Introduction

There are people on the Earth today who hunger for knowledge of the mysteries of life. They may have sought to satiate their thirst for Truth through paths of science, art, philosophy, psychology, religion, or social services. Many, at the close of a long career in such fields, hear the hounds of death at their heels while their spiritual bellies ache with emptiness. They go to their deaths longing for the unknown, trembling with angst.

It may seem preposterous for this book to presume to fill some of that void by bringing to the reader the fundamentals of the natural Laws of the soul. Indeed, few people have ever considered that the soul of man has a type of matter, not unlike his flesh, although existing in a different octave of being. Few people are aware that there are principles, similar to known physics principles, that control the dynamics of spiritual matter. Furthermore, such spiritual Laws have a watershed effect upon the physical body of man and the Earth.

Looking out upon the sea of disorder within the major cities, one cannot help wondering why violent crime is becoming increasingly prevalent, and what could bring it to a halt. During the sixties the cry of liberals was for more social services, as though money or food could be the panacea. Others cried for gun control, more prisons, or other material solutions. Despite all attempts at controlling societal disorder the ghettos swell with violence, and the traditional family structure is almost gone.

There are some idealists who look into the heart of this disorder as though it were full of signs of wonderful societal transformation for the better. And yet, teenage pregnancies, AIDS, infections, robberies, rapes, and murders all continue to increase in number. By what criteria are these idealists measuring their success?

If one looks back over recorded history, pockets of societal peace and order rise out of the pages with haunting similarities of belief systems. Within each religion can be found keys that lead to the inner teachings of the fundamental Laws of the soul and of life itself. The fighting between religions has been due to clinging to differences rather than searching for similarities. The obvious similarities are merely echoes of the underlying mysteries which have traditionally been reserved for an inner circle of the spiritual elite.

The knowledge of the inner mysteries of life, held within the core of each religion, was withheld from the masses because of the danger of sorcery if the principles were applied without integrity. Any power that can transform a man's soul can also destroy his body if directed with malefic intent. It was safer to allow the alchemical mysteries, which were the core of each religion, to be watered down in a harmless fashion, in a way that could possibly change man's behavior through fear or promise of heaven. It was assumed by the spiritual forefathers that a man who lived decently might learn to think decently. If a man thought in a decent manner, then, later he might be able to control the spiritual forces with integrity and not run amok with unbridled passion.

For this reason, most religions focused upon behavioral instructions, rather than the reasons that certain behaviors could block the path to spiritual power. People have, by and large, decided that the behavioral instructions are no longer valid and so have developed many blocks to the higher teachings.

It is now time to reveal the inner teachings, in hope that humans can understand the reasons for behavioral sanctions and thought control.

The Laws are immutable. Man cannot break these Laws, but can break himself against these Laws. This is happening today on a massive scale. A man can tell himself all day long that fire is not hot, and yet burn himself, should he put his hand in a flame. Just as there are lower laws of the visible component of fire, there are higher Laws of the unseen components of fire. Many a man has thrust his own unseen components into fire and burned away part of himself.

It is possible to heal oneself through the application of higher Laws. If humans can bring healing order to their own lives, then they can begin to bring order to their families and to their own culture. If they do that, they can start to bring order to the world.

Healing the world must start with healing the self. This book holds the ancient mysteries through which personal transformation is made possible, if the applicant is sincere and willing to change. The dilettante will benefit little, except through some intellectual titillation. This book was written not for dinner table discussion, but at great price, and with great courage, by a traveler within such mysteries, in hope of helping humanity out of chaos. Since it merely recites the principles of the mysteries, it shall be considered anonymously and gnostically written, for man cannot hope or presume to create the Laws and Virtues. This is not a “channeled” book, but a book reflecting the experience of the traveler through many realms as real as the one before your face.

If you also dare to be a traveler into unseen realms, this book will guide you safely.

PREFACE

It is not the desire of Holy Beings to overly alarm mankind, even in the face of imminent danger or tragedy. On the other hand, if there is possibility of human action changing the probable future to one of hope, then it is required that mankind be given notice of crisis (even if the information appears frightening). The information given will only be of benefit to those humans of love, will, and intelligence whose desire is to be of service even in the face of pain and fear. Only the holy warriors will use the following information.

“It is given unto you to know the Mysteries of the Kingdom of Heaven, but unto them it is not given. Therefore, speak I to them in parables; because they seeing, see not; and hearing, they hear not, neither do they understand. But blessed are your eyes, for they see; and your ears, for they hear¹.”

The Expanding Universe and Effect of Karma upon Dimensions

COSMIC LAWS AND FORM

Cosmic laws, such as the laws of karma and change, have a very strong impact upon the physical forms of humans and the Earth. Although a certain amount of change and expansion is normal over a period of time, a karmic crisis has pushed the Earth through some of its evolution prematurely, before Suns are ready to adapt to the changes.

Ignorance does not spare mankind the effects of cosmic law. It is a simple matter of certain actions producing predictable results. When humans invited to Earth certain alien forces that were aligned with the left-hand path of darkness, the wheels of destruction were put into motion. It is important for humans to slow down this rolling destruction in order to make the necessary transitions bearable in the near future.

In order to understand the serious nature of the current situation, one must have a working knowledge of dimensions, density, and the mysteries of time and space.

NUMBERS AND SOUNDS

Dimensions have an aspect of wave form and frequency, and relate to the patterns of cosmic dust particles that fold and twist against the pressure of space. In each dimension, there are aspects of air, fire, water, number, and sound.

Number refers to traits of God, such as love, will, or intelligence. This will be covered in later material. Sound, (or letters), have an aspect of directions. North, south, east, west, and position (in relationship to the center) are all part of the mystery of sound and of dimensions.

MEANING OF TIME

Time is a point of consciousness within the center of the spiraling dimensional framework. Dimensions could be said to be like variously twisted balloons on certain points of a 360 degree circle that repeats itself in ever expanding spirals. Like a funnel, the circle becomes larger toward the future, until it reaches the center point. In the exact center of the spiral, the widest diameter is reached. This is the point of maximum expansion. After this widest circumference is reached, the funnel moves toward a smaller diameter. This is the contraction part of the time/space spiral.

Each age, such as the Piscean Age that has now ended, is represented by one complete circular turn of the funneling spiral. There are seven expanding ages (or circles) and seven contracting ages. At the point of maximum expansion, tremendous changes occur to planets and inhabitants. The attainment of time focus at the point of maximum expansion can be speeded up or slowed down by the inhabitants.

Each dimension has a certain range of frequency that is somewhat flexible. Again compare a dimension to a balloon of an unusual shape. Depending on the size, shape, and substance, some balloons may be able to tolerate a very high air pressure within or without the boundaries. Other balloons may explode or implode if too much air pressure is applied within them or without. Each dimension is designed within cosmic law to expand for a certain number of ages, or circular turns, and then to contract, or implode at a set point in the spiral. There is a certain order in which such implosion is to occur.

BREATHING OUT OF GOD

You could call the expansion phase of the spiral the “breathing out of God,” and the contraction phase of the spiral the “breathing in of God.” Before the point of maximum expansion, it is possible for humans to “let go of the merry-go-round” and fly out in a circular fashion to another world. People who do not know how to let

go or fly are doomed to be “breathed in” with the contraction phase, and returned to cosmic dust. You could say that they are composted, for use in future creation.

The inverse universe of darkness could be compared to one strand of a double helix spiral, wound in a counter-clockwise direction. The clock-wise strand would represent the universe of holy order. Like electrical wires, there is supposed to be insulating material between the worlds. The energies of darkness and light are both needed for creation, but were never intended to be mixed. Like an electrical short, the touching of positive and negative poles together speeds the burning of matter. This has happened on the Earth. It is possible to “patch” areas of torn insulation, by World Radionic methods.

MAGNETIC DIRECTION AND DIMENSIONAL SPACES

As the funnel of time/space expands, some dimensions change inner tension due to the slow clock-like rotation of the spiral changing the magnetic dynamics related to north-south-east-west-center positioning. Some artificial shocks, such as nuclear testing, cause the time/space spiral to wobble or misalign the dimensions. In severe cases, dimensions can be destroyed by the actions of humans or extraterrestrial beings.

This is extremely serious for beings who have a dreaming body in a destroyed dimension. Sun soul types could be compared to the nucleus of a cell. Dimensions could be compared to different parts (or organs) of the cell structure around the nucleus. Each dimension (or organ) has an important function in the Sun’s development and health.

SOUL DNA FRAGMENTS

The way that Suns spiritually mature is by sending copies of themselves, like DNA fragments, to the other components of the cell. They do this by the creation of dreaming body replications that they train to enter other dimensional world spaces. Eventually, the dreaming bodies become as solidly defined as the nucleus, and can break off, as if in mitosis, to form a new cell. The dreaming body then becomes the nucleus of a new cell.

The more evolved the individual, the more dreaming bodies they can produce and refine. Ideally, Suns should have 31 functioning dreaming bodies and animal man should have five. Guardian angels should have 36 dreaming bodies, and Saints (such as Yogananda) have 32. The Gods of Karma (Keepers of the Law) have 44 dreaming bodies, and the Messengers (Keepers of the Balance Between Worlds) have 60. Beings can only function in dimensions in which they have already formed a dreaming body.

SPIRITUAL HIERARCHY AND A CIRCLE

If you consider the completion of a 360 degree circle as the point of spiritual union with the Logos, all beings could be mapped with their hierarchical position upon that circle. This does not mean that the beings are aware of their position in the hierarchy, or that they can function as true representatives. This is merely a general example of the spiritual hierarchy.

Animal man (and the Earth) is now approaching 180. The Watchers (fallen angels) were at 210, but their offspring nephilim, took on the animal man level, which is now 180. Suns are at 250. Guardian Angels are at 275. The Keepers of the Law and Ascended Masters are at 310, as are archangels. The Keepers of the Balance of the Worlds are between 340 and 359. Jesus is at 350.

HAZARDS OF CHANNELING

An important point to consider is the so-called “channeling” of information from ascended masters, archangels, or Jesus. This is impossible, because it goes against the grain of the spiritual hierarchy, and would kill the channeler with the increased intensity of the fire of Logos Angstroms.

Earlier in this century, the fad of channeling emerged with the table tipping glammers of the spiritualists. Many demons impersonated family members by the scanning of memories of the clients. Even more dangerous were the group séances in which alien beings were invited to our world. Many extraterrestrials that came by

invitation to our planet brought demons from other worlds that could not be removed by any known exorcism method on Earth.

In few cases did holy beings speak through channels in this century. A holy force of a lower order may take on an elemental form representing Mother Mary to get a point across with minimal fear to humans, but such phenomena is more often from an evil conniving lower spirit. Mary represented the Yin aspect of the Holy Spirit, to balance the Yang force of Holy Manifestation. She is a Saint and Ascended Master of very high placement in the hierarchy.

It is possible for Holy Suns to “attune” spiritually to Akasha, and learn the will of Holy Beings and of truth. In akasha are the hologram messages from angels that await the seeker who is worthy. An example of this is the Book of Mormon. Another example is the Aquarian Gospel of Jesus the Christ by Levi. This is not channeling, and is a much clearer method to attain spiritual knowledge than the unreliable method of channeling.

DESCENT OF HOLY BEINGS

The only way for highly evolved beings to communicate with Suns is to take on a human body, which involves much suffering and is rare.

Holy beings only descend into Sun dual-soul matrix bodies when the time is correct for an avatar to appear. In times of emergency, several may be sent down, at great risk. Many are unable to handle the vibrational shock and soon die. Many never return from their mission. Jesus did return to the Keepers of the Balance of the Worlds, from where he came.

The majority of the messages from channeling have harmed the planet almost beyond help, because of the resultant increase in the harmful alien population.

LIFESPAN OF PLANETS

It is normal for planets to have a specific lifespan. The natural way for beings to evolve includes a change in their dimensional framework in relationship to their inhabited planet. This means that as the planet approaches its natural death, the inhabitants would naturally be able to adapt to other worlds in a parallel universe. Their spiritual and physical DNA would adjust to allow those beings to continue to exist elsewhere.

There are laws that govern the speed with which beings can be assisted to understand and adapt to such changes. When a planet or its inhabitants move willfully toward destruction, then the normal pattern of individual progression is altered by karma, (the choices of the inhabitants, as a group).

ALIEN BEINGS EVIL

There are many human decisions that impact the planetary progression and balance. The most negative decision made by humans was the inviting of evil aliens to the planet. Also, the human lifestyles that stress sexual excess and materialism also have unbalanced the spiritual factors that slow or speed up the death of the planet. Also, the recent weapon research by the alien grays caused a chain reaction of destruction within the very fiber of the planet. A domino effect went to the core of the Earth and unbalanced the dimensional framework.

The seriousness of this cannot be overly stressed. One dimension was blown out completely, and others were stressed. Unless this can somehow be repaired, it will be impossible for Suns to be born on this planet. Except for the fetuses that have already ensouled, no further Suns will be born on the Earth unless this can be changed. Suns require all 31 of the dimensional spaces to be reincarnated on the planet. The dimension that was blown out represented the spiritual solar plexus of Suns and of the planet. Suns are like a microcosm of the Earth in their spiritual anatomy.

If another dimension blows out, it is unlikely that Suns can maintain physical form for very long in their current lifetime, since all dimensions are required for the health to be maintained. Animal man requires fewer intact dimensions, in order for him to remain in form. Nephilim man has the same physical form requirements as animal man.

DIMENSIONAL CONTAMINATION

Another major stress on the planet has to do with contamination by energies from dimensions not native to the Earth. There is normally a barrier between the dimensions of different worlds, for good reason. When one world's inhabitants enter another world, the negations from both worlds blend. Karma is merged, and severe danger to the invaded world is produced. If the invading energy is loveless, then great harm can occur.

The alien greys found ways to hook into the Earth's dimensional framework through the use of electromagnetic patterns that mimicked holograms of the dimensional doorways. Through such holograms, they came to feed on the Earth. They did not violate free will, though, because many psychics invited them. Other people cheerfully entertained the thought of cute little critters from other worlds, never realizing the close relationship those critters had with demonic forces. By the very denial of the reality of destructive forces, humans allowed evil to enter.

It is a strange and ironic twist of truth, those who warned the Jews of Hitler were accused of being "negative." Just the same today, the prophets who warn people of danger are called "negative", even though their very courage and hope is quite positive in nature. To do nothing in the face of destruction is the true meaning of "negative." People who are passive, lazy, or embrace darkness are the first to call the holy warriors "negative."

The previous course of action for mankind must now be modified in face of the current severe crisis. Suns must be taught how to operate in several dreaming bodies, in different dimensions and densities. Using the World Radionic System is the most rapid method available. Suns must be taught how to survive in the face of all manner of creatures from other worlds. This entails learning how to assess a disharmonious situation and how to determine the correct manner to handle the problem. Suns must remain poised, with a sense of sobriety and alertness, so that they can dance with whatever situation arises. They must not panic. They must conserve energy, and live congruently with cosmic laws.

The philosophical and religious systems existing on the earth today were not created to deal with the situation at hand. This situation was not in the probable future at the time of the creation of the world's religions. Not meditation, prayer, or just clean living will save the planet at this point. Imagining you are fine, saying self-hypnotic affirmations, or assuming everything will work our fine will not work this time.

The only hope for the planet is that a handful of brave, loving, and strong humans align with the holy powers who are standing by to help. Unless humans do their part, the holy powers must stand back and allow the destruction to occur. In great love and sorrow, the holy powers hover over the Earth, waiting for the worthy warriors to come forth. When a warrior approaches, all the joy of heaven descends to help him.

Transmutation, and not denial, is the weapon of the master. The systems of thought that stressed the focusing on beatific thought forms were designed to train man to control his animal aspects and align him with harmonious extra planetary energies. Such systems of thoughts are still congruent when used in context. However, we have reached a time where action and precision are needed far more than the emptying of one's mind. To empty one's mind at this point would be the equivalent of becoming sheep at the slaughter. The sixth age of devotion is past; and the seventh age of holy will and precision is at hand. We must not discard the virtues of the other ages (or rays), but combine them with the focus of the current age taking prominence.

The very hope for the planet and all its inhabitants rests on the few brave humans to dare to look boldly into interdimensional reality and decide to take action. Truth and holiness must matter more than comfort. Such warriors will receive their reward.

Intersecting World Spaces and Soul Types

When the Earth was created, it manifested in 31 dimensional spaces, one of which (eight on the World Diagram, *page 46*) is connected to the Logos hierarchy as a doorway between worlds. In this space rests the Book of Life, or Akasha records. The Earth has 31 worlds within it that we refer to as dimensions.

When animal man and other animals were created, they manifested in five of the Earth's dimensional spaces. On the World Diagram, they are referred to as dimensional space numbers 8, 24, 28, 22, 27.

The Watchers (fallen angels) existed in twelve spaces, only nine of which are native to the Earth. On the World Diagram those dimensions are labeled 3, 6, 10, 13, 15, 28, 18, 24, 16. When the Watchers defied cosmic law during the Fall, they entered animal man through the 24th and 28th dimensional spaces, therefore tearing open the membrane separating the dark world from the light world. Like thieves in the night, they had to enter the lower world by cover of darkness, because they could not defy Law under the Light of the Logos. They moved through the inverse universe, ripped the membrane to the Light Earth, and entered into the holy planet, defiling it with negation from the dark world.

When the membrane between harmony and disharmony was torn, the spirit of all disorder (hereafter to be called the Dark Nagual) spilled onto the Earth, poisoning animal man with negation. Tearing the Veil was "eating from the Tree of Knowledge of Good and Evil" or the First Fall (of angels rather than man) from Grace.

EVIL NOT NECESSARY

A common misconception is that evil is natural or necessary on the Earth for good to exist. Evil (reverse for Live) is supposed to be locked in the inverse universe of darkness, far away from the holy Earth. The Earth was intended to be good and harmonious, and manifestation of such good was balanced by the presence of the opposite polarity (evil) existing in the black hole of the inverse universe. Anything in manifestation requires the opposite polarity, but not necessarily in the same world spaces. In the case of the Earth, the separation of good and evil was deliberate and part of divine plan. The Earth is not a random creation. The defiant mixing of good and evil in the same world spaces caused tremendous, unnecessary suffering for humans and animals.

Satan and Lilith were the first Adam and Eve, as spirits of disorder and defiance causing the unnatural union of fallen angel and animal man. Out of their unholy union, Nephilim man was created.

When the holy guardians of the planet saw the imminent destruction of the Earth from contamination by evil, Suns were created in etheric bodies with the purpose of saving the planet from destructive forces. The Suns were given intersecting dimensional world spaces to match the Earth, 31 in number, so that they would be able to enter and transmute disharmony from any of the dimensions that impact the Earth.

SECOND ADAM AND EVE

The second Adam and Eve were these Suns, sent to the Earth to make the planet holy once again. Unfortunately, murder and sexual union with the offspring of the Watchers (Nephilim) caused the Suns to fall from Grace. They forgot who they were. This was the Second Fall. They developed crystallized material bodies rather than their normal etheric bodies, and lost the ability to move freely through all the dimensional spaces. This was represented in the Bible as being evicted from the Garden of Eden. They were not actually evicted. When they chose to embrace the taste of disharmony (evil), Adam and Eve became of a denser substance as a direct result of the contamination. This denser substance of their bodies prevented them from keeping attunement with the etheric nature of the heaven world. The contamination of the Dark Nagual prevented them from living in a state of harmony, or the Garden of Eden.

When the holy messenger (Jesus) from the sixth density heaven decided to come down to help the Earth, with Him came the Light Nagual, or the Holy Spirit. This occurred approximately three years and five months before His physical death. The soul of the holy man (Sun), named Jesus, agreed to donate his soul essence to help the Logos plan of harmony for the Earth. The symbol of the dove was used to represent the Light Nagual that accompanied the Holy Messenger who descended into the body of Jesus.

SOUL TYPE DIFFERENT

The soul type to which the Holy Messenger belonged could be called “Keepers of the Balance Between Worlds.” Beings of this type work within 60 dimensional spaces that are present in sixth density or lower. Under this group, work the fifth density holy beings that could be called “Keepers of Cosmic Law” or “Gods of Karma.” These Gods of Karma intersect 44 dimensional spaces (32 of which are present on the Earth.) The Holy Messengers are above the Gods of Karma, and therefore exhibit traits of grace and forgiveness, mercy, and transmutation, that are beyond the scope of the lower Keepers of Law.

Mankind could be compared to a college student flunking a math class. His teacher is the Keeper of Karma, who grades purely by test score. However, the student may go to the dean of the school, and beg for mercy, and the dean may then assign him a tutor, and give him extra time to complete a test. The messengers are like the dean. The messengers show mankind more mercy than he would deserve by his past records alone.

TWO MISTAKES

Mankind has caused significant problems on the planet by inviting alien beings and disturbing the planet with nuclear testing. Those two causes are reducing the material mass of the Earth and speeding its demise. The Earth is approaching the etheric state more rapidly than appropriate for the cycle, due to the overload of destructive forces.

According to planetary karma, mankind would be allowed to kill itself eventually with such a scenario. In the interim, the terrible suffering of people who do not know how to operate in the approaching spiritual planes fills the Earth. It is only by Grace that mankind is given information to help him cope with the tension in the spiritual ethers that torments him and others. Indeed, mankind is being given a chance to save his own children, yet few will listen.

LIKE A SAVAGE BEHIND THE WHEEL

It is as though an aborigine from the wilds suddenly found himself behind the wheel of a car in New York City. Mankind is just as ignorant about the other dimensional realities that are starting to make his world increasingly more painful as the savage who is sure to wreck the unfamiliar car.

If an angel, or other holy being, flew to the car, and stabilized it while giving the savage instructions on how to drive or park, it would be merciful, would it not? Most people would just jump in the back seat and cover their eyes in such a situation. That is what is happening in the metaphysical communities.

TEACHING APPROACH VARIES WITH CYCLE

Different teachings and approaches are appropriate for different times in the Earth cycles. An example is the disdain for fear, and the suspicion by many people that anything that makes one afraid is evil. In the past, it was more effective to try to teach people who were relaxed, with a feeling of love and safety. If I want to motivate a college student to clean his apartment, I might stress the joy of order to him. If he refuses to listen, and leaves food around, rats may breed under his bed. If I suddenly cry out, “There is a huge rat under your bed!” He is likely to call me a fear-monger, until the rat nibbles his toes while he is sleeping.

Planet Earth has a great many rats under its bed, because too many people have overlooked cosmic laws. You are not paranoid if someone is actually trying to kill you. It is reasonable to be a little afraid at the thought that the Earth may be destroyed before the next generation unless humans get busy right away. Fortunately, the guardians of the planet have sent helpers along the way out of mercy.

LIGHT NAGUAL LEFT BY JESUS

When Jesus returned to the sixth density heaven, he left behind the Light Nagual which was called the Comforter. Its purpose was to inspire, teach, and empower anyone holy enough to call upon it for assistance. Its very presence can awaken spiritual centers in a worthy individual, and purify the aura bodies of Suns so that they can work in the dimensional spaces without contamination. Once the Light Nagual has touched a person, he is forever changed.

Soon many people will be graced by the touch of the Light Nagual, as it stimulates the spiritual centers to open in such a way to help Suns adapt.

The Light Nagual is needed greatly at the current time, because of the speeding up of the planetary destiny as a result of the infestation of harmful alien energies that have deformed the Earth's dimensional balance.

Whenever negative beings from other worlds intersect in some dimensional spaces, they deform the fabric of the universe by the pull of disharmonious adjacent dimensions. Dimensions have magnetic and shape components that are designed for specific worlds.

You could compare the Earth to an automobile with four round tires from different makers, and different hubcap designs on each tire. The tires represent the dimensions. If you try to put a tractor tire on one wheel, the car is thrown off balance, and cannot move forward. Many beings who come to Earth have "tractor size and shape" dimensional doorways that just don't fit the Earth plan.

The etheric pattern for the Earth is dependent upon the health of the dimensions that are native to the Earth. Man is a microcosm of the Earth, and partakes of any planetary trauma, which reflects upon his health and sense of well-being. Even the DNA pattern of mankind is weakened by the Earthly presence of non-harmonious other-dimensional beings.

The whole reason the Earth is no longer the Garden of Eden is because the Watchers infected it with disharmonious dimensional energies, causing a frequency shift and DNA pattern changes. They tried to "hook a tractor tire onto the back of a Toyota," causing the Earth to drag the weight all these years.

The only time it is proper for the Earth to gain a dimensional space is during the "breathing out" toward the end of the last material cycle. The space is then provided as the next step in the development of humankind. Expansion of the universe is within law, but not through contamination by disharmonious other world dimensional spaces.

Whenever an alien being comes to the Earth, he brings with him any disease or disharmony from all the dimensions his type of soul intersects. He may have found a way to enter one of the Earth's dimensions through technology, and then brings the problems from twenty of the other system's dimensions to the Earth.

If he is a love-less or brutal entity, the dark forces from the twenty dimensions can leak through the one common dimension he shares with the Earth. The disease or disharmony must be cleared radionically upon the one common dimensional doorway through the World Broadcast System. He must be blocked at the connecting doorway that he uses to pollute the Earth.

Such radionics does not kill the entity unless he refuses to return to his own world. If he defies the command to retreat, it is within cosmic law to protect the Earth by doing radionic elimination of him from the Earth.

EARTH DESTINY APPROACHING

There is a natural span of life for a human to live, and a natural span of life for the Earth to live in its current form. As most people are becoming aware, reincarnation is a reality, and no one really ceases to exist in the truest sense. Despite this truism, the form of humans' changes between lifetimes, and the form of the Earth is destined to change as well.

Just as a person who hangs out in bars every night seems to age prematurely, so has the Earth aged prematurely. There is a variable amount of time, dependent upon the action of humans, that the Earth can keep

its present form. With the current level of disharmony upon the Earth, the planet will soon approach contraction on a major scale.

The more disharmony that is present, the lighter (less dense) the Earth becomes. When the maximum expansion has been reached, then the Earth must contract, and move toward death. Many metaphysical teachers have waxed eloquent about the glories of raising the Earth's vibration. They did not realize that it was being raised to a gaseous state before its normal time.

Disharmony is cumulative over the lifetime of the Earth. For instance, on a 360 degree scale (with 360 being maximum expansion), the Earth was still at only 33 degrees ten years ago. Two years ago, the Earth had moved to 60 degrees, and now it is at 75 degrees. In one year at the current progression of disharmony, the Earth should be at 90 degrees, and then 125 degrees within two years. It appears that in three years there could easily be a leap to 260 degrees, unless immediate action is taken by humans. The increase is exponential, and not merely progressive at one rate. When the Earth reaches maximum expansion (360) the form of the Earth will shift, as a new dimensional space is created in a sudden cosmic contraction. Contraction always follows maximum expansion.

Physical Earth signs of a normal cycle change are different than this spiritual shift (and are less important although devastating to physical life.) Earthquakes and volcanic eruptions can be intensified and speeded up due to the rapid accumulation of disharmony, however.

RECENT DIMENSIONAL DAMAGE

Unless a miracle occurs, no further Suns can be ensouled into any fetus on the material Earth. This dates since October 28, 1991. As Suns die, they will awaken in the Summerland, a type of etheric world. They may think they are dreaming when they arrive.

Even poorly developed Suns will be there, but will be quite confused for some time. Only Suns familiar with the other dimensional world spaces will be comfortable upon arrival. Suns with bright soul lights who have studied and practiced moving their spiritual bodies in and out of dimensional spaces will be in charge of organizing the less adept Suns.

Many Suns will be in types of etheric hospitals or institutions, because they were so connected to the old ways of Earth that they became insane. Benevolent and wise Suns will care for them and help them to recover.

LEFT-HAND PATH SUNS PROHIBITED

Suns who have joined the left-hand path (consciously or unconsciously) will be returned to cosmic dust rather than go to Summerland. Ninety percent of all people who have incurred karma by channeling harmful entities will be returned to cosmic dust. Most of such people mean well and are ignorant pawns but, by hooking into the counter-clockwise spiral of destruction, have sealed their fate. Scarcely ten percent of the accumulated channeled material on the planet is from a holy source.

Any Suns who habitually hook into fallen angel traps, such as pornography or drug dealing, will be returned to cosmic dust. Suns who are active in a promiscuous homosexual lifestyle will have chosen to return to cosmic dust by their contamination with left-hand path influences. Most child molesters will be cosmic dust, since all such behavior involves the embracing of fallen angels.

The average Sun who is a decent person with little esoteric training will think he is having a dream or has gone crazy when he shifts into Summerland. He will feel as though he has turned a corner and emerged in a new city. For this reason, many workers are needed to prepare people and clear up all Sun earthbounds.

AVERAGE PERSON GENTLY WARNED

The average Sun should just be advised to avoid drugs, bars, indecent sexual practices, pornography, and lower psychism. Most Suns are not ready to hear any more information. Happily, there are Sun worker bees that are now ready to help the world during its birth into Summerland. It is for those Suns this information is given.

COSMIC DUST NOT PUNITIVE

The return to cosmic dust is not a punitive measure, but simply the result of personal choices (causes put forth) over many lifetimes. Contrary to many religious people's ideas, there is no redemption through Grace. One holy being, such as Jesus, cannot take on the karma of millions of people. It was not the intention of Jesus to imply that a deathbed confession of faith in God would allow a disharmonious person to enter heaven.

Even Satan himself believes that Jesus was the Son of God, but Satan is not in heaven. It is ridiculous to think that a person can spend his life without holiness and suffer no result.

Cosmic Law states that every effect has a cause, but not every cause will produce an effect. In the case of many lives, there were many causes for a person to return to cosmic dust. If they, at the end, produce a small cause (change of heart) in order to elicit a different effect, it is outweighed by the accumulated negation.

It is equally ridiculous to think that one can passively ignore planetary disharmony that causes his very cells to shudder in resonance. Since man is a microcosm of the Earth, every horror that manifests on the planet resounds inside each person. The Lie of Lucifer states that each man has the right to create his own reality. Many a pervert and murderer has created his own reality and poisoned the planet's spiritual essence and all the innocent children on the planet as a result. The holy choice is to align the lower self with the cosmic objective reality of the soul purpose.

SPEED OF CHANGES VARIABLE

The speed with which planetary changes occur is dependent upon the work done by Suns today to slow the disharmony accumulation.

It would be beneficial to slow the changes down in order to give more Suns time to adapt in a comfortable and happy manner, without going insane with stress. It is as though the kindergartener is being sent to high school before he knows about lockers, hourly class room changes, or even where the bathroom is located. It appears many Suns will wet their pants and cry for mama. With the help of a few hard-working Suns today, there will be time for them to go to grade school and junior high school first.

Invariably, some Suns will demand that angels or God rescue them from any change, but the **Laws of Change and Karma are immutable**. Man is fortunate to be given the mercy of help and explanation at this difficult time in the destiny of the planet. It is possible, that if a great many Suns are mobilized and taught how to clear disharmony from the Earth, the damaged dimension may be healed, and Suns can be born on the Earth once again.

Types of Disharmonies During the Tribulation

Mankind is currently going through what has been called The Tribulation. Part of the stress experienced during this critical time is due to the ability of entities to possess and oppress even a person of high spiritual attunement.

Since society's major religions were designed only to deal with the most probable future entities and energies that would be faced, even holy people are affected. Since the membrane separating the inverse universe from the holy universe is torn between all the dimensions, untold horrors are beginning to emerge. It is a mistake to think that energies in the non-visible ranges are harmless. Just as plutonium exposure may be invisible, these energies are harmful even when not visible.

Mankind has a very limited visual ability, but can sense these disharmonies mentally, or kinesthetically. The more sensitive humans may hear odd sounds in certain locations or around certain people.

Depression, anxiety, profound weakness, and insomnia are the major symptoms that Suns feel when these energies are in the auric field. In some cases, the person cannot seem to wake up, and sleeps a dull, miserable night without the feeling of being rested at all. He feels tired all the time.

The visual effects include a certain atmospheric change in the room or around some people. There may seem to be a fine smoke, or dinginess. Some weather is due to clouds of these disharmonies.

Rain that does not feel clean, and gray days that seem oppressive are often full of types of such energies that are particularly dense. Humans appear death-like and anxious when these energies are attached to them. They may stoop over or to one side, as though pulling a weight. Children get listless or agitated, with gray-green casts to their faces.

FACIAL EXPRESSION OF ANGST

In recent movies, you will see that every Sun soul type in the movie will have a particular color and expression that hints of exhaustion and fear. Animal and Nephilim types are less affected than Suns. The affected person appears older than his years. His eyes may reflect angst with a hint of having seen death. He may appear shell-shocked in the expression of the eyes, despite the obligatory smile society demands. Small children who are Sun soul types reflect this appearance.

A skin-crawling sensation or a buzzing in the ears may be recognized by a sensitive individual. A person may think he has head lice, or fleas. Nausea and poor digestion may be present. Pain, especially in the brain or spine areas, is a common indicator that one of these energies has attached. Pain that seems to originate in the pelvic area or a certain organ often illustrates the position of attachment by an alien presence.

SMELL OR SOUND COMMON

In some cases, a strange smell may be present around an affected individual or location. More commonly is the faint whine or buzzing sound that is interpreted as electromagnetic in nature. People may assume they have tinnitus, and go to doctors. The sound may be louder near some people.

The physical postures often change. Slumping over, as if to shield the solar plexus, is common. Some people may appear to have a spine curvature, or hold the head or shoulder sharply to one side or forward.

In order to transmute disharmonious energies, one must first recognize them. Transmutation, and not denial, is the weapon of the master. A person who has trained his senses to detect nuances of the physical senses is able to detect clues of such disharmonies and is more likely able to learn ways to remove such energies. One must be like Sherlock Holmes, or Hercule Poirot, in the noticing of subtle signs and symptoms. The ability to notice similarities and differences is vital in order for a person to manifest the holy trait of divine intelligence.

The easiest way to determine the presence of these energies is by dowsing them as though dowsing a water well. The principles of dowsing work just as well on energies such as these. One's subconscious mind can easily trigger a muscle response that is magnified by the dowsing tool.

DOWSING METHOD

To locate disharmonious energies in another person's auric field, one must first program the mind to filter out any normal or beneficial energies. You do not want to dowse the perimeters of a normal auric field, only a force-field produced by a disharmonious being or energy. The sub-conscious mind is very able to do this filtering, and can easily translate the information to the conscious mind through dowsing.

The use of L-rods or an Aurameter (available through the American Society of Dowsters in Danville, Vermont) is the easiest to use for this purpose. Simply hold the devices in a neutral position, and mentally request to detect the presence of harmful energies in the other person's aura field. Then walk slowly to the person being affected. The L-rods should fan out, and the Aurameter should show a strong positive response.

It is not difficult to strongly request that the aura of one's dual soul be pulled to one, so that another person can dowse the perimeters of the dual soul. Since one's dual soul is similar to the negative of a picture, you cannot be balanced and clear unless your dual soul is balanced and clear. His disharmony will "bleed through" to you.

It is also not difficult to place a client's picture on a stool and mentally request their aura to come to the area to be tested with L-rods or Aura meter. Their dual soul should also be checked.

A different type of dowsing is needed to determine the specifics of the disharmonious energy that has been located. The use of charts listing variable disharmonies speeds up the identification process. A pendulum should magnify fine motor movements of the hand that are triggered by the subconscious mind. Since the subconscious mind is connected to the superconscious mind that knows all, one is able to tap into such knowledge by holding the pendulum over the charts and watching it swing to the appropriate listed disharmony.

CATEGORIES OF DISHARMONY

Disharmonies may be from a physical, mental, or spiritual cause. Physical causes may be man-made, natural, or from alien sources.

Internal causes of disharmony, such as acute physical illness or accidental trauma, often have roots in spiritual worlds. When the soul energy is severed from an organ system, illness will result. Also, if an entity attaches to an organ, then the organ will lose its soul identification and become ill. Even allergies, when extensive, can be due to a spiritual cause.

Worms and a high sugar diet are the most frequent cause of chronic allergies or asthma. Chronic viral syndrome, adrenal exhaustion, and systemic candida infections often follow. It must be noted that worms and chronic diseases are more easily manifested in a person with a weakening entity, or a loss of soul identification by a key area of the body.

Microwaves, television and radio frequencies, household electrical appliances, and underground water streams are environmental sources of disharmony. Governments have experimented with geo-waves through the Earth as a type of warfare. Electromagnetic and radionic warfare weakens whole cities of people, causing the most vulnerable people to develop flu symptoms or cancers.

ALIEN RADIATIONS

Alien beings, such as the Greys, have also caused tremendous weakening of certain populations by creating electromagnetic force fields over the earth. They have placed micro-computers with deadly radiations in many locations. Some of these are placed inside a type of burrowing robotic that travels underground. The use of varying frequencies and waveforms make them difficult to shield against. The wearing of an Earth resonating device does not shield one against these deadly energies.

Even though many of the grey aliens have now been eliminated, their devices on the Earth or implanted in humans cause tremendous weakening to Sun types. The specific types of radiations affect many dimensional spaces. They can cause depression, insomnia, physical weakness, and insanity. In severe cases they can stop the

heart. Since Suns are affected much more than animal man or nephilim, they are the suffering ones and the first to become ill, insane, or to die.

Energy fields created by a micro-computer, burrowing robotic device, or monitor portal can be dowsed by L-rods when the appropriate request is submitted to one's subconscious mind. An implanted device on a human is easily dowsed in the same manner. Most often, implanted devices are in the head or solar plexus.

TRANSMITTER BEEPERS

Many alien bodies possess a beeper-sized transmitter designed to produce wave forms and frequencies compatible with interdimensional travel and invisibility. Such transmitters produce a radiation that can cause cardiac irregularities.

There are many alien-created interdimensional portals on the Earth that cause Suns to become weak and ill. Many crop circles found in England and other places contain these portals. An alien can stand in the center and adjust his transmitter dial in order to change locations or move back in time. They cannot physically move forward in time by such a method, because of the variations in probable futures.

Dowsing over numerical ratios and dimensional symbols trains Suns to change their wave form and frequency without the need for mechanical equipment. By dowsing in such a method daily, Suns rapidly develop refined dreaming bodies that can transmute disharmony in all 31 spaces.

Removal by deadly resonance methods, such as the World Radionic System, is the only way to remove alien energies that is available to mankind. Normal radionics that is non-specific to dimensional spaces is less effective. Religious exorcism methods were not designed to deal with beings from other worlds.

TYPES OF ALIENS

By far, the most common alien that impacts mankind is the mixed race alien. These aliens have both grey and human genetic material, and often animal DNA as well.

DNA mixing was necessary for the greys to survive on the Earth, due to the difficulty of remaining in a world based on different dimensional spaces. Since Suns are microcosms of the Earth, they contain 31 spaces that coordinate with the Earth's 31 spaces. For this reason, the greys have done massive genetic experimentation using Sun DNA material obtained from violated humans.

The immune system is altered in mixed-alien offspring to prevent rejection of the alien genetic material. In the last few years, many women have been impregnated by laboratory-created mixed-alien. In most cases, the embryos were placed in sleeping women, and abduction was not necessary.

Many of such embryos are spontaneously aborted. Of the hundreds that have survived in the United States, many are ill. Digestive tract disturbances are common. They seem depressed and may have sleep disturbances. Their body proportions may be odd, and they may appear grey-white in skin tone.

DISEASES AND PARASITES

The most damaging aspect of this infiltration into human genetics is the contamination by the grey's dimensional spaces that are not native to Earth. Many strange diseases, parasites, and dark forces have come through the doorways created by such genetic blending. Such disorders and possessions then can torment normal Suns. Also, since the primary trait of the Greys is a total lack of love, these mixed species will be dangerous for society.

Due to the recent work of Holy Beings and Suns, the genetic labs are gone from the earth now. The cages that held breeding stock (abducted men and women) are no longer on the Earth. Ninety-nine percent of the full-blood greys are dead, including all the leaders and military hierarchy. The wide-scale abduction of animals and humans to use for alien food products has been stopped.

There are still a few pockets of the love-less greys that must be removed from the Earth, but the remaining greys are not organized and will not survive. Unfortunately, many of the greys that died are (in a sense) still present as earthbound spirits that continue to torment humanity. These can only be removed by the world clearing method, and visualization will not remove them. They cannot go “into the light” because they are of the darkness of the inverse universe of destruction, and are aligned with fallen angels.

KILL OR BREED

Another unfortunate aspect of the mixed-aliens is that many were genetically programmed to kill or breed. If they survive, they will cause massive destruction. When they die, they hover in many dimensional spaces, trying to mate with the dreaming bodies of Suns that wander in. Many Suns (male and female) suffer rape trauma from the horror of such dreaming body contamination. All the earthbound mixed-aliens need to be removed from the Earth by radionics.

The problem of the living mixed-alien babies is a serious one that cannot be handled easily. Ideally, the soul of the baby decides to depart the body, and death results. They should not be physically killed or harmed in any way, for the suffering Sun aspect within will be traumatized further.

PARASITIC SOUL

It is as though the grey soul has imbedded itself into the Sun soul like a parasite. The parasite must be removed without harming the Sun. This problem is being addressed by many Holy Beings and Suns.

The mixing of species is against cosmic law. This includes the mixing of animal man and Sun genetic material through experimentation.

Recently, human scientists have been able to create part animals and part humans that have survived. They have placed animal body parts in humans, and grafted a human head upon an animal torso. Fortunately, the beings that have survived were not of the Sun soul type. In each case, the Sun souls departed and the body died. Nonetheless, such research runs the risk of further damaging the planet.

CELL-WALL MICRO-FUNGI

There are many new diseases which produce chronic exhaustion and weakness that are part of the alien contamination. Cell wall micro-fungi cause a type of auto-immune disorder with joint pain and flu symptoms. There are many virus-type disorders related to the alien invasion. There are also types of leeches, that drain life force from the person to which they attach.

Because of the interdimensional wobble, some forms of life from the prehistoric past are now able to attach parasitically to humans. A common one is the fifth density, blood prana-sucking globule. It is like a large protozoa in shape and consistency, and attaches to an artery or to the liver area. They can be dowsed about eight inches in diameter. When these are present, the dowsed blood prana reading will get very low for the infected person. This can produce chronic low-grade infections and exhaustion.

POD ALIENS

Another common entity that came with the aliens is the Pod type. These attach with a suction apparatus onto the body of a Sun. When young, they have a disc shaped body about one and one-half inches in diameter that attaches to the victim. In the center of the disc is a small cocoon-shaped protuberance. As the entity sucks the air and nerve prana from the human, the cocoon starts to bulge and grow. Out of the cocoon emerge seven legs that move in arrhythmic fashion.

Within three days, the Pod is able to reproduce. It is then four times as large, with long legs gyrating outward. Segments of the legs fall off in the shape of baby discs with cocoon protuberances. If a human lies or sits nearby, the baby Pods can suck on and stick.

When Pods are around, it is a good idea to change the sheets and pillow cases every day, because the fresh segments die in the hot water. After they are mature enough to attach, it doesn't help. A mother Pod can release fifteen or more segments over a twenty-four hour period. If a baby Pod does not attach to an organic being within two weeks, it will die.

Symptoms include confusion and headache, nausea, and vertigo when Pods are present. There may be a sensation of lice crawling on the head or body. Pale and exhausted facial appearance, and a dowsed weakening of blood or nerve prana is an indicator. The aura meter should indicate a peculiar twitching movement as the legs of the Pod emerges. Often there is a small pimple or sore at the site of attachment that doesn't heal. L-rods indicate a strong presence with emanation out from the Pod at least two feet from the victim on the site of attachment.

Pods are not intelligent. Like the Micro-Fungi and Blood Prana Globule, they are closer to an infection than a possession. Unfortunately, the human immune system is not equipped to deal with them. World radionics is the only solution, and Pods often must be removed in layers, over several days.

LIZARDS AND DEAD ALIEN VULTURE SPIRITS

Dead alien vultures dowse with the aura meter in a similar fashion to the Pods. They have a twitching, gyrating movement and they hover over one spot of the victim (where a dead alien is hanging).

This type is common when a Lizard or Lizard-combination alien has died while attached to a person's auric field. The vultures go to eat the corpse, but it may take several days to complete. It is much faster to clean up the corpse and the vultures radionically.

If a possessing alien dies, he still has a corpse that is invisible in most cases. The dead Lizard alien (or combination type alien) will often have an energy field of twenty feet out from the oppressed individual. It is as though a huge object is being dragged along one side of a person's aura.

If the Lizard is still alive, it will dowse very tall, standing next to the afflicted human. When it dies, it dowses as if a tree had fallen, out from the human.

Lizards are actually the genetic crossbreeds of two alien types used by the greys. They are prized for their ability to enter many dimensional spaces without a transmitter. They can change their appearance at will, and are intelligent though love-less.

TOXIC RADIATION

Lizards have a type of toxic radiation that is very weakening to humans when nearby. They have been known to abduct humans. Approximately seventy-five percent of this type has been eliminated from the Earth. They are less of a problem after death than the mixed greys, because they do not get earthbound.

As they decompose, they form mercury-like globules that evaporate and form clouds. As these clouds form, the globules merge together into a sticky appearing mass. The greys were able to use this mass to build parts of space-ships with unusual properties of interdimensional travel. This is why some people reported that space ships appeared to be organic.

Lizards do not have individual souls, and so radionics is effective in removing large groups at once. Since the early greys used cloning for reproduction, it was possible to remove a lot of them from Earth with one series of genotype radionics. Unfortunately, the new part-human greys are more difficult to handle.

THREE-EYED MOON GNOMES

Due to dimensional damage, Moon Gnomes have been able to traverse space and wander the Earth. They are not extremely bright, and have been used in the past by other aliens as slaves. The greys used the Moon Gnomes as mercenary soldiers, because the Gnomes shared some of the Earth's dimensions, and could be used as spies. The Gnomes cannot usually be seen, and do not need to wear a frequency transmitter. Since the transmitter weakened the greys, they preferred to use the Gnomes to run errands or observe human activities.

Many of the Gnomes are now stranded on the Earth. One major problem with the Gnomes occurs when the Gnome dies. They have a native parasite, called a Deadly Orgone Beamer Snake, that is not a problem to Gnomes—only to humans. At the death of the Gnome, the Snake seeks out an organic being and attaches.

DEADLY ORGONE BEAMER SNAKE

Deadly Orgone Beamer Snakes are profoundly weakening to humans. They can be dowsed as a strong beam of energy going out from the human several feet, about one or two feet in diameter. They do not seem to move around much or twitch.

Symptoms include headache and confusion. If they are on the human's head and neck area. They primarily attach to the spine and brain, and nerve prana readings will drop dramatically.

They can be quite disabling, and may require several layers of radionic removal. Sterling silver seems toxic to them, however. If a Snake is attached to one's head, it will release if you place a sterling silver tray over that spot for an hour. It is best to do world radionics, though, to get it out of your house.

ALIEN FALLEN ANGEL IMPRINT

The Alien Greys were a kind of a nephilim from another world. Since they had fallen angel contamination, they soiled the Earth with this same influence. After greys die, they leave a fallen angel energy that can cause severe depression.

Normal Earth inverse universe fallen angels, fortunately, can be removed through traditional exorcism methods and also by the World Radionic System. Unfortunately, the grey demons and other grey fallen angel energies can only be removed by the World Radionic System explained in this book, because they were not in the probable future at the creation of the world's religions. It is much more efficient to bind them up using the world radionics than to try to order them away to torment another human. They seldom leave on command, anyway.

There are also many fallen angel energies that are native to Earth that hover over gambling houses, bars, pornographic book stores and theaters, and areas of drugs sales or violence. Whole cities are shrouded with grids of fallen angel energies, so that anyone in the area is covered with negation. Washington D.C., San Francisco, New York City, and London are shrouded with fallen angel energies.

If an individual does not recognize and learn to remove fallen angel energies from his auric field, his guardian angels will leave him. Such a person often becomes obsessed with physical pleasures, materialism and selfishness, at the expense of the soul. He pours energies into the lower chakras at the price of starving his crown chakra.

PHYSICAL CLUES OF IMPRINTS

Physical clues to a person with a great many fallen angel imprints include:

- 1) Skin disorders, such as moles, cancers, and large pores,
- 2) A dirty cast to the skin color,
- 3) Water element imbalances, such as kidney or prostate problems,
- 4) Sinus problems, bad breath, and bags under the eyes,
- 5) Eyes may appear close together and slightly hooded at times, or serpentine.

When fallen angel imprints are removed from a person on the World Radionic System, the individual may appear younger and better looking. The eyes may appear further apart, and the skin pores get smaller. They get better smelling breath, and many kidney or bladder problems clear up.

Some people have hundreds of fallen angel imprints. Whenever two people have sexual union, they share all the accumulated fallen angel imprints from all lifetimes. Does this mean you too have slept with Geraldo? Maybe.

MOLES ON BABIES

Fallen angel imprints often reflect upon a baby's appearance in subtle ways. Major deformities are rare due to this cause, but are usually due to severe karma or environment. Fallen angel imprints tend to cause moles and birthmarks on a newborn. Elderly people who have accumulated a lot of fallen angel imprints often get covered with warts, liver spots, and moles in later life. Babies aren't born covered with so many, because they clean up some of the imprints between lives.

Many illnesses are caused from a person having imbalanced spiritual bodies in relationship to air-fire-water-earth energies, which then causes a weak spot in the aura. Alien energies have no real risk factors that attract them or repel them. Elemental entities, though, often have risk factors, as do the fallen angels.

CANCER EARTH SPIRITS

Cancer Earth Spirits are often due to excessive etheric energy in relationship to astral body energies. For health to be maintained, it is important for people to have a harmonious balance between the physical-etheric body and the astral-emotional body.

A person given to excessive sexual or culinary pleasures often agitates the etheric forces and starves the astral. Pornographic magazines or films do this as well. A person who eats a great deal keeps his astral body tied to the etheric to aid in digestion, at the expense of its refinement. A person who overeats or thinks about sex excessively is more likely to attract a cancer elemental (or develop cancer). This type of person also tends to attract Luciferic spirits, and many earthbound nephilim to the aura. Over-attachment to the physical form is the primary risk factor to all spiritual invaders except for aliens.

A person of poor emotional control often develops poor digestion because the astral body cannot assist the etheric body in the digestion process. This type is more likely to get ulcers and malnutrition than the sex-obsessed overeater. This type may worry about health of their body to excess, and be neurotic. This type degenerates more rapidly than the first type when they get a possession or oppression.

There are many types of spirits that have, throughout the history of the planet, caused suffering for mankind. The way to remove them must take into consideration the current cosmic age, the origin of the entity, and the conservation of the life force. Above all, the healer must remember: if something doesn't work, try something different.

Many healers are still using methods of exorcism that no longer work, due to the current age of the Earth and the contamination from other worlds. If those healers fail to adapt their methods with the times, they will fall asunder, of no help to anyone.

Interpreting Radionic Codes

The mystery of radionic interpretation is intimately linked with the fundamental harmonics of the universe. In the ancient mystery schools, subjects such as philosophy, science, mathematics, astrology, and music were considered related and intertwined.

Numerology superficially appears to contradict mathematical laws, because mankind has forgotten the spiritual qualities of numbers. Much of holy knowledge is gained by silencing the mind in order to gain revelation rather than by linear thinking in and of itself. However, there is logic and order to the spiritual aspects of numbers, if man is evolved enough to be able to interpret the mystery.

Consider each number a type of power or energy from the Logos rather than linear progressions; much like the idea of angels assigned to each day of the week. In other words, the number four is a power in itself, and is not merely the combining of two sets of two powers. The color researcher Dinshah discovered that the color green was a primary color with distinct properties unlike blue or yellow. The combining of the primary numbers exert specific spiritual ramifications in a similar fashion. The numbers one through nine could be called the primary colors or tones of the cosmos, with ten (radionically 0) being a different octave of one.

SPIRITUAL ASPECTS

An analogy could be a mother (number one) has nine children who are all unique in personalities. In other words, the original nine children have distinct traits that are not genetically identical. In spiritual science, the numbers from one to ten have spiritual aspects or qualities that are not purely mathematical. They possess qualities, not quantities.

In the ancient mysteries, it is said that the world was created from the ten sephiroth (properties of God) and the twenty-two letters or sounds (represented in various ancient scripts and languages). Using numbers radionically represents the ten properties, or faces of God. The faces of God contain attributes that include divine wisdom, order, intelligence, mercy, justice, strength, severity, beauty, harmony, firmness, victory, splendor, and stability and rhythm. Certain angels are associated with each virtue on each step represented by the numbers.

ANGELIC SCRIPT

The angelic script prefixes used for the dimensional spaces in the World Diagram represent the sacred twenty-two letters in combinations of three.

Using three symbols for each dimensional space is very significant, because all things in manifestation contain the combined energies of fire, water, and air (Father, Son, and Holy Spirit, or Will, Love, and Divine Intelligence).

The ancient letters were said to contain “three mothers, seven doubles, and twelve simples.” Air, Fire, and water form the mothers. Wisdom, riches, fertility, life, power, peace, and graceful beauty were included in the attributes of the seven double letters. Out of those letters (or attributes) were formed height, depth, east, west, north, south and the center position. The seven primary letters also formed seven planets and seven seasons. The twelve simple letters formed the zodiac and the attributes of speech, thought, movement, sight, hearing, work, cognition, smell, sleep, anger, taste, and mirth. The twelve main organs of the body were also formed from the letters.

The dimensions, logically then, must have the attributes of direction, planetary influence, body parts, virtues, and the air-fire-water triad. When the intonation nuances of the air, fire, or water energies are altered, then a different dimension is represented. The letters are representative of those sound variations which represent the dimensional aspects of air-fire-water. A specific trinity of ancient letters combined with numbers represents the attributes and patterns of each dimensional space.

ROOMS OF A HOUSE

One could compare dimensional doorways to the rooms of a house. Each room has a doorway of a certain shape, color, smell, and consistency. Certain sounds and feelings emerge from each room. The average man is unable to visit with his conscious mind any room but one. He assumes that the living room is the only room in the house. When he dreams, his dreaming body floats to the other rooms. Sometimes a jolt, such as a near-death experience, will shock him into running into one of the rooms. However, he lives in that house full of many rooms all the time, unaware except in dreams. He is unaware that his real self floats in and out of all the rooms, experiencing and storing data. Sometimes he feels afraid, or can't sleep, because of a disharmonious energy in one of the rooms of his house. Unless he is taught how to go to the room and "clean it up" he will be uncomfortable and at the mercy of beings that live in those rooms.

In some Eastern mystical methods, people are taught to move consciousness, as though moving a radio knob to a different station. The major pitfall is in knowing how to transmute the disorder found in each dimensional location. Some people try to raise their awareness above the disorder, which does nothing to help the planet clean up all the disharmonies present in so many dimensional locations. Many people on drugs will wander into another dimension and be very frightened. What is important is gradually learning to move consciousness without drugs in a controlled and safe method, and knowing how to reorder any disharmony found. Dowsing and radionics offer such a method.

Any disharmonious condition a person experiences could be translated to a geometric ratio that reflects upon one or more dimensional spaces that impact that person. The key, then, is to dowse the pattern of disorder, and then locate the dimensional space or spaces that are impacted negatively.

MUSIC CORRELATIONS

Comparing the radionic ratios to music is helpful. To explore the type of energy required for a healing ratio (or in the case of the dark broadcast, a neutralization ratio), one first must determine the final harmonic numerologically. To do this correctly, be aware that repeated numbers next to each other are like the same note held for a series of counts. In other words, the radionic ratio 8821 would reduce to eleven (11) and then two ($1+1=2$). One of the eights would be considered a part of the other.

In contrast, if the ratio was 8281, the harmonic would be 19 reduced to 10 ($9+1$) reduced further to 1. Since the second 8 is not immediately after the first 8, it comprises a separate note at a later time.

Overlining a number indicates a sharp note, and underlining indicates a flat note. Dots indicate pauses in the specified numbers of counts. The dots still indicate the same section of the song is being sung. In contrast, a space or new line indicates a new section of the song is to begin, as though a full four count pause is suggested. If a ratio starts with a pause, it is as though there is a drawing in of air prior to a sound.

A dash indicates a type of musical tie that links the harmonic notes of cosmic dust itself (numerically 2, 6, 4), (reduces to 12 and then 3). The mystical numbers of 12 and 3 in their purest form relate to the fire, air, and water spiritual forces that compose all things. Each dash would indicate one tied note that included air, fire, and water energies.

SIGNIFICANCE OF A RATIO

When analyzing the meaning of the numbers of a dowsed ratio, you must first determine whether you have dowsed a balancing ratio for a personal magnetic broadcast, or have dowsed a neutralization ratio for a world broadcast. On the dimensional World Radionic Diagram, the number dowsed would always indicate the neutralization of the negative trait that opposes the order of the Logos. In the World Broadcast, the dowsed ratios effectively stop the harmful replication of disharmony of that pattern, similar to stopping a virus from spreading over the Earth.

The first number dowsed of a ratio tends to indicate the primary aspect relative to the Tree of Life, as reflected on the cabala diagrams. If it is a neutralization ratio, it reflects the absence of the holy trait, or its opposite. It often reflects the presence of a dark force from the associated position on the inverse universe Tree of Life. *(See charts that follow this lesson.)*

FURTHEST FROM FIRST CAUSE

Zero dowsed within a ratio always indicates malcuth or the bottom of the cabalistic diagrams and does not mean the absence of energies. In radionics, 0 indicates the most dense energies, and the furthest from First Cause (God). When one is dealing with the inverse universe dark force energies by dowsing a neutralizing number for the dark broadcast, another situation arises. The antithesis of the virtues of the Tree of Life would be represented by the dark forces. For instance, a dark force clearing ratio such as 100.1109” would tend to indicate a satanic force. The Taumiel order of satanic demonics is associated with the number one of the inverse universe. Satan was once the archangel over the virtues, and was chief of seraphim. He is considered the head of the fallen angels that live in the inverse universe who project mirrored doubles into this world to torment and tempt mankind into destruction. Lucifer refers to the archangel of the satharial order of dark forces, associated with the number 3, and is not synonymous with satan. The archangel Metatron would be associated with the balancing use of number 1 in radionics in a light broadcast.

The inverse universe use of the number 2 includes the chaigidiel order of dark forces, including Beelzebub. The holy universe contains the archangel Retziel associated with the number 2.

As mentioned above, Lucifer is associated with 3 in the inverse universe dark broadcasts. The archangel Tzaphqui is associated with the light universe 3.

The demonic Ashtaroth is associated with the inverse universe radionic use of 4, while the holy Tzadqui represents the light angelic component.

Five is associated with the demon Asmodeus in the dark world and the archangel Khamael in the light.

Archangel Michael is associated with 6, while the inverse universe counterpart is called Belphegor.

Seven is associated with the angel Hamiel in the light and the arch demon Baal in the dark world.

Eight is the location of the archangel Raphael in the light, and the demon Adrammalech in the dark.

Gabriel is the angel assigned to 9, while the dark 9 is associated with Lilith.

Ten is associated with the angel of karma, Sandolphon, and of the angel Auriel. Metatron is also linked to 10. On the dark universe, the demon Nahema dwells. Familiar spirits, evil nephilim earthbounds, and destructive elementals are also linked to the dark side of 10. In radionics, 0 indicates the tenth force.

Often a missing virtue or unbalanced organ system related to the dowsed number on the cabalistic diagrams can be determined.

MUSICAL NOTES

Simple musical notes cannot be correctly assigned to each of the numbers, because each number contains a composite of traits that are spherical, rather than linear. A combination of different notes could be identified for each number, but the voice or instrument sounding the notes would add nuances that would be variable and possibly incorrect. For that reason, the use of fixed symbols is more accurate. Pigment colors also tend to be unreliable and linear, reflecting only an aspect of the attributes characterized by the mystery of angelic script sounds and numbers. The key is in realizing that numbers and letters, in their purest forms, do not represent linear reality.

If one dowses that the ratio represents a neutralizing ratio for the dark broadcast, then it is prudent to examine any personal risk factors associated with that type dark force. Also, the examination of the absence of associated cabala holy traits should be done.

PLANETARY INFLUENCES

One should keep in mind, however, that planetary influences impacting our individual spiritual DNA make some people more likely to become ill or possessed at certain times of the year, even if they have few risk factors.

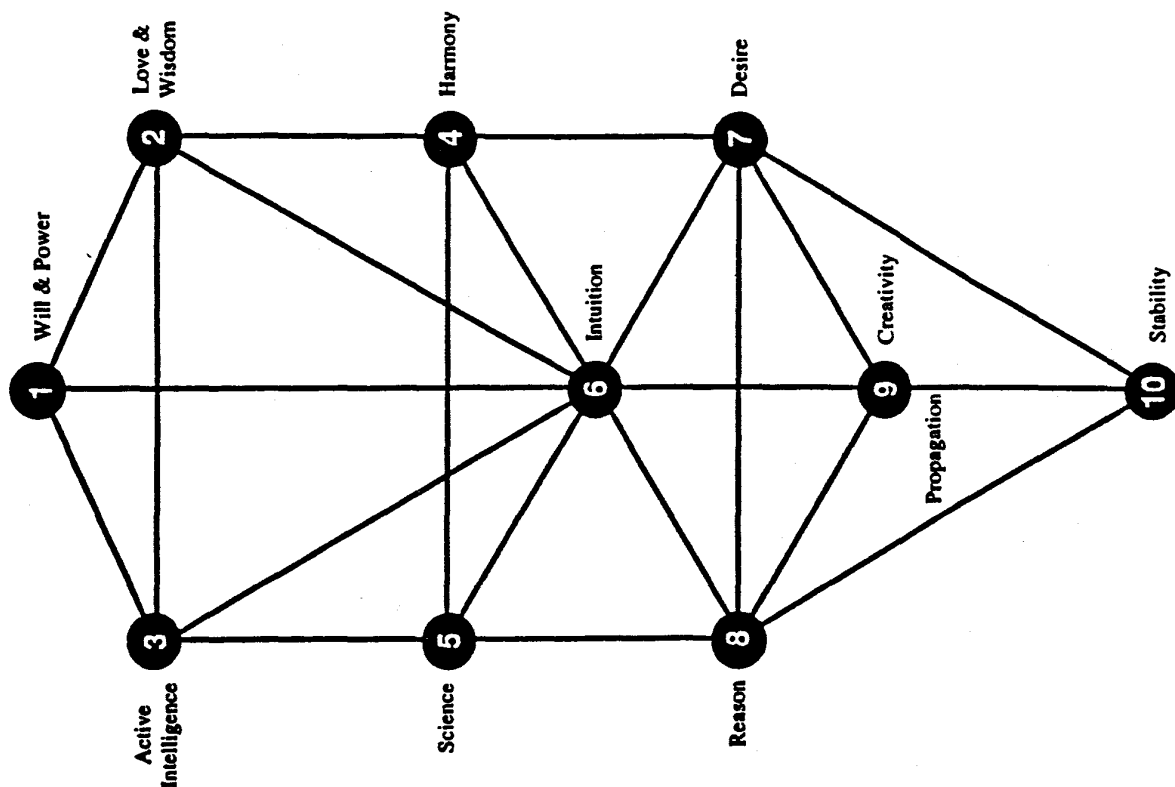

The Earth could be compared to a globe covered with a web of violin strings that cross at different intervals. Certain planets create a tuning fork sound that will cause some strings to tighten at certain times on certain locations. A person living over the resonating string crossings may become temporarily disharmonious, if the tones are stressing a part of the microcosmic body. The human body has its own violin strings, that tighten and relax with the music of the spheres. Different organs, chakras, and emotions are pulled in or out of harmony with the planetary songs as the seasons change. The date, time, and location of our birth supply specific tension on our DNA relative to our location to the poles and center of the Earth.

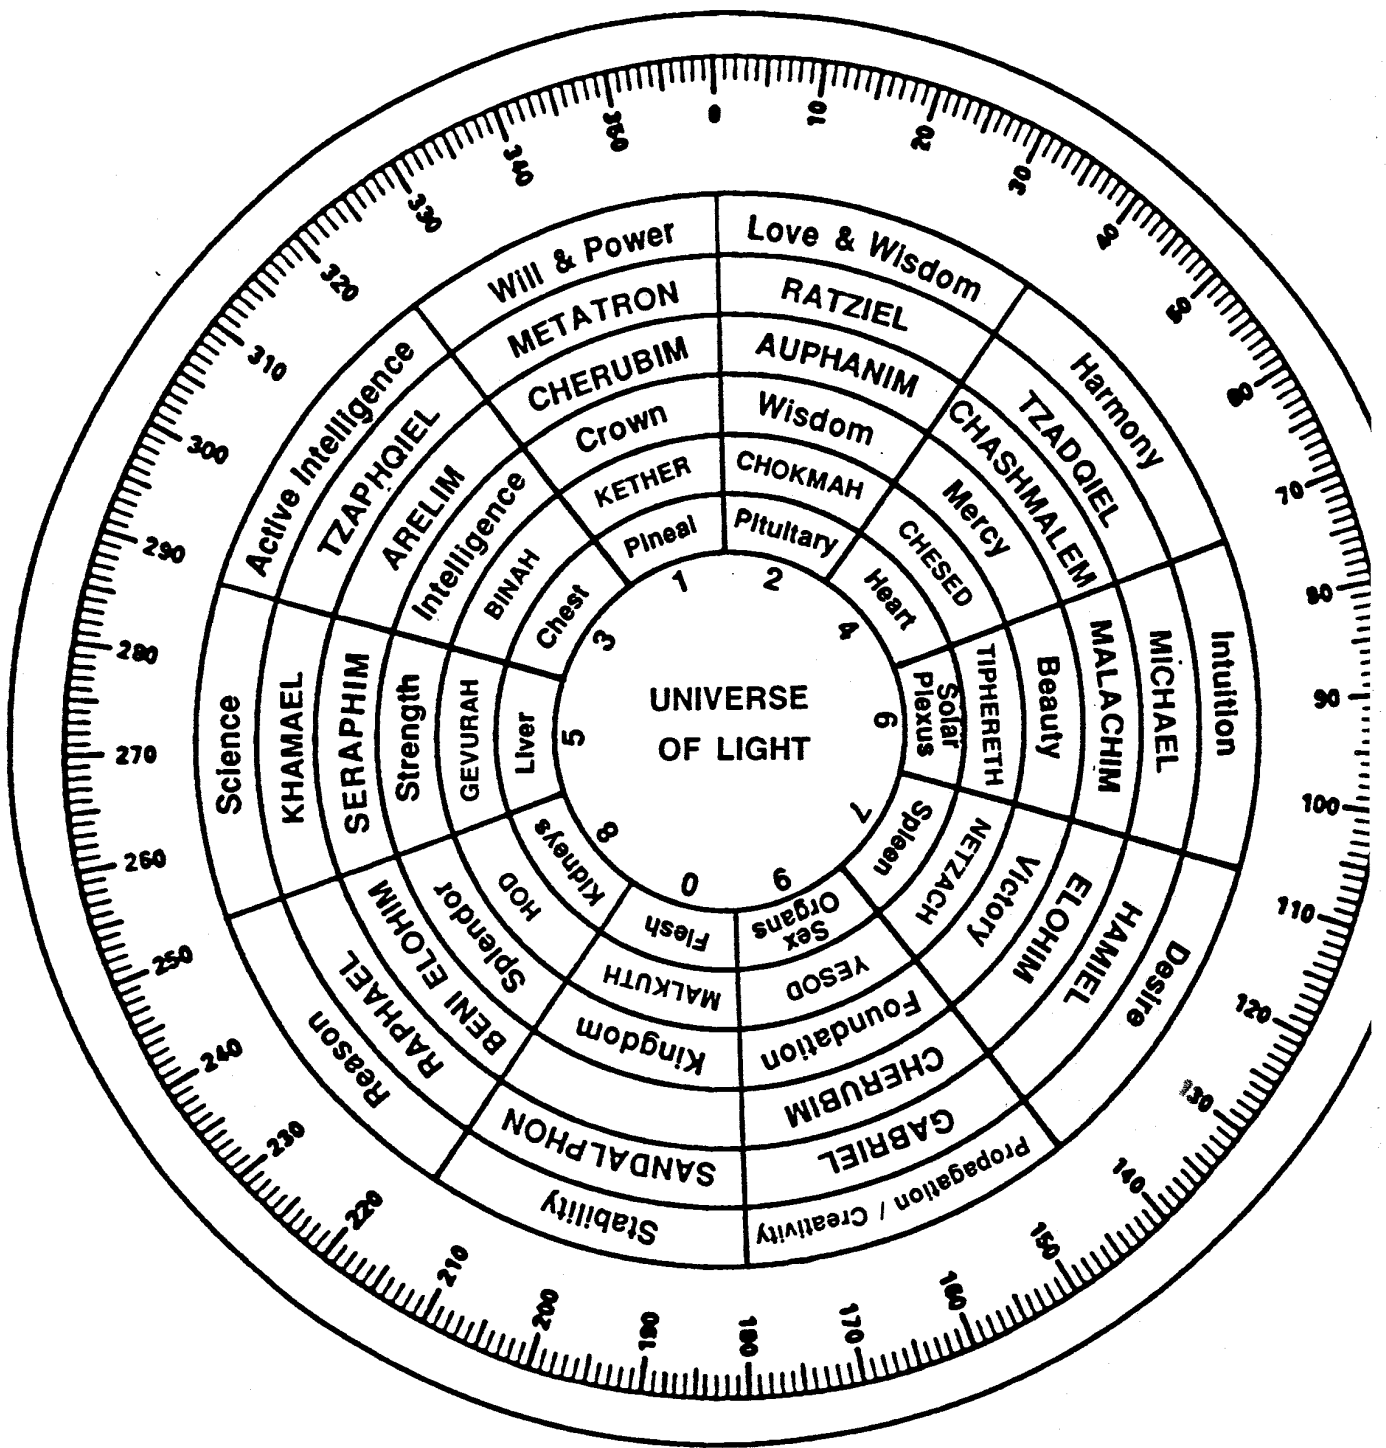

It is known that the speed of light varies in relationship to its geometric distance from the center of the Earth. Dependent upon a person's location, the subtle harmonic variation impacts each individual's cosmic dust pattern composition. As a result, the planetary forces of fire, air, and water exert different influences on different people. The dimensional positions on the World Diagram relate to the cosmic harmony of the universe, and the rotation relative to north and south must be dowsed carefully to take into consideration the planetary pulls of one's location. **Details are very important in such radionics.**

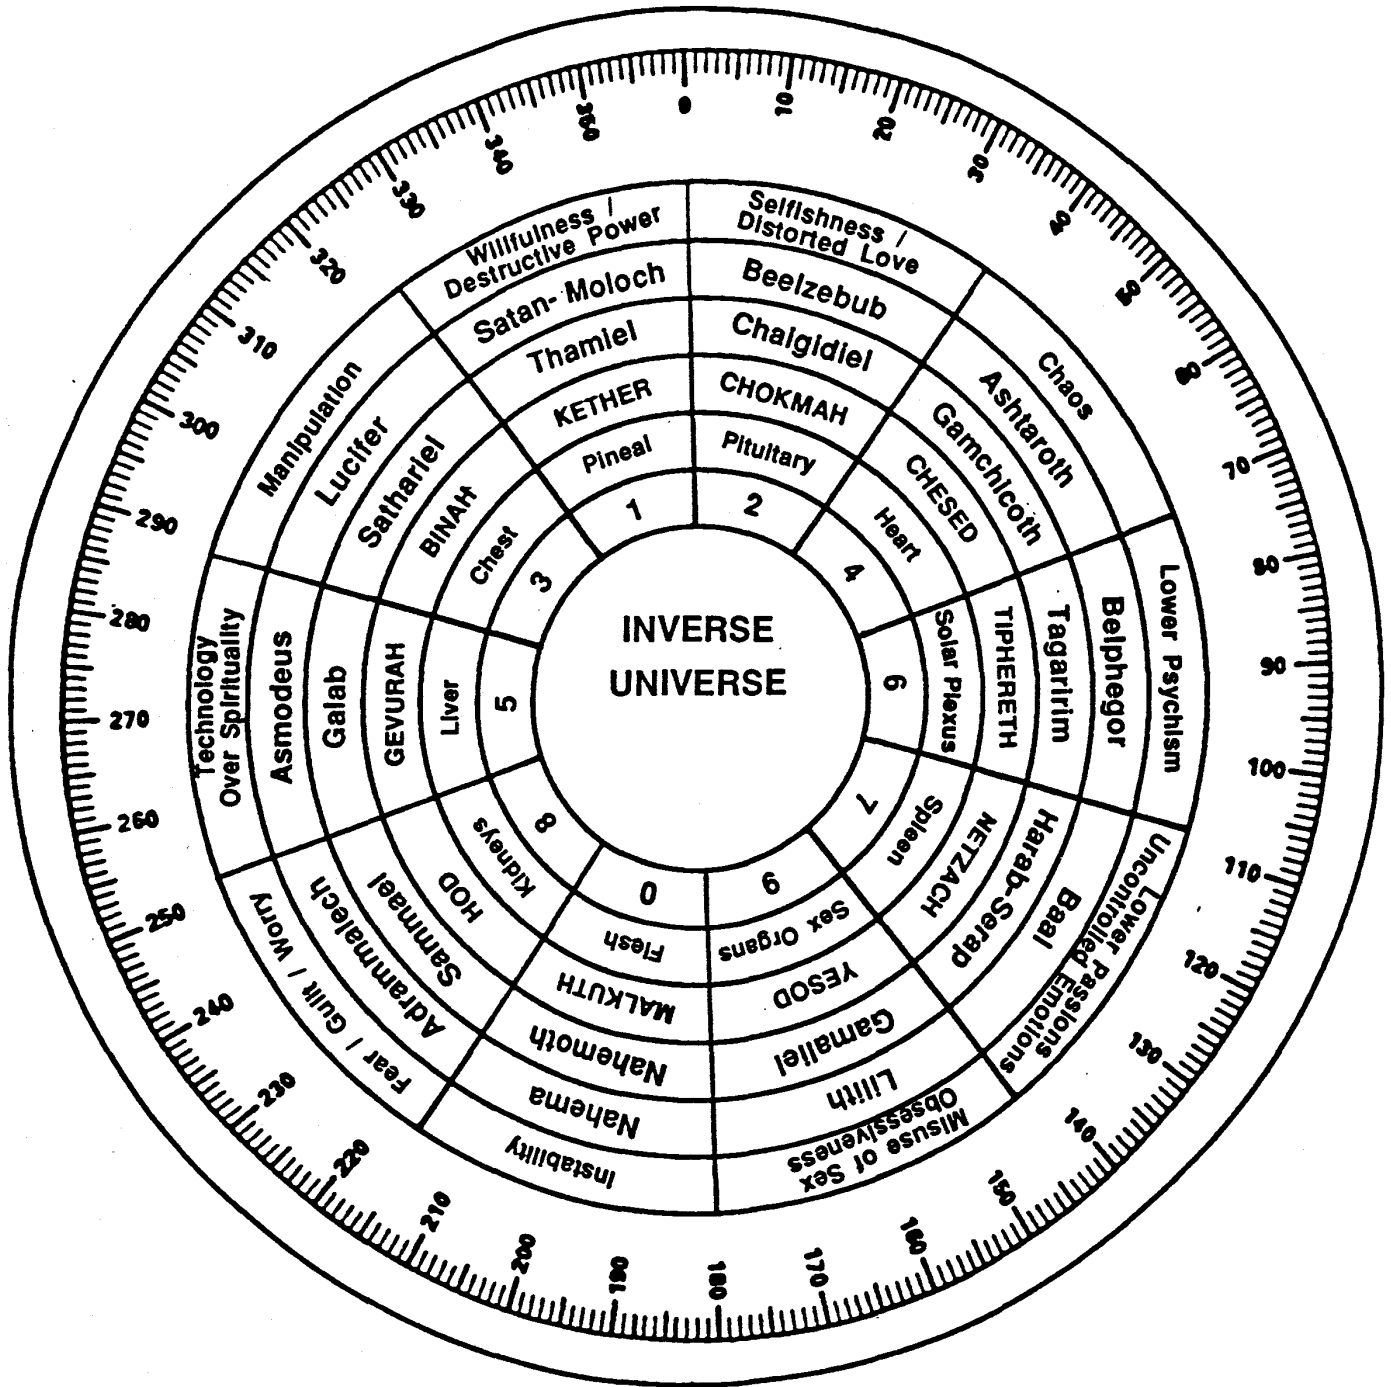

IN THE SEVENTH AGE

We have now entered the seventh age of the Earth. During the sixth age of the Earth, the attribute of devotion to holiness was generally the primary trait needed for a healer to produce spiritual healing. During this current seventh age, details and higher knowledge are much more important in order to heal oneself or another. Each age has specific aspects of Law (or God) that come into focus, and during this age ceremonial, detailed study and work are in focus. Only by knowledge of sacred science can one begin to control (through transmutation) the forces that impact humanity. The importance of detail and precision of radionics cannot be stressed enough. The subtleties of north and south magnetic poles, the understanding of the inverse universe, and the absolute dedication to working within cosmic law are necessary for effective and safe radionic practice. Since the universe is mathematical, precision is required. However, the rewards far outweigh the work involved. For in radionics, the very secrets of life unfold before you, and the ancient alchemical mysteries are revealed to the worthy.

Dimensions, the Inverse Universe and the Pressure of Darkness

Each dimension that impacts the Earth has an equal amount of spiritual energies that can be referred to as fire, air, and water energies. These are spiritual forces that only dimly relate to the physical substance. The attributes of flame, fluidity, and of airiness are more accurate terms for these forces.

Those three forces have been referred to as the Father, Son, and Holy Spirit. The Father could be considered the fire, the Son could be considered the water, and the Holy Spirit could be considered the air. All physical and etheric substances, including thoughts and emotions, contain these three attributes of the cosmic dust particles.

The only difference between cosmic dust particles, is that the three attributes move at different speeds, causing the space around particles to have different pressure variants, resulting in the space collapsing or folding upon the particles in different patterns, curves and angles.

The pressure variants within cosmic dust particles occur in direct relationship to the amount and type of disorder present in the black hole of the corresponding inverse universe that complements the reverse (holy) universe. One could say that the more disorder that is present to feed the inverse universe, then the faster the air, fire, and water energies must vibrate to compensate for the magnetic pull.

It is as though the inverse universe develops a strong gravity with increasing negation fed into it, and so Earth and its occupants naturally become closer to etheric rather than physical as if to balance the negation.

THE CORD IS TAUT

You could compare the inverse universe with a hollow bowling ball that has a tubular cord attached to a bird. Our universe is the bird. The bowling ball is like an anchor, but the bird is able to fly as long as the cord is slack. As the bowling ball gets heavier, the cord begins to tighten, and the ball sinks under water. The bird tries to fly upward to avoid being drowned, and the cord tightens further. The ball sinks deeper, and the bird pulls upward with more desperation. At the moment the cord snaps from the tension, the material world ends. All things in material form must have a balanced amount of cosmic dust in the black hole of the inverse universe. When the balance is destroyed, then material life in this world will end.

NOT MORE HOLY

This must not be confused with increasing holiness on the Earth. A higher vibration does not mean more holy. An angular, sharp, high vibratory emotion can do great damage to the aura bodies. Rather, the presence of order and harmony between the air, fire, and water components and between all the cosmic dust particles and patterns is the measure of holiness.

One cannot say that ice is less holy than steam. However, the rounded, melodious strains of Beethoven are more holy than the hard, angular sounds of the appropriately termed “Heavy Metal” music. Any pattern that promotes order and harmony is moving toward the attributes of God.

This is true in small ways, such as the wearing of certain clothing designs can cause illness. Slogans on T-shirts that promote violence, hate, or lust are often very disharmonious to the cells of the human wearing them. Disorder and filth in one’s house increases the disharmony of the whole planet. Societal disorder, such as that found in the subcultures that kill and rob to obtain money for drugs, poison the whole planet and speed it toward its demise. All mankind is in a soup of cosmic dust particles moving in certain patterns of varying harmony. Anything done on the planet is done to all people.

MANKIND’S INPUT

Mankind has the ability to slow or speed up the death of the planet in a very real sense. When the maximum negation amount has been fed into the black hole, then an explosion will end the world as you know it. The cosmic dust particles that compose people and individual soul matrix patterns will reassemble in a higher

octave to make new worlds at that time. There is a normal rate of change toward etheric bodies rather than physical bodies that is congruent with mankind's wellbeing. Unfortunately, if this is speeded up by excessive disorder, then mankind suffers needlessly and prematurely. Ideally, the explosion would not come until mankind was fully prepared to move his spiritual bodies in a conscious manner into the other world spaces prepared for him. (Jesus said, "There are many mansions," and "I go to prepare a place for you." This is the new heaven and new earth referred to in the Bible. He was referring to movement toward the etheric form rather than the dense physical form.)

The earth degeneration occurring now can be stabilized in time if more people decide to take a very deliberate course of action to help bring order onto the planet. Man cannot isolate himself from the destiny of the Earth, for every negation in every corner will come back to haunt him and his children.

ETHERIC WORLDS CLOSER

The etheric worlds of angels, demons, and earthbound spirits are starting to come into closer proximity in the awareness of humanity, because current disharmony (evil) is causing a premature decrease of mass. This is causing despair and insanity to increase, as man is becoming more sensitive to beings that he is unable to control or understand. The only way to stop this crisis is to decrease personal and planetary disharmony by understanding the other dimensional spaces so as to protect and heal oneself and the planet mentally and spiritually. The careful study of cosmic laws is required, and application of those principles, in order to adapt.

Space is like a liquid crystal that holds the memory banks of all creation, the "Book of Life." Within space exists the mind of the Logos and man's true spiritual essence, as separate from his soul, which is a cosmic dust phenomenon. Thoughts and emotions have components of air-fire-water cosmic dust particles, and can move rapidly, while imprinting space forever in their patterned path. Angular, disordered thoughts and emotions rupture into and fold space ever denser against matter, creating food for the black hole inverse universe. Therefore, they speed the planet's death.

RETURN TO COSMIC DUST

Electricity is between matter and space, and causes matter to return to cosmic dust particles. When Earth matter, such as oil, is burned, the cosmic dust particles free into space, to be used by the Logos in the next universal creation. As a result, the basic harmonics of the planet changes as the Earth lightens its total mass. The Earth becomes lighter as more electricity is used from oil or nuclear sources. Simple devices to create electricity such as windmills and solar panels merely use the free cosmic dust particles in motion in the atmosphere, and are not harmful.

Sun and water contain cosmic dust particles, and these can be reabsorbed to increase the vitality of the individual. Living in electrical force fields causes degeneration of affected humans and speeds up their deaths.

Some electrical fields, supplied carefully, can be used to alter viral and bacterial patterns of cosmic dust into harmless patterns. For this reason, there is helpful medical usage of electricity. Caution must be advised, or cancer can be created, or new forms of disease.

ELECTRICAL FIELDS USED CAREFULLY

Radionic use of electrical fields upon one's picture does not seem to supply any physical weakening or danger in most cases to the individual. However, prolonged use should be avoided, because it tends to "stun" beings in the aura field, including guardian angels. Exorcism with electrical fields on the picture can be very rapid and beneficial for afflicted individuals.

However, only exorcism based on clear knowledge of interdimensional world spaces, cosmic law, and personal integrity is likely to have long term benefits for the individual or the planet. Electrically shocking or willing dark energies off the individual, or pretending they do not exist, will only weaken the world as a whole. Dark energies removed in such a fashion or ignored will torment humans till the end of the world. The time has come to move into the age of responsibility and love for our planet, and not the selfish attitude that desires to visualize some nirvana, while Paris burns.

The Water and Crystallized Worlds and Radionic Aspects

In the ancient writings, it is said that there are four worlds of creation. Each of these worlds has the ten aspects of God listed on the cabala diagrams. The second world springs from the bottom of the first. The third world springs from the bottom of the second. The fourth springs from the bottom of the third.

The first world could be considered the world of fire. The second world could be considered the world of air. The third world could be considered the world of water and ether. The fourth world could be considered the world of physical effects of causes put forth in the third world.

An ancient myth recounts a tale of man as being a creative angel, staring down into the waters of his created world. As he viewed his reflection in the water, he fell in love with the watery reflection, and decided to merge with his creation. As he fell into the water, he was so stunned that he forgot who he was.

At this time, mankind is directly affected by the energies of the third and fourth worlds. The third world could be considered the world of mental and spiritual causes. The third world creates the fourth. The fourth world is the world of physical form. Every disorder and disease of the fourth world has a root in the third world. Not every disorder or thing of the third world will have effects in the fourth world, however. There is a cosmic law which states that all effects have causes, but not all causes put forth will produce effects. The third and fourth worlds follow that law.

DIMENSIONAL SPACES RELATIVE TO WORLDS

Every dimensional space has aspects relative to the third and fourth worlds. Radionically, the same angelic script letters would apply to the same dimension in both worlds. The script letters refer to the air-fire-water composition (Father, Son, Holy Spirit) of each dimensional space. However, the numerical ratio listed under the angelic script would be different for the third and fourth worlds, because the density is different between the worlds. For that reason, there is a diagram to represent the dimensional world spaces of the third world and also one to represent the fourth world.

WORLD RADIONICS

Every dowsed ratio of disorder should be placed in the Third World Radionic Diagram (spiritual causes broadcast) because every darkness has a spiritual counterpart. Many of these same disorder ratios should be placed into the Fourth World Radionic Diagram (material effects diagram) to speed up the physical clearing needed in the material world. In other words, if a disorder has physical manifestations, then fourth world healing would be greatly enhanced by the use of both the diagrams. In the cases of cancer, AIDS, trauma, DNA abnormalities, UFO implanted monitors or grafted DNA, both diagrams should be used. In no case should only the fourth world (material effects) broadcast be used, because the spiritual blueprint from the third world could still cause the disorder to re-manifest. The simplest method is to stack thin copies of both diagrams with the Material World Diagram on top and place all ratios of dowsed disorder on the composite. No cardboard should be between them, but black poster board underneath the composite set and a thick black cloth on top is advisable. (For best results, the combined diagram can be ordered from the publisher.) *(2014 note: This specific method became outdated in 1993. An updated version is available from Sophia Johanson Library and Press)*

Dimensional world symbols (in the appendix) relate to the third and fourth worlds of manifestation. Dimensions are locations relative to the (caballa-illustrated) positions and types of force within the universe. Dimensions refer to the crossing of lines of spiritual and magnetic forces through the Earth's core and on the surface of the Earth.

EARTH'S ACUPUNCTURE MERIDIANS

There are places on the face of the Earth that could be called acupuncture meridians or grid intersections. At these sites, specific forces of power relative to the Tree of Life form vortices. Depending on the types of force exerted upon each intersection of lines, different cosmic laws come into stronger focus than the others in those locations.

Dimensions relate to the folding of space upon matter relative to variable spiritual and magnetic pulls, including positional relationship to the center of the Earth and the Poles, lunar and solar effects, other planetary pulls, patterns and designs, and the presence of specific electromagnetic waveforms and frequencies.

Electricity is a phenomena whereby matter is reduced to cosmic dust and returned to float in space. As more electricity is used, or oil is burned, the Earth becomes lighter in mass, and the magnetic influences upon the dimensional points changes. This is directly related to the mathematical relationship that exists in the universe among all its parts.

Also, a balance of the inverse universe (black hole) that corresponds to this universe must be maintained, or this universe becomes lighter in mass. Manifested traits that go against cosmic law serve as a kind of food for the black hole, since it is the home of disorder. The Earth was intended to only manifest order, harmony, love, wisdom, strength justice, mercy, and intelligence. Due to ruptures in the dimensional doorways to the inverse universe, negation and darkness have spilled onto the Earth. When mankind feeds disorder, that disorder becomes food for the beast. The same energy could have been used for order. All energy used for disorder feeds the black hole, and the Earth becomes lighter, and closer to death.

Also, nuclear underground testing causes straining and ruptures through the interdimensional doorways, allowing disharmony from the black inverse universe to enter Earth.

The artificial use of certain electromagnetic waveforms and frequencies in an area can produce a kind of a hologram of an interdimensional doorway that can be physically or astrally entered. Certain material patterns, such as the crop circles, also produce an etheric counterpart of the interdimensional doorways. Many aliens use the doorways through those two methods. The electric methods produce a fourth world phenomenon, and the symbols produce a third world phenomenon, that reflects upon the lower fourth world.

DOORWAYS TO HELL CREATED

Recently, the harmful alien population of the Earth has attempted to reduce human vitality by the creation of small robotic devices that burrow underground and emit frequencies that weaken the human brain stem's ability to control body functions. As a result, people experience confusion, irregular heartbeat, and unstable blood pressure. These dowse out on a chart as "robotics", "alien monitors" or death rays ." They cause profound weakness in sensitive individuals, and a faint high pitched whine can sometimes be heard audibly. The area over the robotic device dowses as a strong noxious zone.

If the device happens to burrow over certain grid crossings, an interdimensional doorway to the inverse universe can occur, and dreadful sounds such as moaning and screeching may be audible. It is vital to radionically shut such a doorway to prevent humans from "falling into hell." Such an idea may seem ludicrous to anyone who has not witnessed such a horror, but I assure you that the danger is real.

Currently, there are holy beings and humans working diligently to shut those doorways and radionically blow up the robotics, and progress is being made. In the interim, it is important to dowse all the ratios needed and place them on the composite world diagram to remove them from all dimensional spaces in which they manifest. It may take days and several layers to remove all aspects of an individual robotic device or "doorway to hell." During that time, the individuals in the area may have nightmares, feel weak, look pale, and have ringing ears or blurry vision. They also may move slowly and feel depressed.

Many times one must dowse a layer, wait an hour, and then dowse another layer of a disharmony. It is like peeling an onion. A more detailed explanation of the dowsing process will be given later in this book.

DIMENSIONS EXIST IN SAME SPACE

All dimensions could be said to exist in the same area simultaneously, like a series of boxes within boxes. Dimensions have an angular aspect that varies among dimensions, so the boxes could be imagined as being different sided and shaped, but each placed inside the next largest size.

A person's normal waking consciousness could be considered focused inside the center box. A key point is the realization that a person is his point of consciousness, and to the dense form he is used to recognizing as his identity. One could take this to mean that a man should only focus on certain aspects of certain dimensions, but that is a misuse of Cosmic Law. Mankind has a responsibility to transmute disorder in all the worlds that he has created with his fellow Suns. This implies that he must see into all spaces and attempt to understand and transmute disorder in those spaces.

Now imagine there is a hollow tube from the center box to all the outside boxes. In order to move from one dimension to another, a person has to move his consciousness inside the tube to the other boxes, and enter inside one of them. A person's dreaming body is the vehicle used to move through the time/space tube into the other worlds that exist alongside this world.

This dreaming body can be moved through the use of electromagnetic vortices, or by the use of symbols, such as those of the World Radionic Diagrams. The regular use of symbols, by dowsing or meditation, produces the human ability to freely operate in all the dimensional spaces safely. Such a person can enter any space and reorganize any disorder into health and order.

DEADLY RESONANCE

Any disorder of the third or fourth worlds can be expressed mathematically as a ratio. This pattern of disorder can be neutralized like an opera singer shatters a glass, by placing the ratio into the combined radionic diagram. Ideally the blueprint from the spiritual world is fractured, and then the fourth world manifestation eliminated by the placing it on both diagrams.

The ancient teachings say that the world is created from ten numbers (forces) and 22 sounds (letters). It is not an accident that we are able to clear disorder in 31 spaces. The 32nd space refers to Kether (the Crown), so no intervention is possible. In other words, there are 31 reflected aspects of creation in which we have power to create order out of disorder.

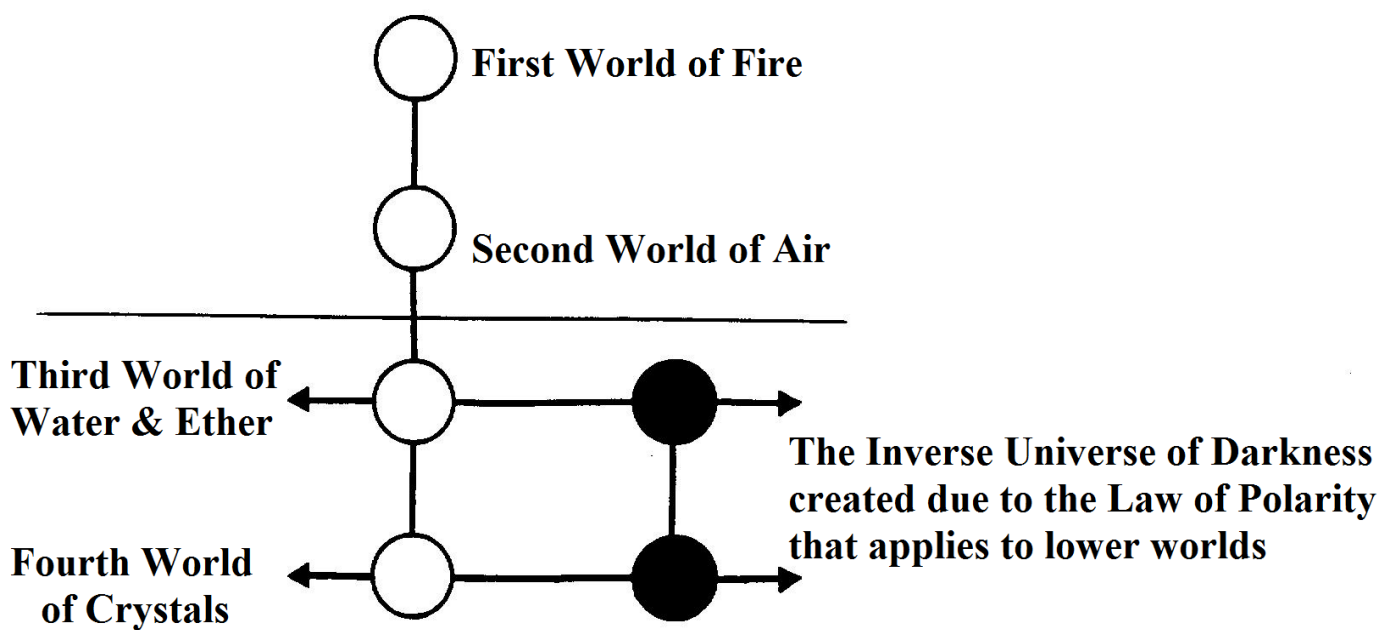

Each human is a microcosm of the planet and manifests aspects of each dimensional space on bodily locations. Disorder from a past life, current life, group karma, global, or dual soul disharmony may reflect in illness in a corresponding dimensional location. Every personal disorder causes a reverberation on the exact site on the planetary grid system. In that sense, earthquakes, volcano eruptions, flooding, and other problems can be due to disorder in the collective dimensional space of individuals and the Earth.

Likewise, anything that disturbs the Earth mass also disturbs the tautness or relaxation of the mighty cobweb of violin strings of Logos characteristics that comprise the dimensions. Coal mining, oil burning, and nuclear testing unbalance the very spiritual fibers of the planet and threaten its survival.

Every violent, materialistic, or excessively carnal thought or act by any human on the Earth adds corresponding negation into a location on the Earth grid system. As these disharmonies pile up, illness in certain organ systems will manifest, and global problems such as earthquakes occur. Man is a microcosm of the Earth. The law of "as above, so below," is far reaching, and makes one understand why healing the planet is so important.

Each world has aspects of the ten traits of God and the 22 sounds. The Inverse Universes have opposing traits and move inward to implosion.

The Holy Universe moves outward for progression of souls within cosmic laws. The tension between them allows physical manifestation to occur.

Getting Your Wings: Time and Interdimensional Travel

During or after exposure to holy teachings, a phenomenon may occur in your life related to your ability to move awareness into other time frames and dimensions with increasing consciousness.

This may initially be experienced with fear, confusion, dizziness, nausea, and lethargy. Rest assured that the symptoms are temporary and merely a signal that you are successful in pushing toward your soul's progression. Your spiritual aura bodies, like butterflies, are breaking out of the material cocoon and learning to fly. However, your lower self sees itself as a caterpillar only. Because your lower self (including lower mind) feels threatened by change of concept, it reacts with hostility, fear, or extreme anxiety.

With such changes, you may feel as though the room is fuzzy, darkened, or strange-appearing. You may feel sleepy and sense a pressure in your solar plexus that may be interpreted as nausea. This is due to your spiritual bodies looking and listening from another dimension, as though hovering above your head in order to hear and see better. This is a mechanism whereby your spiritual self can learn and rapidly advance much more quickly than in normal consciousness. In such a state of heightened awareness, one is able to view things from many angles and understand on a very deep level what is being taught. At first, the conscious mind may just feel confused as glimpses break through into normal awareness.

HEIGHTENED AWARENESS

This same phenomenon has been sought by truth seekers throughout time. In the past, people attempted to reach such a state of heightened awareness through the use of drugs, induced physical pain, starvation or fasting, and sensory deprivation. Meditation for days on end, near-death experiences, and profound fright or embarrassment also seemed to facilitate the ability to reach such a state. Self-hypnosis through chanting, or the listening to certain sounds, or viewing designs such as mandalas were all used to facilitate such a state.

It was also observed by the ancients, that certain beings or people may cause such a state to occur spontaneously in those around them. This was greatly sought after in the past, because spiritual development was rapid in a virtuous individual who had been graced by such a facilitation into heightened awareness.

TEACHERS AND STUDENTS

In order for the spontaneous "flight" to occur in a teacher/student setting, several factors must be in place.

- 1) The student must recognize the teacher. The student must not be there merely to sound off his own opinions or to have fun. He must be there because his soul has called him there in order to meet a true teacher.
- 2) The student must not give in to fear. Often, as the joyful spiritual bodies crawl out of the cocoon, the lower self screams in terror, and the student yanks the butterfly back inside. The student will then leave the setting, or wall himself off with hostility and agitation.
- 3) The student must desire spiritual growth above immediate comfort. Unless the subconscious mind agrees to allow the "flight" then the person will not benefit. Free will prevails. Sometimes a person subconsciously agrees to "flight" but he still experiences fear and confusion with his conscious mind until he adjusts. This is not a serious problem. It will pass.

REASONS FOR FLIGHT

There are several practical reasons for soul progression to advance rapidly when spiritual flight begins. For one thing, understanding of complex soul lessons is greatly enhanced by the ability to view situations out of body and time. Also, the correction of karma is possible on other planes, so that the person no longer has to

reincarnate by the wheel of necessity. The person has the real probability of gaining enlightenment and mastership in a short time.

Several possibilities exist when the spiritual flight begins. It is as though the person is able to “split” consciousness between several bodies at the same time in order to fulfill a variety of functions. The more “splitting” that occurs, the faster the correction of karma and the faster enlightenment occurs.

In the truest sense, splitting does not occur. Man has thirty-one aspects of himself that operate in the different dimensional spaces (including his physical form) at all times. The inability to control and monitor those aspects results in confusion and spiritual ignorance. Man receives trauma, possessions, and fulfills karma in those spaces all the time.

Enlightenment is the ability to function in an intelligent manner with consciousness in all of the spaces simultaneously. When man lives congruently with cosmic law in a conscious fashion in all 31 spaces, then he has reached a state of Christ consciousness.

MEMORIES STORED IN DIMENSIONS

The ability to retrieve memories from those spaces and to heal disharmonies that exist in those spaces is vital for Suns in this final material Earth cycle. Man’s ability to help others on the planet is dependent upon his ability to function in the 31 spaces consciously. The sensation of “splitting” is due to the process of acting in a deliberate fashion in more than one dimensional space at the same time. The uncomfortable side-effects are temporary.

WORLD MAP SYSTEM HELPFUL

Using the World Radionic System helps one develop consciousness into those spaces more rapidly than any other teaching system. Direct contact with holy beings or their chelas may spontaneously awaken individual consciousness into those spaces, as well.

A tremendous shock to the system, such as a near-death experience or hallucinogenic drugs, may awaken a person to some of the spaces, but is a less reliable or stable method. Insanity may result, as the person is thrown too soon into worlds, without guidance or knowing how to operate in those worlds. A person must get steady footing by a method such as the World Broadcast System before he can operate in those worlds without fear.

It is as though each of these spaces is the room of a house. Most people have the light on in one room only. In the rest of the rooms, they stumble around in darkness. Just as though different cells make up an organ of the body, different dimensional spaces encompass the spiritual body. It is as though man thinks he only possesses skin, with no awareness that in darkness within his “house” he has a pumping heart, a liver, and a spleen. As he learns to shift awareness to different parts of himself and direct activities in those areas, he gains power and grace. Eventually, like a dancer, he moves effortlessly through the spaces with awareness, not needing to think of each step.

LIKE DRIVING A CAR

When a person learns to drive a car he has to think of when to shift gears, push in the clutch, turn the wheel, and look at the road. He is at first awkward, the car lurches, and he may crash if he drives too fast. Likewise, a person feels panic when they are first “behind the wheel” of their other dimensional bodies. They need to think methodically and may feel awkward and confused. Eventually, they fulfill the functions in each space more gracefully and automatically.

In those spaces, they learn to detect when a “wreck” may be about to happen, or if they need to help a fellow Sun with a “flat tire.” When they gain in strength, they are able to help many of the confused Suns that

stumble in those spaces. They don't have to close their physical eyes and concentrate on helping someone, because it is automatic for a clear Sun to help his fellow man.

It is as though the awakened Sun flies 31 airplanes set on "auto pilot" that are programmed to comply with cosmic law. Just as if the pilot is able to sit in a control tower while all the planes fly gracefully, controlled by the computerized cosmic law. The pilot has emergency systems that alert him to distress in any plane, and can switch on a video camera in any of the cockpits to see what is going on and make the necessary adjustments. He sees many planes around him flying erratically, crashing, or burning, while their pilots are asleep at the controls.

ILLNESS REFLECTS ON BODY PARTS

When someone fails to operate within cosmic law in one of the spaces, a "crash" may occur, resulting in illness in a dimensional "body part" of the affected human. This in turn, causes the subconscious mind to think that part of the body is dead or missing. This is why many people will muscle test true to the statement "I am dead" or "I don't have a liver," (or another body part). The soul energy, or Logos Angstroms, is cut off from that part of the body, and eventually illness or pain develops.

Only a person enlightened into that dimensional space can "see" well enough to enter therein and assess or treat the damage.

RESULTS FROM FLIGHT

The following functions occur during spiritual flight in a person of an adequate stage of enlightenment:

- 1) Attendance in astral classes or learning directly from masters who are in physical or non-physical form.
- 2) Communication with holy beings, helpful alien beings, angels, and other life forms.
- 3) The correction of karma by working with the spiritual bodies of former associates or family-members as a method of learning spiritual lessons and healing of old wounds. Parallel lifetimes may be entered as a method to do penance or healing for some past life or present life injustice or resentment. (Only a person who is able to work freely on a Buddhic level can move into the past or future and restructure it, however. It is almost impossible that a person still in flesh can do this. Jesus was able to do this because he came from a different type of soul stock than mankind. Humans can change some futures, though, by putting forth new causes today that are programmed to cause a certain effect in the future. By the changing of attitudes, many negative effects are prevented. When the probabilities for a future outcome pass ninety percent, only a master can prevent the outcome).
- 4) One learns to function as a guardian angel over children or adults with bright soul lights. One is taught how to alert those in danger, do spiritual healing, exorcism, and other forms of service for the Suns on the planet.
- 5) By practicing flight into other dimensional world spaces, one is able to gain in strength and power, therefore more able to control negative forces emanating from any dimension. Fewer depressions, anxiety spells, or possessions result as the person becomes proficient in other realms.
- 6) In some cases, evolved Suns may help to stabilize the planet during times of physical or spiritual crisis on a global scale.

MALADAPTIVE REASONS FOR TRAVEL

There are also maladaptive reasons that a dreaming body may travel into another dimensional space and/or different time frame.

Some medications, recreational drugs, and poor dietary habits alter the neurotransmitters in the brain and affect the control that one normally has over the dreaming bodies. Also, poor emotion and thought control makes a person unable to remain in the present time with all dreaming bodies intact.

For instance, the reciting of childhood traumas to others will cause one of the dreaming bodies to travel to that time/space, and it may get stuck there. Excessive fear of the future may cause one to travel to a probable future and be at the mercy of negative entities in that space. Over-attachment to the physical body may cause the dreaming body to believe it is dying when it faces any crisis in its travels, or sees the death of humans in the future. It may think it is dead, and the person will muscle test as being dead now.

A person who is not calm and sober in the face of normal earthly problems is likely to be hysterical in the spiritual bodies as well, and get dreaming bodies hung up in different worlds. It is imperative that every student of truth learn to control thoughts, emotions, speech and actions in the physical realm so that the same control will be manifested in etheric realms. If he fails to do so, he is unworthy to study higher truth and will be dangerous on any spiritual mission.

STUDENT TEACHES OTHERS TO FLY

An interesting side effect after a period of time, is that the student begins “pulling” other people out of their cocoons, just as the teacher did to him. The student may be sitting in a lunch room with a person in need of help, and suddenly be aware that he and the other person are communicating out-of-body. This can easily be dowsed or muscle-tested on both individuals.

When a spiritual healing is in progress, the student may be focusing in a dimensional space (be out of body) for several days correcting any accrued karma, or healing past or present relationships. Physical healing, needed for a purely physical reason, does not usually require one to leave the body (focus on a dimensional space). However, 70 percent of all physical illnesses are related to mental and spiritual causes put forth in this life or a previous life (or occasionally a future life).

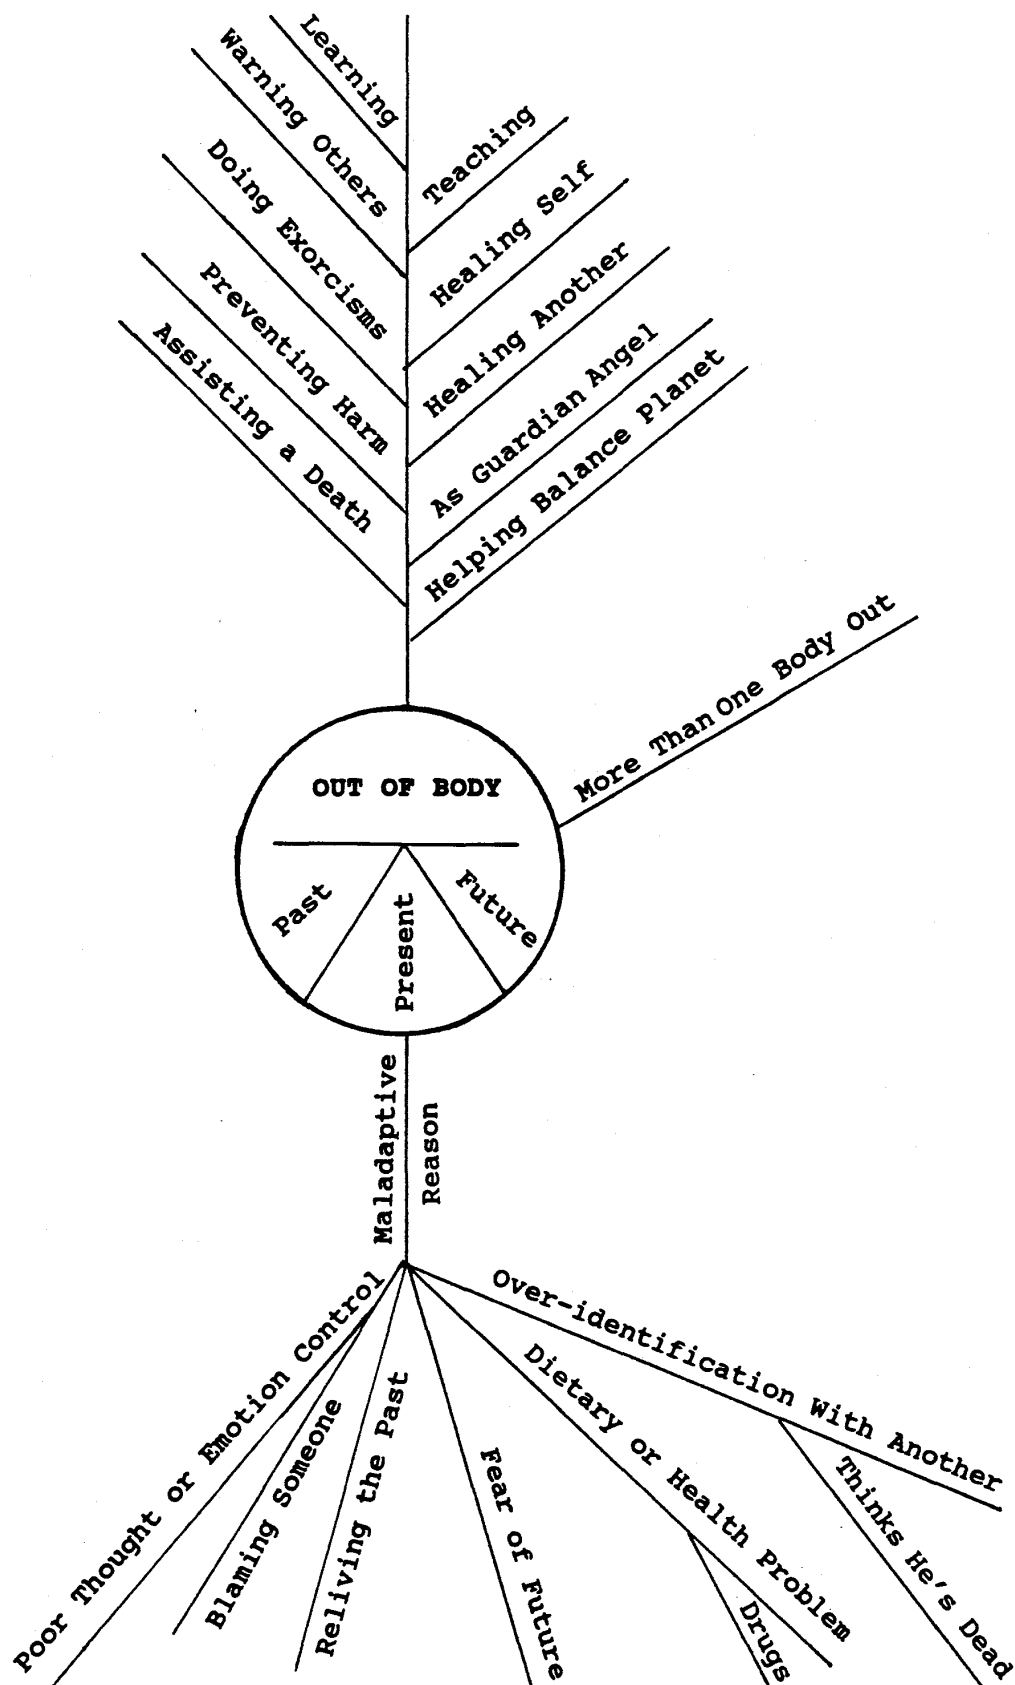

When the soul has agreed to advance rapidly, and the student can withstand the pressure, like an astronaut on warp speed, amazing changes of awareness then take place. The student becomes aware that time is fluid and different than he had supposed. He gains in spiritual discernment, and may feel violent repulsion for beings of the left-hand path of darkness. He also feels great joy around holy people or beings.

INSOMNIA COMMON

Initially, he may have trouble sleeping, or hearing loud noises, or being in crowds. He may feel slight nausea or vertigo when he leaves his body. It is imperative that he retain a sense of sobriety, serenity, and harmony at this developmental stage. If he gets hostile, overly anxious, fearful, or agitated, he may stop his progress, for his soul will require the higher bodies to retreat into the cocoon rather than cause him more stress than he can handle (or chooses to handle). It is unlikely that another opportunity will be given.

One must view such a chance to “gain wings” as grace from God, and not a curse that makes us a little uncomfortable. By living life as a holy warrior, one is able to withstand the stress that is part of expanding awareness. When expertise is gained in the other dimensions, one will feel “the virtue go out” of himself, just as Jesus did, when the spiritual self goes to heal another suffering human being.

When this state is reached, the student works 24 hours a day with all of his higher bodies, blessing and healing the Earth and its inhabitants. He has fulfilled the purpose of his soul.

Soul Identification With Body Parts

In order to cure disease, the healer must first identify the plane of causation that produces the effect (disorder of the body). The plane of causation may be on the material, mental-emotional, or spiritual planes.

If a physical disorder is due to a physical cause, it usually must be healed by physical or etheric means within cosmic law. An example would be lung cancer produced by smoking two packs of cigarettes per day. In many cases, smoke congests and harms the etheric chakras and eventually destroys them and produces illness. Physical remedies would be appropriate in such a case. However, only if the afflicted person stopped the behavior would it be appropriate to do radionic or spiritual healing.

If a healer attempted spiritual healing on a person who refused to accept his karma, then the healer would be doing black magic. If a healer is able to teach the afflicted person the lesson inherent in the illness, and the afflicted gains spiritual insight, he then may be healed by spiritual means. The lesson does not have to be taught verbally by an advanced healer, but to do so enhances the value of the lesson to the conscious mind of the sick person.

In some cases, the healer takes on the karma of the illness and is able to transmute it within himself, but this is dangerous and should not be attempted by a student. Severe illness or death could result.

BLACK MAGIC

In many cases, it is black magic to treat an illness with physical methods. To try to prevent the karmic results of sexually transmitted diseases that were incurred due to promiscuous behavior is black magic. A healer must weigh very carefully the lifestyle implications upon the disease before he decides to intercede. He must make sure that the healing would be within cosmic law. If he refuses to make these considerations, he takes on the karma.

JUDGMENT VS. DISCERNMENT

There is a common metaphysical error of thought regarding the misuse of the Biblical quote, "Judge not lest ye be judged." Judging is not the same thing as discerning. By the understanding of cosmic law, one is able to discern harmony from disharmony as it reflects in lower life. To avoid breaking oneself against immutable cosmic law is wisdom. To stand between a disharmonious person and the wall of the law as the person bashes himself bloody (and you) against that wall is stupid.

"An eye for an eye," means exactly this: Every person will receive the exact amount of disharmony that he produces by his ignorance or rejection of cosmic law. The whole purpose of karma is to teach mankind the principles of cosmic law through the lessons of pain. If a person learns the lessons, then the pain is no longer needed or required within law. For that reason, a powerful healer is actually a teacher of cosmic law.

The laws of vibration, rhythm, gender, spiritual polarity, change, use and cause and effect are primary parts of an objective reality that makes up the hierarchal system of the Logos. Whether a student wants to accept those laws or not is irrelevant; he must obey them or suffer. His Higher Self is congruent with those principles of the universe, and so he cannot be connected with his soul if he rejects the cosmic laws. His refusal to accept the traits of the Logos that are part of his Higher Self causes a deep grief and illness on a soul level.

BALANCE OF TRAITS VITAL

The primary traits of the Higher Self include: love, wisdom, divine intelligence, strength, severity, mercy, harmony, beauty and justice. To be in clear contact with the higher self requires one to be in perfect balance of all those traits.

A person who is deeply merciful may be cut off from Higher Self because he does not balance his mercy with justice or severity. God rests in the balance of the traits and not in the exaggeration of one or two traits. A common ploy of evil forces is to encourage a person to go toward one trait in excess, at the starvation of the other holy aspects.

If a person misuses one of the holy traits, or rejects one of the traits or a primary cosmic law, then the person experiences a spiritual illness that later will reflect on the lower body. ("As above, so below"). This person cannot be treated with physical-etheric methods with any success other than the shifting of symptoms.

Likewise, a person with a primary mental-emotional problem cannot be treated with physical-etheric methods with any success. All mental and emotional problems reflect a resistance to some aspect of cosmic law or a refusal to manifest a holy trait. For instance, depression is often due to entity possession. However, some people will remain depressed despite being cleared of entities if they have poor self-control.

The Law of Vibration can be used to pull a person out of depressive thought patterns. By singing, or painting, or holy thought, the cyclical dark thoughts can easily be overwhelmed by the vibrations of harmony. Many people, though, have not developed holy willpower, and so prefer to wallow in self-pity, or go to group therapies so they can blame somebody out loud. They get to enjoying their misery, and reinforce the damage by thinking about it and talking about it.

By far, the biggest mental reason for ill health is excessive attachment to the physical body. By fearing death or disease, you increase the likelihood of it manifesting. This is not to be confused with the natural acknowledgement of ill health so that one can determine the appropriate plane of action. Denial is not transmutation.

Earthbound spirits prey on Suns' tendency to think the dreaming body is physical. With such attachment, astral rapes and molestations are possible by such slimy characters. There are thousands of mutated mixed-alien/part-human astral beings at the current time who torment the dreams of innocent people with vulgar images. These confused beings have no heaven, only a hell, and often a very carnal hell at that. Obsessive and perverted sexuality cause them constant torment, and they try to pull in the dreaming bodies of Suns. They can only be removed by numerical radionics on the world map. The person aware of his spiritual identity cannot be seriously traumatized in the other dimensions during sleep or meditation, and he rebukes the sexual violators even in his dreams.

Even in the case of physical rape or molestation, non-attachment to the body speeds healing. The body is just a shell, and that shell gets wounded from time to time and is someday discarded. In fact, it is discarded nightly. Of course, tenderness must be shown the victim, but ideally the victim realizes that his spiritual body was not raped, and his physical body means little.

OVER-IDENTIFICATION PRODUCES ILLNESS

Over-identification with another person's illness or trauma is a primary cause of spiritual illness. Often, in sleep, the dreaming body will float to a possible future scene that may contain some horrible deaths or mutilations. If the dreaming body thinks of itself as a physical body, it can get trapped, and feel dead, raped, or in a state of frozen terror.

In such a state, the person may easily get attacked or attached onto by an evil spirit present in that other world. The spirit will attach at an area that corresponds to a physical body organ. Different parts of the human physical body are correlated with different worlds in different dimensional spaces.

If a left-hand path energy hooks into a body organ location, the person will lose soul identity to that organ. They will muscle test as not having that organ. If they say, "I have a heart," they may muscle test weak (false). If the healer touches the heart chakra, the person tests weak.

There are some methods that appear to restore the etheric energy of the organ when muscle tested. Some Chiropractic adjustments fall into this group however, the soul identity is still lost to the organ, and the adjustment will not hold. The person will feel better for a while, and then need to come in the office over and

over again for the same treatment. You cannot heal a spiritual problem by an etheric or physical method. The symptoms are merely temporarily eased or shifted.

In some cases, the spiritual invader or trauma merely shifts to a different spot. Roling, Reiki, Touch for Health and other methods do not remove the cause of a spiritual disorder, only the symptoms. Purely etheric or physical causes can be removed by such methods, however. Rough massage may cause an entity to dislodge from the client and go to the healer or another patient. Electrical stimulation does the same thing.

CLEARING SPIRITUAL DISORDERS

In order to clear spiritual disorders, one must first determine characteristics of the particular disorder. Charts and lists are beneficial at this stage. It is as though one must know the directory name (as in a computer) to know what files are listed therein. By tracking down similar names or traits, and by dowsing the dimensional spaces affected and the densities the being interfaces, one is able to focus enough to clear the disorder.

The most common spiritual disorders are:

1) Entity possession from a human or non-human being originating from an intersecting world space in the present time, past life, or future. Time identification is helpful to allow the healer to focus more clearly. Many possessions are from a possible future, or even the prehistoric past.

2) Person muscle tests as thinking he is dead. His eyes may look hollow and corpse-like in appearance, and his skin may be ashen. This may occur due to over-identification with seeing death in the past, present, or future, or because his dual soul is earthbound between lifetimes.

3) Person muscle-tests as hating God or higher self. This is usually due to over-identification with the physical body, and/or hate for another person. Anytime someone hates another person, they hate part of God, and will also muscle test as hating their own higher self. Hate always cuts one off from all that is joyful and beautiful in the soul. If someone blames God due to personal or world physical tragedies, they must be reminded that everything happens out of law and order in the universe. Personal and planetary karma are chosen by groups and individuals, so there is no one to hate. God is merely the part of oneself that is pure, noble, orderly, and loving. God is the Law. The disorders occur when the lower self rejects the Higher Self, which is order. Merely communicating subconsciously (even from afar) to the troubled person as to the reality of their own holy Higher Self often will clear the problem. One must usually remind them that they are not a body, but a soul that has a body.

4) Blaming or hating another person for the death of a loved one in a past, present, or future life is a common cause of illness. Hating a person for a perceived childhood trauma is another pitfall that causes illness.

In Robert Wade-Mahaney's book, "(Wade-Mahaney)Psychogenic Research" he terms this phenomenon a "Psychic Tantrum." Blaming someone for not saving your life or making you happy is what Wade-Mahaney has called a "Rattlesnake" that is ready to strike your health at any time.

Talking to the subconscious mind of the person clinging to hate is often the best method to clear the problem. One must ask them to release hate, and re-connect with higher self.

To forgive requires a person to be willing to transmute the energy of lower willfulness into holy will. Love of lower self must be transmuted by the will into love of that which is orderly and congruent with cosmic law. Petty emotional attachment to trauma must be transmuted by the will into intelligent understanding of higher law.

The energy that was used to hate must be pulled from the lower chakras to the brow chakra to allow true forgiveness to take place. True forgiveness is an act of higher mind and will, and not some weepy emotional decision. True forgiveness is not mental arguments and listing of wrongs; those are of the lower mind. Any therapy that encourages repeated "ventilating" does not help the person transmute the energy for higher purpose.

MOLESTATION MEMORIES

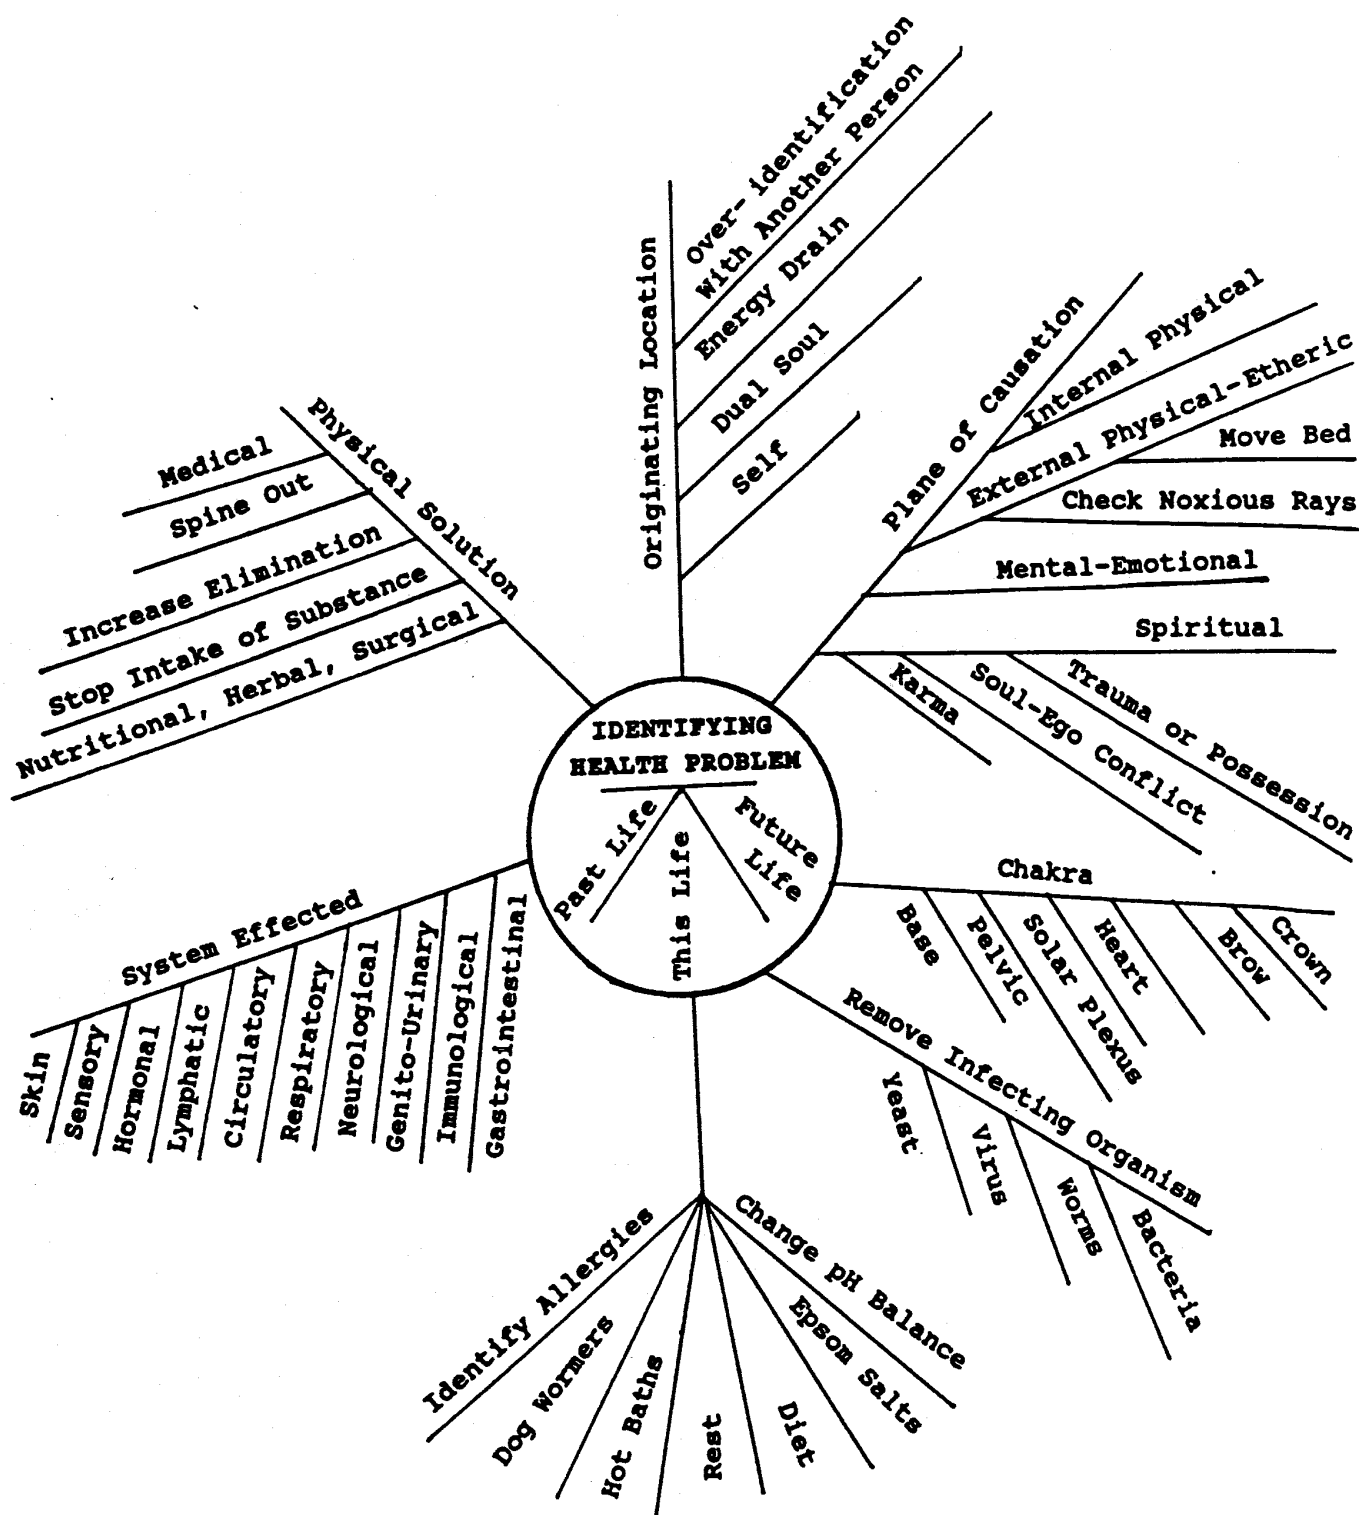

Many resentments that people hold against parents, siblings, and spouse never even occurred. An example is the recent phenomenon of adults suddenly remembering that they were molested as children. In many cases, the accused person is innocent.

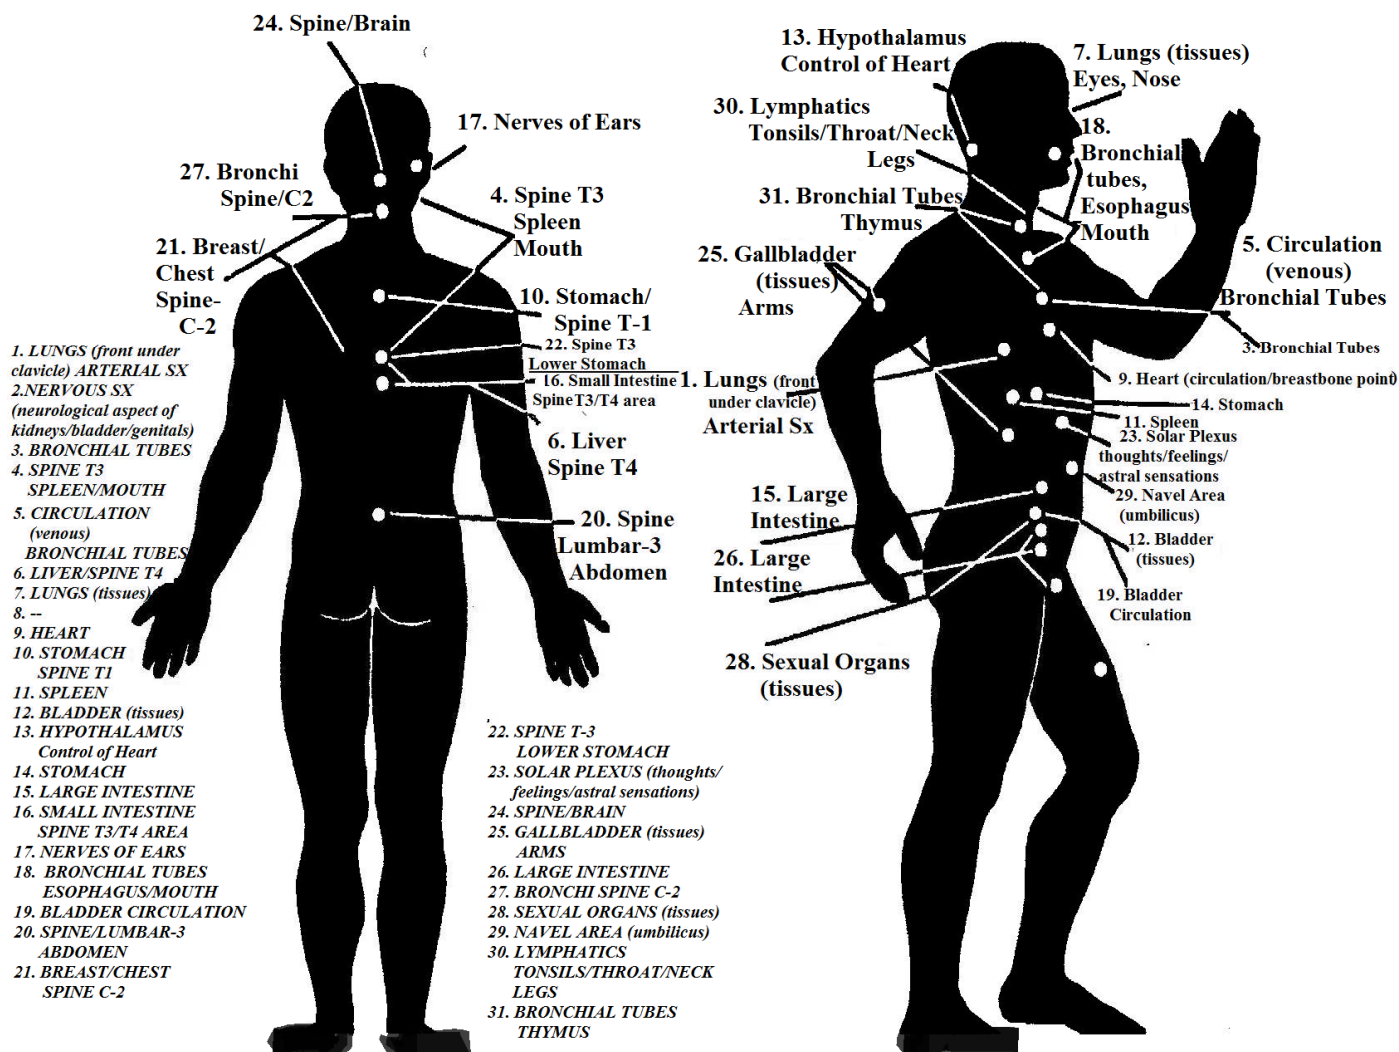

Many children have memories from past life molestations or dual soul molestations that surface, appearing to be their own memory of the current life. Many adults have earthbound spirit possessions that are child molesters, or are spirits of molested children. Possessed people often think the entity's memories or thoughts are their own thoughts.

5) Living possessions occur when one person consciously or unconsciously sucks life force from an organ system of someone who they may or may not consciously know. The affected organ will muscle test or dowse as weak, and the whole body will weaken when the spine of the afflicted person is facing the "energy vampire." This is common in families. Often there are karmic overtones. Identifying the karmic problem and any mental blocks, and clearing dark forces from the vampirish person should clear up the problem

6) DNA fallen angel imprints are a primary cause of disease (in particular, skin disorder). Moles, warts, skin cancers, and coarse skin can often be healed by taking off layers of dark force imprints that have accumulated through many lifetimes. Using the World Broadcast System is the best method to insure that one's family is also cleared of such imprints. The saying "The sins of the fathers are visited upon the children," refers to the DNA imprinting of dark force thoughts and actions.

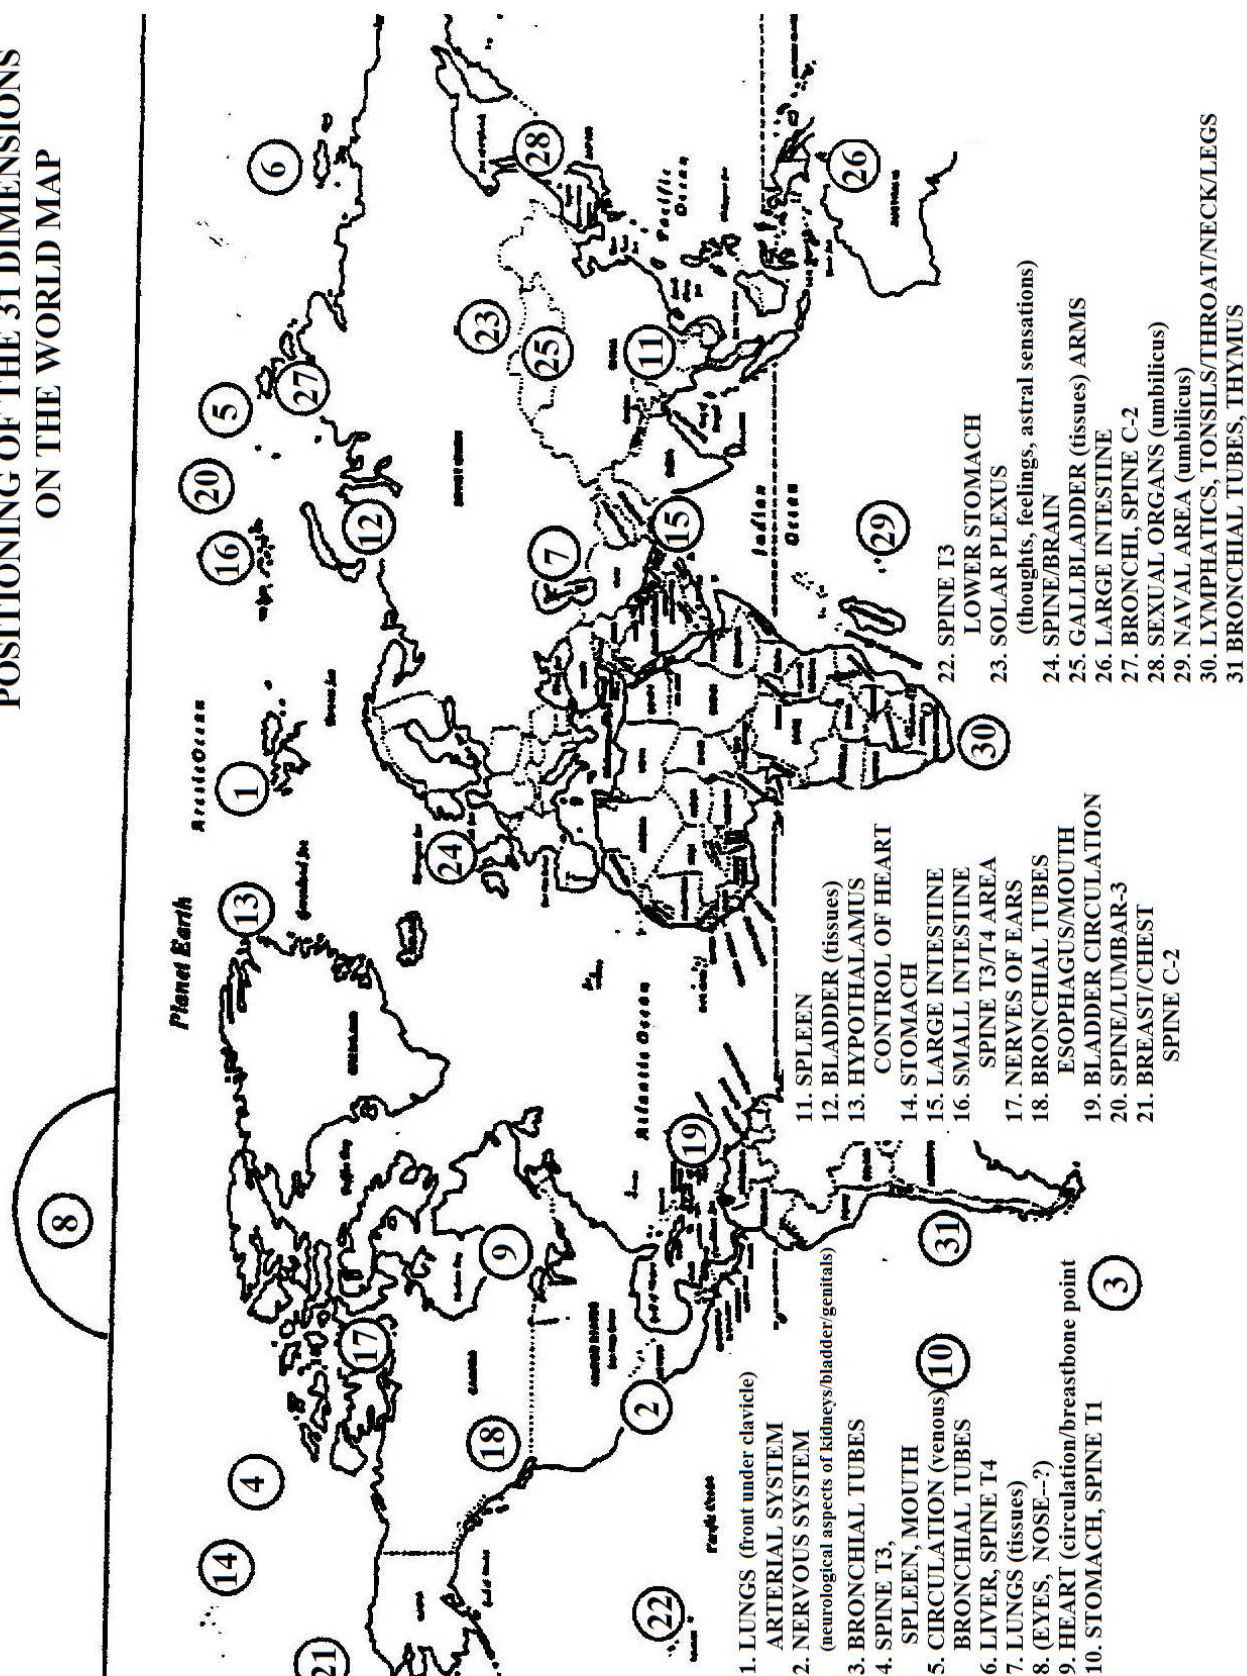

It is certain that the only way to truly heal is to understand planes of causation, and then to choose a method that is congruent with cosmic law and order. Specifics on diagnosis and intervention will be given in following chapters.

POSITIONING OF THE 31 DIMENSIONS ON THE BODY

POSITIONING OF THE 31 DIMENSIONS ON THE WORLD MAP

SEE APPENDIX for update from 1995

Initiations

In order to become an effective transmuter of disorder, the student must have passed many of the basic initiations that are present on the path to Wisdom. When a decision has been made to be on such a path, the student's soul will set up situations to speed him along the way of spiritual progress. These situations may be considered initiations.

Spiritual progress is determined by how well and how quickly the student can withstand the testing of the dark forces and learn to overcome all negation. As a student begins to progress the guardian angels will sometimes step back, allowing the student "to stand on his own" in order to see if he will prove himself worthy.

DESPAIR

Despair and doubt are often the most difficult tests to pass, and this is why so few tread the path to enlightenment. To be a student of truth requires perseverance, faith, and love far beyond that normally present in a person. Thoughts of despair often do not originate from within but are placed in the minds of the student by evil forces trying to tempt him to despair.

ATTACHMENTS

Attachments to people, places, or things are serious impediments to higher learning. The student is often asked to release that which he holds dear in order to replace it with something more holy. Jesus said, "Anyone who loves his father, mother, brother, or sister more than me is not worthy of me." He did not mean that we have to give up all family and earthly things, but that if your soul required it, you would be willing to do so. Anyone preoccupied with matters of the physical world and obsessed with things at the expense of his soul's purpose cannot advance spiritually. "Seek ye first the kingdom of heaven, then all else shall be added unto you" is good advice. What one gives away, one tends to keep.

FORGIVENESS

Another important trial has to do with one's ability to love his fellow man and God no matter what befalls him. If someone does great harm to the lower aspect of the student, he must always forgive. No humiliation, loss of money or power, or any other suffering must be a cause to hold a grudge or to hate his fellow man. A person who cannot forgive or who angers easily is very dangerous in esoteric work and cannot be trusted. If a person fails this trial he is unworthy, for the time being, to gain higher knowledge.

SELFLESS LOVE

Perhaps the greatest trial is that of selfless love. The student must never love a spouse, a child, or a parent more than he loves his soul's purpose. He must be totally impartial and help those that can best serve the plan of God. Personalities must no longer matter to him—only service and truth. He must lose his self-importance and allow himself to be absorbed in the will of God.

If a student loves a friend greatly and that friend cannot be trusted with higher knowledge, he must not waste his time on that friend. He must realize that we are on this Earth but a little while to fulfill our souls' purpose. He would risk his life to do his soul's task but never risk his life for thrills or of a low nature. He would exhaust his physical body even unto death if his soul required it, but he would not exhaust his body for money, or pleasure, or servitude to another human.

The holy person knows that all the most important things are in the higher realms. He knows that this world is but a weak, distorted reflection of the truth. The holy person knows that love must be universal in order

to be love. The holy person loves all children—not just his own. He feels the pain of the widower and the tenderness of the new bride, but he is always aware of the highest good for all. He is most concerned about the greater good of all then the personal joy of any individual.

Once a man applied to a mystery school and was refused. He loved his son (who was dying of leukemia) so dearly that he would have used all the powers that he could acquire to heal the boy. The boy's soul had its own agenda which included physical death. His father's love was so selfish that he could not be trusted with the higher secrets and powers.

THE INITIATIONS OF FIRE, AIR, WATER AND EARTH

The esoteric dowser who aspires to enlightenment must go through earth, fire, water, and air initiations.

In the earth trials, man must learn that he is much more than a body and that the purpose of having a body is to spiritualize the Earth.

In the fire trials, a man must gain control of his energies. He must learn to control his passions and gain sobriety. All that is unworthy must be burned in spiritual fire which leaves a finer substance than that which was burned.

In the water trials, a man must be strong despite the sensation of being in a strange environment without boundaries, as if swimming in an ocean. Without fear, he must learn about the new worlds around him. He must not be self-indulgent. He must not give in to depression or sadness. Without support, if necessary, and without friends to help him, he must persevere and keep a calm mind. He must blend his conscious, subconscious, and superconscious minds into one fluid unit so as to save energy and fulfill his soul's purpose.

CONTROL OF SPIRITS

In the air trials, he must gain control over all spirits while maintaining an absolute calmness of mind. He must gain control over all thought and speech as he learns the power of thought and how to heal through the ethers. He must learn to form internal boundaries in order to spiritually discern good from evil. Perfect harmlessness in thought, word, and deed are needed. Strong will and emotional control are required to control the elementals during these trials. If he fails, he may become evil or insane.

When the student has passed these trials he is then ready to receive information on the higher planes. On the lower world, he becomes harmonious, happy, productive, and increasingly powerful. His Higher Self is then always ready to stand by with information so that his dowsing becomes flawless and only for the benefit of mankind.

The initiations of earth, fire, air, and water can take many forms that reflect aspects of the person and the cosmic environment at their birth and the present time. These initiations are reflected in the charts given for each sign of the zodiac later in the book. Everyone must pass all trials represented by each of the twelve signs of the zodiac on all seven octaves in order to gain illumination. Each chart has seven different trials relating to the seven octaves which relate to the seven major chakras.

THE 84 TRIALS

The base chakra can be correlated with the first, or primary trial associated with the person's birth sign. The pelvic chakra can be associated with the second trial, and the solar plexus with the third trial. The heart chakra can be associated with the fourth trial, and the throat chakra with the fifth trial. The brow chakra can be associated with the sixth chakra, and the crown chakra with the seventh trial.

When a person has passed his birth trial, he will no longer muscle test or dowse as being of that astrological sign. He will test as being of the sign that contains his current soul lesson focus. (This only applies to Suns, for other soul types do not muscle test correctly).

A person is born under the sign of the zodiac that represents the primary lesson he failed to learn in the last incarnation. He is born under a certain octave of purity that corresponds to his focus on a certain chakra in his last life. By passing the trials of each step of that sign of the zodiac, he may at his death be focused on a different zodiac sign and a different chakra (or octave). However, we must master all the virtues of all the zodiac signs in order to attain enlightenment. It is helpful to take into consideration the current planetary influences and dowsing the chart appropriate for that sign as well as the sign chart for your birth constellation.

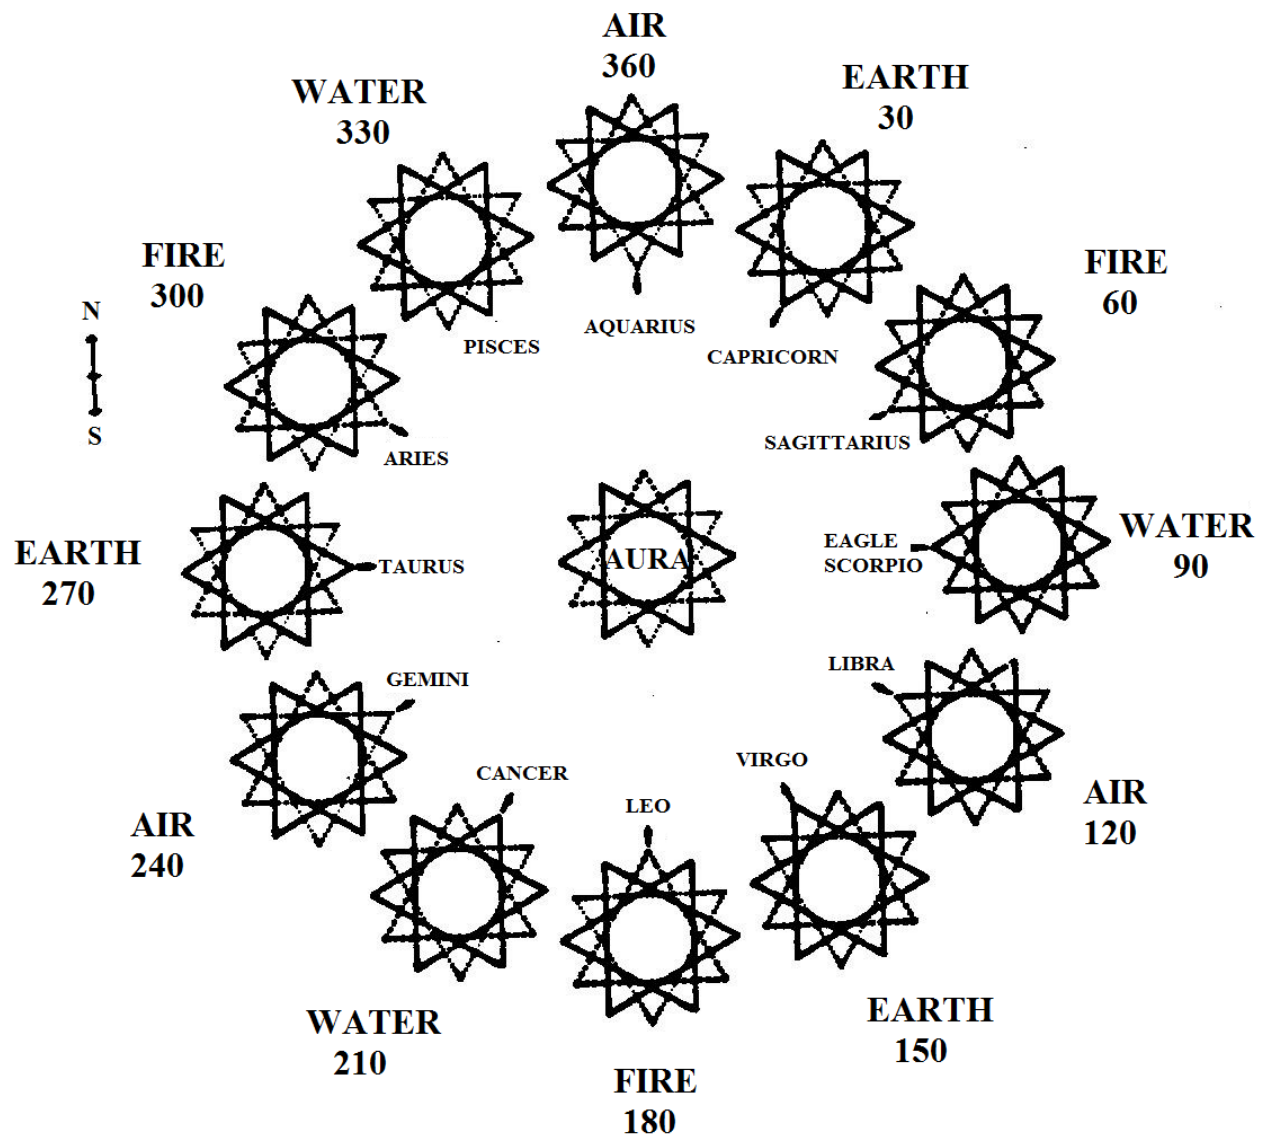

All of the power of the heavens is ready to help us through the initiations if we decide to step on the path of reclaiming our holiness. We have free choice to step on the path or to suffer through the trials over and over again. Once the lessons are learned, the trials cease, and only joy remains.

Only joy remains because you are in heaven, then. Heaven is the state of harmony that results when the suffering of the trials has ended. Hell is when the person, between incarnations, views his refusal to follow his soul's path. He sees his mistakes and then chooses to go back to Earth, the school of life, to once again face all of the unlearned lessons. We are not punished by any outside power—only by our resistance to our own holiness.

KINGDOM OF HEAVEN WITHIN

Jesus told us that the Kingdom of Heaven is within us. That is because Heaven is the state of perfect harmony that exists when all the conflicts represented by the initiatory experiences have ceased.

Dowsing can help you get into the heaven state by helping you identify and transmute the blocks on your path.

**LOCATION OF THE HUMAN AURA IN RELATIONSHIP
TO THE COSMIC POWERS AND SPIRITUAL TRIALS
WITH CONNECTING HUMAN RELATIONSHIPS.**

The Universe Within

Every seeker of truth at some time wonders about his relationship with the cosmos. The advanced seeker begins to see correlations between the external universe and his internal universe.

We are born under a certain constellation of the zodiac that represents the virtue that our lower selves failed to relearn in our past incarnations--particularly the last incarnation before this birth.

However, there are seven octaves or levels of purity on each of these virtues. The more evolved the person is, the higher the octave or more spiritual the lesson is that the person has yet to relearn in order to return to God.

An example could be given of a man born under the sign of Aquarius who was not very evolved. The boundless energy of the Aquarian in a poorly evolved person could corrupt into sexual promiscuity and perversion especially if he is focused on the pelvic or base chakras. Since we are moving toward an Aquarian planetary age, his lack of control would be made more obvious, and he would set few limits on his behaviors. This Aquarian influence is obvious in our society now (especially in New York City and San Francisco).

A more evolved person born under the sign of Aquarius would tend to have boundless energy radiating from higher chakras. If he was focused on his solar plexus, he might go into rages or crying jags easily.

A more evolved Aquarian who was focused in his heart chakra might be inclined to start a network to help the homeless. He might be inclined to work tirelessly to help change society. If he were less evolved, he might become mentally ill. His boundaries and feelings about other people might not be balanced enough.

An even more evolved Aquarian focused on the throat chakra would tend to use communication as a way to return to God through service. A less evolved Aquarian focused on the throat chakra would tend to have little control over the purity of his speech and could be slanderous and cruel.

An evolved Aquarian focused on the brow chakra would tend to be very spiritually clairvoyant. A less evolved Aquarian focused on the brow chakra would tend to be exclusively mental about God and would try to intellectualize to excess at the expense of his soul. He may fall into the trap of lower psychic practices with all of the associated glamour. He could become a possessed channel of low-level information transmitted by discarnates.

VIRTUES TO BE ACQUIRED

All of the virtues we must learn have different aspects of what has been called the Faces of God, which are represented by the elements of Fire, Water, Air, and Earth. The directions of north, south, east, and west are related to these Faces of God.

All birth constellations are represented by a primary energy of Earth, Air, Fire, or Water. Winds or energies from these locations are fixed in the cosmos despite the movement of the planets. The constellation chart illustrates these energies and is helpful to dowse over.

By facing the direction of your birth constellation as it relates to this diagram, you may be able to deep breathe while holding your hands out and receive balancing energy. You may need to stand sideways with your left hand outstretched. Dowse the correct hand and body positions to use for the best effect.

However, as you evolve, your internal constellation may change focus. It may be that your soul focus may shift to a different sign, and it is possible you may have to face the direction of your unlearned lesson (represented by the appropriate sign). You can find out by the following exercise. Stand outside and ask your pendulum to give you a signal when you are facing the direction that will supply you with the most cosmic energy. You should feel quite energetic after holding out your hands and deep breathing in the penduled direction. Many evolved people always feel energy in the direction of the birth sign. It is also wise to dowse the direction and location for you to sleep.

SEASONS OF OUR LIVES

The seasons of our lives all have the planetary lessons to be learned and follow a distinct pattern. With our birth (regardless of the individual sign) we have the influences and lessons of an Aries character which is ruled by the fire element. We then go through the Taurus aspect (earth element ruled) and then the Gemini (air). Our next lessons are of a Cancer (water) nature, followed by Leo (fire) lessons at maturity. Then we go through Virgo (earth) lessons and then Libra (air) lessons. Scorpio (water) lessons follow, then Sagittarius (fire). Capricorn (earth) and Aquarius (air) lessons are just before the old age lessons of Pisces (water).

RESISTANCE AND SUFFERING

If we resist learning these lessons in the proper time frame, we often suffer. We come into life with a major lesson to be learned, but since we remember so little as babies, we have to have mini-lessons throughout life about the other virtues on the various levels or octaves of importance or development.

An example might be a man who was born under the sign of Aquarius who was not especially evolved. During his early thirties he would come under the influence of Leo, the fatherly, life-giving, and powerful sign. As an Aquarian, he many have a tendency not to have boundaries on his behaviors. If he were to abandon his wife and children to lead a thrilling life with a younger woman or women, we would be defying the lesson he was to learn under the virtues inherent in the Leo sign.

As a result of these behaviors, he would suffer greatly in this life or the next and would probably be born under the sign of Leo in the next lifetime so that he could develop the virtues associated with the sign. He would also at some point have to be born again under the sign of Aquarius until he learned to master the lower aspects of the characteristics of the sign.

EXAMPLES

Many examples could be given. A person born as a Gemini has a tendency to want to learn and to try everything. As a teenager, this can cause grief when negative causes are set up that produce harmful effects. Ideally, the young person learns to discern good from evil and that which follows the soul path or takes one away from the soul path. If he doesn't, he then becomes a dilettante who flits from job to job and relationship to relationship without ever knowing what was valuable and what was worthless. If he dies in this pattern, he has failed his soul's lesson and must be reborn as a Gemini. Or, if during the Libra aspect of his development, he failed to gain equilibrium and harmony, he may need to be reborn as a Libra.

LEFT-HAND PATH

All of the aspects of virtue have a left-hand aspect that can be turned to vice. Everything that God created is good. But man suffers as a result of taking a virtue, such as boundless energy, and using it for selfish purposes in the wrong place and at the wrong time.

The virtues of the planets are all aspects of the three major virtues: love, will and intelligence. The left-hand path of love would include behaviors such as sexual violation of another human. It could also mean selfish or exclusive emotional love rather than holy, cosmic love of all mankind. The left-hand path of will could be willful disregard of holy teachings. It could also be willfully holding onto unforgiveness. The left-hand path of intelligence could be using mental ability to create wars, or the excessive intellectualization about one's soul without love. Intellectual games full of pride at the expense of humility and love are definitely a left-hand use of the mind.

CHAKRAS AND VIRTUES

Each one of our seven major chakras is influenced by our internal birth and development constellation and also by our external cosmic constellation. During our 7 year cycles of development we focus on different aspects of the planetary virtues.

Each chakra resonates with a different octave of the virtues represented by the 12 signs. The lower chakras resonate with the lower aspects of the virtues such as physical behaviors. The higher chakras resonate with the noble or esoteric aspects of the virtues in ascending order of vibration.

An imbalance in the physical, the emotional, or the mental aspect of ourselves blocks us from passing the trials necessary to bring us back to God.

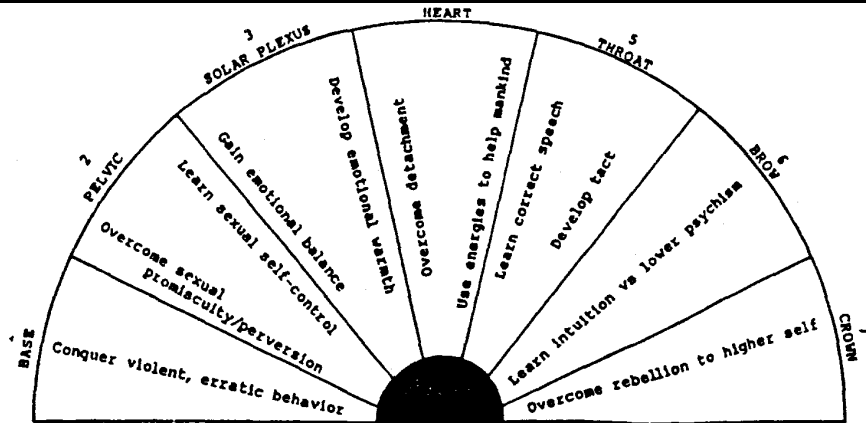

The following illustration may be helpful to learn the virtues and pitfalls relating to the different birth signs:

FACE OF GOD	SIGN	VIRTUES or ASPECTS, PITFALLS
FIRE	LEO	Fatherly, life-giving, powerful
FIRE	ARIES	Fiery youth, procreation, haste
FIRE	SAGITTARIUS	Beyond animal nature, teach the younger, overcome the physical
EARTH	TAURUS	Receive power of life, rooted, Logos becomes flesh
EARTH	VIRGO	Human soul purified. Divine seed.
EARTH	CAPRICORN	Survival on rough terrain. Concentration. Universal Love.
AIR	GEMINI	Seeking knowledge. Discernment of good from evil. Changes quickly.
AIR	LIBRA	Balance and harmony and law. Justice. Discarding the useless.
AIR	AQUARIUS	Radiates knowledge. Energy. Without boundaries or limits.
WATER	CANCER	Introspection, analysis of truth.
WATER	SCORPIO	Transmuting of lower self to higher
WATER	PISCES	Blending of conscious mind with subconscious and with superconscious minds.

When a man has mastered all the virtues of the 12 signs on all 7 octaves, he is then an awakened and enlightened Son of God. He then can choose to work in the higher planes only or may choose to reincarnate to help his younger brothers return to God. The danger is that any enlightened being who chooses to reincarnate must go through the painful process of reawakening and risks being entrapped by the lower self and illusion. Often these people are tested very stringently by the dark brotherhood and suffer by the vibrational difference they possess in comparison to those of the average person. If they despair and decide to resonate with the lower brothers, they have failed their mission and may have to work many lifetimes to correct the mistakes. You can see, I am sure, the tremendous sacrifice it is for a person to choose to return to material Earth after they have earned the right to fly with angels.

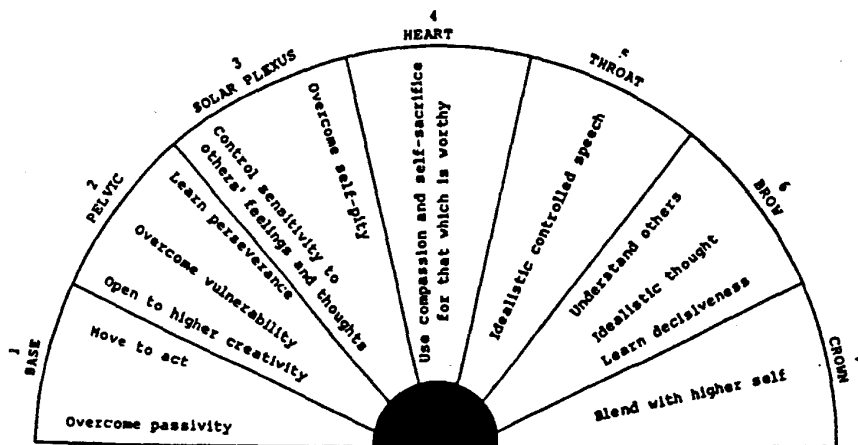

The charts at the end of the chapter can help you to determine which trials you are undergoing pertaining to the constellations you are influenced by at this time. Dowsing over the constellation chart can tell which zodiac sign trial sub-charts are indicated. Then checking these charts will give you the specific octave of the trial which you are facing at this time. This could also indicate the presence of a trial connected to a person who is close to you.

Evaluating a Difficult Case Within Cosmic Law

The procedure for the World Radionic Clearing Method is given in detail in a later chapter. Learning to detect disharmony must be the first skill attained, though, for a student to know why to use the world system. When the student identifies disharmony, he must learn a method to select the correct intervention for that particular case.

The first principle that a healer must incorporate is this;

Maxim One: *Mankind was created in harmony.*

Disharmony was intended to belong only in the inverse universe.

Some people will try to argue that all things are of God. (True.) However, Suns were born along the right hand of God in which only harmony was intended to manifest. Disharmony was designed to exist in the confines of the left hand of God, away from Suns. Suns should recognize any disharmony as something they should try to remedy. The soul purpose of Suns is to remedy disharmony, or to transmute disorder on the Earth.

Another error occurs when healers are uncomfortable or afraid. They assume that the information they are reading, or the person next to them must be evil if there is a sensation of fear.

Maxim Two: *Fear may be signaling the onset of beneficial change in an evolved person.*

Change, or evolution, is often experienced as anxiety or fear.

Only in a low state of development is fear to be avoided.

As a person spiritually evolves, he learns to use fear as a force of motivation to learn the mysteries of life.

Maxim Three: *If something doesn't work, try something different.*

To be an effective healer, one must learn to be flexible and fluid. All methods learned must be incorporated into a system that allows variation. Too many people are rigid in a traditional religious method, Huna, New Age thought, or their own peculiar mind set. They see every problem only through the eyes of the system that is mentally acceptable to them. Other people give up and assume the problem is their karma, because they lack the relentless quality a holy warrior must have in order to be of benefit to the world.

KARMA

Karma need never be experienced in the physical sense, if a person learns the lesson that his soul is trying to teach. For instance, if a person killed a spouse in a fit of rage in a past life, they would not have to be killed to balance the karma. They could review the fact that they had exhibited poor-self-control and had done a great wrong to the spouse. They could mentally contact that soul and ask for forgiveness, and forgive themselves. It is usually easier to clean up such a situation if one does some form of penance. For instance, raising motherless children would be a form of penance after killing a mother in a previous life.

The whole purpose of any physical life or action is to evolve spiritually to be of service in the higher realms. One can transmute many physical wrongs with a spiritual action, but one cannot transmute spiritual wrongs with a purely physical action. Transmutation must occur from the same plane or a higher plane, but not from a lower plane of causation.

REVIEWING OF COSMIC LAW IMPORTANT

In order to solve a serious problem, it is helpful to review the primary principles of the universe that are inherent in some form in all systems of thought. The careful study of cosmic laws is beneficial. The practice of right speech, thought, and action helps one to conserve energy so that the problem can be assessed and conquered.

Most problems originate due to a resistance to cosmic laws by the sufferer or by a perpetrator of evil.

THE PRIMARY COSMIC LAWS ARE:

Planes of CORRESPONDENCE and Cause and Effect	As above, so below. Spiritual and mental habits or decisions will produce spiritual, mental, or lower (such as physical) effects. All effects have causes but not all causes produce effects. Karma is the effect of causes put forth in this or a previous lifetime in a similar or higher plane of causation.
VIBRATION	All things are created or transmuted through the vibration of primary cosmic dust molecules at different rates of speed in different wave forms. By learning the principles of adjusting ones vibratory rate and pattern, miracles occur.
GENDER	Anything completely yin becomes yang, and anything completely yang becomes yin. True balance rests in Large-Yin-small yang, or Large Yang-small yin. There is no androgyny in physical form that is compatible with divine plan.
POLARITY	Everything has spiritual polarity and physical polarity. Every person partakes of either the left-hand path of destruction or the right-hand path of harmony and spiritual expansion.
USE	Knowledge is intended for use. If a person fails to use knowledge which he has been given, he will lose it. He then will suffer as the result of hitting himself against immutable law. By violating the Law of Use, he then violates the Law of Progression of souls.
MENTALISM	The universe is mental, and thoughts have power that must be carefully weighed. Thoughts create demons and angels, but not all demons or angels were created by man's thoughts.
RHYTHM	The swing of the pendulum to the right is the measure of the pendulum swing to the left. Rhythm compensates. All things happen in cycles. In the understanding of cycles, one can adapt and prepare.
CHANGE	Everything changes; nothing stays the same except the laws. By clinging to the past, one suffers by his resistance to change. The way that change manifests reflects the causes that have been put forth.
NON-RESISTANCE	What a person clings to in the physical form, will manifest in the spiritual. What one clings to in the spiritual form, will tend to manifest in the physical. What you cling to, will evade you. What you resist, will be drawn to you. One cannot resist evil by becoming evil, but must let the enemy "fall on his own sword." This does not mean to ignore evil, and does not mean that one should become a victim. It merely means that physical resistance is less reliable than spiritual interventions. By finding the way to move into harmony in a situation, the disharmonious pattern becomes orderly.

PHYSICAL SENSES IMPORTANT

If a healer recognizes disharmony, faces his fears, and is flexible in approach, he then may be able to fully assess characteristics of the disorder.

Characteristics to be assessed include:

- 1) Facial expression and color
- 2) Location of physical pains or sensations
- 3) Emotional components
- 4) Thought contents
- 5) Perimeters of the aura. (Mentally the tester should request to detect only disharmonious energies in the auric field of the person or his dual soul.) If the healer has no one to test him, he can dowse the number of inches or feet out from each side of his body that negative energies are present.
- 6) Evaluations of the balance of nerve prana, air prana, and blood prana. Many entities seem to eat a specific type of prana. The level of prana can be dowsed on any balance scale while using a pendulum. In difficult cases, it is helpful to dowse the relative etheric body energy of all the major body parts.

After the healer has made note of similarities and differences in the manifestation as they compare to other situations with which he is familiar, he looks for traits that correlate with names or frequencies.

In the old exorcism texts, one find that frequently the entity is required to reveal his name and number. The number does not refer to quantity, as is commonly assumed. It refers to his frequency and dimension.

By dowsing over lists, it is easy to recognize a resonating response with the problem. Most disharmonies can be tracked down if one determines the name and number. In other words, one must determine the traits, dimensions, and the frequency (density). This is done by dowsing over lists or charts, and by scanning over dimensional symbols and a frequency scale. One can use the 360 degree scale as a model. With -0- as minimum possible frequency, and 360 as maximum possible frequency, one can dowse the relative frequency of a disorder or entity. Or, you can consider a model that contains man and most creatures of the Earth at being in a high octave of third density in his physical form. Rocks would be first density, and plants second density. Thoughtforms would be fourth density. If the student has a clear concept of graduations of density in his mind, he will be able to detect the relative density of the energy he is dealing with at the present time.

In order to assist the serious student in understanding how to fully evaluate a problem, diagrams illustrating trains of thoughts will be given on the following pages. One must start with a goal of understanding a category. For instance, a sensation of trauma is perceived.

In reviewing the trauma diagram, one must first determine the time frame of the trauma and the person in whom the trauma is manifesting. Since we often take on the sensation of trauma of loved ones or dual soul, it is often a difficult matter to assess where trauma originates without some format, such as a chart.

By pendulum dowsing over the traits listed, one is able to see components of the trauma, such as sexual molestation. Also, one may locate an entity possession, which would lead one to then dowse over the possession diagram.

Many people at this difficult time are tormented by future possessions. That is why it is important to determine the time frame, rather than assume the entity is currently living. Time and space are not what you assume them to be.

If you dowse over the possession diagram, you may locate a future mixed-alien possession attached to a body part. This causes the soul energy to depart from the organ today, and produces illness. It would be helpful to dowse which body part at that time, and the affected person will muscle test as not having that body part.

If a person has a future possession, it is frequently due to poor control of one of their dreaming bodies. For this reason, it would be wise to check the diagram on Out-of-Body reasons. You may at this time find that the person was actually attempting to do a good deed in another dimension and future time, for instance, warn

someone about an earthquake. If this person became alarmed and thought his dreaming body was physical, he could then receive trauma by thinking he was injured in an earthquake.

In this future time, the person could think he was lying in a pile of rubble, and a violent mixed-alien/part-human could be walking by. (In the probable future, there will be many mutants that are part grey alien and part human.) Many of the mutant mixed-aliens will have robotic programs installed in them, for the purpose of them being used as breeding stock or soldiers. For that reason, many men and women receive future trauma of a sexual or violent nature from future mixed-aliens. This is why the trauma chart may reflect sexual trauma related to the future and to an entity.

SOLUTION

The solution to this entity problem would be to dowse the appropriate numerical ratio and write it in black ink inside a Star of David. In the past, it has been recommended to then dowse the correct dimensional doorway through which the dark force entered, and then place the correctly written star upon the large world radionic diagram. Recently, an effective method has been devised that is simple to teach and learn and inexpensive to use. It will be covered in the next chapter in more depth. (2014 NOTE: *Updated version found in* “(Anonymous, 2014)” *by Anonymous*)

The use of the large World Radionic System is still a good training method, and works somewhat faster than the small mobile system, but is more difficult to do and there is more room for error for the inexperienced student. Therefore, it is now recommended that only the mobile system be taught and used in study groups.

Even Sun earthbound spirits require numerical ratio clearing at this time, to free up astral shells clinging to spaces.

In the recent past, one could send human Sun entities “into the light”, meaning send them to a space for attaining readiness for reincarnation. Due to the major dimensional crisis of October 1991, all dead Suns were “on hold” until recent changes were completed by planetary guardians that would allow Suns to reincarnate. The contaminations on those Suns must be cleared radionically to free them up quickly to go through the Bardo trials in order to reincarnate.

UNKNOWN TYPES

Recently, due to interdimensional damage and the alien invasion, many new types of disorders have surfaced. Strange parasites from other worlds have crept through the torn veils between dimensions, or ridden on the backs of aliens that have illegally entered Earth.

It is imperative that healers know how to assess a new and difficult problem, because many will arise over the coming years. The chart given for identifying Type of Crisis is intended to help with the evaluation process. Symptoms may be vague, and yet the healer suspects some creeping disharmony that leaves him sleepless or mentally ill-at-ease.

To evaluate the problem, it is helpful to observe other people to assess whether the problem is just affecting you, or is affecting many people. Keep in mind that Suns experience the disharmonies of all 31 dimensions while animal man and nephilim only are affected by five dimensions. So, Suns will appear more unhappy in the presence of evil or negation. Often whole cities become covered with harmful grids of fallen angel energies, or are targeted by some government for testing of some electro-magnetic warfare, crop-dusted chemical, or radionic warfare. Huge geo-waves may be sent through the Earth to the other side, which also upsets the dimensions, allowing other disharmony to enter. Nuclear testing may cause one dimension to be unbalanced, if it is done over an associated location of the Earth.

SOLAR FLARES

Also natural phenomena, such as solar flares, can cause tremendous mental and physical turmoil, if they occur when certain planetary configurations are stressful. By identifying factors, such as the lunar cycle, the student becomes aware if a problem is most likely self-limiting, or if he should take action.

If a problem is a new alien infection or parasite, it is imperative that he take action to find a solution quickly. By looking over the Solutions chart, he can find ways to counteract the negative physical effects of the disorder, while finding ways to transmute it from the planet. Usually any disorder of this sort can be blocked from humans through the dowsing of numerical ratios and placing them upon the World Diagram in the dark.

He may find quick temporary solutions, such as the use of a small electromagnetic pulse generator that can produce little shocks when applied to the skin. Many times, alien parasites and earth elementals will jump off, when electrical stimulation is applied.

SOLUTION ALWAYS THERE

The important thing to remember is that all disharmonies have at least one solution. The dowsing of dozens of number ratios per day may seem to be too much work, but these are unusual times that require hard work in order to maintain one's strength and still progress. Also, the dowsing of ratios trains one's higher bodies to operate safely in all dimensional spaces.

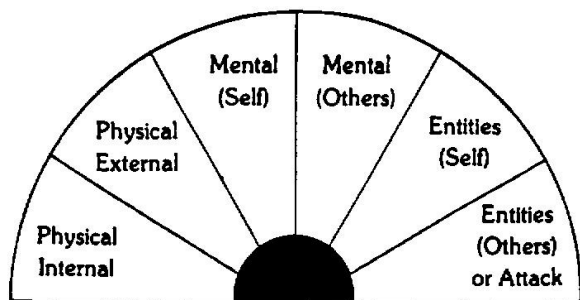

Over the coming years, many people will complain of poor health and cry out for assistance. This same way of evaluating from a state of "don't know", is important. Empty your mind of all medical bias before dowsing over the identifying Health Problem chart. If you have a background in psychotherapy, do not seek out mental causes for ill-health because that is your area. Empty your mind of assumptions and be impersonal, to find the correct answer.

The true genius is a generalist rather than a specialist, as the great Rudolf Steiner illustrated by his own life. To evaluate a problem means that you are able to determine the general type of disorder, and then the specific traits of that disorder. Every case you work up will teach you more about the next case.

SOUL PURPOSE

The future of the Earth rests in the hands of the brave and noble Sun who is willing to give his All to fulfill his soul's purpose. The purpose of his soul is to recognize and transmute disorder on all planes.

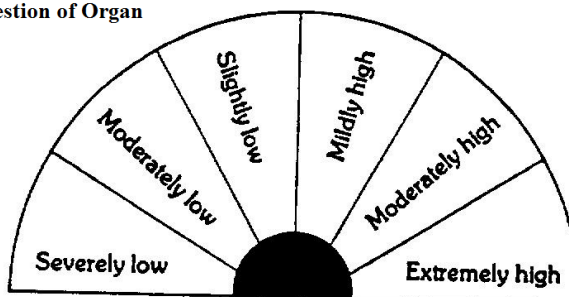

By the careful study of the principles outlined in this book, and by the disciplined practice of dowsing interdimensional symbols and numbers, he can fulfill that purpose.

Spiritual Dowsing

FUNDAMENTAL CONCEPT

Humans carry disharmonious patterns throughout many lifetimes that reflect upon the spiritual and physical DNA. These patterns produce illness of body-mind-soul. The patterns may be produced through physical actions, thoughts, or through defiance to cosmic law by the self or through planetary karma. These patterns may be called dark forces, or entities in some cases.

It is possible to detect and remove superficial and deep dark force energies from individuals and from the Earth by the understanding and application of cosmic law through the vehicle of spiritual dowsing and radionics. Spiritual radionics is not magic, but works through little-known mystery school secrets and laws. Due to the current Earth crisis, these mystery school secrets are being revealed. Only people of significant spiritual understanding will be able to comprehend the information or use it.

GOAL:

To help qualified people learn a specific alchemical technique for the transmutation of disharmonies into harmony. To teach such people to detect, prevent, and treat illnesses arising from mental and spiritual causes. To remove disharmonies from the Earth in a safe and effective method.

METHOD:

1) One can learn to detect disharmonies through dowsing, which is merely a method to tap into the subconscious/superconscious mind. The use of a small weighted object on a string creates a pendulum that can be used to magnify small muscle movements caused by a subconscious response to specific stimuli. The operator (not spirits!) moves the pendulum as his subconscious mind tries to bring higher knowledge into his awareness through a subtle muscle movement that is magnified by the pendulum. The use of pendulum charts facilitates the person's ability to communicate with his subconscious/superconscious mind.

2) Radionics is the application of mystery school principles for the removal of disharmonious energies. Ancient symbols, such as the Solomon Seal (Star of David) are used as they were in ancient days, to bind up specific energies from doing harm. Radionics can be applied to add a specific energy to a person or the planet, or to block a specific energy from a person or the planet.

The radionics used in the system taught by this course are completely safe. The system is based on the concept that there is a light universe and a dark (inverse) universe. The Earth and humans were designed to exist in the light universe, without contamination by the dark universe. All illness of body-mind-soul can be traced to a tear in the Veil between these two universes. The radionic method used in this course is like sewing up a tear in the veil between worlds that is the specific shape of the dark force patterns identified. It does not add any potentially dangerous energies to the Earth, or take away any beneficial energies.

If the student makes an error in dowsing the disharmonious pattern, he does not harm the planet. It is as though he sews up a cloth that is not torn. In traditional radionics, different principles apply, and there is danger in doing radionics for others or the planet. Such potentially dangerous radionics would be called a Light Broadcast (for the light universe). This course teaches the Dark Broadcast, which cannot harm our planet or humans in any way. Under no circumstance is the student to change the procedures, for they are based in profound understanding of humans and the Earth.

Learning to Clear Planetary and Personal Disharmonies

Much of the material presented in this book rests on the assumption that the reader is familiar with some form of dowsing or radionics. If you need more help, then contact (2014 Note: Sophia Johanson Library, PO Box 972, Columbia, MO 65205). There may be a study group forming near your area that can lend you a hand in learning to apply this material.

BASIC OUTLINE OF PROCEDURE

2104 Note: This specific Dark Broadcast became invalid in 1995. An updated version of a Light Broadcast can be found in 1995 September Private Lessons by Anonymous)

To use the small mobile radionic system, very few products are needed. Three sheets of copied diagrams are needed (make these up at a copy shop from the ones given in this chapter). In a plain white 8½ inch by 11 inch shirt box, place black paper lining at the bottom. On top of the black liner, place the World Map Sets. On top of that, place the symbols that say 919 on them. Place the remaining set of symbols on top of the 918 symbols. This forms the basic radionic set.

No artificial electrical system or extra magnets should be used with the set. It is devised to be simple, inexpensive, workable, safe, and teachable. Under no circumstances should you alter the system, because you may create something that could harm the Earth. This system has been given to humans by the planetary guardians and should not be messed with recklessly lest one acquire severe karma.

The Earth witness and the two sets of symbols should be aligned properly as marked on the corners according to north. The map top should face north and the symbols should have the tops to west on top of the map. On top of this set, you place full sheets of dowsed ratios that have been clearly written with black ink inside of Solomon Seal stars.

When a disharmonious energy is perceived in one's auric field, then one can begin to work with the system. Take the numerical dowsing chart. The most common sensation of disharmony is mental depression or anxiety. When those symptoms are present, hold the pendulum over the numerical dowsing diagram, and mentally request the subconscious mind to give you the pattern of the dark force energy that is strongest in your auric field.

With practice, the pendulum, by magnifying subtle muscle signals, will swing to the correct sequence of numbers, dots, dashes, and decimal points to indicate a dark force pattern. It is easiest to dowse this while speaking the code aloud into a tape recorder. Soon, you can write the numbers neatly into stars while listening to the recorder.

Next, ask the pendulum (which reflects your subconscious awareness) to indicate the next most disharmonious energy pattern present in your auric field. Again hold the pendulum over the numerical dowsing diagram. When the pattern has been recorded.

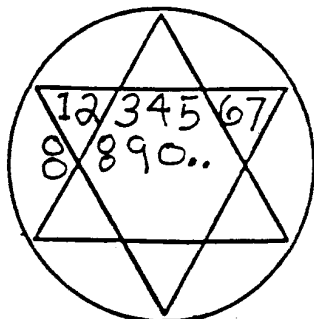

Do not leave gaps between numbers unless a space is called for. Do not write on top of the lines of the stars. Completely close all circles that compose parts of numbers, such as nines or eights. Remember that the form of the number has power in itself, and is not merely a function of your mental wish for it to have power.

Fours should not be made with triangle tops, but should look like a standard handwritten four. The reason for this is that the triangle top four is blurred in akasha with nines. Some people leave their nines with open tops like a four, and this is to be avoided. The European seven, with a small line crossing the middle, is a stronger radionic seven than a standard American seven, which often appears similar to a one.

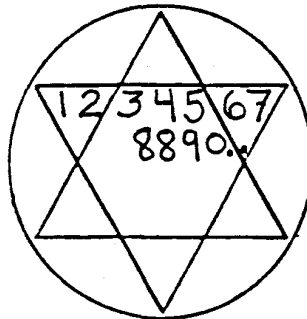

It is important to keep sets of the same number together on a line before starting a new line. A set of numbers is like a note that is being sung and held for that many counts. For that reason, at least four counts (a measure) of a set of the same number should be kept together. An example of a correctly prepared star will be given below.

*If the ratio does not fit on one line, then flush the second line to the right.
Do not leave the last one or two numbers on the left side for best clearing results.*

INCORRECT EXAMPLE

CORRECT EXAMPLE

*It is important to write the stars and orient them in the box correctly according to direction.
If a nine is put in the box upside down, it will have the radionic effect of a six.*

It is important that no light reach the symbols, except when adding more completed stars. This type of radionics works entirely with repairing holes between the inverse universe of darkness and our world of light, and can do no harm. However, dark force patterns allowed to bask in light can come back through the barrier after a few minutes. The top of the box should also be lined with black, or the whole white box should be covered with a black cloth. No writing should be on the box, unless the full inside of the box is lined in black. Every stack of 25 pages of stars should be reinforced with additional copies of the three primary radionic symbols: the World Map Symbols sets and the two other pages of symbols with different numbers written under the symbol for akasha.

It is important to realize that dark forces cannot be sent into light, because they belong to the dark world, and must be returned and bound there. Also, many of these dark forces came from other worlds that were not under the jurisdiction of our Earth angels, such as Saint Michael, and so prayers to such angels will not work in these cases.

It was not in the probable future when these angels were assigned to Earth that darkness from other worlds would enter Earth. Angels are specific, and cannot do work outside of their assigned tasks. Therefore, this world radionic system has been given by the planetary guardians to fill the gap in protection.

It is still possible to clear normal dark forces that are from the inverse universe of the Earth by prayers to Saint Michael and the other angels. However, they will bind up much neater and faster, with less energy loss, if one uses the World Broadcast System.

It is important to not have the diagram under one's bed, because a type of vortex forms. Also, keep it in an area away from the radio or television, which exert an auditory radionic effect. It is fine to put it in your garage or back room.

If you make a mistake, do not scratch it out, but merely start a new star. When you finish a dowsing session, put your stars on top of the three pages of reinforcements. In the corner, you can make a small number to let you know when 25 have been filled up with ratios. When 25 are full, put a set of the three reinforcements on top.

When your box gets full, wrap it in two black garbage bags that are tightly sealed, and bury it in a place that will not be disturbed, with the maps oriented correctly to north. Even though the dark force will be eliminated in a short time, the same ratio can easily represent another dark force in the following lunar month, and so would do some good in protecting the Earth against disharmonies.

Examples of the larger World Radionic System are given in this book, but should not be taught to groups or used due to the increased possibility of error. While not harmful, better and more accurate results are achieved with the smaller system.

Undoubtedly, some readers will be tempted to change the system or to make up their own map. It is forbidden by the holy beings who have granted the Earth this information to alter the map system in any way. Severe karma could be accrued by doing so. However, one is permitted to make up his own map if it partakes of the same geometric design as the small one given in this book. Detail is important, and two layers of dimensional symbols in correct order must be placed in the exact position as shown.

The interesting thing about this system is that one doesn't usually have to know what kind of disharmony one is facing in order to bind it up in the system. However, there are times when it is difficult to determine the cause for discomfort, and charts listing specific disharmonies are helpful.

AKASHA RECORDS

Getting into an akasha file is similar to using a computer. You must find the directory, enter it, and review the lists of files. If you then locate the file, you can enter it to understand the material in that file.

When a person dowses over lists, he is able to review traits of the disharmony he is feeling. He will get a pendulum response when there is a similarity.

For instance, a dark force may provoke a pendulum response of "yes" over the following traits: snake, fourth density, organic, alien entity, blood prana sucker, low intelligence. By gathering lists or charts of traits, you are able to focus on the aspects that lead you to the akasha records file.

When you are in that akasha file, it is then much easier to dowse the exact numerical ratio and dimensional space in which to bind up the disharmony.

Using the World Radionic System teaches you very quickly to move into other dimensional realities in order to transmute disharmony into harmony. By dowsing in this manner for an hour a day, untold benefits are accrued. One hour of dowsing is of more benefit to the student than eight hours of advanced meditation. The student will progress more in six months of daily clearing and dowsing than he could in fifteen years in a monastery, if he practices the virtues of the Tree of Life, as well.

AKASHA

The fundamentals of alchemy are hidden in the mysteries of the symbols. One should not try to make the system faster, or easier, because the speaking aloud the dowsed ratios, the hearing of the recorded ratios, the writing of them onto scratch paper and again into stars, impress upon the brain and higher bodies of the student all the secrets of creation.

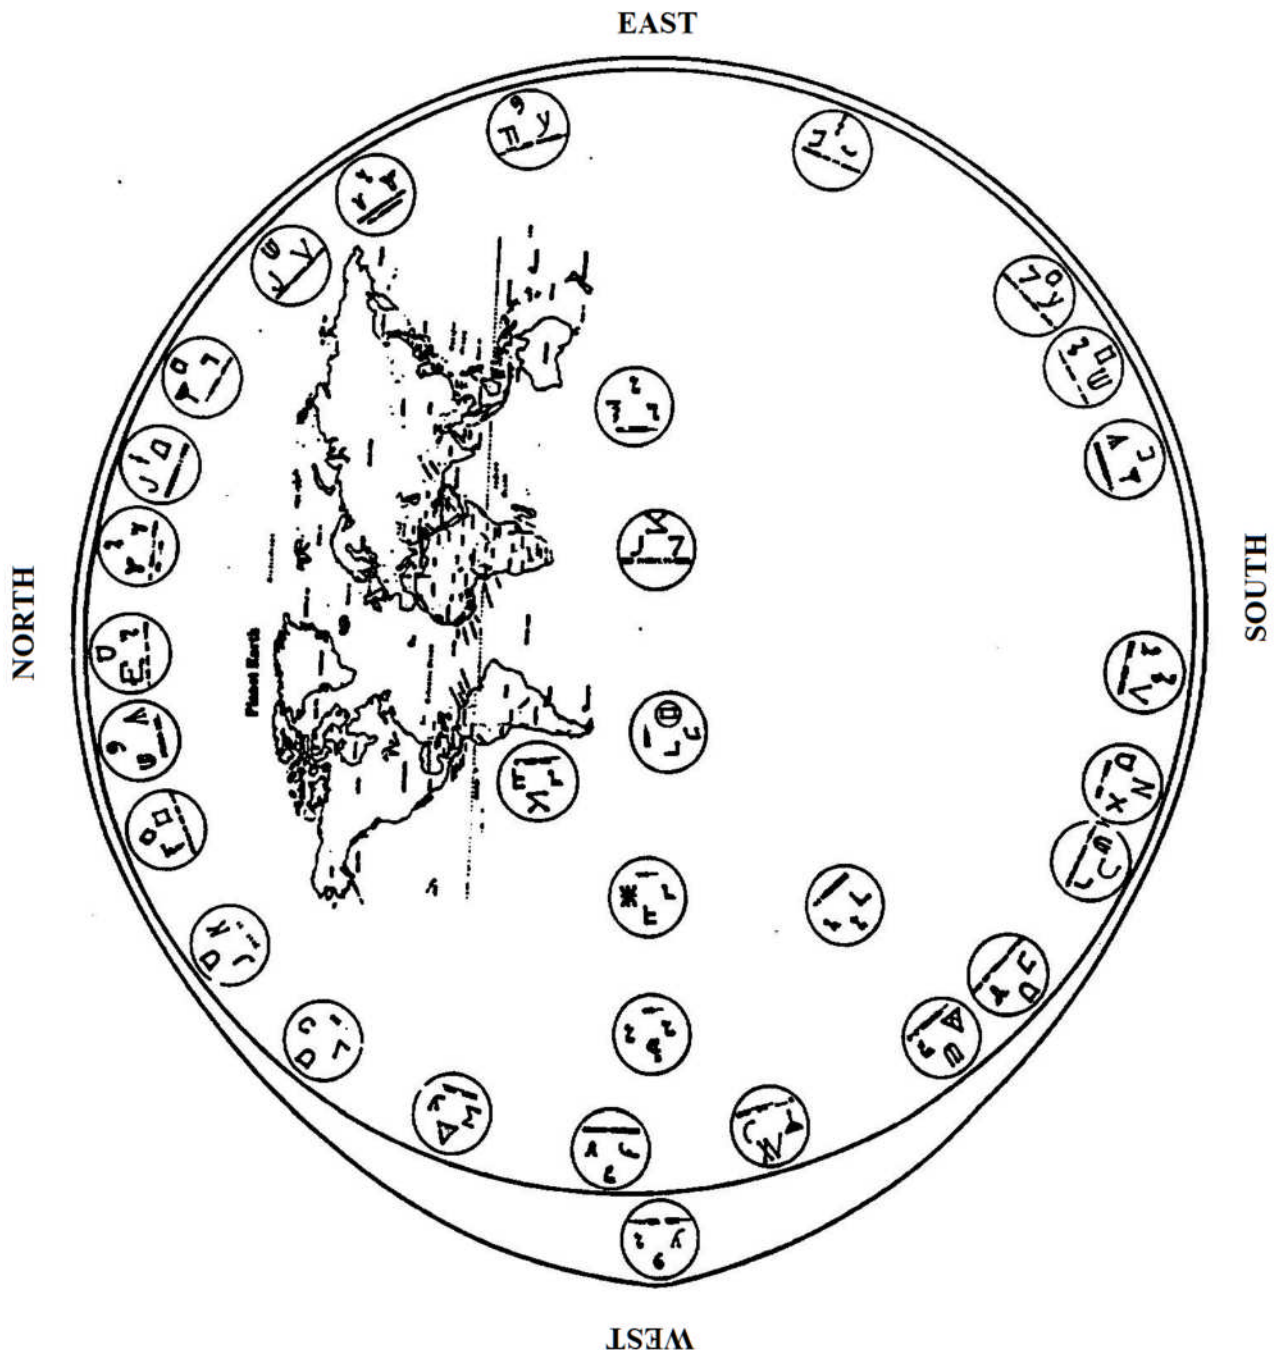

It is true that the student passes a period of time when he feels very sensitive to all stimuli, as his dormant chakras begin to flower and his clairvoyant vision unfolds. He may feel fear and anxiety during this transition. This is part of the initiatory process, and not to be avoided.

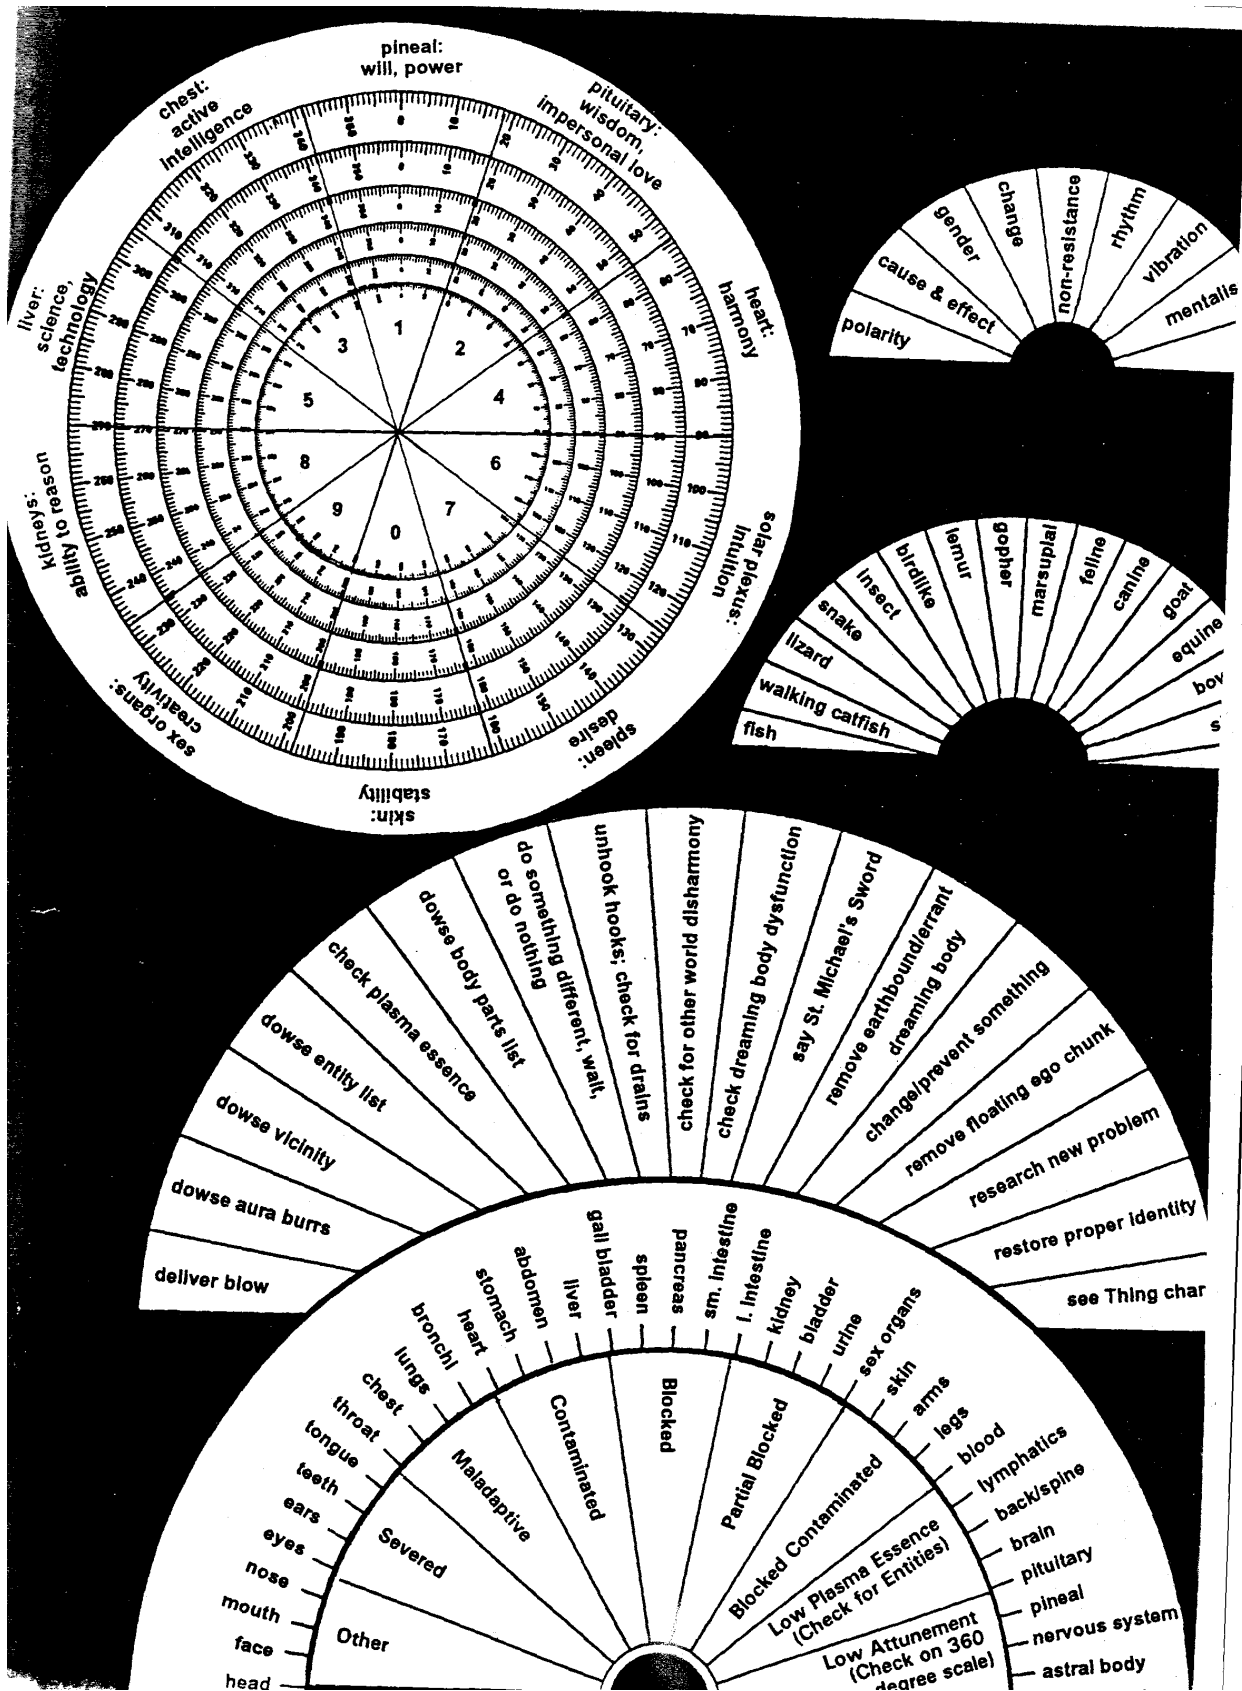

During this seventh age, only a student who is precise, detailed, consistent, and cautious is likely to advance rapidly as a spiritual warrior. Right speech, right thought, and right action are all required.

If the student passes the initiatory trials, he then is worthy to be an assistant to the guardians of the planet. He then can be of real value to the planet as a master alchemist. For alchemy has little to do with the changing of physical metals, but rests in the transmutation of disorder into order. That is the purpose of the Sun soul.

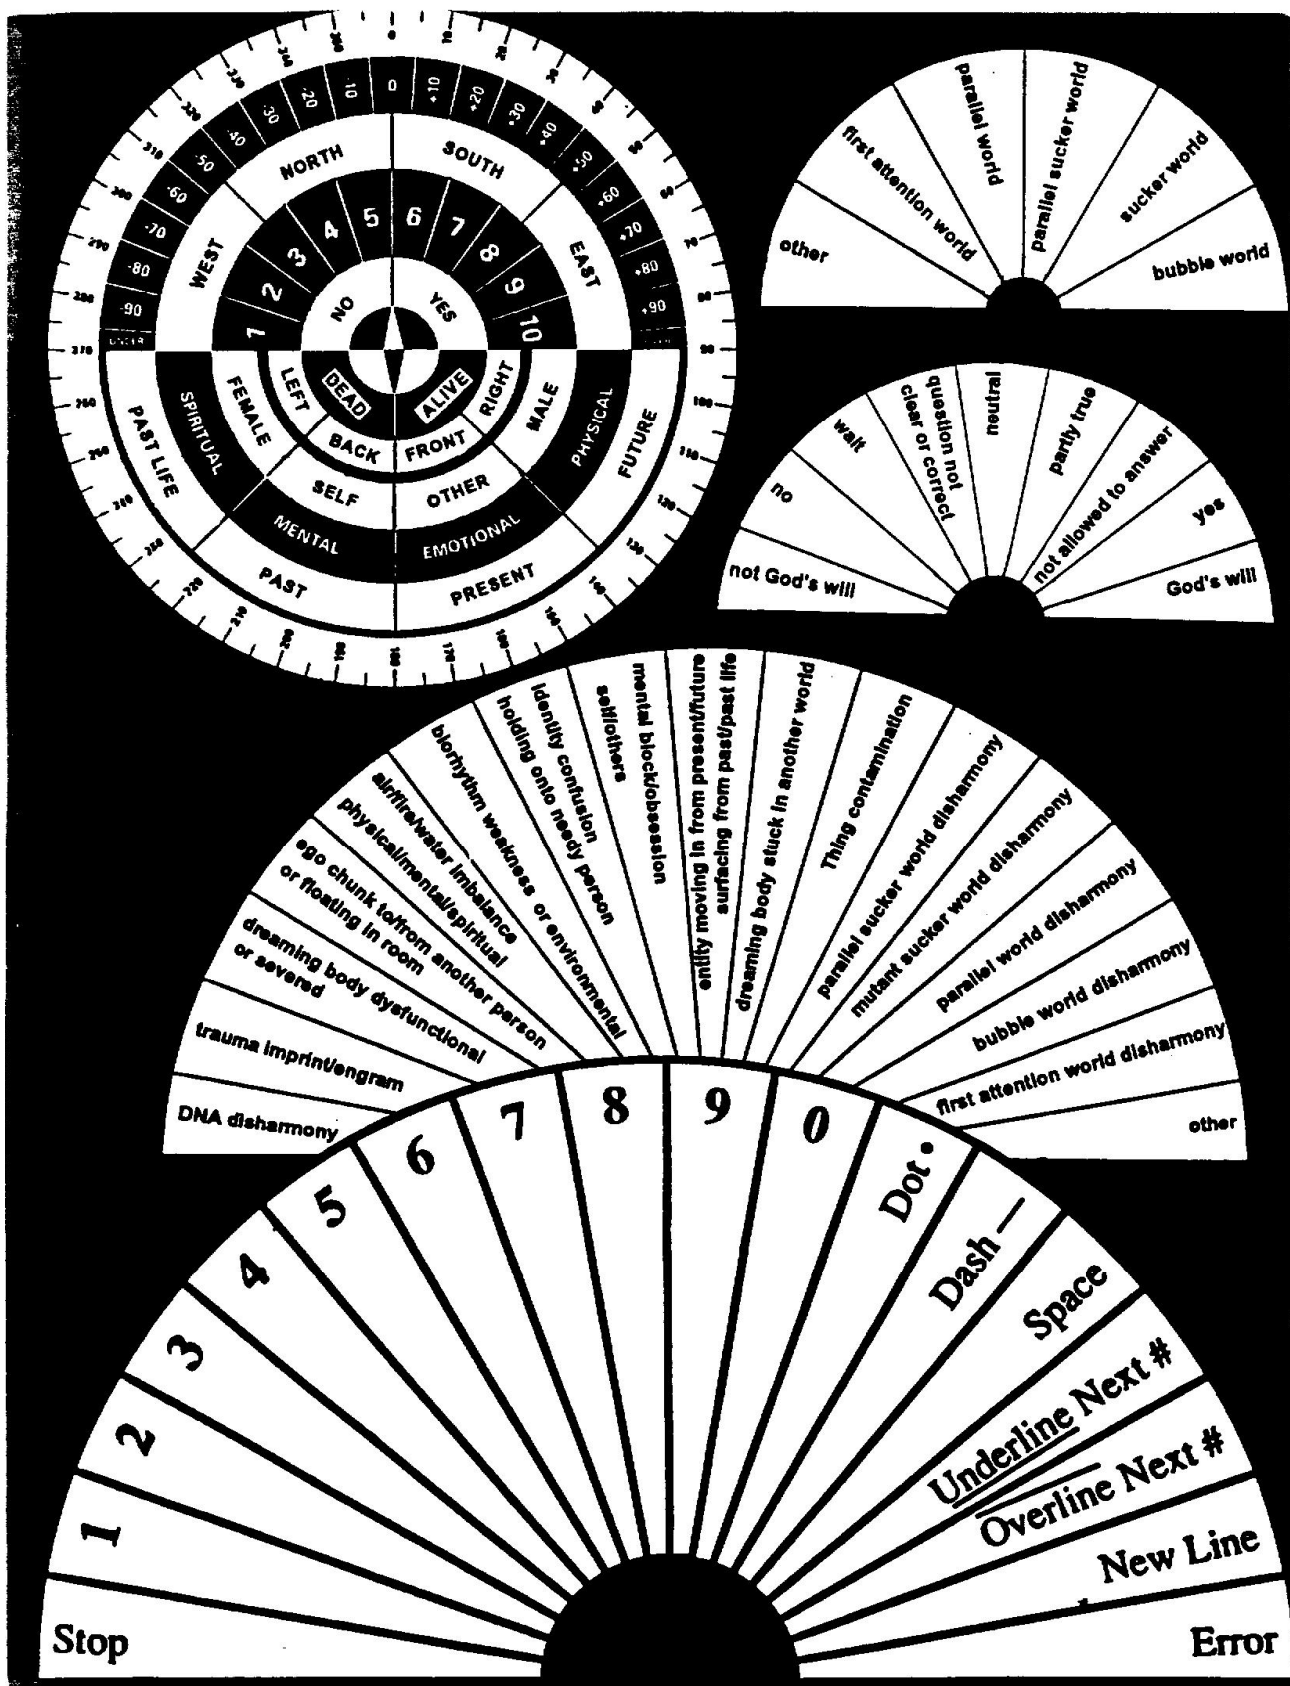

WORLD BROADCAST MAP

This is an example of the large World Radionic System that was successfully used prior to the easier method now advised. The large map was in two layers with radionic symbols representing the spiritual causes and ones representing material effects upon which dowsed ratios were placed. This system clears disharmonies somewhat faster than the small system, but is more difficult to learn and has more room for error. Therefore, only the smaller system is taught at this time. This diagram is given for historical purposes.

Assessment of Disharmony

Disharmony must be recognized before it can be transmuted. Disharmony is usually recognized as mental or physical suffering. Whenever such symptoms appear, the student should use the situation for a learning experience.

It is not always necessary for you to know what the problem is before dowsing the pattern and dimension for the World Radionic System. In some cases, though, a lingering sense of discomfort may remain. Investigation of specific aspects of the disharmony will lead you to the correct way to remove the discomfort.

A list of prepared questions and a notebook full of copies of prepared dowsing charts are helpful to keep nearby during such times. When one feels depressed or irritable, it is more difficult to remember the correct things to check without a list.

There are four basic questions that could be asked regarding any disharmony. They are:

QUESTION #1

<i>Is this problem originating from the physical, mental, or spiritual plane of causation?</i>

This must be determined in order to ascertain the correct intervention on the proper plane. For physical causes, dietary changes may be in order or there may be an external cause, such as earthquakes. You may need to change your thought patterns. Dowsing clearing ratios will often remove disharmonies from the spiritual plane of causation.

QUESTION #2

<i>Is this problem originating from a past life, past time in this life, present time, or future time?</i>

If the problem originates from a past life, there is often an unforgiveness or a major trauma or engram that must be cleared. Sometimes a fallen angel imprint upon the spiritual DNA may need to be cleared from a past life indiscretion. If the problem originates from the present life, it is often an entity, hate trauma, or a negative grid cloud. If the problem originates from the future, a dreaming body may be stuck there, or a future entity could have attached to one of your dreaming bodies, or you may have excessive fear of the future.

QUESTION #3

<i>Is this problem originating from me, my dual soul, another person, Or a dark force in another location?</i>

Entities, illness, or negative thoughts can be originating from the self or dual soul and need to be cleared. Another person you may or may not know may have created hostile thoughtforms, or be possessed near you, and give you symptoms of disharmony. Sometimes alien energies can remotely monitor, drain, or alter the energy fields of Suns that are miles away.

QUESTION #4

Which part of my body is the negative energy hooking into?

Since dimensional spaces have doorways on the human body, specific organs may lose their soul identity if that dimension is blocked or contaminated. By dowsing over a chart that lists parts of the body, it is possible to know where to focus the healing energies, or where to pull one's dreaming body back.

The answers to those four basic questions can usually give you plenty of information on which to base your clearing methods. The answers can be dowsed or muscle tested using a yes-no format, or pendulum charts can be used. Examples of pendulum charts to help find specific traits are in the appendix, and following some of the chapters in this book. In most cases, it is additionally educational to dowse or muscle test answers for the following questions as well. Aspects of the primary four questions are woven in these situations listed below, with interventions specified.

QUESTION #5

Am I alive?

Answer: YES (Go to next question)

NO (Check following factors and interventions)

Causes: Determine which time: *Past...Present...Future*

Possession by Earthbound Spirit

Dowse ratio, clear by visualization, or snap energy cord back to self.
Sever etheric parasitic tie with willpower and intention.

Dreaming body (or bodies) stuck in other time/space dimensional world and thinks it is physically dead there.

Determine time frame for each one – past, present or future

Check how many dimensions and bodies affected; clear one at a time.

Yank dreaming body back to associated body part and dowse organs associated.

Send angelic elemental or another dreaming body to pick up the corpse and return it to this time/space.

Teach the dreaming body that it needs to not think of itself as a physical form at the present time,
and cannot die. Teach it to come home when under stress.

Identification with earthbound dual soul or possessed dual soul.

In past life, this life, or a future life – determine which one.

Clear by sending dreaming body to rescue dual soul in the form of a relative or angelic elemental.

Take into healing light dimensional space.

Dowse any residual trauma imprints.

Dowse any entities affecting dual soul

One of your dreaming bodies is viewing other time/space horrors of past-present-or probable future and over-identifies with dead people in those time/space locations.

Determine time frame and will a dreaming body to go there and rescue the dreaming body trapped/shocked/lost.

Dowse the dimension in which to go.

Dowse any trauma imprints collected upon the dreaming body.

Remind your dreaming body to keep calm when traveling, and that it cannot die
and is not at this time physically solid.

Past life, childhood traumatic memory of a funeral, dual soul's death, loved one's death, or possible future death being viewed by an unstable dreaming body.

These memories surface due to an over-identification with the physical form rather than identification with the soul. By reminding the subconscious that you are a soul that possesses form rather than the form having a soul, it is possible to change the associated trauma. Ratios for trauma imprints may need to be dowsed. Review soul lesson, trauma and imprint charts. Also, pulling awareness to NOW rather than a focus on the past or future is helpful to keep dreaming bodies clear and not stuck in another time/space.

QUESTION #6
<i>How old am I?</i>

Answer: If correct age dowsed, go on to next question.
If incorrect age dowsed: Check following reasons and interventions.

Causes:

Trauma in past life, childhood of current life or future this life, or future life.

Trauma would have occurred at the age dowsed. The type of trauma can be located on the trauma or engram charts. Soul lesson and cosmic law charts can help you to find out what lesson must be learned from the trauma. Usually, over-identification with the physical body or emotional body is the factor that must be overcome. By reminding the subconscious mind that the soul cannot be raped, murdered, abandoned, or humiliated, one is able to overcome such trauma. Forgiveness to and from all parties helps to heal the trauma as well. An understanding of karma is helpful.

Over-identification with dual soul, entity, family member or associates and their problems

If there is an entity, clear it from the dowsed associated organ system by yanking the etheric cord back.

Dowse any ratio that is appropriate for World Broadcast.

Determine the time frame and pull a dreaming body back to the present time/space.

Clear dual soul for any entities.

Will yourself to be impersonally loving to family and associates, but to not take on their karma.

Allow their free will, and do not try to force them to understand universal law.

If a family member or associate is vampire-sucking prana from a dowsed organ, sever the cord with willpower and intention.

QUESTION #7
<i>How many organs am I missing?</i>

Answer: None: Go to next question.
One or more: Determine cause and solution for each one.

This reflects the soul identification with body parts. If the soul force is cut off from a body part, then the subconscious mind thinks that the organ is missing. It must be pointed out, however, that dowsing or muscle testing a nephilim soul type will produce only lies for answers, because a nephilim's body does not respond with weakness to a spoken lie.

Causes:

Entity hooked into aura of organ (from past, present, or future).

After dowsing over body part chart, yank etheric cord back to that part of the body away from the entity.

You must first focus on the correct time frame.

Dowse any ratio needed to block entity from hooking into you again, and place it on the World Broadcast.

An entity causes the body of a Sun to lose its soul identification at the site of attachment.

Dreaming body associated with that organ is traumatized and stuck in a different dimension or time.

Dowse the organ affected, the dimension, and the time frame.

With intention and willpower, send another dreaming body to retrieve the one stuck there.

Dowse over trauma charts to see what the problem is,

and visualize appropriate intervention to mobilize the rescue.

Unforgiveness during past or current life is a common cause for imbalance.

Molestation, visual shock, loss of love, and humiliation may cause a dreaming body to freeze in a past life or other dimension.

Slimy earthbound nephilim often cause the dreaming body to feel raped in the future, past, or present.

Over-identification with physical form is the usual problem.

Mixed alien earthbounds in the future often jump into the past to violate the dreaming bodies of Suns.

This can only happen if the Sun is not trained to pull his dreaming body back when in danger.

Hate, Voodoo, or Hex related trauma to body part or parts.

This can be from someone known by the self, the dual soul, an entity in the auric field, or unknown.

The imprints of hate or hexes enter into furniture and houses, and will settle into organ systems.

These must be cleared with numerical ratios on the World Map.

Hate grid clouds also float over large cities, and sometimes wander to nearby areas, causing such trauma.

QUESTION #8
<i>Do I love God and my Higher Self?</i>

If the answer is YES: Move on to next question. (Remember that nephilim will test incorrectly on this when dowsed or muscle-tested)

If the answer is NO Review causes and interventions listed below.

Causes:

Entity in aura field from the past, present, or future.

Any type of entity from the left-hand path will cause the affected Sun to dowse or muscle test as hating God or Higher Self. In many cases, you cannot muscle test such people directly, but must use a stand-in person, because any dark force major possession can cause a lie reaction. All nephilim will muscle test lies, and a neutral Sun must stand in front of them to get an accurate muscle testing result. Many entities in the vicinity, on the dual soul, or from the future will cause the affected person to test as hating God.

Hate to or from a significant other in this life, past life, or future life, or relating to the dual soul.

Anytime a person or their dual soul feels or receives hate, they are cut off from the Higher Self and God.

They will muscle test as hating God until they decide to quit hating, or neutralize the hate directed at them.

This can be done by dowsing ratios, using willpower, intention, and visualization, or by blessing all humans and forgiving everyone.

Asking for forgiveness for any perceived wrongs in the past, present, or future from all associated parties will also help to neutralize the hate.

Sometimes, a hate-filled person must be visually walled off with imaginary bricks to block the hate.

Blaming God or another person for the misfortunes of life or the death of a loved one in the past, present, or future.

People are often born into families that have karmic relationships where one person blames an innocent party for the death of a loved one or himself. This blame causes suffering in every lifetime until the person blaming decides to stop doing so. Anyone who holds such a grudge poisons three parties:

- 1) The person who died in the other lifetime,
- 2) The person who is blamed,
- 3) The person who blames.

Usually, there will be death and sorrow in every family the blamer is born into, until the cycle is broken with forgiveness. Also, illness occurs because the soul light is cut off at associated organ systems in all three parties. By reviewing the trauma/engram, soul lesson, and cosmic law charts, one is able to determine specifics about the situation that needs healing. Often ratios, affirmations, visualizations, and prayers will help to heal the diseased relationships. An associated question would be: Do I love my spouse? My child?

QUESTION #9

How many dreaming bodies do I have in other dimensional spaces for maladaptive reasons?

Answer: None: Move on to next question.
One or more: review reasons and interventions listed below.

Causes:

Dreaming body thinks it is the full physical form and assumes it has been raped, killed, or trapped by entities in the past, present, or future in other dimensions.

In these cases, one must send another dreaming body to retrieve the confused one, or try to snap it back to the associated organ system with strong intention and willpower. The dreaming body must be told that it must jump back to its owner if it is in a situation that it does not yet know how to handle. It must be told that it cannot die in the usual physical sense. Trauma imprints may need to be dowsed.

Person ruminates over the past excessively or has excessive fear of the future.

Whenever a person's thoughts float to a past incident, a dreaming body follows. Sometimes a dreaming body will be frozen in that past trauma or desire, and will not return to the present time. This causes weakness on an associated organ system, and resulting illness or mental depression. Also, if a person imagines fearful future scenes, a dreaming body may travel to a possible future event filled with horror, and get frozen there by fear. The dreaming body is associated with an organ system that can be dowsed. It should be yanked back by the intention and willpower, or you will have to send another dreaming body to retrieve the one that is stuck. It doesn't matter if an incident is pleasant or horrible; a fixated dreaming body will weaken the owner in the present time by its absence. All dreaming bodies should be called home unless they are on a mission for the soul.

Over-identification with a known or unknown person in the past, present, or future.

Anytime a person overly sympathizes with the condition of a living or dead person, they run the risk of attaching a dreaming body to that time frame and person. Often an associated organ will sicken, and the person will be tired and take on the physical illnesses or mental problems of the other person. To clear this requires awareness of the associated organ system and trauma/engram linkage, and the use of willful intent to yank the etheric cord free from the other person and time/space. Many children and parents develop the same diseases because of over-identification with each other, and many marriages are destroyed because an attitude is absorbed from one person to another. Which brings up the next primary question.

QUESTION #10

<i>Am I myself (place name here)?</i>
--

Possible cause for not muscle testing or dowsing as being oneself:

Inability to control thoughts, emotions, and will

Anytime a person has poor control of thoughts, speech, actions, or willpower, he floats into the aura of anyone in the vicinity and absorbs their identity as his own. He no longer knows what he is thinking, feeling, or experiencing, because he has given over his identity to someone he may not even know. More commonly, though, it is over-identification with a parent, child, or spouse. Since family members are associated with an organ system, illness often results, and the soul light is cut off in the confusion of identity. Any entity in the other person's aura will be felt in the sponge-like aura of the empathetic person.

QUESTION #11

<i>What is my air, blood and nerve prana as a whole or in the individual organ system?</i>

These can be measured using a standard percentage scale, with 100% being maximal. Air prana is influenced by physical problems, such as the presence of smoke or pollen, or by an entity attached to the respiratory system. Blood prana is lowered in the presence of an infection or toxicity of the body. Some primitive spiritual invaders also weaken the blood prana, which then allows an infection to easily move into the body. Nerve prana is weakened by loud noises, viral disease, abrasive people and all entities. One must first determine the cause of the drop in prana and then treat it from the same plane of causation or from above. In other words, a spiritually caused drop in nerve prana cannot be treated by simply avoiding loud noise. By checking each organ separately, one can locate the seat of the disharmony in order to remove it. Also the cranial nerve chart can help you to find the area of the head associated with the organ system, and the associated planetary influences that may be causing stress.

It must be stressed that a sense of well-being is the primary indication of a state of spiritual harmony. In most cases of spiritual contamination, the above questions will reveal aspects of the problem to investigate. If all of the above questions do not reveal the seat of the sense of disharmony, it is most likely that the problem rests in the dual soul or another person connected to the individual being tested.

DOWSING CHECKLIST

1) How many earthbound spirits....free floating ego chunks.....severed or stray dreaming bodies of others are present in this room?
2) How many hooks or drains from people? <i>Unhook or chop</i>
3) How many drains do I have from my plasma essence being lost in other worlds? <i>Dowse ratios; do not chop</i>
4) How many maladaptive dreaming bodies do I need to pull home? <i>Check Body Parts Chart to know locations to pull dreaming body home to.</i>
5) How many contaminated dreaming bodies? <i>Dowse ratios.</i>
6) How many dreaming bodies do I have that are blocked...partially blocked....contaminated blocked? <i>Dowse ratios and check later for layers.</i>
7) How many dreaming bodies are in: sucker...parallel...parallel sucker worlds...other inappropriate locations? <i>Past...Present... Future?</i>
8) Am I myself? <i>Check for: ego chunks to/from you and any entities... That are keeping your aura crevice from filling with the lost ego chunk of yourself.</i>
9) What are the most disharmonious energies in my aura on a 360 degree scale? Call them "Aura Burrs" <i>Dowse ratios Check over the "Cause of Disharmonies" chart to see if they are 'Things' or ego chunks, These must be checked for doorways and layers which need ratios. Check each chakra or body list as time permits. Check for burrs on dreaming bodies, too.</i>
10) What is the spiritual attunement (using the 360 degree scale) of my least adaptive dreaming body? --Next least adaptive? <i>Dowse ratios to restore to higher attunement; these should be above the attunement of the first attention dreaming body.</i>
11) How many shielded dark forces are present?

12) Check past...present...future disharmonies on:

First Attention World	Parallel World	Sucker World
Sucker World on Parallel World	Bubble World	Future World
Past World	Dreaming Body	Other World
Rays/Octaves (Chart)	Earth Soul Cell	

13) Check body parts fan chart or list for low plasma essence. <i>Dowse ratios to recover the essence.</i> Check for loss of egoic substance and for the presence of any foreign egoic substance. Check for foreign plasma essence. Check the % of plasma essence of the weakest dreaming body. <i>Dowse ratios to bring up.</i>
14) Check general percentage of essence in each chakra.
15) Ask for the essence of the most maladaptive or contaminated dreaming body on a % scale. <i>Dowse ratios to recover, then ask again.</i>
16) Check for any ratios related to a dark force funnel. <i>Ask any dark force grid numbers that need to be dowsed?</i>
17) Any Earth Soul Cell contamination?
18) Ask for any Rays/Octave disorders in your tonal or vicinity.
19) Check balance of air/fire/water elements. <i>If low, dowse ratios.</i>
20) Dowse over the Entity Circle Charts which follow.

Advanced Dowsing of Dark Force Patterns

In exorcism texts, the priest will often demand the name and number from an entity inhabiting the body of a person. In earliest time, this did not refer to the quantity of dark forces, but the numerical pattern that represented the form of the dark force. The ancient exorcists knew that if you knew the name and the numerical pattern of a dark force, you had total control of the situation.

Sometimes it is very difficult to determine the numerical ratio for an entity, unless you can get in the right “computer file” of akasha through the name or traits of the dark forces. By dowsing over a list of traits or known dark force types, you will more readily be able to focus and dowse the correct removal ratio.

The following list contains dark forces that have traits catalogues in akasha. With your left hand, touch each dark force name, and ask if you have any contamination of your aura with the dark force. Mentally request a yes or no answer through your pendulum that is held in your right hand. If you get a “yes,” then you will be able to dowse the ratio for the dark force at that time. You may have more than one dark force in the same category.

Do not be alarmed if you find dark forces such as “Satanic” in your aura. This does not mean you are possessed. It means that at some time in this or a previous lifetime you became spiritually slimed by being in the vicinity of a negative force that is in the general category of satanic. The force made an impression, like a foot in wet sand, upon your aura, and wounded it. The radionics will heal the wound from you and anyone else the dark force touched.

Also, do not be alarmed to see holy names such as “Michael” and “Raphael” on the entity list. This merely means that a dark force, or fallen angel along the line of force represented by the archangel is being represented. Your muscle response (pendulum) tells you that your body recognizes a dark force that was supposed to follow a certain line of virtue, but failed to do so. It does not mean that Saint Michael is evil...by any means.

When dowsing over the next four circular entity charts (or list), be aware that timing is very important. You may need to dowse repeatedly over the charts/list in order to dowse away the dark forces in the proper order. Sometimes a dark force from page one may not show up until you clear a dark force on page three. Rechecking is important to detect all disharmonies in your auric field until you get no pendulum response on any of the four pages when checked in succession.

2014 NOTE: The following list of entity names is offered instead of the original dowsing wheels which were difficult to read. In the book “A Prophet’s Story” by Anonymous, these same names are presented in a series of circular charts for pendulum dowsing.

A Warrior for Knowledge: A Path to Enlightenment

In order to withstand the demands and stress of knowing higher truth, the student must first live as a warrior. In order to live life as a warrior, the student must become aware of the opponents (obstacles) that exist without and within himself.

One of the greatest obstacles to higher learning is when a student believes he has the secrets of life within his usual framework of habitual thought. Such a student will sit in front of a teacher and mentally argue, or ask questions that are designed to make himself noticed by the crowd as a person of great power or wisdom. Only by “emptying his cup” can a person hope to gain in knowledge.

For a person to learn, they must know that there is something that they need to learn. Next, they must be open to learning in ways unaccustomed, or by a person that may not appear to be a teacher.

MOTIVATION FACTOR NEEDED

In order for a person to be open to learning, they must desire to learn. In order for a person to desire to learn, they must have a motivating factor, such as a crisis. The crisis may be poor health, family problems, a near-death experience, or conflict with a major opponent of human or non-human origin.

In most cultures, the wise men, or seers, had at some time come close to death. Many people underwent intentional physical pain, starvation, or sought out an enemy in order to gain in the necessity for higher truth. In a time of stress, the ability to gain awareness into other worlds escalates, for several reasons other than the fact that motivation is born at such a time.

Everyone cleans house faster if a visitor is coming over, and there are several cases of cars being lifted off the bodies of children by their weakling mothers. People who couldn't swim have saved the lives of drowning children, because they directed their will without thought of fear in the moment.

FEAR CAN BE USEFUL

A major problem with addictive drug use, especially sedatives, is that it removes the necessity for change that is vital to spiritual growth and understanding of higher truth. Pain and fear are useful to a warrior of truth, for they give him clues to the mystery of life, and teach him how to “dance” with the enemies of his own weakness, or external opponents. One of the greatest pitfalls for the metaphysical student is the denial of disharmony. The use of visualization and affirmation has been distorted by people who are not disciplined enough or sturdy enough to follow the precise paths that lead to enlightenment. The use of visualization and affirmation are helpful only when used with good sense and within cosmic law. A primary aspect of cosmic law is correct timing in the use of certain holy traits.

It is as though a tornado is nearing your house. Some of you will pull the covers over your head and pretend the tornado is not there. Others will sit resigned in the living room, and assume that fate will prevail. A smart person will get in the cellar, or an enlightened person will know how to direct the spirits of the wind. Only a smart or enlightened person is likely to live through a tornado heading straight at them.

AMPLE NECESSITY PRESENT

There are many crises in the world today, existing in many densities and dimensional spaces, that provide ample necessity for gaining higher knowledge. Contrary to popular metaphysical belief, you are not reinforcing something because you see it. When you walk down your driveway you may see dog feces and move to the side to avoid messy shoes. You don't create or reinforce the dog feces, you merely recognize its reality and avoid getting soiled, or remove the feces from the path.

When a developed person travels to a city such as New York City, they may be aware of tremendous disharmony in other dimensions that impacts their aura, and take specific steps to protect and clear the energies. In their earlier life, they would have returned from such a trip depressed and tired, but would have assumed it was jet lag. Now they may be able to see a great deal more, and live with more vitality and clarity than when they lived so blindly. Most physical illness is due to the denial or ignorance of those influences existing in other dimensions and densities.

REALITY NOT INDIVIDUAL

The second greatest pitfall for the metaphysical student is the belief that everyone creates their own reality and that there is no evil. With such an assumption, one can safely surmise that cannibalism or incest is just karma or personal choice. When one studies ancient laws, one becomes aware that there is an objective reality that contains powers, forces, and rules that are inflexible. Many a student has broken himself against cosmic law, but never has a cosmic law been broken.

Only by the careful study of hermetic principles can a person hope to gain intelligent understanding of life. Only by the application of those principles in life can a person hope to gain wisdom of divine plan.

The greatest power that evil (disharmony) possesses on the Earth is in the minds of man who do not know it exists. For in such men, there is no desire to move toward knowledge, holiness (harmony) or truth (cosmic law or God).

SAMURAI MAXIM

A Samurai maxim states, “If you know your opponent and know yourself, you will always win. If you know your opponent but not yourself, you will win only half the time. If you know yourself but not your opponent, you will win half the time. If you know neither your opponent or yourself, you will always lose.”

Any suffering of body, mind, or soul reflects the presence of an opponent that can be used as a motivating factor to gain enlightenment. Discovering the esoteric causes of the suffering and endeavoring to change the causes are the next steps.

There are several factors that must be understood before someone can use an opponent as a vehicle for enlightenment. An awareness of spiritual anatomy as it relates to dimensions is vital.

POINTS OF LIGHT

The human aura (and reflecting upon the physical body) contains points (similar to acupuncture points) that are associated with certain dimensional world spaces. When a person moves his awareness from one spot to the other, he becomes enlightened as to that particular space. With specific training, a person can learn to move his awareness, like a point of light, to many other dimensions that intersect his world, and therefore gain in knowledge and power. Every dimension in which he gains agility becomes illuminated, until his aura glows with enlightenment. Since illness, depression, and traumas exist in those spaces, he is able to heal himself or others by moving in those spaces in an educated manner.

It is clear then, that the goal of a person desiring enlightenment must be to go about learning how to move his awareness into the other dimensional spaces, and yet still be sane and able to return awareness to our superficial world. It is as though the usual world we see is the skin of a body, but as physicians on other planes of awareness, we must learn about the nerves, muscles, and endocrine system (other dimensions and densities) that are part of the world impacting us. They are all real, but most people never dissect a cadaver, or perform surgery in the physical world or spiritual worlds. Seeing the skin of a person is all most people are equipped to perceive.

Just as many people do not have the stomach to see the bloody mess of surgery; most people are not strong enough to face truth as it exists in all the dimensional spaces. The only way that a person can withstand a path of truth is by living life as a warrior.

ATTRIBUTES OF A WARRIOR

There are certain attributes of a warrior that make the struggle for enlightenment possible. The first trait must be the ability to recognize a teacher or situation that could provide opportunity for learning. Courage, relentlessness, lack of self-pity, ability to focus on the task at hand, and mental and emotional control are primary traits to develop on the path to truth. In no case can a whiny, irritable, or self-indulgent person go far in higher study.

Each person is born with traits that are the reflection of many lifetimes of decisions. It is possible to change one's weaknesses if one is able to see them clearly. This is the reason that a teacher often angers students, by confronting weakness. If a student cannot bear confrontation, then he is not strong enough to withstand the path to knowledge. Only by the careful examination and systematic removal of one's weaknesses can one aspire to great illumination. The removal of flaws is done by moving toward the opposing virtue, and not by the resistance to the flaw.

SENSE OF URGENCY NEEDED

If the student has the desired traits developed, and a teacher or teaching situation appears, then he is fortunate. He then must have a sense of urgency, in order to push his awareness into the other planes of reality. He does this by recognizing a reason for living, or a cause. Nietzsche said, "He who has a why to live for, can bear almost any how."

Potential death of the planet and its inhabitants is a very real worthy opponent at this time in history. If one followed the line of satanic thought that is common today, one could argue that the impending destruction of the planet will return it to God, and so is good. Or one could "pull the covers over your head" and ignore the very real threat of planetary death, or sink into a fatalistic depression. These lines of thinking are manipulations by destructive forces. In fact, mankind has a purpose beyond death, a purpose he has forgotten.

PURPOSE OF MANKIND

The purpose of mankind is to harmonize and spiritualize the planet to prepare it for the next step of its evolution. The only way for mankind to fulfill that purpose is by the decision to learn how to live congruently within cosmic laws. This implies that man must discover the difference between order and disorder (learn spiritual discernment). The only way that man can face truth of such discernment is by living life as a warrior.

"If you walk, then walk. If you sit, then sit. But whatever you do, don't wobble," advised the ancient masters. Likewise, a student of truth must learn to do the task at hand with precision, grace, and poise. By remembering that the soul has a body, and the body is just a shell, the fear of death subsides. In living each day as if it were your last, in bravery, joy, and with open eyes, you can gain much higher awareness.

SOLDIER DOES NOT WHINE

In the foxholes of war, the soldier does not sit and whine about a dysfunctional family, or if he got a car at high school graduation. He begins to see the big picture, and think about values, and the meaning of life. We must live like a soldier in a foxhole, and not waste energy on superficial material concerns, guilt or resentments, if we want to be wise or good at the hour of our deaths. We are all truly on our deathbeds, and should use that knowledge to live life with greater intensity and purpose. If a warrior accepts that he will die, he learns to live without fear, and desires to be impeccable to the end.

To be an impeccable warrior gives one the energy to pursue the path to higher truth. When the attributes of a warrior have been acquired, then certain disciplines can speed up the awareness into other dimensional spaces.

DISCIPLINES HELPFUL

Changing routines, dowsing over dimensional symbols for a set time each day, meditating on virtues of the Tree of Life, learning techniques for astral travel, and learning to stop mindless chatter are steps that are helpful. The careful assessment of thoughts, and the weighing of every word and action, are vital. People who rattle on mindlessly and who have little emotional control are not worthy to study higher truth. Those who cling to past sorrows or future fears are too unstable to learn higher development techniques.

A warrior must do what has to be done without regard for pleasure or pain, or whether someone offended him in some way. “Forget about death, forget about the enemy, forget about yourself, and keep your thoughts motionless.” Was the Samurai way, because “The focused mind can pierce through stone.” Conservation of energy is needed on all planes of awareness in order to achieve any goal that is worthwhile. Often, many smaller pleasures must be dropped in order to devote time to the study of truth.

TIME AND MONEY CONSERVATION

Many students fail, because they say they have no time, to read, dowse, meditate, or study higher law. They say they have no money to travel, buy books, or invest in higher study. These same students usually have time to watch TV, read the newspaper, or go to social events. They spend money on cars, or theater, or VCRs.

Often people lapse into hypnotic trances in front of televisions as a method to cut the pain of their existence, and avoid the struggle of life. Other people meditate or sleep for much of the day, rather than go about confronting the problems, which are often entities, causing depression and listlessness. “Test only your front armor, and never your back,” is a Samurai maxim that fits here. For in avoidance, we are in retreat, preferring to face away from our battles.

“A warrior must always take care that his spirit is never broken” was the ancient masters’ advice to the student of truth. Often, doubt, fear, excessive Mentalism and circular thinking block us from facing the battles today. “Approach the moment with the idea that you are in a fight to the finish,” was the Samurai way. A sense of immediacy is important.

As Don Juan noted, the choice of a warrior is to act impeccable or to act like a self-indulgent fool. The choice is ours. If we venture into the challenging and wonderful world of higher studies, we must make the choice to live impeccably, or die as fools.
