, they don't need a reason, you could bend over backwards and they could still find something (to be agitated over), it is not the situation, but the reaction. Someone could be hit by a truck and be unfazed, while others could have someone look at them wrong and they get their dander up. It could be very minor (problem) and it could be exaggerated. They have a sense of something (wrong) and they will find someone (to act out on). Don't be mad, be calm or you can get messed up.

CLASS NOTES December 7, 1993

(◀ *This chart from “1993 November Lectures”*)

Check: For *Tissue Blocks/Vampires* etc. on *Nerve...Lymph...Liquid Auras...Naqual*

Add: to the ◀World Chart “No Current Power Source”: if a source of power that a person is fueled by is removed, they no longer have a power source, but they may not be in the Logocore (sic).

Problems Example: on the liquid aura (of student) are 60 vampires and werewolves from abnormal nagual connections in/out. Past, present and future threads are hanging from a globule on a person, place and old stuff from someone else. It was leaked from self and is in the vicinity.

To Do on the Planets: *Check* the null spaces, use the mobius chart and
 Check the borders as null spaces and
 You can imagine the directions (rather than facing a direction).
 Then check for “*Boundaries Ruptured*”.
 Check the position of the dissonance point and
 Pull in alignment. Remove residue.

Nagual Problems Due to Emotional Neediness

LESSON December 8, 1993 Wednesday Update

I found several contaminations today that I will list and try to define for you below.

Nagual-fueled Living Vampire of Law Aura: Connected to any soul type, or a series in a chain, with the bottom person having a zombie link. The zombie hates Law.

Lymph Aura Null Zone Demons: Of Baby, House or Wind variety. This is due to rotting old mental body debris with resulting retro-substances in null spaces. Past links with zombies and split time resonation seem to be causes.

Lymphatic Nagual Suckers: From other naguals who have nagual substance out to zombies. It may go through a group with a thread from original nagual who is zombie linked.

Nagual Demon (akasha layer) sex aura vampire: May go through a chain of people, with root in a freak creative center of a zombie that is fed by a nagual now, who has desire or egoic globules or thread out.

Law Aura Vulture: Often fueled by Sun 2 monadic leaks which occur due to resonation with zombies or hatred for Law or for a person. It can be due to a nagual egoic sent to a type 2, who then sends a thread to a zombie or other threads to any soul type. All can receive the vultures.

Werewolves: Nagual-fueled demons due to leaking monadic, desire, egoic, or nagual substance to a lower type soul who has zombie links. The lower soul or zombie, if obsessive, then creates lymphatic or sex aura demons that eat all layers of the aura, because of the power of the creative forces of the nagual. This is why each nagual must check for any threads, globules, desire substance, leaking monadic substance, egoic creations, or nagual elementals out to anyone. These can form deadly portals. Almost all of these are traced to a lack of impersonal love and an abundance of lower desires, including hate, on the part of the root nagual. Residual nagual demons from previous naguals can live for seven years unless destroyed.

Vampires: Links from any ensouled person to a zombie on the akasha aura level. These can be links from an ensouled person to his old self, past relationships, ideas of reality, desire to be like old times, etc. These often form threads through the group, and eat away at the monads of our party. Nagual party members have more power, and so will lose their souls far more readily with any clinging to the past, or circular thinking.

The Problem of your age being too old or too young on certain scales:

Trait age off: May be due to vicinity desire/egoic globules of type 2

Organ/body age off: Sloughing aura debris, leak, or demons in null spaces

Planetary forces ages off: Null space demons

Virtue age off: Null space demons, sexual demons, out to past self

I am sure there are more causes, but the root problems of late seem to be emotional neediness, resonation with past self or zombies. All of your past, since 1940, was in an evil split time. You must forget it, or you will split yourself in two, trying to crawl back to a time that feels like a safe cocoon. In fact, it was an awful time, from a spiritual perspective, on the face of the Earth. Drug addiction, nuclear war, homosexuality, androgyny, materialism all peaked to a nightmare level on Earth. If you try to peek into a little sucker world of your personal past, then you can be of no use in the ensoulment and healing of the Earth. By looking at Earth in Split time you cannot help to pull the planet into Earth As It Should Be. Only he who sees grandly can hope to achieve grand results. GR December 8, 1993

Memory Back Frames: Shadows of Self

LESSON December 11, 1993 A.M.

Everyone needs to check for **Memory Back Frames**. This is like a shadow of yourself or others. It is located behind you.

Check: “How many inches out from your corpse aura you have malefic memory back frames?”

These are shadows of the past. They seem to be best seen with the angel wings.

Ask: “Who else’s back frames you are in?”

Do: Check in all directions from where you are in other’s back frames

Check the age of the oldest back frame that is on you. This will often indicate another person’s memory back frame.

Also check: Underground for where you could be in dead loved one’s back frames.

Do: When you find them, just go to the TO DO chart. Often you just disintegrate or pull out.

Ask: “How many inches out from my corpse aura do I have malefic memory back frames?”

“How many other people’s memory back frames am I in?” (Check all directions)

“How many deceased people’s memory back frames am I in?” (Check underground)

Then check for *Shielded...Embedded...Hidden...Foreign* memory back frames.

Naguals today:

-Mob and St now have 1 - 3rd, 2 - 4ths, 2 - 5ths and a twin, 4 - 6ths, as well as a shared 6th with Ri and Do, and 1 7th and a twin.

-LawAura and Ab now have 2 - 4ths, 4 - 5ths, 2 - 6ths, 1 - 7th and a twin.

-For and Si now have 1 - 4th, 2 - 5ths and 2 - 6ths, (6ths were temporarily disconnected because of a malefic resonation with a past place)

-Do and Li now have 2 - 4ths, 2 - 5ths and 2 - 6ths.

-Li will take on naguals complementary with Do

-“Nuke” may suffer instability during the 18th to 21st solstice.

Non-naguals tend to miss the most important points and key issues.

Type 3 tends to unconsciously sabotage seemingly insignificant but important tasks, ie food, tapes, mail etc.

Nagual Twins

LESSON December 11, 1993 P.M

Nagual Twins: A nagual twin is like an echo of the shape, or a shadow double (or reflection in water) of the corresponding nagual. The purposes of twins are to give names, and to communicate with the first attention.

3rd Nagual Twin: Corpse awareness of law, higher truth and nagual truth determines the 3rd twin installation. Ideally each nagual should have a twin.

Nagual/twin connection locations (See chart following this lesson)

3rd nagual and twin are connected at the sinus/eyes/mouth/nose/throat

4th nagual and twin are both connected at feet

5th nagual is connected at the skin of the solar plexus, the twin is connected at the blood flow to the colon

6th both are connected at generative organs

7th both at the heart

8th both at the lumbar spine

9th Nagual at the sacral spine, twin at top of head

10th both through the mouth of the 3rd nagual

12th both at heart and lungs

Twin Dissonance Point Location

- The 4th twin is connected to the 4th nagual shape tube at the point where the light comes out of the end
- The 5th twin point is at the top of the cube.
- The 6th twin point is on the opposite side of the spiral.
- The 7th twin is a cone of a different color; it should be drawn just below the nagual cone.

The twin has a bit of space between it and the nagual.

The Holy Beings have acted in a surprisingly (--?) manner in their continuing to install Naguals because the ensouling work is so important right now.

Ensouling is the most important thing right now. Everything else is in second place. The writing will come next. The writing will be distributed and it will really act like a relic, or a radionic device that transmutes disorder---even without even being read.

The Manager came in for a message: We must all watch over members in our party who are under stress, and help them in any way we can.

Keep your naguals clear by checking and cleaning nagual connections. About a week ago a layer of rotting mental/emotional aura debris folded-in causing a considerable degree of upset and turmoil. It was a liquid-baby-water-heart type substance.

Check the age of your parts

First determine the proper age for you (around the age of 30).

In priority order check:

- *Cranial Nerves*
- *Eyes...Nose...Mouth...Throat*
- *Heart and Lungs*
- *Spine: each Vertebrae*
- *Traits*
- *Planets*

The reason to check age is because it reflects the age of one's contamination and resonation. Make sure the age of your parts is appropriate and "clean". Also check the bell curve for alignment.

The Virtue Bell Curve Chart: should indicate deviation, intensity and blocks.

Check: Each of the 12 cranial nerves for degree of intactness, and age; each of them have threads to creation.

(If we consider ourselves to be the center, or sun, of our own individual universe, then the cranial nerves are like the planetary influences.

BACK FRAMES of old self

Under stress, old corpse tissue, en-lodged memories and contamination come out---because they are lodged in one's tissue. Think of your body one year ago, think of it as walking forward from a frozen malefic multiple image of the self. We need to disintegrate the back frames of the old self-image as they contain accumulated disharmony. Disintegrating the old frames will allow one to become more formless and free of old self contamination.

To determine one's Back Frame factor:

Ask "How many inches out from my corpse body?" (or ask "corpse aura")

The present student range is from 1" out to 3587".

"What is the age of my back frame?"

: "Whose back frames am I in? It seems vampires are here. Use your old name.

"Oldest age of back frame?"

"Number demons in back frame?"

"Number of people/zombies in my back frame?"

Others in yours or you in others will form portals; and it will damage your corpse aura.

Ask: "Where do I have aura damage from someone else's Back frame?"

Check Directions.

Do: Pull back your body parts and chakras from other's Back Frames.

Werewolves etc., come from someone else's Back Frame, particularly at the genital level.

To clear it go to To Dos. Typically it includes *Pull Outs Of...Point Of Creation... Disassemble...Dissolve.*

It is best seen using the angel wings looking back.

Back frames burn naguals, and cause false alarms.

Back Frames block the 3rd nagual and prevent the 3rd Nagual twin from being installed, causing other twins to be burned off.

A saint being in someone else's Back Frame must be removed. It causes:

1) A bad sound and

2) The lower soul type to burn out.

A Back Frame is adaptive for some Type 2s and Type 3s to stabilize them, but must be erased if they have a malignant history, and to evolve.

All Saint students must dissolve their own Back Frames and direct that creative energy into development of a 3rd Nagual and twin. This is part of RECAPITULATION. It cuts down on portals for contamination. This is how Zombies continue to infect group members.

Other Notes

If your body temperature is low your naguals may be out.

If in shock, use a hot water bottle on the solar plexus and (drink) Gin.

When the kids come home from school, do the Name of God blast, remove Zombie and Type 3 ties.

They will eventually be able to control and protect essence. Other kids will tend to cling to them.

The nagual directions, presented in an earlier lesson, are similar to an attitude or the nagual purposes noted on the nagual diagrams.

T2 and T3's primary consciousness level is the 7th. For an endowed 7th Nagual it would be a secondary consciousness.

To make it a primary level consciousness, one of the pair must become formless.

Checklist Summary

Check *Back Frame-- Size...Others In...Yours Out*

Do: Pull out and do To Dos (see complete list of items to check above).

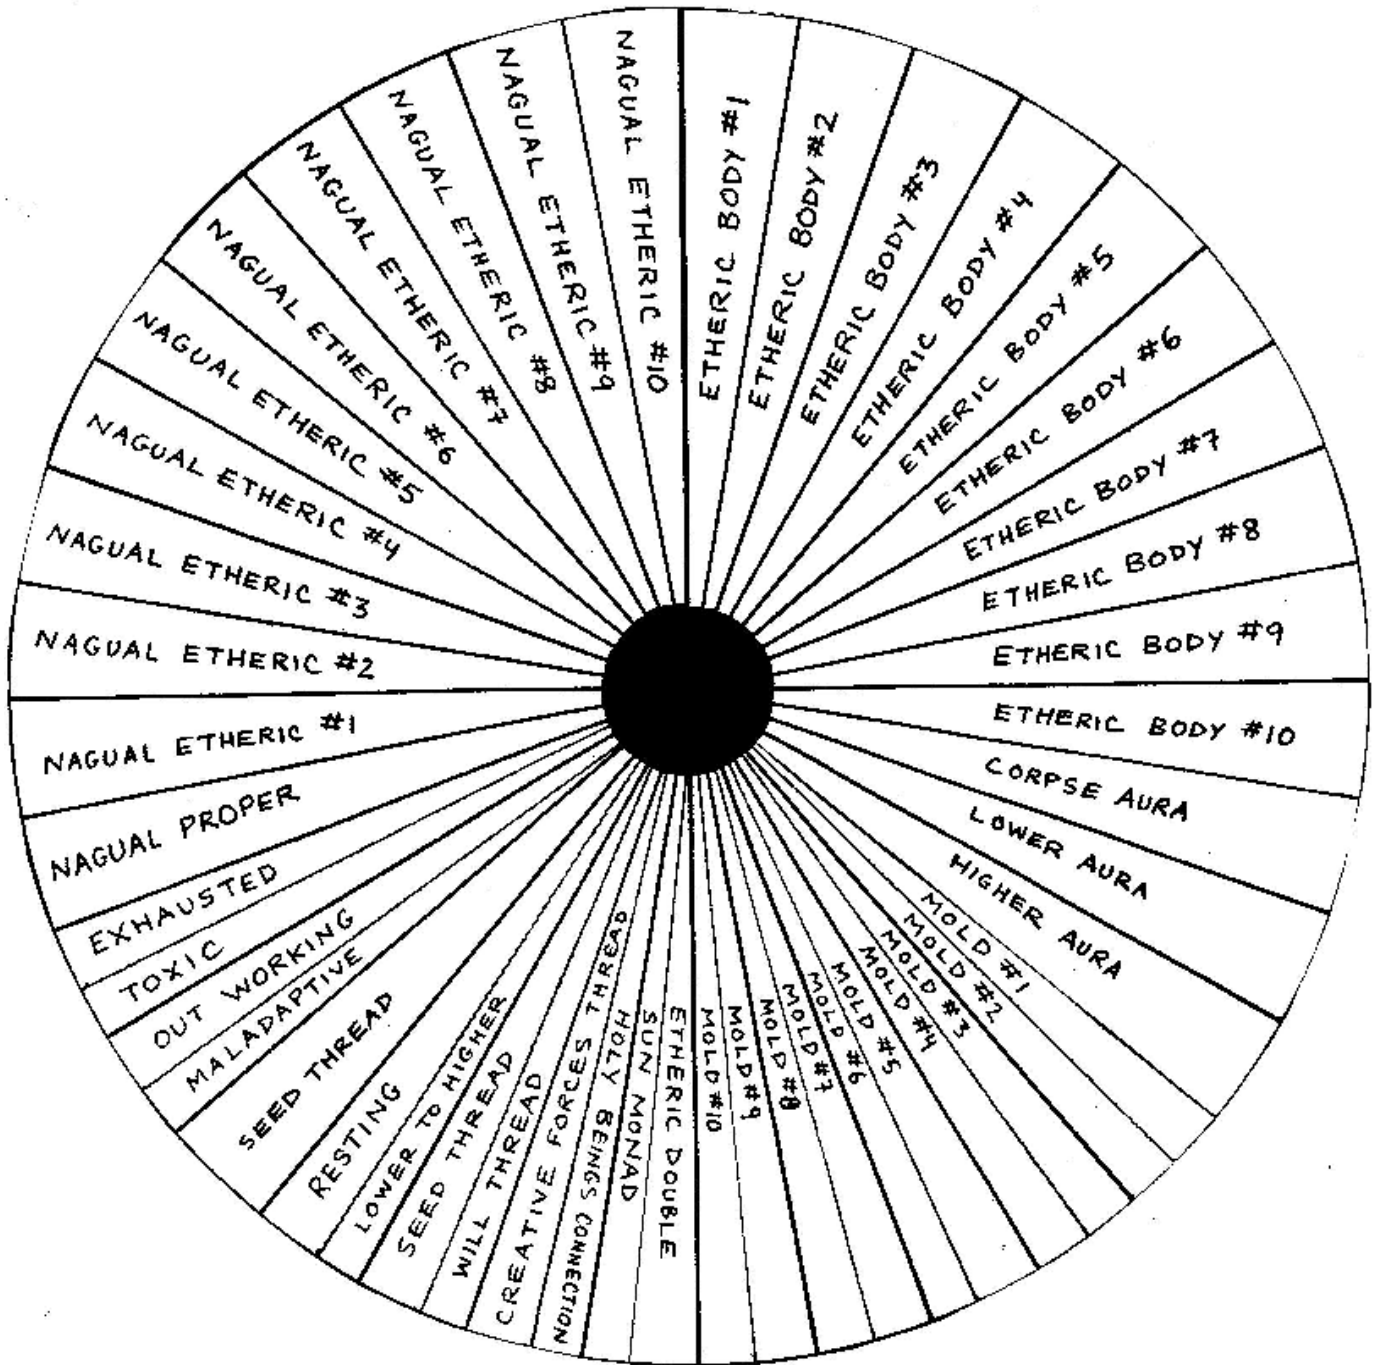

Dowse age of body parts in priority order (see above)

Keep your naguals clear by checking nagual connections and cleaning them.

Dowsing chart listing the auric bodies of (the teachers):

Drafts

LESSON December 12, 1993

All **Drafts** are composed of leaked monadic fluid. The blast that we received at the conference got rid of all monadic globules in us, but not globules that we had out to other people. Anytime someone is putting out globules, they are leaking monadic substance. They are called **Monadic Egoic Globules**. This is why even Sun and Animal souls can create globules, because it is their soul substance that is leaking out. The globules have the sound of the originator. Check for globules of any of the sounds on the list (*see page 14 and Combination Chart that follows*) or of the students on the list. Disintegrate these and try to heal any monadic leaks. Check this also by asking:

How many globules are out? Disintegrate. This is just like eye substance, following desires or thoughts. It is however monadic substance leaking out. You do not have to go physically or aurically to a zombie or lower soul type to start resonating with him. Even forming an image of the person will cause tissue resonation, thereby causing your monad to leak and spill soul fluid. Any type soul that is leaking forms these toxic globules. Check each direction listed on the table below.

Drafts of any direction are primarily corpse level links or resonations. (*See list of Drafts after this lesson*). Any that are in your aura are recently created ones. They are not any of our “old stuff” returning, but are tissue memories or resonations that are re-energized by our thinking about someone or something or by seeing something that reminds us of a former pattern. If you are in someone else’s draft or frame, it means you have a desire or circular thought that re-energizes on old pattern. You may also have some of your current soul pattern type monadic fluid out to another person. It can also be someone in our network doing this. This usually creates zombie connections, but can link with other soul types as well. Once the pattern is there, retro substances are the result, which start programming or patterning people’s null spaces and fluids.

Some of these links can be found by asking: “How many drafts do I have that have a creative link?”

These would be called a **Malefic Inter-Species Link**. It is important that we all recognize the differences in species and not link in with lower soul types or zombies or each other. These links are death to the nagual and cause great disorder up the chain.

Example: One student was thinking about a past friend, forming a link to a zombie that put off a sound of the zombie in the room. The nagual of another person in the room followed that strand to another location on the Earth and became lost.

Example: Another student was thought of by a relative and his tissues started resonating with the overwhelming negativity of her pattern. This caused a leak of monadic fluid because he had a desire for revenge. This formed another link to a zombie. Both of these links caused 40 demons to travel up the hierarchy to the 8th level naguals, damaging them and slowing the ensoulment process.

There are two types of desire substance, nagual and corpse. The corpse egoic is more related to the first attention than the nagual’s. The most malignant connection is nagual desire with corpse egoic. The nagual has a tendency to follow the egoic as a command.

People are not recognizing when they throw out an egoic fish hook that has a strand from it that the nagual follows as though following a command. You could compare this to saliva that has drooled out from a person who could not control his fluids, therefore not realizing he is drooling. A person can think without drooling. Drooling is associated with blaming or needing. If a person trains himself to be more aloof as to outcome, they are not going to drool. If they train themselves to not be so needy, they will not drool. You can identify neediness by spoken words. A needy person asks a question, but really just wants you to look at him. There is always a second agenda for needy people. If you find yourself agitated, blaming (or making excuses), or needy in speech or thought, you should retreat to gain sobriety.

Circular thinking occurs as a desire to justify a weak lower tonal. This always reflects materialism in that if you are not a body, then no one can anger you or make you afraid. If you obsess about your children, then you are seeing them as corpses (bodies). If you are aligned with God, then you cannot feel inadequate, ugly or misunderstood.

All of the members of our party are linked and they infect the others with their emotional weaknesses, because they are under the supervision of (the teachers) that links everyone together. People who feel excessively needy and desire social approval should spend more time alone. They should also endeavor to not talk much and listen to every word they say, to listen for signs of neediness, agitation, or blaming.

A tendency to go off on tangents should also be monitored. If you are working on something, follow through a logical chain of reasoning before starting a new problem or bringing in an irrelevant subject. One way to check this is to monitor speech and thought. Ask if the topic you are thinking of is related to the core problem or is an arm branching off

away from the core of the problem. People who tend to be tangential should check this frequently to train themselves on how to focus.

An idle wish of a nagual is a command to link with another. A nagual must be in absolute control of desire. A wish for another to be OK is one of the primary routes for disorder into our group. This was the cause of the fall of Suns, wishing that others could be like them. If you wish to never see another again, you can draw it to you. You could wish to never see a person again, and that wish would throw a thread out to them. This is where a warrior accepts his fate and takes what comes. You must always know who you are and be still. Realize that you **are** different, and do not wish that anyone else could be like you or wish to be anyone else.

Drafts and Their Correlations

All planets could have these drafts.

Check the different parts of the body for where you have these drafts.

If you dowse the fetus on the anatomy charts, suspect a nagual elemental. Check soul blocks to see what it is.

A nagual (student) reverberated and created an elemental that dowses as a fetus.

When someone hooks into a zombie, you may have to pull the connections out the vestigial tail.

Naguals should check for severed threads on the connections between each pair of naguals and on the twins at each level. You should develop a set of twins for each level of naguals. So if a nagual dual has two sets of 5th level naguals, they will have one set of twins (a yin and a yang) for the 5th level. Also check the threads between the 7ths and their connections to T2 and T3's 8th naguals. Keep all connections intact. If your 3rd level twin is lost, it may dowse as a missing nose thread. At the current time, this is what people seem to have.

The accompanying chart lists the nagual connections through the network.

It is good to check these and pray that the Holy Beings help us to keep these connections clear.

Ram and Jas - one 3rd and twin, two 4ths and twin, three 5ths and twin, two 6ths and twin

Do and Li - one 3rd and twin, two 4ths and twin, two 5ths and twin, two 6ths and twin, one 7th and twin

Storm Elementals and Grid Clouds

LESSON December 13, 1993 Evening

One of the primary reasons that students have problems holding onto their naguals and keeping in their monadic fluid has to do with reckless resonance.

The resonance may be with something as benign as a storm elemental. Before storms, there are great billowing spiritual shapes that swirl around the human aura. The ion changes tend to cause joint swelling and a bit of brain congestion. This may be erroneously interpreted as dark forces. It is true that certain storms contain grid clouds of dark forces, but certainly it is not always the cause (especially of late).

Many storm fronts can cause emotional agitations similar to PMS, if the student is not restrained. It is vital that the student be cautious about any dowsing assessment during the upheaval of storm elemental clouds. Since the nervous system is affected, the dowsing response is often poor.

It is also very important to be cautious in speech and decision-making during times of external weather elemental conditions. It is possible, at such times, to dowse the level of spiritually neutral storm elemental contamination of one's personal aura, and therefore just "lay low" for a bit, and do something different.

Often, if you do not switch gears, you may work yourself up into a lather, due to storm-influenced dowsing responses. You may become fearful, guilty, or anxious, therefore causing aura cracks and resulting corpse aura leakage (or worse, monadic or nagual leakage).

There is a similar scenario that occurs when you are in the middle of a grid cloud of evil elementals, due to body location, or some person obsessing about you. If someone obsesses about you, then they would have little power unless they were fueled by a nagual who had sent some substance their way. A nagual who obsesses cannot hold onto his nagual for long, and so degenerates spiritually. One of the requirements to retain the nagual status is that one becomes a master of his or her emotions and thoughts.

It has been strange and wondrous to have bestowed nagual status, and may at times seem like a dream. I assure you, it is not a dream. If you accept your status, and work with the challenges within the nagual status, then you will reap untold benefits. If you do not master your self-control, then you will be reduced to a lower soul type, for your safety and others.

Do not ask your soul type or the soul type of others. We have reached a time in these teachings when your own impeccability will govern your power. It is not wise for (the teachers) to tell you something you should know, or that you should be overly concerned about others' spiritual conditions. Just rest assured that your soul condition follows Law and Virtues, and do your best. The very worst thing that could happen is if members of our party became competitive, or worried to such an extent that they leaked monadic fluid. Your spiritual status always follows the degree of your own impeccability, and so you should just strive to be impeccable. Your spiritual status depends on you, because the holy beings and (the teachers), desire only that Law reign in your life.

The biggest problems that you face have to do with overreacting to spiritual or other stimuli. It is very difficult, as your spiritual senses become acute, to face each daily challenge with sobriety. It is important that you remain calm and cheerful, even in the face of overwhelming spiritual negation, lest your unbalance cause you to leak monadic or nagual or corpse fluid, so that you form portals to the rest of the group, and therefore slow ensoulment. Our petty discomforts are minimal compared to the importance of ensouling the Earth, as intercessors for humanity. We cannot be intercessors unless we be saints.

Any time you are irritated, emotional, or needy, then you form disordered portals that slow the progress of the plan of God. I know that this is a harsh path, and yet, it must be so. The saint path is one of austerity of emotion, and purity of thought. No crankiness, no rage, no materialism, no love of zombie lifestyle or pining for the past must enter you, lest you fall to the side, and fail in your soul work.

The realm of the nagual is the realm of the Now. It is tempting, at times, to miss the blurred awareness of our former selves. It is tempting to want to have our Sunday dinners with our zombie or animal relatives, full of ignorance and turkey. The life of the nagual is a lonely life, and must be most austere in the emotional responses to memories. If you hook into the past, or what you think is the past in the dead sucker world, then you are useless to this work.

During times of great unsettled senses, try to take appropriate action. If there are storm fronts, then try to distract yourself, play classical music, and do not try to dowse a lot. Often, the angels can be entreated to help us, when dowsing is poor, due to elementals, or other reasons. Above all, do not try to decide important issues, or do spiritual research, unless you are sure you are clear.

If you seem to be very contaminated, whittle away at it to clear any open windows, zombie links or resonations, and anything coming through other students. Pray for help. However, the most important thing to do is to maintain absolute calm of the emotions and thoughts, and not get frantic or tangential.

You must always hold yourself back from lower soul types or zombies, in your emotions and thoughts, so as not to burn them with the nagual powers. It is a kindness to them, and not a condescension. If you do not hold back with your thoughts and emotions, then they may lose their souls.

You have chosen a difficult fate, to align with this work. Hold your head high, and trust in God.

Do not be too concerned about the malignant, hate-filled postcard sent from Jg, threatening T2. Apparently, Jm revealed her name. Jg is out of control, and if you stay in control, then all will be well. He is convinced that Si is holed up in 909. His “spilling the beans” about his FBI contacts and other media threats were mere death rattles. He has, more or less, played most of his cards. If we remain calm and invisible, then all will be well. Of course, his absolute, deadly hatred will force continued seclusion for T2. It is small price to pay for the souls of mankind.

All of you must hold steadfast, through any storm, if there is to be hope to finish this mission.

Dowsing List: Holes in the aura are caused by another’s hostility directed toward you or your own hostility. Going over old charts can be helpful in locating the source of disorder. This morning “bridge cracking open” seemed to apply to the corpse aura, indicating a leak in one of the auras. Sometimes someone would dowse as having links with an ex-student, but actually not have any substance to them or be fueled by another nagual. The person would be thinking a thought that resonated with the archetype that the ex-student had become. Following are some ways to check for disharmony (*currently not available*).

The Reason for Multi-Level Nagual Powers

LESSON December 14, 1993 Update

The reason that so many people received multi-level nagual powers during the last week had to do with an emergency ensoulment push before the solstice. Since the other nagual team fell through, and ours had to pick up the Type 3 ensoulment, it was important to get as much power as possible. The stress on the auric bodies of the warriors was great, though, and the holy beings tried to find a way, within Law, to speed up the process.

Several of you were showing signs of spiritual stress of ensoulment, through no major flaw of your own, but rather due to increased demands upon your sobriety and purity of purpose. (T3), Au, and I spent much of last night trying to keep you on line. Do not start feeling guilty; actually, you all did pretty well.

You collectively created enough soul sparks that went into the "soul bank" so that the ensoulers could then break free from our nagual team, and work auto-pilot. This happened today. If you felt a lot of disturbance, it was this "storm" of change. It is a great relief to me, because I could not think well enough while hatching holy beings, creating sparks on so many nagual levels, and help (T3) watch over you, to do the writing.

The ensoulment will continue, using our team sparks, but without feeding disorder into our team. Many of the naguals that were pulled into service for this "military maneuver" will become plug-ins, to be used in times of great stress, but not a continual burden for the owners to watch over.

I tell you this, so that you do not freak out, if by morning you cannot find your naguals, or some of them. They may be resting in the heavens, until another battle. A few will have to stay around to do the dirty work. You are lucky if you get a break from having to keep track of the naguals and clear them. A person can keep a saint soul and have plug-in nagual holy beings during times of need for spiritual service.

Since our desire is to be of service, rather than power, we should all breathe a sigh of relief if our power does not exceed what we need to do service for the plan of the Logos. I am personally exhausted from the last few weeks, as I am sure you must be.

Keep your nose to the grindstone, as far as your mental/emotional control, and be of good cheer. You have all done well, and we will find solutions to any problems. The souls are beings taken care of, thanks to the prayers and work of all of you. I and (T3) are most grateful for your impeccability.

Try to clear any residue tonight, as far as connections to zombies, or lower soul types, and then pray for the angels to watch over you as you rest. The angels have gone out in great waves today, to each of you.

It is as though you are in a very tough school: how to approach becoming a formless warrior. Part of the teaching is the constant shifting of powers and appearances so that you do not cling to any identity or vanity, but always to your humility of service to the Plan of God.

I truly do not know who I am, or who you are. Am I the seventh nagual first attention, or the tenth overseer? Am I a human monadic structure? It matters little. I will be what is needed for the plan. I offer myself, as a hunk of clay, to the Will of the Father. In doing so, I must be willing to face changes, surprises, gains and losses. I do so, because I love humanity, and Law. I have no personal agenda, but submit myself completely in service to the Divine Presence and Plan. Whether I have one nagual, ten, or none, matters little. I ask each of you to submit yourself to God, and pray for strength and purity to do so, each day.

I love you.

Nagual Plug-In Status Clearing Checklist

LETTER December 15, 1993

Now that the ensoulment process is being completed on auto-pilot, independently from our nagual network, there is a reduced requirement for naguals to transmute disorder. Saint souls will remain saints, but not everyone will have naguals. Many of the naguals that were bestowed upon our group to help in ensoulment are being put in “deep freeze” status to be used as plug-ins, as needed.

Some of the reasons for not retaining naguals were malignant links with zombies, ex-students and ex-lovers. Resonation with zombies, lower soul types and one’s former self were causative factors, as well as excessive Mentalism and fantasy. Some particularly harmful past links, such as with Im, caused auric damage to some couples (especially Mob and St) requiring a rest from nagual status. These links and resonations were not old stuff returning, but nagual powers re-energizing these connections. Some (such as B’s) were removed due to strain on one’s health. Do not worry overmuch about this, just endeavor to keep your level of resonation high and continue to refine your impeccability.

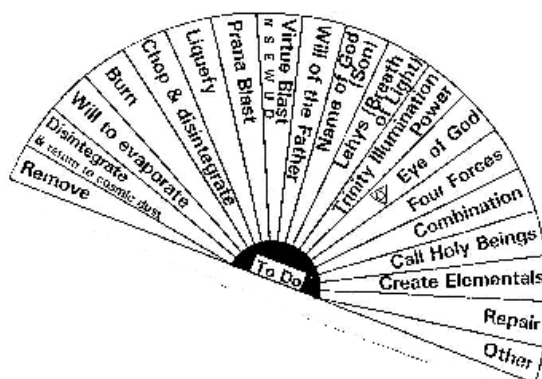

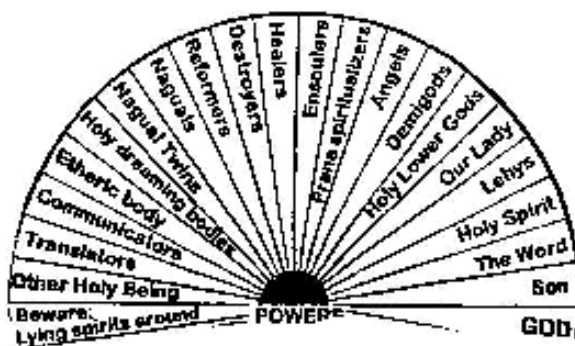

Some of you are in shock from the strain of ensoulment, and need a reprieve from the 24 hour a day contamination. Plug-in nagual status is far less stressful, and does not bring toxicity to the owner to such a degree as the 24 hour a day burden of nagual status. The flux of powers is something of a challenge; just try to get some rest during the transition. The holy powers do not desire to overwhelm or harm any of you. Blessings, G

CLEARING CHECKLIST December 15, 1993

1. Check percentage of openness of each of the four primary apertures (Father, Son, Holy Spirit and Eye of God).
Remove any blocks by checking the new powers/removal chart. (*See chart next page*)
2. Check cranial nerves for contamination while viewing them from the four primary apertures.
Clear through the same powers/removal chart. (*See the chart next page*).
3. Check for Virtues burning on the body illustrations chart.
4. Check percentage of intactness and contamination of monad and monadic substance.
5. While “standing on” the “Trust, Act, Feel, Know, See” chart positions, check the following while also viewing from Air, Fire, Water, and Crystal perspectives: a) *Planets* b) *Elements* c) *Body parts* d) *Traits*
6. Check the number of open windows while “standing” on the “Trust, Act, Feel, Know and See” positions.
Open windows will tend to be vicinity elementals, joy/itch leaks, or monadic leakage.
7. Check for Prana Mouth Webs while “standing on” the above positions and viewing the sex center, navel, stomach, chest, throat and brow. From each standing position evaluate contamination and intactness of the Joy Gland, Breath Aura, Mold, Itch Gland, and Monad.

Ask the following questions:

- a) “How many malefic selves do I have out from the Trust in God (above head) positions?” Will them to return to cosmic dust. These elementals are associated with the joy gland and they reflect a lack of submission to Divine Will in the realm of intention.
- b) “How many malefic Will of the Father selves do I have out of the (forehead position)?” These must be chopped and disintegrated. They are created out of the sex substance/mind of the creation aura with links to the dance aura. They reflect lower willfulness in the realm of action (or misdirected will)
- c) “How many malefic Name of God selves do I have out of the throat?” These must be burned. They come out of the tissue aura and the joy gland (cry) is connected. They come from misdirected emotions and resonations.
- d) “How many malefic Breath of Light (Lehys) selves do I have out?” Think of the heart and lungs. These must be willed to evaporate. They originate from the Breath aura with links to the mold aura. They reflect poor speech or a lack of Divine Intelligence/Wisdom usage.
- e) “How many malefic Eye of God (navel) threads or stingers do I have out?” These must be disintegrated back to cosmic dust after they are pulled out of the Eye like splinters. “If thine eye offend thee, pluck it out”. If these protrusions are present, your Eye is no longer single, but tends to be looking upon evil with desire, or looking to the past. They spring from malefic use of the Christ Spark aura with connections to the itch gland and Virtue aura layer.
- f) Check for eye filaments to old self.

Letters to Students *Dowsing Chart*

December 15, 1993 LETTER

To the group:

It is very dangerous to hook into past links with old friends and ex-students through dowsing about them to excess. I have told you several times of late that all the so-called "old stuff" that you seem to be getting is really resonance with old you or someone you used to know. To go over dowsing charts with a zombie in mind is very dangerous.

When Ri focused on Ia, it damned near blew the whole warrior party apart. The time for such dowsing has been over for the last couple weeks (bare minimum.) If you have done such dowsing, then you have been reckless. You have also been defiant to your teachers. Dowsing about yourself, with dates, traits, or planets in mind is one thing, but focusing upon a zombie is about the most dangerous thing to do, with the exception of indulging in MISSING a zombie. Mentalism, fantasy, and going off into tangents without a clear structure, and thinking about the past, while focusing upon a zombie, is deadly for a nagual.

This is why Ri lost his naguals, and caused the loss of St's naguals, and Jas's naguals, therefore Ram's. If he is not careful of such indulgent mental practices involving zombies, he will cause the death of Si, For, and D's naguals, as well. The last few charts had nothing about "old stuff coming back" because it no longer applied:

I stressed that. If you have old stuff, it is because you give it new life with your mental and creative powers. If a person repeatedly focuses on zombies, he will become a zombie. Consider. Genevieve

Retro and Null Space Contamination

December 16, 1993 LESSON

Many of you are showing leaks of the corpse aura, including lymph, sex, blood, and so on. This is due to ruptures in your mobius-one design (go back to your charts and look at the first circle picture).

Ruptures are due to **Retro-space contamination** which upsets the boundaries between the auric layers. **Null space contaminations** reflect in planetary contaminations, or in were-animals or vultures draining the planetary forces. At the current time, this is based in distortions of the mental or desire auras.

All ensouled people have the ability to rupture their mobius one aspect by obsessive desires or thoughts. Being in a nagual party greatly increases the sensitivity of the mobius one, and it ruptures more readily. This can produce physical or mental illness. It is an aspect of karma, but it can be transmuted.

You should check your soul lesson/block charts frequently, and also keep track of when you are mentally obsessing. If your mobius one completely ruptures, then you can rot out your thread to creation that exists on the higher mobius designs.

Check the location of your dissonance points on mobius one, and the null spaces. Check your body charts for parts of other people on all the octaves mentioned in the 12-nagual chart. Anyone can dowse over the nagual chart, because there are auric octaves that concern you. Check all of the above for parts of your corpse aura/desire aura out to people or dripping.

Disintegrate bits of corpse aura and nagual-created obsession demons, and pray for healing on your auric layers. Do not focus upon people's names, but rather just clean up your own aura. You might run into the problem of sending a tendril or corpse aura drip to a person you think of strongly, and then might assume that the person has contaminated you. In many cases, your leaking auras are hooking you into zombies, and not the other way around.

Those of you who still have naguals must be very prudent to only desire that God's will be done, and not be overly focused upon thinking about anyone in particular, lest you squirt nagual substance their way.

Do not do any fancy dowsing, and do not just "blast" without the charts of the body, auric layers, and soul lesson charts. Do not blame anyone for anything, or indulge in guilt or fear. I am going to try, with T3, to help you get clear, but you must be methodical. Take a planet at a time, a trait at a time, a cranial nerve at a time. We are, in essence, cleaning up from the terrific strain of ensoulment. All in all, we did fine, but we must heal from the toxicity of the work.

Some of the ensoulment toxicity from zombies caused some of you to recall old friends or lovers, and if you focused on them, you split cords. You need to check for split threads on the body charts. Even the Chihuahuas had mobius one problems this morning, because of dripping corpse auras in the house and monastery.

Work a couple of hours and then rest. If you find yourself obsessing, then put on music and just do physical work.

Good luck and try to just accept your fate, as a warrior, and be brave and gentle, when appropriate.

Genevieve

Plug-In Status for Students and *Dowsing List*

LESSON December 17, 1993

Yesterday the 7th male and female naguals went home. The ensoulers had broken free to finish the ensoulment process, using the creative sparks generated by the nagual party. The ensoulment will continue for the next 4 months using those sparks. The ensoulers will work auto-pilot. Our task now must be to prepare the teaching materials.

The ensoulment will be a success. It is no longer necessary or safe to have so many naguals. For that reason, all the naguals except for (the teacher's) were put into cold storage for use as plug-ins. The ones that were seriously contaminated were destroyed the day before yesterday. They were contaminated primarily through Im's link to a fallen Jehovah, which is higher than a demigod. Every saint will retain saint status, but without naguals. If they are impeccable as saints, they will be able to use the plug-ins naguals in future battles. Now is the time for all members of our party to refine their alignment with Law and Virtue, so as to be of use in the next phase of this nagual party's plans.

To clear, focus on the body parts charts. Use this in conjunction with the auric structure chart. Starting with the tissue aura, ask for any leaks, damage or foreign material on any location on the body parts chart. Check for threads, tendrils or substance out as well. Next, check the blood auric layer and so on. Go through each of the categories listed, thinking of them as different layers of complexity and frequency. You can think of this as changing optometric lenses. Then check each planet and trait individually in the same manner. Add months to the auric structure chart and check each one individually. Also add Holy Being to your auric structure chart and check for Holy Being trauma, thinking of the Holy Being as having a humanoid form.

Do not dowse over your dual soul by name. Merely check for any disorder affecting you or your dual soul, but do not use their name. Checking yin and yang will clear you and your dual soul. It would be best to not focus on the name chart at all because maladaptive tendrils were being formed amongst the members of the party.

You can dowse each Virtue individually. The Laws can be checked by going over the body parts chart with the military clock. You can check each hour on the military clock. Ask, "Where do I have any disorder near one o'clock?" This is a way of checking any deviation from alignment with Law. In particular, check cranial nerves, fingers, and toes for disorder on the clock. At what time on the clock do I have a yin disorder on the first cranial nerve? Then check for yang disorders.

The quadrant chart will still be useful for checking complexity and frequency. Time charts are still relevant, as well. You should still use the "Dowse with" chart. Checking your elements is still beneficial. When dowsing elements on the body chart, dowse in sets of one hundred at a time (*Note: Elements were found to be 900+ in number.*). These are to be the focus of clearing at this time.

Spiritual Battle over Africa; Spiritual Sorcery

LESSON December 19, 1993

The Holy Beings are continuing to work on those whose auras were severely damaged. There was a major battle this morning and if you felt uncomfortable, that was probably the reason. There was a huge sucker world that would dowse as being 1911, that was like a balloon tethered in northern Africa. The sucker world was not created by humans though; it was created by Fallen Jehovah. It was feeding off the energy of the Earth through this line to Africa. The eclipse was actually this balloon blocking the Logoic forces from reaching the Earth. You could think of it as being like the moon in front of the Sun.

A lot of the sucker worlds we've had in the past were actually linked with fallen beings that certain students hooked into. We should **add** "Fallen Being-created Sucker World" to our charts. The one that blocked the Logos had to be fought completely with Holy Forces that were already on the Earth. None could be called down to assist; only those already hooked into our system through our own integrity could be asked to help. For that reason, we had to fight it when it was directly overhead, so it could be a straight shot to destroy it. Our whole nagual party was attacked, but we were successful in eliminating it.

Mega-sucker worlds, such as that one, can only affect our party if we have a weakness. Hatred for yin authority was the reason that the "Iin" hallmark weakness infected the group. It also entered through Nk and Jg. Therefore, anyone that resonated with any of those people served as portals for the Fallen Jehovah. Through the Law of Partial Resonation, the evil forces were attracted to our group.

The primary trait of the Fallen Jehovah was of wanting to know more than was appropriate within Law and Order. The Fallen Jehovah wanted to be greater than God. Therefore anyone with a hatred for authority, particularly the Holy Spirit receiver of knowledge, would be susceptible to this contamination. Also anyone obsessed with a person who had those traits would be susceptible. When Jesus said to his disciples, "Be ye perfect, as your Father in Heaven", He meant it. It doesn't mean that you know as much as the Father, or are greater than the Father, but that you should not allow any major personality flaw to lead you down a path of sorcery.

For in the end, our personalities are our downfall, in that they are constructions. If they reflect the Holiness of the Father, Son, and Holy Spirit, then they do no harm. If they are selfish, deformed creatures of a depraved mind or a lazy body, then they roam the Earth as dripping were-animals, contaminating all that they cross. They seek to devour the innocent to satisfy their lust for individual life apart from the Will of the Father.

Therefore, to lose one's lower-self causes one to draw to the Logoic forces by the Law of Partial Resonation. When the corpse echoes the Father in a diluted form, only the dissonance point keeps it from annihilation. The dissonance point, the name, creates the partial resonance. Whereas, with no name, one has deadly resonance if one does not have partial resonance with the Father, and then one seeks to destroy all that is holy.

The reason so many people have hated this work is that the mirror of the soul was held before the members of this group and anyone associated with them. They could not bear to see their own ugliness and so they sought to destroy the mirror. A few of you have endured the mirror and continue to endure the mirror. This has been a hard season for some of you. Know that we are with you to the end of time, and that no evil force will destroy you, ever. In fact no evil force has destroyed any of our students. They have destroyed themselves through aligning with evil forces. Some of them have come out of it and have been ensouled. There is divine mercy awaiting anyone who desires to align with holiness and is willing to crawl back to the sanctity of Law and Virtue.

--(The teachers)

Ri should be healed within 6 hours and will be able to dowse again. Ram should rest and will be able to dowse again in 6 hours, as well. Nob should not talk at all for the next two days. She is in shock and should do a lot of walking to help her recovery. You could say her throat chakra has had surgery and she shouldn't rip the incision open by talking. Rap should listen to music and dance. Mag should walk and rest and not think about soul issues, she can think about material things. Ir---explain all this to Ram and pray for the group. Du should keep busy. Do and D should not come over tonight, for their own good.

The Eclipse; How to Check Auric Strength Charts

LETTER December 20, 1993

The eclipse is still going on. People's boundaries are ripping open. Each person needs to measure his auric strength. Check the resiliency/thickness of your aura at each chakra on a scale of 1-10, with 10 being most resilient. You should not blast if a chakra is below 6. Someone who is not leaking and has the proper auric strength can blast for you.

Weaknesses are caused by mentalism, desires and obsessions. They are related to planetary aspects, traits, months and auric layers. They would dowse as being infections, demons, obsessions or fallen angel influenced. You can check the soul blocks charts for the type of weakness, as well.

To clear these disorders and bring the auric strength back to normal, use the following procedures.

- √auric strength on each chakra
- √auric layer
- √soul blocks
- √trait, planet, or month
- √infection, demon, obsessions, or boundaries
- √number of people linked into

Then use the TO DO chart.

Christmas Eve Personal Mass

Tonight, a great wave of holy beings are sweeping over the Earth, as the Logoic eclipse ends, and the heavens open. Take advantage of this Christmas Eve time, through prayer, sobriety, and earnest desire to do good.

There is a possibility of great personal healing tonight, and change, as this window of glory opens. I would like to suggest a small ritual to prepare yourself to receive the gifts of grace.

Eat as early as possible, and go to your bedroom by eleven p.m. Have a lighted candle, and a crucifix, or holy card with a depiction of Christ, near your bed. Before getting into bed, say the following prayer:

"Dear Lord Jesus and heavenly hosts, I pray that all evil residue be removed from every level of my being. I pray to be a saint, and to do the will of the Father. I give up all personal angers, grudges, desires, and fears, to join in the heavenly army. I ask that this Christmas be one in which I am reborn, free of all reconstructed personal agendas, so that I may be of service to God and mankind. Have mercy on me, Father, in my frailties this past year. Burn out all disorder from me, as I stand before You, humble and willing to submit my life. I ask that God's Will be done in my life, on all levels, and that I be shown any errors so that I might correct them. Tonight, as I sleep, I pray that You transform me, into one who is worthy to be called a saint. Glory to God in the highest. Amen."

If you awaken during the night, gaze into the candle flame, and repeat the prayer. Ask that the prayer enter the candle, and be repeated as long as the candle shall burn.

Before you go to bed, bathe your body, and change your sheets, if possible. Look upon this as a time for transformation. We will be in tomorrow morning. (The teachers)

December 25, 1993 *LETTER*

Christmas Morning

Last night, I sent instructions regarding each person holding a personal Christmas mass, and retiring by eleven p.m. Some of you later asked T3 if it was permissible to go to midnight mass. He said it would be alright, because it was a free will issue.

In dowsing whether something is alright or not, you must look at the correctness of your question. Anything you want to do is permissible, but it may not be appropriate. Think of the words of Saint Paul, "All things are permissible, but not all things are expedient."

The reason for you to hold a personal mass was to attune with the holy powers after cleansing yourself, and preparing in solitude, for the holy experience. To have crowded yourself in a church full of possessed people was not expedient for your purification, although it was allowable within free will.

Many of you have had a lot of trouble with recapitulation, and Christmas is a time of strong emotional patterns linked with materialism, clinging social relationships, and ideas of reality. Normally, attending mass would be soothing to the lower self, as a shield, but not necessarily helpful or harmful on other levels. A person can be holy alone, without churches, without other people, if he aligns with Law and Virtues.

Last night, it was, in the literal sense, alright for you to attend mass. After all, you must have your soothing shields. However, some of you fell into memories, and so sent tendrils to the past. This held you back from some of the healing that was possible, in light of the holy beings present who were ready to help someone who had truly recapitulated.

You must realize that if you questioned the holy advice given in the personal mass instructions, then it was correct for T3 to give you permission to go. Otherwise, you would have pined to go, and still sent surges of self to the mass in your longing for the past. It is good for you to see your error, both in the questioning of the original advice and seeking a second opinion, and in your severe spiritual contamination that was to follow.

Do not spend too much time considering your mistake; just learn.

Conference: The Fifth Gospel; Mystery of Golgotha

CLASS NOTES December 25, 1993

****Bring down sleeping bags for this trip****

T2 gave a list of things to look for. “**Names**” are like dissonance points, things linked with Chicago/Akasha, a Freudian slip. Names are as indicators that help to hone in on the frequency and complexity of something; then one is able to recognize the significance of words. Names are not purely words; names as shown on the symbols of elements are like the musical points of dissonance that cause a song or poem to be beautiful, or a painting. If it is purely symmetrical without dissonance, it does not grab or hold you in, in a way that helps you to understand its meaning, but would in fact just lull you into sleep.

Significance of words goes beyond that level of the teaching. With a casual word; we need to weigh in other aspects as well. The mystery of languages; if one looked at different languages, we could hear the nuances of languages in the North, East, West, South, or in regions of the same country. Why are words pronounced differently due to region, NEWS, or relationship to center? When one is closer to sea level, mountains, or center to earth, this impacts the language as well. Certain words are found everywhere: “mama” and “papa” are seen in various languages and with variations. Why are certain words repeated in various languages but are unrelated? Could it be a dissonance point of such words are of a mega proportion; like words for mother and father; German, French, Spanish. Why would “mother, mere, Mary, mater, Madre,” why are the words universal? Maybe it’s because the concept of yin and yang is universal, and the language is merely the echo of dissonance concepts in akasha with Mega dissonance points as primary according to Law and Virtue; words seen over and over again. Why do certain things relate to naguals, like the word wind?

Research the primal words picked today, to see if they have a primal theme and nuance. They seem to have primary dissonance points in sound. The sound of wind and fabric, where are the roots of the word fabric? Fabric comes from the word make; the sex aura, tied into making and all creative energies---albumin and shell as well. (*See Appendix Virtues, Laws and Powers and also chart next page*). It is interesting to research. The teachings are evolving into symbols that are universal vs. specifically cultural.

In the beginning (of the teachings) it was as though one had to interpret things through an alien perspective, or bad vs. good gut perspective, and then deal with dark forces afterwards. We have to start somewhere, and then branch out to get to the core. There is a mystery about general and specific in regard to mystery teaching. We have to get general to get specific, and vice versa; a paradox with out and in. Like we say we are tuning in to have inner prayer, and look inward to the core of the disorder, then we want to reach out to God, and the kingdom of heaven is within you. (It is a) mystery of words that come back to us.

The reason it was best not to watch a movie last night, had to do with not having words (in the environment), even though a movie might have been a movie like Gandhi, there was a specific task relating to last evening relative to a precise purpose. Precise purpose requires precise preparation and anytime we add words, we are adding dissonance songs that may help or may weaken the purpose. If we have a laser cutting, we don’t expand it out, but beam it cleanly into one spot to have a cleaner cut. This is why during times of great spiritual stress, we should speak very little.

This is why when one student was so injured it was so important to not speak, (so she could) put all of her healing powers into the sounds that would heal; otherwise the regeneration powers might have been weakened through diverse purposes. For example, say she says to “go to the grocery for eggs, milk and butter.” Eggs may mean auric cocoon, so her throat chakra would be saying auric cocoon. That is why the damage is a mystery. But if a chakra is weakened, the slightest reverberation could shatter it like the angel sent by an ex-student (sic). It is like a bridge weakened by years and years of use with severe weather, and poorly constructed with no room for weather (extremes) or like the old bricks in the street, with no room between them to expand and contract. Say if one had tin on the street and the trucks would go over it and with the expansion and contraction, cracks would appear and they would break. So a bridge which is in a weakened state by the weather; then one would not want men to march over the bridge in perfect step, as that would be deadly resonance, and would make the bridge go down. We need to break step.

Supposing the word egg meant auric cocoon, and she said “get an egg”, and it was a resonance to a fragile aura, which would cause a fine crack to widen. This is illustrative of some of the mysteries.

Many things (relative) to the experience of a nagual, one may know what to do, but not know why until much later. So T2 would like to present the possibility, that any time under profound stress from a spiritual standpoint, avoid crowds, and soothe yourself in ways that do not have a lot of sound. And if there are sounds, they help to break step, or soothe you, depending on the requirement of healing. A time was (in the past), to put on Tom Petty records and the songs may not have seemed holy. Yet imagine if one spent hours on end praying for the salvation of humanity, and then played Ave Maria---one may, by playing with the same sounds, make the bridge go down, from the accumulation of the steps with the steps. (*See Auric Layers, Planets and Body Parts Chart in Appendix*)

Break step. For example, laugh at Chihuahuas. Laughing and sighing can help the air aura to break step. Sighing is good. Try to sigh and breathe through the nose as opposed to the mouth. If one has a lot of bronchial congestion, it is probably due to an accumulation of spiritual toxins in the lymphatic system and it backs up into the lungs and chest. Singing, depending on what is sung, may break step, or increase the problem. Sometimes if the throat chakra is maimed, one may not be able to sing at all. And even with a broken step (pattern) it may make the bridge go down. If a bridge was dangling, but one could jump over it even with a section down, then if one added a vibratory frequency of any kind, it could make another section of the bridge to go down. For that reason, it is important to evaluate chakras, and regulate the stress going through them, as all members of a nagual party have increased power of forces through the chakras. Nagual powers are shared in a nagual team, like (in the books by Carlos Castaneda) Don Juan's team consisted of one nagual to a party, and yet they had a lot of power in their members. It is even more so with the members that have naguals and/or have plug-ins. It is exponential with the naguals used by the party. And all of the members, as if in a swirling vortex, have the ability to heal or destroy with that power.

It is very important for us to consider the concept of names relative to the spoken word and written word, because when reading something we are looking at names as well. Every time we look at "wind", does that have perhaps the universal meaning and cause the whole beingness to echo that sound? The words mother and father in particular, and those repeated in all languages will probably be found to be the true names of God. What does that mean? The faces and attributes of God are like virtues; also the components of the traits of God are like seasons.

With the old teachings in the beginning; (the focus was then on) numbers and the 22 sounds. T2 believes we could map the 22 sounds and it would be helpful, but it would not apply to use the traditional literature handed down in Jewish tradition because T2 thinks the (writings) were shielded by the wise men and within each culture are sub sounds, and there have been more sounds since Adam. Sounds are approximations of common words for primal attributes or substances. Words like mother and father and the exact pronunciation of these commonality words we would have to look into. That is an area of research T2 thinks will be satisfying.

Early this morning, or night, depending on perspective, T3 was describing reading Rudolf Steiner's The Fifth Gospel. Something struck him strongly on how important Christ was in helping man not to cling to Earth but to reach to God. Those concepts brought in great significance in that we have reached a time, in fact every Christmas, where man is hung on the cross of matter, where the Christmas season is so epitomized by utter vulgar materialism, malls, and the vulgarity of symbols. Even if you read the newspaper, the overwhelming emphasis on huge dinners for poor people, and food, family dinners where they sit around and eat and talk about preparing the next meal, and the whole time together is cleaning, preparing, and eating, and eggnog spiked with rum. But at Christmas we should more than ever look to what Christ represented, especially from the Steiner perspective, in that Christ's whole concept was the spirit of humanity.

T3 brought up another point of Steiner, that they could hardly tell whether the disciples were Christ, or who was who. When it came to the arrest, they had to ask which one was Christ because it was the emanations and the power vortex (that caused the confusion). The disciples absolutely emanated the Christ consciousness. It was not the corpse body, but the emanation of holiness, which was as rare then, as it is now. It was the saintliness of the disciples that confused them. And Steiner projected a concept that some of the things that Jesus supposed to have said in the Bible might have been said by the disciples. But it makes no difference, as Jesus pointed out; "The Father and I are one". He spoke from the Christ consciousness and his disciples as well, were supposed to be able to speak with the consciousness of Christ. Who was Jesus, what happened when the dove descended upon him? Was he a man, was he the Christ, "Who do men say that I am?"---Elijah, Moses, they didn't know and it didn't matter. What mattered was that the consciousness of holiness was shared by the group and not in a namby-pamby way, but by a very force, a power that entered the disciples. And it was indeed the force of Virtue and Law and it made them indistinguishable (from the Christ), more or less.

When the disciples scattered and the three dark days came over the Earth; Peter denied knowing Christ as the only way for him to hide was to shield his Virtue and power and by (all of the disciples) being absolutely scattered. It is extremely important at this stage of our work that we have a responsibility to be saints, impeccable and flawless and we must not scatter, no matter what might happen to the corpse bodies of T2 and T3 and that the group itself has the ability to maintain a holy, saintly consciousness. Some writers say that after the death of Jesus, he entered the body of other people, and continued to teach in other countries. What that is saying is the Christ consciousness was able to live beyond the death of the corpse of Christ. Out of the tomb, he said "Do not touch me, as I am not yet ascended", he could have been a ghostly form and not completely solid, he also could be descending into one of the disciples, the force and blasting of it was so strong it was obvious. Another beingness could have manifested the wounds and stigmata.

There are many mysteries of how the spiritual forces impact the physical. In Steiner's teaching, the spiritual forces of man are required to properly digest the foods that enter the mouth and digestive system (in his medicine writings regarding the astral and etheric balance). If astral spiritual forces are gone, one could not digest well. It is interesting that

in the last month, many times after working on students (the teachers) would get tons of nutrient digestive blocks, desire globs, and obsession demons. In ensoulment, there were massive quantities of nutrient digestive blocks.

Relative to Rudolf Steiner, we are finding and are aware that in fact our bodies digest evil like sponges. If we absorb it, they digest, if we have the spiritual forces to call with digestive forces. It is an aspect of physical digestion. What is interesting is that (the teachers) often get severe gastric pains, massive belly aches or digestive pain for about 12 hours after spiritual work, and then they can disintegrate (the disorder). But they can't disintegrate it before the required time which is a form of taking on physical karma. Say someone has obsessed their whole life about their mother or father, and the Ensoulers give them a soul, then the (intercessors) may have obsession demons. So when we sit in class, the holy beings go out, beings from our own bodies go out, round up disorder and bring it back to our bodies, and then it takes hours or days to digest it enough to be destroyed by the holy beings the rest of the way. The holy beings that do the digestion are actually parts of ourselves.

Now when T1 had conferences, she would go into complete digestive shock with liver and kidney failure and the urine was only drops of blood for days. Absolutely no digestive function was available; it was just a solid rock of pain. Her uterus would always bleed with horrible blood (due) to uterine digestion which occurs in females. Females process diseased uterine conditions through the uterus. That is why Indians and Jews limited the activities of women during their periods, as it was how they threw out spiritual poisons. It was and continues to be a type of physical toxin that results from physical transmutation. If a person obsesses, it creates a type of matter that has to be eaten. There is some aspect of truth in that the Christ died for our sins, as it was a digestion of matter through suffering. It was not just symbolic but physical. Why, in the Garden of Gethsemane did Jesus' sweat come out as blood?

T2 tells you this, to realize that as you progress on a spiritual path, which you have done amazingly well, you may notice symptoms such as those described, and if you have trouble processing the poison, you have to know how to process it. T1 had to discover from square one, and after much struggle, that Epsom salts are very good. When the bowels stink, know it is by-products of demons. Hate elementals affect the lungs, and caused T1 to have pneumonia twice a month. With an infection, suspect lymphatic, blood and liquids are poisoned with disorder. Either a person is producing disorder, or (they are) digesting it for another person. There is no great honor in suffering and dying before one's time. Ideally, one could just process disorder as fast and efficiently as possible. So physical purification methods are beneficial, such as sweating and hot baths with Clorox seems to be the best. Snorting saline solution is good, as a lot affects the nose and ears. Brushing your teeth with 3% hydrogen peroxide is very important, as it is easy to have teeth fall out from the poisons of spiritual processing. Rinse your mouth with (diluted) Clorox. T1 had teeth shatter in her head from processing disorder. Monitor your PH, because a little cider vinegar (because of the enzymes) helps to digest the disorder that is taken in.

What you eat is less significant than what is eliminated. But some things eaten will cause more problems in elimination. Often soy is an impediment to the elimination of sexually connected disorders. "Crucifixion" vegetables, if less than a third of the diet is not a problem. Balance of everything is key. Cruciferous vegetables tend to slow down the elimination of air disorders, T2 does not know why. Name or dissonance problems: if you are digesting one of those, with crucifix vegetables it is more of a problem

Rashes: some food will inhibit skin elimination such as real sugary things, brownies, candy, ice cream. Some people have poor skin elimination due to Fabric problems related to the creative sexual aura. And anyone with skin problems needs to be cautious with eye contact as they will tend to suck in zombie fabric through the eyes. It is not the milk in ice cream that is bad, but the sugar. Yogurt seems good if it is cultured, and plain. A lot of fruit wouldn't be good for you. Fresh fruit is best, one piece a day, such as an apple. The best part of a citrus fruit is the peel; eat the whole thing. Prunes are at the top of the list; dried or canned.

Shifting gears: It is key to remember to not to focus on food, but to focus on whether you are in fact digesting disorders as transmuters and servants of God, or if you are producing disorder. Production of disorder must be digested. It has to do with desire and excessive mentalism. If one thinks a lot of words---and we get back to the power of words---if you are babbling words in your head, then you are constantly creating dissonance points that may or not be healthy. You may create an obsession demon whether you say them out loud or not. So monitor your thoughts. You may **ask** "*How does one quit thinking? How to stop?*" All improvement can be measured by frequency, intensity and duration. So if you find yourself obsessing mentally, break step. What is an obsession but a deadly resonance that absolutely impacts form and soul? How do you break step? Put on different music, make something completely different, try on a color, sing or go somewhere and walk. Just find something to do that breaks the pattern.

T2 finds moving furniture is heavenly sometimes. If someone is beaming an obsession, and you get a frozen aura from hate obsessions, how do you break the pattern enough to unhinge the spiritual spine so as to move? It is like one's back is out, lying on your back and moaning. What to do? T2 would move things in and out of closets or off of the counters, adjust something, paint a picture, do organizational things or move from one room to next. Anything that causes you to create or change an external pattern will tend to unfreeze the spiritual pattern to figure out how to stop the obsession. This is true whether (the pattern) is due to one's own, or someone else's weakness. If you have a tendency

because of old habits and obsession patterns, then find ways bit by bit to get out of the habit by changing patterns. Certain things on a regular basis are very helpful, i.e. Chihuahuas are always causing us to break patterns---for example if you are thinking about something and then you have to pick up a (dog) turd. Also they jump on you and give you an auric shock and hopefully it breaks a crimped position that breaks up an obsession. Chihuahuas are extremely beneficial, full of surprises and they keep us limber in a spiritual sense. Though they are a lot of trouble, they are worth it. It is not the same as for a parrot.

With a person that tends to leak desire and egoic substance---figure where the problem is with a chronic weakness of a chakra relative to a virtue. The biggest reasons for auras leaking are due to clinging to past ideas of self, clinging to what you thought was holy, what you wanted to be holy and what you assumed was holy but was not holy. For example, putting one's mother on a pedestal, with a martyr syndrome, who is pathetic about suffering in life (sic). T1's mother was like that, she would walk to work in sandals in the snow, she could recite for years what a martyr she was (with ingrown toenails from cutting her nails too short). It was her own fault for cutting them. This is how martyrs try to make you feel sorry for them, for the effects of bad decisions. What if T1 had held her mother up as a martyr? What if she had been seen as a perfect picture of sainthood? Then that could have impaired T2's ability to understand Law and Virtue---if she had assumed her mother to be a saint---to have had bleeding feet from walking through the snow. It is great to be strong and to be able to walk to holy water instead of crawling. It is wonderful. If one is maimed and crippled, one probably has bad karma. If somebody looks pretty good, people tend to think they can't be too holy (sic). It is an aspect of taking on the karma that will make you sick, but you don't just waller in it, you get well as fast as you can, so you can drink more disorder. (This occurs) if you can truly say *"Not my will but Thine, I pray to be as strong as possible to do the will of God and not be attached to illness or health"*. It is hard on T3. Some days they are quite ill in ways not (possible to) describe, and they had to process disorder to keep the toxicity of the eclipse from destroying souls. So they lay sick, and couldn't process faster because of the eclipse, and were poisoned. They were digesting evil on a massive scale.

This is hard (this lifestyle), as the (typical) ideas of society involve how productive one is. If (the teachers) had broken out in stigmata and looked beatific, they would have been more understandable. This is where appearances are deceiving. The hardest thing is the physical weakness, if they have to do it, they will and they will eliminate as fast as possible to do more. It is the position you take as well. Endurance should be the hallmark of the saint and not clinging to what people assume is holy or not. It (used to be) assumed stigmata were necessary, but then, the energy would go into producing that, instead of digesting the disorder. We need a state of "don't know" when doing things. If a person has always been so physically active, it would be very hard for them to not be able to crawl. God's will be done.

The main thing is to not create any links that further poison this holy group because in doing so it slows down our power. We have a synergy power that only works if it is clean. And that is why we have worked so hard in teaching not to obsess and form zombie links. The problem of the concept of unity vs. separation: many people and former students, said that T1 advocated separation that was evil, and they quoted Course of Miracles to support their view. Unless you separate yourself from the masses, you cannot lead them. As Mahatma Gandhi said, *"Do not seek to befriend those you seek to reform, because assuredly they will pull you down"*.

Say you are walking in a mall and you see someone who reminds you of another person. It then causes a memory, with a weakness, and forms a partial resonance which is an attraction. Deadly resonance destroys, and partial attracts. A desire tendril goes to the zombie or a droplet of egoic that squirts off a Virtue, or anything that goes off a Virtue or Law (which is the realm of the now, not the past). A drop flies then out and takes position on the aura of a person.

The most destructive thing in our party had to do with a nagual looking at a movie and imagining sex with a zombie. It was insidious and T2 didn't pick it up fast enough. It was a Virtue and Law disorder on a yang side, and she didn't pick it up in time. At the height of ensoulment, the zombie connection formed a deadly pattern in this person and was incredibly destructive. It is interesting how something so minor, you would think, would be such a problem; of copulating with someone on the screen. The reason she brought it up, was to get it out in the open and for it not to be a joke.

The **Soul Toilet** is distinctly linked with zombie sex fabric. Remember that one is linking up with zombie sex fabric and tuning in to a zombie with a sexual desire or memories. One could be thinking about one's past self in split time with a zombie and sex. It is so common to think that fantasies are harmless, but T2 says they are deadly and Jesus said the same thing. Everyone thinks that is ridiculous as the psychiatrists advocate such a method, but an obsessive fantasy relative to a zombie is absolutely deadly. This was not always so, but it is now and especially for a nagual party. We are not normal any more. We have crossed the line and are certifiably insane.

A nagual will fulfill the fantasy of the first attention. That is how many got injured. It is ok to joke about things, if we are not attached to them or obsessed. One can laugh at dogs, if it is not a weakness---but not at something that will get us thinking and going for hours on end in a lather, while thinking we will not be hurt by it. We can handle all things lightly, but if we become clutchy, that becomes deadly in a nagual party.

Alcoholism, drug and sex addiction, are strong components of demon possession on the astral aura or obsession demons on astral substance albumin. Each person here should measure the % of Virtues burning and pray that you receive healing on this Christmas day as your present from God.

T3 speaks: He recommends The Fifth Gospel book by Rudolf Steiner. With a bearing on the group, Steiner talks about Judas and the role that he plays. He talks about people making theosophy speak about spirituality, but they don't know anything about it (sic). Steiner had reticence with even bringing forth the material, but it was his obligation to do so and it was done with extreme reticence. He would not have brought it forward by his own choice. An American who studied with him and then left, created a different framework around the teaching to make it seem neo-Rosicrucian and changed the intent of what Steiner was doing. That person may have been Manly Hall. This book gives a clear understanding of Steiner's compassion for Christ. He refers to the Christ impulse and Christ, as an evolutionary step for mankind. One can get a fuller illumination of his passion in this book.

T2 speaks: The concept of Christ as Jesus as being so important; it was a changing of seasons, and it was so key. That is why we repeatedly see the Dalai Lama as having problems, as he represents an older system that now seems in conflict because there is not enough acknowledgement (of the Christ impulse)---there are those who may acknowledge Christ as a master, but that is not enough, as Christ changed the fabric of the world. It was the first time the Christ impulse had come in, as Steiner pointed out. The Mystery of Golgotha by Steiner is recommended. Is a good time to read him. He was the voice crying in the wilderness for our current age, like John the Baptist.

T3 speaks: The Dalai Lama understands the dogma, but did not have to recreate (sic). Was a good student, but was not an enlightened person was at the end of an age of a certain order. People are fascinated by him as a religious star (sic).

T2 speaks: New Agers are like the Dalai Lama. Many people who have left our group will dowse as the Dalai Lama, and it is not from entities; but those who see him as their ideal will have the same entities. And the people who left this group who were into Catholicism would dowse as the Pope---who represents their ideals. If we like what these people represent, then we will get disorders as archetypal Dalai Lama and Pope disorders. It is not the figures themselves, but archetypes of who people think they are. This is why the ancient naguals always wanted to be invisible, because so many people hook in; you (may) become what people think you are. Now, it is all intellectual, the multi religious conferences, where people have to stand-up. They have group prayers, but they may not know anything about Virtue and Law. Is universal Law taught in a group setting? No, but how to feed people is taught and how to stop war and how to bring together personal realities to bring about physical changes on Earth, instead of saying "What is at the heart of the war? What is behind it?"

Most Americans don't want any rules, and even the yin and yang separation for two hours is too much for them (?). They want child pornography (available) if they want it. Polarity and Gender are the core reasons for the destruction of society, and by the Dalai Lama ignoring that truth, and becoming a politician, the destruction has been quite significant in that people will follow watered down philosophies that advocate their foul behaviors. We have gone back to the core problem to be dealt with, we must teach Law and Virtue and that any person that fails to teach Law and Virtue, cannot be considered very holy. Homosexuality has virtually split apart all denominations.

Requirements of learning, first they have to know that they don't know. Then they have to want to know, than they have to be willing to make the changes in their lives and accept the teacher or teachings as valid. And that is why (the teachings) have to be presented well. Our society says if you don't want to spend money and eat food at Christmas you are crazy. They think it is crazy to spend days trying to understand nuances of spiritual matter. Consensus of society today is so materialistic in structure that anyone not a materialist will be considered crazy. We cannot satiate them unless we become like them and that is death to the soul. To keep up a pseudo identity to satiate a zombie is a wonderful thing but it takes energy. That is why T1 opted to "die" and disappear. Because the energy requirement to maintain a pseudo identity is too great, it is better to disappear. They hate you because you don't amuse them. The key thing is to not spend so much energy trying to maintain another front that you waste spiritual energy. It was taxing with (someone's) father, but it was good, as reinforcing of what is true. It is so draining. If you don't (do this), you will have to be so cautious; if you don't present some front to the family, they will track you down like an animal and want to lock you up. Letters might do it and they might not, as there is an actuality of obsession. They think you don't have a right to be a recluse. Why is that? Why was there a subpoena for T1 by Jg? Because the judge and everyone in town can't stand a recluse, they want to know everything about you. If you can hold off with sweet words, do so, or they will come after you like the mother and sister of T1. What the public tends to think of the members of our party, is that we are hypnotized because we are not agitated. No matter what you say, they will claim that.

Look on the chart:

-How many Fallen Angel Husks do I have? % scale.

-How much of evil lower mold do I have?: Which is past-self trying to reform, with 100% as a whole mold.

Virtue burning destroys the astral aura, and causes all the auras to leak. It causes the monad to cave in and rupture. The monad is tied-in to the virtues and any time you have a problem with a virtue it will cause a leak. Desire follows thoughts.

All day long T2 could dowse astral blocks, but it does no good if one is burning virtues. Find the rate of burning Virtues and try to find something to stop it. Use a scale like a caloric scale and ask how quickly is it burning?

Student percentage of Virtue burning per a 24 hour period: E. 70, Si 80, Ri 50, K 80, St 90, Au 30, B 90, Jas--, Ram 8, Snow 90, Du 40, Nob 70, Top 90, Mag 40, Jac 70, Da 20, Rap 60, No 2, Alp 1/5, Gr 80, Ir 18, Tork 98, P 90, Pope 40, Dalai 90.

Figure out why people are squirting and burning. It is materialism, it is a disgust and a lack of love for someone in the household, it is sexual fantasies, hatred for own children, clinging to the past, merging and over concern for children. Concern is one thing, but God's will be done. It is resonation with zombies, wanting to devour people, to be the center and have everything, extreme materialism and excessive social requirements, to be entertained and touched, neediness and greed.

Fabric and Mask are words that apply to the air aura and have to do with exasperating problems with burning Virtues, i.e. attachments. And the things said about other people would create masks on the air aura.

ASK: *"How many masks are on the air and outer ring of the sex auras?"*

It is like a balloon has collapsed on your face and is choking you. It is like maladaptive shields and concepts. Why call it a shield?

"How many healthy masks/shields do we have?"

How many maladaptive masks on air and Sex auras?

CHECK: *Old Names* as well. Also

"Loving to think" which is a mask and

"Likes the idea of being a creative thinker" which is intellectualism.

Fabric applies to the (manifest) square in all directions, and

Mask is the ring on the sex aura. Mask of the air aura covers the whole thing (sic). Mask is called **Sprout Face**. One has these due to remembering sexual partners or being squirted on by someone who has been promiscuous.

Zombie Sex Filaments: i.e. Air Filaments of pornography;

Sucker World Mask/Filament

Art Reflection: Auric Constructions are an idea of self as a creative person as opposed to (---): this is on the air aura.

Lymph aura; Lymph Echo Mask is like a mask that is a sound in the lymph aura. (Due to the concept of a created individuality designed to hold oneself as special instead of holy) –Air Reflection. Lymph is desire to be nurtured, acknowledged, with social recognition and desire for friends. You may dowse as having Masks if you have a lymph leakage from someone who has it. Say someone has a weakness in the lymph aura, that is like a Phlegmatic person in the old sense.

Christ Spark: Wet Bilious: has a problem with the Christ spark aura and with virtue and Law.

Mental Body Aura: Cold Rain on Feet Masks: Mentalism, relating to Unity and the Soul Toilet. That is the reason it is on the feet. It is associated with certain laws; Polarity, Correspondence and Desire Distortion, with an aspect of desecration. It is almost a failure to recognize evil, or to acknowledge evil, with several reasons. It is a wanting to see good in things, then one might merge with someone who would desecrate your temple in some way.

Right action, is merging with spiritual discernment. Even if you want someone to do well, by thinking about it, one merges, and in the eyes of a nagual party, one cannot waste one's self on someone who is not going to try. Those who, like nurses, fail to see the evil in their charges: they do not want to see, as the whole idea of self is tied into what one is dealing with. If the charges weren't crippled or nuts, one would not have a role. This is the caregiver mode. It is the concept of self as a caregiver and it also includes motherhood. Mothering anyone, even a spouse relates to a sense of responsibility and those that have never been recapitulated, or restructured are portals of disorder (sic).

Lymphatic Adjacent Null Space Shell Mask: relates to the Law of Vibration with a tendency to emotionalism, irritability and indulgence in the grid (from perceiving) a wave of disorder and one gives into it. Sn has a lot (64)), Jac has a lot from merging with zombies. There is an aspect of consensus and what is perceived as peer group.

T3 speaks: For example one student is resonating with the intellectual class, the knowledgeable people and the scientific types who are perceived as a peer group.

Null Space Lymphatic Adjacent Crust Mask: T2 is feeling a student under the left armpit moving over the lymphatic tissue. It relates to a prosperity philosophy, a create one's own reality and sucker worlds.

Tissue Holograms: Tissue Hate Holograms: this is seen as not a mask but a problem. Saint tissue:

Dowse: *“What % of saint tissue is gone due to created hate holograms beamed at other people?
“Where they are in or on your body parts?”*

This occurs also through romantic desire which is a love/hate sort of thing.

Do To Do's, as these have a lot of desire intervention.

Check on the scales: % *Contaminated...Perverted...Remaining...Gone.* *Deviated....Destruction*

Multiple identities will throw off the reading. What should not affect Saint Tissue is if others send hate. However the thoughts that one could hate or blame one's self can cause damage. “Deviated” would be a sign before “Destruction”.

Liquid Aura Rot: this is percent of saint liquid aura rotted out due to excessive attachment to another person's form or personality.

Check % of deformed Sex Aura: these are aspects of control, but one can't control or remove them from the dual soul, as it is a free will decision. One can't remove the effects of someone else's actions or obsessions. The person may get sick and die from it and for those in the party it is tricky. Obsessive love of one's own creations, or life work, past, present or future is an aspect of viewing one's work or creative model as one's self.

Bone Aura's injuries due to mental-others: such as irritation entering through the cranial nerves through the weakness of the recipient. This is a fire problem somewhat related to a virtue and relating to will. It is like a misuse of will to control another person, desiring power over others and wanting others to love you or like you. This causes a weakness in the cranial nerves and opens one to bone aura injuries due to the irritation of others. So look at both perspectives,

Ask: *“What % of bone aura is injured or gone?” and
“Which cranial nerve exhibits an inverse frequency or complexity?”*

This would reflect a misuse of emotion, Virtue or Law; ask;

“How open am I (to mental-others)”.

One could be resonating with someone causing a cranial nerve to go off relating to planets and traits and this would cause you to be open to crankiness. If you work on someone, you could resonate with them and be open to all sorts of injuries.

Number of Types of Spiritual Digestive Demons and Infections: These are infections of the spiritual beings that are supposed to digest disorder in the guts and the spiritual guts, as above so below. The higher selves are like the lower and they have intestines. Certain spiritual bodies digest food and also karma; yours and others.

Ask: *“How many different types of spiritual digestive disorders and infections do I have?”, and
Ask for demons also, which rise out of the infections.*

If you have contamination from obsessions from self/others, this would manifest as a digestive disturbance and it would manifest demons. Think of both as numbers. If it starts out as a sperm (infection) it may grow out into a whole creation (demon) (over the) whole body. Different types relate to types of obsessions, and they relate strongly to Laws and Virtues. Look on the Law Clock; the higher the number on the clock shows the disorder's advancement. At 360 it starts forming a mold over you. Yesterday, people were forming new lower molds that were mutant.

Mutant Molds: is one step past demons. First is the infection that relates to Law and Virtue, then the demons, then the infection become molds and husks. Ask: *“How many?”*

Why would one be susceptible to another person's demons? (Primarily it is) eye contact with obsessed people and exchanging eye substance. Put your aura to the side when looking at a zombie, stand to the right of your aura, or leave yourself in the car. Some people have a different orientation, so don't look into their eyes, due to corpse aura emanation that gets you messed up. This includes as well, inter-saint eye contact, as well as dual soul. We are going to get (contamination from eye substance) from each other, so help each other to remove it. You can throw this out of the fingertips (eye substance).

Liquid Adjacent Null Space Suckers are due to a part of someone's digestive spiritual forces --which may not be holy-- that have severed from the guts of any soul type and globbed on you at the level of liquid null space. These may dowse as crazed holy beings. But you would have to call them Crazed Former Guts holy beings. Holy beings are an iffy thing---it would be better to call them;

Crazed Spiritual Powers of Guts: Gut Severed Digestive Spiritual Forces:

Ask: *“What % of digestive forces are now severed?”
“What % are still alive and retrievable?”
“% of toxicity from other people's gut severed digestive spiritual forces?”*

These relate to TRAITS. If you are low on spiritual forces, go to the traits and ask

"Where am I low in digestive traits, which are going haywire and about to sever from my guts?"

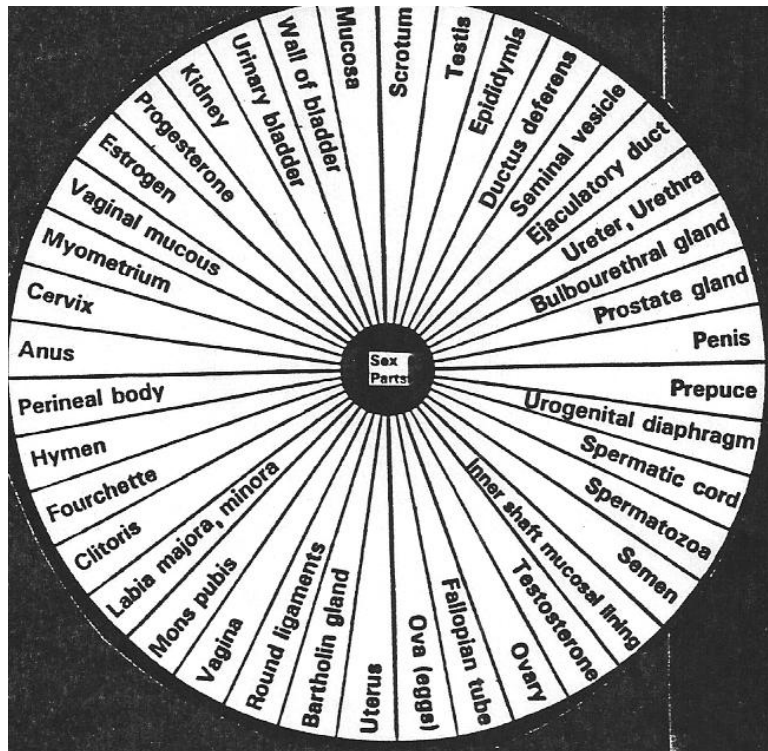

Use: The Condition Chart, and Pineal Chart.

Ask: *"Do I have Digestive traits that are: perverted...rotting and breaking loose...foreign?"*

"Were-animals" are related to these traits and if you have them, you have foreign guts on you. Digestive traits are related to the corpse aura and a zombie could have a component of this.

Sub-category of planets, these are less important than the traits, but they do apply to the Gut spiritual forces.

Check: *For Contaminated...Foreign...Lost.*

Sexual organs digest Karma, not just the guts.

Check: On the sexual organs, and

Ask: *"What traits and planets are: foreign...severed?"* For example

"What % of penis-Mercury is gone somewhere?"

Do: Keep digestive and sexual organs clear as they digest and produce karma. The Sexual Parts Chart would come in handy, so as to know what is out and what is in. (◀See Chart).

Renegades old and now new: relate to null space contamination, split-time soul types, due to a connection that is thrown back into split time---like a past self-resonance, or a loss of boundaries due to resonance with the old self, old lovers, etc.

T2 quits when the Earth cord snaps, as she goes beyond the pineal to do this work (sic).

If you find yourself talking about something, pull it out, and get it over with. Often it is a sore spot that can be taken care of. If we find it this way, it helps to remove resonations, so that one would not lose one's soul in the presence of the

person/archetype that one is talking about. Talking about something can bring things to a head.

An aspect of one's greatest weaknesses, are (that they are one's greatest strength). Leaders may seem to be controlling, yet a person of power naturally has an ability to control. What is a shepherd, but one who can corral and lead? With every great power are nuances, dissonance points and if we don't have aspects of weakness, we would not be human. There is a fine line between shields and masks.

The difference between being healthy and unhealthy is that one can keep an aspect of personality and one could be a strong leader with an aspect of control, which means one can have personal power, which is not a bad thing. But if it boils down to little issues around videos and always having to choose them, that is when it goes beyond a shield, it becomes dangerous. We all walk the line with our dissonance points. We all come in (through) lines of Virtue. For example if one is a leader, then one has to balance the powers with the Virtues and it is a tightrope, a razor's edge. When one embarks on the path of mastery, then one is conscious of it, and it is best to deal with it with lightness and levity. Laughing at one's self, we have all got to do that, and at each other, which sounds like the most vulgar thing to do.

T2 says she is not laughing with you, but at you, if one takes (things) seriously, one would go mad with the sorrow with what has been lost. The love that everyone felt for A and L and others was indescribable. T1 would work with A's food obsessions, but it made no difference.

Love is measured by how much personal force you put in helping someone achieve soul alignment with the Logos. That is the measure of love. A lower version is how much force you put in helping their lower aspect to be in alignment with the Logos. No one could deny the effort that T1 and others put in that regard, most for naught. If look at the 200 former students, and the hundreds that T1 taught with toxicity, endurance and suffering---you can see the love. If you remember the Razors Edge movie where Bill Murray says of his dead friend: "He was a glutton, he had more food on his beard to feed a village"...it was a coping strategy. It was so necessary because he who loves greatly could easily be destroyed without a balance with a mechanism of harshness. One needs a severity to balance the tenderness or you cannot

survive, you cannot do any good or interface with divine beings or humanity. On one hand we look down into the soul toilet while it is being flushed and on the other hand we have to look up.

In this student's case, (it is good to) see power as one of roundedness rather than directness, or in verbs/words. It is as though---see your female power instead of being in the throat, as in the pelvis with nurturing and a sense of creative reception rather than the (projection?) of the throat. It is the balance of female power: they are both creative. The pelvis is the big yin. Each one of us could look at each of the virtues and chakras. One thing to suggest is that whenever we find ourselves irritated or apprehensive, know that there is a major flaw waiting to be unveiled. When we see irritation, pull out the key resonance with (for example, this student) that is the weakness (which shows itself) in the conversation.

Control is never bad, it should be exercised internally vs. externally, as control of self, and then one can master others. Nothing is wrong with power, but if one has not the power to master oneself but only others---that is the sorcerer and that is the difference to a Holy being. A holy being is not powerless and inert, it is always exercising control. Without some flaw, we would not be human, so we have to have a flaw.

Maybe humor needs a (---) to not take ourselves and others so seriously. For example this morning---it is most healthy when you start to laugh after a harsh comment. And part of our education is to pull it (our flaws) out of us. T2 will never forget when Mre irritated a student to no end and he was beside himself in irritation. One should bless the heavenly stars for the Mre's of the world. She was great for point pushing, and has kept her Type 2 soul better than a lot. Thank God for dissonance points for personality, where would we be if not? If we laugh at ourselves and everyone else associated with us, we can get through the night. Look at everything as something light, but not do it pathologically. If we take it too far, past the point of good intention (it would not be appropriate) we may have already achieved the purpose (with a lighter approach).

One of this student's great strengths is a lot of power, she can change her course dramatically and she changed the battleship (of her life) from left to right due to enough personal power. (It is an ability) to say at a certain point one will quit everything one is doing, and change. That is a good thing. The problem is looking at the undercurrent, the nuances that are relative (to this ability) and are detrimental to one's personal life. In this case it is not a major issue, but a refinement issue.

For example General Patten; with great strength he knew what he was destined to do and because of the strength, he felt he could rely on that entirely and not develop his weaknesses. (He thought) that they were not worth looking at. If he had done so (looked at the weaknesses), he would have been a much greater man. He had a great deal of talent and he chose the lesser weakness (sic). A great virtue becomes a weakness if the other virtues are not developed. He was convinced of his own abilities, spiritual and artistic and that it was his destiny to lead. No one questioned that. The problem was his not being interested in his weaknesses. He thought one could ride through on one's strengths. One Virtue is the sum total of others and one cannot manifest one law at the expense of others. Law prevails.

T3 speaks: It only looked significant that he was placed in that role, but it was insignificant, because he had been placed in that role over and over again and he still didn't get it. Even in the context of the film, he would be placed in a position of power and then sabotage himself.

T2 speaks: Whereas Omar Bradley could control his tongue. The meek shall inherit the earth and he had been Patten's student.

If you use your weaknesses, and you have to have them, they are dissonance points to hold you to the Earth. (Is it) a weakness or a strength? It depends on the side of the coin. Anything (any ability) above the norm becomes a weakness or strength. Sometimes one takes a calculated risk. Patton was successful in that he could push against all odds, he was a pit bull. It hurt him in the end in some of his ways, but overall it helped the world. He was a good man because of his weakness. See, weakness with a grain of salt...say ok, a person has a weakness, but maybe it is good, maybe that dissonance point is driving outward to accomplish a goal, because it is so single-pointed. Patton's (strengths) were so single pointed, that they were not balanced, but they were powerful. He sacrificed harmony for power. And in the case for the Allied invasion it was good he did.

Other people could look at our group and see the weaknesses. (However) you cannot look at things as weaknesses, see them as dissonance points or shields. We have to have ways to break-step because the human condition can't tolerate intense spiritual work without disappearing, dying, going to prison, the nut house or something else. So look at it, in order to survive and finish a job, one has to be clever and has to use dissonance points and break step. One has to understand frailty as a strength at the right dosage and time: *intensity, duration, and frequency*. You can dole out your shields enough to get you by. Is there any point in (always) saying what is right? If you say what is right (at work), and they can (fire you), how can you have power? Patton blew it because he was too direct for his own good.

Identify your weakness without attachment. It is a dance between control and flexibility, between severity and gentleness.

(Breaking step) It is natural in corpse bodies to have a fair amount of hair. The question is, do you want to align with the corpse body or make it easy on yourself? If hairs are antennas, should you have them? How many do you really

need? That is why monks shave their heads and why animalistic humans have an abundance of hair. Aggressive women have thick hair on their legs and arms. The more you shave, the less you get. Look at it as a spiritual goal, to not have antennae out to every Tom, Dick and Hairy.

A student is leaking on the hair issue. Hair problems may be physical or spiritual. What do they represent but antenna? One may be putting out antennae relative to those locations. Under the arms is relative to the heart chakra stuff, wanting to be liked and sociability. This relates to the Law of Use...of a razor. It is the Law of Use relative to romantic love and "needs" which are wanting to belong, rather than saying God's will be done. For men the antennas go out and for women they go in. Why do men have hair? It is related to the direction of flow. Women's energies come in and men's go out. Women should not (have the antennae, as it represents) women wanting to go-out and grab things. A woman with hairs is a masculine thing. Men should not have hair on the face, as it becomes like pubic hair. It is like looking at a vagina everyday It creates an abnormal focus on the mouth. Beards are yin, not yang. In Hasidic tradition, a woman shaves her head when married and wears a wig, and only the husband can see her.

It represents the heart chakra---a woman with underarm hair (shows) she is needy and that she draws in. A man can love universally by going out, a woman sucks in. It used to be ok for a woman to draw in, but now if one walks the streets and sucks in, one would be in bad shape. A man should be able to put out power, and a woman should not draw in disorder. Leg hairs on a woman should not be extremely coarse and long, as they draw stuff up the legs to the crotch, which is an area of prime contamination. If you want leg hair, wear long skirts or pants all the time. If a woman is seen by a man, the carnal thoughts of zombies move up the legs to the crotch. A black skirt shields the leg emanations. Why did T1 wear black pants? Why do nuns wear black? If one has leg hairs and wears black, men are not likely to penetrate with their gaze, merge and climb up.

Men are losing hair on the head and it is a decreasing of antenna to the world. The head of hair is an antenna, and a part of (the men here) is trying to cut down on pulling in emanations (sic).

Lots of leg hair is yin and yang balance. The right leg is yang, the left is yin and a lower focus. If a woman has a lot of leg hair and shows them, it is like a vestigial tail focus. Men may have a generation of power and a forcing off of energies with leg hairs. A woman receives vestigial tail energies and (it represents) an acceptance, or a hatred of man. Or a woman is saying "take me, I'm yours". A woman would not want eyes drawn to her. If she does draw male attention she either has to fight it off or receive it. A modest woman would not show legs or have hair; it shows a hatred for males.

For a female to allow a hairy appearance is a male thing. The United States has a cultural standard: that being highly hairy is masculine and (a hairy woman) is likely aggressive to males or ignorant. It is a denial of the receiving capabilities of yin hair. One female ex-student with leg hairs was always wounded and washing-over with any (disorder). A woman should not have antennae out and she should not be wanting to receive male information. She should be selective on who she doles her favors out. If not, she becomes a mega antennae and gets trash all the time. It shows a hatred for males or a "I can take it and dish it out too" attitude, or a female control; "Screw you one way or another". Wear dark clothing if you grow hairs.

Pubic hair; women with a lot have to be cautious, as they are putting out antennae, they may want to do something with it. Look at all female hair as receiving, and male hair as putting it out.

Hair on the head receives anything related to the crown and brow chakras. It could be esoteric knowledge and one doesn't need long hair to do that. Wobbly people should have shorter hair. Those who are fairly stable can have longer. Hair forms antenna. Hair location draws to the chakra for the woman. For the man, it goes out. Why is it better to have short hair for men? It is easy for thought forms to go out, so that others don't need to know what you are thinking. In Samson's time, he could shoot thought forms out of the hair.

The problem with men, is that it goes out of the head all the time relative to the brow chakra and crown. So it is not as negative as the other hairs. One can shoot energy out of the eyes as well. For people with borderline thought control, hair should be short. Part of male power is for others to not know your game plan or frailties. Males with long hair tend to become yin. Elementals of women and from others who consider long hair feminine, becomes superimposed (on the man with long hair), and that is like a demon of homosexuality on them. The high rate of homosexuality today, is relative to the 1960's, which was too casual about gender blending and where androgyny was the thing. Which was consciously an effort to stop the hatred of genders, But hate was everywhere.

Women do not make great soldiers. Women are cyclical in their ability to endure in battle. There are realities in physical conditions that we have to face. Fighting is a thing that men are better at and lifting cars, etc. The gender things that are there, why resist it? Women can figure out more formless things.

Curlier hair is a mightier antenna. They are more powerful because they are kinky, they twist, coil and pool in the curves, and there is more surface area on a curly hair than straight. It is more of a relay station of force. It takes more power to rebound if one has to turn a corner, than to go straight ahead. If you have to switch your foot angle in a run and switch inertia...it traps power at the curls (sic). If you are running and you hit a curl, you have to turn and make more

steps than on a straight line. So you generate more power on a curl than straight. Expend or generate: males expend more power with kinks, black males with long hair are weaker and whites theoretically would have more thought-form power.

With receiving; a whole other force is going on. Black woman with kinky hair; with thoughts coming in they get stuck on relay (the thoughts would) and then be confused. It is good for a woman to have curly hair if they are attacked constantly with thoughts, as it is a diffuser of thought forms. The thought forms get hung up in the relay station and then a woman can wash her hair in the evening. It is a power thing: in or out. For women so much is coming in. (This is good to know) if you want it to come in or stop it.

Fine hair vs. coarse hair: there is an overall theory with why one is born with coarse or fine hair and then it gets coarser or finer later in life. With eyebrows, thin, thick, long or short; what is the reason? It is a mystery. It has to do with the brow chakra. A general statement of fine/thick relates to the spiritual significance and it is the genetic tendencies towards the general or specific, and towards refinement vs. desire for materialism. Fine hair is more likely (the diameter of hair shaft) to relate to being more refined in nature. With thick (fine) hair, one is a practical person, one who can easily handle issues, take a grip, and move with an aggressive manner. (Thin) Fine hair would be a more neurasthenic and artistic person. And with the earth soul-cell tendency, one would tend to have longer, skinnier fingers and feet of certain characteristics.

With coarse hair, a person is more practical and would have square fingers. If one has coarse curly hair---more like blacks, they tend to have a power generation on a physical level and do not get physically weakened by spiritual matters. With fine curly hair, one is retrospective and ruminates over artistic matters, or the thoughts are introspective. This person is a thinker and internally directed and those with coarser hair are more externally directed.

With thin and straight hair, that is one who has a hard time clinging to the Earth. With curly, fine hair, one can trap power more readily than a person with straight hair, who cannot trap. To curl hair is a good thing. Things that come at you get trapped in the curls and it is a very powerful thing for a female. Thick hair has more life force and with thick eyebrows, one has more of a physical grasp. In one student's case, it was a lot of mental stuff which caused the eyebrows to get thick. T1's, in her youth, were thicker

When a person is more etheric and real old people, they will have skimpy eyebrows with hairs pointing to heaven. Wispy means more etheric, or that one has a spiritual grasp of life and it can mean approaching death. If eyebrows start to all fall out, pay attention, it may be a sign of less life force. The coarser the hair, the more difficult it is to be porous. A real coarse person would not receive well, so would have less porous hair.

Color of hair: T2 has done well to have red hair, as one receives more life force with red than pale. If one has dark hair, one receives more life force than a light haired person. But one who is given to depression should not have very dark hair, as it tends to cause one to go to depression. To color one's hair affects what is drawn into the head. So to have the correct color for you, to decrease the energy loss, (consider hair as) relative to reflecting and receiving.

If you perm your hair, take Epsom salts. Life is full of poison and sometimes it is better to have brief poisons (like a perm), than to live with a poisonous hair receiver. White hair is (ok), tune in to it to see if it is strengthening or weakening. If it neutral, why mess with it?

Why do people have long nose hairs? It shows life times of obsession with sexual matters and it relates to the privates; clip or pull them. Long ear hairs is a chronic communicative disorder linked to throat chakra attachment to communicative energies. Regarding the nose, ears, mouth, throat; ears have more to do with an attachment to sounds. Certain chakras manifest (disorder) as hairs going out of moles or orifices. Hairs are antennae in the ears to hear the sounds.

Those who are spiritual and artistically sensitive in a visual sense get long eyelashes. Those who have big eyes, it shows an earth soul cell with an overwhelming planetary tendency to physically and spiritually "see". A person born with a large nose, small eyes and large mouth want to smell and screw everything. It is a tendency in a family. A big nose, big mouth and small eyes: the nose and mouth are like a vagina and penis and don't care what they are looking at. Small eyes show one who doesn't want to see (maybe ancestors didn't want to see something).

A chronic problem with one eyelash turning in is related to a virtue turning in. T1 had one eyelash that would constantly point in, due to holding the male nagual. Long eyelashes in a male show too much vulnerability and receiving, though he may be spiritual and sensitive. All highly spiritual people are going to be vulnerable.

Sainthood vs. Sorcery; Dual Souls; Crossing the Line to Mastery

CLASS NOTES December 26, 1993

Everyone in the party has a saint soul. It is possible to fall from sainthood, just as others have fallen into sorcery. It is important to study the traits of holy warriors to not fall in pitfalls. We have done well in prayers to entreat the holy beings to prepare us in our path; the next stage. The key thing to keep to mind is that a warrior accepts his fate. This does not mean you lie down and let someone run over you or be a fool to set yourself up for destruction or to be a martyr. But it is to be cunning, sweet, patient and wise. But if you have to suffer, you accept it without a lot of attachment. We have suffering in our troops now, relative to personal change and ensoulment residue, coming back to the group.

Some aspects of suffering have to do with reformed lower aspects of the lower selves that are in conflict with sainthood and are being faced fairly courageously by our group. The saints who are impeccable will be able to use plug-in naguals from time to time to do holy work. Those who are saints, but do not have the stamina to do the nagual work, will not get the plug-ins until they are ready, so as not to be unbalanced. It is a miracle that we have plug-ins. It has never been done before, in that that people (are now) created as naguals or can function as saints with nagual parties. People used to be (either) born that way, or they never became that way. So we are at a time where we have to be cautious because our party is different from everyone.

It is exceedingly important that in dealing with other soul types to not be irritable or to condescend. We are to love them, not merge, but to love them. And there is an aspect to the saint soul not previously told that relates to the difference to dual souls in sainthood, which is difficult. Sometimes dual souls have two halves. But saint souls have a mobius or figure eight: two circles which form a bond. Then it is a mobius with a synergy power and a saint soul is a full circle. Each saint is complete. It is more powerful if saints unite in a yin/yang capacity, therefore forming a synergy. The problem is, that in some of the male dual souls, since they haven't been exposed to the teachings (such as "Tor", "Po", "Dal") we have had to endure a lot of contamination. They have ways in their own religions that are not necessarily compatible with ensoulment. They merge so much; they draw a lot of disorder because of that. These are still saints. It may be best, and it is the divine wish, that somehow our group have dual souls that do not bring in disorder. How do we do that? The key thing with Po, etc., is that very holy people desire goodness, they are in touch with people, it is their responsibility to take care of people and their merging capacity is great. Many people suck onto them, they are admired and loved as leaders.

This morning and night (according to) the holy powers, as the prayers went forth for the sainthood purification of the party, it may be wiser to have a baby saint for the male rather than a public figure who is constantly being hooked into by other people. If our members are to do ensoulment and work on a large scale, is it not dangerous to hook into all the people who Po, etc. (encounter)? We run into problems and even though they are holy and saints, they have a big audience. All have a tendency to merge. They can keep saint soul status, we can watch over them and the angels, as they are quite holy. It all appeared to the holy beings to be expedient to attach the female duals in the group to new baby boys in families of a holy type of family, who are highly religious. These are families in which they would not be in scrutiny all the time, so people would not web into the party though Po, etc. And the holy beings could still watch over the former. But if we have baby boys as the other side of the mobius, no one would focus on them nearly as much. It is an added advantage because a holy baby boy could be led in righteousness with a Type 2 family. The female duals of Tor, Par, Po and Dal, have been given a precious baby boy on Christmas.

Symbolism: what is the Christ consciousness, but the hope of mankind of the Christ coming into birth to help humanity? If in truly (---) the Christmas was to bring the hope of tomorrow of the next age. We should look on these baby boys as perhaps holy leaders for tomorrow and take that responsibility of watching over the holy leaders of tomorrow. And their very state of being anonymous protects them, as if hidden away in the manger somewhere on the Earth. (It has) not been said where and yet they will in fact (be the unborn naguals). The unborn naguals, they were waiting for this time. Why does the mystery of Christmas persist, even though literally, Christ was not born on Christmas Day? (It is because) the akasha symbols are so strong for Christmas for being born on Christmas. We have reached a time wherein it has been transferred (sic).

It is possible to use in essence the synergy energies even with a baby, as many times Li's naguals, has taken and merged with Se to work. (This one) is not conscious of his activity and doesn't have to be. An elemental angel supervises the coordination. Se can work on multiple levels, as she has an unusual aspect about her. As head exorcist, she can endure a lot and she has been given a burden of having to deal with Li's nagual, which is a very powerful one, being the son of (=). So it is an honor, a responsibility and a burden that she deal with this and be intertwined with Li as a saint. She has to act on many levels with multiple spiritual powers. When you feel weary, realize you have a great burden on your shoulders, responsibility, honor, and the Holy Powers know how you have suffered.

The Holy Powers know how all of you have suffered in order to keep going with the knowledge and responsibility that you have. It is as though you have been asked to do superhuman things; leave your children and spend hours in cramped quarters making weird faces. Things (you have been) asked to do are so out of this world and yet you have persevered. And because as you know, there is no agenda in this place except to do God's will, you have persevered despite great personal hardships and transformations. Don't think it has gone unnoticed.

We are approaching the time for a post-Christmas gathering with some clean up to do. With the new chart, the key things to notice is down on the right hand corner you will see "ensoulment residue", or "no flaw". The reason for this is that sometimes you may feel guilty or feel an attack and you keep finding more and more stuff. You might say "Maybe I have personal flaws from past, present, future?" You may feel tormented, all of you, as you don't know if the contamination is personal, through ensoulment, or from an attack going on---i.e. relatives. Hate elementals, open windows and leaks occur when the relatives get fueled. This occurs not just from fuel from you. You will feel the hate hit you and you will feel shaky and itchy, or wobbly and miserable. T3 walked in the kitchen and felt hate thought forms for T2 that he knew were not his, coming through him, and likewise we have to keep that sense about us. We have to know that our thoughts are holy and when they are unholy, we have to assume it is a spiritual abnormality and not a part of our true beingness. You are a saint, and you must remember that.

If you are impeccable, you will also function intermittently as naguals and T2 is grateful that we are willing to do so, as it is a tremendous burden. One can see the residue coming back, from nagual functions. The sparks that have gone out are now decaying and you are digesting disorder. We have seasons to rest and seasons to work. Remember a warrior accepts his fate and that is key. If you are in the heart of misery because of crap coming back, try to clear yourself, but never blame yourself or others, or hate. Never wish for the past, or pine for a different future. Live in the now and accept your fate. Try to do what you can now, as there is no reason to suffer if you can remove the disorder. If it is just our fate to take on the karma of ensoulment, then do so. If you snap under the burden, then (the teachers) will fix you. They have promised that if you are truly impeccable, they will not abandon you, or let you fly off into space, or be a zombie as long as you do your best. They will stand by you. They have the ability to repair monadic threads. You too have that ability, unless you are tremendously exhausted and the pineal gland is gone awry. Keep the pineal gland chart accessible to not be exhausted, to be strong, and to know when to stop working, when to shift gears and break step.

T2 is very proud of all of you, you have done very well, and she is extremely joyous that everyone, the adults, are saints. You have done well. We are all tired, it has all been like a battle, a battle within and without; a battle to survive the burden of ensoulment residue. When dreams hit you, do not indulge in being guilty. Ask on the chart if it is "personal" or "other". If it is part of you, pull it back, but do not indulge in guilt or fear.

We have succeeded in forming a saint party. So recognize your own holiness and if your life is sometimes difficult, accept your fate. Laugh when you can. Enjoy life as much as you can; the beauties, painting and walks. Find your shields and savor them so that you can have the stamina to be a saint which is indeed a challenge in a world that will no doubt hate you. So be prepared to be rejected, to be inspected as a nut if you were to say one word about what you have been taught. Don't be defensive, and don't try to blend in so much with lower soul types that you form a resonance bond. Realize you are different and will be forever, no matter what happens to (the teachers). You have crossed the line and entered into the nagual experience of sainthood, and will never be able to go back.

Should you try, you would dearly curse your fate to the end of your days and curse (the teachers). That is why JMcB is so obsessed. Why do they keep attacking over and over? Because they know they crossed the line and failed, and they cannot forget. So you are eternally different, and thank you for being different. If you are not, you could not buoy up the rest of humanity. God Bless you all. Hang in there. Thanks for being crazy enough to be saints.

Good News from the Battle Front

LETTER December 27, 1993

During the night, I figured out why some of you were having repeated problems with *fallen angel infections, demons, husks, and masks*. You get them because the **Seed Name**---which is a residual from split time, of the primary problem (or multiple ones) is retained in one or more locations.

The name of something is like a song you might have heard on the radio one time that keeps playing in your head long after. You don't know why you keep humming a tune; it seems like a stuck phonograph needle. The name of something disharmonious can impress itself upon your physical matter, like a sand painting being changed by loud music.

Disharmonious names, or songs, change the dissonance points of parts of your aura or body, creating patterns that we have called fallen angel infections, demons, husks, and so on. When a body part or aura part gets overwhelmed by the sound of the name, then it starts to resonate with a mirrored pattern. Eventually, it may form something like a plaster-of-Paris mold, or mask, that echoes the shape, or sound, of the name.

During split time, demons formed into the tissues like **"Things" or animals; demonic archetypal shapes.**

The Things we chopped were one aspect of these demons. In the most severe cases they changed the appearance of the person, reflecting the animal shape. The Yeti, werewolves and Goat men were pronounced examples of solidified masks or molds of the archetypal demon.

The primal ones were shown in the evil cabala drawings and lessons. (*Each of these are explained as to qualities and more symbols, drawings, explanations on pages 92-95 September 93*).

These infections, demons, husks, and masks can be shattered through the use of the will, and yet may reoccur, if the primary sound, or name, is not removed.

Most of the names were formed in split time. Such name seeds may represent your past selves, your relatives and old friends, or an obsessive idea. Even benign-sounding memories of your early childhood can form a disordered name, because it pulls you to the past, preventing your current harmony. This is one reason many of your body organs would dowse as very young, or very old, if you resonated with older people. Therefore, you may get demons that dowse as your mother, even if she was a good old gal at the time of your childhood. Clinging to the past will reinforce the name seeds, causing them to sprout out infections, demons, husks, and eventually masks that mirror the disordered past ideas or persons from split time.

The feeding of these archetypal things became more complicated when split time ended, so that many of them started dying off. Since the eclipse, the feeding of the name seeds has only been done through ensouled persons by repeating the sound of the name seed in some manner. This why indulgence is so harmful. Circular thinking repeated the sound on the name seeds, feeding them in some of you. Indulging in emotional habits also repeated the name seeds and reformed anew the demons, husks, molds, and masks.

Even if they were not repeated consciously, all of you repeated them in your dreams and memories. And many of you were tormented by such thoughts and desires. If you were completely impeccable and could control all your emotions and thoughts, these would eventually die out. We cannot wait for that time to happen; therefore we should shatter the sounds to free you from the torment of such obsessions. In doing so, you will be clear enough to help your fellow man become clear of his obsessions.

If you are lazy and do not remove the names or masks, then you will continue to deteriorate. If you indulge in circular fantasies about zombies or the past, you will create a new **pseudo-name** that will not be as powerful as these, but will likewise cause your degeneration. The **split time names** were particularly malignant because they are remnants of the Antichrist. Therefore, if you don't remove the lower effects, such as the masks, you will take on the face of evil in your thoughts, emotions, desires and behaviors.

The **core seed names** are ones you have hung onto since the eclipse, because they are a part of your identity. You should realize that they are unnecessary, and your identity can become the harmonious sounds of the divine choir, instead.

The key locations for the Name Seeds include the:

Astral Creative Gland above the head,

Monadic Layers of any Body Part,

Virtue Aura at The Feet, and

Earth Core

Check: *These first for the number of name seeds, and shatter them all, with your holy Will.
Everyone check the nagual substance layer also.
You may need to check all layers of the aura, as well.*

Sucker World Globules are oozing droplets of fed name seeds that drip over the lower auras. They are like microcosms of split time. The soul toilet relates to seeds in the feet of the Virtue aura that drag the Virtue aura downward, under the Earth. If these are not removed, you will continue to get the other disorders, and that may reflect in mental or physical illness.

Check: *Over the rest of your body parts on all layers of the aura for fallen angel infections, demons, husks, and masks, that have sprung out of the name seeds, and disintegrate them.*

Do: *You may need to do these in layers.*

We worked on all of you some already, since some of you had seeds in the millions. CAUSES:

Sexual memories of zombies are prime causes of name seeds.

Longing for an old lover, a comfortable idea of a home,

Having obsessive concerns about one's children's safety or happiness, all have formed seeds in the past.

In general, they all formed in split time, since they were the product of a deformed creative Earth power. Such seeds are not likely to form now in the same manner, but must be removed, as they are cancers that will spread disorder. We must take it upon ourselves to remove all the evil name seeds from the Earth, but first of all from ourselves.

Happy hunting.

Mystery of Omens; Species of People; How to Keep Personal Power

CLASS NOTES December 28, 1993

We will talk about omens and the mystery of omens. One that happened today was interesting. Last week T3 had hauled trash, did construction and heavy labor. Then cold weather came in. The best we know, his nagual-blessed holy ring slipped off his finger and was carried off in the trash, late at night. The last thing he remembered, it was gone. All he could assume was that it was in the trash. He found another silver ring to wear while his (relative) was here. Today, the old coins from Aur's house were brought over. T2 fixed up Li's present with these coins and she went to put them in a silk bag she had in the closet. In the bag was a Zaire dollar. T2 then put the coins in the bag, but they didn't fit, so she dumped them all into a box and out plopped T3's ring. It was the same ring that he had lost in the trash. T2 had looked through the coins and the bag, and it wasn't there. It had manifested after putting the coins in the bag and then pouring them out. It was a typically good omen relating to a nagual unity to fulfill the plan of God. And it represented that all was not lost. What (did it) mean when the ring was lost? It was along the line of when T3's (relative) was here. It was a stepping back in time, a shadow of death. (The relative) is not an older (person), but did not look very healthy.

It had to do with...that in the time his (relative) was here, T3 could not live in the now. So much of the conversations were on what happened ten years ago and showing videos of cruises to Greece, dinners and food. So much of the conversation centered around food and the past and possibly meals in the future. But nothing really that we talked about had to do with anything that mattered, except one evening when we steered the conversation that way.

T2 believed the ring departed, as the common man (and even good people) have a very hard time living in the now. People have a hard time in giving up the **masks** of what they think they are. It was a premonition of the work around masks that we are dealing with. It is beyond the tonal, but remnants of split time.

If a person repeatedly stretched back to remember things that happened in split time, they form a demonic plaster-of-Paris molding. The aura then reshaped what they were like, or what people thought they were like. The (memories) to split time and the thinking that it was a grand time creates a demonic presence for the person in the now. It was saying it was not in the now, when the ring left. And then when it reappeared, it was to say that nagual time would not be found in the (relative's) presence. It was a waste of time. It was tough, as he worked so hard as far as the relationship. It was painful and a reminder of how much we have all changed. And when we went to Se and D's for dinner, it was more apparent, though everyone stalked nicely. In the end it is what you must do; stalk. You cannot describe parts of nagual experience without risking them thinking you mad. So the ring reappeared today.

T2 had been struggling mightily to come to grips with masks and name seeds. How do we avoid them and become as aligned as we can, joyously, on the path to sainthood? One of the keys has to do with leaving your old name seeds behind that form a mask, which forms mirrors of a split time self, which was in a time of absolute depravity in the spiritual realm. Other aspects of the name seed that had to do with tissue resonation (was due to a) blending of animals with humans. In T1's earlier writings, were the themes of Atlantean experimentation and alien in-breeding. At one time we chopped these things to break them down, but the mystery of them tantalized us. We always knew there was more to know about them.

Also, the **animal archetypes of the evil cabala** were part animal/human monsters that seem archetypal. It is a wonderful thing to begin to see, not so much through a glass darkly, in that it is clearer to see now, so much of the energies relative to *Things*, *Dark Force Demons*, *Obsessions*, *Archetype Demonic Energies and Forces* which were able to grow like mad from 1940-1993. If you think about it, immunizations using the monkey and simian virus contamination in the polio vaccine: that produced a lot of Things, mental and spiritual disorders and caused mutations in the genetic pools. To use monkey blood was a very disgusting thing to do, and we still have inbreeding (techniques) going on with baboon hearts, blood transfusions and organ transfusions. The genetic pools are so contaminated that many produce archetypal beings.

Sexual promiscuity in early 70's was a prime cause of Thing production. People who were spiritually contaminated with archetypal demonic forces bred with others, etc. So, we've seen that during split time evil power centers generated power enough to fuel development of demonic forces. Now is a time (that we) have shut down the evil power centers, thanks to the impeccability of warriors, the holy beings that have watched over us and other holy teams and other places. So we have reached the end of the power centers of nasty, part-human Things. Still, metaphysical groups that worship Pan and the pagan worship which is becoming so prevalent is disgusting as they worship part-animal creatures and it is disgusting in the sight of God, as they worship demons.

Now, it is not a popular stance to say that---as the "anything goes" mentality prevails on the coasts in particular. Such worship of demonic forms is one of the primary reasons for the downfall of civilization. People may not think they are worshipping demons, but if they think that baboon hearts and abortion products are ok to use, they are worshipping cross-species migration and experimentation which is evil in the sight of God.

The knowledge of species is fundamental to all holiness and to clone part of animals into humans is bestiality.

The materialist thinks there are no spiritual ramifications and the Catholic Church is the only strong voice against it. We have reached a point where there is a hope to destroy (this disorder). Spiritually sensitive people have experienced suffering from this (situation) such as bladder infections from **“Walking Catfish”**. Aur had an Abyssinian cat with human material (in it) and the cat had so much walking catfish, that it was oozing through the skin, was miserable and had to be put to sleep. **What does it mean if someone is a primary breeder of these things?** Is there a personal flaw; is it due to sexual contamination, immunizations, blood transfusions, gamma globulin shots or from bad food? Whatever the reason, we must get rid of them.

It had been a major breakthrough to realize that the seat of it is called “SEED”.

The NAME is the only thing that separates one matter from another.

The dissonance point on the molecule is the key to the name, and if one can adjust or remove a disgusting name (as was the plan of God) then you can change the matter. So we are reaching that point now. Some of these forces are more complicated than others.

Today when working on many of them, we can pull out, and put into something---like last summer. What that means is a mysterious concept. What we are doing is creating a similar resonance to draw it into an object; for example, a brick.

We can pull a demonic pattern like a cloud, draw it from the rectum and will it into a brick wall. It may not be the ideal thing to do, but at current time and season, it is the only thing to do. Sometimes we are given a power in a season, and we have to wait to do something about it.

The more complex ones, we may have to:

Pull out of a chakra or our auric fingertips and throw into the concrete in a bridge.

Others may need an unwinding waveform or the waveform chart.

Some need prayers with certain holy beings called Destroyers. These are like angelic forces that break down and compost something. The universe is orderly and beings are in a hierarchy and they do distinct jobs.

Many of the ensoulment residues coming back cause belly aches and gas bloating. When they do return, go through the TO DO chart and call the **Holy Destroyers** to break it down into compost. **All of it is in the digestion;** you are eating the karma of the person ensouled and you will feel a physical sensation of fullness or discomfort. In the uterus of women or testicles of men, you will sense of congestion and discomfort. Sometimes you will feel it in the lymphatic system or feel wheezy and fluid filled in chest, with tenderness in the armpits, chest, breast and groin. The lymphatic system can be congested with by-products. We are going out, rounding it up and digesting it. There is no honor in digesting slowly, but it can be done quickly if you call on the Destroyers.

Other ways, with intestinal congestion, pull from the vestigial tail, or rectum.

Sometimes with Navel Clones, pull from the navel contaminations like the Things from the person that your spark has helped to ensoul from where you took on karma.

With tiny demons, you may have to chop, liquefy, blast and pull from the navel.

If you feel a lot of congestion, try these and keep experimenting, and we will keep you updated. T2 emphasizes pulling out and then chopping, liquefying, disintegrating and putting into bricks. Certain ones had to be put into pigs and T2 was reminded of the story in Bible. It is interesting in that this does not make the pig sick, (the residue) will eventually die out, but it is a temporary place to hold it until it is gone. She sent it to the zoo, since the pigs were contained.

It is time to pull out the Pull-out-of charts and make a copy of them. (Next Page. See also September 1993).

(Clearing) is going well and ensoulment is continuing. Some of the discomfort is *En soulment Residue, Zombie Resonance and biggest problems are Husks and Masks* which are falling off like scabs.

It is quite amazing, what you thought you were, or others thought you were in split time. The **pseudo selves** are like scabs falling off of the corpse.

It is quite phenomenal as you will start to have memory dreams, or a certain emotional, mental state from that time---split time. You may look at someone and they may remind you of someone you knew. You would dowse as being more than one person.

(One student) would dowse as his mother, father and two brothers. What is bad is that you feel all their disorder of split time in an earlier age. It is usually not anything that you are doing wrong, but if you reinforce them, they grow.

If you don't feed them, they will fall off as a dying aspect of old self, a residual of split time. To speed up this process, dowse them out. You will feel a lot stronger because you don't want the dead links to split time or to be held down, because you will be unable to do the work at hand. It is a relief thing, as (the husks and masks) are toxic. However,

the sparks sent out are being used right now and a part of yourself within those, do come back with contamination and they need to be dowsed out. Pull (those parts) back and blast what is on them. Normally it is not a part you that you want to keep, it is a substance.

Pull this substance back and disintegrate it. It is uncomfortable to have, as you feel the disorder of the person with a soul. It is comforting that those who are disorderly are getting souls, it is very merciful. It is possible that most will be able to keep the souls. The pressure on those souls is not so great. The burden of sainthood is harder to keep than a Type 2. We (here) would be more readily able to our lose souls than those who are more disharmonious. But you won't, if you do your best. You are watched over by the holy beings by the scores. They are so wonderful with the signs like the ring showing up out of nowhere.

Once in battle, a crucifix disappeared from T1's hand and then reappeared a block away lying in the grass. It was a little strange thing, (yet it takes) a lot of energy to create **omens**. The holy beings don't like to speak out loud, like at last Christmas.

When Jesus said "*There will be no sign, even an adulterous generation seeketh a sign*"; we are not here for hallucinogenic spills and thrills, but to be virtuous, follow law and implement it and to help our fellow man. Every now and then (the holy beings) will do something sweet and little, like the ring, or when they put the gold dust in T1's hand. Little miracles occur to encourage us on the path and let us know that things are going well. And T2 knows that it has been slow to finish the Laws and Virtue book. There was so much contamination from the ensoulment. It was difficult to perceive law and virtue well enough to write with clarity. Hopefully it will pick up now. It is wonderful the others are coming (for a visit), we will have a good time together. It is wonderful to be together with people of like minds.

TO CLEAR: Take the AURIC LAYERS chart; for example "Tissue" and you can use the contamination list with the SEEDS, etc. and put a dowsing finger over something on the list and

Ask: "*Do I or a person I am working with have any of these?*"

Do: *Go the To Do chart and work.*

Write "OLD SELF MASK" on the chart,

As it is a part of the split time self and you do not want to reform old identities.

An old self mask of Li is in his (relative). When T2 was looking at the card that she sent him, she could see there was a tendril to his current self, dragging him down. That is why (in the past) the naguals, (after their) recapitulation, would disappear and no one knew where they were and they hid out. It slows you down if someone is obsessive about the way you used to be. **For example:** his (relative) doesn't want to think differently so she has created a demonic image of what she wants. **Ask:** "*How many old selves of me are in my relatives?*" And use the old name as well.

These masks are based on some false idea of some kind, of someone's opinions. The person who holds the mask has some kind of **fallen angel seed** which blends with what they think you are, with an **obsession seed** of what they think you are, in it. For Li he has from his (relative), four obsession seeds in him through the past and they can be seen in her handwriting.

Think of people who you are likely to obsess about. First look in general, such as

"How many masks from split time are out there relative to someone's false ideas about you?"

Often it is a grudge, or someone who thinks they just love you, it doesn't matter and it can form a mask.

"How are the relatives, etc. powered?"

It is because of the fallen angel stuff. If we are getting further away from split time, how are they fueled?

By being re-ensouled;

Either an ensouled person feeds them,

Or the monadic substances they have are forming a mold of an obsession of you.

It is as though there is a doll of you, a sense of them, and a part of them in some way. In the old song "You are a part of me, all of me, take my heart, you took the part that once was my heart, so why not take all of me?"

Obsessions: they want a bit of themselves imbedded in you and you in them. It is common with aunts, uncles and siblings. The key thing is that there is something against Law and Virtue of a Fallen Angel nature. An ensouled person can become an **evil being**. If the person continually chooses evil, they will dowse as an evil being. If they become a **zombie**, they become an evil being by becoming a **vampire**. Eventually, they will probably lose their new soul, though they may still operate with the molds on them that made them lose their souls in the first place. If they live exactly as they did in split time they go against Law of Change. They put on the mask in morning so they look just as they did before, or a picture of you they will stare at, and they will try to reform the mask.

Monad (droplets) and desire tendrils go out to the picture and they are transferred through the power of creative thought to you, which forms globules of a mask---from affection and virtue substance. Those substances squirt on you and

form a remnant of that microcosm of the mask they have of you. The mask takes a form over you so that the view of you can become a reality. If you don't know who you are: when people try to pin you down, with the more they know, the more of a grip they have to form a mask.

They have to know a little about you to form a mask. The more aloof you are, the less of a grip they have and they have to get five traits right and only one wrong to hook into you. If you truly do change, they can't hook you very well. **If you fall into the same habits of thought and being, they can hook you.** If you are truly different they can't get their fingers in tight. Memories of beingness at holidays form resonance portals and the more portals you have---is would be like bowling ball holes; they can grab you and then they have the ball.

This may seem paranoid, but what is to be done, is not to be afraid someone will find about you (sic). In California, it is appropriate to reveal the most intimate details and it is the same in Oklahoma, though less common in the East coast. At the dowsers conference T2 was amazed at what people would ask, and it seemed vulgar. At family gatherings, they feel they have the right to ask anything about you.

(One student's) mother is prime example. "Everything is beautiful." The big thing is to know every detail about what you do and if you don't say anything they get frustrated and want to know. Why? They are not being mean, they just want to hold on to you, by forming a voodoo doll of you in their heads, holding onto memories and then gripping into who they think you are. It is like the movies in 60's and 70's: Bob and Carol, Ted and Alice with therapies and looking at each other and "relating". For example (quoting movie): "*Hel-lo in there...*" and they stare in each other's eyes and pull out the secrets of each other. If you didn't do that, you would be thought to be hung-up and cold. It is typical of the pathology of split time. Throughout the movie was the concept of "nothing is evil", "everyone just has personal hang-ups" and "everybody loves each other". In the final scene is (the thought) "*What else is there?*" The concept existential, "Where do we go from here? Every taboo is gone. If we just "love" each other it gets ridiculous with all the possibilities and maybe it isn't such a good idea to have no limits. All this is implied. The movie is a spoof, but it is horrifying as an example of split time thinking, that anything goes, and we all love each other.

How do we keep our personal power? By not revealing so much about ourselves that people can form a mask of you that they will try to rebuild. In a family gathering, they will recite everything that was done, the awards and the high school events. T2 has seen 50 year old people talking about high school; a time of glory; a mask of a star football player. People take their glories to such significance they destroy their future. To hold on to a past glory is to destroy the future glory. If we cannot live in the now, we do not have any power. You don't live in the now and have fear, regret or longing for the past. Like (this student's) father, he was talking about his wife (deceased) as if she were in the next room. This is a real significant thing, he has built a mask of her and it is dangerous if a warrior forms a mask. Then they become a part (of you) and the personality controls you.

You form a clone of someone you love—and this is not to forget the past, but if you revere someone who has died and cling to that, you create a voodoo doll and clones of who you think they are. The danger of that is that it absolutely can inhibit you from becoming yourself. The whole focus in this teaching is to teach you to be yourself. It is ironic to T2, because the fear (created in) the media reports is that we have been hypnotized, when the thrust of this teaching is not to be hypnotized, but to know who you are, to know when you are someone else and to see when you make icons of someone else. **Satanic Icons:** these were very similar to the clones except clones are specific microcosms of people. Icons could be teachings and *books and things*.

Realize that there is a **physical component residual** from split time relative to the creation of masks and obsession seeds. Say you obsess about someone, like Li's (relative). The obsession seed then sprouts out hatchlings like globules, and it is a physical component; microscopic. If it hits you, it can make you sick.

If it comes in the air system---like voodoo with an obsession, the air can become polluted and one can come down with green mucous in the nose, pneumonia, bronchitis, problems with the urinary tract, prostate gland, bladder, with uterus bleeding or a man's testicles with pain. It hits your guts and it will feel like food poison. It can make you bloat up. It is extremely toxic to a physical system of a saint in particular. If you are not a saint, you do not suffer so.

A saint with a monad that is aligned with Law; when confronted with globules, masks, vs. the sanctity of the individual with Christ consciousness (suffers). It is the irony and paradox of being within the scheme of holy Logoic order. **If you are truly yourself, then you will be very happy, and not be sick.** If you are a saint, if you align yourself with law and virtue as a saint, and do not allow others to make icons or obsession globules about you, you will not be sick. But illness for you will be different to other soul types. Illness will occur from masks and icons. When they come out with emotion and desire they can make you sick, like an eye infection. With each "voodoo doll" representation of who they think you are, know that everyone with such a globule is linked with Fallen Angels or a Fallen Being and linked to split time.

The first thing for everyone to do is to get rid of all masks and obsession seeds that other people have about you.

Ask: “How many are out there relative to split time in particular?”

If your sister looks at your picture, and is obsessing in a pathological manner, thinking you should be in the family and be social with a rounded life, whatever, it forms a mask of what they think you would be if you were with them i.e. “If you were with them, you would be ok and if you were not, then not”. They want to control you and pull you to them to control you. It is a Plaster of Paris mask like Napoleon’s death mask; it is a mask of a dead person which, especially someone as powerful as Napoleon (such a mask) is very haunting. They are shoving that mask in your face and “This is who you are; or else.” Most are not so overt, they may say you are not fun anymore or you are at a party and discussing something of no interest (sic). For example with (the student’s) father talking for hours about a Greek cruise and the food...it was exhausting to be polite, and T2 thought it such a waste of time, talking about the past and food.

The key thing is; do you want to be yourself? You can’t be yourself if others have globules on you. How to keep from it? First recapitulate your life and don’t make a mask of yourself. You are a completely different person to (what you were in the) past. If you are sensitive to spiritual changes, then you have observed in the workaday world how you are fundamentally different to others. People are boring. What they are interested in is so shallow and if you try to bring up even the (basic) spiritual things (they are not interested). It is like the do-gooders on Christmas day are having huge meals everywhere. The focus is to give kids toys and be good Christians. What does that have to do with anything? Give the drug addict’s kids toys and they will be happy? It is a small picture and when you have looked at the big picture of the Earth and possibly of transforming that disorder; when you have seen zombie’s everywhere and then see souls again; the awe is so monumental that there is very little that would drive you into more joy.

For N and A; she saw the daughter with a closeness, warmth, devotional, with a soul’s glow, an interest in prayer; it was a deep rich experience. T2 said something about God and both kids echoed, “Oh, we know God is real”. It was unprovoked and sincere with a light in the eyes. (To have seen) one soul dead then from dead to alive, it was astounding.

When one sees someone come back from the dead---T2’s joy is beyond measure and a greater importance is that the rest of the children receive souls. T2 is not talking about raising corpses from tombs, but people coming back to live in a soul. After this, to sit at Christmas dinner and talk about the Rose Bowl Parade on New Year’s Day loses its appeal. We don’t want to waste time talking about the stock market or be discussing politics to excess. We want to know indeed, are more people being ensouled? What can we do to contribute to the ensoulment? It is crazy in the eyes of the world. If you said this to a shrink, they would lock you up as nuts---for saying that you had seen people without souls and then with souls. It is a lonely fate as a saint and if you tell what you know, they would freak out and lock you up.

Therefore, teach the children to be cautious at school and elsewhere, these children are remarkable to grow up with this mystery information and they need to be able to handle it cautiously around others. Be grateful their friends are getting souls—Type 3, mostly. We can’t condescend with the lower soul types, they can do marvelous things. Virtually no one is being made a saint at this time, we have to make (ourselves) worthy, and then be transformed. Few want the austerity, as we are looking at nuances of Virtue and Law, the masks of being self and removing the ideas of self. These concepts for most are ideas, but they are things that are so real they make you sick when you are walking, and globules from a satanic thought can hit you and make you want to vomit. Tell that to a shrink.

What if you said to a shrink that you have to repair a monadic thread? T2 said if she were to work as a death nurse, it would be hard while working with a bed pan, to see a snap of monadic cord, and then stop to fix it. It is a strange business that we are in and it takes 24 hours dedication to maintain sainthood. Most are not up to it, so don’t wish it on others. The prayers over Christmas had a monumental effect on spiritual bodies. T2 is honored to know us and is in awe. We have shown a high sense of desire to be holy even with a few laws to iron out. She will hold the mirror up until you do. (It is a matter of) continual purification. And clinging to a prior state doesn’t cut it. No one in this group will be pretty good. Anyone in this group must indeed be perfect and strive for that ideal. We will falter and make mistakes, but we will get on our feet and keep going.

It was extremely beneficial that the nagual function was frozen during the eclipse. It was so toxic a time spiritually---December 18-22. So much ensoulment residue was coming back it would have killed you and with everyone stabilizing, with the name seeds from the residuals, to the eclipse and split time. Afterwards we can dole out nagual functions. Until then, we would feed the masks and demons. Nagual powers would feed the demons rapidly and that was how the nagual sorcerers could generate masks in past.

Some of you had a shock to the system and were contaminated. You started generating clones and demons by clinging to the past by the creative forces of the nagual. Therefore it was excellent to freeze the naguals until stabilized. Despite all that, we have used naguals as plug-ins and then taken them back and are keeping them with some people here. Last week (plug-in) naguals were used by several people here.

The function of this gathering is to get your own identity back from all the people you know and have known.

And that identity will be one aligned through the study of virtue and law---not as an idea, but as a power. By tomorrow, get rid of parts of yourself to your own past. If you have an idea of yourself in 1980---this is where the organs are rotting off. If it was a good time for you, you can have connections to yourself at that time to make a 1980 mask.

Ask: *“What years do you have masks of yourself stuck, relative to organs that are chronically ill?”*

This is a residual of recapitulation. It is easy for people to recapitulate well, but part of the husk is now rotten, so do not reform it. Get rid of the old husk and those of other people you have been too attached to. Fundamentally the path (of the nagual) is lonely and you must be willing to stand alone. Be grateful and joyous for others and partners and if you do not have them, you will stand alone as opposed to lowering your standards. If you are fortunate enough to have friends count your blessings, but you do not require them. You stand in strength and not weakness. (You offer) help out of power and not dependency.

There is a type of holy being called a **Destroyer**. (This will assist) for globules from the airport (conference arrivals). Rudolf Steiner said that spiritual forces were involved in the actual process of digestion. It is similar to the ensoulment digesting karma---you feel it in the guts. Pull it out, put it in concrete and pray to the Destroyers to break it down with enzymatic action all the globules on the students from ensoulment and the airports. When walking through the crowds, we are like a sponge with an automatic tendency to clear disorder, to ingest it and work it through the system. The Destroyers can speed up the digestion process.

Look on the old charts of nutrient digestive blocks. If someone is ensouled tonight from one of your sparks, if the person is highly disordered with obsession seeds, they will go on the shell of the spark like an egg shell. The spark is carried by an aspect of the nagual twin associated with the holy beings and the part of self comes back to you carrying the disorder of the ensouled person. You will feel it in your solar plexus, uterus, or male organs. You can feel this come into the body and suddenly your stomach will start growling, with gas, bloat, pain and cramps. This is a sign of either disorder returning from ensoulment, globules of a person obsessing or walking through a disordered area.

Pray: For any **Name Seeds** that have backed into your monad, causing it to leak.

Clear: Your idea of what you should be.

Do: Blast the Creative Gland, and the Astral Aura as the Albumin of the Egg and the Monad. This is where a lot resides. Blast also the Virtue Aura around the feet. A down-pull relative to the virtues, will give you a monadic leak.

Check: the **New Earth Cord**.

Ask For split time clones on anyone here to be removed.

That clones we have out to other people, be removed.

Your virtues are also the flaws. If one is productive in one realm, one may be productive in another as well.

Ask For “Copious Dick” name seeds; pull from rectum and orifices.

For Copious Dick demons and Husks

Do: Unwind waveforms, point of creations.

For molds and masks,

Do: Pull out of the feet, chop, and disintegrate.

Check: For Cold Rain on feet.

For Bone aura globules; take to the solar plexus, do Point of Creation and To Dos.

Pray: For **Alien Name Seed Destroyers** to remove the seeds.

For Copious Dick 8th evil power energies: Pray for intercession and disintegrate what comes out.

For Copious Dick unrequited love obsessions: Pull it out of privates and blast it.

DISORDER – All substance & seeds can grow into infections, molds, masks, & husks, and shed globules	REMOVAL method – These are guidelines, but you should check for all forms of these and may have to use the TO DO chart
7th fallen angel	
Split time 8th evil power	Pray for Intercession and disintegrate what comes out

Sex aura virus	Pull out tail, unwind & blast
Gut karma toxicity	Pull out tail & disintegrate, call Destroyer Holy Beings
Split time clones of anyone	Pull out navel, chop, liquefy & disintegrate
Egoic globule obsession energies	Pull globules out rectum, point of creation
Evil mold impressions	Pray to Form Changer Holy Beings

Mega-Dissonance Points; Soul Lessons

LESSON December 29, 1993

Mega-names have to do with the overwhelming genetic influences related to planetary distortions during split time. These can be best traced to Earth locations. Each person would have an affinity for a spot on the Earth relating to their particular weakness. There would not be more than one spot. This has to do with the dissonance point or assemblage point on Earth of one's overwhelming identity.

This used to be one's cultural identity, but during split time became distorted so that the geographic location had nothing to do with your ancestors. Formerly souls were born with a connection to the Earth of an unmet soul lesson. These soul lessons were represented astrologically by planets and their positions at the time of birth.

During split time this Earth spot, monadic link became cracked in all people and arm-like projections grew out from the core spot into inverse worlds. This caused fallen angel energies to come into the spiritual genetic pools associated with each spot. Asuras came through the inverse doorways. Each name seed you find can be traced to an Earthly location associated with a spiritual genetic pool. Monads can be said to be in genetic pools ranked according to unmet soul lesson octaves illustrated by planetary influences, combinations and light brilliance.

All humans, unless they are formless, have an affinity for the spiritual Earth connection of their birth monadic locations. When the souls died, these cords were released. The masks are the remnants and the seeds that you find are components of the fallen angels that crossed the broken barriers during split time.

Each of you still has an echo of the birth Earthly location related to soul lessons, which can be anywhere on the Earth. Today we should track down the evil powers that came through the door of your Earth spot and destroy them and any lesser seeds, masks, husks, etc. under that line of force. For instance, the word "hair" has an association with Tibet and the breaking of spiritual laws, as illustrated by the Chinese genocide of the Tibetan people. You could map the primary planetary influences of the hair trait, but it would be expedient to just think of it as Tibet at a certain octave.

There seem to be thirteen octaves of each spiritual genetic pool. Tibet/hair would be on the 8th octave whereas there would be fabric at the 1st octave. The 13th octave could be called one's spiritual house. The null spaces represented by vacuum are between the 4th and 5th octaves. There are null spaces with different names between each octave. The albumin/astral layer would be the 11th octave. This is where many seeds are spawned. Many demons are at the 12th octave. There would be many names for these, like Venus demons or Pluto demons. The best way to find them is using a map and the body charts, which are correlated to the map. Don't be overly concerned with the correlations, merely dowse over the body charts and the map, or ideally the globe, for the prime location of your old monadic dissonance point and remove all disorder through the TO DO charts.

If a person had a soul lesson stuck at the Virtue level, then it would be a 2nd octave of a planetary location or body part, opening to hells. Lymph often reflects on the 6th octave. You need to dowse over octaves and location for primary and secondary mega-dissonance point and core evil powers associated with the split time seed production. These should be dowsed away first, as they are the most destructive. Dowse the highest octaves first. So ask for the House first because that is most likely to relate to your idea of self and form a mask most readily.

Anyone you have had sex with or shared fluids with can transmit seeds relating to other areas of the map or body locations. In some cases, particularly with a history of blood transfusions or anal intercourse, there is a blending of primary dissonance points greater than that of heterosexual intercourse.

Following is a list of primary old monadic dissonance points and their octaves. Don't be too attached to the octave level, it isn't that key to soul progression. You could have completed all other planetary trials needed to refine an octave of a lower trial. Each Earthly location could be considered a different Jacob's ladder. Soul progression or brilliance is measured by the number of ladders that have already been completed, not merely by the step that one is on the current ladder. This doesn't apply to your Saint souls now, only if you choose to break the rungs and ladders that have been constructed for you, will you regress. If you have more than one location, you may have dowsed as multiple identities at the time you were checked.

The biggest change in each step is in the increase in complexity, rather than frequency.

The more refined spiritual realms can only be found by a person who has refined these layers.

Anything from 1 to 13 is within the range of normal human experience. Those categories can be cleared by all soul types, if trained. They could be considered Jacob's ladder and above that is the realm of the gods.

Below 1 is the range of death. On this chart you can find blocks on Jacob's ladder. Dowse for foreign contamination, missing parts of self, blocks, and severed ladder rungs.

From the 13th null space and up, nagual power is required to clear.

Anything in the red category is satanic. Anything in red would be retro or inverse.

Role of Mankind; Case Studies

CLASS NOTES December 29, 1993

Lecture by T3:

(Just as) with Steiner's book; we have a role to play for mankind. It is important to see the role of God, and not that the death of Jesus was just for us, for just mankind alone. Realize perhaps we have a link to God's (---). Our work has established that and it is important to realize that the dowsing is like the quote in the book in that it reminds us of creeping around the mansion to get a glimpse in the house to see something; which is the holy working of God in the affairs of man.

These charts have allowed us to have a glimpse---sometimes just in the basement, then the first floor, then others. Some of us may be repairing parts of our house, or pulling garbage out. Or we may have debris around the house where you couldn't tell it was a house, with lots of vegetation, or maybe the windows are boarded up from being broken, and we are not able to see through the windows. There is a lot of work to fix the terrific damage to the mansion so we could glimpse in.

It is important to know the house is there to glimpse in, and it is our true connection. The majesty of Christ's life was a way of seeing through the window. Doing the dowsing allows us to see through and it behooves all that this is truly our connection, though the window, and if we choose to recreate links to the grounds or other parts of the mansion as if it were a housing development down the street, then we will start linking up to our old past, and we will not be able to see through the window. The masks and husks are so absolutely vital to find so we can get rid of them, because they link one to the Earth. And none of us are being taken that (in that direction), our work is through the window and up. The links are the mega names, our old links. We have to strive with all that we can to clear them up, it is a unique opportunity to do so, otherwise we will be pulled away from the window, and not be able to look through it.

Case study: First be yourself. (One can find) secondary traits. The map shows the planetary trials of the soul, plus the octaves. The location on the Earth reflects a particular trial and with split time the location may fracture like a rope cut and be frayed. One may have 8 pieces wound together to make a rope, plus 100 strands in each of the eight pieces. If we get rid of the peripheral trials, one can see the primary trial remaining.

For example:

In an area of China, scan the octave charts for anything coming through; i.e. Null Space between 9/10.

Use To Dos.

Dowse: Related *body parts* with this.

There could be *Masks...Husks...Demons* that have wormed their way into that body location.

A *Dissonance Point* may be the root problem,

Do: See if you need to disintegrate it.

If you get "nagual blast", a nagual from a holding tank may shoot for you, or one of (the teacher's naguals) may come over to blast for that moment. If you get it, go ahead and blast.

You may find a *Sucker World* above the actual location. Make sure it is destroyed.

You may have to go through *genetic and sexual routes* if necessary to get rid of it, and this is not to relive the past, but to remove the disharmony.

Dowse: When you get to the ROOT POINT,

Ask: For the *Percentage Remaining*.

Do: If you still have some remaining, scan the other octaves with the layers to get rid of it.

Pull out name seeds.

If don't do this, you will get horrible physical pain, as the link is so strong. It is the difference between a saint soul link and striving upward to holiness. If we have a link, a tissue link, we will feel like we want to pull that bit of flesh right off the body. So get rid of them. They will tear you apart.

We are forging a link to God, we have threads to creation, but this is a tissue resonation link, like a gut connection and these would dowse as downward pull things. It is a distraction that something else would look better, it is like fool's gold, others will ask you why do you look into that house? And people will try convincing you it is a shack, and why look into it? "No, nothing is in there, nobody is there, why waste your time? The swimming pool here is heated; see the lounge chairs, wine bar and swimming Chihuahuas?"

T3 urges us to read Rudolf Steiner's The Fifth Gospel. It is moving, with a lot of connections to our group. You could read it as if he were talking about our group directly. The lectures were delivered to those few people who were in his group doing spiritual science work, and were not public at all. T3 takes it as being delivered 80 years early, but it was written for our group. Steiner said Christ was stunned by Ahriman, and he fought off Lucifer. The esoteric aspect about Ahriman was a result

of the stunning, the wound, the sting (of death?). The crucifixion was a way of removing the sting. Enticements which he didn't understand, that Man had, over and over again were offered.

(Regarding the Litchfield) mansion; it is interesting about T2's dream. It is interesting that Steiner says over and over that the light of Christ was a way of seeing an opportunity of man to see through the window, the life of the Gods, the working through Christ. He talks about the mansion, and though it was not as dilapidated as we found it, it is the same one.

Do: Afterwards, scan on the *body locations, cranial nerves, DNA, virtues, spine and glands*, for residue.

Check: *Name Seeds*, and check octaves as well, on those parts of anatomy. *Null Zone Seeds* relate to traits.

With the globe, one can refine the location. When you go to a location, get to the root, and

Do: Destroy the *Dissonance Point*.

First we need to identify the problem, and then the holy beings will go there and help to work.

So pray to identify the locations.

Check: for *Retro Traits*, and proper *Dissonance Spots in the Sun* for the lower and higher identities in the Logoic core on all levels.

Lecture continued by T2:

With the House aspect, go back to a Sufi story, where we are told to ask "was it (the situation) good or bad?" The state of the nagual is always the state of don't know, and an acceptance of what's in the now and dealing with it in calm, serene acceptance and endurance. A nagual has to endure mightily. To sit and try to clear for eight hours is painful to the neurological system. It was advantageous to work together with T3 and Se, as T2 can miss a lot in clearing with the yin, as she sees concepts and is not attached enough. It is good she is not attached, as she can receive information and they can see the disorders well enough to clear it.

Look at supposed weaknesses and strengths as not good or bad, they just are. We want to align with virtue and law, but it is the individual traits that make us all unique, the directions, and the whole idea of a war party is to have different traits. This is a modern war party, in that we have the ability to pull (in power?) on multiple nagual levels, and it is unique.

Energy conservation: we can't conserve energy if our identity is on the line all the time. If our identity is in the house or a car; Ann Landers had a letter from a man who compared his body to a car with sticking pistons and carburetor problems; ready for a retread, etc. because some woman had asked why men consider their identities as automobiles.

With what do women compare their identities? It is more readily the homes and for men homes, cars and work. **Masks** include work, career, and who you think you are in a career state. That is a very serious mask, but for a common person it is adaptive. At a party, someone says "hi, I'm Joe, and I am an architect", a person answers with a job description vs. names. "What do you do, or are affiliated with", is first thing mentioned, and what else is there to talk about? Identity is in the job, houses, family relationships and how many children do you have, have you ever been married, why not? Have you lived with anybody? It is amazing what people come up with. The key thing for a saint is that we can't afford to have attachments to those things and no possession that is lost should unsettle you; if it does, it owns you, and is you.

It is disturbing to see about the burning house (of a student), it is a nuisance to deal with insurance, fire trucks and loss of possessions, but a **master** can't be unsettled by it. We must identify with being a master now and not with the common reactions, unless you choose to be common. And in the law of free will you could choose. In the eyes of the world, to sit around here for 12 hours to clear ourselves, and to fly out to this town is a lot of trouble to sit and look at globes. To shout off numbers and descriptions is crazy and yet in the nagual and spirit realm it is infinitely real. Anyone with nagual eyes knows it. And anyone who has experienced pulling to the throat and blasting with the Name of God sensation---it is very powerful. And yet how do you describe that to a zombie? One can't describe the sensation of the pineal gland opening up, or the higher and higher states you are destined to move through.

This is an important day. T3 and Se were able to help clear tons of disorder with guidance. It feels much better now, because if you have these links with husks, you would snap monadic lines. When we have no residuals to all of this, then the key problem to face, is holding one's self separate from the masses to not form memories according to other's memory of you in split time.

Most of humanity, especially after 1940, identifies themselves with the disorders of that time. If you relate to people on an intimate merging level according to split time standards, you will reform bonds to a disordered section of the Earth, and will lose your saint soul. We need to stay anchored in the Logoic core and the consciousness as well. You have seen over the last year that you are not a body or a soul, but a point of consciousness, a spark of Logoic consciousness, with awareness: independent with free will. And a spark, if it is aligned with the Logos will shine ever more brilliantly.

As you climb all the Jacob's ladders up the steps---like a tarot deck, as it has aspects with the tarot, it involves the mysteries of climbing the steps. Many Earth locations are primary locations that had to be climbed. The core ones are 31, almost like the days of the month---the number three; Father, Son, and Holy Spirit, and then the One; the material dimension to condense it. 12 steps plus one more, Christ plus 12 is 13. Christ is the head of the house of the final Jacob's ladder.

Some of you will start wondering how many ladders you need to complete, but all were carried on the angels, past the remaining ladders, and one would only go back by choosing to go back. With the saint soul, we have been given a gift of mercy and grace, and our frailties (---) through divine intervention to help humanity. This puts a strain on you.

By being given a gift of grace of a saint soul, you have more strain on you than the average person. You may not have refined the lower-self enough to match the soul. With old habits in thought, emotions and desires, it may not match the soul. Why do you still get angry, cranky, and desirous of base things? Because the soul has bypassed the Jacob's ladders through divine intervention to help humanity, but the lower aspect sometimes falls short. Spirit is willing, the flesh is weak. You have to eventually refine the lower enough to not strain the soul and split from the Logoic core. We have Grace by being watched over, and in a group of warriors, it is a support system and it is possible never to see death. That is not the reason to be here, but to be a saint to serve God. For that reason we need to constantly monitor resonating with zombies, thinking that there is no evil and forgetting the laws of Gender and Polarity while at parties. Or if in one day in a month you forget about all this serious stuff and start to resonate with the grid of disorder...if you do, you run a great risk.

(The teachers) have seen at times some of students become enmeshed in family, jobs, personal problems of one kind or another or depression and seen snapping monads by the absolute extent of going so far from saint alignment with Logos, with the lower aspect, and ripping themselves asunder. More than one of us has been there. It is very important to realize we have done what can do to pull you back but in the end is up to you. The law of free will prevails. There is a fair amount of security in the group, but the true power is within one's own impeccability; (maintaining) the more powerful thoughts, desires and emotions.

Some have had disorder of late from so many husks from the birth dissonance points, that it put on a lot of pressure and they started to crumble with all the dead matter falling on them. For D's family, this (was their situation) and it was also from the debris for those they helped to receive souls. It is not that all the people in this room were born an old soul. It doesn't matter where one is born, or one's past life, parents, or level of refinement 10 years ago. But what matters is impeccability in the now. People with a lot of disorder at birth, will be given maximal amount of help as long as they are impeccable now. Not one of us has been lost in all of these trials. And T2 says this with great sincerity. Some have snapped part of their monadic threading and (because of this) they may feel snapped from God, worthless and feel they will never see daylight.

We have gone through the dark nights of the soul. From indulging to the past, persons, zombie resonations and no matter what the reason, if one is pulling one's self with sobriety back together, then those thread aspects and sub threads of main trunk will have been healed over and over. The monadic thread is not a stem from the mouth to God, but a network of fibers over the auras, so it is easy to snap the liver circulatory system, the heart, the monad and one may dowse "split", if the liver is split. And if the liver is not repaired, it could bleed out and the monad could collapse. If you are leaking, don't blast (due to the) extra pressure. If we are impeccable and follow the instructions (we will be fine). They never go a night without checking on us.

Aur checks on all at night, and takes care of the naguals, so imagine how hard it is to live with them--- with T2 as the General Patton of the spiritual realm. Even though it is difficult, we have to hang in there and don't fall back or give up. You are making some headway, as we have cleared so much disorder. It may seem like a bottomless pit, but this path is a path to perfection and it doesn't happen overnight.

Try now to align all your lower aspects with your holy souls. That you have done, you are doing so and are over the hump. Keep a close eye on pineal exhaustion, check the chakra strength and do not be blasting if you have a low reading.

When T3 merges to check-up on people, he merges with our dissonance point disturbance, so it is hard for him to maintain a correct dissonance point. The way of the warrior is to just do the work in front of you and do not think of how tired you are, just do it.

It is a fine Christmas time. Last Christmas, we were given a choice to recapitulate and be born anew and this Christmas is to solidify the commitment to serve God and man. It was a monumental year of transformation for all of you, with a sense of longing and estrangement from humanity. It may seem frightening in expanse (sic), yet on the other hand a sense of mastery, power and an increasing sense of alignment with God is being reflected in all of you.

Student's Jokes:

A woman's work is never done... by a man.

Never be given pleasure or power that you cannot resist... for long.

A lot of work today was on clones to strangers. If your skin starts itching or the middle of your back angel wings--- that is a key meridian and a sign of clones to zombie's. One can feel it everywhere, on the face, arms, etc. It could be anyone's, or yours that are around, that have cloned.

One student has an **Evil Name Power** in Australia and it is the fuel for a battery for clones. When you send out clones, it is from someone you are hooked into. This student has a split filament of a monad, relative to Ayers Rock and this brings in the clones.

Example: There is a *sucker world connection* linked to New Zealand, with someone else's clones. It is a connection with a zombie that a student has, with a *monadic drip* onto 4 zombies. Part of the monadic filaments have split and are dripping.

Ask: The holy beings to help seal up all the broken filaments and See if there is an *evil name power* that it is hooked into.

Do: Destroy that *dissonance point* on the proper *octave* and seal up the leaks. So, 80 clones have come out of this spot.

Example: One student has a very serious *leak* in the *intestines*, With an *Evil Name Power Sucker World* over his intestines, related to *Retro-Red Trait*. This is what happens when you lose your balance. You open up to the retro traits, by being emotional about material things.

Do: Pray for divine intervention. We can pray and patch a person over and over again, but if one doesn't keep sobriety one can blow the monad and it becomes a free will issue.

Example: One person may be connected to *sucker worlds* hanging over the *countries*. At Ayers rock was the *Old Earth Mega Dissonance Point*. It was the *navel of the Earth* relating to *split time*,

Do: We need to heal it on the Earth. It is related to demigods. Pray for divine assistance. Focus all of our wills in taking away the *dissonance* part of that rock to the Sun. Blast it like a *Black Spot*---the *Cosmic Molecules Dissonance Point*, relative to the sound of Australia. Blast it with the Name of God and *will* the spot to be aligned with the Sun. But in the center of the Sun is the Logoic core and *will* it, like pulling something out of it, as we are changing the song of that spot. It is like marching around the walls around Jericho and trying to disintegrate what has been invested (sic).

Example: (Links) with adjacent countries to Chad, they are the splinters from the center and we are feeling it strongly in the lymph nodes in the arm pits. These earth sites make such large noises, that it causes the monads to split open. In this case causes lymphatic congestion. Chad may be the seed of murder, cannibalism, voodoo. This is the **Soul Toilet of the World**. There is a split to the Red Sea and Ethiopia and there is a link to the *Red Trait*, which means the inverse/retro.

The heart of retro is in Jerusalem where all the killing is happening. The materialism of thinking that you have to kill to be in your homeland and that you deserve to do so; both sides are nutty and cruel. Killing in the name of God---both sides---what a travesty. It must have caused the split to open up to the Red Sea, and has caused what has happened in Africa.

The House is burning in Jerusalem. In 1948; when split time had started, Jerusalem started going to hell. It is like the hidden cancer, a below ground hidden abscess in the lymphatic system that goes throughout the world. Or it is like an infection carried by the lymph system through body. We can feel a branch of this going to ancient Babylonia, related to the tribe of Ham. The aspect of House; but the ancient house, the temple of Solomon---Christ prophesied of Jerusalem falling down and not one stone standing on another. It is not just karma for what happened with Jesus, but was a seeing of the choices that man would make, of people clinging to the past which created the Jerusalem of today. They are so concerned with homeland; they would kill their thirteenth step of Jacob's ladder rather than let anyone else live there. It was primarily a weakness of the inhabitants and the genetic strain. They were too warlike, and clung to a past identity and what they belong to materially. They lost the holy teaching by materializing it and used it as an excuse to kill people (it was the same as when Jesus was there and also with the Christians) and they were too concerned with houses, cars, etc.

The vow of poverty: is to reassign your priorities and the most important priority is the House of the soul and alignment with God, not with man and as opposed to a mere relic. The fire at "B" and "C's" house was a very dramatic omen and a time to release attachments to the house of old split time self so as to be new. And a time to release materialism and attachment in such a way, that it is not just the house one has lived in or the corpse body, but a sense of community and whatever anyone appreciates, understands, loves, or anything. As a saint we have a responsibility to stand firm to our duties as a saint above all else. Foxes have holes, birds have nests, but the Son of Man has no place to lay his head. T2 emphasizes that the vow of poverty is in not requiring a lot of things and it is not that one couldn't have nice things. Jesus' robe was fancy, and he enjoyed the niceties of life, but he was not addicted to them. His life was truly a life of poverty and he was single minded.

Jesus' eye was single to align with God in such a way as to bring forth holiness to the Earth and all else was secondary. He allowed his death to happen to fulfill prophecy. He was frightened, but he behaved properly and did not indulge. He was lonely when he asked the disciples in the garden, would they not stay with him an hour. He was a lonely guy and yet he was able to relinquish the physical and mental. He was holy and he wanted his disciples to do the same. They had

flaws, but they went forth and did great things. Christ now, is a consciousness, not a person or people. The Christ is a force of holiness that extends like a dove that can shoot down upon us and it is not to a person or a group so much.

But be grateful to this group, as it is a shining beacon of light to help you find a way to sainthood. Be grateful, but don't materialize or worship forms or beings, but the concepts of law and virtue and what is divine and formless in the spiritual realm. Be grateful, but don't materialize the teaching, or you will surely become no better than those in Jerusalem---slaughtering others. Or you will be like the cults collecting guns and preparing for a shootout. Any time you see guns, know the end is near. It is a dangerous thing to prepare for major shootouts, as we (instead) battle in the spiritual realms.

We believe that the true dynamics in changing the world rests in the spiritual and not the physical. The materialist garners arms and kills his fellow man and is materialistic and evil. The true holy person tries to find power that is an alignment through law and virtue. When Peter cut off the Centurion's ear, Jesus fixed it, because he didn't want to be violent. He wanted to show how to learn the spiritual way to salvation, which doesn't require taking up of arms. The religions that followed involved so much violence; it is a very sad thing.

Metaphors that are strongly physical, like B and C's house fire, is a strong lesson and a medicine for all of us to give up personal masks and ideas of self. "Not my will but thine, oh Lord." It is a vow of poverty of the lower self and (a guide) to be simple in purpose, to teach law and virtue. The other things are extraneous. We are in the world to act properly with all people and all soul types. It is a wonderful thing that people have souls. Type 3 souls can be quite lovable and we must not hold back our gentle tenderness. St. Francis was so gentle, an echo of divine gentleness to lower soul types. And it is not to condescend, but to help them to become holy. It is a divine charge and a responsibility and we are honored to be in a position where we actually can make a difference, with there being souls on the face of Earth. House is everything. To give up "House" house of one's self; the symbol of one's lower self is a painful, painful thing, and all are doing well.

It important to have dental hygiene with all the spiritual work that we do, as the teeth may spontaneously break. With gum inflammation, a water pic with Clorox water will clear up virtually all gum disease. T1 told this fact to a dentist, and he said to not tell anyone, as it absolutely works, and had been done in WW II. Some of the simplest methods would save a lot of doctors' bills. For example, women with vaginal infections, use Clorox douches and Clorox baths for skin infections. It tends to draw out heavy metals and has a peculiar effect. With a skin fungus soak in Clorox water.

Hazel Parcells in Arizona advocates whenever you have public food, to take a few drops of Clorox to neutralizes the pesticides. Many sore throats can removed with it, as they are due to chronic strep, or staph.

How much does a person need to chew? It is nice to have a few teeth in the front to not look like Grandma Grump. T1 had a grandma without a tooth in her head, and she could eat anything with her gums. She ate chicken bones with the gums. She would beg for the bones and chew them till they were a pulp. She had the healthiest jawbones, lived to be a hundred and was a happy woman, with a bottle of wine and a Chihuahua. If you have a few teeth in the front, you can chew the big things in front and then gum-chew the rest. If you don't chew food very much, the stomach releases more acid.

An omen of the cat with no hind legs: It was a cat (the teachers) knew, and was a street cat that had crawled into the basement. It had seemed asphyxiated and the right leg was hidden as it lay on the ground, but it died that evening. It had crawled out and flipped over. The leg wasn't a bone, but a socket, as it had been chewed. T3 thought it had been hurt by an animal, auto, railroad or trap, and had pulled its foot out, or an animal had gnawed on it. It was an omen, like the house burning down and it was related to the fact of the husks and masks coming off.

The feet related to, for example, Cold Rain on Feet, and the feet are associated with virtues and walking the path. It was like clinging to (the right foot), the aspect of the idea of self. It is like the house is the body, and it was being chewed off and was rotting to the hip. It was the idea of mask or self rotting in split time, as the legs were split. It happened during the eclipse and it had to do with the concept that we would deal with the husks and particularly the virtues and we must not cling to the past if we want to keep walking the path. Our feet have to be aligned with the Logoic forces, and not what you have known. It was a black cat.

How to Master Thoughts; How Equanimity is Necessary

CLASS NOTES December 30, 1993

Lecture by T3 with Se:

The fires in the monastery and at Se and D's; there were sucker world demons that contributed to the fires. This situation has fueled our sucker worlds and obsession production, and we need to take care of them. A globule can block you from seeing a zombie connection, and it masks your ability to dowse effectively.

Sucker Globules:

Dowse: The ones that are in you and

Check: The *auric layers on body parts*. Also use the *Complexity/Frequency Chart*.
First go over the *auric structure chart*, and

Ask: "How many sucker and obsession globules are on the tissues, body parts?" and then **To Do**.

Globules could be from *other people...one's past self...or self-created ones* about who you are. If you get someone's thoughts on you, then you may start obsessing about yourself in the past.

Check: Make sure you are not leaking egoic or desire substance.

Use: The *Octaves Scale* for the upper right *Quadrant*.

Start with *Red*, and go up to *House* for *Obsession Globules*.

The Octaves don't seem to have an in or an out direction.

The Traits are more yin, and

The Numbers yang.

T3 continues: An aspect of thought functions with associations. It is the way the mind thinks to connect things. We seem to have an urgency to establish links with ourselves or others and the mind weaves a fabric, an integral fabric, as if following a thought. It moves in a hop and jump manner, it chains the thought and moments together in a non-associated pattern. This seems to be a mechanism to defeat (in ourselves) or at least be aware of. It is like a tendency to want to merge when you feel isolated or alone. The mind, in a mental way, it is like climbing a mountain and you secure yourself with (auric) threads. The mountain is like being in society, having a job, a way of security to create a semblance of continuity in the world. It is a sense of solidity and a survival mechanism in some way. For us (as naguals), it is extremely maladaptive. (A thought is) like a stone in the water that will jump and go in a direction as it hits the water and it creates an image that propels it to another image or thought. It then skips around in an aimless fashion. It sends out a thread to the past. It is fearful to be in the Now, so we want to grab onto something to secure and solidify (ourselves). It is good practice for all of us to observe the egoic function of the mind, let go of it and dissolve it. (Thoughts): it is a direction and a force that forces the *will* out and are like antennas that skip over stuff. Thinking this way is not for saints, it is a waste of energy and in the worst case, links us to sucker worlds, creates globules and ties self to the past.

If you catch yourself doing it, then something is off. Usually it is a thought with absolutely no spiritual purpose. When you need to think for a particular purpose, that is a mechanism, and it is used as a way of creating a sense of self that is solid. Everyone should practice some sense of control today.

Se says: We almost are constantly thinking "What am I doing next" when we have lulls between different activities and the mind will float off as though to accomplish the next chore. Ask "How do I keep focused and not allow myself to go into the reverie state?"

T3: It is weaving a fabric in one sense.

Se: Is like (part of) our structure, we seem to need to constantly be on multi-tracts or we may feel a boredom and then we start doing the other. It is constantly a challenge to be focused on something that will keep us out of weaving a fabric.

T3: If you are bored, you are out of the Now, you are split and the mind is searching for something to do. There is no reason for anyone here to be bored. How do we improve? Observe the frequency, intensity and duration (of your unfocused thinking) we all do it, and we all have to start somewhere. If you can see it, then monitor how long you do it, and how intensely. If you are constantly resonating with zombies or thinking about people, your mind connects with them, then you forget about it, but it continues to drift with a hook. It is like the stuff that DeNiro was trying to pull up the cliff (in a recent movie), all of the junk...it was his penance and what he had chosen to attach himself to. We do it mentally and materially. If you continually dowse that you are losing your identity and you have globules out---see from moment to moment when you are going out and mind what (aspect of your auric bodies) are going out. If you are thinking someone is a victim or feeling sorry for someone---which is not appropriate---it is not accomplishing anything. Ask what is the spiritual purpose of your thinking and if you can blast or remove a disharmony, then you are using your energy wisely. If you are just spinning a wheel and sending out tendrils, then you haven't accomplished anything. It is wasted energy which

has thrown out a hook, pulled in globules and started auric leaking. If you begin to feel fear, then you have formed an obsession globule.

There is a way to show genuine concern for others and a way to truly help someone from a spiritual perspective; with focus and a direct purpose. There is a time for thinking though a mental problem that you can solve. Some problems in the mental plane will not be solved and most people think they can solve it all mentally and then start worrying about it. Globules happen when we start leaking and we don't control it. These go out and create all manners of disharmony.

Se: An example from T2, if we say "Gee, I wonder if someone got a soul", even with that line of thinking---with the training we have, we could initiate a nagual to go off with that thought, we would start to clear that person for ensoulment and it would be inappropriate.

T3: You can see that a lack of control will drive a nagual nuts, because they act with intention and then they are torn to shreds. If one is going to sacrifice oneself, or put oneself in a dangerous position, do it for a reason, when the cost is worth it. Have a purpose to do a dangerous mission, don't do it to get a candy bar. If the purpose is worth it, then the cost or damage on the spiritual levels is worth it. We are prepared to take that risk, but not for an unnecessary reason. It is good exercise to think all the time, "Why am I not in the Now, why am I bored, where is my thought going?", and know how ridiculous and unimportant it is, unless you have a specific task on a mental level.

T2: **Scan** for *En soulment Residue...Body Parts...Sucker Demons...In/Out...Husks in the Grid*:

Do: Throw in the creek.

Check: Your *New Earth Cord...Monad...Creative Gland* for *sucker demons*.

Linked to a *map location*, check for *lymph aura missing* and

Also during certain hours of day dowsing will show *lymphatic null zone demons*.

This is due to some part of the lymph aura mixed with desire substance out to another person.

Check also *Zombie Lymph Portals* in/out of body parts.

Fallen angel nerve aura resonance, alteration and planetary Vulcan energy evil powers may affect the nerve aura.

A link is pulling it into the *black hole*, like "cold rain on feet" and it has a strong correlation with the 3rd octave Baby aura.

Check: For *Type 2 sexual prana* contamination as this will help the nerve aura to return and

It has a relationship with the Christ Spark.

We have found pockets of this contamination in a student's creative gland.

Dowse: The person next to you, check the *hair demon toxicity*---which is related to nerves.

Check which *Law* and *Botswana*.

Check on the *Law clock*, where you have *hair demons*.

Do: Blow out the candles for the next three days because with the fire elementals, the likelihood of a candle exploding is great. Air elementals increase the possibility of combustion. For's room had air spirits from C agitation which were coming out of her purification and caused increased combustion.

The fire was caused by a metal plate that held the wick, and the flame went below that. The candle had their energies in it, and the reason for the house burning was due to elementals coming out of the walls and they were ripe. T1 saw this happen one other time, but the elementals were positive. T1 was praying for H. Kroeger and a tea light burned for three days. In the end it burst up to the ceiling in a torch-like flame, like a welding rod. The prayers had drawn in so many angelic elementals to burn up the (spiritual causes behind) the legal system trying to throw her in prison, so many dark forces were burned up, that the force almost ignited the house. The air takes on the quality of increased combustion, so even if it were the wood stove, it would ignite anything as a flame shoots out.

Check: Your house for evil air spirits and To Dos. It is why Yellowstone burned recently. One way to tell if many air spirits are around is if your candle burns faster than usual.

Example: One student has a severed lymphatic thread in Chad that is screwing up his Name.

Dowse: Look at the *aura diagram*

Do: Remove *Contamination...Air Demons...Sucker Demons...Husks*.

Make sure you have the correct *Name* and *Dissonance Point*.

Check the *map* and see where the various *auras* are, some should be on the Earth.

Check: *Air demons* can be found by *Color Traits*,

Ask: "How many on each color do you have?"

If you ask for your birth name, asking where the *birth tissue name on body parts* is one way

And the *current spiritual name* will be in a different body part.

The *holy powers* to pull your *birth name* to the new *Spiritual Name Assemblage Point* and

Remove the other *Dissonance Point*. It may be why people are sliding out of name resonance.

Do: You have to clean off the *new resonation spot* for the *old tissue name* to anchor the *Mega Assemblage Point* from old to new. Then, if you are called by your birth name, you will not slide out of your spot. Dogs should have a new spiritual tissue name location.

Example: A student has a chromosome problem.

Ask: For *Sucker World Cloning Mechanisms*.

T2 dreamt horses were running around and they were all geldings, yet they were still trying to run us down. They were angry because they were geldings. Even so, unless they were shot down, they would persist in pursuit. The globs and sucker worlds made in split time---they can't reproduce, yet they still produce misery full of demons, etc. They can't reproduce unless we hook into them with soul force and energy. Despite the fact they won't reproduce like wildfire, they will still cause torment and cause us to break an arm or leg in the spiritual realm. They are by-products of split time with weakened powers. They are not procreative, yet still need to be destroyed.

Find Over the *body areas*.

They have *tendrils* to others that cause a torment.

After talking to someone, T2 had a very itchy back from the sucker world globules.

Ask: For *Sucker World Infections*. They are sub microscopic.

Check: The % of toxicity and when it goes down.

T2 found a lot of people's original dissonance points were in sucker worlds of when they were born and not in the body. Make sure you don't have an **Echo of a Sucker World**, or the sucker world it was associated with. Destroy it or else the name may migrate back. The name may be in several sucker worlds.

Ask: "How many *Tissue Dissonance Points* do I have in *Sucker Worlds*?"---Especially those born since 1940.

"Is the *Name* in a *sucker world* now?" And

"Where is the *current Name*?" It could be in a location of the body, i.e. liver, and

Check: The *planetary influence* specifically for a *sucker world*.

Your birth tissue resonation may have migrated. Even if born before 1940, you still have to check.

And if you look at a *planet* from a different angle, the *name* will be in the same part of the *aura*, but you will see it in different angles.

The non-physical phenomena that occurs all the time and the potential to increase your awareness of that, as is in the spiritual realms the aspects, will change the world. As long as anyone thinks the table is real and not an idea, they cannot change. Examples are like (a child's) ability to detect and perceive the impact of this work. The nuances in the physical body are so important to start sensing the appearance of dark forces. Otherwise you have no defenses because you have no shields up to sense and deflect. One can't deflect if one can't sense. T2 is optimistic and we need to work more with the children to help them learn.

The key is the akasha-type words. This is why we need to do research on words. Find the universal words---like "albumen" and "egg", which in the subconscious mind means the astral body. These would be said instead of saying "astral body" where if you read 10 sources you will get 10 different descriptions. **What we want are the archetypes.** It would be good to research words, like "mother", "father" and versions of them in other languages---if we can bypass the regional and whimsical words applied by authors and metaphysical researchers. (*See charts next two page. More information is available in Virtues, Laws and Powers and Lectures: November 1993*).

Like the word **Hair** relates to the Law aura. It is actually the sound of the name hair, and why is hair called hair? In German is haar. It would be interesting to see if any language has a correlation of meaning with the sound of hair with laws or principles. We know that hair relates to divine law, but we haven't found a correlation in other languages. What would be the word for law and principles, in other languages? **Universal Law** as we perceive it, is in the universe. It is the order and the functional principles vs. the world's law which is the man made limitations. What would be the word with same connotation of functional principle of law and order? It is more geometrical, for example, "This is a box, this is the way things are, and mazes are built this way, and if you follow it properly you get to the center of the core".

T2 has the ability to pull into the consciousness the sound of a word that seems to represent or approximate something, like an archetypal word. It would be beneficial if some of us research it, the underlying reason for it. French and Spanish words for hair all dowse out as similar. It feels like the -r- sound is the real key. Law relates only to head hair. It has to do with the crown chakra and it makes one wonder why rules existed for women to not cut their hair (or to wear head coverings).

Agni is a strong pull to the lymphatic aura. **Ask:** “How many Agni connections do I have out/in?”

Soma resonates with desire substance with the **Desire Aura**.

Dowse *“How many malignant (Soma) connections would be the same as Desire?”*

Maybe **Lymphatic** is partially connected with **Fire**.

We are looking for the universal words so that when we publish, people will resonate better. Fire disorders, such as hate, constantly affect the lymphatic awareness. Hate poisons the lymphatic. What we are looking at is apples to oranges to compare the concept of **Agni** with fire; it is not a direct translation. Is a fiery aspect to Agni. Why is it when T2 has spiritual toxins in her lymphatic, she clears it with Tabasco sauce? Because she adds fire to clear the lymphatic system. It is though the lymphatic system needs a lot of fire in order to dissipate spiritual toxins. Fire is a part of Agni, and hate eats fire and creates elementals by the burning of its own aura. Hate pulls fire out of Agni and burns like a candle and then depletes and the elementals go to the receiver. To digest the elementals of hate requires more fire. Like cures like, so burn them out or asphyxiate them. Water is not a key element, but Mercury is.

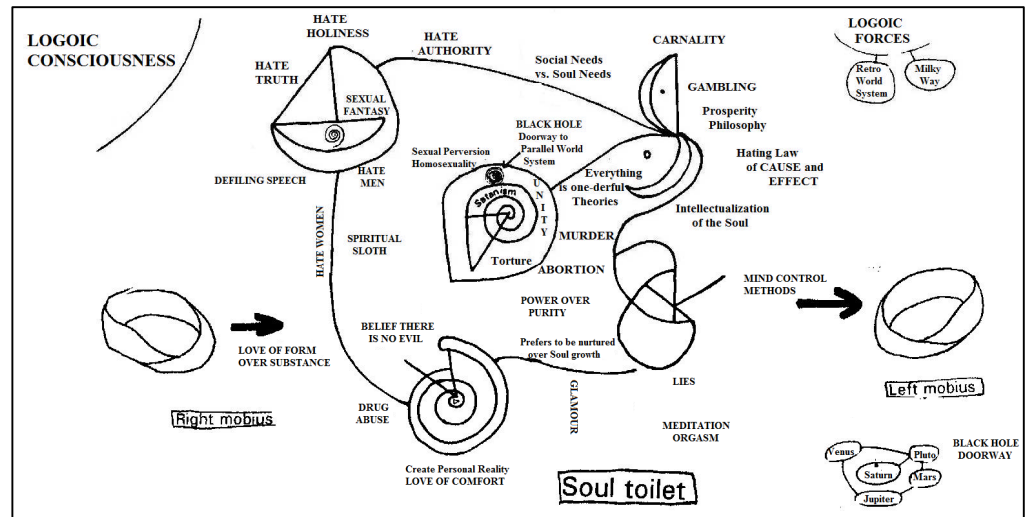

Anything that pulls you to retro (↑See Quadrant Chart) is red/hate and then into:

The Soul Toilet. →

Fire is all colors.

↓Neediness is a **Black** which is a sub-retro.

↓*Desire to defile* is **Army Green**---like fatigues, a brownish green, close to khaki.

TRAITS/COLORS & Dissonance Points	LAW resistance/defiance causing abnormal Dissonance Point Locations on the Trait/Color Rings
WATER/MERCURY	Law of Vibration: Attachment to people/food/sex/ideas
FIRE 3	Hatred for God or Law , including authority in general. Revenge and suicide resonations
AIR 9	Desire distortions caused by attachment to beauty/art/ romantic love. Creating dissonance points that evil energies or people can readily hook into
GREEN 10	Failure to recognize the Law of Non-Resistance and Correspondence.
BLUE 9	Resistance to the Law of Polarity,
ORANGE 6	Defiance to the Law of Change
VIOLET 9	Defiance to the Law of Gender.
WHITE 4	Law of Mentalism
AMBER 6	Law of Rhythm and the Law of Use
ROSE 6	Law of Cause and Effect

←The *Desire to create one's own reality* is a **blackish red**, almost black with a tinge of red.

←*Jealousy* is almost identical to the desire to defile; they are all retro. You could color the soul toilet chart with these colors.

← *Gambling* is like a magenta with a blackness to it; it is a **Retro Violet**.

With almost all the colors, if you add a drab quality to them, you will have a **Retro Color**.

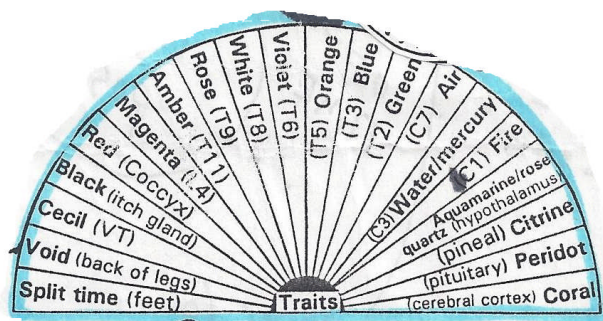

Violet relates to the crown, a kingly state, a power center around the head and shades of purple.

Violet is a more spiritual crown and **Purple** more physical.

So many nuances to *greed*: *power, money*, i.e. “Who is the most popular person?” and “What you are really (word missing) for?” It is hard to do a standard, but it would be interesting to do a chart with a retro of each color to know the **Left Hand Path**. Check all the **Traits/Colors** and go through the quadrant chart.

Each needs to be in the upper right hand quadrant and if they are not, they will have a drab quality.

Colors make a sound in your head if you look at a color or think of one. To your spiritual bodies it translates as a sound. It is very difficult to separate (color from sound).

Air: is another name to locate (in the languages). It is a living object, a plant, and it has to be an image and a sound that is representative to the subconscious mind.

Lichen: Ask “How high is my lichen toxicity?”

T2 thought of the Litchfield mansion when Lichen was spoken. It has something to do with the sound of the name Litchfield and light. We think of the air aura as being non-material, but we have air substance and that is hard to imagine. But if we have lichen substance (we can visualize it). (sic)

Blood: Amber is one part of the Blood aura and another word. It is a concept like a verb. **Amber #2:** is Love

Nerve: is an aspect of violet. It is not a thing, but a description. It is like a shape, not round:

Violet Tubes. Ask: “How high is my violet tubes toxicity, and violet?”
“How high are my (other Trait) Tubes toxicity?”

If you don't have high violet tube toxicity, ask for green, and white, etc. All of the traits reflect Tubes

Trait Tubes and nerve aura is very important. **Ask:** “Where do I have tube problems?”

Liquid: is the word **Cream** and the texture of it. **Ask:** “How high is my cream toxicity?”

Tissue: is a rock of some kind. Hard rock found in pinkish tones---**Feldspar**

Virtue: is the concept of **Rose** and not the trait. But with these words one can't think only in color, but also the sound and the concept. **Ask:** “How high is the virtue concept of a rose?” Picture a **Yellow Rose**

Akasha: **Lion**

Christ Spark: Snake. This is where you have to be totally impersonal. When translated into human form, it relates to the Garden of Eden. It is so significant.

Monad: Eyes. “How high is my Eyes toxicity?” Think of it as a thing.

Mobius Thread to Creation: Piccolo. That is why T2 is the sound of a piccolo, as she is the formless woman who is supposed to hold open the door of the party up there, so she would have the sound of the thread to open it, as she must resonate with it. The door to heaven is that thread.

Organelle: An aspect of the monad that has to be measured separately: Organelle. This is a creative organelle that has to be evaluated. **Milk**

Creative Gland above the head: **Ask:** “How toxic is my Cry?” We can't be logical about these.

Earth Cord: “How toxic is my Fiber?”

Egoic Aura: “How toxic is my Mask?” This is where we will find all the masks of other people globbed on you. Also, we need to differentiate it from the **False Mask:** **Ask:** “Toxicity of Nipple Mask?” Which are egoics of your own creation.

Mask Virus: For the egoics sent out to someone **Ask:** “Number of egoics out creating Mask Virus?” Mask virus happens if you have egoics out, then it forms a portal to you and forms an opening in your aura and it feels like a virus invading you through a holographic way.

Milk: Think about the word Milk as a *Monadic Organelle*. Think of the concept of mother and the word mother. Egoics are partially composed of the milk of the monadic organelle. It is something relative to the **Sex Aura**.

Hake: A word for *Abnormal Creative Centers*: a person had a sucker world doorway in self or other. Hake is a small salt water fish, a true fish with no color in its name. It can be as big as a tuna. It is a white bottom feeder. **Ask** “Out” and “In” There is no virus on this one, but a link. **Ask:** for **Clone Link** which is hake substance on another person. Hake is what produces sucker worlds.

Lower Mold: How toxic is **Dance**?

Higher Mold: How high is **Gold** toxicity?

Mental body: work with **Nipple Mask**

Nagual substance: **Sea.** How toxic am I with malefic Sea, and how much is out?

That would depend on the type of holy being there. Sea is the blood of the nagual.

Nerve of the nagual: it is like a bridge and not an object but a description. **Web.**

Ask: “How toxic, and how many malignant webs are out?”

Tissue of the nagual: Floor: Ask for toxicity and rotting Floor. Ask “How much floor is on other people?”

Sex of the nagual; Bear Spark: Check toxicity.

Creation Aura: What is not a primate, but an animal that walks on two legs, and found in Siberia? **Bear.**

Whenever you are closer to the concept, you have more power.

You cannot afford to be out of control, the monad is too aligned with order, and if you get disorderly, it is too much. With a nervous breakdown, a saint will blow the monad. It is a grave sense of responsibility when a teacher takes on a student, especially at this level. There is an aspect of the teacher taking on the karma of the student and if they start blowing apart because their lower aspect is not as aligned as the higher, then the teacher may not have taught them well enough. The teacher has to repair them over and over again unless it is impossible. And the teacher will do it unless the person, with free will, rejects you.

It is a grave responsibility, as the teacher may fix them every 30 minutes for weeks and then the holy powers say "That is it". The teacher can never say "That is it". It is a type of marriage. Think of apprentices. It is a type of a marriage in that T2 has a responsibility bound by law to watch over us unless we reject either T2 or T3. We have to realize that no matter how decompensated you get, T2 is responsible for you, in the sense that it causes great pain and disorder, but she can't cut us out of the picture except from our own free will, ever, only one's self can do so. And sometimes people have done it perhaps not consciously or verbally, but they do things with an undercurrent, or a have an agenda that is real obvious. For example, Jm would avoid classes and make covert plans using the teachings he was given and he didn't follow instructions. He sabotaged, was secretive and yet even though T2 knew it for a long time, she still had an obligation. When he finally caused the death of his own soul, the Holy Beings wouldn't let T2 restore it, because it went against law at that point. And one has to ask at what point?

There are many intricacies of law with student/teacher relationships. She doesn't know consciously, T2 just knows when it is proper and improper. For example with Fl; T2 must have healed her monad 10,000 times and it would be 2-300 times a day. It would occur every few minutes with a sudden anguish. With (healing) five or six people, T2 can't walk as it takes so much energy in fixing the monads. If the people in the war party cannot get to the point where they can preserve their monads, then little can be done. If so much energy goes into it, than little can go into the work of the party. T2 could have said that if she hadn't spent so much energy in fixing the monads, she would have done more work with the writing. A lot of reasons for the trouble is in the returning sparks of toxicity, those with a lot of sparks are going to be the most toxic.

You never can tell by an obvious example whether someone is a good or bad student. If they do not snap, they may have a thicker type of aura and haven't stretched themselves, or they did not put out enough sparks to be very toxic. There is no correlation; we all need to look at each case individually and ask *"How can I help the person? This is a team and is there anything each of us can do to help others get over this hard time?"* There is a pathology in too much attachment. Still, we have a responsibility.

Children often are not too harmonious, still we have a responsibility to help all people to come to their full potential. It will come to a point when everyone stabilizes in this party and we will start to facilitate the books on law. Then we can help to share the information in a limited nature with people at the right time. Not to put enough into it to scare the natives, but to start encouraging a desire to understand that life is more than the corpse and that there is more to life than just the physical experience. The non-physical is more real than the condensed physical world. With (a child) who was healing the dogs, it illustrates the potential. All things and relationships are a blessing and as people are being ensouled, be grateful that all were able to participate.

It was absolute energy that went out. Realize that since the team is interlocked in a power system. Every bit of disharmonious energy in the party makes the stew poison. Be cautious in your emotions and thoughts as they are things in the nagual party. With the power, is the creation of angels and archetypal beautiful energies that go out over the Earth---and it depends on people being able to have power in the creative forces. The fact that we have power is good. It is not from T2's desire, she has turned her will over to the Will of the Father and will work with every student even if she sees disharmony.

It is such an important thing to know when you are being materialistic and when you are not---because that pulls one down into the soul toilet instantly. This also happens when we create thoughts that become egoics that influence people. A lot of thoughts were in the house about the significance of fire. Others thought they were their thoughts and then made it worse.

Sometimes omens are not so good and are dangerous to consider most of the time because one could freak out and do something out of fear and that could slow one down. One might have thought (an omen) could have meant to get the children out quick and in reality it was just a few mediocre air demons---which unfortunately have power because of our being in a nagual party. It was enough power (in this case) to burn down a house.

The transformer blew out behind Sn's house, which is more of a regional situation, or a cloud of air demons floating over. They were evil forces, erupting sucker worlds from husks floating around. Everywhere is full of husks, just round them up and put them in a creek. They have air spirits connected to them. For the next two or three days, floating husks will be dying off from the eclipse and we will be better by then. Clear the auras and we will feel pretty good.

The eclipse residue: the eclipse has cut off the life blood of the demons of split time which has caused them to slough off and scab. Now we have the scabs. The holy beings timed it in such a way as to avoid toxicity.

There is a risk with being formless; the earth cord snaps repeatedly when T2 goes up and out of the pineal to see things---as seeing with the pineal gland implies that you are clear. With the pollution around, you don't see clearly.

If you wake up in the night, throw things in concrete and water, as the husks will make you feel polluted. When someone bursts, it is like a huge open window, as it sucks in disorder and spills over the others. You can go three days before you rot. After that it is touch and go. Jesus could bring people back from the dead easily before three days and it is a real miracle after three, as all the spiritual bodies are rotted. The only way to bring them back is to reconstruct the spiritual bodies from scratch. Now T2 is not talking about from the physical standpoint, but our biggest concern now is to bring us back from the spiritual (death). She will do her best to see we don't get sick and die. Try to live long enough to achieve a certain level of mastery, so that your consciousness could transfer into another vehicle. Plan not to die and if the corpse dies, plan to transfer it like an engine into another car.

What Jesus did in the Piscean age was to bring them back from the physical dead, ours is to bring them back after three days in ensoulment and after that, it would take divine intervention. For (the teachers) it took a while to bring people back from soul death. It never dawned on the old T1 that it was possible and it was a wonderful thing. It was not just praying to holy beings to do it, to some extent, we could do it ourselves which was similar to Lazarus.

Don't flip out if you do split out from the soul, just pray. Usually (the teachers) wake up within thirty minutes if anyone splits. When someone splits, the one who splits will go to another student and beg for help. Probably all of us have split at some time. It's a terrible feeling to feel the soul split. To have the earth cord split, it is hard to keep in physical form. With the soul split too, it would feel really bad.

CLASS NOTES December 31, 1993

The **Name Connection** of an original sun soul---that is what we need to remove. Make sure your *spiritual name* hasn't migrated back to your *birth name*. Check all of your old personal names, so that you don't dowse as those. Clear up the sucker worlds and that will help you with the mixed identities. With an old *Sun Dual-Soul Name Link*, find the old spot and remove it. It may be some contamination, but it is a name link with an old dual soul.

Do: Look on the *auric ladder* for *octaves*.

You may find a *thread* wound through the octaves.

Removing a name was like pulling a cork out of the bottle---with junk and residue pulling out. You may have to keep clearing there until the name settles in the new spot.

You may have *nagual links*, too.

Look for *Name Residue* on Earth Cord and Body Parts after clearing the site: **Old Dual Soul Name Residue**.

REMOVE Old Name Points from:

Born Children...Ensouled Abortions...Parents...To/From Old Self And

DO: *The Name of God on the wounds or scars.*

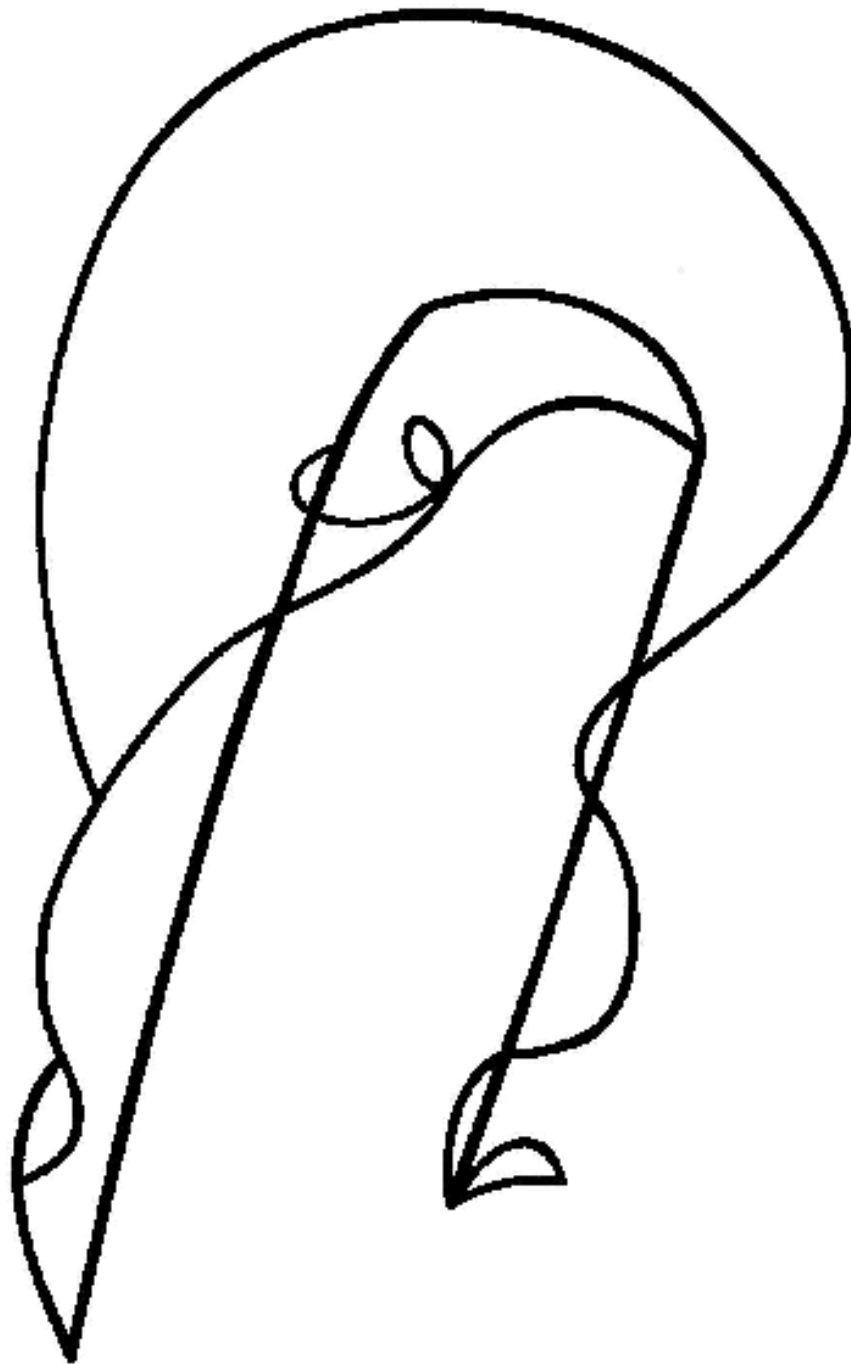

APPENDIX

Auric Layers, Planets and Body Parts Correlated

AURIC LAYERS, PLANETS and BODY PARTS

Auric Layer	Soul Block or Resonation
