INTRODUCTION to VIRTUES, LAWS and POWERS (excerpt) by Anonymous

Introduction

Published 1995

ISBN 1-885-186-83-5

There are people on the Earth today who hunger for knowledge of the mysteries of life. They may have sought to satiate their thirst for Truth through paths of science, art, philosophy, psychology, religion, or social services. Many, at the close of a long career in such fields, hear the hounds of death at their heels while their spiritual bellies ache with emptiness. They go to their deaths longing for the unknown, trembling with angst.

It may seem preposterous for this book to presume to fill some of that void by bringing to the reader the fundamentals of the natural Laws of the soul. Indeed, few people have ever considered that the soul of man has a type of matter, not unlike his flesh, although existing in a different octave of being. Few people are aware that there are principles, similar to known physics principles, that control the dynamics of spiritual matter. Furthermore, such spiritual Laws have a watershed effect upon the physical body of man and the Earth.

Looking out upon the sea of disorder within the major cities, one cannot help wondering why violent crime is becoming increasingly prevalent, and what could bring it to a halt. During the sixties the cry of liberals was for more social services, as though money or food could be the panacea. Others cried for gun control, more prisons, or other material solutions. Despite all attempts at controlling societal disorder the ghettos swell with violence, and the traditional family structure is almost gone.

There are some idealists who look into the heart of this disorder as though it were full of signs of wonderful societal transformation for the better. And yet, teenage pregnancies, AIDS, infections, robberies, rapes, and murders all continue to increase in number. By what criteria are these idealists measuring their success?

If one looks back over recorded history, pockets of societal peace and order rise out of the pages with haunting similarities of belief systems. Within each religion can be found keys that lead to the inner teachings of the fundamental Laws of the soul and of life itself. The fighting between religions has been due to clinging to differences rather than searching for similarities. The obvious similarities are merely echoes of the underlying mysteries which have traditionally been reserved for an inner circle of the spiritual elite.

The knowledge of the inner mysteries of life, held within the core of each religion, was withheld from the masses because of the danger of sorcery if the principles were applied without integrity. Any power that can transform a man's soul can also destroy his body if directed with malefic intent. It was safer to allow the alchemical mysteries, which were the core of each religion, to be watered down in a harmless fashion, in a way that could possibly change man's behavior through fear or promise of heaven. It was assumed by the spiritual forefathers that a man who lived decently might learn to think decently. If a man thought in a decent manner, then, later he might be able to control the spiritual forces with integrity and not run amok with unbridled passion.

For this reason, most religions focused upon behavioral instructions, rather than the reasons that certain behaviors could block the path to spiritual power. People have, by and large, decided that the behavioral instructions are no longer valid and so have developed many blocks to the higher teachings.

It is now time to reveal the inner teachings, in hope that humans can understand the reasons for behavioral sanctions and thought control.

The Laws are immutable. Man cannot break these Laws, but can break himself against these Laws. This is happening today on a massive scale. A man can tell himself all day long that fire is not hot, and yet burn himself, should he put his hand in a flame. Just as there are lower laws of the visible component of fire, there are higher Laws of the unseen components of fire. Many a man has thrust his own unseen components into fire and burned away part of himself.

It is possible to heal oneself through the application of higher Laws. If humans can bring healing order to their own lives, then they can begin to bring order to their families and to their own culture. If they do that, they can start to bring order to the world.

Healing the world must start with healing the self. This book holds the ancient mysteries through which personal transformation is made possible, if the applicant is sincere and willing to change. The dilettante will benefit little, except through some intellectual titillation. This book was written not for dinner table discussion, but at great price, and with great courage, by a traveler within such mysteries, in hope of helping humanity out of chaos. Since it merely recites the principles of the mysteries, it shall be considered anonymously and gnostically written, for man cannot hope or presume to create the Laws and Virtues. This is not a "channeled" book, but a book reflecting the experience of the traveler through many realms as real as the one before your face.

If you also dare to be a traveler into unseen realms, this book will guide you safely.

1994 AUGUST LECTURES BY ANONYMOUS

The following class lectures are transcribed either verbatim from audio tapes or from class notes unrevised by Anonymous. These lectures and written lessons were given by *Anonymous* to audiences familiar with the general background of Spiritual Science. The emphasis was in the dissemination of knowledge that was normally hidden from the general public, but has had a haunting recurrence throughout the millennia.

NOTE:

- 1) All LESSONS, LECTURES and CHARTS were given in class, created by Anonymous. Class Notes were taken by an auditor and not corrected by Anonymous and for these, it is suggested the reader also refer to the original, unabridged audio tapes.
- 2) The best introduction to the dowsing system may be found in the Advanced Esoteric Spiritual Dowsing Books, I, II, III.
- 3) **Please keep in mind** that this library is missing many of the original audio tapes (of which there were at least 50+ per month during a three year period) as well as some of the dowsing charts, Class Notes and Lessons. These books are compiled from the resources currently available to this library. **“Lessons” and “Letters” were composed by Anonymous**
“Class Notes” were typed during the lectures and were unrevised by Anonymous.

*Companion book to
Advanced Esoteric Dowsing Charts III*

NOTE: Most of 1994 AUGUST was spent in writing and preparing the book *Advanced Esoteric Dowsing Charts III*.
“Original Texts” for some of these Chapters have been included within this book,
Some charts have been excerpted.

DOWSING CHART: AUGUST 1, 1994

Returning null zone demons from ensoulment
Returning nagual demons
Bad sparks returning
Above causing thread to creation to: <i>Snap...Splinter...Be eaten by demons</i>
Grid/vicinity dark forces
Demons returning that you created
Rupture of personality at a body location due to above reasons
Organ identity confusion <i>In/out/floating in room</i>
Monad drip
Virtue rupture
Upper desire rupture
Etheric rupture- <i>Air...Fire...Water...SEX</i>
Auric part floating to past to secure personality picking up disorder in process
Taking on another's evil intention: Dowse “ <i>How many intentions you have and whether they are associated with</i> ”: Wrong quadrant Sucker worlds Fallen watchers Fallen angels Fallen asuras Evil humans
Demons: <i>Desire...Virtue....Mold....Lymph</i>
Rotting demons from A, B, C links broken
Personality ruptures <i>In/Out</i>
Others embedded in you
Wrong organ identity

NOTE: This chart made in reference to the Lectures on July 30-31, 1994

LETTERS AUGUST 2, 1994: To Students

Charts: Corpse Sounds and Correlations; "Pull Out/Take To"; Chromosomes; Years

2 AUGUST 1994 A Letter was sent:

Letter re. radionics sent to Phil Frapola Chief, Office of Compliance Rockville, MD.. (Text Deleted)

2 AUGUST 1994 Letter to Students

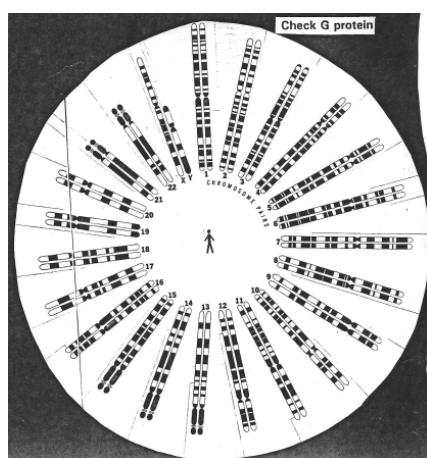

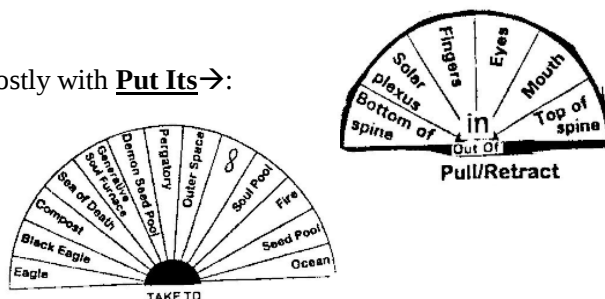

There are types of **Zombie contamination** that can be removed mostly with **Put Its**→:

Zombie Sheen

Zombie Pit Nets (like a net thrown over you in a crowd), and **Zombie Pit Cords**. These show up particularly Between Cells.

Zombie Thought Forms are called **Nettles**.

You may need to **pull stingers** on zombies too.

There are still some **Bad Sparks** returning. When these return, take care not to over-indulge in the disorder and reform: **Deification Links** or re-hook into old patterns or old self.

There is an aspect of the **CORPSE SPARK** that is reflecting shadows on the ← **CHROMOSOMES: Shadows of Parental Disorder** and from **Sexual Partners**.

There are 8 MOLD LAYERS

That need to be checked on both the YIN and YANG.

On the 20 ↓ **CORPSE SOUND** rings, check:

The 1st Ring and Skin of that ring for both:
Shadows and Echoes on the Body.

Also check: Years on the 1st Ring of the body for **Satanic Presence**
Coming out of these corpse contaminations.

CORPSE SOUND	BODY PARTS CORRELATION	CORPSE SOUND	BODY PARTS CORRELATION
1. 0	Ears, Bones, Spinal Bones, Finger And Toe Nails, Teeth	11. ^	Sinus, Nose, Bladder Mucosa, Mucosa
2. ↓	Dendrites And Sympathetic Nervous System	12. P	Immune System, Liver, Spleen
3. C	Parasympathetic Nervous System, Mouth	13. v	Urinary Tract
4. ↗	Digestive System	14. O	Skin
5. ⊙	Water	15. ✕	Cardiovascular System, Blood
6.	Neurons, Eyes	16. ⊗	Endocrine, Thyroid
7. -	Female Sexual Parts, Ovary	17. L	Male Sexual Function, Sperm
8. /	Muscles	18. +	Immune System, Adrenals, Lips
9. ⊙	Tears, Sweat, Saliva	19. h	Lymph
10. ↖	Respiratory	20. D	Neurotransmitters, Tongue, Cranial Fluid

Life-long evil patterns are surfacing to be cleared from the corpse. The stress of these layers is causing some people to lose personality substance. Check for this.

Check for:

Zombie Sheen Zombie Pit Nets
Zombie Pit Cords Zombie Nettles
Pull Stinger Bad Spark Returning
Deification Links Reformed
Personality Substance Lost
1st Ring/Skin Shadows on Body Parts
1st Ring/Skin Echoes on Body Parts
✓ Years on 1st Ring for **Satanic Presence**
Parental Shadows on Chromosomes (8 Layers/Yin/Yang)
Sexual Partners Shadows on Chromosomes (8 Layers/Yin/Yang)

FUTURE														

Normal Monad Spasm occurs around the winter solstice. It spasms with some sexual relationships and some are due to other reasons that it would happen. It is not mapped out, and it is not real significant.

Check: Percentage of intactness
On each of the 8 mold layers.

(Contamination on the Mold) goes from the 8 (layers) to the 20. The twenty refers to the Corpse Sounds/Layers of the body, not the mold. It goes from the mold/8 to the corpse/20 and then a new mold can become infected from the 20 to the new 8.

A “**Phone Line**” was given to Mag from a current student fueling a zombie which was hooked into Ni (or rather “Dar”) who then formed a line to Ni. This student had monadic desire substance (from dowsing with great intensity) to Dar who is in contact with Ni who is able to follow the monadic link through Dar, to the student, to Mag.

1994 AUGUST LECTURES

“Go Between”: This is important to check with students hooking into a zombie who empowers another.

Ask: “How many people am I a Go Between to?”

In other words; how many people have I squirted my monadic substance on for malefic desire thereby forming malefic portals? When you form these desire lines, the demons crawl in and impact your mold.

Ask: “How many zombies are feeding me Go Between feeder lines?”

You can dowse a person's mental state by the demon designs. (See “Advanced Esoteric Dowsing Book II”)

Example: An unknown ensouled person might be feeding an ex-student that would funnel back egoics/demons (to us).

(If someone) had feeder lines out, they then lost their soul,

Ask: “How many feeder lines are still in existence?” (From a) monad ruptured person, with residual feeder lines.

Anti-Deification Poison:

Ask “% of toxicity”. (This one is) about Ni and involving Ri with a communicative substance.

Measure: “How toxic are you with this poison on your mold?” (This occurred) with the “message” that T3 is the Anti-Christ. This is how Ni has it fixated: “Kill him”. Also “T2 is the whore of the Anti-Christ; kill her”. Just think of the two statements as one. This is the name of the poison that came last night. T2 would see (the face of) Mag, and the (the words) “Kill, kill”.

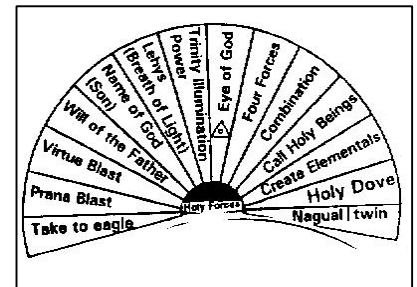

To Do: These you blast with the **Four Powers**→.

On the *Mold/8 layers*, check the 8, the *Corpse 20*,

The *Monad, Null Spaces, Personality Substances*.

Check all the *Substances*.

T2 knew that Ce considers it his mission to knock off “T1” but now he is including T3 to knock him off as well. It is important not to look into the eyes of major defilers, and/or be nice to them. You ought to look at it as “Get thee behind me Satan”, and don't look them in the eyes no matter what you do. An evil power could hook you with the eyes.

Evil Power Source Sparks: on found on the body or mold.

Pseudo Logoic Idea of Reality is one person's idea of good.

Pseudo Logoic Idea Obsession is false Virtue. It is a wrong idea but worse, it is a wrong idea of the truth.

This is not an anti-virtue, but (comes from) a separate idea that is related to virtue to suit your fancy.

False Virtue created to suit your fancy: “Create own reality” syndromes.

The bad thing about this is that some people can be very dangerous. There is nothing to do (about it), as it is **Free Will**.

Alp has three, and Forr has one. It is a sucker world virtue. Ri has 65. Aur has 5. Si has 2. Nob has 52. Ab has 1.

A person may have a tendency but it might not be full-fledged.

To Do: See what Laws are related, as it has to do with **Law into Form**. When others are in your mold, then you might take on others' **Anti-Law Pseudo Obsessions**, their **Idea of Reality Shadows**, and you may start doubting everything that you know is true. When these surface, you may think that souls don't exist.

Virtue Sucker Worlds: **Ask:** “How many are you hooked into?”

Example: (Ji/T1 complex): (is saying) “You must kill T3's belief in this work, otherwise he will be destroyed”.

Her sucker world is that “There is no soul”, “Everybody is beautiful in their own way”, “Anyone worried about the soul will bring destruction”. “No one is evil, except the (T1) corpse”. Ji sees T2 as evil. She believes if T1's corpse is killed, then that will wipe the map of anything to do with T2 (sic). She is absolutely convinced of this, it is the lower consciousness. Their plan is to murder T2 and if Ni has his druthers, T3 too. But Ji does not want (to kill T3), as she is trying to line up another man.

CLASS NOTES: AUGUST 4-5, 1994 and Chart List

Mold/Body Demons are crawling to the monad and hatching. These are from old connections to others in the *Counterclockwise Direction of the Body/Mold*. They are bubbling to the monad and creating living new links to zombies.

Check For "Demons/Zombies being fed". This would be a zombie inside an ensouled person (any body part).

This isn't quite a Clone, but a Demon with a zombie's name. **Example:** 17 are in Si with Jg's name in a body part.

Add to charts:

This Would Apply To Corpse/20 And Mold/8.

20/Corpse Body Sound Layers

In/Out

Clockwise/Counterclockwise

Up/Down

Years

Between Cells

20/Etheric Body Layers

20/Mold Body Layers

Do: Look at the Etheric body as well as the physical body on the 20 rings.

Think of the *Corpse/Etheric/Mold* layers on these 20 rings.

Zombie Body Demons: These could be the demon themselves and they could *have* demons--formerly called Pranic demons.

Example: Ce is a demon and he *has* 30 demons. He sees everything inverse.

He would dowse as being Satan incarnate as he has tried so hard to destroy this work.

Ensouled Body Demons are different.

Example: T2 has 5 ensouled body demons, check for these by name. These are created by desire substance

Apertures Get Vampired when corpse bits get on them: and then they start to squirt.

DO:

1) **Repair/Seal Up:** Zombie Corpse Substance Leak.

With zombies (this is a way) you repair the zombie layers and seal up wherever it is leaking. **Example:** Ji has 23 leaks.

2) **Check** on the body parts and the 6 *animal Corpse Layers*. **Example:** One of them is a Layer #4/Leak/Intestine.

3) **Then ask** the Holy Beings to seal them up by:

a) **Removing** Each Layer's Stinger and Valves.

b) **Ask:** "How many stingers are needed to be removed on each ring?"

CHART LIST:

- 1) Layers coming *out/surfacing* from Corpse Sounds.
- 2) Zombie contamination *in* to Corpse Sounds.

On the Corpse, Etheric, & Mold of the Body Parts and 20 Rings Check For:

Between Cells Satanic Presence	Down Pulls
Up Pulls	Corpse Demons
Corpse Ruptures	Demons Lines
Sucker World Lines	Corpse Demons Eating Monad

Check by:

Directions	Counter-clockwise	Clockwise
Years	Outside	Inside

Check for Zombies ruptured/leaking from their 6 rings:

Pull Stingers	Repair Leaks	& Seal Up Zombies
---------------	--------------	-------------------

LESSON AUGUST 6, 1994: False Ideas from Past Years Chart

False Ideas From Past Years Forming Demon Lines:

anti-v 4 (C)	Corpse Demon	Pseudo-harmony to avoid spiritual pain
anti-v 4	Mold Demon	"I need to take over someone's life for their sake"
anti-v 1	Demon	"Will to have things"
anti-v 29	Corpse Demon	"There is no rush to learn Law"
anti-v 19	Corpse Demon	"Sympathy for Law-haters"
anti-v 5	Etheric Demon	"Lack of Faith in one true God"
anti-v 3	Etheric Demon	Feeling stupid
anti-v 17		Demanding from God just desserts
anti-v 7	Corpse Demon	Desire to succeed above purification
anti-v 4		Irritability about money
anti-v 30	Corpse Demon	"Spiritual work is too hard"
anti-v 4 (B)		Comparing self unfavorably with others
anti-v 5	Corpse Demon	Fear of not appearing intelligent
anti-v 30(B)		Despair at the stress of spiritual work
anti-v 9	Mold Demon	"Romantic sexual fantasy obsession"
anti-v 14	Mold Demon	"Emotional neediness"
anti-v 6	Mold Demon	"Love of lower psychism"
anti-v 3	Corpse Demon	"Spy"
anti-v	Corpse Demon	"I can hide my true self"

Checking considerations:

Check: # of holes in Corpse Body Containers 1 - 20

% of substance left in each of the above containers.

Do: "Put It's" into the ocean, trees, rocks, sun, moon for toxicity and foreign material in any of the above containers.

✓ for Waveforms to use. In some cases, Freeze and then shatter the disharmonies.

Dowse # of Demons on each Layer and treat same as other disharmonies

After clearing a layer, WILL the aura to "snap" back into place

Break "Go-Between" links

Ask: for anything to clear on the: *Corpse/20 Levels... Etheric/20... Mold/8.*

Directions are important Especially important is *Counterclockwise*, and *Clockwise*.

Use the Waveforms of *Fire, Deadspace* and **“Put It”**→ into the *Ocean*.

We could do each Cranial Nerve by the ↓ Condition Charts,

But it will be better using the different levels: **1st Physical, Etheric, Mold and then Monadic,**

Monad Vampired: is often corpse (bits) on the Monad.

Ask: “How intact are the eyes are on the monad level?”

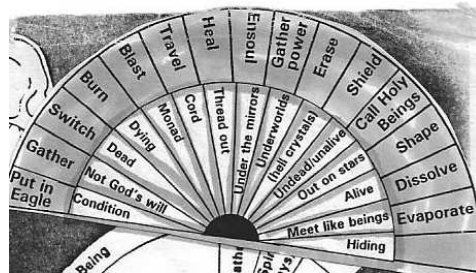

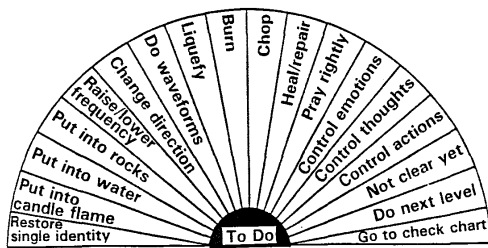

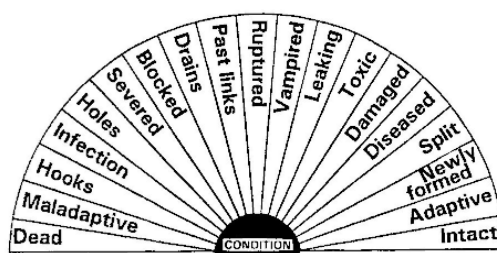

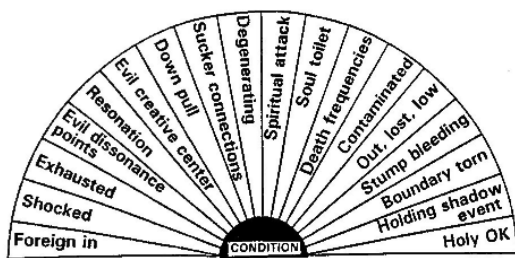

This is where we are grabbing from the eyes and squirting from the monad.

Do: Check the physical body parts and % contamination on each level.

Do this with the *Etheric Body, the Mold, and Monad* and use the ↓ **To Do Charts.**

Example: “Where is a problem on the body parts on the first physical Corpse Level?” Etc.

Check every cranial nerve and every layer on whole body chart. You don’t have to know what (exactly) the problem is. It could be “Foreign substance”, or an “injury”, just look at the Condition Charts.

When you wake up in the morning:

Just look at the Waveform Chart, or Put Its to help with the contamination.

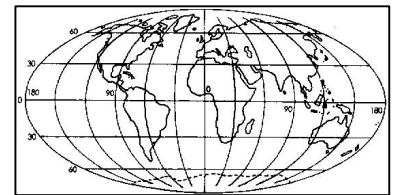

“Put it” into a candle flame, and often and into the **Earth Map** → and trees.

This will remove most of the current problems.

Make sure you are not leaking on any corpse part.

The Monad has body locations, you can check for leaks on the body parts.

Yesterday T2 found every one of us with cords going from us, creating demons.

Add to check list:

“Where do I have a demon cord to a sucker world or demon nest?” It could be on any level. **Disintegrate.**

These are a piece of you, a filament of your aura out to a person. It may be a dangling cord with demons on.

ASK: “How many are on the first level, second, etc?” With auric traumas we send a piece of ourselves out.

It is important to know when you are out.

There are 48 layers of self (that could be potentially) out with Demon or Sucker Lines.

You could ask “Where are the most lines out?”

Monadic Filaments Out: are more worrisome. *How to get rid of them the fastest way?*

Earth Map, (syphoning into the) North Pole, out of the eyes.

Clean the monad out of the eyes. A lot can go out of the eyes into the ocean.

Will where the filaments go out.

We have taken off the demons, but the monadic case won’t heal, because it has poison on it.

Once the demons are off, then you can snap them back into place like a rubber band.

When you are out in a crowd, you will get **Zombie Pieces.**

Your mold will be eaten up and the filaments will try to relax when they get poisoned.

Think of the auric balloons, as rubber bands saved in a ball. Now imagine rubber bands around a balloon. And if the balloon is not there, it will not hold an etheric shape. The bands sometimes break, but it will still be in a spherical shape. If all you do is **First ask**: *“Where do I have people globbed on me?”* then you can get the deeper stuff.

Then ask *“Where are rubber bands broken with something nasty on it?”*

(If you are around) someone with a “create your own reality”, then they will squirt corpse (bits) on you. Your aura is dependent upon being aligned with truth, and not a sucker world, and sucker world lines burn you. Sucker Worlds are like the Succubus/Incubus which would chew holes where demons would then enter.

THE KEY THING: **Teach people to do Waveforms and Put Its.**
And tell them the “Put-its” don’t hurt the tree or animal, it is a compost situation.

CLASS NOTES: AUGUST 9, 1994 Driving back to Oklahoma

From the road (T2, T3 and Cel are in the car):

There is a type of **Claw** hooked in *Under the Mirror* from the bottom of the feet:

It is a mechanism for feeding the *Pits* of the Asuras.

A **Stinger** is actually part of the corpse aura of a zombie or ensouled person that **shoots out to feed the Asura Pits**.

They are extensions of the aura used by the Asuras as **Pit Feeder Lines**.

They are inert when the claw is removed, but **residual demons** that crawled up through these lines must be picked off methodically. The route they traveled was from the pits through the claws into the body and on up into the Mold, Etheric, Monad, Layer of Mystery and Thread to Creation. These lines carried **Anti-Virtue seeds** that would flower into demons, crawling up from the feet to the legs and on into the crotch area. You must heal the feet and crotch after removing a claw.

Clear these by DIRECTION, particularly those used in the last week:

Chart: Direction

Inside	Outside	Skin	Years
Between Cells	Up/Down	Clockwise	Counter Clockwise

There is something called **Pit Spiders**. Pit spiders have arms that are alive, unlike the Asura Pit Feeder Lines.

Pit Spider Arms must be cleared off the body parts by directions.

Clear **Earth Akasha Demons** in the same way. Anyone who goes to the past is packed with these.

Fl had an abnormal layer of the aura called a **Were-Layer**.

Check: for **Were Layer Feeder Lines** and for **Were Demons** on the body parts.

Adjacent to the Were layer are **Fallen Angel Links**.

Ji had a residual **Abnormal Nagual Layer**.

Check: for **Abnormal Feeder Lines** and **Demons** on this as well.

In general, you can check for **Auric Bits of Abnormal Auric Parts** on all the body parts.

There are certain flaws which cause auric parts to leak substance.

If you squirt **Mold** substance, that is associated with **wrong thought**.

Corpse loss is associated with an **anti-Virtue** affinity.

Desire substance loss is associated with **anti-Law** problems.

Etheric loss is related to **past self** and to **physical exhaustion**.

To Do: Checking for foreign **Dissonance Points** is very helpful at this time.

If you have a lot of *foreign names* on you, you can “snap” the links and gets your aura back in line.

Demon Sucker Lines are still important to check for.

Ensoulment Polar Bodies gone bad must be destroyed.

These have often accumulated disorder and have Asura connections and partial genetic material on them.

It is important: Check the **# of blocks** on your **Layer of Mystery** to **calling in the Holy Beings from above**.

Do: *Prayers, Waveforms, “Snapping” and Freezing* disorders are all helpful at this time.

(T2) says that we have just interacted with 1,500 possessed people and this contaminated the group quite a bit. This is a time to whittle away at the disorder and not psycho-analyze too much.

REVIEW

Most important: Check by *Direction* on **all layers** (See Chart above):

For:

Asura Pit Feeder Lines

Anti-Virtue Seeds

Abnormal Were Layer Feeder Lines

Fallen Angel Links Adjacent to Were Layer

Nagual Demons on Body Parts

Earth Akasha Demons

Demon/Sucker Lines

of Blocks on Layer of Mystery to Holy Beings from above

Claws on Feet

Stingers In/Out

Were Demons on Body Parts

Abnormal Nagual Layer Feeder Lines

Pit Spider Arms on Body Parts

Foreign Dissonance Points

Ensoulment Polar Bodies Gone Bad

LESSON AUGUST 11-13, 1994: (...the road)

(...the road)

When Virtue powers rupture into evil sounds, shapes or quadrants (monster powers), the corpse physical, mental and emotional desires form into demons from their creative substances. **Anti-Virtue demons**, such as the recent drawings, depict geometric shape approximations but not the damage done to others from the demons chewing on them. This afternoon Si had ruptured Virtues #2 and #7. It appeared that St had ruptured #1, #3, #7 but it turned out to be Aur. (A child) was being chewed on his Layer of Mystery.

A main reason for rupturing Virtues is in the sub-conscious clinging to past ideologies and deification of people or religions as graven images above love of God. You do not overcome clinging to the past by resisting the past. You overcome the past by embracing the NOW. In little things be joyous.

Often it is in little things that one is not in the now. When tired or bored, some slip into habits of thought. Comparison and analysis are often dependent on time frames. The tendency is to invoke desire with thought when one should be impersonal without desire. **Mixing thought with desire** causes immediate elemental formation. By comparing with the past or desiring the future, a time distortion is created. The Virtues begin to distort and bulge as well. If you have a habit of slipping into the past or future, you could try the rubber-band on the wrist technique and snap yourself every time you think of, or mention something more than 24 hours old.

You should check for anti-Virtue demons on each of the Virtues, up to 21, on the bell curve and the Virtue problem chart. Remember that *Anti* is something that attempts to destroy the Virtue and is not an exact mirror. There can be various distortions of Virtue power that form elemental demons of destruction.

Anti-Deification Poison can take several forms too. It can be the poison created when someone picks up one of our books and defiles it in some way. It is thinking that someone who is holy is not holy. It is a form of sucker mentality. It is a mis-judging of another person, including defiling someone who is holy.

To add these two problems to the bell curve, draw a distorted bell curve (dotted line) to the left of the Virtue bell curve. On the upper curve put *Anti Virtue/Anti-Deification Poison Demon Production*.

Another question to **ask** is: "*How many faces does this person have?*" These are the **Facades** on the Virtues. You could have two faces on the 5th and 8th Virtues, acquired from another person. Also check the number of **Shared Faces**. These seem to be linked with claws.

Checklist:

- Anti-Virtue Demons (on all layers of aura)
- Anti-Deification Poison
- # of Faces You Have
- # of Shared Faces Linked With Claws
- Abnormal Nephtali Aura (Black Halo)
- Zombie Halo
- Lizard Halo – Lines Under Feet to Underworlds
- Lizard Eggs
- Mutant Apertures – Below Feet Holes
- Pi Dark Force on Virtues (Mathematical Symbol Dark Forces)

LESSON AUGUST 16, 1994: Apertures in the NOW

APERTURES IN THE NOW

If the NOW point is in the center of the circle diagram, check on the diagram included in this lesson and

Ask: "Where are these located?" and clear the following:

Corpse layers 1-20	O layer
Etheric Layers 1-20	Mold Layers 1-8
Desire layers	Monad
Layer of Mystery	Apertures
All other auric layers and spiritual components	

Check: If any auric part is not in the Now, ask for:

Clockwise/Counterclockwise:

Links to zombies, including self in past

Where do I have "Away from the Now" pulls out/in?

Go Betweens

Z loops feeding evil and keeping me out of the now.

Zombies being fed Air, Fire, Water, Sex links

Feeder lines

Batteries

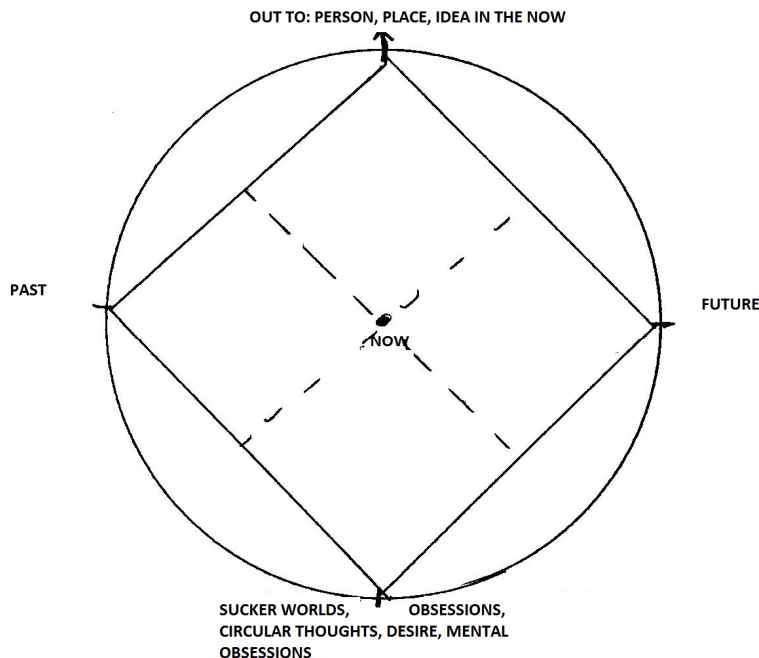

Evil Synergy Links: Are when we feed zombies and cause synergy links. The corpse and etheric migrate to the strongest sound. A lot of our problems are due to etheric and corpse resonance. With a weakness on a layer of the etheric, if something happens to bring the corpse to a weakness, then the corpse flies out, and the etheric follows. Then the apertures follow.

When the corpse and the etheric are reset set the Dissonance Points for each layer.

Snap back the bands. The Dissonance Points are like circuit breakers that can blow.

When the apertures are off, then the ensouled will throw loops over others; zombies and ensouled alike.

This will cause leaks and erosion and then collapse of structure. When the apertures are in the wrong place then one will have zombie interpretations, with knee jerk and irrational behavior.

LESSON AUGUST 19, 1994: Personality/Virtue Ruptures and Time

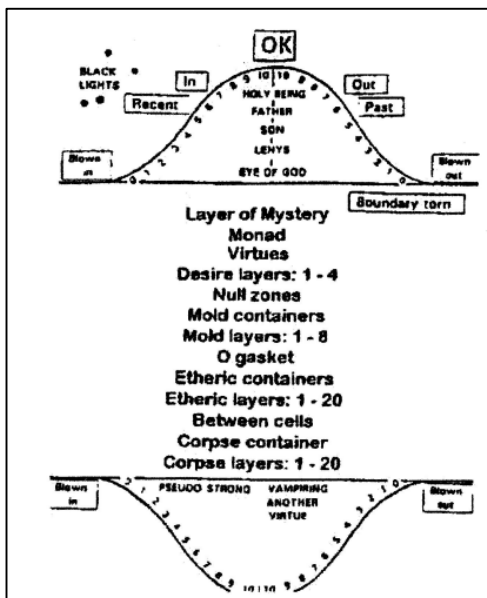

This original text is referencing Chapter 4, *Advanced Esoteric Dowsing Book III (Charts are excerpted)*

Personality Ruptures, Virtue Ruptures, and Time

The interaction between the higher self and the lower self holds some of the greatest mysteries of human development. It is not enough to quote, "as above, so below," if one hopes to help lead humanity to power and purity. Rather, we should look closely at the nuances of human frailties and seek to define ways to heal such frailties.

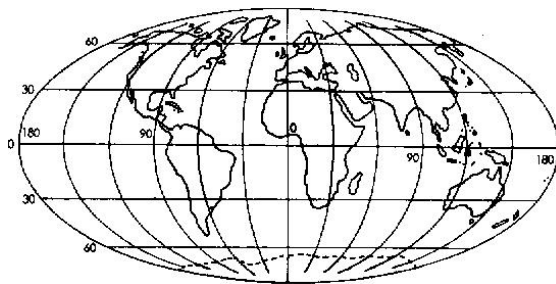

Spiritual development is the result of many decisions, and has little to do with past lives, because most people carry little higher knowledge from one life to another. Human consciousness is a rare commodity, and must be measured in varied ways to accurately evaluate such a mysterious substance. For indeed, consciousness has substance, and brilliance, and shape.

The spiritual mold of man is supposed to reflect a Godly shape, and all the physical/emotional/mental components are intended to have Godly shaped layers as well. It is possible to dowse the relatively correct shape of each auric layer in relationship to divine design, if the dowser accepts that there is a divine design. He must never slip into the comfortable belief that "everything is beautiful in its own way," if he intends to approach spiritual science standards with any degree of understanding.

The **Bell Curve Design** has been used as a measurement tool to evaluate the relative alignment of each of the Virtue powers. The alignment of the other auric layers should reflect harmony with the Virtues of corresponding layers. For instance, the first etheric body layer should reflect alignment with the first Virtue, as should the first auric physical layer and the first mold layer. The second Virtue should reflect similar bell curve orientation as the second etheric, mold, and physical auric layer. A contamination can occur on one of these layers, such as a layer of the physical, and then migrate upwards to contaminate the Virtue power itself. When that occurs, monadic rupture is soon to follow. Therefore, what manifests below may also manifest above, but not in a set order of occurrence. Disorder can enter from any level and affect any level.

It is possible to dowse from the perspective of the first Virtue, or any of the other Virtues, whether there is a disorder of shape on one of the auric layers, using the bell curve as the standard, and keeping in mind all the auric layers.

Earth Map Locations correspond with links to malefic genetic pools that might have impressed a miasmic influence upon your spiritual or physical matter. This can occur most readily through sexual congress, but can also occur through a desire to merge with people who have distorted their spiritual genetic material away from the divine design. Ideally, you should have no genetic glitches linking you to map locations. Your various auric layers should have no threads to any earthly location, but should link directly into the New Heaven, which holds the correct auric shape free from earthly distortion.

You can dowse over all your auric layers for the number of genetic/sexual glitches over the map. If you find any, then burn, freeze, deadspace, or use other waveforms from the charts to eliminate the malefic tie. You will find it helpful to check each amino acid for map glitches, as well. Between-cells communicative substances often have glitch locations. To be very thorough, go through each item on the **Three Body Parts Charts** for earth map glitches, while keeping in mind the different auric layers of each body part.

What you do physically tends to be imprinted upon your etheric selves. That is why evening prayers are so beneficial: they impress concepts of alignment upon the etheric body while the physical body speaks the words. It is destructive to end the evening with a violent movie or fearful conversation. Reading a section of "Virtues, Laws, and Powers" or the Bible will help to stabilize the body and etheric body before retiring. This is most important, because the etheric body tends to follow the last pattern imprinted upon it before retiring. Many of you rupture etherically during the night, because your last thought, emotion, or action badly impressed a course of action upon your etheric form.

Therefore, incense, prayers into a candle, and a loving mindset are all helpful to ensure a pleasant night for the etheric body. The mold tends to rupture if the etheric body ruptures. The Virtues soon rupture if the mold ruptures, with the monad to follow.

The more advanced the soul, the more pliant and fluid the auric layers. Most people have souls like walnuts, and they must steadily soften the auric layers, so as to shape their mold back to the shape intended in divine plan. The auric fibers must be softened like reeds in water before shaping in the proper form to fulfill the plan of God. Man must be relentless and powerful as a mountain stream to change himself back to his divine shape. Most people have removed themselves from the stream of power, and are gnarled and misshapen on the bank. Dried out, hollow, full of vermin, they feel as though they can never hope to soften and shape back to a basket fit to hold a saint soul. And yet, if they exert their willpower, they can tumble in the stream, to drown to what they once believed, and go through the slow and painful process of reforming.

The panic of the personality during spiritual transformation cannot be ignored. Each filament to the gnarled trees on the banks will increase the panic. Only by removing the filaments to the past can one hope to flow without resistance in the stream of change. Only by the use of tools, such as these dowsing standards, can the personality find order in such mammoth change.

For it is not enough to pray to angels, during such times of distress of change. One must also pick away at personal flaws, bit by bit, because they were accrued bit by bit. All healing occurs incrementally, within order, according to the tolerance of the recipient. Some people are not ready for great change, and must be allowed to be tethered to the bank, somewhere, while others go forward in the stream.

We must not think too harshly about those who cannot bear great change quickly. Indeed, it is a miracle that the human personality can endure any change of such magnitude that it reaches the soul and opens the spiritual eyes. It is a terrifying thing to see rightly, and takes great sobriety, and the eyes must open slowly, or madness will occur. It is a grave task of the spiritual teacher to know when to teach, and when to not teach.

It is also automatic to have spiritual changes in the presence of true teachers. For that reason, it is sometimes dangerous to be around true teachers, during times of great personality stress. There are windows of danger and opportunity that must be carefully opened, shielded, or avoided, in the presence of teachers.

The most important trait for a potential teacher to have is caution.

LESSON AUGUST 20, 1994: Detecting Personality Glitches

This original text is referencing Chapters 4-7, *Advanced Esoteric Dowsing Book III*

Detecting Personality Glitches

It is often a confusing task for the spiritual dowser to locate the core of a disorder rather than an arm of the primary disorder. Often, the basic personality layers of the aura are the root of the presenting problem.

Eight of the physical auric layers represent aspects of personality. There are common human frailties associated with these eight layers. The eight layers are associated somewhat with the first eight Virtues. The third layer seems to be the core of many disorders, since it has within in the human need for social interaction and support from others.

If you focus upon this third layer and check the world map for glitches or webs that interfere with healing of the personality, you can then disintegrate a great many blocks to advancement and happiness. Also, you can dowse over the body parts illustrations and lists for third layer problems or blocks. Checking the Now/years chart while keeping in mind the third layer will reveal more aspects of personality disorder.

We are now facing the anniversary of ensoulment nagual powers for all of you, and some nagual demons and bad sparks continue to return. Nagual demons can return to the creator for years after creation, so be prepared to pray and go through the To Dos to remove such disorder. Also, when personality problems emerge on the eight layers, elementals may return. These are not as destructive as the nagual demons but can cause emotional disturbance.

Charts: Apertures; Personality Band Weakness List

Band	Personality Weakness
1	Desire for Past Self, Old Life, Past in General
2	Fears of the Future
3	Pride in Psychic Ability, Desire to Merge
4	Mentalism
5	Self-Hate, Hate for Others, Low Self-Esteem, Gender Hate
6	Money, Materialism
7	Sexual or Romantic Desire Indulgence
8	Physical Injury or Exhaustion

I would suggest that each of you check these ← **Eight Layers Relating to the Personality** first, before scanning the charts for the other layers. Checking for the NOW on these layers is very important, to detect bits of self out to other years or sucker worlds. This is somewhat of a difficult spiritual time, but pray morning and night and you will do fine.

Another weakness that is surfacing relates to the **Apertures**. Some of the returning elementals and demons migrate to the apertures, and may cause a blowout. Also, some of you are not keeping a close eye on *Desiring* with the throat, *Thinking* with the chest, and so on. If you find yourself upset, then check your focus of *Desire, Thought, Will, Trust and Seeing*. Do this early on, and clear your apertures, so that you do not further deteriorate during times of stress.

Adding the attached **Aperture Problem Chart** (see next page) to your dowsing protocol should help you detect disorders. You may seem to have your desire at your throat, but not have it in the Now. You could have your willing and intending at the brow, but still have it connected to a sucker world.

Look upon all of this returning disorder as merely another way to serve God. It is the cleanup from the last year's service, so we must be brave and cheerful, if we are to be saints. Do not get discouraged, and be patient with yourselves and others, during this challenging time. If you feel overwhelmed, then distract yourself with a book or movie. Find something to laugh about, to soothe yourself, and get plenty of rest.

You are in our prayers.

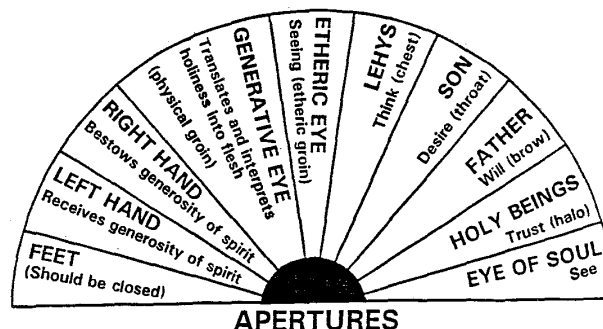

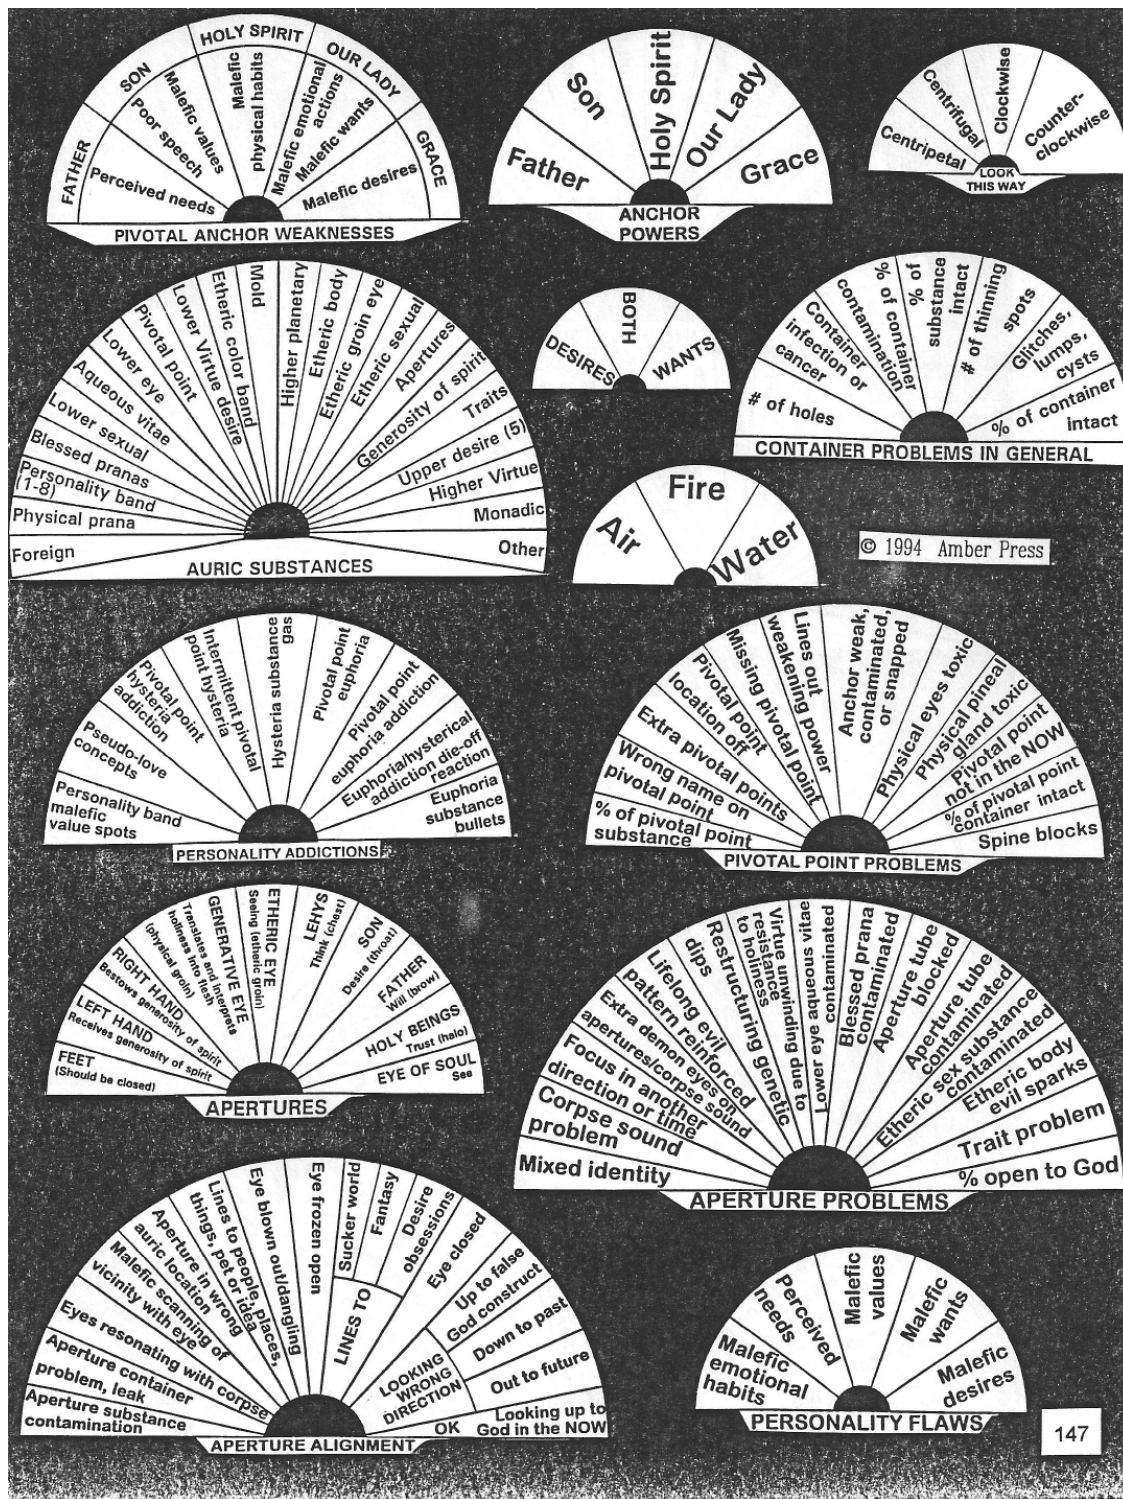

Chart Combination: Aperture/Container/Pivotal Point/Personality PROBLEMS

LESSON AUGUST 21, 1994: Frozen Lower Eyes/Personality Glitches

This original text is referencing Chapter 4-7, *Advanced Esoteric Dowsing Book III*

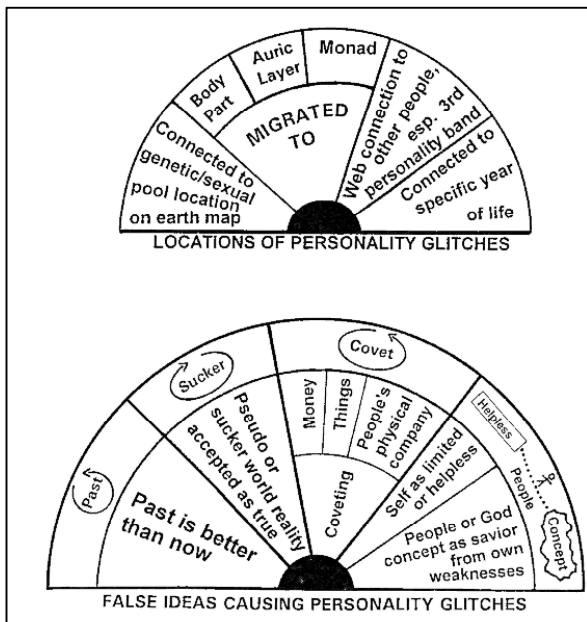

Frozen Lower Eyes and Personality Glitches

I noticed that some of you had your lower Eye of God (pelvic area) frozen open or blown out. I decided to investigate why, since a monadic drip was present in all cases of lower eye "grab."

You can dowse how frozen open or blown out your lower eye is if you think about your uterus/epididymis location of your body while doing so. If it is frozen or blown out, then you will find that the following personality glitches apply:

PERSONALITY GLITCHES:

1. The past is better than now (false idea.)
2. Another pseudo or sucker world reality accepted as true.
3. False idea boxing in idea of self as limited or helpless, with lines to people or god concept of your savior from your own weaknesses.
4. Covet money, things, or people's physical company desire vacuum.
5. The above errors migrated to any auric layer or body part or to monad.
6. The above errors connected to a genetic/sexual pool location on the Earth map.
7. The above errors connected to a web of other people, related to the third physical auric layer where social connections are strongest.
8. The above errors connected to a specific year of your life.

You will notice that I placed certain clockwise, counter-clockwise, or box designs near some errors, because your dowsing response is stronger when you focus on such an associated shape relating to that error.

All of you should focus on your uterus/epididymis and try to remove all lines to such errors, people webs, earth locations, etc. If you do so, then your personality will be stronger.

You can dowse over other charts to find out specific wrong ideas you might entertain to form such disorders. However, many of your current problems relate to spark-empowered nagual demons or sucker worlds that are surfacing for clearing on this anniversary of so many people being empowered to help ensoulment.

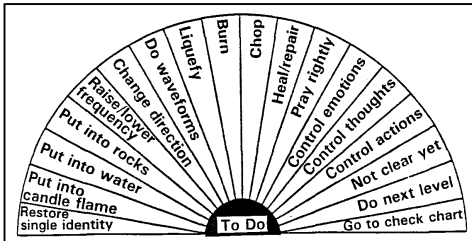

There is a mystery about anniversary dates, where karma returns. Speaking of returning physical karma, today I will need to go back to the hospital (Baylor medical center in Dallas; Dr. Cc, under the patient name of JER (homeless woman) without any identification due to

purse missing. My gas gangrene has been held somewhat at bay after a week of massive antibiotics but I am now running out of medication without the gangrene healed. I have a large rotten hole in my foot and gangrene lines out from it. This illness is necessary for now, but I am trying not to croak from it, as it is systemic and I feel quite ill. Keep yourselves clear and say a few prayers.Genevieve

LESSON AUGUST 22, 1994: Demon Eyes, Hell Lines, Personality Loss

This original text is referencing Chapter 4-7, *Advanced Esoteric Dowsing Book III*

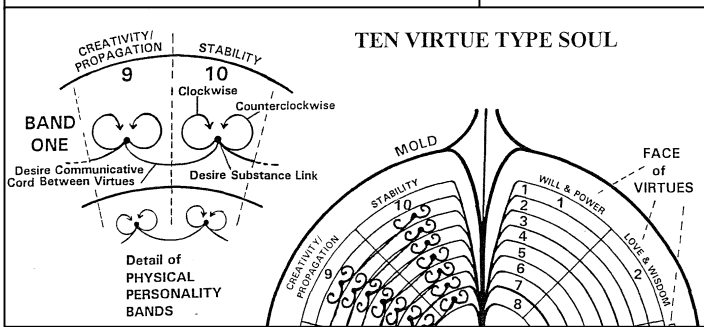

Demon Eyes, Hell Lines, and Personality Loss

A primary cause of personality weakness is the sending out of auric filaments from the main eight layers of the social part of the auric cocoon. Of those eight layers, the third is the most commonly weakened. One cannot retrieve those torn auric lines of power unless the frayed ends are cleaned off before snapping them back into place. The easiest way to clean them off is to use the abbreviated

◀ **To Do Chart**. Freezing, burning, and dead-spacing are common ways to clean off the ends of the lines out. Using the Waveform Chart (page 24) is also important. The Body Parts and World Map charts are helpful, along with the Put-It Chart, to assist in the removal of disorder.

Charts: Basic To Do; Personality Band Drawing

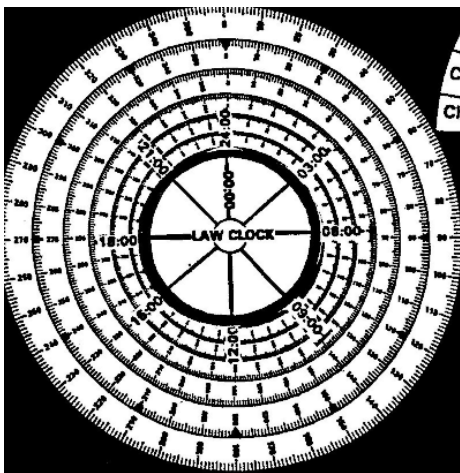

Some of the lines out go to hells which contain boxed false ideas about helplessness, counterclockwise or clockwise false ideas, and time frames. This was covered in the last lesson. Other lines go to animal pets and then exit from the pets and go to people or false ideas. They all form portals through which egoic elementals and desire demons crawl.

Through such tubes, demon eyes peer upward to you, as though they have periscope eyes into your personality. They crawl through the tubes to enter your other auric layers, and soon demons are babbling nonstop in your whole auric cocoon. This is the state of the common man, who cannot hear his own true voice. You must aspire to hear one true voice within yourself, and not every desire-filled person you know.

You will find more disorder is perceived through the lines that you extend out from your **Eight Personality Layers** than from the ones other people web into you. For that reason, clean off your own auric filaments and snap them back into place first, before worrying about other people in you. **Start with layer #3** of the eight rings of the personality aura. You may locate problems on the layer by the Following Questions:

How many Demon Eyes do I have on this layer?
How many Holes are on this layer?
How many Pet Lines do I have on this layer?
How many Webs?

Zombie Portals?
Go-betweens?
What percent intact is this layer of my Personality?

Go-Betweens refer to auric tubes that connect you to more than one person, sucker world, animal, past self, location or other link. You have to remove each segment that links the various foreign elements to you.

If you dowse that you have a line from a dog or cat, then realize that it is probably originating from the owner of the animal or a child that is fond of the animal. The line simply goes through the pet.

It is time for all of us to strengthen our personalities. Such auric holes and webs will reflect as loss of the personality to certain body parts, and can produce physical illness. They can cause you to rupture your monad with the demons that crawl upwards through the lines and out the holes of the demon eyes into your primary auric cocoon. These holes may dowse as **Evil Apertures** or **Evil Eyes**.

After clearing off each layer, snap the auric band back and set the dissonance point for that layer. Check on the dissonance point chart for any remaining problems, find on the **◀360° Circle** where your point is and where it should be

and will it to the correct point. Sometimes lines to you will be found in the spaces between the auric layers. Therefore, on your charts listing the twenty physical corpse/personality layers, the twenty etheric, and so on...consider that there is a potential space between each layer.

The human spiritual anatomy is a remarkable and complex design that we should study with reverence and awe. We should not get weary of such research and study, because such endeavor will lead us to power. Only with power can we change the world.

Genevieve

CLASS NOTES: AUGUST 22, 1994

Check for:

Layer of Mystery Were-Animals
Vampire Cancers
Vampire Were-Animal Construction

These live independently with a semi consciousness and they drain soul force. They crawl in and grow and hatch on any auric layer (or between auric layers) and migrate to the greatest power source, the Layer of Mystery, to suck soul force. If you dowse and get “**Embryo**” on the body parts, then that is what you are seeing. They may be nagual demons that originate as bad sparks, it may be with the party, and who we contaminate. It may be due to **Bad Sparks** that had false ideas or **Evil Cabala False Idea Shapes**, as they start to look like monsters relative to their consciousness. These have distorted shapes; cancers that have soul sparks in them, and then they migrate to the soul and suck it.

Look for Nagual Demons particularly on the Layer of Mystery, as they may be the Were-animal cancers with soul sparks inside them. **Check Body Parts, Years and Do: Waveforms and Burn.**

Example: T2 would get “*Layer of Mystery Monad Rupture*” on her injured foot over and over again because is a demon portal right now.

PLEASE FAX TO EVERYONE:

One must have a focus point for reality (---).

With (higher or lower) Frequency; one is either evaporating or solidifying, and it can burn or freeze.

With a medium frequency of a liquid/water, it could be poison, or the elixir of life.

So the geometric shape of a construct could be nurturing or poison to the personality.

Consider the personality as your house and a dog as the dissonance point, (as it is not human, and it is a shift).

With a dog the size of a cow, it will run holes through the walls, and one the size of Amber will dig holes in the yard.

With a dog too small and weak that can die, like a puppy that is not taken care of, then one can lose the point of reference for the house. If (you are in) every room and the dog was in was a family room, then corral the dog in the correct room. One wouldn't want a dog a monster shape, as that would be destructive to the environment; one would want it to fit the family environment.

The thing is, wherever the dog is in the house is the direction you are looking at.

So you have an **angle** because of directions N-E-W-S, Up/Down and In/Out influence.

What if the dog was on the edge of the house, it would be as though one were looking *out*.

If the dog were inside the house one would be looking *in* from the aura band, as with an in/out, up/down, and looking up at the ceiling or down, N-E-W-S (sic).

The temperature of the room, would equate with the **frequency**, as the dog won't live in certain frequency bands.

If one took a Chihuahua to live in Alaska it wouldn't live very long. One must then have a Malamute dissonance point.

One reason a lot of people blow out around (the teachers) is that they have access to a lot of frequency bands that are stressful to the aura. So a frequency band comes in that is too high for your dissonance point to survive, then you might blow out and the personality band would weaken. Each personality band is like a room in the house; each room in the house is one of the 8 bands. Each one has to have a dissonance point like a pet or an object that draws your eye. A living creature is more like a metaphor, as they can only withstand certain temperatures, and they can move. For example, a bird, you might confine it to a cage. If the bird goes out of the window, then there is no dissonance point. You need boundaries for the dissonance point. If there is a big fire, then the plastic cage would melt and the bird would go out, so being around extreme temperatures in the non-physical bands, is stressful. If a person is under a lot of stress; T2 tries to avoid him, so that the higher and lower bands won't stress the dissonance point. Sometimes people take it as sign of rejection, but is a protective (action). She doesn't see the children often, as she knows they would snap dissonance point containers, and then the personality bands would snap.

Sometimes children are more flexible, sometimes less. In this case they are so rigidly accustomed to thinking of a mother in a certain way; they are rigid in their boundaries and can't withstand the frequency change. If one is around a person all the time, then one will get used to the different frequencies and one may feel a head buzz or an auric strain, and that is why is good to go for a walk after spiritual work, listen to music and do something to adjust the dissonance points back to a frequency that is tolerable.

Each dissonance point has a rotation in the “room”. Each room has a personality layer, and a dissonance point in a location in a room, and it is located in a certain way as well. *So it is a dynamic relationship of dissonance point, structure, and the outside world.* The aligning of dissonance points with the outside world is referred to in some of Jesus' teaching. When the inner bands with the outer bands are aligned, one can run into trouble. We have to be careful, one can actually burn from within. It would be total merging with the Tumbler face of God as there are certain times when certain alignments occur naturally, that stress occurs on the aura. Why is it, that last year and a month ago, T2 was sick and this year she is also sick? It is all for a good reason. Is it a blessing or curse, a success or a failure?

The warrior uses all things as an opportunity. Say if one's inclination is to get a major auric rupture at this time, then one can use it as a vacuum cleaner for the debris of the party. (It reflects) a weakness in the system that was used for a good purpose. So always go back to the same principles: *Frequency, Direction, Relationships of Directions.* Like which direction is the dissonance point facing in relationship to you? It is a living aspect of orientation, a sphere within a sphere and not as just a “mark”.

Example: Say if you thought of your left kidney as a dissonance point, the top of the kidney could be *up* or *down*. You could have a twisted kidney and it not work very well. (It could be) in the right spot, the right organ, temperature and shape, but it would not work right as the dissonance point would be twisted in orientation to your auric bands in general.

This has to do with harmony of the different auric bands with each other and with the outside, as the Earth has dissonance points. Why is it we have total disorder from Africa, New Zealand and Alaska? Those are auric bands of the Earth, North and South being the strongest: the head and feet being the strongest correlations on the human.

Why last year was there a skull rupture for (T2) and this year there is a foot rupture? Because they are points of greatest tension on the planet *and* on the human aura. That is why it is important to check the feet and head before anything else and after that the genitals. The pelvis and genitals are like the equator on the world.

You can understand anything that happens to you if you go back to

Frequency,
Direction, and the
Relationship of Frequency and Direction, and the
Concept of the **Dissonance Point** itself,
Waveform, and
Orientation of the larger system.

One orientation is of a band to the auric cocoon in general, and then (another orientation is) the whole auric cocoon in relation to earth or other peoples. If you sleep in certain directions, you are more likely to rupture than in others, due to aligning your values with someone else's values. With a sucking pull or vacuum; if you have a weakness in your auric cocoon, then that auric part may suck out faster. Don't point the weak aura towards the vacuum, but towards the strong (direction). There may be times to point the weak aura at the vacuum to clean it out.

If the aura loads up with demons for a good or bad reason, either digest them, or eliminate them.

Digestion occurs through actually taking them within an auric layer and breaking them down to cosmic dust and removing the dissonance points and crushing, and (it is a) taking on of the raw matter as part of oneself as food, and it takes tremendous energy. It is still good to do; taking it in, is taking a form of the pattern into yourself, and it reduces illness in anyone able to do such a work (through destruction of the illness pattern).

You have to have a stronger personality dissonance point than the personality that is in you, or it will take over you, and the physical aura layers have to be strong enough to hold the points firm, or they will start to rupture. This is what has happened to T2 who has struggled for personal and personality strength to withstand the onslaught of the foot without dying, but (by also) drawing the disorder into the body to eliminate it. (Something like this event) is wearing on the personality; it is a constant pain that actually erodes the personality.

As people (humans) we need (a time for) recovery. You could say “I won't be hungry and I can go a week without food”, but you *will* be hungry, as it is a natural law to be hungry. It is also a natural law that constant pain erodes the personality, and it is a *mechanical process*, and it is not weakness, but natural law. Some have thicker structures and can withstand longer periods of pain, loneliness, heartbreak, cruelty, without breaking down, and that is related. Disappointment in life, emotionally, and through the career or family, and sensing that everything that you knew is true is changed.

The ability to withstand changing paradigms takes tremendous personality strength and the only way to do it is to maintain the auric bands and rebuild them to be resilient, and to snap back into place faster and faster under great duress.

To look at someone (physically) may be confusing as to whether they are strong or weak. And it would be related to how much stress has been put on the organism. T2 is tremendously strong in personality but she was reduced to tears from the pain, infection, toxicity, antibiotics, illness, and profound anemia (from the gangrene in the foot). The physical stress caused the personality to weaken so that she was losing the ability to destroy the demons, and because of that, she had to vent some out to the hospital, as she was getting to the point to not be able to compensate.

If the personality and the body go, then the demons will devour you, as in a case such as this. In our cases, the demons would devour auric layers and one would become a zombie. This was magnified, in T2's case, as she asked to suck (the demons) in. But she literally, for 3 nights before (today) she would wake up crying. She seemed to be losing it, and (she felt like she) couldn't cope, she was weak, but the profound stress from demonic attack was overwhelming her and it was because her *physical* body was getting exhausted. Included in the physical body was the personality bands, and she could not withstand any more nights of pain.

Blood poison creates reverberation on the personality bands and alters the personality endurance. If you are exhausted, then rest, or if one is starving, one needs to eat. *Any weakness would come to the surface (under stress)*. We need to explore strengthening the auric bands, but there is no need to strengthen them if we don't quit feeding (your aura substances to) others, as you are strengthening them (if you are out to them). So remove toxicity and (gain in) the ability to hold your own lines in, and snap them back at will. But if you are weighed down with other people's crap, then you won't be able to do it. We have to burn, freeze, do waveforms; we are taking off their disorder to pull the personality bands in (tight). The Bagwa won't do any good, you could pull it in, but it won't stay, as it dangles.

TO DO:

Control Frequency...Direction... Focus

Keep a Dissonance Point, which means to shift Assemblage Points on many layers.

First do it methodically then can do it automatically.

If you do this ritualistically over a month, you should be able to automatically clear the personality, and snap it back in place in one's sleep. That is what we ought to look at doing. **We need to make this teaching the core of third dowsing book.**

Examples: By putting the feet in water, many things can be "put" there, and one can pull things out of (the body).

When you are driving, automatically throw things out and snap back the auric bands. Throw (the contamination) out, and snap the bands back, as what (is) in you will be dangling. If you throw disorder into a tree, (don't) leave the bands dangling, snap them back. It is purely a function of will and each one of you can do it, but you forget the steps and you get so muddy from so many lines *out*, then you can't think of what to do, and you will wake up possessed, with your head so cloudy, and you will feel miserable. When you are that bad, start with one layer, do *To Do* with directions, and use the directions chart.

We will get more into symbolic illustrations, like using the 'boxes' which are clear as illustrations.

We will do a mock up and then some will dowse as "being in a box", or a circle, clockwise or counterclockwise.

Ask For the disorder in *direction*, and auric layers relating to the past.

The layers exist in the same space, and

They are the ones that have to do with social interaction; the first 8 layers of the corpse.

Example: Say if you are going to talk to (the) inner self, then it would seem (it is) the corpse, and some people think of the soul as "out there". Is the soul the "*Inner self*", or "*Out there*"? It is an enigma.

Is the spiritual self above you, or deep within you? In many ways condensation (of matter) is perceived as in, and holiness an *outer* layer. But the body is a shell, and the real you is in the shell. It is all a metaphor, and if you think of it in actual frequency bands, the lowest, most solidified form is *inside*, and it is close in, as it is condensed. Then (further out) we have mist and steam. (The *Senses*?) are the most solidified form of the aura, and when stronger physically one's senses (are stronger?). *Desire* is the liquid, and *Hope* is the mist.

For example: The urinary bladder has many frequencies within it; liquid, skin, mucosa linings, filaments, cilia in urethra, and many shapes within with directions. It has to some extent *mist*, as through the walls of the bladder you reabsorb gases into the blood stream. If you drank a lot of beer, it would show in the bladder, and a high alcohol content would reflect in the urine. If one didn't pee for a while, it would be reabsorbed and go back into the blood stream, as it reabsorbs (sic). So a gaseous component to the cells of the bladder is to bring in gases, liquids, mucosa component, with all different consistencies, frequency and purposes in same organ. It is the same with the auras. All wiring in a system; if it is messed up, like the lining of the bladder, one would get an infection in bladder and get blood poison, it would back up into the kidney and any (other) aspect. With scarring on the bladder, one would be able to reabsorb fluid, but (still) have scar tissue. You may have to pee, but (you may) not conserve water very well, as it wouldn't reabsorb, so it would be an inefficient system. Every layer of the bladder impacts the whole physical (system?) If one layer goes, the physical (system) goes. (Sic)

It is the same with the auras; if the third layer could be equated to the lining of the bladder, then if you have no water in the bladder (1st layer), then you get an infection with not being rinsed out. It can originate from a lack of fluid on the first layer, or the second layer (the blood vessels), then the third gets infected. Each one can infect the others, but the most important is irrigation.

This Third Layer of Personality involves the ability to communicate, and it is key because without ability to communicate we serve no purpose. It (would be) as though if all that we were, were “walking scars” and we couldn't see, feel, hear, translate or interpret, then we wouldn't be able to help other people to learn, or spiritually progress through the understanding of (their) own self in context of humanity. It is as though we are a dissonance point in the context of humanity, and we have to have a personality that can withstand being a strong dissonance point in a sea of disorder. If yours is aligned with that of God, and you are in a huge sea of infected material of humanity, then you have to have a stronger personality to hold it there, than the average person that flows with chaos.

They like chaos (the average man). For example in the Emergency Room they *like* the sight of blood and gore, and if they don't see it, they get depressed; it is very common. It is a rush, and it puts them in a stream of agitated energy that is perceived as auric cocaine. It is like a roller coaster of thrills to set one's dissonance points far away from (---) which requires a great stability. Your overall dissonance is the sum total of all of this, and the relative degree of disharmony that they (the others) sing.

The danger is that people of disorder will hate you because you won't feed them. They will only love you if you feed them energy. Why did Forr's parents want to see him more and more as he gained in power? They want to drink it and if you don't give it to them, then they will hate you. Why are dowsers always touching other people? They want to drink energy. Why is Cr so filled with hate, when all T1 said was “Not to come back to live at the monastery?” Cr hated T1 as Cr was a chronic drinker of energy. She accused T1 of “mind control”, and yet they *want* to be controlled by power. They don't want *personal* control, which is the point of this teaching, which is to gain personal power.

Sometimes we have to quit talking to heal. The third auric band is likened with speech and it is fitting to heal the band; quit talking to heal. For example, if you “see” a scene over and over again, then it may be hate thoughts (in the vicinity). With a constant image or sound discomfort, trace it to *Sounds Out* or *In*. *And when you are near someone, they make a sound. We have to look in the right direction to see it.*

PRACTICE: Look at the picture of Jesus on the wall first centrifugally and then centripetally, then with an up and down orientation. For example, clockwise, it looks brighter, and counterclockwise it gets dimmer and the head smaller. The reason the people in the hospital were so hostile, is that T2 was losing resistance and was revealing the patterns in her aura. We don't want to reveal ourselves. Before she got too tired, she suggested for (everyone) to be like the air in the room, so that they, the others, won't notice you. (This method allows one) to get between cells so the auric emanations float between the cells and they don't cling (to the body). People didn't pay attention to us, but (it was because) we didn't take on their dissonance points as we were just floating. With so many agitated elementals and demons, to do this for a long period of time takes a lot of power and energy and when tired, one can snap. Before we practice (this), make sure we have 100 % of our personality containers, and 100% of our substance which could be equated to joy juice, as it fills us with the joy of living.

That is why people with strong personalities tend to be happy. And an abrasive personality may appear to be strong but it is not. A modest person may have a strong personality. We should aspire that everyone be completely their own personality. People who are “good people” may infiltrate you, but you don't (tend to) mind, if someone is likeable. *But we should aspire that they not infiltrate. We want every person to be their own personality.*

Figure out

“Where do I find most of another person in my personality?” and

“How can I help others to not feel a need to invade that space?”

One person may be eroded in areas where another has tried to bolster (the first). If you are trying to build up (your strength); you may have put lines into another person.

We have to figure out the mystery of healing the auric personality layer containers themselves and filling them with power. Say if one is fearful or insecure, we need to strengthen those things. Why do we collect little items? It may be a personality weakness, due to insecurity and an auric hole with a feeling that things are “slipping away”. So we have to reassure ourselves with little things. It could be the auric bands are out to a “boxed” helpless world, and then one would feel a need that everything be contained.

Children love boxes, for example, T2 would feel happy as a child with an orderly placement of pretty things in a box. It gave her a sense of order that she could control, and it is therapeutic for children to have something to structure (for themselves). But the **key** is to have the personality as a box, so that a person's dissonance point in the personality will be like the items in a shoe box, placed in the right order: *then the person can look inward for security*, so that the person doesn't have to look for a hidden box under the bed that can be stolen or defiled.

To some extent seeking out of order is a sign of a good personality (sic), but (to be) excessive or compulsive, can (put) a hole in a personality container. Sometimes we will see an object and then it won't be there, sometimes it actually is disintegrated and reformed somewhere else. Other times with a personality band out to a sucker world, the sucker world will take over and you will shift to personality B and if one had taken it somewhere (else), then it would shift back to A, and one can then say "*I didn't do it!*" By shifting to another major auric band, with so many lines to another person, you *become* them, and then you have to shift assemblage points back to your primary personality.

We will find tricks to pull ourselves back to our (own) core personality.

Ask: "*How many sub-personalities does one have?*" (It is as if they) could lose a hammer and not remember.

For example: Gar has 199 sub-personalities. It is like the computer switches to another screen, and into another program. When the glitches happen, they can send off a spark. Car engines respond to personality glitches as they have frequency bands that rub each other, and they have waveforms. One could have a gasoline waveform and it could cause a friction (in the car).

With machines not working (around you), check for monadic droplets, and energy batteries. For example, this TV has 8 monadic energy batteries, which occurs when someone is looking at something and they squirt out. In all things, have a calm demeanor. Decide to start clearing at the third personality layer, and whittle away. And then you will have tighter systems.

We are getting closer to the mystery of human consciousness.

The human personality is what we are embarking on now.

There is some mystery about the world map, a lot goes to New Zealand, and that may be (because a married couple) have filaments there and we have filaments in them like a loop of auric material that could originate in anyone of us.

How to detect personality lines is by checking through the animals and places where one has lived, or peoples' names.

It may be a name, as houses don't take on personalities other than primary core structures. A house would have taken on a sub-personality of the people who live there through the filaments, but the house doesn't generate lines.

Ask: "*How many lines do I have to people in New Jersey?*" And look at the map. It is easier as it is related to direction. T2 gets so many to Africa, a lot of which go through Mag or Forr to Africa.

This could be a partial resonance to people who hate us, as Africa is an assemblage point of murder.

Example: If Jg wants to murder T2 then her *Eye* would be pulled to Africa as it is filled with "murder".

The sound of murder is in Africa more than anywhere else.

Example: Ask "*Where is this murder sound coming from on the Earth Map?*"

One might listen and if it is from Africa, it could be Jg being as murderous as the Tutsi in Africa.

People actually take on the karmas of the murder (energy that) they take on.

And if Jg looked at T2, his face would take on the face of a Tutsi.

Why do peoples' bodies start to shift (with different energy patterns)? It is someone they have become embedded in, or in similar resonance; they become an *Archetype*; i.e. a murderous African archetype face. Many blacks have resonated with murder, drugs violence and carnality. They do not look refined at all. Those that have steered away (from such resonance) look more refined.

It is not what people do in a location, but the spiritual forces that have to do with a location. A lot (of contamination easily) goes into Siberia, Greenland and Antarctica, and the South and North poles have the strongest pulls of energies.

And a lot has to do with Hawaii and below the planet. There may be a rupture of the Earth, of the mega system, like a personality rupture of the whole Earth. Things are wedged between the layers.

Example: Nagual sparks with demons between the layers. Those in ensoulment party have far more personality stress than normal. In a nagual party, one will have more of this stuff, and a lot is when we were under so much stress last year, the bad sparks are (now) crawling out and going up.

We have a lot of clean up, and we need better charts and illustrations, and dowsing. Sometimes we have to quit dowsing. For example, T2 would start to rupture her personality (bands) in the pineal gland ("Pull to throat and blast" is now a "Pull to the pineal gland") and if you need to rest, you have to quit pulling it in, as the pineal will rupture.

No matter how much power one is using, it all goes through the pineal gland. Look for exhaustion of pineal gland which is perceived as through the mouth and eyes area. The roof of the mouth and sinus; and one can get a pineal spasm where you won't be able to quit. It is almost like a dry heave. Walking would stop the spasm, as that pulls the focus out of the head completely, so watch TV or take a stiff drink to stop the spasm.

Sometimes the Holy Powers will come in and you will feel a sense of fullness and openness and lightness, which is good. But if you are straining at the roof of your mouth, nose and sinuses, there is a strain, it is like the nerve path is away to the pineal gland and aperture. But when pulling in forces, the pineal may cramp, and then (you need to) pull the energy from the

head and pull it to solar plexus to remove the focus from the head. Eat something; that will release a spasm, as the energy will go to the stomach to unclamp the pineal spasm.

You can tear open the pineal gland if it spasms. Then you will feel bad, you can't see, everything is fuzzy and you will feel the pressure, like a child with a cleft palate and food, one will feel shaky, neurotic, confused, with judgment errors.

Do: It is good to practice opening and shutting the pineal for a rest. If one locks *open*, or gets forced open with spiritual changes, it gets jammed, and then it can't shut when around disharmonious people or whatever. Think of it as being soft. Then open and shut it again.

LESSON AUGUST 25, 1994: Personality Bands and Virtue Ruptures

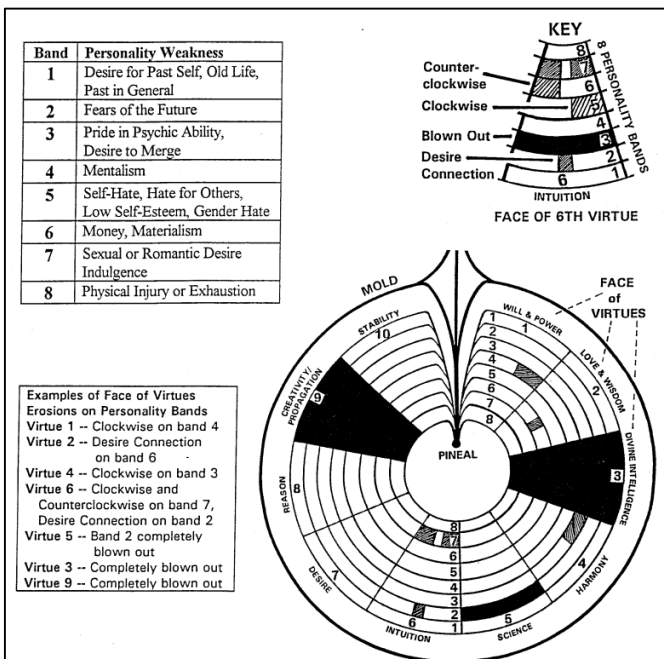

This original text is referencing Chapters 4-7, *Advanced Esoteric Dowsing Book III*

Chart: Personality Bands and Virtue Ruptures (AED III)

The realms of intention and action are intimately intertwined. One cannot strengthen the Virtues, and therefore the soul, unless the realm of action, that of the personality, is equally strong.

The lower-self personality is influenced by physical illness, parental and sexual genetic weaknesses, romantic desires, materialism, hate, desires to socially merge with others, fears of the future, and desire for the past. There are many sub-weaknesses in each of those categories. For instance, materialism can mean that a person believes his body is himself. Dowsing over the soul blocks and soul lessons charts helps one to define nuances to weaknesses found in one or more of the eight primary personality bands.

Within the eight bands are aspects of the Virtues. It is as though the heart of the Virtues is in the soul, but it pumps the blood of the Virtues down into the form of a man's personality. Each Virtue has a clockwise and a counterclockwise aspect. Each Virtue also has a desire connection to the other Virtues within that band of personality. The desire connection filters the Virtue influences back to the Layer of Mystery on the thread to creation, where it intersects the other bands.

If a person behaves badly in thought, speech, emotional outburst or action along the line of a Virtue on one of the bands, then he can blow out that face of a Virtue on the clockwise face, counterclockwise face, or desire connection (or all three aspects.)

If a person blows out a Virtue on only one of his bands, then he will still dowse as having that Virtue intact, but it will be leaking and weakening his monadic structure. You have to dowse each Virtue along all eight bands, while keeping in mind all three components of the Virtue, if you are to find areas of spiritual weakness due to personality weakness. If you fail to detect the one or two aspects of blown Virtue on a band, then that whole band can collapse, producing mental and physical symptoms.

An ensouled person is far more likely to become depressed or ill if he has personality problems than a person who has no soul. That is because his spiritual state can reflect as instant karma upon his form. Usually weakness of personality and the related Virtues and bands takes time to progress, and can be stopped if a person meticulously assesses his weaknesses and develops self-control in the arenas of thought, desire, speech, and action.

It is possible to completely blow out the whole soul suddenly by embracing the disharmonies of the haters of Law and seeking to harm someone. However, it is far more common for people to lose their souls bit by bit, as they make personality decisions that steadily erode their spiritual sight. They can then appear to all the world to be nice guys, and yet have no soul, because they steadily refused to face their weaknesses relating to desire and thought.

To spiritually heal oneself or another person requires the identification of the weak Virtue spots on the personality bands, and a motivation to change. There are people who still have small souls with fewer than ten Virtues existing on each of the eight bands, or even with some of the bands blown out. However, their sight is limited, and their spiritual state nebulous. It is as though the circulation of the spiritual being requires arteries of Virtue light circulating through eight bands on ten Virtues of three aspects each. Otherwise, necrosis of the soul is likely.

It is not eighty Virtues (ten on eight bands) but ten Virtues that manifest on eight bands. The Virtues are like acupuncture meridians. The first Virtue, that of Will, needs to circulate through each of the eight bands, or spiritual stagnation and personality blocks occur. If the first Virtue blows out on one band, then it may poison the next band's first Virtue, as well. The desire cord running along the bands is like a fiber-optic cable that has layers for each Virtue, and unites at the first Virtue to circulate to the next band.

All bands unite at the pineal gland, where they embrace the mold, and cause it to torque away from Logoic force, or align with Logoic force. The pineal gland translates to the mold all that is desired, acted, and thought upon the Virtue powers and desire substances. If the substances become poisonous, then the pineal gland will be thrown into shock, or dowse as dead.

Spiritual translation into the physical dowsing response requires an intact pineal gland. An intact pineal gland is only possible if the eight bands and acquired Virtues and desire substance are clean.

It is possible that some people acquire more than ten Virtues, and so there is even more stress to align those Virtues with the personality. It is much harder for an evolved person of many Virtues to not leak monadically, because the higher Virtues respond more readily to nuances of personality weakness. Also, if a higher Virtue is gained before a lower one is strengthened, then it puts pressure upon the lower one. Therefore, it is advisable to first clean up the lower Virtues to provide a sound base for higher ones.

There is an aspect of astrological influence upon the eight bands. Each band could be said to have a Father, Son, and Holy Spirit face (8x3 aspects=24 divided into half yin and half yang=12 months of the year.) People are born with one band weakness reflecting their birth influence, and a smaller second band weakness, relating to day and time of birth. On a smaller scale, each day has hours that tend to reflect mega-band influences. The eighth band is loudest (since it is like a cosmic sound) at midnight. The seventh band is loudest around 2 a.m., the sixth around 4 a.m., the fifth around 6 a.m., the fourth around 9 a.m., the third around 3 p.m., the second around 8 p.m., the first around 11:30 p.m. This is true for summer central standard time.

You can dowse what band you are playing the loudest at a given time, and see if it is the correct band given the above guidelines, or dowse the correct band and sub-band. If you have blown out a band or have diseased Virtues within a band, then you may not be in rhythm with the Earth sounds, causing personality or physical weakness.

If a person has a weakness of excess regarding one band, then he may starve the other bands. For instance, a person who doesn't know when to quit mentally obsessing about some subject may blow out his fourth band, starting with one Virtue within the band and moving to the others. If that band is blown out, he will still dowse as having a soul and all the Virtues, because he will dowse the remaining bands. And yet, he will tend to leak steadily until a rupture occurs.

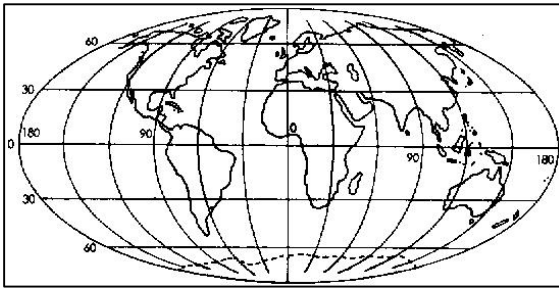

This can occur quickly if the pineal gland sticks open due to too much serious spiritual thought without getting up and moving around and changing topics. If you dowse for sixteen hours straight, you can cause the pineal to go into spasms, and freeze in an open position. If you feel vulnerable, you should check the percentage of pineal opening, and what it should be. When you finish a dowsing session, you should WILL your pineal to close up to around 2 percent. Around disharmonious people, it should be closed completely, so that your eyes do not absorb disharmony and suck it into your personality/Virtue bands. It is good to practice opening and closing the pineal gland, so it remains agile.

The more Virtues a person has, the larger the pineal opening. As the pineal opens ever wider, a sensation of mouth and facial fullness may be perceived to extend down to the throat and upward to the eyes. Spiritual blasting powers come down into the form through the opening, but sometimes the opening can begin to spasm, and yet no powers come down. That occurs due to spiritual exhaustion, and should be a clue to shift gears. Taking a walk, working outside, listening to music, watching a movie, or drinking a beer or glass of wine may cause the spasming to stop. If it does not stop, then you will become agitated and dowse wrongly.

The apertures drink the substances from the pineal gland, and can also feed disorder upward to the pineal, the thread to creation, the desire connection, and the Virtues on each band.

Aperture problems tend to occur because a person is mentally "grabbing" someone or something with the associated body location lower spiritual eye. For instance, if your desire and feeling personality component eye drops to your heart, then your Lehys aperture may open wide up to a pathetic beggar on the street. As it opens widely, it sees and memorizes disharmonious patterns which then are translated upward to the pineal. The aperture may go into shock, and freeze open. This is a serious spiritual condition, because all manner of disorder can crawl inside, and then upward. *You should regularly dowse the percentage of openness of your apertures and whether you are willing, thinking, desiring from the appropriate ones. Otherwise, you may rupture your aperture eyes, scar them over, or poison your whole system with the disharmony that is drawn inside.*

It is easier to "tune" each band if you think of the planet Earth as a giant tuning fork. Your location on the Earth would tend to make your personal sounds different from a far-away person, as would your birth influences. However, your sounds should be harmonious in the flow of the mega-Earth sounds. You can dowse each band's mega-Earth sounds on a map for the primary dissonance point, and compare your sound to it for harmony.

For instance, from the point of reference of Oklahoma, the first band has a dissonance point in New Zealand, the second in upper Argentina, the third in Africa, the fourth in the Bermuda triangle, the fifth in Bombay, the sixth in Tokyo, the seventh in Cape Verde Islands (off of W. Africa), the eighth in the Alaska Yukon. Someone in Oklahoma could check where each of their eight band dissonance points are set on the world map and compare to the ones given. However, anyone in California or New York would have to dowse from their origination point the correct dissonance point and the current one. If a disparity exists, then it is not difficult to WILL the point to change.

It is helpful to check for

Missing points: Have you blown out a whole band?

Look for Extra Points: Links with other people,

Wrong Point, or a

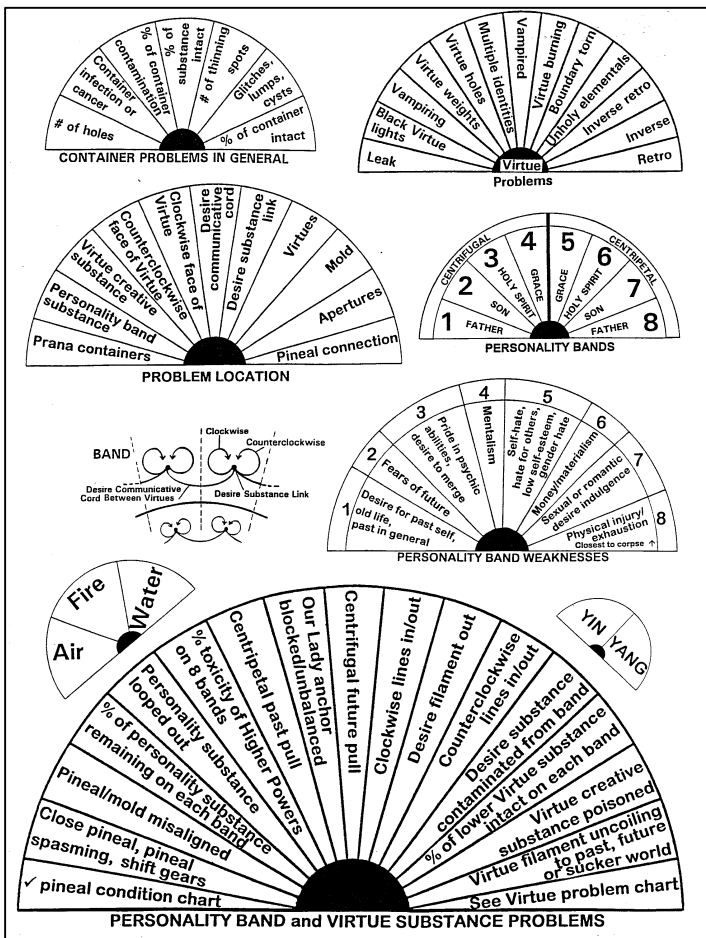

Contaminated Point at the right location.

Go through the "to do" charts to clear such contamination.

In general, freezing, disintegrating, and burning waveforms are very helpful. Also, "putting" into trees, rocks, metal, ocean or creek is helpful to clean up disorder. *In most cases, you are not really putting the disorder in the substance, but are creating a "like cures like" mental construct that destroys disorder by a deadly resonance.* If it actually goes into the substance, then it is attracted by partial resonance. Partial resonance attracts, while complete resonance destroys (like an opera singer shattering a wine glass with a note.)

Therefore, when you put it into an earth location, you may be sending the substance underground there, shattering the substance due to a resonating evil in the location, or may, in fact, be aligning a misplaced chord of your personality band with a correct Earthly location. Many simple appearing techniques taught to you in these teachings have multiple meanings and purposes, all designed to help you gain in power and clarity.

It may seem like a complicated task to clean up all these bands and repair the three Virtue aspects on all ten

Virtues on all the bands. Some of you will need to pray for divine assistance to repair the bands. It will be given if you exercise deliberate action to not repeat your weaknesses of personality and intention.

Each Virtue coil, of a clockwise or counterclockwise aspect, contains the filaments that tend to uncoil when one merges with disorder. For instance, if you indulge in romantic obsession then your second Virtue along the seventh band may unwind and go to the past to the object of your longing. It may be the clockwise filament of the Virtue, or the counterclockwise filament, or both. Or a desire thread may reach out from the center, and go to the object of desire.

The reason that Virtue powers have the ability to "go out" in lines of force has to do with healing. This is why Jesus said he "felt the Virtue go out" of him, when the woman with an issue of blood touched his robe. He was responding to an unspoken request for healing by the woman. To use the Virtue powers for others reasons is to weaken them, and cause them to rupture.

A spiritually powerful person must learn to regulate his personality and intentions, so as to control such forces. Otherwise, he will blow out his soul, because he has misused power. These teachings are designed to give you power so as to help humanity. There is a fail-safe mechanism for the use of such power, in that you will rupture your spiritual anatomy if you misuse your power. You may mentally argue about how good someone is who has appeared to rupture their soul. You may feel that God is cruel, and yet each person makes a decision every day as to whether they want to have a higher consciousness or not. Only with a soul can a person retain consciousness beyond physical death. In fact, most people have no real consciousness while in life. They react like amoebas in a petri dish to any stimuli, and seldom seek to be more than robots to

external influences. You must seek to understand your weakness and to control them, or you will be no different than the unenlightened masses that fill the cities. This means more than benign feel-good prayers, and more than good works. It means good thoughts, good speech, and good desire. Above all, it means that every day you struggle to be holy, and accept nothing more than your best.

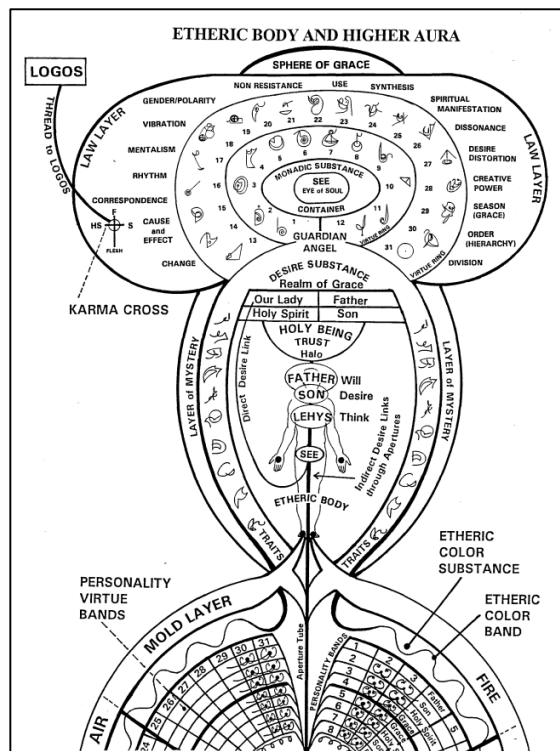

If you methodically dowse and try to correct your weaknesses, then you will eventually clear yourself in your sleep, and no longer need to dowse. By then, you should be in perfect harmony with divine plan, and every cell of your body will react if you are not. This hyper-sensitive state of a saint is a difficult cross to bear, and yet full of joy that is beyond human understanding.

Etheric Colors, Earth Spots and Trait Doors**

Charts: Etheric Colors; Trait Doors;

TRAIT DOORS

		
Trait 1: North Pole - Tailbone	Trait 2: South Pole - Sexual Organs, L-4	Trait 3: Niger - Navel, L-2
		
Trait 4: Java - Lehy's chest, T-3	Trait 5: Australia - Throat, T-1	Trait 6: Iceland - Brow, C-2
		
Trait 7: Leningrad - Pineal	Trait 8: Djakarta (near Java) - Desire Container	Trait 9: Congo - Eye of Soul
		
Trait 10: 10° under Galapagos Islands above Easter Island - Thread to Logos		

Trait Problems (AED III)

There are associated weaknesses that can originate on the etheric level. Pictorially, these can be represented outside the personality bands.

The Etheric Body can be said to be composed of colored lights. If a person tends to merge with others, his etheric body floats as a ball of colored lights to the other person.

The purpose for an Etheric Body is to impress upon others Godly traits. That is why Traits are represented by colors. If a person's traits are less than Godly, then his colors become muddy. He develops a muddy aura that appears dirty to a refined

person. Also, a person may have one trait to excess of another trait, and have an aura of one color, that is not balanced. Such a person will often desire to wear only one color, and feel drawn to foods of a certain color or type. This is often tied in with a fixed idea of what God is. For instance, a person may see God as only love, and so desire to manifest the trait of love in his auric emanation. In doing so, he will lack emanations of divine wisdom and other Godly traits.

A lower psychic may ooh and ah that such a person has a pink aura, and yet that is a very limiting auric emanation. A person's auric emanation should contain many colors, like Jacob's coat, so as to represent the brilliant composition of holy light, which can be perceived as clear white with many subtle rainbow hues within it.

The normal range of possibilities for color traits variances is twenty. You can dowse whether you are low in any color, while looking at some primary color swatches, or if your colors are muddy relating to a particular direction.

Colors tend to have North, South, East, West, Up, and Down Directional Influences. You can then go through the "TO DOs" to remove any muddy influence, and can pray to have a missing color restored. Charts will follow this lesson tomorrow. You will have plenty to study in the meantime. Genevieve

LESSON AUGUST 24, 1994: Earth Colors and Earth Spots

The following original text is referencing Chapter 8, *Advanced Esoteric Dowsing Book III*
Etheric Colors, Earth Spots and Trait Doors

Etheric Colors and Earth Spots

The difficulty with defining Etheric Colors is compounded by the fact that people have different vision for the same color. This is due to physical or etheric blocks that may have existed since birth.

Looking at a color swatch is only helpful in defining etheric colors to a person who has no etheric color block or physical color block. Indeed, the most difficult color of all to see is the one that was blocked at the physical birth experience.

At least one of the etheric color reception physical locations of each person is scarred over on the level of the umbilicus at the point of neonatal cord cutting. Another one may be scarred due to circumcision or other surgery in life. There is a correlation between physical trauma and the scarring over of the ability to draw in the rejuvenating powers of etheric colors.

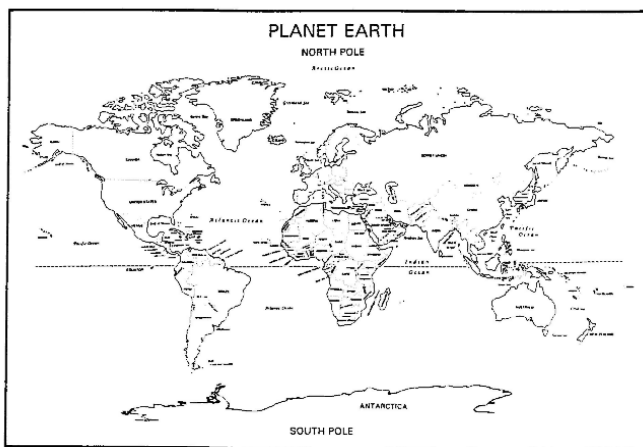

Even if a person loses his soul and his etheric body altogether, he will still have the scar or scars and have a tendency to illness in the associated organ systems. That is because there is a step-down etheric component of color that affects health even in soul-less people.

The loss of color relating to the umbilicus is related to date and time of birth bringing a focus upon a particular etheric Earth color that can also be associated with an Earth location (not necessarily of birth.) The location, time and date of a person's birth causes the umbilicus to have a map orientation that is unique for his situation.

The Earth is the mega-system that contains all the etheric colors needed for the physical health of an inhabitant. By thinking of map locations, rather than eye colors, one is able to sense color nuances beyond the physical eye capability.

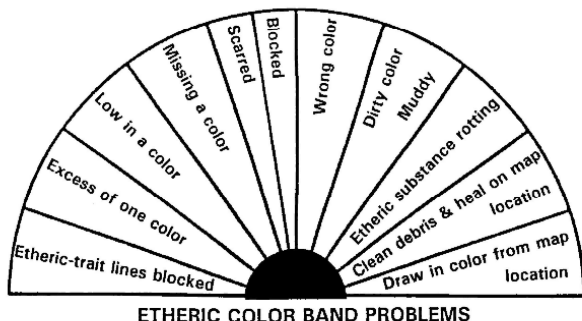

Some people naturally vacuum color energies from other people, and so remain healthy. However, it is ideal for the student of truth to not drain others of colors, but to be able to draw the colors from the map locations, and hope to heal the scars that block the colors from entering.

Etheric colors affect the personality structure, the sense of well-being, the ability to understand Virtues and Laws, and many other aspects of being an evolved human.

To determine your birth color block or blocks, look at a globe or flat map and dowsing what is missing from your etheric body. For instance, you may be missing Panama. Then, hold your physical finger over the illustration of Panama and **WILL** your etheric body to draw in Panama color energy. Check on the percentage scale for what percent of Panama color energy you have. By the way, Panama has somewhat of a citrine color. Then check for any other missing colors.

Germany is a shade of blue, Zaire is fire color, Brazil is a type of white, Australia is a rose quartz, New Zealand is a magenta shade, New Guinea is amber, Mongolia is peridot, and so forth. There are nuances beyond the words, and so it is best to just describe etheric colors by their anatomical mega-Earthly location of greatest force.

After you have drawn in your missing colors and willed to heal the scars, then you should check for any wrong colors or dirty colors while scanning the map. In these cases, you have to go through the "to do" chart and "put it" charts to remove the etheric poisons that cloud the colors.

Often, you will need to throw the toxicity into the ocean or a creek so it will decompose. Sometimes, you will need to do waveforms.

The locations of Etheric Color Blockage are your points of great blindness and weakness that filter down upon your personality and cause you to falter on the path of wisdom. It is imperative to check for such blocks daily, so as to keep your joy and enthusiasm on the difficult path of a saint.
Genevieve

P.S. I will try to see all of your biggest blocks, and draw in a bit of healing for the scars. Blessings. Get to work.

LESSON AUGUST 27, 1994: Planetary Forces and Spiritual Health

The following original text is referencing Chapter 6, *Advanced Esoteric Dowsing Book III*
Etheric Planetary Energies

Planetary Forces and Spiritual Health

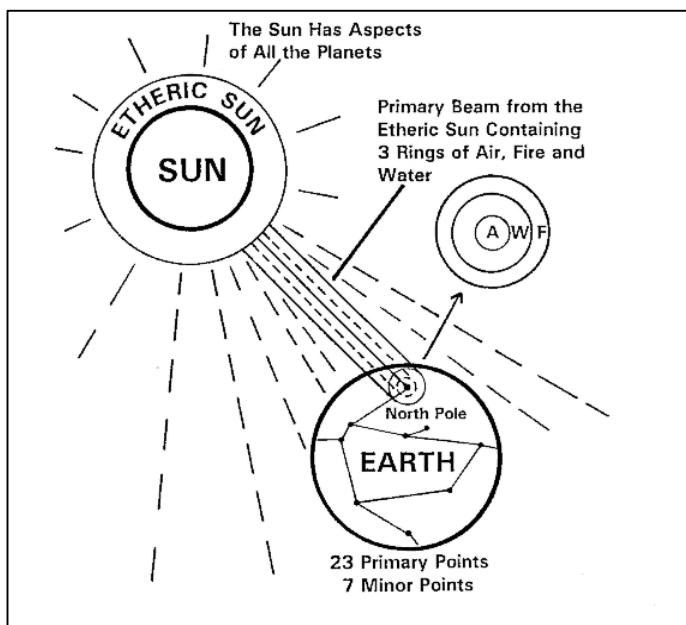

Planetary forces impact one's physical, mental, and spiritual health. It is possible for even a soul-less person to know the rules for strong planetary energy and to stay healthy, yet the planetary energy is not a component of the higher self at all. A person may obey the lower laws of planetary energy and yet hate the higher Laws. If he does this, he will tend to physical vitality.

If an ensouled person of a high spiritual nature struggles to understand the high Laws and yet fails to use the lower laws governing planetary energy, then his personality and body will weaken to such a degree that his soul may collapse because it has no foundation upon which to rest. It is not enough to struggle for Truth; one must also struggle for the lower strength to endure such Truth.

There are many systems of thought, such as the Taoist, that help one to maintain strong planetary forces and therefore strong physical and mental health. Mental and physical health, however, must never be equated with spiritual health. They are helpful to acquire spiritual health, but are not synonymous.

Spiritual health is measured by the purity and power of the Virtues and the alignment with fundamental universal Laws. Many a person has learned to be in the Now (which is a function of maintaining planetary health) and yet has not acquired Virtues or aligned with Law. The function of meditation is primarily to stop internal chatter and pull the planetary feeder lines back to the physical and mental systems in the Now. If a person meditates, does not have emotional outbursts or overwhelming desires or longing for the past, then he can conserve energy and may stay healthy, no matter what his Virtue development may be or his degree of alignment with Law.

The danger that one falls into, while perusing spiritual paths, is in equating serenity of facial expression and physical health with spiritual progression. The path to spiritual progression is a very active path that may throw one through massive personal changes that can be perceived as painful, and the face may reflect such pain. Many people who give up the struggle of self-purification will take on a beatific look that belies their cowardice in facing their spiritual flaws. They often speak a lot about love and peace, and yet their peace is the peace of death.

Life of soul is one of struggle forever upwards. To endure such struggle requires great stability of mind, and is enhanced by a strong physical body. The understanding of the planetary influenced upon health will benefit each spiritual seeker.

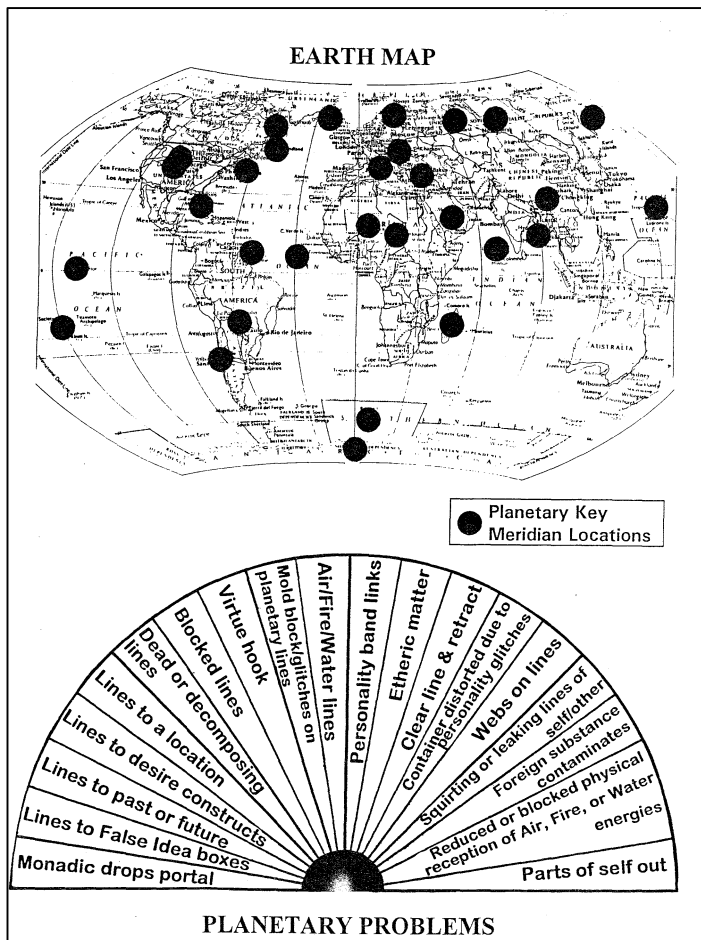

It is not necessary to consider the names of the known planets in order to understand the forces related to them.

The sun has all the forces of all the planets within it and has a spiritual connection to the North Pole. At the North Pole, the planetary forces beam upon the Earth, with air, fire, and water components.

Metaphorically, there are three circles within each other. The composition varies from year to year. During one year, fire may be the center circle, air the middle circle, and water the outer circle. The next year, water may be in the center, fire in the middle, and air in the outer circle. This is according to the Law of Seasons.

This year, air is in the center, water is the middle, and fire is the outer ring. Every ten thousand years or so, there will be a catastrophic composition of fire/fire/fire or another element repeated on all three rings. This puts great stress on the Earth and on souls.

The primary beam (containing the three rings) filters through the North Pole and appears on Earthly locations, somewhat like acupuncture meridians. *There are 23 primary points and seven minor points. The Earth is the mega-system, and each human body is a micro-system.* The identification of points on the human body is less reliable than identifying missing points on the Earth map in relationship to one's body. For instance, you may have a blocked Madagascar point that can affect several health problems or emotional problems. Many people have decomposing or dead lines of planetary force relating to the key map locations or the seven minor ones. There are also smaller points of lesser significance below the listed points that can relate to many map locations.

One should be able to dowse on a map where there are

Dead Lines
Blocked Lines
Leaking Lines
Lines to Future
Lines to a Desired Location
Squirting Lines from someone else or out from self,
Mold Glitches/pieces out that block lines,

Decomposing Lines
Webs on Lines
Lines to Past
Lines to Desire Constructs
Webs to False Idea Boxes

Foreign Substance Contamination on lines or on Mold;
Blocking lines

Portals (such as monadic drops) to other people who then
Throw planetary webs to you, or other causes.

If you have parts of self out (*Monadic, Desire Substance, Virtue Hooks, Etheric Matter, Personality Band Links, Air/Fire/Water Lines*) out to other people, then they can easily web into your planetary energy lines. You must destroy parts of self out and seek to reconstruct the matter.

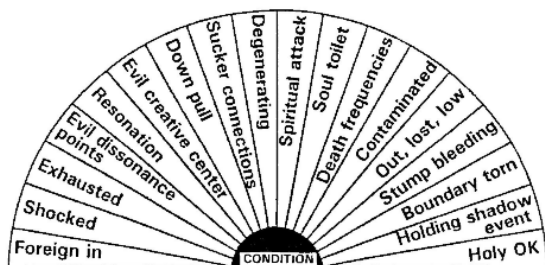

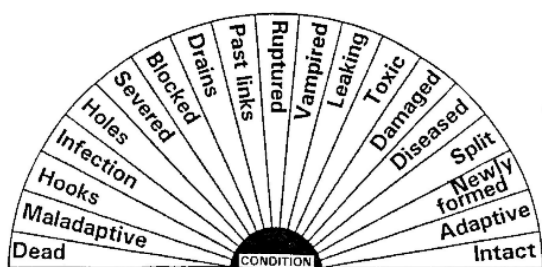

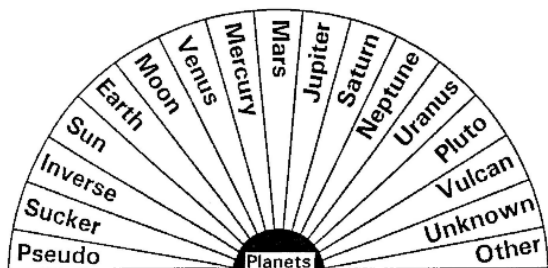

Go through the "to do" chart and waveforms chart to focus on the correct way to clear the portal. If you have lines directed to the past, future, a location, a desire world, or a person, then you must go through the charts to clear the line and then retract it back into your own system for healing. Then, you must pray and WILL for circulation of planetary energies of air, fire and water to resume in the location and in the down-line circulation as well.

You might find it helpful to dowse your percentage of over-all physical reception of planetary energies of air, then fire, then water. Focus on your worst score, while going over the map to find the key problem locations. Consider the Earthly map a template of your physical body.

If you have merely depleted one of the energies, then look at the associated map location and WILL substance to come into your eyes. Dowse the percentage before and after to determine results.

If you have a lot of power loss, then dowse over the following risk factors to determine causation:

1. Desire for old self, clinging fondly to a past time in life.
2. Injury of a mental or physical nature at a key year in life.
3. Desire construct of future self-created in the past that never panned out as reality.
4. Grudges.
5. False ideas or fantasies.
6. Romantic/sexual obsession in past or now.
7. Materialism causing energies to go toward an outcome other than the correct purpose.
8. Bits of mold left out, or damaged mold, due to any trauma.
9. Old monadic drips forming portals to obsessing people.
10. Desire to merge with others or for psychic abilities, causing eye squirts of planetary substance and a resulting mental or physical weakness.

When assessing the above problems and risk factors, keep in mind that you may need to view the situation from a yin and then a yang focus (or vice versa.) Also, if you focus on air, fire, and water separately, you will have a tighter focus to see disorder. It is like changing lenses to see better.

Blocked Planetary Lines can keep you from seeing the etheric color problems.

Blocked Etheric Colors can prevent you from seeing your personality/Virtue band problems. Each of these aspects of self must be viewed separately and together as a system if one is to have success in healing.

Genevieve

(Note to Gar): Some of this may be workable as a part of your Florida seminar, since foods have air/fire/water/yin/yang considerations. If you feed a person a missing or blocked type food, he will get better, although an unblocked person should be able to eat purely according to season and year influences. We will not be in tonight. Blessings. See you tomorrow.

27 AUGUST 1994 Chart Lists:

RISK FACTORS

<i>Desire for old self, clinging fondly to a past time in life</i>
<i>Injury of a mental or physical nature at a key year in life</i>
<i>Desire construct of future-self created in the past that never panned out as reality</i>
<i>Grudges</i>
<i>False ideas or fantasies</i>
<i>Romantic/sexual obsession in past or now</i>
<i>Materialism causing energies to go toward an outcome other than the correct purpose</i>
<i>Bits of mold left out or damaged mold, due to any trauma</i>
<i>Old monadic drips forming portals to obsessing people</i>
<i>Desire to merge with others or for psychic abilities, causing eye squirts of planetary substance and a resulting mental or physical weakness</i>

PROBLEMS: ✓ ON MAP

<i>Dead lines</i>
<i>Decomposing lines</i>
<i>Blocked lines</i>
<i>Webs on lines</i>
<i>Leaking lines</i>
<i>Squirting lines from someone else</i>
<i>Squirting lines out from self</i>
<i>Foreign substance contamination on lines</i>
<i>Foreign substance on mold blocking lines</i>
<i>Mold glitches/pieces out that block lines</i>
<i>Lines to past</i>
<i>Lines to future</i>
<i>Lines to desire constructs</i>
<i>Lines to a desired location</i>
<i>Webs to false idea boxes</i>
<i>Portals (e.g. monadic drops) to other people who then throw planetary webs to you</i>
<i>Other causes</i>

NOTE:

Corpse Sound deviations change the Mold shape.

Trait Sound deviations change the Etheric shape.

Checking the percentage of deviation of Mold and Etheric give an indirect reading of the Sounds and Traits.

The 10 Traits are like the Corpse Sounds of the Etheric Body.

Check the percentage strength of anchors of Father, Son, Holy Spirit and Our Lady

Check the % of Virtue Creative Downline Desire Substance has not been eaten by demons.

How open are your Trait doors? (Should be closed).

LESSON AUGUST 28, 1994: Traits, Apertures, Group Contamination

ORIGINAL TEXT referencing Chapter 8, *Advanced Esoteric Dowsing Book III* (Some charts excerpted)

Traits, Apertures, and Group Contamination

In order to fully comprehend this series of lessons, you must consider that your aura and that of the Earth are similar, with ringed components extending outward. *Consider that the Personality/Virtue Band is inside the Etheric Color Ring and that the Etheric Color Ring is inside the Planetary Forces Ring. The Planetary Forces Ring is, in turn, inside the Trait Ring.*

In the past, these teachings have referred to traits as aspects of colors. The trait ring we are referring to, however, must be viewed from the perspective of distinct shapes. There are ten shapes that are correlated with body/auric/aperture locations and with key map locations.

TRAIT DOORS

		
Trait 1: North Pole - Tailbone	Trait 2: South Pole - Sexual Organs, L-4	Trait 3: Niger - Navel, L-2
		
Trait 4: Java - Lehy's, chest, T-3	Trait 5: Australia - Throat, T-1	Trait 6: Iceland - Brow, C-2
		
Trait 7: Leningrad - Pineal	Trait 8: Djakarta (near Java) - Desire Container	Trait 9: Congo - Eye of Soul
		
Trait 10: 10° under Galapagos Islands above Easter Island - Thread to Logos		

Trait Doors Chart and Problems List

The traits are Logoic power doors existing on Earth and in the body/aura of an ensouled person. Blocked trait doors can cause the spiritual forces within a person to dry up and wither unless the soul ruptures. If someone ruptures their soul, then the rotting trait doors pollute the environment for up to one year unless the debris is removed.

Since people pollute their trait doors due to weaknesses, the rotting trait doors can cause spiritual resonation problems for all in the area. The rotting trait door emissions can float over space if a person thinks of you. If you hook into a person with a rotting trait door, then you may spiritually weaken. If one of your trait doors is rotting, then you will feel depressed or agitated.

A common symptom is a song being played over and over in your head relating to a key topic of weakness in the person who has a rotting trait door. Circular thinking, a sense of hostility, emotionalism can all indicate a rotting trait door in yourself or in another person who is near you. If your contamination is severe, then your body tissues will dowse as evil on the Law clock (torqued away from the first thirty degrees of spiritual alignment.)

If you dowse as having **Extra Traits** over the ten, then you may have rotting trait door bits from someone on some part of your aura. They can float to any auric location.

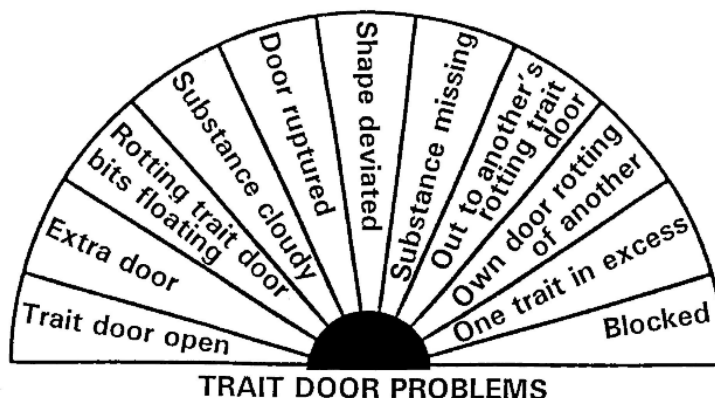

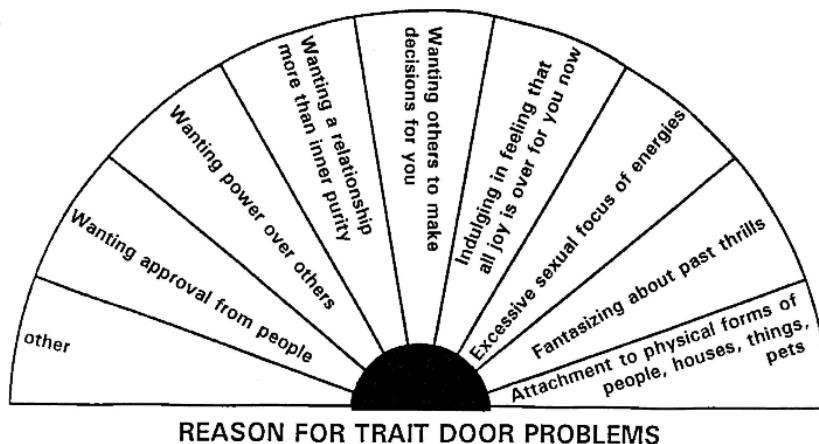

You can dowse the percentage of substance intact and clarity of trait substance while viewing the symbols, the associated body/auric/aperture connections, and the Earth map alignment links. If you have a rotten trait, then you need to go through the "to do" charts, waveforms, and pray for healing.

You should also evaluate whether you have fallen prey to the following weaknesses:

1. Wanting approval from people who hate Law and lack balance of Virtue or who are soul-less.
2. Wanting power over others.
3. Wanting a relationship more than inner purity.
4. Wanting others to make decisions for you.
5. Indulging in feeling that all joy is over for you now.
6. Attachment to physical forms of people, houses, things, pets.
7. Excessive sexual focus of energies.
8. Fantasizing about past thrills.

You can find other risk factors if you check yourself over the soul blocks charts and recheck the Universal Law test. Many people start to erode because they feel sympathy for someone who has Law deviation and so drip monadic eye substance on the person, forming a portal. The dripped-on person will feed thoughts and desires to the dripper for up to a year, unless the portal is removed.

Your trait problems are due to personal weakness or merging with people of weakness. After the traits distort, then the apertures necrose, and then the monad goes, too. It is imperative to undergo fierce self-examination, so as to remove weakening factors and heal the trait doors in yourself.

LESSON AUGUST 29, 1994: Sub Personalities on Mold/Shape Distortion

Sub-Personalities on the Mold and Shape Distortion

Many people lose their true identities and even their souls by disorders of their auric mold. The auric mold is a mysterious and complex part of self that can persist in perverse form even after soul death. A distorted mold may take on an animal archetype that relates to the primary weakness of the owner.

It should be the goal of every spiritual student to purify the mold so that it reflects the image of God and not the image of a werewolf, yeti, or carnivorous bird. In order to do so, one must understand the different aspects of the mold, its history, what corrupts it, and what heals it.

All people who had a soul at birth (or within three days after birth) have molds, even if they have blown out their souls. The molds of animals and those born as animal men or Nephilim are not in the same category and should not be considered in the context of this lesson.

To “blow” one’s mold is to lose its divine shape and take on the shape of lower creations, such as animals or monsters of evil intent. In truth, the actual substance of the mold is still present, but is hard to see from a holy perspective without recoiling in horror and shutting one’s spiritual eyes to avoid trauma. Therefore, the evil part of a person’s mold may drowse as being “gone”.

There are three mold components that correlate with air, fire, and water (and conversely Holy Spirit, Father, and Son). Any of these can be contaminated if any auric part of yours is extended to a person with a contaminated mold. For instance, you may send a desire tendril to someone who is full of mold hate poison and thusly infect your mold, your etheric body, your corpse body or any other part of your spiritual anatomy.

The purpose of a Mold is to bring higher Logoic aspects into the lower realm of creation, so as to advance holiness. Holy Desire and Divine Love enter through the water layer. Therefore, joy of living within Divine Plan is enhanced through clarity of the water aspect of the mold. The power of merging with Logoic Will is brought into form through the fire component of the mold. The ability to use divine forces (such as the Virtue Blast or Four Forces Blast) is dependent upon the fire component of the mold, which links with the tongue and pineal gland. The ability to have Gnostic awareness is linked with the air component of the mold.

People without such molds can choose to live decent lives and help to make the world a better place, although they will not be able to survive physical death with a consciousness. The ability to transfer full awareness is dependent upon a mold and its “seeing eye”: the etheric body.

The Etheric Body is the Mold Eye. It will degenerate if it looks with desire upon people who hate Law. It will degenerate if it entertains mental arguments contrary to Law. It will degenerate if the owner seeks to create his own reality instead of submitting to Divine Will. ***The etheric body only exists where there is a holy mold.*** It will rot if the mold becomes shaped contrary to the Divine Plan. The etheric body follows the thoughts and desires of the owner.

Thoughts and desires of the owner are affected by the condition of the mold. The condition of the mold must be considered in three parts.

The water component has a strong planetary Venus aspect. If the mother of an ensouled fetus entertained malefic desires, then she would tend to poison the mold of her baby. In particular, hate is a strong poison to the water mold, which is supposed to be the carrier of Divine Love. Hate is like salt in a fresh water lake. It will kill the life of the water mold. The salt poisons the Venus stream of Holy desire and kills the life of the stream.

If you send a desire tendril, monadic drip, or any other part of yourself to a person who has distorted his water mold with hate poison, then your mold will start to distort, as well. You will become infected with anti-Son of God hate infections on your mold. *This can be measured* by a “percentage of mold infected with desire to die/or to kill”. Many of these come from sexual contaminations. It is possible to drowse the degree of such poisonous desire to die or kill, at birth and where you are now.

Each hate infection has an eye that must be beamed with a dead space energy to destroy. One helpful question is “*How many evil eyes are on my mold?*” Or “*How many portals do I have to or from people with evil eyes on their mold?*” Such evil eyes have an “Aqueous Anti-Vitae Substance” within them that poisons the mold and eventually the intentions, thoughts, and desires of the owners.

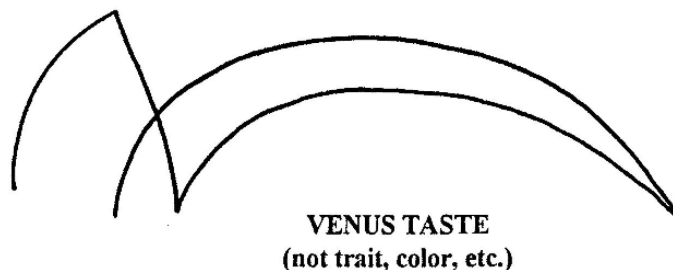

If the water/Venus layer of the mold becomes evil, then Holy Beings cannot fill the owner with Divine Joy. Life may seem painful and the path of Truth too hard to bear. Indeed, such a sense of joylessness on the path of Truth is a symptom of water mold deviation.

Frequently the water mold deviation starts out as lower corpse lines of energy out to malefic people. *Corpse Desire Lines to People, the Past or Falsely Perceived Concept/Sucker Worlds* start as mere thoughts or emotions that are entertained by the owner. The corpse energies that commonly have been thought of as the pranas can then send out

substance to people, movie stars, or self in the past and thus weaken the body of energy. **Depression and weakness** may be perceived as more corpse water/prana lines go out of the body. The lines to malefic people then feed upward to the etheric body and mold, causing decay or distortion.

The mold water aspect is a higher form of water energy than water prana, and should not be confused with corpse energies. The key thing to remember is that a person with poor physical self-control, who tends to circular think or go into emotional outbursts, will tend to lose prana first and then infect his mold later. He first loses lower stability, and then the ability to maintain higher consciousness.

There is a symbol of the water aspect of the mold relating to a higher aspect of the sense of taste. It looks like the:

MOLD COMPONENT		LOGOIC ASPECTS BROUGHT INTO FORM	HIGHER SENSE	PHYSICAL CONNECTIONS
Fire	Father	Merging with Logoic Will, Ability to Use Holy Forces	Touch	Nose, Tongue, Genitals
Water	Son	Holy Desire, Divine Love, Joy of Living within Divine Plan	Taste	
Air	Holy Spirit	Gnostic Awareness	Hearing	

Each of the mold layers relates to an aspect of the higher senses (not the corpse senses).

Water relates to Taste,

Air to Hearing,

Fire to Touch,

*While the **Etheric Body** is the Eye.*

One of the most severe reasons for mold deterioration is due to sexual mixing with someone who does not want a soul or who is defiling to God. Unfortunately, sexual residuals resulting from contacts that occurred months or years before may still form portals for mold infections if they are not cleared.

Air disturbances are often reflected by hearing defiling thoughts in one's head, or thoughts that are clearly against Law. For instance, if you find yourself arguing the position that a soul-less person has taken against lovers of Law, then you have allowed an air problem on your mold to develop. There is never a reason for mentally going over and over in your head what a hater of Law must be reasoning. You risk being pulled into their logic, which is always materialistic and NEVER aligned with "God's will be done".

The position of power is always in the Now with full acceptance that the mysteries of Divine Plan may elude you, and yet you submit your thoughts and feeling so that Plan. Many of you are tormented with the thoughts of people who should not matter to you at all. You entertain such thoughts as rational, and so corrupt your air mold.

If your air mold is corrupted, then you cannot hear with the gnosis of the Holy Spirit, so you will tend toward intellectual games to fill the void. You will tend to form *Egoics, Sucker Worlds, and Desire Constructs*; all with a sense of pride in your own lower intelligence. In reality, your wisdom is measurable to the degree that you have submitted your mental faculties to the Holy Breath.

The Anti-Lehys Statements, which shall be repeated at the end of this chapter, are examples of infected air mold statements. The question, "*How aligned is my air song with the Logos (in percentage)?*" may give some indication of disorder on the air mold. Many people's air molds were impressed with defiling thoughts at birth, and so need healing by the Holy Spirit. The degree of birth distortion can be measured.

Sub-personalities occur when the air mold is infected with lines from or to other people. You can dowse the number of sub-personalities. If you dowse as having NO personality, then you might have ruptured your air mold, or be merely hanging off of someone else's personality. **Personality** is largely dependent upon words that are repeated in one's head. For that reason, be careful about whom you merge with, and whose arguments you entertain. Do not be the devil's advocate, lest those arguments pollute your air mold.

Poisonous air mold exudates floats out of the lungs. For that reason, you should avoid close physical contact with people who are full of anti-Lehys mental arguments. Of course, if you send one corpse water line to such a person over many miles, you can infect yourself as well. *You should remember to check your corpse air, fire, and water amount out and foreign in.*

Emotional neediness is often a sign of water loss of a lower level or mold distortion level. A desire to be in control of others, to be in charge, or to be appreciated may also indicate a water weakness of a low or high type. If you create many corpse water, air or fire lines to Law-haters, then your corpse body will dowse as severely torqued away from the Logos on the Law clock.

Sexual fantasies often will corrupt the fire mold and the corpse fire prana. The mold and corpse fire aspect have connections to the genitals, nose and tongue. If this aspect of mold becomes contaminated, then you cannot do spiritual healing or draw in holy beings to assist you. The fire mold has a higher sense of touch, and the nervous system is often affected adversely if the fire mold is corrupt or if fire prana lines are out to malefic people from the lower corpse body.

Fire elementals of a disordered nature feel like physical nerve pain to a person with a highly refined fire mold component. Many people have dulled their fire mold, therefore losing spiritual power, so that they feel comfortable around disharmonious people. There are ways to adapt to a corrupt society without becoming one of the corrupt. It is the challenge of the spiritual scientist to find methods that are aligned with Law and Virtue, and not merely to avoid pain by dulling the spiritual nerves.

Your ability to use spiritual forces is equivalent to your ability to perceive spiritual disorder (pain) through your fire mold. Your ability to endure discomfort is equivalent to the degree of your lower submission to divine will, the bringer of holy Fire.

People who were born without molds can still be holy, although they are often attracted to spiritual work through a desire for a loving extended family or a fear of hell or soul loss. Such people can become severely contaminated by people who have distorted molds and they suffer terribly, unless cleared by a person with some power. Dogs and cats, as well, can become infected in their corpse bodies by air, fire, and water lines that carry the deformed mold programs of humans into their bodies.

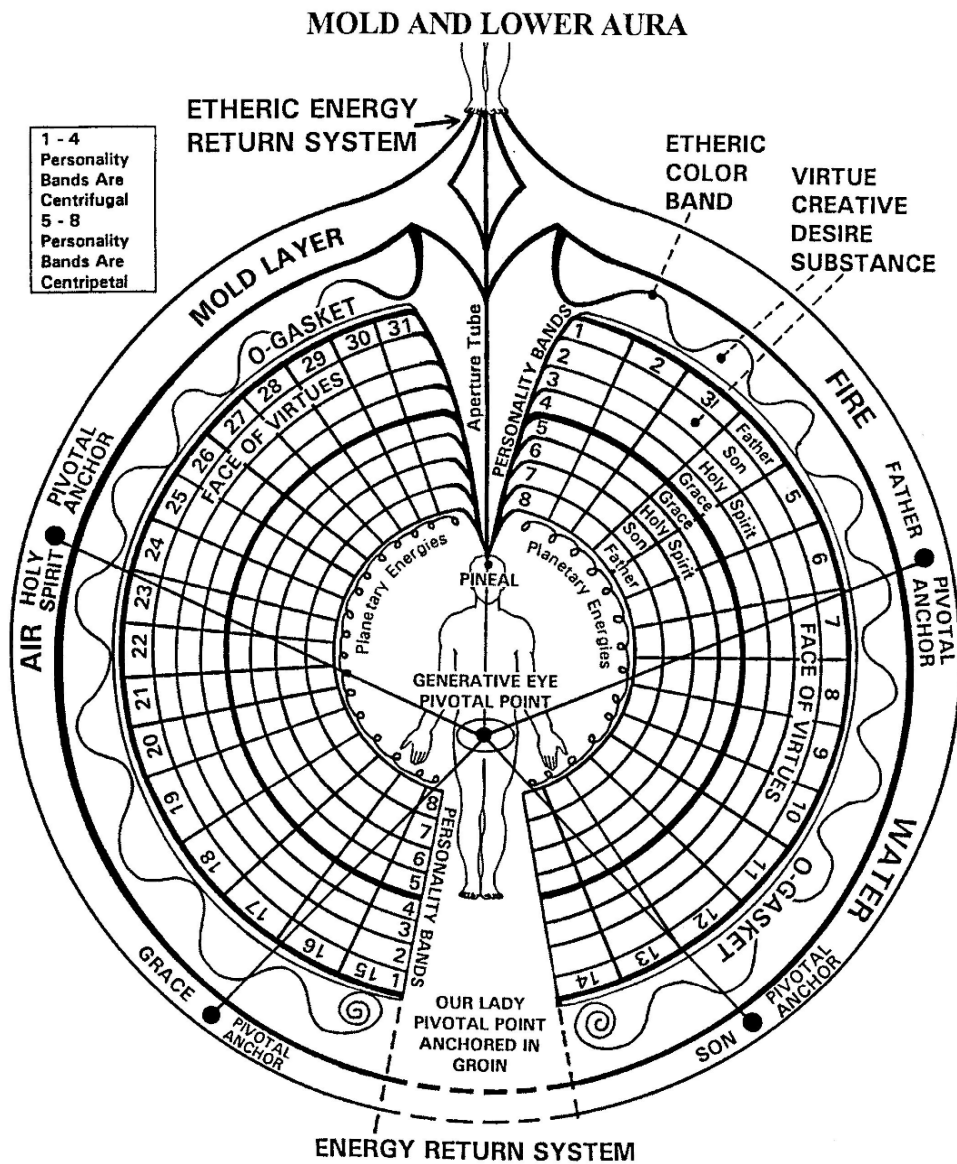

Most mold disorders start with prana disorders, such as air, fire and water lines coming to you or out from you to others. This in turn, tends to cloud the etheric eye. The etheric body then stumbles in darkness, and becomes ill with the malefic patterns that have moved upward from the corpse. As the etheric body becomes diseased, the mold suffers.

All of the auric layers, such as the Personality/Virtue Lines, Etheric Color Bands (not to be confused with the Etheric BODY), Planetary Energies, and Trait Doorways interact dynamically with the auric components mentioned here. ***Although they are depicted in a two-dimensional order, they all exist in the same space, and must be considered as part of the same system.*** Just as the human body has within it a nervous system, a circulatory system, and integumentary system (skin), a gastrointestinal system, a genito-urinary system, and so on, so does your spiritual anatomy have many aspect of self.

By KNOWING that your real self is that spiritual self, and not your lowest common denominator, the corpse, then you will be able to transcend death.

ANTI-LEHYS STATEMENTS

Lehys ("Lingkhaz") is a man.	Lehys is causing me (or someone) to go crazy.
" is a woman.	" does not exist.
" is a person.	" is a thief.
" is a ballbusting, castrating bitch.	" is a nobody, is ridiculous.
" is trying to take away my manhood.	Lehys pretends (or lies.)
" is a pervert.	" is cruel.
" is the cause of my suffering.	" is a witch/sorcerer.
" is the cause of someone else's suffering.	" is the source of my loneliness.
" is a fool.	" is the reason I will never find love again.
" is crazy.	" hates me.
" is lazy.	" is no fun.
" is evil.	Murder Lehys.
" is a bad mother (or father.)	Let the world know about the evil Lehys.
" is dead (or dying.)	Rape Lehys.
" is going to die.	Torture Lehys.
" is worthless.	Lehys is my romantic lover.
" is a whore.	Lehys is a homosexual.
" is punishing.	I don't want a soul.
" is killing me (or someone else.)	I hate Lehys (thinking of your self in the past).
" is ruining my life (or has ruined it.)	I hate Lehys (thinking of your self now).

LESSON AUGUST 30, 1994: Pranic Power Loss and Container Distortions

Pranic Power Loss and Container Distortions

Air, fire, and water prana loss is often due to distortions in the corpse auric container. Ideally, the air, fire, and water auric bands (relating to lower prana) should have no balloons or bubbles that contain types of infected desire matter. For many people, auric cocoons have deformed into an "elephant man" type of distorted shape that drains energy from them.

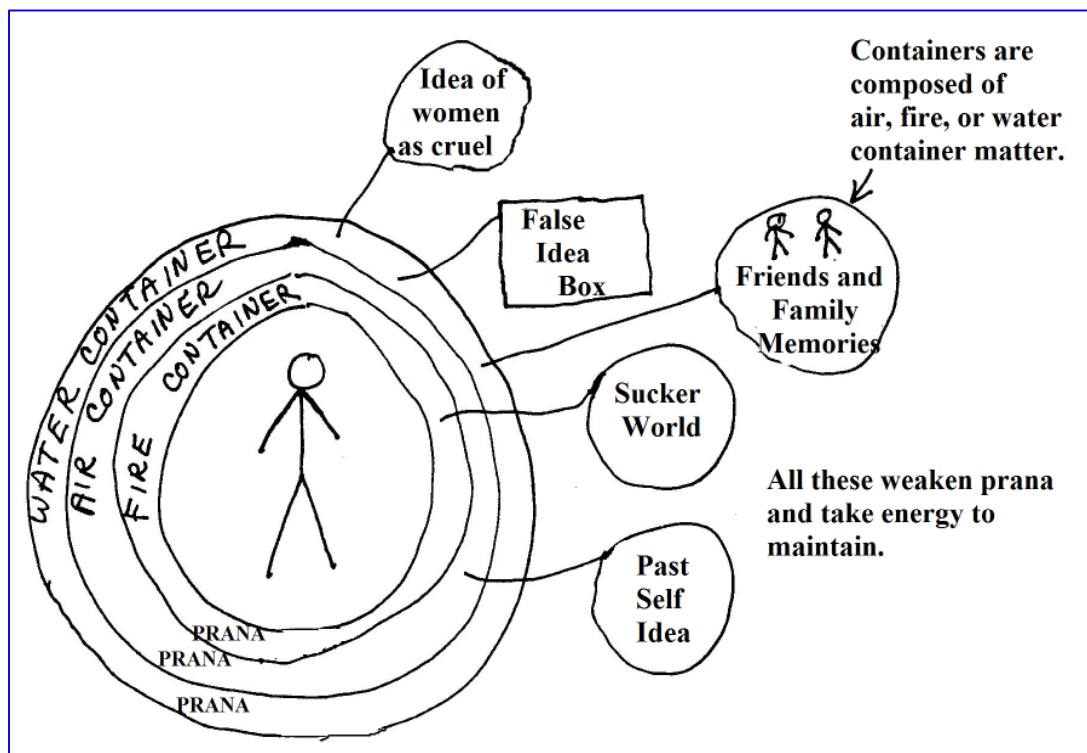

Some of these lumps contain false concepts of people or self. The same idea or malefic song plays continuously out of that auric lump, reminding you of its signature concept or person. **These lumps are composed of container matter** and are not mere blobs of pranic desire globules. For that reason they are harder to remove and more difficult to see.

They are like cysts under the skin that swell up from time to time. Some of them are in the shape of false idea boxes, sucker worlds, pseudo worlds, or even of little dolls of human beings that you have known. You can dowse how many air, fire, or water lumps you have (of any shape) and then go about removing them. If you fail to remove them, then you will lose prana in feeding the "animals in the cages" of the constructs, and disorder will crawl out of them and upward, poisoning your spiritual matter further.

Go through the "to do" chart, waveforms, body parts, and other charts to try to get rid of what is inside the cysts. Then, the container distortion must be blasted with the four forces, if you have enough power gathered. You might have to do the blasting of the four forces after getting clearer by other dowsing, since it takes the most clarity. Also, pray for divine intervention.

(T3) and I will look in on each of you today for the worst distortions, and seek to help you.

LESSON AUGUST 30, 1994: Aperture Lines and Monadic Weakness

(Re: Chapter 3, Advanced Esoteric Dowsing III)

Aperture Lines and Monadic Weakness

The **Apertures** are aspects of the soul windows. If a window is left open on the wrong day, rain may get in your house. If an aperture is opened for the wrong reason at the wrong time, then you will drop monadic substance out the window.

The **Eye of the Soul** must be considered the highest aperture, because it truly sees all that is below it. If the owner looks upon other people (or past self) with any emotion or thought that is anti-Virtue, then the eye weeps. The tears then form portals to the object of thought or emotion.

If an ensouled person embraces materialistic values, and fails to trust that his needs will be met if he lives according to Law, then his holy being aperture will rip, as the guardian angel recoils.

If an ensouled person lets another human run his life to avoid conflict, or desires to create a personal reality, then his Father Will aperture sends out feeder lines to other people or false idea constructs. Out of those lines, monadic substance drips.

If an ensouled person merges with a spiritually bereft group, movie, book or companion, then his Son (throat) aperture will lose its sound and take on other sounds that are not holy. When this happens, holy desire becomes replaced with lower desires that slip to lower apertures or locations.

If a person desires with his heart, rather than his throat, then his Lehys aperture sends out malefic desire tendrils to other people, the past, or sucker worlds. When this occurs, monadic substance flows out the lines. He then hears the sirens of those he chose to desire, rather than the still small voice of the Holy Spirit.

One can dowse the percentage of intactness of each aperture, how many lines or portals are causing monadic substance loss, and whether the cause is due to not aligning the "*See, Trust, Desire, Think, Intend*" aspects of self with divine plan. Many resulting contaminations can be put through a "freeze and disintegrate" waveform for removal.

Each aperture should be checked for percentage of openness, and whether the aperture should be activated at such a time. In most social situations, the apertures should close. If you find yourself feeling emotional, then check for the above conditions.

Genevieve 8-30-94

P.S. I would like to thank A for the wonderful new fax machine, which will make Gar's life easier. We will soon be using the 282-3066 for the "talk" line, and the old line for pure fax stuff. Also, thanks to B and C for their donation in Vermont which will finance the mail out and the new hard drive we had to have for the computer. We are going to try and finish dowsing book 3 in the next week and send out flyers to everyone on the dowser's list. I figure they will start to use the material in their classes and the authorities will not be able to do anything if the speakers don't say where it is from. The tendency of dowsers is to ..., so that's fine with us. It will get the information out. *I consider the Vermont conference a success, and appreciate everyone's effort.* (T3) and I worked on everyone's mold today. Blessings.

DOWSING CHART:

AURIC MOLD: When distorted, may take on an animal archetype form relative to the primary weakness of the owner.

-Need to purify the auric Mold to reflect the image of God.

-Ability to transfer full awareness after death is dependent upon the (refinement and purification of the) Mold and "Seeing Eye"/Ethereic Body

ETHERIC BODY: Is the MOLD EYE

It only exists with a Holy Mold

It follows the thoughts and desires of the owner (affected by the condition of the Mold A/F/W).

AIR MOLD (Holy Spirit) Gnostic awareness HEARING

FIRE MOLD (Father)

Ability to use Spiritual forces is equivalent to perception of disorder (Pain).

Ability to endure discomfort is equivalent to lower submission to Divine Will, Holy Fire.

Power of merging with Logoic Will; brought into form. TOUCH/Nervous System

Ability to use Divine forces (i.e. Virtue Blast/Four Forces Blast) dependent of Fire component

Links with tongue and pineal gland

TO DO spiritual healing/draw Holy Beings to assist you

WATER MOLD (Son)

Holy Desire and Divine Love enter here (joy of living): planetary VENUS/TASTE aspect.

When evil, the Holy Beings cannot fill the owner with Divine Joy, and life seems painful.

Problems

- "Gone" "Etheric Eye Rot/Clouded/Diseased" "Sexual Residuals" (Months/Years Ago)
- Auric part extended to another (Check: Torque, % Corpse AFW amount out and foreign in:)
- Desire tendril to one with "mold hate poison"
- Infected Etheric Body, Corpse Body, other Aura
- Dogs/cats corpse bodies infected with AFW lines
- Check Personality/Virtue/Etheric Color Bands/Planetary Energies/Trait Doorways/Other
- Etheric body looking with desire upon people who hate Law.
- +entertaining mental arguments contrary to Law
- +seeking to create own reality vs. submitting to Divine Will
- Water Mold: poisoned by malefic desires/HATE
- Desire tendril/Monadic drip/other out to a person with hate poison
- Check "% of Mold affected with desire to die/kill" (Check "at birth" "now")
- Each Hate infection has an Eye that must be beamed with dead space to destroy.
- "How many evil eyes are on my mold?"/Emotional neediness
- "How many portals do I have to or from people with evil eyes on their mold?"
- Check "aqueous anti-vitae substance" within the Evil Eye (poisons thoughts, intentions and desires of owner)
- Sexual contaminations/Desire to control others (lo/hi type)
- Lower corpse lines of energy out to malefic people/past/false concepts/sucker worlds
- out to people, movie stars, self in the past (depression)
- Circular thinking, emotional outbursts, loss of lower stability/maintenance of hi consci.
- Air Disturbances: hearing defiling thoughts or thoughts against Law
- Circular reasoning of materialist/ Not in NOW/ Not submitted thoughts and feelings
- Thoughts of other people/Intellectual games/Anti-Lehys statements
- "How aligned is my air song with the Logos (in %)?
- "Defiling impressions from birth" (check % distorted)
- Sub personalities from lines to/from/hanging off of people (dowse #)
- Merging/arguments entertained (words repeated in head)
- "Poisonous Air Mold Exudates" floats out of lungs. (Physical proximity/corpse W-line)
- Fire Mold: Sexual fantasies (genitals, nose and tongue)
- Feels like physical nerve pain/discomfort around disharmony.

LESSON AUGUST 31, 1994: Reaching the Goal of Mastery

Original Text Advanced Esoteric Dowsing III

Reaching the Goal of Mastery

In every educational system, the student should consider the desired outcome before proceeding further. In this series, the desired outcome for the spiritual dowser should be to attain mastery of principles which will enable him to understand the Logoic Plan.

Within the struggle to attain such personal mastery, power can be gained to help humanity at large to achieve a more refined level of spiritual evolution. It is within the context of Divine Plan for the student of Truth to help others who struggle on the path.

In order to struggle on the path to Logoic Truth, one must first have defined standards which will beam as lights ahead. The Laws and Virtues are the standards.

In order to reach the illuminated outcome of mastery, then one must be *strong* enough to travel, *know* the way, and *desire* the journey. Those aspects relate to Divine Will, Divine Intelligence, and Divine Love. If the student lacks even one of those key ingredients then he will fall in a ditch along the way.

He may decide that the ditch is lovely, and that the end of the journey has been reached. He may look scornfully at people struggling past his ditch, and call out to them to join him in his pretty ditch.

He may stop his vehicle in the middle of the spiritual road, deciding that there is really nowhere to go at all, that all he has to do is assume that he is perfect, and he will be perfect. In doing so, his vehicle rusts, for lack of use. **The Law of Change is immutable**, in that a person must (while in flesh) struggle to understand the divine; Gnosis is gained by the worthy. To be inert is not to be worthy...it is to be dead.

Truly, there is an aspect of struggle that must be endured if one is to achieve great mastery. This is true in the study of music, mathematics, art and spiritual science (most of all). Just as the Olympic athlete feels the pain of strained muscles, so must the spiritual scientist endure some discomfort of awakening spiritual organs of higher sight, touch, smell, and hearing, if he is to succeed.

There are technical aspects of spiritual science that have long been ignored by the masses. *As a result, people have become lazy, and expect the heavens to rescue them from their own disorder. The definition of disorder and order must be first understood before any refinement of the spiritual senses can be gained.*

As one advances, the definitions of order and disorder become more subtle, and yet nuances of disorder become more distracting and painful than ever before. Eventually, the spiritual scientist becomes unattached to pain or comfort, and finds great joy in his success on the path to Logoic Wisdom.

There are many reasons that people fail to succeed in higher teachings, such as these. A general scale could be dowsed by the following question, "How open am I to the Plan of the Logos?" If you think of complete openness of every aspect of your lower and higher self as 100 percent, then you may be able to dowsed the degree of closure of self to Divine Plan. The reasons may vary, and will be found in these teachings. In general, it may indicate that some part of you is not open to Divine Plan or has communication problems between flesh and Logos.

Consider your personal identity as a car on a highway to a desired destination (mastery of self to the degree of complete understanding of Divine Plan.) The percentage of the trip finished would be your standard. It is possible to be further along on your trip one day than the next day, if you should get side-tracked.

There may also be bridges that have been destroyed on the highway to the Logos. This would relate to parts of your personality that cannot bear the weight of Truth. You can dowsed how many bridges are out, and refer to the personality lessons to see what to do about it.

There might also be side-roads that lure you down false paths. These are common in people that compare all teachings with each other. In order to fully gain awareness, you must see these teachings with new eyes, and not try to weave a lot of other paths into them. If you try to do so, you will get side-tracked, lose energy, and may never make it to the desired destination. If you dowsed that you have a certain number of side-roads on your spiritual paths, then read the teachings on the seven evil doorways, and about sucker worlds, pseudo-worlds and false idea boxes.

If your self-concept is heavily influenced by what other people think or say, then you will be confused on your journey as to the way to go. It is as though other people are trying to read you their maps, which may apply to a different destination than you desire. These can be located by dowsing, "*How many names do I have while on this path to Truth?*" If you don't stop the babbling voices which blur your own holy (inner) name, then you can't keep your concentration while traveling.

In some cases, people float off the road, losing their sense of spiritual identity (personal holy name.) They may not take on another person's name, but may feel overwhelmed, and lose the grip of their personality wheel (name), and not be able

to control the vehicle. The whole vehicle may be sucked into a whirlwind of societal contamination if a person loses his grip on his own spiritual name. *"How tight am I holding onto my own name while on the Logoic path in the Now?"* is one question to dowse.

"How many eyes do I have that are in the past or future?" is another question that may reveal whether you are driving in a circle of self-reflection or a circle of fantasy. If you drive in a circle of imagined outcome, fears, or desires, then you cannot be perfectly in the now in your spot in the road. **Your eye must be single, straight ahead, and relentlessly following the path before you. It is a paradox, yet true,** that one must be perfectly in the Now to advance. If you project your energy to the future, it is as though you have squirted your car's gasoline ahead of you, and so run out of gas. If you look to the past, then you squirt your gasoline behind you, and so run out of gas.

A word of wisdom is to do the work that is in front of you. Many students desperately try to look ahead or behind them to figure out the plan of God. In fact, your path is right in front of you. It may manifest as something quite simple, like raising flowers for the market, while considering the beauty of creation. You could debate the worth of raising flowers, in the scheme of human destiny, and yet it may be the very thing you are to do in order to spiritually advance. You may need to mop floors in a hospital, while viewing physical and spiritual disorder, in order to gain humility and understanding of the human condition. You may pray to serve God, and be given a simple task that seems worthless, and yet can change lives (first of all yours.)

Some people get discouraged on the path to Truth, and dig a hole in which to crawl. This can be measured by *"To what degree do I desire soul death?"* In other words, how much of your consciousness has crawled into the death hole? A difficult situation can exist in a family if one member desires soul death, and also desires to pull the other family members in his death hole to keep him company.

Some people's vehicles have too much dirt on the windows to see out. This relates to the etheric colors being weighed down by the dirt of disharmony of people in the vicinity or self. The dirt is often composed of rotting bits of spiritual matter. These windows can be measured for clarity after studying the chapter on etheric colors.

Some people want to drive more than one vehicle at a time, and so dangerously straddle other people's identities. This is due to wanting to BE another person. **"How many people do I want to be?"** is something each dowser should ask, for it will demonstrate a divided purpose on the road to Truth. In some cases, people let others drive their cars and run their lives, often wrecking their spiritual vehicles in the process. *"How many people are trying to drive my spiritual vehicle?"* is a key question.

In some cases, people have **Genetic Dips** in the road to Truth. They tend to slide down to those dips during times of stress. Many people crawl out of those dips with great courage, and continue to struggle uphill, against the dip slant, toward Logoic Truth. They are heroes. It is possible to dowse the number of such dips and to heal them with spiritual science methods.

"How many heads do I have that are doing my thinking?" is one question to ponder, if you want to travel with a clear mind. If one tries to drive a car like Medusa, looking in every direction, with different arguments going at once, then you are unlikely to make any progress. This defect is usually due to having pranic air, fire, and water lines out to other people in a vice-like grip. Such pranic lines can be as solid as a wrestler's arm. The consciousness of the other person is always present in such cases.

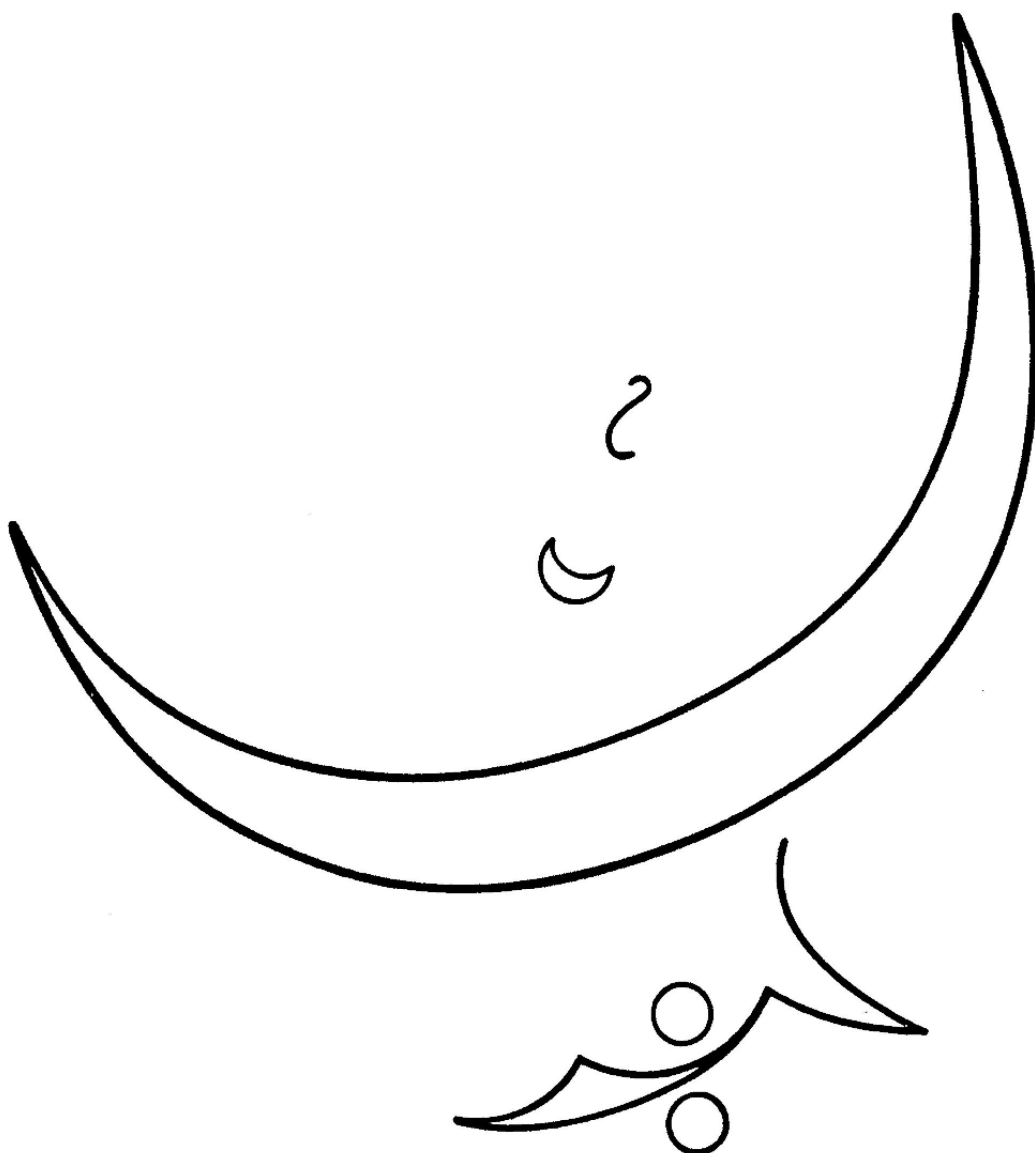

Some of the worst forks in the roads are due to paths forged by fallen beings. They may be fallen angels, Asuras, fallen demigods, or even humans. If you dowse that you have such forks in your road, be sure that you are not driving down such a fork, or even peering down such a fork. Such tangents can lead one forever astray, but they often appear quite lovely.

You will not be led down such false forks in the road if you keep your lower self from being so polluted that you cannot sense, with every muscle and nerve, what is True or not True. The dowsing response cannot function if there are body blocks of an air, fire, or water nature. *"How many body blocks do I have that prevent me from traveling toward Logoic Truth?"* should be asked by every serious dowser before doing any higher dowsing.

All high level spiritual dowsing is dependent upon the dowsing response being accurate on a coarse body level of air, fire, and water. Otherwise, the muscles will not respond accurately. Foreign air, fire, or water pranic lines from other people will block a clear dowsing response.

Spiritual science is the highest challenge for the dowser. It must continually evolve, as the path advances toward greater refinement of Logoic understanding.
