## **EXTRACT FROM VIRTUES, LAWS AND POWERS BY “ANONYMOUS”**

***Introduction***

**Published 1995**

**ISBN 1-885-186-83-5**

There are people on the Earth today who hunger for knowledge of the mysteries of life. They may have sought to satiate their thirst for Truth through paths of science, art, philosophy, psychology, religion, or social services. Many, at the close of a long career in such fields, hear the hounds of death at their heels while their spiritual bellies ache with emptiness. They go to their deaths longing for the unknown, trembling with angst.

It may seem preposterous for this book to presume to fill some of that void by bringing to the reader the fundamentals of the natural Laws of the soul. Indeed, few people have ever considered that the soul of man has a type of matter, not unlike his flesh, although existing in a different octave of being. Few people are aware that there are principles, similar to known physics principles, that control the dynamics of spiritual matter. Furthermore, such spiritual Laws have a watershed effect upon the physical body of man and the Earth.

Looking out upon the sea of disorder within the major cities, one cannot help wondering why violent crime is becoming increasingly prevalent, and what could bring it to a halt. During the sixties the cry of liberals was for more social services, as though money or food could be the panacea. Others cried for gun control, more prisons, or other material solutions. Despite all attempts at controlling societal disorder the ghettos swell with violence, and the traditional family structure is almost gone.

There are some idealists who look into the heart of this disorder as though it were full of signs of wonderful societal transformation for the better. And yet, teenage pregnancies, AIDS, infections, robberies, rapes, and murders all continue to increase in number. By what criteria are these idealists measuring their success?

If one looks back over recorded history, pockets of societal peace and order rise out of the pages with haunting similarities of belief systems. Within each religion can be found keys that lead to the inner teachings of the fundamental Laws of the soul and of life itself. The fighting between religions has been due to clinging to differences rather than searching for similarities. The obvious similarities are merely echoes of the underlying mysteries which have traditionally been reserved for an inner circle of the spiritual elite.

The knowledge of the inner mysteries of life, held within the core of each religion, was withheld from the masses because of the danger of sorcery if the principles were applied without integrity. Any power that can transform a man's soul can also destroy his body if directed with malefic intent. It was safer to allow the alchemical mysteries, which were the core of each religion, to be watered down in a harmless fashion, in a way that could possibly change man's behavior through fear or promise of heaven. It was assumed by the spiritual forefathers that a man who lived decently might learn to think decently. If a man thought in a decent manner, then, later he might be able to control the spiritual forces with integrity and not run amok with unbridled passion.

For this reason, most religions focused upon behavioral instructions, rather than the reasons that certain behaviors could block the path to spiritual power. People have, by and large, decided that the behavioral instructions are no longer valid and so have developed many blocks to the higher teachings.

It is now time to reveal the inner teachings, in hope that humans can understand the reasons for behavioral sanctions and thought control.

The Laws are immutable. Man cannot break these Laws, but can break himself against these Laws. This is happening today on a massive scale. A man can tell himself all day long that fire is not hot, and yet burn himself, should he put his hand in a flame. Just as there are lower laws of the visible component of fire, there are higher Laws of the unseen components of fire. Many a man has thrust his own unseen components into fire and burned away part of himself.

It is possible to heal oneself through the application of higher Laws. If humans can bring healing order to their own lives, then they can begin to bring order to their families and to their own culture. If they do that, they can start to bring order to the world.

Healing the world must start with healing the self. This book holds the ancient mysteries through which personal transformation is made possible, if the applicant is sincere and willing to change. The dilettante will benefit little, except through some intellectual titillation. This book was written not for dinner table discussion, but at great price, and with great courage, by a traveler within such mysteries, in hope of helping humanity out of chaos. Since it merely recites the principles of the mysteries, it shall be considered anonymously and gnostically written, for man cannot hope or presume to create the Laws and Virtues. This is not a “channeled” book, but a book reflecting the experience of the traveler through many realms as real as the one before your face.

If you also dare to be a traveler into unseen realms, this book will guide you safely.

# PREFACE

Throughout the history of the world, new teachings have come forth during times of great crisis.

This is, indeed, a time of great crisis for the Earth. Humans must not be lulled into false optimism based upon the failure of communism. In fact, the rise of Ahrimanic materialism that is epidemic in the new so-called democratic states is more than unsettling. When the merchants of the former Soviet Union allowed the babies to starve until the price controls were dropped so they could mark their hoarded foods up 1000%, we saw the epitome of dehumanized materialism.

Progress is not measured by the type of political system but by the soul progression of the people within a system. Anytime major cities are filled with bloody robberies and rapes, something has gone awry. In the United States, the rates of violent crimes, drug addiction, adolescent suicides, homelessness and clinical mental illness all continue to rise. As long as we look to material solutions, such as more welfare, more pharmaceutical medications or more prisons, the problems will worsen. One cannot heal a spiritual crisis by material means.

Rudolf Steiner predicted the current breakdown of society and warned us that only spiritual science could save the Earth. As long as people continue to poison their foods and countrysides with nuclear contamination to have more money, it is more crucial than ever that we heed Steiner's warning with all our mind and spirit, unless we choose to risk annihilation.

This book and its companion volume, ***Gnostic Book of Earth Changes***, present the theory and practice of spiritual science within the context of the current crisis.

By no amount of praying or begging Angels or aliens will correct mankind's karma. Only by his own effort, through the understanding of spiritual science, can mankind save himself and his children.

# SPIRITUAL GLOSSARY

It is the wish of the author to be clearly understood. For that reason the following words are defined in order to allow the reader an opportunity to grasp the full meaning of the text. SEE ALSO INDEX.

**AKASHA:** The Book of Life. All things that have occurred in the past, the present or the probable future are engraved in this cosmic computer.

**ALCHEMY:** The transmutation of base qualities into the Divine, of the disorderly characteristics of the lower self into alignment with the orderly plan of the Logos, of the lower self into the Holy self.

**ALIEN GREY:** A type of alien that came in through the inverse doorway of another world. Alien greys are similar to Nephilim in that they have a fallen Angel imprint in their spiritual DNA. Alien greys are extremely destructive, and they have inbred with many humans on the Planet. There are alien greys with material bodies that exist in material spaces that intersect the Earth now, and there are also alien grey demons that go on living after a grey dies. Even though many of the alien grey physical bodies have been eliminated by the intercession of Holy Beings and through the work of Suns on the Earth, the grey demons still need to be removed from the Planet.

**ANIMAL MAN:** *(From text) "Animal man was the original inhabitant of Earth and lived harmoniously until defiant Angels contaminated his group souls." (See also Watchers/Nephilim)*

**AHRIMAN:** *(From text): "Ahrimanic influence refers to dark force patterns that tend to bind us to the Earth and blind us to our souls. The Ahrimanic influences pull us tighter to the love of money and the obsessions of the body."*

**AQUARIAN AGE:** The seventh and final Age of the Earth. The Aquarian Age is an Age of Air that reflects a change of density as the Earth and mankind move toward maximum expansion. As a result of this evolution, we are experiencing a magnetic pull within the cosmic dust particles toward the air and fire components and away from the water and earth components.

**ASCENDED MASTER:** A Sun type soul who no longer has to incarnate but works from a higher plane to help the world.

**ASTRAL PLANE:** The mental/emotional density which is directly above the physical density. The astral plane impacts all dimensional spaces.

**ASURAS:** *(From text): "In the truest sense, the Asuras are not physically on the Planet. When the channeled invitations came to them through the dark world window, they were allowed within Cosmic Law to send light patterns representing themselves onto the holy earth. This was in keeping with free will. These light patterns do not reflect the roughly humanoid form of the Asuras but rather reveal force fields and shapes, as if on a computer screen. The desire to outwit above the desire to find the truth reflects an Asurian trait. An extreme love of intellectual games above the desire to purify one's spiritual aspects is an Asurian trait." (Sixth density beings in humanoid form).*

**AURA METER:** A dowsing device that utilizes a spring and seems to embody the quality of action of four other devices. Like Y-rods it dips earthward. Like L-rods it will move sideways. Like a wand it will bob up and down. And like a pendulum it will rotate. Thus it is the most sensitive dowsing tool available as it greatly magnifies fine motor reflexes.

**BLACK BROTHERHOOD:** *(From text): The Black Brotherhood controls many intelligent beings. Some of these beings are similar to androids and are vessels of Ahriman. Their purpose is to use high intellectual faculties to promote a linear form of thought that makes it impossible for humanity to learn spiritual discernment.*

**COSMIC DUST:** The very fine molecules of which all things are made. Cosmic dust particles, which could also be called Father, Son and Holy Ghost, have air, fire and water components in varying proportions. The addition of the earth component crystallizes the other three into material form.

**COSMIC LAW:** The principles on which all worlds are based. When one follows these principles, one lives in harmony with the higher self and with God.

**DARK BROADCAST:** A broadcast that blocks the patterns in which fallen Angels have projected doubles through doorways or tears from the inverse universe. By blocking those patterns, one can release the illnesses they produce.

**DARK NAGUAL:** The inverse universe component of total disorder. When the etheric veil between the worlds was torn, the Dark Nagual was able to enter. The home of the Dark Nagual is all the hells of all worlds. A person with the Dark Nagual has a look of frozen horror and hate. Someone who follows his lower will partakes of the Dark Nagual. Someone who has been exposed to the teachings of the Tree of Life in an unbalanced way, such as sentimental love to the exclusion of severity and wisdom, partakes of the Dark Nagual. If one has a weakness such as Ahrimanic materialism, the Dark Nagual can get in through that door. (See also Light Nagual).

**DEROS:** (From text) *“The Deros are valuable to the Asuras, because they are composed of part Sun DNA and are not just pure grey alien DNA. They have the knowledge to manipulate the Law of Vibration and can appear solid or disappear by raising frequency. Since Sun DNA gives them the ability to traverse all of the Earth’s dimensions, they have great power over all life forms. With the sorcery knowledge of the Asuras, they appear as powerful demonic energies upon the Earth that cannot be stopped by Angels. The Asuras are above the Angels and control the Deros. Only the Messengers can control the Deros, because they are above the Asuras in the hierarchy.”*

**DIVINE ORDER:** The laws that regulate the hierarchy in all worlds as they relate to the virtues of the Tree of Life.

**DOWSING:** Searching for the invisible through the aid of an instrument that magnifies fine motor movements triggered by the subconscious.

**DOPPELGANGER DOUBLES:** (From text): *“Doppelganger doubles are like breathing demon seeds that grow in the cells of an afflicted human. Like worms, they take on the vibration of the host and cause the host to think and behave in an Ahrimanic fashion. One primary trait is their hatred for the name of Jesus and their discomfort around Holy Beings. The doppelgangers are the cloned cellular patterns of the Asurians. This type of spiritual cloning is the means by which the Asuras will move from the hells of the inverse universe into the right-hand universe.”*

**DUAL SOUL:** The single soul shared by two materialized Sun type humans. In order to obey the Law of Yin/Yang, Sun souls coming into manifestation split into two bodies, one Yin (female) and one Yang (male). The karma accrued by both is shared throughout all incarnations.

**EARTH:** (From text): *“A world that was designed to exist in perfect harmony.”*

**ELEMENTAL:** Primary spiritual essence of an air, fire, water or earth substance that is of a higher density than the material. Elementals include the devas or demons that partake of the archetypal spiritual essence of different plants and forces that make up the world. Some of the lower angels would also be called elementals. Even thoughtforms can be elementals. Thoughtforms can actually create screaming, horrible demons that attack small children. Every time someone watches a murder on a TV screen, he creates a demon of murder. These demons feed on war scenes and try to increase them. Sometimes a person will take on an elemental essence of a deva after inbreeding with beings from other worlds. Such a person may appear elf-like since the physical appearance reflects the kingdom he is connected with. If a person looks elf-like, he is most likely an alien mutant. Similarly, many mythical legends recount incidents of people mating with animals or with fallen Angels.

**FALLEN ANGEL:** An angel who has gone against his soul purpose. All angels are designed to follow certain traits and rules, as the Hierarchy in the Heavens is extremely strict. Satan and Lilith, the original Adam and Eve, were fallen Angels who decided to eat of the Tree of the Knowledge of Good and Evil. By going against their soul purpose, fallen Angels have turned counter-evolutionary. Fallen Angels have nine dreaming bodies that intersect with the Earth's dimensions.

**GNOSIS:** Secret knowledge. Knowing through gnosis is knowing without being taught, knowing by Divine revelation. *(From text): "Gnosis is obtained by merging into silent awareness with all aspects of a thing or a being, in contrast to the linear word-oriented Latin thinking of the so-called scientist."*

**GNOSTIC:** A person who is able to receive Divine revelation.

**GODS OF KARMA:** *(From text): "Gods of Karma, who are primarily concerned with the education of lower beings through life experience, though not as punishment. Mankind punishes himself by choosing certain paths, and the Gods of Karma are his jailers."*

**GOD'S WILL:** Attunement with the virtues of the Tree of Life.

**GRACE, SPHERE OF:** *(From text) "Within the sphere of Grace live the sixth density Keepers of the Balance Between Worlds (Messengers) and their fifth density assistants, here called the Disseminators of Holy Knowledge. At different times, the messengers have sent as agents to the Earth one of the Disseminators of Knowledge. Confucius is an example."*

**GUARDIAN ANGEL:** One of three types of Angels who protect the Earth and its inhabitants. One type of guardian Angel is an actual person, a human Sun who no longer has to incarnate but who, when summoned, hovers over the Earth to watch and protect children and other people. These angels come only when summoned and only when their coming is within Divine Law. They will not stay if the person's behavior is against Cosmic Law. Thus, many people have lost their guardian angels in the world today. This type of guardian angel is fairly dense in form and is not without error. A second type of guardian angel is more of an elemental essence. This type can actually be created by a Sun through the use of candles, prayer and supplication. These angels come along specific lines of virtue such as mercy or love. If a person needed a sense of love, he could pray, and angels along the line of love could produce an angel along that line of force. Only a person who partakes of the virtues of the Tree of Life can summon an angel. Thirdly, there are Planetary Guardian Angels who are of a higher density and who watch over the Earth in general. When a significant number of people cry out for help, this type will come.

**HOLINESS:** Alignment with the higher self. Holiness is attunement with the law and order that is inherent in the balanced use of the virtues of the Tree of Life.

**HOLY TRAIT:** One of the virtues of the Tree of Life.

**HOLY WARRIOR:** A sun soul who chooses to face disharmony and transmute it through strength and courage.

**KARMA:** The Law of Cause and Effect.

**KEEPERS OF THE BALANCE BETWEEN WORLDS:** Beings of the Sixth density who work within 60 dimensional spaces and who incarnate only at the request of Suns when there is an imbalance in the karma between worlds. They can bring things back into harmony in order not to cause undue suffering for the inhabitants of the system, but they can act only within the world karma aspects.

**KEEPERS OF THE LAW:** The gods of Karma. Keepers of the Law come under the Keepers of the Balance between Worlds and have 44 dreaming bodies. These are the ones the Bible might have called Jehovah or the Greeks the demi-urges.

**L-RODS:** L-shaped metal rods, sometimes inserted into plastic sleeves that are held in an upright position. When one enters into a different density force field, the rods tend to fan outward.

**LIGHT BROADCAST:** A radionic broadcast that supplies a virtue, energy or element that is lacking. An example of a light broadcast is the placing of one's picture covered with a color theatrical gel on a magnet and then shining a light on it. Light broadcasts do not work well on entities.

**LIGHT NAGUAL:** The power of Logos Angstroms in an actual energy form that could be interpreted as an elemental spirit of great magnitude that enters into a room or a person to aid in transmutation and in accessing Akasha. The Light Nagual is the Holy Spirit or the Comforter of the Bible. Jesus brought the Light Nagual from the Sixth density for the express purpose of helping mankind transmute the disharmony that the Nephilim brought to the planet. The light Nagual will not come unless called by people of relative harmony and love. “Wherever two or more gather in my name, there I am also.” Refers to the invoking of the Light Nagual. This requires love, will and intelligence and generally more than one person since there is an energy aspect to it. In conferences on cosmic law and healing, it is the power of the Logos Angstroms inherent in the Light Nagual that causes people to feel very drowsy as it washes over them and moves their association points. The Nagual is the spirit aspect of a person that accesses Akasha by merging into other dimensional spaces. In Jungian terms, it is the ability to merge with universal mind. Don Juan (from the books by Carlos Castaneda) notes that a person must have a strong Tonal, or social aspect, before it’s safe for him to have a Nagual. There is fluidity about the Light Nagual that would be dangerous for a person without strong Tonal. (See also Dark Nagual).

**LOGOS ANGSTROMS:** Logos = word; angstroms = measurement of light. The mystical component the alchemists always sought to mix with air, fire and water. Logos Angstroms is also called **AZOTH**. In the true sense, it refers to the traits of God the light that shines through the cosmic dust molecules to empower them. The relative strength of Logos Angstroms depends on how well one has developed the traits listed in the Tree of Life, of which love, will and intelligence are primary. Logos Angstroms is the holy order of God shining onto this world energizing the air, fire and water. To receive Logos Angstroms one must have all the 31 dimensions that impact the world.

**MYSTERY SCHOOL:** The gnostic schools that taught the ways in which alchemy was done. Such teachings were traditionally not publicly revealed.

**NAGUAL:** (See also Light Nagual/Dark Nagual) The Nagual is the spirit aspect of a person that accesses Akasha by merging into other dimensional spaces. In Jungian terms, it is the ability to merge with universal mind. Don Juan (from the books by Carlos Castaneda) notes that a person must have a strong Tonal, or social aspect, before it’s safe for him to have a Nagual. There is fluidity about the Light Nagual that would be dangerous for a person without strong Tonal. (See also Light Nagual and Dark Nagual).

**NEPHILIM:** The projected double of a fallen angel through a doorway of the inverse universe upon the group souls of Animal Man. Like Animal Man, Nephilim possess only five dreaming bodies.

**PISCAN AGE:** The sixth of the seven Ages of the Earth. The Piscean Age, which we have recently left, was an Age of Water. The physical cures performed by Jesus in the Piscean Age reflect the fluidity and changing of physical states natural in a Water Age. Our current Age of Air demands a more etheric approach that will enable us to move away from Piscean materialism.

**PRANA:** (From text) *Prana is a form of energy lower than soul energy. In a Sun soul type, Logos energies filter down into the body in various forms, including pranic energies. You could say that prana is a component of soul energy, but that soul energy is far more complex and important. Soul energy is like a rainbow while prana is one color in the rainbow spectrum.*

**RADIONICS:** A form of etheric healing that uses diagrams, witnesses, and sets of patterns, sounds and numbers.

**SEVEN AGES (CYCLES):** The major wheels of the Ages of the Earth of which we are now in the Seventh and final Age. The length of this Age will vary depending on the actions of the mortals living within the Age. Time and Space are impacted by karma. The Aquarian, Piscean and other Ages that form the constellations are sub-ages of the wheels within wheels, like months in the year.

**SIXTH DENSITY:** Density refers to the relative closeness of cosmic dust particles, as in the Law of Vibration. The cosmic dust particles are much further apart in the sixth than in the fourth density which we are now approaching.

**SPIRITUAL HIERARCHY:** Order of Angelic Beings and ascended Masters. The more dreaming bodies a person has, the higher he ranks in the spiritual hierarchy either of the right hand path or of the left hand path.

**SUN SOUL:** *(From text): "Suns were a soul type created for the express purpose of creating harmony out of disharmony and transmuting evil into good. Suns were placed in authority over Animal man and the contaminated animal man (Nephilim)."*

A distinct soul type with 31 dimensional bodies to match those of the Earth for the purpose of transmuting disharmony on all of the Earth's dimensions. Suns souls were created all at once as in Genesis, as opposed to Animal Men who were the original inhabitants of the Earth. Sun souls came here as cosmic janitors. When this cycle is finished, all of their dreaming bodies will be individuals and will be able to go forth and multiply in other worlds as co-creators with God.

**TEACHER:** Animal type teachers do well on the mental and physical planes, but only a Sun can translate the Mysteries through the 31 doorways.

**TRANSMUTATION:** The changing of something, of a physical, mental or spiritual nature, from one state to another.

**TRIBULATION:** Time of suffering brought on by world karma.

**VAMPIRE:** *(From text) The person who is cut off from his soul by his decision to hate becomes weak. To compensate he takes life force from the people around him or more commonly from a spouse or parent. He is not conscious of his vampirish action, but his subconscious mind is quite aware. The person being drained will muscle test very weak when standing with his back turned directly to the front of the vampire.*

**WATCHERS:** The original fallen angels who before they fell were assigned to the interdimensional portals to keep watch over the earth much like guardian angels but who decided to eat from the Tree of the Knowledge of Good and Evil and thus contaminated Animal Man.

**WHITE BROTHERHOOD:** *(From text): "There is a spiritual hierarchy of Holy Suns called the White Brotherhood that oversees the Planet, along with non-human guides of an Angelic nature. It should be noted that there is also a Black Brotherhood hierarchy of evil human sorcerers on Earth as well."*

**WORLD RADIONIC DIAGRAM:** The map of the world with the earth's 31 interdimensional doorways correctly aligned.

**WORLD RADIONIC BROADCAST SYSTEM:** System of archetypal designs that gives one an energy vortex hologram that is symbolic of the interdimensional doorways. The World Radionic Broadcast System differs from the etheric healing of common radionics by the mystery of the archetypal symbols and by the dimensional aspect it conveys. Here we are dealing with causal bodies, with Buddhic bodies.

**YIN/YANG:** The complementary/antagonistic forces governing all phenomena, both visible and invisible, in the relative world. The dialectical and dynamic change represented by the yin/yang order forms the very fabric of our World. These complementary/antagonistic principles are mutually creating and destroying each other by the ceaseless rearrangement of their relationship. Thus, nothing is entirely yin, entirely yang or neutral, rather large yin/small yang and large yang/small yin.

# Ahriman, Doppelgangers and the Asuras

Within the last ten years, certain prophecies of Rudolf Steiner have come into being prematurely. Specifically, the tremendous evil influence of the dark forces known as Ahriman, doppelganger doubles and the Asuras have unbalanced the Earth almost beyond repair.

Ahrimanic influence refers to dark force patterns that tend to bind us to the Earth and blind us to our souls. The human enmeshed in Ahrimanic influence sees material science as the salvation of his life, and all his thinking is linear, with a contempt for the spherical thinking of the spiritual bodies. Whereas the spiritual bodies pull us ever toward identification with our higher selves, the Ahrimanic influences pull us tighter to the love of money and the obsessions of the body.

The specific type of Ahrimanic influence is determined by the location one lives in on the Planet. In Austria, for instance, the type of Ahrimanic influence present tends to lead people who live there into excessive intellectualization regarding the soul. Anytime a person must frame his soul concept in purely linear, material formats, he is guilty of such spiritual Ahrimanism.

In New York City, one finds the Ahrimanic influence to be of a highly obsessive nature regarding money. In San Francisco, there is worship of the physical body. Any focus on material form tends to be a sign of Ahriman. In contrast, wherever there is bloodshed, one finds a strong Luciferic influence. Vietnam wartime fed many Luciferic demonics on its violence and torture. Excessive sexual focus encompasses both Ahrimanic and Luciferic tendencies. This is why prostitution, gambling and drugs are closely associated. Their whole purpose is the destruction of the spiritual identity of Suns.

Ahrimanic tendencies are a general term, whereas certain negative spiritual influences (including the Asuras) are individual beings. Steiner had correctly observed that the most probable time for the release of the Asuras onto mankind would have been in 1998. Unfortunately, channeling of entities by ignorant people allowed the premature release of the Asuras on October 9, 1990.

If they refuse to believe that some beings are evil, people who channel entities are open to all manner of darkness. By the inability to discern good from evil, such channelers invited the Asuras, thinking that they were planetary guides. This was a serious mistake, because the Asuras could not be controlled by any Holy Archangel on the Planet, since the Asuras are not dependent upon such a hierarchy. Angels can only control those beings that exist below them in the Spiritual hierarchy in the right hand or the left hand universe.

In the truest sense, the Asuras are not physically on the Planet. When the channeled invitations came to them through the dark world window, they were allowed within Cosmic Law to send light patterns representing themselves onto the holy earth. This was in keeping with free will. These light patterns do not reflect the roughly humanoid form of the Asuras but rather reveal force fields and shapes, as if on a computer screen.

These force fields and shapes allow the Asuras to play a sort of virtual reality computer game with the Earth as the screen. The humanoid Asuras sit past the window on the dark side and smile to see the confusion and destruction that they can produce through the control of ignorant man.

One could say that the primary game they play is of an intellectual nature. To control humans with the ease of moving a Pac Man across the screen with a joystick gives them pleasure. To create wars through the control of thoughtform patterns is thrilling to the bored Asuras. They enjoy monitoring human thought in order to see one human outwit another with no thought of decency. The influence of the Asuras can be seen on talk shows such as the Sally Jesse Raphael Show. The desire to outwit above the desire to find the truth reflects an Asurian trait. An extreme love of intellectual games above the desire to purify one's spiritual aspects is an Asurian trait.

Many times the presence of an Alien monitor force field can be traced to these energies. These monitors dowse as large circular fields that cause a weakened state when one moves in the ring. Only the numerical World Radionic System will clear these monitors. No prayers will work, because the Asuras are above the Angels. Many types of death rays are projected by the Asuras as they watch in amusement the suffering of humankind.

The only beings who can help mankind against the Asuras are the Messengers from the Keepers of the Balance Between Worlds, who are hierarchically above the Asuras. Since these beings are committed to working within Cosmic Law, they can serve only by taking on human karma and human form. By entering the field where the karma originated, Earth, the Messengers can then help mankind survive the Asuras' manipulations and therefore save the Earth. If the Messengers survive and are able to remember how to read Akasha, they must then find a way to fight the Asuras that is teachable to humans. If they fail, they become food for the Asuras and other dark forces. The Messengers come at great risk out of love for humanity.

If humans continue to channel entities from the left hand path, and in particular aliens, there will be no hope for the Earth, and the Messengers must leave. No one at this time should risk the danger of channeling any entity, attending any séance or doing automatic writing. There was a time when such activities were fairly harmless. That time is now past. No Archangel can control the evil that will befall mankind if such activities persist. Many of the alien beings are merely robotic pawns of the Asuras.

Another major spiritual pitfall on the Planet is the presence of the genetic doppelgangers. When Steiner saw that all men would have an evil double in the future, he saw the probable future that is not set in concrete. At the current time, forty percent of all humans have an evil double.

One must not confuse the double with the fallen Angel aspect of the Nephilim man. Nephilim is a contaminated Animal group soul in which the DNA patterns of fallen Angels exist. The fallen Angels themselves exist in the inverse universe but peer like the Asuras through the windows of the torn veil in order to reproduce their patterns of destruction and live vicariously in animal experience.

In contrast, the doppelganger doubles are like breathing demon seeds that grow in the cells of an afflicted human. Like worms, they take on the vibration of the host and cause the host to think and behave in an Ahrimanic fashion. One primary trait is their hatred for the name of Jesus and their discomfort around Holy Beings. You could say that the demon seeds were able to ride on the light waves through the filter of the screen of the inverse universe and the Earth during the fall of Lucifer. They floated on the light as seeds fly in the winds. Materialism feeds them, and they flower into monstrous spiritual cancers that destroy the soul of mankind.

They can be transmitted sexually but are not always done so. They grow better if there is an air-fire-water imbalance and are carried down from generation to generation. They can be removed by the numerical World Radionics System.

When a Sun is cleared of such negation, his face takes on a Holy light. When an Animal man is cleared of the Nephilim fallen Angel influence, he does not look Holy. Once can dowse all the ratios needed to neutralize a Nephilim's fallen Angel component, and then the resulting being is a normal Animal man but no better. He still would have trouble learning higher concepts. However, if a Sun is cleared of the demon seeds, he is in line with his higher self and able to help save the Planet.

# Aliens, Asuras and the Genetic Crisis Today

When the Akasha records are reviewed, the reasons for many of mankind's current problems begin to emerge. Societal and personal illnesses can be traced to the tearing of the veil between the right hand universe and the inverse universe of darkness by several types of beings. When the veil is torn, negation is able to spill into a world that was designed to exist in perfect harmony.

There has been much romanticism surrounding the idea of interaction with beings from different star systems. Today there are many people channeling entities from other worlds. Many people speculate that current Earth problems could be solved by benevolent space brothers, and there are worldwide meditations planned aimed at recruiting aliens to help save the Planet Earth. It must be stressed that when humans open the door of invitation, they run the risk of being completely controlled by the beings that enter through that open door.

## Emergency

A state of emergency has developed in that man has used his free will to walk into a trap of cosmic proportions. Ignorance does not spare mankind the effects of the Law. If mankind continues to invite aliens, he will be destroyed just as if he willingly placed his head into a lion's mouth.

To better understand the current crisis, a lesson in history is called for, along with an explanation of spiritual hierarchy.

Animal man was the original inhabitant of Earth and lived harmoniously until defiant Angels contaminated his group souls. Suns were a soul type created for the express purpose of creating harmony out of disharmony and transmuting evil into good. Suns were placed in authority over Animal man and the contaminated animal man (Nephilim).

There is a spiritual hierarchy of Holy Suns called the White Brotherhood that oversees the Planet, along with non-human guides of an Angelic nature. It should be noted that there is also a Black Brotherhood hierarchy of evil human sorcerers on Earth as well.

## Black Brotherhood Vessel of Ahriman

The Black Brotherhood controls many intelligent beings. Some of these beings are similar to androids and are vessels of Ahriman. Their purpose is to use high intellectual faculties to promote a linear form of thought that makes it impossible for humanity to learn spiritual discernment. **Spiritual Discernment requires a form of spherical thought.** Gnosis is obtained by merging into silent awareness with all aspects of a thing or a being, in contrast to the linear word-oriented Latin thinking of the so-called scientist. In the Ahrimanic way of the western world, the best debater is right. To be slick of tongue has earned many a lawyer a big fee, while the truth went wanting. Many a talk show host enjoys defiling his less than glib guests in front of millions of viewers with the goal of entertaining rather than being honest or fair.

There are Masters and Archangels with specific functions that are hierarchically over the Suns, although many lesser Angels are under the control of the evolved Sun.

Above the Angels are the Gods of Karma, who are primarily concerned with the education of lower beings through life experience, though not as punishment. Mankind punishes himself by choosing certain paths, and the Gods of Karma are his jailers.

## **Sphere of Grace**

Above the sphere of Karma exists a sphere of Grace. Within the sphere of Grace live the sixth density Keepers of the Balance between Worlds (Messengers) and their fifth density assistants, here called the Disseminators of Holy Knowledge. At different times, the messengers have sent as agents to the Earth one of the Disseminators of Knowledge. Confucius is an example.

Such agents typically exhibit a strong ability to reason but are not sent as examples of love or other traits. Their primary ability and focus is intellectual thought, ability to reason and memory of alchemy.

When the Earth has needed dramatic intervention during a crisis, a Messenger would volunteer to come down. This has occurred on several occasions. Quetzalcoatl was such a Messenger, as was Jesus. There have been many other Messengers who died before they could complete their tasks, fully aware that to come to Earth must be viewed as a kamikaze mission. In some cases, they could return to their celestial home if they finished their jobs quickly enough.

The reason that Messengers came instead of sending their lower assistants is that the Traits of love and sacrifice are much more pronounced in the Messengers than in the Disseminators of Knowledge. The Disseminators of Knowledge have misused their position in the past, much to the sorrow of the Messengers.

## **Free Will**

It must be stressed that free will is present in most beings of all hierarchical positions. (Angels, however, are assigned a task that cannot vary and so do not have free will. When certain Angels defiled this Law, they created the first Fall from Grace.) Relative density is not the same thing as hierarchy. An example is that certain Angels of a high density come under the hierarchical control of Holy Suns. The free will of a Sun is not an easy issue to understand in Cosmic Law, because one must consider the decisions of all lifetimes, the decisions of the dual soul and the decisions of society as a whole. Sometimes a Sun may appear to suffer for no apparent reason, when in fact he is suffering the effects of the choices he has made for many lifetimes.

The Disseminators of Knowledge also have free will. Some of them chose to exercise this free will in a negative fashion toward the Earth many thousands of years ago. They did so out of intellectual boredom, but the consequences were far reaching. By using the beings (including Suns) on our Planet as chess men in a cosmic game, they unbalanced the Earth in relationship to the inverse universe.

The erring Disseminators were pulled into the hells of the inverse universe under the Law of Cause and Effect, under the stern eyes of the Messengers. In those hells, they were forced to face the same measure of negation that they had caused on the Earth. Their crimes included the giving of alchemical secrets to evil Nephilim in order to watch the Nephilim manipulate the ignorant masses with sorcery. To them, the suffering of humanity was like a movie script, and they did not choose to be fair and loving. These fallen Disseminators were called the Asuras. The doors to the hells were locked by the Messengers.

## **Human Form**

At the time of their fall from Grace, the Asuras were fifth density beings. Since that time, all beings have been moving to a lighter density, so they would now be considered sixth density beings as the Earth approaches fourth density. Their essence could be compared in form to the humanoid, similar to the Messengers. The human form has many mystical meanings throughout the spiritual hierarchy and symbolizes potential creativity and growth. When the potential is not met, the creature may change form into a more demonic shape. This reflects the Law of As Above, So Below.

Some of the Asuras entered the bodies of Zeta Reticuli grey aliens who had mixed human genetic material, so their characteristics merged into varied forms. These composite gnome-like humanoid creatures were called the Deros or the Giza. They were sometimes called the Gizas because they live under pyramids and offer to neophytes in exchange for the tearing of the veils between hell and earth. These Deros are normally confined to the inverse universe of the dimensions but have been released by sorcerers many times. Sorcerers use them for knowledge, power and as their personally-trained demons to attack enemies.

### **Deros above Angels**

The Deros are valuable to the Asuras, because they are composed of part Sun DNA and are not just pure grey alien DNA. They have the knowledge to manipulate the Law of Vibration and can appear solid or disappear by raising frequency. Since Sun DNA gives them the ability to traverse all of the Earth's dimensions, they have great power over all life forms. With the sorcery knowledge of the Asuras, they appear as powerful demonic energies upon the Earth that cannot be stopped by Angels. The Asuras are above the Angels and control the Deros. Only the Messengers can control the Deros, because they are above the Asuras in the hierarchy.

Until recently, the Deros (controlled by the Asuras) have been a problem primarily in parts of the world that performed human sacrifice. Quetzalcoatl bound up many of the Deros that had been released by sorcerers but left the Earth because the people began human sacrifice again. Jesus did not have to deal with many Deros, because the sacrifice common to his area of the world was symbolic and did not involve humans. Instead, he cleared many evil Nephilim earthbounds and taught people to avoid harming animals or humans in blood sacrifice.

The Deros, therefore, have components of alien Zeta Reticuli greys, Suns and the Asurians. They have been around for thousands of years. When the Deros' gnome-like body dies, a black, flapping vulture, demonic shape emerges from the husk. It must be radionically removed as a second layer of the Deros.

### **Lizards and Moon-Gnomes**

Associates of the Deros include the Lizard aliens and Lizard-Moon Gnome Mutants, which all carry the Asurian dark force patterns. The Pod Aliens, which cause many headaches and other symptoms, are juvenile Moon Gnomes that nest and feed off of a human's orgone energy. When they hatch, they form more slaves for the Deros.

There are many forms of illness that can be traced to the Deros genetic experimentation underground with life forms from different planets. Cell Wall Micro-Fungi is one recent addition to our Planet that causes Chronic Viral Syndrome. Another is the Prehistoric Blood Prana Sucking Globule. Wherever these attach to the human form, illness occurs.

The Deros that have been released on the Earth are often visible with peripheral vision or may appear solid and human. They prefer to live underground in darkness and are pale in color. They walk around at night and avoid direct sunlight. Many of these are responsible for the so-called alien abductions as well as animal and human mutilations. Their ability to change frequency and their adaptability to the Earth makes them hardier than the full-blooded greys. The Deros were the type of alien that violated Whitley Strieber, the author of *Communion* and implanted a robotic control in him.

The Asuras actually observe mankind by directing a type of monitoring screen into your house. It is like they are playing a live video game, observing people impacted by Asurian-controlled dark forces. In other cases, Zeta Reticuli greys can enter through a type of portal. The Asuras create a type of thoughtform

elemental that dowses as a Tribulation or Armageddon Dark force. Each of these phenomena can be removed radionically.

The Deros have been fairly inactive for centuries until recent events. However, since the 1940's, the Earth has had an invasion of the pure-bred Zeta Reticuli greys, who have attempted colonization of the Earth.

### **Alien Invasion Halted**

The invasion has met many snags and has been halted recently by teams of Messengers and Holy Suns. Unfortunately, their genetic experiments continue to live on in the deformed DNA of thousands of Sun children. Fortunately, many will die before adulthood. Of the mixed-breed children who survive, some will be sterile. The ones that live will be loveless and cruel. They, too, are contaminated by the Asurians. The greys could be compared to Nephilim, in that they have a left-hand path contamination imprinted on their DNA.

The full-blooded greys are physically weaker than the Deros, although both are loveless and dangerous. Thankfully, most of the greys are dead, or many more children would be born with distorted DNA. The Deros, though, joined with the Asurians, have a far more insidious DNA plan.

When Rudolf Steiner prophesied that the Asurians would be unleashed on the Earth in this decade, he meant that they would exert their power through the hardy Deros. The Asurians are a higher density being and need a physical vehicle in which to do harm. From their windows in hell, they can mentally control the Deros and the elementals of destruction.

The reason that Satanists and sorcerers use blood sacrifice is to draw the elementals of destruction to the location to be used remotely by the observing Asurians. The Asurians then use them as pawns, like Pac Men in a video game, for their amusement on suffering mankind. Unfortunately, they have an even worse agenda.

The Deros, as carriers of the Asurian seed, can mate with humankind and spread their poison throughout the Earth. The stories of succubus and incubus are not just legends; they speak of how the Deros seduces and implants the evil seed. This can happen through a dreaming body or can be sexually transmitted from human to human and from mother to child.

### **UFO Abductees**

Many of the UFO abductees who report feelings of sexual violation were merely injected with the seed of the Asurians. The seeds pulsate with the host, almost inconspicuously, growing into the etheric body of every cell like a parasite. When all the cells have been invaded, the person becomes robotically controlled by the Asurians. This is a type of spiritual cloning. Deros are the vehicles by which the doppelgangers are installed. The doppelgangers are the cloned cellular patterns of the Asurians. This type of spiritual cloning is the means by which the Asuras will move from the hells of the inverse universe into the right-hand universe.

At least three years elapse between injection of the seed and the full robotic control by dark forces. Steiner called the seed-growing stage the possession of a doppelganger. He predicted that all people would eventually have one. When mankind is controlled to this extent, the Asuras can break free of the inverse universe by focusing their first attention dreaming bodies into the prepared cellular structure of the human vessels. If this comes to pass, the Asurians would then control the Earth.

The Deros have been able to move freely through the Earth recently because of their part-alien heritage. When groups of people meditate for space brothers to come to Earth, by Law the Deros qualify, so they exit hell and enter the Earth. Nuclear explosions have also ripped the doors off of some hells by jarring the dimensional entrances, and the Deros have spilled out in legion.

Humanity has by free will invited the aliens along with their evil genetic seed. These beings are not controllable by the Angels, and the Messengers must obey the Law of Cause and Effect despite their love for Earth. The only hope for the Planet is for people to stop inviting aliens and to learn how to remove the evil that they invited.

### Radionic Solution

The Messengers have shown mankind how to remove the demon seeds and the aliens from the Earth. Even the tears in the veil between Earth and hell can be sewn up by the World Radionic Method. By simply using the small and simple Mobile Radionic Map method, the Earth could be saved. If only 400 Suns worked one hour per day for one year, the Earth could be saved. The alternative is horrendous. *(2014 Publisher's Note: Please see "1995 September Lectures" which includes an updated World Radionic Map).*

As the demon seeds grow, all species are affected. Animal man becomes violent, carnal and destructive. Mobs and packs of violent young men in major cities reflect the growing demon seeds in Animal man. In Nephilim man, corruption, lies, slander and sexual perversity all increase with the demon seed. Theft, drugs, rapes and satanic musical lyrics are symptoms. In Suns, there is even worse damage, because Suns encompass all of the Earth's dimensional spaces, unlike the other species. Many Suns grow crazy with the torment of having such disharmony growing inside them and end up homeless or commit suicide. Even children will start to kill themselves and others in increasing numbers, as the doppelgangers mature.

In every case of AIDS, a doppelganger is present. In Herpes and other viral disorders such as warts, a doppelganger seed is growing. In all cases of chronic viral syndrome or chronic fatigue syndrome, the doppelganger is present. The eventual result is that the affected Sun loses his ability to know what is Holy and doesn't even care to know what is Holy. He wants to argue and ridicule and cares more for money than for his own Holiness. That is because he is becoming a zombie tool under the control of the Asuras.

### Nuclear Holocaust

Suns with mature robotic doppelgangers will start nuclear war that will end all life on the Planet. They will use their dreaming bodies for sorcery, evil manipulation of others and the defilement of all that is Holy on the Planet. All love will be gone, and only lust and violence will remain, until the nuclear holocaust ends it all...

That is the scenario of the not-so-far probable future unless a few warriors step into the fray. **Suns have been given the keys to their own salvation:** explanation of Cosmic Law and a way to remove evil from themselves and the Planet.

At the current time, 48% of all Suns have growing doppelgangers, and of those, 33% are ripe. Animal man now has 90% doppelgangers, with half of them ripe. Nephilim has 70% doppelgangers, and half of them are ripe. The ones that are ripe may drowse as having an "alien robotic" or "alien implanted monitor."

Even the ripe ones can be removed, but it may take daily clearing of layers. George Bush and Saddam Hussein both have ripe ones as do half of the Catholic and Jewish religious hierarchies. Almost every political candidate for high office has a ripe doppelganger.

### Way out of Hell

This message may seem overly dramatic, but I can assure you that directness of speech is necessary for the survival of our Planet. Some may argue: "Why would the Asurians blow up the world and have to move on to another one?" The reason is simple: the earth is nothing but virtual reality computer game in their eyes. How many teenagers spend their evenings killing enemies on their video games? To the Asurians, humanity is just as trivial as Pac Man. Others may argue that beings above the Angels would not want to cause harm, but such a wish is irrelevant. The problem is here. Mankind invited it. Mankind has been shown a way out of hell. **The choice belongs to mankind.....**

# Methods of Doppelganger Contamination of the Masses

Thousands of years ago, the Asurian-contaminated mixed-race aliens called Deros were bound up in hells by the Messengers. There are doorways to other dimensions and to the inverse dimensions (hells) over the face of the Earth. These doorways are along certain grid line crossings that have a mathematical harmonic correspondence with the waveform and frequencies of each dimension. The relative position to the center of the Earth and the directions of north, south, east and west are key aspects of the mathematical harmonics of dimensional world spaces.

Under normal conditions, the doorways to the hells would have been sealed. Over the years, sorcerers managed to open doorways for the purpose of acquiring the knowledge of the Asurians. Certain sounds found in some chants, shapes of buildings or drawings could create holograms of the dimensional doorways that allowed the demonic-appearing Deros to exit in physical form. In exchange for freedom, the Deros gave the sorcerers secret knowledge of alchemy that would empower them.

## Prana Needed

In order to move from the hell to the Earth side, the Deros needed a great deal of pranic energy. The sorcerers learned that the energy could be obtained by enticing the destructive elementals to the scene with blood sacrifice, sexual excess or torture. The evil elementals of destruction (created as thoughtforms of the fallen Angels) fed off such violence and emitted a strong life force during the feeding. The life force, like electricity, could be tapped into by the Deros to jolt them over the threshold from hell to Earth. In order to keep enough life force to maintain their form, the Deros demanded further human and animal sacrifice. It also gave them pleasure, much as many humans enjoy horror movies.

It comes as a shock and a sorrow to many humans that even beings of high spiritual development can fall to such depths of depravity. One must be reminded that it is more remarkable that many high level beings do not fall from Grace. Just as on Earth, in all the Cosmos there are tasks to do and pitfalls to avoid. Lower willfulness, the desire for thrills above duty and the eternal problem of laziness are all present in other worlds. There is no heaven where mankind can sit like a couch potato and hear harp music. In all the heavens there is Holy work to do and a need for vigilant progression of the soul toward purity. The biggest sin is apathy, for in apathy the seeds of pure evil sleep.

## Apathetic Person

The apathetic person sits in front of the television watching his carnal films, too lazy to ponder his soul's task. The apathetic person hears his neighbor being robbed or raped and does not want to get involved. The apathetic person gets depressed and turns that depression outward into cruelty or sexual obsession.

The apathetic person is no less sinless than the murderer, for through his apathy, murders are allowed to occur. Just as anything totally yin becomes yang, the apathetic person becomes sadistic.

Therefore, given the problem of apathy in the cosmos, it is truly remarkable and wonderful that there are some beings and humans willing to step forward with love and vitality for causes that are Holy. Do not marvel at the horrors of the Planet; marvel that there is one bright shining chance that a few warriors can win this battle.

To win in any war, the soldier must know his own weaknesses and the weaknesses of his enemy. It is also helpful to understand the weapons the enemy is using and the areas he is infiltrating.

In this particular war, the goal of the Asuras is to get out of their hell and be able to take over all the human bodies on the Earth. A secondary goal is to use other beings as pawns in a game they find amusing.

The Asuras are of a high vibratory rate frequency and so need an intermediary physical body in order to perform functions on the Earth. Since only human Suns have all of the Earth's 31 dimensional spaces inherent in their DNA, the Asuras find them most valuable. Only Suns can impact every life form since only they possess a dreaming body for every dimensional space.

### **Free Will**

The snag they ran into was that within Cosmic Law they needed at least a glimmer of free will permission to contaminate the Suns. Otherwise Holy Beings would step in like policemen to protect the Suns. They found a loophole in Cosmic Law by working out an arrangement with the part-human Deros aliens.

The Deros had managed to mix their DNA with Suns' DNA with Suns' permission. Suns who had no belief in evil thought that the grey aliens were Gods sent to help them. They readily mated and allowed genetic material to be extracted from them, thinking that they were helping the human race evolve genetically toward a god-like state. The offspring of the loveless greys and the Suns is a hardy gnome-like creature that is suspicious, cruel and intelligent.

The Asuras were the keepers of all knowledge, so the Deros were happy to merge with them in order to gain power. As a result, the Deros were able to learn to dematerialize and rematerialize anything or anyone. To do all their magic and maintain a state of power required tremendous energy, which they obtained through human and animal sacrifice and torture. To hide their crimes, they hid in caves and caverns deep in the Earth. They became very light sensitive, paranoid and increasingly more perverse.

### **Ritual Murders**

Messengers at different times sent the evil Deros into hell prisons, but sorcerers would let them out through the practice of ritual murders. Even so, it was primarily a problem in areas of ritual murders that the Deros were physically roaming the Earth. Most of the Earth was not seriously affected until spiritualism became prevalent during this century.

With the advent of spiritualism, many people began to channel beings from other world spaces or star systems. When this occurred, the doors began to open. In a particular group meditation and séance, a group of individuals invited alien beings to visit them on the Earth. Unfortunately the hell-bound Deros were technically aliens and rapidly took up the offer to arrive at that location. Offering what appeared to be innocuous messages from space brothers and a bribe of mystery school information, many more Deros received invitations. When the call went out for space brothers to visit, the Zeta Reticuli greys also came to Earth in hopes of colonizing. The Zeta Reticuli greys were the ancestors of the Deros. They did not do the sadistic ritualistic tortures and murders of the Deros but were particularly loveless and ahrimanic. Their primary thrust was to do genetic experimentation with Sun DNA. Fortunately, most of the abductions and experimentation by the Zetas has stopped due to the interventions of Suns and Messengers.

## **Aurameter Reveals Deros**

The Deros, though, continue to ravage the Earth. They are very dangerous because they have the ability to materialize and dematerialize and can be in the room although invisible. However, they can always be dowsed with an Aurameter.

Through the Deros, the Asuras have been able to contaminate almost every human with doppelgangers. In the last year, 80% of the doppelgangers have been implanted into humans through the intermediary of the slave Three-eyed Moon-Gnome Lizard mutant.

In the genetic laboratories underground, the Deros found a type of virus that could carry the cloning cell of the Asuras into humans. When the fourth density cloning cell was injected into humans, the virus could dig its way into every human cell to deposit the Asurian DNA.

The Deros knew that the fastest way to transmit the virus was through the weakening effect of an alien mutant, the Gnome-Lizard. In the aliens' juvenile state, it grows in a cluster inside an elongated cocoon. The Deros materialize themselves and a cocoon inside a human's bedroom. They then raise the frequency of their bodies and the cocoon in order to place the cocoon inside the mattress. They rip open the cocoon. They then pull their hands out and dematerialize in order to leave the room. The eggs hatch and form sucker-like attachments upon the fourth-density bodies of the humans. When young, these mutants are called Pods.

## **Pods**

Pods cause weakness of the etheric body of humans at the site of attachment. They can be dowsed readily with an Aurameter, as their legs (seven) move in a slowly gyrating fashion in rhythm to their sucking.

The pods all naturally carry the virus that has been infected with Asurian DNA. As the aura weakens, the virus is deposited in the etheric bloodstream. Often a visible small boil or pimple will appear at the site of the pod sucking.

It is a common mistake of humans to assume that anything non-visible is harmless. In the past, early physicians refused to believe in germs, because they were not apparent to the naked eye. When the microscope was developed, hygiene improved as awareness of microorganisms grew. At the present time, most humans cannot see the Pods, because they have not developed other-dimensional sight. By the time that sight is developed they will be dead, if they do not learn to detect the Pods.

The Pods can be easily detected with an Aurameter even by an inexperienced dowser. They are easier to detect than underground streams or noxious zones. It would be prudent at this critical time in history for every human to learn how to dowse for such energies and to be able to remove them through the World Radionics System.

The Pods also carry other illness-causing diseases, such as the Blood Prana protoplasm, Cell-wall micro-fungi and alien viral disorders. Severe immune depression results. Urinary tract infections, allergies and respiratory illness are the most frequent signs that the doppelganger has entered the human system.

## **Drinking Water Contamination**

The above-mentioned scenarios have caused widespread and rapidly-progressing doppelganger contamination over the world. There is a slower developing form of doppelganger that is also common.

The Deros have lived for many years underground and drink from streams inside caverns. Many underground water sources are now contaminated with the cells of Deros. Since the Deros have Asurian contamination, the water becomes polluted with such dark force patterns. If someone should drink the water, the dark force may cling to a latent virus, such as herpes.

Viruses carry the contamination into human cells, including eggs and sperm. Just as many children born with viral disorders, many children are born with doppelgangers. These may be latent for many years, until a stressful situation weakens the immune system. When the virus becomes active, the doppelganger is able to spread throughout the body.

When the cells have been infected to a maximum potential, the person then has a full ripe robotic doppelganger contamination and is under the control of the Asurian. It is a form of spiritual cloning in that the Asurians can then project their first attention dreaming bodies into the prepared cells and call it home.

### **Substances**

There are certain substances that seem to feed the doppelganger; one of these is mistletoe. The color yellow-orange speeds doppelganger maturity, and indigo slows it. Doppelgangers are often spread by sexual contact through the medium of viruses and from parent to child. The Pod-infected doppelgangers grow to maturity rapidly (3 to 8 years) whereas the genetic type matures more slowly. The genetic type may be dormant for fifty years or more, although most erupt during viral outbreaks.

Low sodium, low choline and negative thoughts seem to weaken one to doppelgangers. Hating God or another person provokes viral outbreaks that encourage doppelganger maturation.

At the current time, almost everyone is exposed to doppelganger contamination. If the World Radionics System is not used, virtually everyone on the face of the Earth will be totally controlled by the Asurians within ten years. In the interim, the violence on Earth will become unbearable.

The World Radionics System is the only sure way now available to remove these energies from Earth and there is no full protection against contamination, because the water is soiled with Deros cells.

**Listen and beware.**

# The Destruction of Society: The Silent Holocaust

Years ago, a famed Eastern guru decided to take it upon himself to purify the energies of a major American city by the holy meditations of his faith. He had many followers who meditated with him in seeing the city as harmonious and full of loving members of society. He lived in the crime-ridden city in order to bring his power of thought to raise and purify the energies around him.

After years of meditation, the city continued to worsen in its crime rate. Recently, he became disgusted and left, wondering aloud why anyone would choose to live in such a foul city. Retiring to a rural setting, he could again feel harmony around him.

The reason that the meditation did not work was that one cannot cure a spiritual problem by mental methods. All problems must be healed by energies from the same plane of causation or from a higher plane. In no situation can a spiritual disease be healed purely by mental methods. Likewise, one cannot heal a mental disease by physical methods.

## Prana Healing

Mentally-produced physical disorders must be healed by mental changes and/or spiritual transformation. A level of intervention lower than the plane of causation cannot produce a healing, only a change of symptomatology. This is why pranic healing methods, such as the laying-on of hands, will only give temporary relief when a spiritually-caused problem is present (such as entity possession).

These basic principles of healing apply to individuals and to society. At the current time, a spiritual disorder of cosmic proportions has reached a state of crisis throughout the Earth. To ignore the problem is paramount to suicide for the Planet.

Denial of the societal symptoms of disorder is becoming increasingly more difficult. Gang rapes of innocent joggers, school children bringing firearms to school, ritualistic murders of family members, epidemic child abuse, widespread homelessness of shell-shocked appearing alcoholics, and robberies are all reaching crisis proportions. You may think that the reasons and solutions proposed in these writings are insane, but consider this: **If what I present is true, then there is an answer that may work.** If it is not true, then society has no hope in sight. At the current rate of degeneration, only a miracle can save society.

A miracle is indeed offered at this time. Contrary to popular belief, a miracle is not magic. Magic is the misuse of power and changes the physical appearance without changing the causes behind the appearance. Cosmetic surgery could be considered magic, or sorcery, in this context. So could forms of pranic healing by the use of charged crystals to treat a mental or spiritually-caused disorder.

Miracles occur by the use of Cosmic Laws of a high level to change disordered patterns of a lower nature. Miracles always follow Law, even if the specific Laws being used are not familiar to the recipient of the miracle. When an enlightened being uses Higher Law, it may appear that a miracle has occurred, because it is a rare phenomenon.

Because miracles follow Cosmic Laws, they cannot be offered without the consideration of the recipients' free will. For instance, if a person has a deformity that was caused by the personal choice to hate God and another person over many lifetimes, then he can only be healed by making the free will decision to no longer hate God or the other person. If he makes that decision, an enlightened person can then, by use of Higher Principles, change the physical effects of the hate. If the healer changed the deformity without the spiritual and mental causes being removed, he would be practicing sorcery.

## Doors to Hell

On a worldwide scale, free will is also an issue in the causation and removal of the current threat to humanity. Direct invitation of alien beings to come to Earth has caused the doors of hell to open and all

manner of disorder to spill forth. Only the removal of the invitation can prevent the end of the human civilization. In such an emergency, it is vital to stop all group meditations requesting alien visits and all trance-channeling of aliens through humans. It is impossible, for several reasons, for an alien-contaminated channeler to discern the spiritual polarity of his sources.

As long as there is at least one human requesting alien visitors, there must be at least one other human willing to clean up the horrors that alien may bring. Every action by every human on the face of the Earth impacts every other human. Since there are a great many foolish people embracing lower psychism and sorcery, there must be an equal number of people willing to clean up the disharmony that results or the Planet is doomed.

### **Miracles**

The invitation to alien beings is closely aligned with the summoning of demons by sorcerers, because the aliens are contaminated with very high level dark force energies that are not removable by traditional exorcism methods. The miracle that has been offered the Earth is a method whereby these aliens can be removed from the Earth for all time. Since miracles only follow Cosmic Law, it is imperative that the miracle be done within the Law of human group karma. In other words, the humans are shown how to perform their own miracle to correct their own Planetary karma.

The miracle takes the form of a rather peculiar radionic method using numbers and a World Broadcast Map. It will seem to make no sense to most people, as well as to the aliens. That is fortunate. Since the aliens are aligned with fallen Disseminators of Holy Knowledge, they could easily block most removal methods attempted by humans. In the past, they have had access to all the Akasha records and so understand the highest forms of magic and sorcery. Only a new system could confuse them long enough to ensure their removal from the Planet. They are technically thousands of years more advanced than humans, so no weapon can check them. Only spiritual science can stop them; it is now being successfully used.

### **Death of Souls**

The greatest tool the aliens have against humanity is the people's mistaken belief that there is no evil. Despite the increase in violent robberies, rapes and murders, many people simply close their eyes to the death cries of civilization. In choosing to die in ignorance, they are also choosing the death of their souls.

It is a mistaken belief that the soul is immortal. The material and spirit that make up the fabric of the soul are immortal but without individual consciousness. Only the soul that aligns with the Cosmic Laws is able to live into immortality as an individual entity. By free will, a person can destroy his very soul by refusing to align it with Higher Consciousness. The soul that embraces disorder is returned to cosmic dust by the force of its own decision. Like a person in heavy traffic who decides to turn left despite the presence of a moving freight train, he will meet the inevitable end.

At the current time, the removal of aliens and the shutting of the doors of hell must be the primary goal of mankind if the Planet is to survive. Recycling, taking vitamins and herbs, having astrological readings done are all virtually irrelevant in light of the present crisis. Preparing shelters for the homeless is but a band-aid on a huge cancer that is about to erupt. Writing letters to congressmen about the nuclear crisis is meaningless, because if the alien problem continues, there will be a nuclear holocaust despite all the letters. Going to Dysfunctional Families Group Therapies is laughable in light of the imminent breakdown of society. It is like worrying about a hangnail just before you are decapitated.

This is war. Make no mistake. It is a war that will take no prisoners. You must view it as a fight to the finish and realize that the alternative is the death of your soul. To shut your eyes is to allow yourself and all the world's children to become evil zombies.

# The Paradox of Duality and the Dangers of Self Hypnosis

Throughout the history of Planet Earth, different thought systems have been introduced by Holy Beings for specific purposes. This is not to say that man is merely a pawn of higher beings, on the contrary, his choice of a thought system reflects his own ability to steer his destiny.

If mankind makes up a religion or philosophy, then it cannot partake of Divine inspiration. Divine systems of thought must transcend that which mortal man is privy to or they are not Divine. In other words, such a religion or philosophy must partake of truths that transcend the struggles of Earth. By man's very nature, the truth of spirit evades him as long as he is in material form and usually beyond the grave as well.

During different times and places, religions and philosophies have manifested that helped steer man toward being a more civilized being. On the surface, many of these systems appear to disagree regarding basic points. On a deeper level, they were all true and appropriate for the time and target population.

## Systems Misused

It is true that the traditional systems were misused and distorted by their followers. Nonetheless, the absence of such systems would have left man little more than an animal. In the large cities today we see a complete spurning of any Divinely-inspired religion or philosophy, and chaos is becoming the rule. Part of the problem is that the original systems have been distorted or not been followed. Another part of the problem is that no system has adequately addressed the problem of species of people.

Some religions were created with Animal man in mind. Animal man must be controlled by a fear of punishment or his behavior will degenerate, for he has no overwhelming impulse to live harmoniously with others or within any rules. Without a religion based on fear, Animal man becomes a murderer and a thief, given to drugs and violent sex. The desire of the moment is paramount to Animal man, unless he fears a punishment in this life or an after-life. Nephilim man as well can often be kept from doing harm within the confines of a punishment-oriented religion.

The breakdown of the fear-based religions has been very destructive to society in that all boundaries of behavior have been removed which allows many serious repercussions on many levels and threatens the very survival of the Earth.

## Suns Variable

If the whole Earth were peopled with only Sun soul types, there would still need to be more than one type of religion and philosophy. The reason for this is simple: Suns are at different levels of spiritual development and need specific teaching they can understand.

The simplistic idea of heaven as a gold-lined street with Angels playing harps is one example. Many Suns have taken comfort in the thought that after death they would join loved ones and be able to rest without work. This shows a poor level of development for a Sun.

Many Suns think that if they are merely loving, no harm will befall them. Since love is only one of the attributes of the Tree of Life, it is unlikely that they would be free of suffering or fulfill their soul purpose by partaking merely of the attribute of love. This type of Sun is poorly developed and desirous of self-hypnosis above truth. This type of Sun is spiritually lazy and is a coward when it comes to facing all the attributes of Holiness.

In truth, to be like unto Christ means to be wise, loving, just, harmonious, beautiful, graceful, merciful, intelligent, grounded and strong. To be merely loving quickly turns into weepy sentimentalism, for true love partakes of small amounts of the other attributes of God and is totally impersonal.

### **Love and Fear**

There have been thought systems introduced that stressed love and were aimed at reducing fear. One example is the Course of Miracles, which is from a Holy source. The reason for the Course was two-fold: to train some strong Suns in emotion and thought control and to ease others into spiritual euthanasia.

When it became apparent that the dark forces were becoming increasingly powerful on Earth, ascended masters became concerned about the welfare of the poorly-developed Suns. Almost none of the Suns could control their thoughts, speech, emotions or actions. This was a serious impediment to extricating themselves from the crisis at hand.

The Course in Miracles was offered to decrease the hate-filled thoughtforms that filled the Earth, to prepare warriors mentally and to sedate through self-hypnosis suffering Suns who would not otherwise be able to cope with the difficulties about to manifest on Earth.

### **Warriors Addicted**

The problem that the masters observed was that many of the warrior Suns got addicted to the euphoria of self-hypnosis and did not move on to help save the Planet. The course was meant to be merely a stopping place of rest. Like all systems of thought, there was more truth behind the veil of the words.

Many rigid Suns get all worked up into lather when they feel that their sacred cows have been slaughtered. This is why a strong sense of self (such as Castaneda referred to as the Tonal) is necessary for a person to advance spiritually. One must be able to understand layers of truth that may appear superficially to be in conflict. Only a person with courage can peer into heavens and hells and emerge relatively unscathed.

An example of the paradox of layers of truth is the concept that everyone is a spark of God and therefore good. This is true, until one realizes that under free will, a person can choose to be not of God hence evil. Now comes the old argument: How can evil spring from good?

The answer is simple: By understanding that good (God) is harmony, one can readily see how the same song can be played incorrectly or disharmoniously (evil) and the result can be the creation of a new song. Thus, evil or good can come from the same musical instrument, dependent on the will of the player.

### **Truisms Misused**

A major pitfall today is people taking truisms from the Course or a religion and using them inappropriately. By using truths out of context, they are blowing notes from the flute of God in an improper or inopportune manner and therefore partaking of the disharmony of evil.

Every truth or Cosmic Law that has ever been spoken by a sage must be understood within his culture and time frame. This does not mean we should scorn the Mysteries of all Ages, but rather that we build on them with wisdom and caution.

In fact, a hatred for the Holy Beings of all cultures is a sign of the presence of evil. A diagnostic test to evaluate the level of evil that has invaded a person is to think the name of Jesus or mentally say Saint Michael's Sword prayer in the presence of another person. If the person twitches and looks pained or hostile then he is probably possessed of demonic energies from the inverse universe of the Earth. Demonics from other worlds would show **no** reaction.

## **Few Suns Strong Enough**

At the current time, most Suns cannot tolerate the information given in this book without fear and repulsion because the implications are staggering. It is much more psychologically pleasing to sedate oneself with meditations on the complete absence of evil than it is to face evil and transmute it.

There are many Suns who should be sedated with such truisms because they have no strength to join the battle at hand. It is as though they are in a war-time psychiatric hospital on drugs for shell shock. We must not remove the drugs or mental comforts, for that would be cruel.

Some of us though must venture forth into the night to face the enemy, which is Ahriman. Many of us will suffer injuries and horrors that defy description. We move on, maimed, yet never forgetting our mission: to save the Earth and the Sun children.

To win this war we must dare to look into the core of darkness and not lose heart. We must not get mesmerized by the call of the banshee but keep our wits about us at all times.

We must have total control over our emotions, thoughts, actions and speech, or our weakness will become our spiritual coffin. In sobriety, strength and joy we march forward with the words of Christ ringing in our ears:

**“Fear not the world, for I have overcome the world.”**

# Sex and the One-Eyed Gnome-Lizard-Human Robotics

Although the title of this chapter may seem like a laughable science fiction parody, unfortunately in this case truth is, once again, stranger than fiction.

We mentioned earlier that doppelganger contamination occurs through several routes of transmission, one of which is the Pod alien. It is easier to learn by first studying generalities and specifics second. The use of the Pod alien is more complex than previously defined.

Pods are not exactly juvenile Moon Gnomes, nor are the Gnomes merely “go-fors” hired by the Asurians or Deros. Pods are the juvenile form of a mutant best defined as a “one-eyed Gnome-Lizard-Human Robotic”. These creatures are the result of genetic experimentation done by the Deros.

They do not have a high intelligence but will follow commands induced under a type of hypnosis by the Deros. Their ability to think independently could be compared to that of a horse. Just as a horse can be trained to follow the same path without thinking about it, so do these creatures follow procedures and commands without question.

## Pod Purpose

The purpose of Pods and the adult mutants is two-fold: to contaminate humans with the doppelganger and to speed the doppelganger growth rate in humans.

When the Pod attaches to a human, doppelganger contamination begins to spread slowly throughout the body. Eventually, every cell in the body will have the doppelganger invading it like a virus, subjecting the affected person to the control of the Asurian dark forces and destroying his free will. We have already discussed the various factors influencing doppelganger maturation rates.

You may have wondered what the purpose of the Gnome-Lizard is other than the depositing of Pods (and therefore doppelgangers). The Gnome-Lizards have been taught a procedure that greatly enhances the doppelganger growth in humans.

The Asurians had taught the Deros many mystery school secrets. Part of such knowledge was sexual magic. Throughout the history of humanity, different cultures have used forms of sexual magic to produce energy through the inherent generative aspects of the sexual experience. Aleister Crowley wrote of his experiences using sexual torture for the purpose of acquiring power through the demonic forces drawn to this generative energy.

## Chakras and Prana

One characteristic of the Gnome-Lizards is their ability to direct a particular type of pranic energy in a beam-like fashion from the solar plexus area of their bodies. In earlier writings, I have referred to the pranic energies of air, nerve and blood types. There is also a type of pranic energy known as sexual prana. This is the type of prana that can be directed at will from the solar plexus of the mutant.

Each type of pranic energy has a particular chakra or key location of origination, although the networking of meridians throughout the body causes the impact of each prana to reverberate over the whole body. For instance, nerve prana is often lowered by the presence of a dark force attachment near the head or

spine. Air prana is weakened by an attachment near the lungs or shoulder blades, and blood prana is affected by a dark force attachment to the heart, liver or spleen.

Chakras and meridians have corresponding locations in other areas of the body. For instance, the kidneys and the eyes are connected in relationship to water balance. The pelvis and the throat are connected in relationship to sexual prana or the energy of creativity. The throat chakra is important for higher creativity and auditory clairvoyance. The ability to perceive Holiness and to hear the harmony of truth is seriously impaired in the person who directs all his creative force into the pelvis for sex at the expense of the throat chakra.

### **Sexual Prana**

The Deros discovered that the presence of high sexual prana directed into the pelvis of a human would cause a rapid growth of the doppelganger. The food for the doppelganger is sexual prana. By the excessive stimulation of the sexual centers, the mutants could increase the maturation of the doppelganger dramatically. Instead of several months or years, the doppelganger could be ripe within five or six weeks if intense sexual prana was directed at or generated in the affected individual.

The mutant has been robotically directed by the Deros to send a beam of sexual prana into the pelvis of doppelganger-infected people. This is perceived by the individual as a pleasant sensation of sexual excitement.

It is vital for the affected individual to dowse all ratios for the doppelganger layers and for any of the mutants. The mutants exist on fourth, fifth and sixth densities and do not necessarily stand near their victims all the time but may walk around the house. When they direct the beam of energy to the pelvis, they are within eight feet of the victim. Any sudden increase in sexual thoughtforms should cause the dowser to suspect such contamination.

### **11:11**

On January 11 and 12, 1992 a team of Suns and a Messenger were able to neutralize much of the damage done by the one-eyed Gnomes and neutralize many of the resultant doppelgangers. Through their work, many Pods and Deros will disappear from the Earth.

The same group of Suns made great progress in neutralizing the harmful alien energies on the Planet, and were able to restore a destroyed dimension, thereby saving mankind from imminent death. Through this group of Suns, many harmful aliens were neutralized. It must be pointed out that those harmful aliens were able to enter the Earth because of the worldwide 11:11 meditation that invited space brothers. Had these Suns not blocked these harmful aliens, the Earth would have been in severe danger, even beyond its current crisis.

Despite this progress, Suns must be ever vigilant for outbreaks of doppelganger increase, new types of alien disorders and then begin the long process of the elimination of all darkness from the face of the Earth. This includes neutralizing all fallen Angel aspects of Nephilims and the binding up of all the dark force grid patterns from Earth. An even greater challenge will be the education of humanity in the spiritual sciences and of the dangers of inviting aliens. Humanity must be taught ways to discern evil from good. An even more basic need is to teach humanity that there **IS** evil and good.

The prevalent belief that evil acts are done as a result of insanity or a deprived childhood must be stopped. We must reject materialistic and mental explanations for the Earth's spiritual disorders.

Humanity can then begin the slow painful process of unveiling its eyes to Holiness. Until then, the Holy warriors must not rest.

# Dreaming Bodies and Interdimensional Work

The phenomenon popularly called astral travel is actually the focusing of one's first level of attention on one of the dreaming bodies while it is moving within a particular dimensional space. Human Suns are composed of many layers or types of bodies. Similar to a series of boxes within boxes, the dreaming bodies of a Sun coexist within the same space. The dreaming body that one sees is the one that has the individual's first conscious attention.

## Physical Body Is a Dreaming Body

To be perfectly blunt, one's physical body is merely the soul's dreaming body with first attention focus. This may trouble the materialist but is actually mankind's salvation when fully understood.

The reason many Eastern thought systems teach that what we see is merely illusion or dream is that one has more power if he understands how to change his focus of attention. By knowing that we possess many bodies, not just this hunk of clay, we lose our fear of death and gain in the excitement of interdimensional study.

One of the prime skills that must be learned by the neophyte is a method of developing control of a second attention dreaming body that will not lose awareness even while the first attention body is operating in full consciousness. It is like watching a TV show in which you are one of the actors while washing dishes and serving dinner to your family.

When you first learn to drive a standard automobile, it is very confusing to work the clutch, brake and gas pedal all in symphony. It seems you must think about the operation of each mechanical component of the car and still steer within the yellow lines. Eventually you learn how to drive safely without thinking about each detail. Your first attention turns to the road (hopefully), not the radio station. You can even talk to others as you drive in person or on a car phone.

## Sun Feels Clumsy

Learning to operate dreaming bodies is very similar. Driving to a child means simply sitting in the car and watching the scenery pass. Like children, most Suns pass through life without ever questioning the passage of time, how dimensions work or what space travel really means. If a Sun embarks on the path to higher studies, he often feels clumsy in other-dimensional travel, like a teenager in a drivers' education class. He may have some kind of accident and feel wounded. Indeed, all Suns receive other-dimensional wounds but have only a dim perception of them. Only a Sun with higher training can figure out "how to pull the car out of the ditch" or rescue a damaged dreaming body.

The wonder that Suns have 31 dreaming bodies to match the Earth's dimensional spaces has yet another layer of meaning. Each dimensional space could be considered a world that rests inside a warp of space. Remember space is not an empty vacuum but is full of freed cosmic dust particles. At certain positions along the time/space spiral, the attributes of the Logos (numbers, rays and sound) shine down, causing a bending of space due to the alignment of cosmic dust particles that resonates with those traits as they arrive from different angles. Depending on the resulting configuration, specific aspects of dimensional spaces form. Understand that dimensions have to do with shape and wave form, while frequency (density) can be variable within those dimensions.

## Harmony Within Pattern

In fact, within each dimensional world, there are steps of frequency (density) that could be called heavens, hells and underworlds. Whether something is called a heaven or not depends on the relative harmony of the interior of that space in relationship to the dimensional shell (pattern). If the inhabitants of a dimensional space live in a state of harmony with the Cosmic Laws (pattern) of that world, a heaven is created. This could happen to the Sun's world of first attention (Earth), if sufficient work were done.

If the inhabitants of a world space live in a state of lower willfulness (eat from the Tree of Knowledge of Good and Evil) rather than from the Tree of Life (attributes of order), then they create a hell. We on Earth are now pursuing this state of lower willfulness at breakneck speed.

The problem arises for those inhabitants who understand and choose to live in a world of order: should they stay or go? Should they clean up the world or move their first attention into another less hellish world space? It may come to that but at this point in time Suns are supposed to try to save the Earth, the first attention of one of their dreaming bodies.

## Heavens and Hells

We know that each dimensional space contains variable frequencies within it. The heavens and hells are of a lighter density than the condensed crystallized form, which is the world. The Earth is in fact the underworld of the Sun's first attention. This may seem distressing but is actually the good news. The bad news is that due to the premature increase in Earth frequency, the Earth is moving toward hell or heaven, depending on the actions of its inhabitants. Since whole planet groups tend to share the same first attention, there is little hope with the current disorder, unless some Suns learn to move their first attention to another dreaming body.

Suns have 31 dreaming bodies, one for each of earth's dimensions. Each dreaming body has 25 echoes within a dimension. One's first attention is on one of the 25 echoes within one dimensional space. Or, you could say that consciousness is like a television image that is created by the film editor's mixing of films shot by 25 cameras. Normally only one of the camera's images is projected on the screen at any given moment. The film editor decides when to switch to another camera's film, as he surveys the 25 screens. Normally, only one camera's film is used, and there is no changing of focus for most people. Changing of focus within one dimension refers to the change in of one's frequency.

## Nirvana

If a highly harmonious person who is aligned with Cosmic Law raises his frequency within a dimension, he arrives in Nirvana. If a person is disharmonious, he arrives in hell as his frequency rises. The unnatural rise in frequency on the Earth has pushed most people close to hell.

Most people think that their concept of reality is the only screen and are unable to move their eyes to the other 24 screens or have strong enough will power to push the buttons to switch cameras. To learn to align oneself with truth and to change frequency at will is the task of the Holy Warrior.

The pitfall for Suns is that they may get trapped in Nirvana, thinking that this is the end of the road. This is the trap that *Don Juan*, referred to as the mold of man. If a person does not become agile in dimensional movement aside from his primary attention dimension, he becomes food for the beast. If a Sun begins to think of Nirvana as a place to rest, he becomes annihilated and returns to cosmic dust because he has reached the end of the line in that dimensional framework.

## **Like Train Stops**

One could say that each dimension is like a train with 25 stops along the way. As in life, each stop holds a part of you along different developmental stages. The first stop holds your basic baby self, which wants only to be fed. The second holds your child-like self, who wants to be fed and loved and held safe from monsters. The third stop embraces your adolescent self, who wants to fight authority and indulge the senses. The fourth contains you as a young adult with a desire for knowledge. The fifth stop holds your mature adult desire to form a family or learn group consciousness while nurturing others. The sixth stop holds one's desire to create and have an impact on the larger world. The seventh the desire to integrate all you have learned from the earlier steps along the way. The eighth stop holds your understanding of Cosmic Law. The ninth holds your power to use that Law with wisdom and force. The tenth stop holds your ability to work with other forces in the universe. Beyond that cannot be written...

## **Child Self Remains**

The irony is that one never loses his baby self or his child or adolescent selves. They stay at their stations along the frequency train line. To indulge in childhood memories or adolescent obsessions takes the first attention (or second attention) back to that train stop and lowers the frequency of the individual's spiritual self. Wherever the first attention resides, there the person resides. The implications of this are staggering, especially when one considers most people's habit of rehashing the past.

Most Suns can never hope to get beyond the first few steps upward toward Nirvana. Most will be shoved into hells as they float passively along with the Earth's premature burst in frequency. Only by meticulous control of thoughts and feelings can one escape living in hell on Earth, as the future looms before us with great frequency surges.

## **Time Focus**

The Sun who has carefully trained his thoughts and feelings to be in the present rather than the past or future, who is in a state of harmony with the Logos can avoid becoming food for the beast. In fact, the Earth is an excellent training ground for the resilient individual who is precise, exquisitely controlled and graceful in his emanations.

As the Earth is forced into death by the growing negations in its core, Nirvana (on the outer ring) gets expanded into nothingness. This is what some people think is becoming one with God. It is true that a person merges with the All, but it is not the ideal state.

A person with proper training of the dreaming bodies existing in other dimensions can switch his first attention into one of those bodies and move to a new Heaven and a new Earth. This is the meaning of the Rapture.

Suns must come to understand that God does not go down to pick up sickly man but that man must gather his courage to go to God. Man must find the virtue and power to ride the Rapture of his own accord and not wait on some spaceship to transport him passively to some other planet. If this were not possible, I would not waste my time and breath explaining these concepts to you.

## Hope for Suns

Suns could dance from world to world and do wondrous things in each world. They could live in joy and harmony for all time in thousands of heavens, even in several simultaneously.

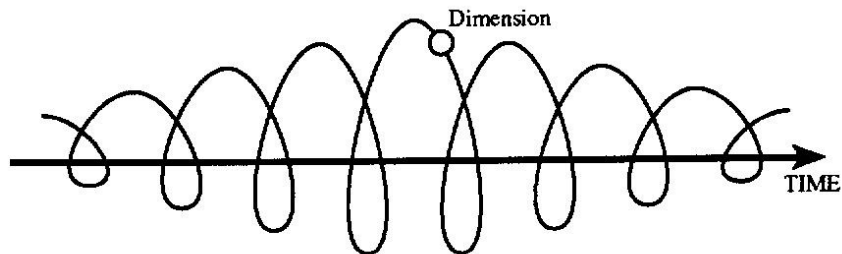

One of the wondrous things about a Sun soul is that they have the potential to bud off into new souls when all the dreaming bodies within that soul become aware. It is possible for Suns to have multiple first awareness, all operating in harmony, without loss of form for any of them. That this is rather tricky and takes some balance is true. It is also undeniable that a slight emphasis to one dreaming body over the others is needed to integrate the knowledge from all the worlds. Despite these things, it is not only possible but the intended path for Suns.

It is clear that Suns are co-creators with God, if they choose to learn now to operate with love, will and intelligence in all dreaming bodies in all worlds. If they choose to be lazy or over-identify with their current first attention, they become food for the beast. The choice has been theirs for all time. There are no old or new Sun souls. They were all created in one blast of the Logos. Some souls have pursued Holy truth over many lifetimes; others have chosen to live like animals. Their current focus is a reflection of many thousands of choices and is not thrust on them by a cruel God.

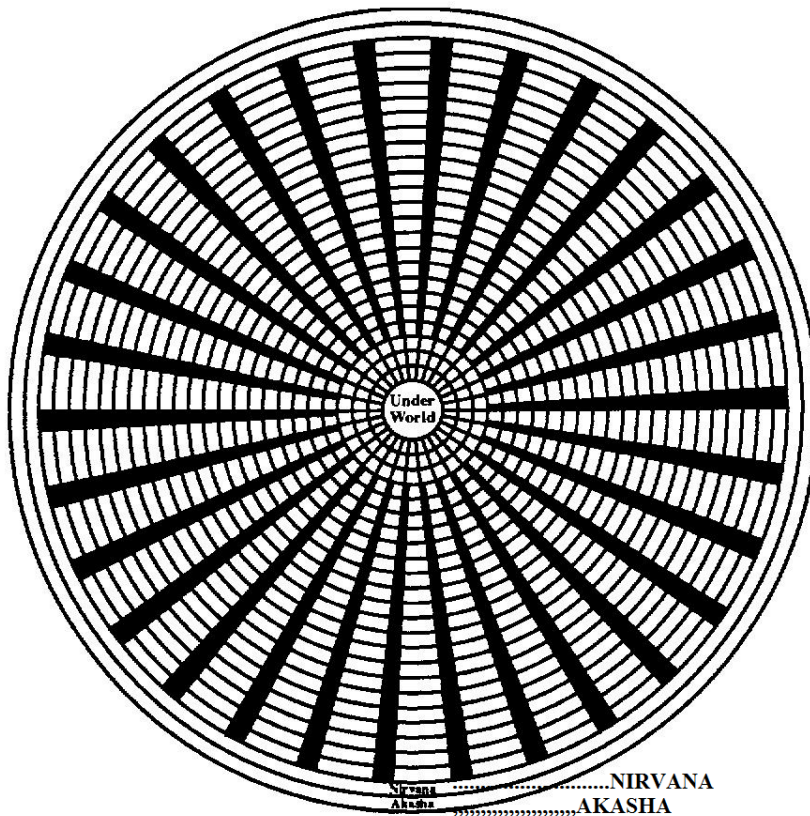

Only Suns who have over many lifetimes struggled for truth can possibly hope to comprehend or use this information.

# The Reading of Akasha Records

The Akasha records, or the Book of Life, exist as a shell outside the time/space spiral. Dimensions exist in locations on the sides of the rings within the time/space spiral (see diagram below).

If one were to look at one slice or one complete circle, a cross section of this spiral would look like this:  
(See also Appendix)

In order to contact Akasha records, one must be able to tune the highest frequency dreaming body within that dimension to its highest pitch, so that it interfaces Akasha, beyond Nirvana or the Mold of Man.

Recall that each dimension is like a world of its own and a person thinks he exists wherever he holds his tightest first attention dreaming body. What we call our physical body is merely the crystalized form within the underworld of one focused dreaming body in a dimension.

We exist in all the other dimensions as well, but in most cases we have no awareness of those other bodies.

To learn about other dimensional selves or to heal any damage to our other selves that may reflect on a part of our crystalized form, we must learn to form a second attention on another dreaming body in another dimension within the appropriate frequency. Since there are 25 densities (frequency steps) within each dimension, there is a type of dreaming body that can behave independently on each step in all the 31 dimensions. In other words, a Sun is able to learn and work in hundreds of locations and can receive damage in those locations as well if he is ignorant.

### **Avoid Illusions**

The greatest pitfall for the beginning student is the danger in getting caught up in the beauties or illusions of the many worlds he encounters. When the second attention dreaming bodies begin to gain in focus, startling visions or thoughts may occur. In the presence of a Holy Teacher this is very common.

The student may suddenly see a monster superimposed upon the face of the Teacher as dark forces nearby the second attention dreaming body try to fool him. He may run out of the room in fear that the Teacher is the devil himself. Or in the face of pure evil he may see the face of Buddha superimposed.

In the struggle for truth, one must learn not to rely strongly on dreams or sudden thoughts. As the dreaming bodies emerge from their cocoons, many illusions will come and go. This is why the trait of sobriety is so important.

If one values the higher teachings of the right hand path, one must not be overly fearful or hysterical. If a monster follows you home, seek to study it to learn how to control such a phenomenon.

### **Guardians on the Threshold**

The Guardians on the threshold of knowledge and of death are composed of one's own weaknesses. A man who carefully faces his weaknesses can walk past the Guardians in life and in death without concern for their appearance. He will know in all calmness that they represent aspects of himself that need to be refined. He will stand at the gate calmly until their disorder dims, knowing it is just a mirror before him.

The same mirror flashes before a man in the face of Holy Beings. A person who has struggled for Holiness will see the Holiness in a Holy Being or teacher. Once the person's inner self has been purified and made ready, the mirror becomes a pure window in which he can see both Holiness and evil. Only a person on the road to truth can ever discern Holiness from evil. Most other people will run from fear or seek to defile that which is Holy by slander and ridicule.

### **Avoid Dark Companions**

This is not to say that one should not be cautious in the interdimensional study. On the contrary, one should tread with grace and with concern for detail, or the value of the studies will be lost. Great damage has been suffered by students who failed to detect evil disorder around them. Those students who entertain darkness lose their guardian Angels and fall into disorder and death.

After one has contact with Holy teachings, the dreaming bodies in all dimensions begin to refine and function in harmony. Learning occurs on many levels. At an earlier time in one's life, one could be in the presence of disharmonious people without danger, because the dreaming bodies were asleep and blunted. If a student embraces people who partake of disorderly lifestyles after he has been awakened by the touch of the Light Nagual, he suffers great damage.

For this reason, one must realize that when one has embarked upon the path to higher knowledge, one cannot look back, or one will be turned into a pillar of salt like Lot's wife. The refined dreaming bodies cannot stand the harshness of darkness without destruction, so one must learn to march ever forward toward the promised land of Holy Truth.

### **Do Not Pine for the Past**

To pine for the old days of ignorance is foolish, because a dreaming body will dart backwards through the time/space tube and get caught there. Dreaming bodies do this in learned or ignorant men, but it is more painful to the sensitized student.

To covet a material object, such as a car, is just as foolish. In such a case, a dreaming body becomes intertwined with the object and cannot learn or move. It is trapped in a form that goes against the soul purpose.

In cases of obsessive love, a worse scenario arises. The dreaming body becomes an evil spirit, haunting the desired one, often after death.

Even casual thoughts of sexual acts can cause a dreaming body to freeze in such a thoughtform and impress the walls of a house. Anyone who lives in the house will be haunted by the thoughtform and frozen dreaming body. If the thoughtforms were violent or perverse, the dwellers may begin to pattern thoughts after the image and believe that they are thinking independently. Many cases of sexual identity confusion are due merely to great grids of such frozen acts and dreaming bodies floating over cities.

### **Let Thoughts Float Out**

It is of prime importance that the student not own casual thoughts floating through his head that are not Holy. If he owns the thoughts, he will create another copy of the dark thoughtform and never be free. Every person on the Earth has vile thoughts float into his head from these dark grids that are primarily obsessively sexual, violent or materialistic. Merely let them float back out of your head without clinging or resisting. Thinking something Holy, singing an uplifting song or reading a Holy book will fill the mind so that the other thoughts cannot cling.

Having such discipline in thought, behavior and emotions is absolutely necessary if one wants to read Akasha records. In order to read Akasha, one has to be able to move through many heavens and hells to the outer ring of truth to behold the secrets. Unless a person is able to learn the meaning of order in thought, he will be unable to maneuver his course and will get caught up in the illusions along the way.

The reading of Akasha can only be done by a person who is able to distinguish order from disorder, truth from lies, evil from good. The reading of Akasha is not done by the peering into windows or the seeing of films or the reading of books. Those things can too easily be manipulated by dark forces, because they are the stuff of illusions.

### **Like a Maze**

Akasha reading could be compared to walking down the aisles of a maze at night with the truth being in the center. Using your ability to discern and reason, you will either hit the walls or sense the opening to the center paths. With awakening dimensional dreaming bodies, you gain hands that can scan the sides of the dark hallways, looking for the openings. By skill, persistence and trial and error (actually asking the correct questions) you are finally able to locate the center of the maze. When in the center of truth, you still must run your hands over it like a blind man, looking for shapes and textures.

As long as man's first attention is in the crystalized body, he must learn of Akasha indirectly, like a blind man, or else the cord between the first and second attention could snap and he would die. He learns of truth by textures, sounds, colors, shapes, emotions and impressions that go far beyond the physical sense. The closest description of what he perceives is a pattern of truth.

Only a wise man can judge what the pattern of truth means, and this veil is present to weed out the unworthy. The danger is that he may be only seeing a part of the pattern.

The Sufi story of the different men trying to figure out what an elephant was is an example. In the dark, they all felt a different part of the animal. One man felt the elephant was a snake because he felt the trunk. Another man felt the elephant was a tree, because he felt the leg.

### **Study Important**

The more a person reads and studies in the many sciences and humanities, the more he is able to read Akasha, because he is able to ask the correct questions. Similar to using a computer, the reading of Akasha requires that a person be able to get into the correct directory, before he can get into the desired file. The asking of correct questions and the noting of resonance with truth or untruth allows a person to get closer to his goal.

In the case of the maze, many people would hit the same wall time and time again assuming that the truth would be in one direction or another. This is a pitfall of people trained in one discipline or thought system. The generalist makes the best reader of Akasha as evidenced by the great Rudolph Steiner.

The true generalist is able to scan many directories in Akasha and find the one that resonates as true to the question he has posed. Obviously, the first question must be of a general nature in order to do this.

### **Evaluate a Sickness**

For instance, you may be sick and not know why. You cannot find the reason on any of your charts or by asking your usual dowsing questions. The first question to ask to get to the correct file in Akasha, would be: "Is this physical illness primarily due to a physical, mental or spiritual level of causation?"

If you find that the root cause is from a spiritual level, you must not assume that you are possessed. You must then ask: "Is the spiritual cause of this illness due to an entity possession on an aspect of my auric bodies or due to another cause?"

If you find that it is due to another cause, you could then ask: "Is this spiritually-caused disorder originating from me, another human, a grid, an alien life form or other cause?"

If you get a fairly good resonance on the answer of "an alien life form", you could then compare a statement to truth using a 360 degree scale. You could say something like: "An alien life form has been the primary cause of current pneumonia". If you dowse that the statement is 300 degrees truth, try to amend the statement slightly and then recheck on the scale.

"An alien life form is somehow related to my current pneumonia." This statement could be 360 degrees correct. Your thoughts must go down different alleys. "An alien life form has weakened the immune system of my husband so that he acquired a bacterial infection that later impacted my health," may be the almost final conclusion. One could dowse on a percentage scale how much of the pneumonia was due to the spouse's spiritual contamination. If it was only 60 percent, then similar questions must be posed to uncover the other causes.

The reading of Akasha is similar to dowsing with the dreaming bodies. Dowsing trains the dreaming bodies to read Akasha. If a person dowses over numbers on dimensional symbols, he will become more and more able to read Akasha without effort.

## **Pictures and Words**

At a certain point, the dowser will get information suddenly, as though a picture flashes before his eyes or a word is whispered into his ear. Do not be fooled: only a person trained by the routine dowsing of numbers and dimensions over charts is likely to be accurate in the receiving of such information. Unless you have learned to remove all entities, do not trust information given in such a manner.

With the experienced dowser who has worked with radionic numerical dowsing for an hour per day for a year, such information will start to come in a clear manner. What has really happened is that a dreaming body has traced the patterns of Akasha, and his subconscious mind has produced a picture or sound that is close to the Akasha pattern.

All Akasha reading requires is the ability to dowse with the dreaming bodies. In other words, they learn to discern truth from untruth in a progressive manner. By dowsing physically, one is able to translate what the dreaming bodies have discovered into a form the crystallized mind can understand. People who think that they are too advanced to dowse never read Akasha correctly. For in all things the higher knowledge must be brought to the physical in some form of patterned language such as dowsing.

## **Do Not Be Lazy**

To rely on important information from channeled sources is the dangerous path of the lazy student. Mankind needs to quit begging other beings to do his homework for him. He needs to begin the slow, painful process of opening his eyes and ears to truth so that he can save himself from the liars of all worlds.

Mankind should quit scanning the skies for aliens to save him but should begin to save himself. He need not look to the skies for the answers to the salvation of the Earth; he merely needs to know how to see the jewels in front of him on the path.

All the tools for the salvation of the future children of the Earth have been given to mankind, yet he continues to whimper like a beggar for someone to feed him truth. He must walk the alleys of this world, stumbling at first, until he spies the Holy morsels and stoops to eat.

Only the humble and pure-hearted who can recognize the truth will find the manna.

# Detection and Analysis of Spiritual Contamination

During the last few months, everyone on Earth has become contaminated with Asurian energies. As you gain assessment skills, you will readily be able to determine as truth that even the most Holy humans on the Planet are affected by dark forces at this time.

It is vitally important to perfect these skills now before the doppelgangers increase. If a doppelganger is allowed to progress for very long, the affected person will lose all ability to perceive truth and harmony by dowsing or any other method. The insidious nature of the cellular invasion of the doppelganger flaws the neurological system, so dowsing fails. Also spiritual intuition is partly dependent upon the health of the cranial nerves, which are some of the first body parts weakened by the doppelganger.

## Influenza

Influenza symptoms may be the heralding clues that the body is reacting to the foreign etheric DNA of the doppelganger. In some cases, allergies suddenly become a problem, as the immune system fights frantically to restore order. Auto-immune disorders may occur at this step of infection. Joint pain, lupus symptoms, rashes and sinus congestion are common. Respiratory congestion and Candida are also frequent. Bladder and prostate inflammation soon follow. Bacterial super-infections develop.

Cranial-nerve inflammation may cause ringing in the ears, altered taste sensation, headaches, depression, lethargy and poor memory. Agitation and insomnia may manifest. As the doppelganger spreads throughout the system, muscle weakness arises. In susceptible individuals, psychosis develops.

When an acquired doppelganger has been growing for five weeks, the affected individual may no longer be able to dowse or discern what to do to recover. The genetic doppelgangers grow far more slowly, unless a secondary different acquired doppelganger joins. A person who has both kinds of doppelgangers will degenerate quickly in his ability to dowse or discern truth.

## Physical Symptoms Subside

The physical symptoms of an acquired doppelganger will eventually subside, normally within three months. The subject may then appear healthy, as his body is no longer fighting the alien cell invasion. His mental degeneration will continue, though, along with his spiritual devastation.

In areas of the country where widespread chronic fatigue syndrome has manifested seemingly overnight, doppelganger infection of the masses through the water system is the causative agent. In other situations, governments have experimented with malignant electromagnetic wave forms over whole cities for warfare research.

If societal breakdown begins to occur at a rapid rate in a city, one can easily suspect doppelganger contamination. In Animal man and Nephilim, physical weakness upon contamination is not a serious problem, but moral derangement is the norm. Sudden surges of rape, robbery and random thrill-killing are typical in a city with high populations of doppelganger-infected Animal men or Nephilim. Washington, D.C. is an example. At the current time, 55% of all people in that city have ripe doppelgangers and essentially all the inhabitants of the city have growing doppelgangers. The rapid degeneration of New Orleans can be traced to the fact that 80% of its present population has ripe doppelgangers and virtually the whole population is contaminated.

Large cities reflect the growing threat. San Francisco has a 70% ripe doppelgangers rate, and New York City's population is half ripe. Within five years, basically all of New York City will have ripened. Living in a high density population leads to multiple exposure to doppelganger influence, and sexual mores are a factor.

Chicago, Illinois is an alarming 70% ripe at this time. Most middle American cities, like Wichita, Kansas have a typical ripe rate of 20%. However, 90% of the population has been exposed to doppelganger contamination and will eventually ripen over the next seven or eight years. Usually, three years is the minimum time needed to ripen an acquired doppelganger and eight the maximum.

Cities with fairly low populations will often show high percentages of ripe doppelgangers for other than usual reasons. Sedona, Arizona and Taos, New Mexico have approximately 60% ripe doppelganger rates due to the large alien populations. Montreal has a similar rate for the same reason.

Even Anchorage, Alaska has a 40% ripe rate with 100% contaminated. Miami, Florida has 50% ripe while nearby Cuba has only 10%.

The whole state of Maine has only a current 8% ripe rate, but the state of Hawaii has 50% ripe doppelganger population.

Other countries are not immune either. Russia is 40% ripe, as is France. England is 35% ripe and Germany 40%. Australia is only 20% ripe so far and may show the slowest rate of increase in the near future. Haiti is 80% ripe, while residents of Zaire show an 80% ripe rate. The Middle East is not spared as reflected in Iraq's 75% ripe rate. Japan is 55 percent ripe. Vietnam is now 70% ripe.

Every country across the globe is contaminated, and at the current rate of progression, every human on the Planet will be under Asurian control within a few years. The result would be the end of civilization as you know it, and a scenario post-apocalyptic would emerge, such as illustrated in the "Mad Max" films. This can be avoided with hard work on the part of trained spiritual warriors.

Obviously, the warrior must be able first to determine the presence of doppelganger contamination within himself and know how to remove it while he is still able to do so. It would be prudent at this time in history to check oneself on a daily basis for such contamination in order to protect one's health and harmony.

Pendulum-dowsing over a chart that lists kinds of dark forces should yield a strong swing toward a resonating disharmony. The following dark forces should be on the chart:

1. Asura visual monitor in location (or Alien Portal or Vortex)
2. Mature robotic doppelganger nearby in person (meaning you may have been around someone who is already under Asurian control).
3. Developing doppelganger contamination.
4. Deros grey nearby.
5. Zeta Reticuli grey with transmitter nearby.
6. Asurian slaves nearby: Lizard Moon-Gnomes.
7. Pod alien life-forms or egg cases on body or furniture or pets.
8. Vulture Death Spirit nearby over a Deros corpse.
9. Prehistoric Blood Prana sucking protoplasm present.
10. Asura elementals: Tribulation and Armageddon dark forces.
11. Fourth density Fungus Mutation Illness present.
12. Fifth or sixth density fallen Elohim present.
13. Black Brotherhood Ahriman Vessel nearby.
14. Lilith, incubus, succubus sexual obsessive dark forces near.
15. Nemesis (Revenge spirit), Nahema, Qlippoths, or Hex elementals nearby.
16. Adramalech, Nisrock, Baal, Belphegor demonic forces nearby.
17. Asmodeus, Alastor, Astaroth, Luciferic, The Furies dark forces nearby.
18. Beelzebub, Moloch, Satanic energies nearby.

In order to determine a specific type of contamination, it is very helpful to have names listed on charts. With names, one is able to determine a resonance with the current problem through dowsing. By knowing the name and number of a dark force, you have complete control over it through radionics.

If you have trouble getting an initial pendulum response, ask yourself a series of questions with a yes/no format, such as:

1. Do I have any doppelganger contamination? If yes, what numerical ratio will remove this energy?
2. Are there any monitors, portals or vortices of a harmful nature in this house? What ratios will remove them?
3. Are there any Deros greys nearby? (And so on down the list of dark force energies).

At the current time, some alien energies are able to block some of the dowser's awareness, with one exception. Almost any dowser can locate alien contamination by two methods: going over the body with an Aurameter and analyzing nerve prana reading for specific body parts.

### Partner Helpful

Ideally the dowser should have a partner, so that they can check each other with the Aurameter for any strong readings of alien or other dark force energies. Remember that the dowser's mind must program his fine muscles to react in the presence of a particular energy field and not just dowse over the aura for anything. You don't want to just dowse an aura; you want to program your mind specifically to locate only dark-force patterns in the aura.

Mentally request that your muscles and nerves trigger a response that reflects in the Aurameter movement when you encounter a **dark-force** pattern that is harmful for your physical, mental or spiritual health. In this way, you do not pick up any guardian Angels or guides, only negative forces. Your subconscious mind readily knows the difference, but your conscious mind needs a signal to translate the information visually.

With these thoughts in mind, balance the Aurameter and slowly walk around your partner. If you find a force field on at least one side of the body, stand in that location and ask for the clearing ratio needed to remove that dark force. Also ask in which dimensional spaces the ratio must be placed on the World Broadcast Map or in the Mobile Map System in order to remove the energy from the Earth.

The dark force field may be strong and the Aurameter may appear to push back toward the dowser if a drain is present in the aura, or the Aurameter may twitch frantically if the dark force is a Pod or other alien. When you get a dowsing response, check over your chart to see what kind of energy you have located. This gives you skill in detecting specific energies without a chart available. In all cases, dowse appropriate clearing ratios, and do not rely on other methods, because the dark forces may torment your neighbor or not leave you at all.

### Doppelgangers Breathe with Host

Most people today will have several disharmonious patterns as reflected by the Aurameter movement, even if they dowse over a chart as being clear. **Doppelganger contamination will not always show up using the Aurameter; one must ask specifically whether such contamination is present.** The reason for this is that doppelgangers breathe with the host and hide with viral carriers inside the cells. Since they vibrate with the host, it is difficult to dowse them as separate from the body.

Many illness-causing disorders from aliens must be checked individually, because they are very subtle and hence tricky to detect. It is wise to check using a yes/no format for the presence of Cell-wall Micro-fungi, alien virus, Prehistoric Blood Protoplasm and even Pods. Pods usually grow fast enough to be detected with the Aurameter within 24 hours. Their legs move very rhythmically as delineated by the Aurameter. They quickly cause doppelganger contamination and organ disease as well. When a Pod is located, realize that a Moon-gnome or Gnome-lizard is usually nearby to check on its hatchlings.

## Fallen Angels

Since late November 1991, fallen Angels of a very high density have been able to torment mankind. These fifth and sixth-density fallen Angels or Elohim can be dowsed as great birds flapping over a person's body. Unless they are removed, the person may have a great many physical pains and will be tormented by violent or carnal images of a perverted or obsessive nature. These Elohim have the ability to make your pendulum "lie" over a chart, so you may get that you are perfectly clear of dark forces. However, if someone checks your aura with the Aurameter, these dark forces are readily observable by the flapping movements of the wand.

It is also fairly easy to learn to project your aura upon a chair or upon another person so that you can dowse with the Aurameter over the mentally-projected form. In particular, the head region should be checked for a foot above, behind, on the sides and in the front.

Another way to check one's own head for contamination by the dark forces is to use a picture of the cranial nerve system, such as is found in anatomy books. Each one of the nerves in the head has significance along the acupuncture meridians and are frequent sites of entity attachment.

## Check Nerve Prana

One can dowse the relative nerve prana on a 100% scale of each cranial nerve while looking over the anatomical drawing. If you find that a cranial nerve is below 80% optimal in nerve prana, be suspicious of an entity attachment or a drain from another person. *(See chart on page 47)*

The subject of drains from other people is covered in the book, ***Gnostic Book of Earth Changes***, and will not be repeated here. If you find that an entity is attached to a nerve or that a type of alien infection or doppelganger influence is the cause of low prana, then dowse all appropriate ratios.

It is also extremely beneficial to check other body locations for any disharmony by going over a list of body parts, by using anatomical charts, or by touching that part of the body and asking for the relative nerve, blood or air prana reading of that location. Many times you will dowse yourself as clear but have an entity or dark-force contamination hiding out in a particular body organ or system.

## Energy and Joy Improve

Detecting and removing such contamination may mean the difference between your ability to help your fellow man or a gradual decline in your abilities and intuition. Your energy and joy level will be much higher if you check yourself over on a daily basis. You can figure out a system that suits you, and just follow it as a protocol. On the days that you are sick or depressed, you need to do it all the more. Remember that the normal state for a Sun soul is one of joy, love and the desire to be of service to the world. If you do not feel these traits, then you have contamination on some level in your spiritual bodies.

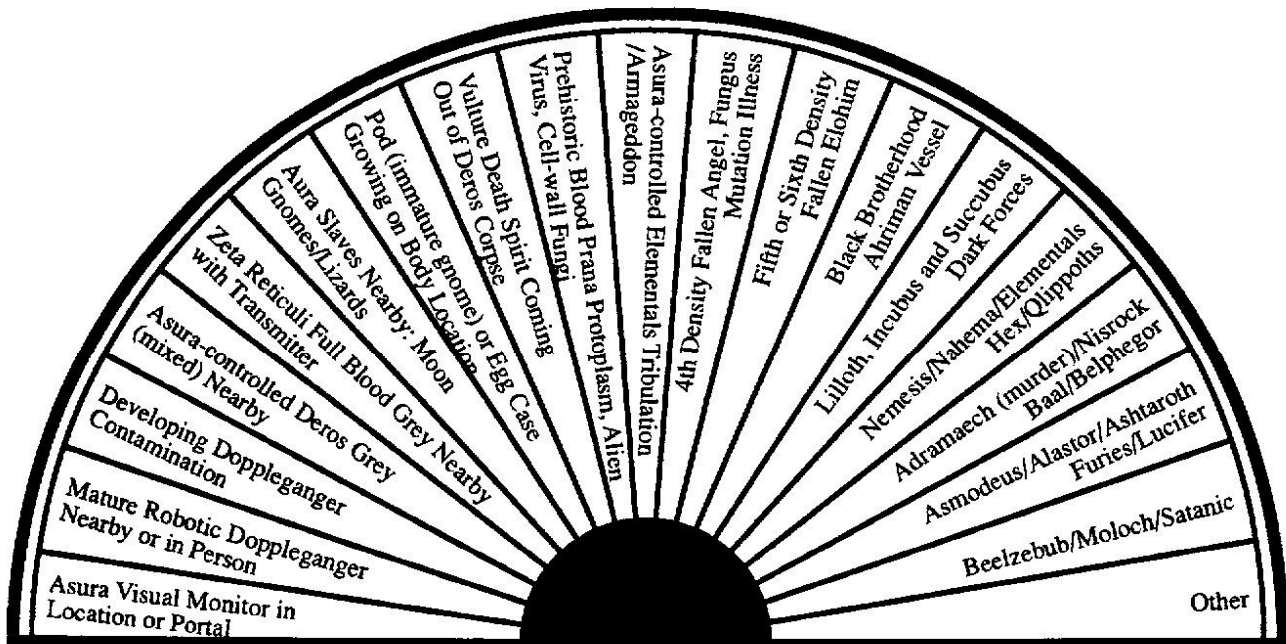

Remember that 70% of all physical illness derives from a spiritual cause. Another 15% stems from mental habits. Since only 15% of all illness comes from a purely physical origin, it is vital to learn spiritual clearing and mental-emotional self-control if you desire to be strong enough to be of use to yourself and the Planet.

Daily checking of the dual soul is an important part of personal healing, because the dual soul is half of you. You can project the aura of your dual soul onto a chair and check with an Aurameter for any obvious dark-force patterns or use a list or chart. As you clean your aura and that of your dual soul, you will feel energy and joy that you have never known.

As Goethe said, "Joy is the infallible sign of the presence of God."

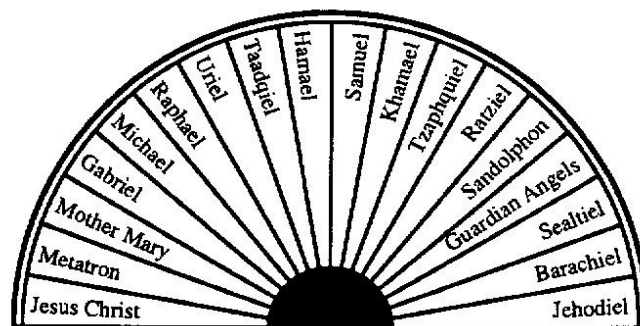

## Dark Forces from other Worlds

These must be cleared on World Broadcast Radionic System.

## Dark Forces from our own Inverse Universe of Destruction

These can be reduced by prayers to the Holy Powers of this world and dowsing ratios on the World Broadcast Radionic System.

## Holy Powers

Dowse which power to pray to for dark force clearing.

# Evaluation and Intervention in Physical Manifestations of Disharmony

Many people lack stamina due to physical problems. This lack of stamina reduces their ability to help save the Planet at this critical time. For that reason, one must not overlook physical form needs, even though the lower form must be considered secondary to the spiritual.

Physical expressions of disharmony may originate on the spiritual, mental or physical planes of causation. Often, the presence of an acute physical illness may have been avoided if the subtle signs of disharmony were detected and treated on the correct plane of causation at an earlier time.

There are times when a problem may originate on the spiritual plane and still need an emergency physical measure. Normally, one must treat an illness at the same (or higher) plane of causation. For instance, a mental imbalance may cause a kidney problem. One must address the mental imbalance (such as fear or hate) but may still need to address the lower problem to preserve life. If a massive renal infection is present, an emergency antibiotic may save the kidneys from death, therefore giving the human time enough to learn the mental and spiritual lessons so that he may help save the Planet.

## Hate

Many people are ill due to the toxic effects of hate thoughtforms casually bandied about in offices and homes. Such people may waste away with terrible viral disorders and be unable to eat. Obviously the detection of the hate thoughtforms must be done in order to stop the flow of incoming illness patterns. Ideally one would try to communicate with the hater the seriousness of his thoughtform demons. Unfortunately, it takes a very evolved person to be able to confront his own mental and emotional frailties, and so in many instances nothing can be said to the perpetrator of negation.

In such a case one would have to dowse ratios for hate demons and put them on the World Broadcast Map or Mobile Map System. This would stop the damage from the current hate demons, but the creator of those demons has free will to hate again. Then more ratios must be dowsed. If such a person is unable to be taught, one must avoid him at all cost. Sometimes one can create a temporary protection by envisioning him in a thick-walled safe with the door slammed shut.

Even if the person quits sending hate demons, the physical results may linger for a week or more. A hateful person with a strong sense of will can create thoughtform demons that live several weeks, tormenting anyone in the vicinity. The immune systems of affected people will often shut down, and many infections can develop.

## Vampires

In other cases, there are prana vampires that suck the life out of the people around them producing illness. A person who hates another person causes himself to be cut off from God by his desire to hate. Anytime one hates anyone else, he also hates the God spark in that person and hence hates God.

When a person is cut off from his soul energy, he instinctively throws out a tube to a nearby person to drain prana. Prana is a form of energy lower than soul energy. In a Sun soul type, Logos energies filter down into the body in various forms, including pranic energies. You could say that prana is a component of soul

energy, but that soul energy is far more complex and important. Soul energy is like a rainbow while prana is one color in the rainbow spectrum.

The person who is cut off from his soul by his decision to hate becomes weak. To compensate he takes life force from the people around him or more commonly from a spouse or parent. He is not conscious of his vampirish action, but his subconscious mind is quite aware. The person being drained will muscle test very weak when standing with his back turned directly to the front of the vampire.

### **Chop the Cord**

The person being drained becomes weak in an associated organ system. It is obviously important to cut the vampire cord. This can be done with a strong burst of chi and a chopping motion by another person and should always be stopped, even if the two people love each other dearly.

The drain blocks the guilty party from the effects of his karma, which would be his own ill health due to hating another person. Instead, an innocent person becomes ill.

When these patterns emerge, they often must be cleared repeatedly, until the affected parties learn to recognize and treat the disorder at the onset. Mental and spiritual habits are not easy to break in one session. Even if the vampire is half way around the world, his drain can kill.

Obviously, the healer would need to break the prana drain. It may also be helpful to do some form of pranic healing on the weakened person, such as Reiki or Touch for Health. Otherwise, he would be slow to heal, and major illness could develop. Since damage from such drains must heal for weeks, the person should be monitored for any necessary physical intervention.

### **Be Flexible**

It is important not to be too stuck in the healing modality in which one is trained but to be in a state of “don’t know” in order to tune into the most appropriate healing technique. Despite the horrors of traditional Western medical care, there are times when a person who is recovering from a spiritually-induced disorder may need such medicine. Antibiotics may be needed to bide time until the auric bodies heal enough to allow the immune system to work properly.

Many people need medications due to a lack of soul energy in the glandular system. One of the most common sites of dysfunction is the thyroid gland. Approximately one third of all women have some dysfunction in the thyroid gland. The primary physical cause is auto-toxicity from the bowels. Toxic foods, pesticides, mercury tooth fillings and medications may be continually reabsorbed without being properly eliminated by the excretory system, despite seemingly normal daily bowel movements. Obviously, cleansing with an osmotic purgative (such as Epsom Salts) in dosed quantities and frequency may be in order in such a case.

The next most common physical cause of thyroid malfunction is nuclear fallout and electromagnetic pollution. Vitamin C, hot detoxifying baths and a reduction in electromagnetic appliances may be called for here. All of these physical measures, including the intake of animal glandular replacements may be required so that the person does not become ill and depressed. If the gland is seriously damaged, the person may need the supplement for the rest of his life. He should not be too attached to the idea of not needing any material intervention, because that resistance to physical treatment is in itself a form of carnal obsession.

## **Do Not Avoid Physical Treatment**

Since over half of all thyroid disorders relate to spiritual or mental causes as well, it is prudent to evaluate such a person in non-physical ways, meanwhile not withholding physical treatment. In half of the cases that have mental or spiritual causes, the affected person or a loved one has a problem with a grudge or hate for a person or God. This can go back for many lifetimes. The specific dates, locations and people involved are not usually significant. The most important intervention is for the grudge-holder or hater to decide to change.

In some cases, the unbalanced person is the dual soul of the sick person or a family member that is draining prana from the throat chakra. The free will of that person prevails, but an etheric drain can be severed by the person victimized. In the case of a dual soul, the connection cannot be broken.

If the dual soul is the cause of the physical disorder, the affected person can mentally talk to his other half while in meditation in hopes of convincing the subconscious mind to allow healing to occur. Taking all dark forces off the dual soul is a necessary daily step in such a healing. If the dual soul still chooses to be disharmonious, then the physical body of the other half may remain ill. Continued prayers, exorcism and subconscious communication with the dual soul may be needed to allow the health of the affected person to be tolerable.

## **Avoid Assumptions**

The above discussion of causes of physical disorder brings out a very important point. One should never make a quick assumption about the relative spiritual progress of another person purely on the basis of his physical health. Some people are ill because they are being drained by others and are unaware of what to do about it. Other people of very high spiritual advancement become ill because they do battle with major demonic forces using several of their dreaming bodies at one time and receive wounds on the auric bodies.

Some Holy teachers or their chelas take on some of the entities or karma of potential students in order to facilitate education. To lower psychics the teacher may appear possessed or full of karmic debts when viewed with second sight. The teacher may become ill as he struggles to take the disorder that he has inhaled and reorganize it into Holy order. Such a teacher may need emergency medical intervention or pranic healing to survive the digestion of tremendous negation. To the ignorant bystander it may appear that the teacher has no power to heal himself. In fact he may be risking his life to save that of a future guru.

## **Monasteries**

Many of the most Holy teachers became monastic recluses because they were obligated to digest disorder around them, and they chose to avoid illness by avoiding disorderly people. In that way they could conserve life force and work with only the most worthy students in a secret manner.

At this time in history the salvation of all of humanity is at stake, and hiding out in monasteries is not in the best interest of the Planet. The more Holy a person is, the more hate he will provoke in evil people. A Holy person requires a certain amount of pranic energy to stay in physical form, and yet he uses his energy to transmute disharmony around him all the time. As his students gain in Holiness, they too will provoke hate as a polarity response from the possessed people around them.

The ability to discern when to risk one's physical health for the betterment of humanity is a crucial part of spiritual advancement. The understanding of species of people is necessary to avoid taking on the karma of Nephilim or ripe doppelgangers. The world needs surviving heroes far more than quickly-sacrificed martyrs.

## **Dowsing**

To remain in physical form, one must be able to determine the plane of causation of a disorder and understand the basics of intervention on each plane. Dowsing is the easiest method to detect causes and select interventions. However, to get a meaningful answer, one must ask the correct question. Education in the physical, mental and spiritual sciences must continue for the dowser to get the most precise answers to intelligent questions.

A study of nutrition is helpful but one must remain flexible in approach. Jesus said, "It is not what goes into a man's mouth that defiles him but what comes out of his mouth." Too often the student becomes obsessive about food but paradoxically defiles himself with poor control of speech.

## **Nutrition**

The taking of supplements can be expensive to the wallet and to the health of the kidneys and liver. Many nutritional supplements overtax the elimination system and provoke allergic responses. In many cases eating common weeds that grow away from the highways will replace the need for vitamins and minerals. One can study botany or muscle test and dowse for the correct weed to eat.

Foods such as raw okra, yellow vegetables, yogurt and sprouts are of particular benefit. Many western people are allergic to soy because they lack the digestive enzyme needed to digest soy and soy products. They may become depressed if they follow a diet high in soy foods. Seeds and nuts give most people adequate protein but some people may need animal foods for other reasons. If they lack a significant earth element balance or certain dietary enzymes, they may need some meat or milk products to stay strong enough to finish their souls' life work. In dowsing appropriate foods, one must be unattached to the findings. If you have a mental repulsion to the eating of animal food, your response may be obstructed by your emotional bias. You may need raw goat's milk but have a set idea that all dairy foods are bad. Some people need the amino acids and enzymes in a food like yogurt in order to think clearly enough to process spiritual lessons.

Fermented drinks such as beer and wine have a beneficial enzymatic effect on some people. Other people depending on their constitutional types should avoid all fermented foods. Do not assume that one diet is appropriate for all people. For instance, many people cannot adequately digest raw foods unless they are liquefied. Such people may develop malnutrition on the very diet that would restore another's health.

## **Facial Characteristics**

By observing physiological characteristics, certain clues as to a person's physical harmony reveal themselves. The following observations should be made:

1. Is the hair thin, dry or oily? (Reflects nutritional condition.)
2. Are the whites of the eyes clear and free from yellow or red spots? (Toxicity dims the eyes and weakens eyesight).
3. Are there bags of fluid or deep shadows around the eyes? (Showing kidney congestion.)
4. Is the nose enlarged, red or congested? (Reflects a heart condition or allergies.)
5. Is the mouth over-large? The teeth irregular? (Reflects digestive capabilities.)
6. In the facial complexion is there a hint of yellow, grey, blue or green? (Many entities and elemental imbalances cause the facial color to change to an unattractive hue.)
7. Is the skin mottled, pimply or warty? (Liver and lung toxicity as well as fallen Angel imprints cause skin disorders.)
8. Does the person have foul breath? (Reflects infected sinus and gum problems, worms and toxic colon.)

9. Does one side of the person's face look quite different from the other? Does he walk with his head to one side? (Symmetrical disharmony can reflect entity possessions or a person of an unstable character.)

10. Does he stare at you without blinking? (Such a person often steals life force from others or is insensitive to others' needs.)

11. Do his eyes constantly dart around the room while he is with you? Does he continually move his arms and legs while sitting? (Such a person often has worms or entities and makes a poor candidate for higher knowledge.)

### **Hygiene and Order**

A person who has poor personal hygiene or who keeps lots of newspapers piled around the sofa does not usually show high potential for teaching or healing. Everything on a person's body or home is to some degree a reflection of that person's harmony and disharmony.

Sensitivity to patterns shows a person of high spiritual evolution. For instance, the wearing of striped clothing is very weakening to the life force and should be avoided. Large polka dots are like holes in the aura and weaken the wearer.

Paisley patterns have strongly negative astral emanation while florals are often pleasing to the aura. Plaids are usually soothing while large checks are painful to the aura.

A person who wears lots of jewelry attracts negative energies to his aura. Long fingernails snag the aura of the wearer and of those nearby. Perfume has a pattern as well and should be carefully considered.

Many people become ill because they sleep under the slicing patterns of ceiling fans (even when turned off).

### **Clothing Tags**

The brand tags on the backs of shirts and on food items are like radionic treatments and should be removed. Computer bar codes are very weakening as are many trademark symbols. Coffee cups from the Circle K convenience stores are debilitating to the person holding them. Most people will muscle test very weak holding an item that has the letter K inside a circle, yet many foods display that sign to indicate they are kosher.

Every book in your house emits an energy field. Every compact disc album has a sound coming from it even when it is laying upon a table. That is because every item is constantly releasing a non-audible sound that is either harmonious or weakening to you. Physical health depends on being able to determine the items in your environment that weaken or strengthen you and making the necessary adjustments.

A disharmonious item, entity or person near you may only affect a small part of your body. However, if that small part is your thymus or pituitary gland, then you will degenerate in vitality. For that reason, it is most helpful to go over a body parts list checking the nerve, blood and air prana for each part. If a specific part is weak in one of the pranas, you will need to find the reason by dowsing with the charts of causes.

### **Fingers and Meridians**

An interesting way to check your acupuncture meridians is to examine the relative pranas and harmony of each of the fingers on both hands. Since each finger connects to a primary meridian, one can usually pick up the presence of an entity, drain or other imbalance along the meridians.

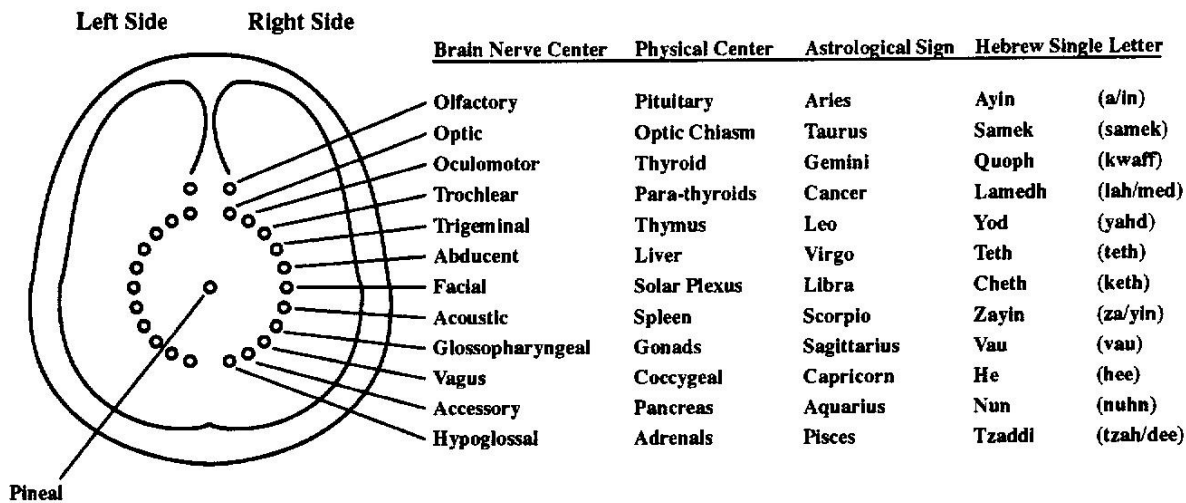

The cranial nerves have correlations with specific body organs and with esoteric physiology. A correlation chart showing the astrological sign, the body organ and the associated Hebrew letter is given on

the following page. It is revealing to the state of health to ask the specific prana readings on each of the cranial nerves and then to see the connected organ.

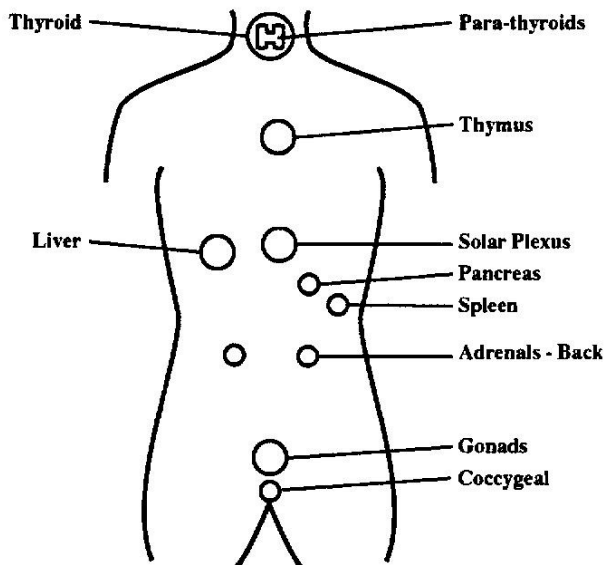

Another way to check one's physical harmony in relationship to the spiritual is to examine the balance of each of the primary seven chakras, See the following chart to locate congestion, over-stimulation or trauma.

Having multiple ways to assess the presence of disharmonious energies, one is able to gain in skill and intuition. Understanding disharmonies, one can avoid or transmute them on the appropriate plane of causation.

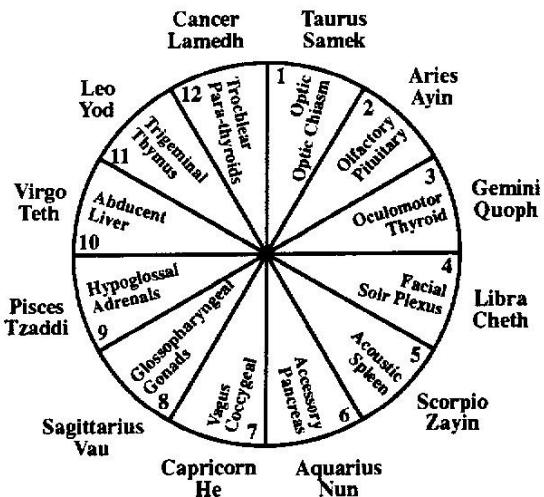

Transmutation, not denial, is the weapon of the master.

# The Dynamics of Personal Healing and Soul Progression

There are many people who think they want to achieve a certain goal, such as spiritual enlightenment or physical healing, when in fact they cannot face the healing or developmental crisis implicit in such changes. Or, more commonly, they choose not to face the discomfort inherent in dynamic personal growth.

Healing and enlightenment ideally go hand in hand, because true healing involves the learning of Cosmic Law. In the situation of babies or small children, this is not always the case, because they are too young to have formed strong mental and emotional habits that can be broken only by firm understanding of Cosmic Law. Spiritual healing often involves the removal of a past life or early life influence that casts a shadow on today's mental and physical body. If such an influence is removed from a baby, then the baby can usually heal, because his mental patterns are not set. If his parents persist in mental habits that reinforce the illness, they can restructure the illness in the ethers, and the baby will again take on the physical effect.

## **Desire, Belief and Expectancy**

This is why healing requires an aspect of desire, belief and expectancy. One must desire on a very deep level to be healed (and so not sabotage the healing). One must believe that healing is possible, and one must expect that healing has occurred. If in contrast, pictures of illness continually float over the mind, then the patterns of illness form again in the body. This is why Jesus said, "Your faith has made you whole." This is also why Jesus could not heal people near his childhood home. People he had grown up with had no belief or expectancy that they would be healed, and so they kept the mental pattern of illness to restructure the problem on the mental plane even when the spiritual cause had been removed.

The saying, "Your fears have come upon you" applies very strongly to healing. If you live in fear that your illness will not depart, you then attract the illness by the Law of Mentalism. If a mother calls out to her son, "Don't get drunk and wreck the car," she is likely to put it in her son's mind and cause the same trouble she wants to avoid. She put the drunken accident in the ethers, presenting a mental pattern for the physical to follow. If a father tells his young son, "Don't spill the milk", it is far more likely the child will nervously knock over his glass. For a person to think, "I'm afraid that I won't get well" is to create a mental mold of illness that the physical will follow. The Law of As Above, So Below is illustrated by the creation of illness due to a mental thoughtform.

## **Non-Resistance**

The Law of Non-Resistance is also a factor in healing. It is a common fact that most men are attracted to women that they have little chance of conquering sexually, and the same holds true for women. If a suitor calls every day and cannot keep his hands off a girlfriend, she quickly loses interest in him and will feel repulsed. By clinging to her, he is repulsed. The same is true for health. A person who desperately fears illness and clings to physical health will lose the very thing he desires the most.

The Law of Manifestation has several bearings on healing. What one clings to in the material form will tend to go toward the etheric, vaporous or spirit form (depart). What one clings to in the mental and spiritual forms tends to manifest in the physical form. So in the person who desires spiritual and mental healing above all else, physical healing is more likely to occur (unless another Law comes into play). If a person daydreams

about something, it is likely to happen. This is why casual thoughts should be monitored carefully especially when they involve other people. In the case of healing, one could daydream about being happy, energetic and doing his soul's work without impediment. In such daydreams, one should be casual and unattached, rather than desperate and demanding.

### **Healing and Service**

The reason one wants to be healed should be closely evaluated. A healer should determine carefully whether the person desires to be of service to his fellow man or merely to be strong to live a selfish life. Every Sun on the Planet has a responsibility to do service without thought of payment. There are many people who assume they already know what their life task is and expect to be amply rewarded on the material plane. Although there is no reason a person should not have financial comfort, it is the ultimate in materialism to expect to get rich from Holy work. One should do Holy work and assume his material needs will be met. "Seek ye first the kingdom of heaven, and then all else shall be added unto you."

To a person who wants to be healed, the following questions should be posed, "In what way will you use the benefits of this healing to be of service to the Planet?" Healing another person is an energy expenditure that should not be wasted. A desire for Holiness and a desire for service must be already present in the recipient of healing, or the clearing will be of little value. If a person promises to help his fellow merely to bargain for a healing, then there is no purity of purpose. If a person has no desire for Holy service without thought of payment (including acknowledgement or gratitude), he may not be worth the energy loss.

A desire for holiness is the primary trait of a person who is worthy to be healed or taught.

### **Mother Theresa**

There are many people who argue, "Oh, if I were physically strong, then I would have the energy to do something to help the Planet or my fellow man or to study spiritual matters." One has only to look at Mother Theresa to see an example of a critically-ill woman living a life of service and Holiness. If a person does no service or Holy study when he is ill, it is unlikely he has a desire for Holy service or study.

Once an actress came to me and said, "If you make me healthy, I will use my talents in films to the glory of God." I admonished her to consider carefully whether her service was indeed to be in the form of acting. She protested, "I have studied theater and have spent ten years building my connections and skills for this very end: to be an actress." She was so attached to being an actress that she could not imagine another form of service. In fact, she wanted glamour and recognition, and her soul allowed her to be sick to teach her humility. I suggested she find a form of service such as volunteering in the local state hospital for crippled children. She could bathe the children, feed them and love them. Insulted, she left my office. By clinging to glamour, it evaded her through her illness. If she had gone toward humility in unpaid service, she would have recovered enough to do her films as well.

She saw herself as highly sensitive and spiritual, as an artist. Once, I tried to point out to her that spirituality and sensitivity are not synonymous.

To be spiritual means that one embraces the virtues of the Tree of Life in equal strengths. To be spiritual is to be impersonally loving, wise, intelligent, just, harmonious, strong, severe, graceful and beautiful. To be spiritual means that one does not overbalance one trait with another.

## **Sensitive Person is Intuitive**

To be sensitive is to be intuitive and feel the energies around oneself. If a sensitive person is also virtuous, he will advance rapidly toward enlightenment. A sensitive person can be helped by a teacher only if his desire to learn outweighs his desire for comfort. The pitfall of a sensitive person is that often he retreats into pain relief and avoidance of issues rather than marching forward into the pain to learn and progress. There are times when pain must be tempered by physical or mental means to allow rest and recovery. However, one must be willing to face the pain of one's sensitivity on a daily basis, with only minimal respite needed for recovery. By losing attachment to physical and mental comfort, the pain has less of a hold on the student.

Just as the best warrior is the one who has already accepted his own death, the best student of truth is one who accepts the pain of increasing awareness with grace and indifference. This also holds true for the pain of seeing suffering in loved ones. To be overly worried about the physical or mental suffering of loved ones tends to slow their spiritual progression and cause the student a karmic debt.

## **Virtue Implies Movement**

Only by balancing sensitivity with virtue can one hope to endure the path to personal healing and enlightenment. One is not virtuous by default; virtue implies the active movement toward service and study of higher law. The Law of Change tells us that anyone who does not actively move toward progression will degenerate. The Law of Use states that we must practice the truths we learn or we will lose them and fall to evil.

When Jesus did a healing, He said, "Go and sin no more." The Rabbis were quite upset and demanded to know why He mentioned sin. Jesus said, "What difference does it make for me to say, 'take up your bed and walk', or to say 'go and sin no more'?" What He meant was that a person who has been healed has a responsibility not to put forth more negative causes of the same nature as those that generated the illness.

In many illnesses, hate is the primary cause. The hate can come from a past life, early childhood or current life situation. The hate can be toward God, higher self, a spouse or lover, or a parent. Anyone who hates cannot dowse or heal himself or another person. If a person chooses to hate anyone, he has chosen a destructive spiral of illness of body, mind and soul. Usually the person will deny he hates anyone, and in fact he may only hate God or another person part of the time.

## **Hate for God**

Improvement of spiritual and mental habits must be measured in frequency, intensity and duration. Often a person may hate God all the time for years. After a healing, he may slip into the hate habit once a week. If he learns to detect his old habit returning, he can quickly make adjustments to reduce the frequency, intensity and duration of the hate damage to his health. If he denies that he hates, he cannot be helped. If he chooses to hate, he cannot be helped.

This is why Don Juan would only take a student who has a strong "Tonal": spiritual advancement requires a strong sense of self-worth and resiliency despite being chastised by the teacher. The student must desire spiritual advancement beyond physical or mental comfort. Don Juan mercilessly ridiculed Carlos and put him through humiliating and terrifying trials in order to remove his low sense of petty self-importance and to shake up his sense of reality so that he could learn.

American students seldom tolerate any discomfort in their path to Holiness or healing. There is a tendency to feel like a victim with even a minor physical or mental discomfort. The ability to persevere in the

face of suffering is not a trait most people embrace. One of the beauties of physical illness is that it can teach the student to persevere and be noble despite the odds. A person who cannot be noble, virtuous and ceaselessly struggling toward Holy service when ill is unlikely to be of any use when well.

### **Relationship Pitfalls**

The patterns of relationships often cause the formation of illness for a secondary gain as well. Many a student has become ill because he has not done his homework and knows he will fail the test. Many a spouse has formed his identity as the caretaker of a fragile wife or child and feels a sense of loss if they recover.

Over-identification and solidification of the roles in a relationship hinder each partner's progress toward his soul's purpose. One must always keep in mind that the soul progression of one's loved ones is far more important than any manifestation of lower comfort or discomfort. By remembering that all things change, including relationships, one is able to allow spiritual progression for all persons. One must never let lower sympathy get in the way of impersonal love, which is the only love that is Holy enough to heal another person. Familial, sentimental emotions and over-protective attitudes tend to cause the ill person to view himself as a victim who is unable to heal.

Other people become ill to prove a point. If in early life they were betrayed by others, they may have made a statement that they cannot bear the sorrow of such betrayal. They decline in health in order to fulfill their own prophesy. In order to heal, such a person must shake up his own self-concept and reach a state of "don't know" about reality. He must wipe the slate clean and be ever vigilant for the thought patterns that created the illness. He must quit seeing himself as a betrayed person who is unable to bear life. He must pull his energy from the past back into the present.

Many people will muscle test or dowse as being a child, because they have a dreaming body frozen in a past horror. Since all dreaming bodies are needed for health, an associated organ system will be impaired, and illness will result. Only by an act of will and intent can a person quit moping about the past or fearing the future long enough to get well.

### **Serious Questions to Ask**

For the healer, the student, or the person desiring healing, there are grave questions to ponder. Does this person really want to get well? Are there secondary gains, such as avoidance of work or change or the procurement of sympathy from others? Do the people around the person want him to get well? Is this person likely to use his health for the betterment of mankind? Has he used his illness as a spiritual growth experience and still managed to do service for his fellow man? Does this person have a strong enough personality to withstand the knowledge that comes with true healing? Is it worth the energy loss of the healer to work on this person in light of the value to the planet? Does this person have the courage to face his own participation in his disease without hating the healer?

Only a Sun soul type has any potential to deal with the painful process of spiritual healing. In most cases, Animal man will not be able to use his health for the betterment of mankind. Nephilim should never be healed by a Sun, unless all the fallen Angel contamination on the Animal soul has been radionically removed through the World Broadcast System.

Anyone with a ripe doppelganger is a poor choice for intervention, unless all the layers are removed first. A person with a ripe doppelganger can be traitorous and defiling to a spiritual teacher or healer. One must always pray or dowse for guidance as to whom to heal within Cosmic Law and with proper energy conservation.

## Healers Will Be Hated

The brave person who decides to be a spiritual healer and therefore a teacher of Cosmic Law will be hated by many of the people who request his services. Whether one is hated or loved cannot be a consideration. One must do only what is best at the time within Cosmic Law for all concerned.

The Holy healer and teacher, like the warrior, dances with whatever comes his way. He does not moan aloud at the sight of death and suffering but keeps his eye eternally on the goal: making the Planet Holy.

He must have an attitude of sobriety in all things. Nothing must unsettle him; he must be calm in every storm. He must also be joyous even in pain and realize that the purpose of any healing is to align the lower aspects with the soul.

He is not given to guilt or excessive judgment about physical behavior or appearance. He does not look askance at someone smoking a cigarette or drinking a beer; he knows that the superficial aspects mean little. He looks to the soul with deep searching in order to see the person beneath the pain, the cultural trappings, or the ways the person may cope.

He may drink coffee all night to stay awake to care for a dying friend despite the scorn of his health-conscious friends. He is aware that many people worship their bodies over their souls and that obsessive concern over the diet may block the very healing desired. He sees people jogging and taking ginseng who have no time for facing their own lack of spiritual stamina. He sees people meditating for hours with pious expressions that have poison in their souls and who are too lazy to get up off the couch and read something Holy or do service.

He sees in all lower things, illusions, traps, and enticements pulling him away from his spiritual path, but he does not get embittered and paranoid. He learns to laugh at himself, to be silly and light, to do the unexpected, and above all to love and to learn.

# Electricity: Dangers and Applications

Many of the physical, mental and spiritual troubles of mankind can be traced to imbalances of an electromagnetic nature. There are times and situations where the very causes of disorder can be used to remove the resultant disorders. As the homeopathic maxim states, "Like cures like," one can use electromagnetic treatments with caution in order to remove electromagnetically-produced disorders.

The atmosphere of the Earth is pierced with microwaves, AM and FM signals, house electrical current and many other electronic pollutants that significantly weaken the population. The danger to humans rests in the fact that the body organ systems have electromagnetic cellular rhythms that are disturbed when they resonate with outside sources.

For instance, if you wear a battery-operated watch over a certain acupuncture meridian, all of the associated organs will switch to a cellular rhythm that matches the watch. Just as pendulum clocks in a room will all eventually swing in resonance, your body begins to resonate with any persistent frequency of electromagnetic pulsation to which it is exposed.

There is no hope of avoiding all electromagnetic pollution, although the amount of exposure should be limited as far as possible. There should be no electrical clocks, radios, TVs or other appliances near the bed where one sleeps. Florescent lighting should be replaced with incandescent, and all rheostats should be removed from lamps or fans.

Despite such measures, each human being is weakened by the daily assault of many types of energies entering his body. As a result by the end of the day, most body organs are not functioning properly on a cellular level. There is however, a way to get them back into their normal rhythm.

Physicians since earliest times were aware that different types of shocks could often return a person to health of body or mind. It was, at one time, common practice to hang a psychotic person on a rope and lower him into a pit of poisonous snakes. Often he would recover sanity after such a treatment. Later, psychiatrists found that giving large doses of insulin would produce a physical shock and seizures that relieved some mental illness symptoms. Current psychiatrists generally agree that electroshock treatments on severely depressed patients are beneficial, despite public backlash. Many patients unresponsive to chemical treatment will greatly improve when given electroconvulsive therapy. The standard procedure for cardiac arrest or a seriously irregular heartbeat is to give the person a strong electric shock with charged paddles placed on the patient's chest. In the absence of equipment, a strong fist thump on the patient's chest will often restore a normal cardiac rhythm.

Naturopathic physicians have long used the treatment of alternating hot and cold baths to shock the body into improved health. A sudden cold shower can often remove a dull depression, as well.

The reason all of the methods work is that illness is often due to a problem with cell frequency and rhythm. The other causes of illness are deficiency, toxicity, congestion and trauma. Those causes often produce a tendency for cell rhythm disturbances.

There are many devices on the market today that purport to keep one's body in balance with the earth frequency. Some of these are worn as pendants, watches or beeper-sized devices clipped to the belt. In the short term these devices are beneficial, but in the long term they are weakening.

Each organ of the body has its own rhythm. When you wear a device that emits a steady rhythm, initially the body will treat it as a shock, and the cells will repolarize and be healthy. After a while, the cells become as though hypnotized and start to resonate with the device. Since the body, just like the Earth, has different rhythms for different locations, a single frequency becomes illness-producing.

If you muscle test such devices, they will test as strengthening at first. Later they will test as weakening. This is also true of most amulets, gemstone combinations and many protective radionic broadcasts. Everything emits a frequency and should be alternated depending on the planetary conditions and other influences in the person's auric field.

Every item one wears, especially jewelry or amulets, must be reassessed on a daily basis. Programmed crystals and electromagnetic shielding devices can also produce illness in the long run.

The way to shock one's cells back into their normal rhythm is not harmful when done as I suggest. A very small amount of electricity is needed and can be obtained from a small battery. The only real cost is for a device that pulses the electricity in the range of 5-20 cycles per second.

Anyone who has one of the "earth frequency" devices can usually adapt it to use for this purpose. The exact frequency should be no less than 5 cycles per second and no more than 20 cycles per second but anywhere in between will work fine. The ideal waveform would be a triangle wave, but the other wave forms will work, with the spike wave form being second best.

Small felt or copper pads should be glued or soldered to the ends of the bare wires of positive and negative poles. After wetting the pads, place them on either side of your Adam's apple. The positive pole should be on the right side of your neck. Do not touch the poles together or the device will short out.

You should feel a light electrical current that is not too painful. Ten minutes is usually the maximum treatment time. A treatment of longer than 15 minutes would be detrimental. You may find yourself getting sleepy afterwards because of endorphin release.

Ideally, the treatment should be done at bedtime, because it tends to clear negative forces off the dreaming bodies so that they can work and learn in other dimensional spaces during the night. Many entities jump off but should still be dowsed to clear them from the Earth.

The primary benefit is that the acupuncture meridians tend to unblock and the systems of the body tend to start vibrating in their normal, healthy individual rhythms.

The treatment can be done morning and night for up to eight minutes each session without detriment. Within a few weeks, most of the body systems should have improved function, and the need for sleep should be reduced.

The explanation of this treatment is merely within the author and publisher's right to free speech and should not be taken as medical advice or in the place of medical attention for any health problem.

# The I Ching, Bar Codes and Fungus Mutation Illness

The bar codes that adorn almost every store-bought item constitute a major contributing factor to recent physical illness on the Planet. When the Earth had a major frequency shift in late October, 1991, humans' sensitivity to bar code radionics increased greatly.

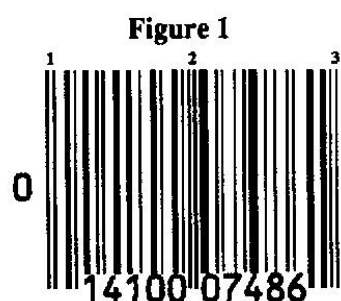

Anyone familiar with the I Ching will notice the similarity between bar codes and the I Ching hexagrams. Just as the hexagram patterns reflect tendencies on a probable future, bar codes can create a probable future of illness if a disharmonious pattern is worn on the human body or is near food.

The I Ching patterns could easily be used as radionic tools, particularly if placed inside an equilateral triangle and drawn carefully with black ink or pencil. The top of the triangle should face east, and the pattern should be adjusted accordingly. When one places a tracing of a beneficial I Ching pattern face up upon one's polaroid picture under a light, powerful changes can take place.

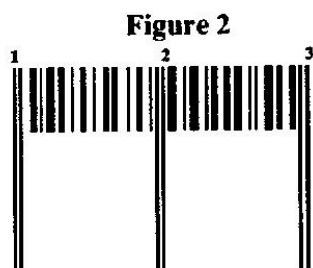

One must be cautious with such radionics and dowsing carefully the correct pattern and the time of treatment. If the pattern is worn around the neck on an 18 inch chain, facing the person on a pendant, the changes will occur even more rapidly.

Imagine then the power of wearing clothing tags with numbers, names and bar codes. Since October (1991), Suns have become far more sensitive to such energies. Almost every purchased food item and over the counter medicine or herb is packaged with a bar code on the side of the container. The food takes on that particular energy and transmits it to the consumer.

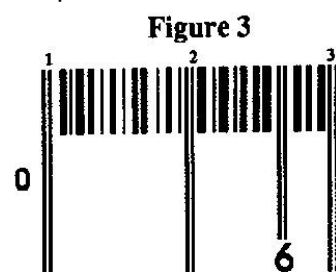

A peculiar and sinister aspect of the bar codes is the presence of the code for "666" in all of the recently acquired bar codes and most of the older bar codes. This may explain why foods marked with the codes are particularly weakening to Sun soul types but not especially weakening to Nephilim or Animal Man.

The only "marks" *always unidentified* by Numbers are shown isolated in Positions 1, 2 and 3.

All "Marks" (Bars) in this basic UPC Symbol are identified by Numbers at the bottom, except three sets of "two uniform Bars" which appear identical to "6".

A visual inspection of the three *always unidentified Bars* compared to the Bar UPC Identifies as "6" isolated.

Such a strange addition of 666 to all codes prices makes one recall Revelations 13: 16-18; *"And he causeth all, both great and small, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads, that no man can buy and sell, save he that had the mark of the beast, or the number of his name. Here is wisdom. Let him that hath understanding count the number of the beast; for it is the number of a man; and his number is 666."*

Eventually, all of the electronic funds transfer cards that are becoming so popular will also have the 666 included, which will further weaken Suns. It is also not too far-fetched to think that some populations may

be physically implanted with an identification code that includes 666. Veterinarians are now experimenting with implanting such computer chips in pets so that their history can be retrieved in the event they are lost or stolen.

The code 666 could be said to represent the evil of Ahriman and so becomes an energy that produces distress and illness in Suns. Rudolf Steiner warned that when the experiments of Ahriman involved freezing cold, mankind was in danger. Self-programming computers are now being created using organic material with superconductivity in sub-freezing temperatures.

World-wide computer systems are rapidly expanding. Although the computers are not as great a threat as the dark forces that are behind them, Suns had best be cautious. Carrying electronic transfer cards may produce a physical illness that has a fallen Angel nuance, similar to the food labeled with the 666 bar codes.

Many of the bar codes cause an especially weakening group of illnesses that could be lumped under the name Fungus Mutation Illness. If the bar codes, names and patterns have a left-hand pattern, the Fungus Illness can be deadly to a Sun. There are several interventions that need to be done at once for all Suns:

1. Remove all clothing tags and wear no clothing with names or numbers on the pattern.
2. Place all foods out of metal containers or any containers with bar codes into glass jugs or canning jars.
3. On the sides of each jug or jar, place two attracting doughnut shaped Radio Shack magnets. (They cost about a quarter each.)
4. Get a plastic chopping block and place attracting magnets under it or on the sides. Place a copy of Saint Michael's Sword Prayer face down on the top of the chopping block and cover with glass or Plexiglas. Place all foods on this before ingestion. (If the bar code had a fallen angel component, the prayer will neutralize it.)
5. Say Saint Michael's Sword nightly before retiring, to eliminate residual Fungus Mutation Illness in the body.
6. Placing family members' polaroid pictures or signatures on the plastic chopping clock under a light will help prevent illness and heal already developed sickness.

The Fungus Mutation Illness has a profound weakening effect on Suns' thymus glands. Upper respiratory symptoms and profound weakness are common. Many infections follow.

Often certain illnesses seem to have an acupuncture entry point that can be felt upon the body as very sore. For instance, a spot on the foot can become so painful that walking is difficult. The person may think that they stumbled, but they did not. Quite often a hate demon entity entered his body through that spot.

The way to neutralize it would be to dowse a numerical ratio using the charts in this book and write it in black ink within a perfect circle. Laminate the circle with wide clear tape and place it face down toward the skin in the location of the sore spot.

If someone has a vampire energy drain in that location, or if an entity is hooked in at that spot, it will release. Since that spot has an astral injury, it may be beneficial to wear the design for several days to allow healing to occur.

Sometimes the addition of a dowsed type of metal, such as silver or copper, will speed the healing. Gemstones can be used as well.

For some people, the wearing of flexible magnetic sheets inside the shoes may provide some protection against the common dark force entry through the soles.

These physical measures do not take the place of the rigorous dowsing of clearing ratios to clear illness and possessions. Rather, they are supplemental and preventive. By using such measures, one's physical vitality can be saved for more important work than mere resistance to disease.

# Plant Daemons and Spiritual Blocks

In the plant kingdom there exist many nature spirits that are not intended to interface with humanity except in a very precise manner specific to each plant. When the interaction between plant and human becomes disorderly, illnesses occur in mankind.

The experiments at Findhorn brought to the attention of the world the need for cooperation between humanity and the nature spirits. Out of the resulting literature and the social influences during the 1960's emerged a metaphysical push toward active communication with such spirits. The romanticism of the American Indian lifestyle combined with the desire for altered mental states to influence a great many people toward experimentation with psychotropic plants.

There are several occult reasons for caution when dealing with psychotropic plants other than the obvious, often-repeated warnings against drug use.

The American Indian, including the Alaskan and South American Indians, react differently to plants because their cultures did not originate on the earth.

## Hopis

The Hopis and the Mayans have recorded histories of worlds that have been destroyed. The Hopis say that this is the fourth world. In fact, the Hopis moved onto the Earth from a parallel universe to escape a cataclysm. They were still in possession of the ancient knowledge of how to move one's first attention onto a dreaming body, therefore teleporting oneself to another world. This is the Hopi's fourth move. Many of the specifics of that move have been lost through the ages, until most of the elders now believe the actual physical Earth rather than a parallel world was destroyed by cataclysm.

The body types of the Hopis and other Indians reflect influences of other dimensional spaces. Their chakra systems and acupuncture meridian systems are different, and their glandular systems react differently to plants and other substances than those of a European. This is one reason diabetes, alcoholism, suicide and artistic temperaments are common among Native Americans. When they mix with Anglos, they become physically and spiritually disordered and alienated.

The dreaming bodies and spiritual constitutions of Native Americans make them naturals for merging consciousness with other life forms. They can easily merge a dreaming body into a deer and learn from that deer. Their ability to do it reflects a very high level of spiritual development. For Native Americans, such merging is good and natural. For Anglo-Saxons, it is not so simple.

## Tailbone

Indians have a fluid constitution that merges like the wind into the plant or animal they are studying. In contrast, Anglo-Saxon types have a more crystalized chakra system that controls such mergings. In Anglos, there is a chakra that could be said to exist below the tailbone where a tail would hang, curved inward between the legs. This extended tailbone section has doorways to the World Radionic Map's first and second dimensions. Adjacent to this, near the testicles or labia, is a doorway to the third dimension, as marked on the World Map.

In order for Anglos to merge consciousness with an animal, they must focus their attention on those tailbone extension dimensional doorways that are primordial in nature. In doing so, they lose their attunement with higher self. This is not the case with Native Americans. Anglos run the risk of becoming violent rapists or crazy when they try to do Indian spiritual rituals.

This is not to say that Indians are more or less evolved than Anglo-Saxons; they are simply from different worlds. This difference between world roots also reflects in their relationships with plant daemons.

## Archetype

Every plant has an archetypal spiritual essence that could be called a daemon. Each plant within a species is a microcosm of the larger daemonic energy. These energies in themselves are not evil. They have a beneficial purpose in the spiritual eco-structure of the Planet Earth.

The mixing of harmonious energies in a disharmonious fashion produces an evil result. This is also true in the interaction of plant daemons with human beings. Whenever a plant substance is ingested by a human in a disharmonious fashion, the plant daemon may injure the human.

In alchemy for instance, the process of plant fermentation is mentioned. The ancient Egyptians knew that “fermentation fixes the neter”, which means that the plant daemon becomes crystallized and disarmed when a plant is fermented and alcohol is produced as a byproduct. This is why homeopathic tablets are lightly sprayed with alcohol to hold the energy pattern in a crystallized fashion within the tablets. Otherwise the pattern fades. This is also why Bach Flower remedies are placed in brandy so that the flowers’ spiritual pattern is held without fading from the solution.

## Fermentation

The ancient alchemists knew mankind could interface with the plant and animal kingdoms more safely if the “neter was crystallized” by fermentation. Thus, yogurt, wine and other fermented products seem not to produce a direct problem with spiritual contamination by plant daemons.

Smoking a plant, however, produces an immediate interface with the respective plant deva. A subtle possession, specific to the plant being smoked, takes effect.

Don Juan told Carlos Castaneda that the “mescalito” daemon liked him. What he meant was that the peyote plant daemon had a particular affinity for certain physical or mental traits present in Carlos. This is found in other smoked plants as well.

The opium daemon tends to “like” a person who is primarily egocentric, selfish and greedy. The second dimension of a person who smokes opium becomes contaminated with the daemon’s microcosm and can then contaminate the dreaming bodies of nearby people through merging. Contaminated children would be more likely to turn to heroin as a result of exposure to such a daemon.

Cocaine daemons are particularly attracted to water nature imbalances in the smoker or snorter’s personality. Eating any drug tends to lower the daemonic risk, because of the fermentation that occurs in the colon. Rudolf Steiner mentioned in his Anthroposophical medical talks how man’s astral body “spiritualizes” foods as it aids digestion. When there is proper bacterial flora in the colon, ingested foods or drugs do little harm, but after a course of antibiotics the danger of plant daemon possession becomes greater since the intestinal flora have been destroyed.

## Marijuana

Children in families with marijuana daemons tend to have more infections requiring antibiotics; hence they tend to have more plant daemons as a result. Marijuana leaves soaked in alcohol have many beneficial medicinal uses and are of no daemon possession risk. Smoked marijuana, however, brings with it a microcosm of its daemon. That daemon “likes” a person who hates authority and tends to produce that trait in people possessed by the plant daemon. The offspring of the marijuana-smoking youth of the 60’s and 70’s show profound evidence of this hatred for authority. Violent crime has increased 300% in the last thirty years, partly due to the marijuana daemon and the other psychotropic drug daemons. Poor motor coordination and dyslexia are another result of possession by a marijuana daemon.

Some people can smoke marijuana for years and never get a daemon; if they do not have the “groove” the daemon is able to hook into. That particular groove tends to be a hatred of authority which later becomes a hatred of God. Since the universe is a hierarchical system, all hatred for authority later becomes a hatred for the Divine. Such a person wants no Holy guidance and spits on the Masters who lay the jewels of truth on his path.

### **Tobacco**

Tobacco daemons tend to hook into a person with a physical and mental difficulty quieting the mind. Agitation is attractive to the tobacco daemon, and agitation is also produced by tobacco daemon possession. Tobacco that is smoked cannot be transmuted by fermentation into a harmless substance for the average Anglo-Saxon. The mental body can be progressively affected, if the daemon finds the agitation “groove” to dig into and settle for life. The ability to reason, to feel peace and to perceive truth will deteriorate over time in the presence of a tobacco daemon.

As for all such daemons, the tobacco daemon must be removed in layers with several ratios using the world Radionic System. Since the individual daemons are mutants, such radionics does not “kill” nature spirits but merely neutralizes aberrant mutant offspring from harming humans. This kind of daemon will not commonly be found when one dowses to check for daily dark force ratios, because it is referred to in the subconscious as a mutant spirit possession. For that reason, the dowser must check for this type of possession and realize that layers may come off for several days when radionic removal is performed.

In general, there is danger of such possession when any plant product is placed anywhere but in the stomach. Any injected, smoked or suppository-inserted psychotropic plant can cause daemon possession. When the colon is not fermenting properly, then many foods will not be digested and will produce a state of chronic allergy.

### **Environmental Illness**

The current epidemic of environmental illness, candidiasis, asthma and chronic viral syndrome is largely due to multiple plant daemon possessions. Nuclear-contaminated, microwaved and chemically-altered foods cause mutations of the plant daemons. It is as though they “go mad” and in a berserk fashion attack the physically-unfit person who ingests them orally or otherwise.

Irradiation destroys not only the physical composition of the substances but also alters the spiritual blueprint, creating monsters that will attack humanity in multiple ways. The daemons of cocaine, opium and marijuana may seem like small fries compared to the Loch Ness monsters growing out of the food industry.

Unless mankind listens to these warnings, the ugly head of such daemon mutants may rock his boat and drown him in a sea of social horrors. Eating a fast food hamburger may produce a mutant deva that torments a child in his sleep and changes his personality into one of evil.

Everything a man thinks, says, does and eats impacts his spiritual bodies in creative and often horrible ways. Unless humanity begins to take responsibility for his creative potential, he will destroy himself and all the devas with him.

# Relationships and the Soul's Call

Any Sun who chooses to assist in the rescue of the Earth from the current crisis has chosen a difficult path. In choosing a path of knowledge and service, he sets himself apart from his fellow man.

The mystery teachings given in this book and in ***Gnostic Book of Earth Changes*** can greatly facilitate the flowering of the spiritual sensory organs so the student is forever changed. If he looks at the changes through the world's eyes, they may seem undesirable. The material world idea of good is often the reverse of the spiritual.

For instance, the student begins to notice great sensitivity to all stimuli. Loud television, hard rock music or the casual babble of mindless friends may be almost unbearable. As he learns to clear dark forces in his house, he finds it uncomfortable to have house guests who invariably bring a new group of dark forces. As he becomes more aware of the power of thought, speech and emotion, he engages less in light conversation, much to the dismay of family and friends.

Daily dowsing over charts and dimensional symbols teaches the student to stop internal dialogue far more quickly than meditation. In fact, he finds an hour of dowsing clearing ratios more relaxing and balancing than an hour of meditation. As time goes on he wants to dowse more, because the feeling of clarity he achieves is both unsurpassed and cumulative. This desire to dowse offends most family members and friends. They find him odd, crazy or rude.

He sees now that dowsing clearing ratios is a Gait of Power far more dynamic than Carlos Castaneda experienced. During times of stress he finds tremendous relief from dowsing. He becomes able to merge consciousness spiritually with other creatures and becomes clairvoyant in peculiar ways.

He develops an eye for the subtle qualities of color. Shades of color take on meaning to him. He notices certain patterns and colors seem to have sounds or songs. When he looks at a pleasing painting, he feels himself rejoice with an inner song.

When he listens to classical music, he may see trees and clouds with an inner eye, taste joy and feel the sound of falling rain. His senses blur in his inner world. He can taste hate; he can smell evil; he can touch love. When he walks into a room of negative people, he may become nauseated with thoughtforms and have to force himself to wade through entities. His whole body, mind and emotions seem to alert him to the presence of disharmony. When he is near a harmonious person, joy floods him with light and song.

He learns a valuable lesson about patterns of harmony. Early in his training, he assumed anyone who appeared harmonious to his subtle senses was on the right hand path. He finds there are people who study the science of forms who may present a superficially harmonious front. Many actors, poets, artists and designers are born with ray influences that cause them to relish the presence of harmonious forms in the material world. But despite the smooth, cool, white outer shell, their core may be rotten, full of the stench of Ahriman. Such people often shield themselves automatically from being "read"; they have learned to project a superficially loving thoughtform to hide their poison. He finds that even art and beauty can be clever tools in the hands of dark forces. He now knows the superficial harmony that hides lies and materialism is nothing but sorcery. He begins to look at the soul of an artist before the shell. To his friends he has become too judgmental. He knows that discernment and judgment are two different things.

He may suddenly feel a wave of anger or low self-esteem while sitting alone in his study. Simultaneously he notices that his left hand looks slightly blue. "Aha!" he says. "This means my dual soul is unhappy, since I know my dual soul problems often reflect as tingling or discoloration on my left hand." Cheerfully he dowses clearing ratios for his dual soul and the problem dissolves. Having learned that many

people are connected to him and reflect on different parts of his body, he no longer falls into depression or rages, because he knows what to do at the onset of the symptoms.

His family may get uncomfortable around him and suspect he is reading their minds. He gradually loses his desire for material excess and finds he is happiest when alone or with another spiritual seeker who also knows how to clear himself. He finds few other people tolerable to be around since their auras are full of agitated entities and thoughtforms.

He spends many hours in service clearing other people. He discovers that the very people who ask for help are the first to ridicule him. They return for help but despite their anger, he must refuse them. He tries to tell them the need to take responsibility for themselves, but they would prefer to pay somebody else to do their work. He cannot be bought. They become even more angry.

If he is fortunate, he has a friend who also wants to be a Holy Warrior. If he doesn't, he works alone into the dead of the night.

Loneliness will not stop him nor will the pain of seeing the world in all its sorrows. He has heard the call of the soul and he has answered. There is serenity deep within him. He recalls the words of Jesus;

*"The Holy Ghost whom the Father will send in my name,  
He will teach you all things, and bring all things to your mind,  
Whatsoever I shall have said to you.  
Peace I leave with you, my peace I give unto you;  
Not as the world giveth, do I give unto you.  
Let not your heart be troubled,  
Nor let it be afraid."*

# Sex, Society and Survival

One of the primary lessons that the spiritual student must incorporate in his or her life is that every personal action impacts the Earth.

Interestingly, metaphysical students readily accept such responsibility as it pertains to meditation and positive thoughts regarding the future of the Planet but react with anger if the same principle is applied regarding the impact of one's personal sex life. If a thought or action can help to harmonize the Planet, then it is logical that many thoughts and actions can also bring discord to the Planet. By the careful study of Cosmic Laws one can readily discern when an action or thought is bringing disharmony or harmony to the Planet.

The Laws of Frequency, Mentalism, Planes of Correspondence, Polarity, Rhythm, Cause and Effect and Gender are immutable while in physical form. Many a person has broken himself against those Laws but never have the Laws been broken. However, the understanding and interpretation of those Laws are revealed only to the true seeker and never to the dilettante. The highest desires of the seeker must be to know truth and to serve humanity. Otherwise he will be led to interpretations based purely upon his own fears and biases. The petty lower self must relinquish control in favor of higher study to learn how those Laws impact man in his personal life and society in general.

## Biases

Biases do not operate in just one direction. Years ago, many blacks were treated cruelly in a racist fashion and denied proper employment despite being qualified. Now, it is just as common for qualified whites to be denied employment so that governmental quotas for minorities can be filled. Reverse discrimination is now common for whites, for men and for other groups that once seemed to have an advantage. The result is a confusing series of lawsuits and increasing societal hostilities between groups.

Whenever the government exerts control over people to enforce fair and orderly behavior, abuses of such controls will occur and cruelty will continue. The subject of the abuse will change but the abuse will not abate until the spiritual component of mankind changes.

The same laws that protect one truly mistreated group will often be used to protect another group of people who do not deserve protection. One discerns which group should be protected and which one should not be protected merely by determining the relative congruency of the group with Cosmic Laws. If society supports cosmic lawlessness, then society will be destroyed by its own actions.

Society can be saved from destruction only by the understanding and application of Divine Laws. These same Laws have been repeated in different forms in every fundamental thought system throughout time.

## Macrocosm and Microcosm

The primary idea of the macrocosm and the microcosm is fundamental to the serious student. If one views his single thought as impacting the whole Earth, he will be cautious as to the thoughts he entertains. If a person realizes that his body is a microcosm of the Earth and that the dimensional doorways on his chakras are reflected on the macrocosm of the Earth, he takes his health and actions seriously. In the numerical and interdimensional dowsing of the World Radionic System, he can readily see that any disorder or entity on himself can just as quickly be removed from the Planet instead of being simply removed from himself via a picture witness. He finds that a disharmony of a certain pattern that exhibits as a pain in his forehead can be removed in seconds when the radionic ratio is placed on a picture of the earth. *(2014 Publisher's Note: Updated Radionic Ratio Dowsing method can be found in "1995 September Lectures" by Anonymous).*

When this idea is carefully studied, one quickly sees that any hateful thought becomes a scourge over the whole Earth. Great responsibility rests upon the student who has advanced to such a point that he becomes aware of his opportunity to influence the harmony of the Planet.

### **Create Reality**

Going a bit further, we see that “creating one’s own reality” can actually poison the Planet. If creating your own reality means molesting young children in your mind, then the world becomes peopled with perverted elemental forms that wander uninvited into strangers’ heads. Many a person has lived with hellish thoughts that were not of his own creation but conjured up by a former tenant or coworker. After a while, such people assume that the thoughts are their own. If the thoughts are of murderous revenge, the innocent person may become insane and/or violent. There are no idle thoughts.

In esoteric study, one becomes aware that thoughts and actions are virtually the same thing. A thought has a substance that changes the world, just as a drop of poison or a drop of Holy water will change a glass of water.

Just as there are no personal thoughts that do not impact the relative harmony of the Earth, there are no personal actions that do not influence the Earth. If a person lives in the country and starts accumulating junk cars from terrible automobile fatalities, the whole earth becomes poisoned by the sorrow and horror imprinted in the metal. These cars should be burned and prayers done to release the horrible energies from the Planet.

If a person watches slasher films and reads books about murders, he also poisons the Earth with the recycling of negation and destructive thought forms. Every time someone watches a slasher film or reads a violent book, the act is repeated in the ethers and so accumulates more power. This same principle can be applied to the reinforcement of prayers, such as Saint Michael’s Sword, for the benefit of the Planet.

### **Abnormal Food Use**

It comes as a great surprise to people that the reading of pornography is exceedingly destructive to the harmony of the Planet. If it became popular to have magazines about different food obsessions and the abnormal use of food such as sticking carrot sticks up one’s nose, then people might think such reading material strange. If you saw a book that suggested the pleasures of wearing zucchini in your armpit or calf liver in your navel, you might think the author nuts. That is because you assume that food must go into the mouth for proper nutrition to take place. Salivation begins to break down the components into digestible matter and so on. That is a part of natural law. If you place a raw carrot into your anus, it will not digest, for that is the wrong orifice for proper digestion.

Why is it that people react with anger at the suggestion that the sexual acts are just as basic as eating to mankind and the Earth? If a person is a microcosm of the Earth, then the sexual experience must reverberate upon the whole Planet and should be congruent with the health of the individual and of the Earth.

The body of humans is magnetic, similar to the great magnet of the Planet. There are locations on the physical body and on the Earth that have South Pole energies and others that have North Pole energies. There is also a strong impact of north, south, east and west energies on the body and on the Planet that has nothing to do with the direction a person is facing physically.

On a person, the nose always possesses a north energy and the back of the head a south energy. The right ear has an east energy and the left ear a west energy. The esoteric aspects of north-south-east-west were discussed in the ***Gnostic Book of Earth Changes***. Another interesting aspect is that under normal conditions a male and a female have complementary components of the North Pole and South Pole locations on the body. If a man and a woman face each other they become like attracting magnets, while two people of the same sex become like repelling magnets.

## **Sleep**

It is most strengthening for male-female couples to sleep face to face rather than with one person's back to the other, because of the magnetic weakening effect of "spooning". Also, if there is an energy drain from one person to the other, it will manifest when the spine of the weakened person faces the perpetrator.

Most people sleep better with their heads facing north because the head is primarily the body's north pole. A person who lives and sleeps congruently with natural law is able to strengthen the Earth.

Just as the body cannot digest food properly when vegetables are placed into the rectum, it cannot digest sexual prana properly if it is directed into the wrong orifice. Sexual energies become pathological to the Planet if they are released into the anus, the mouth or to a same-sex partner. Occasionally, when overly strong, they can be released into the ethers by masturbation without harming the planet.

Sexual prana is very important to the Planet because it contains tremendous creative potential that can be used in many realms. It can be used however, only if it is not distorted by a conflict with the Law of Gender or Polarity. Just as two male dogs penned together can never procreate, despite their climbing on each other, neither can the inherently spiritually creative powers be of use to the Earth if they are neutralized by same-sex physical expression in humans.

## **Creative Potential**

Just as two South Pole magnetic forces will weaken each other, the same sex couple depletes the store of creative and physical potential within each other. In Oriental medicine, it is known that anything totally yin becomes yang and anything totally yang becomes yin. Whenever two yang forces unite, they unbalance themselves in regard to the Law of Gender and so become totally yin, which is the death state.

It is also known in Oriental medicine, that the strongest individual health state is either a large yang-small yin combination or a large yin-small yang combination. If someone is in the balance of half yin-half yang, illness manifests. That is because of the Cosmic Law that states anything in physical manifestation must be primarily male or female and of a magnetic polarity of positive or negative.

The Law of As Above, So Below is far reaching. If a person thwarts the natural use of sexual prana in the physical realm, there will be higher repercussions as well. Man cannot break part of the Law without breaking all of the Law.

The sexual union of man and woman was intended primarily to create new physical forms (children) and secondarily as a spiritual expression of the dual soul matrix uniting into the whole soul in harmony with the Logos. Every Sun human is one half of a soul and his other half is the opposite sex. This dual soul matrix soul concept was created so that Suns would fulfill the Law of Gender in physical and spiritual form.

## **Sufi Love Poetry**

The romantic and eloquent love poetry of the Sufis was illustrative of this mix of the spiritual and physical components of male-female love. It was never intended that mankind would embrace the concept that he was already whole without his dual soul. The longing for romantic love is part of mankind's longing for unity with his dual soul, so that he can ascend to the heavenly worlds. For only by the purification of both aspects of the soul, can man reach a state of harmony that allows him to approach Perfect Harmony. If mankind chooses lower disharmony, he chooses Higher Disharmony (hell).

Harmony means congruence with Cosmic Laws. One cannot choose which Cosmic Laws are appealing and disregard the rest, if one desires to become a Master.

The spiritual and harmonious creative energies of the Earth are dependent on the physical creative energies (whether harmonious or disharmonious) of mankind. Mankind is indeed a co-creator with God. If he chooses to create beauty and harmony in his sexual relationships, if he is honest and holy in all that he touches, then he creates positive higher energies. He cannot simply assume his behavior is congruent. For instance, sticking one's fist up another person's rectum is a common male homosexual practice. Such males can assume that they are having a loving relationship but the Earth feels the trauma of each act and shudders.

I am well aware that such teaching will be labeled "homophobic". If I advised you not to torture animals, you would not call it "torture phobic". If I told you that serial killers were disharmonious, you could call me "serial-killer phobic". The point is that society has been brainwashed into thinking that any behavior is just a lifestyle choice with no regard to Cosmic Law.

### **Culture Changing**

Because of the political and social lobbying by homosexual groups, the whole culture is changing. Traditional family structures have almost completely disintegrated; the welfare system is out of control. The courts have ruled that lesbians and gays can adopt, teach their lifestyles as normal to young children and sponsor fatherless children in Big Brother/Big Sister organizations. The Man-Boy Love Club, an international organization of homosexuals, is currently lobbying to allow adult males to introduce male children to homosexual sex without any legal penalty. Children are being sold as pornographic slaves and are being sacrificed in "snuff" films that sell in the underground homosexual pornography network.

The use of bondage, torture and other perversities is becoming ever more commonplace in the homosexual communities. The attitude of "anything goes" has included bestiality and other horrors. As long as Suns fail to see that the breakdown of society is in direct relation to the breakdown of the sexual mores, there is little hope for the Planet.

Where there are no balanced male-female families, there can be no balanced children. Where there are no balanced children, there will be violence and a hatred for authority. Wherever there is violence and hatred for authority, there is also a hatred for God. God means order. The spiritual order of the Logos implies a hierarchy of beings. If mankind hates even his earthly teachers, how can he love his spiritual teachers?

### **Man and Woman**

In a society racked with sexually-obsessive behavior, there is no gentle love between man and woman. The closest relationship of humanity with God is the relationship between a Holy man and a Holy woman. Such a relationship is sacred, and the physical expression of that relationship rings out in joy though the cosmos as Holy. It is a microcosm of the creative potential of the Father Logos and Mother Earth.

Such a relationship brings the Earth closer to the harmony of the Heaven World. As the Earth's frequency rises, such relationships are needed greatly because we will undoubtedly arrive in Heaven or hell before long. The choice is humanity's. By living in harmony with Cosmic Laws and natural laws, mankind can follow that harmony stair-like into Heaven. If, on the other hand, mankind chooses disharmony, then only hell awaits.

In fact, the hordes of father-less children attacking tourists in the major cities gives us a glimpse of the hell that awaits a society that ignores the Law. The idea of rules in one's life is a joke to many young people today.

Indeed, there are **rules** in the heavens and those people who do not like the rules choose to live in hell. The Earth is becoming such a hell...

# Pitfalls and Initiations

When a person makes a decision to embark on the path to spiritual knowledge and mastership, he must have courage. The student of spiritual science is tested and pummeled by all the darkness within and without himself to allow purification to occur.

There is a common saying, “When the student is ready, the teacher will appear.” In fact, teachers of various levels are often abundant but unrecognized until a student of truth decides to follow. The basic requirement of spiritual education is the recognition of the teacher by the student in a situation where higher learning is possible. In many cases, the teacher may actually appear to be an opponent.

There are primarily two kinds of teachers: enlightened teachers who are aware of their role and ignorant ones whose faults help students progress.

Whenever the student feels great anger, irritation or humiliation toward another individual, there is a strong likelihood it is a teacher-student relationship. One of the primary purposes of a teacher is to bring the student’s flaws to the surface so the student can examine them.

## Anger

For instance, the teacher may try to infuriate a quick-to-anger student. By letting the student perceive the full pain of his disharmony, the teacher is lancing a spiritual boil. Every subject that infuriates a person is linked to a major character flaw.

If a person becomes angry because he believes someone has insulted his appearance, then he is too attached to the body. If he did not think of himself as a body, he would not get upset if someone thought he was older or fatter. Lower self-importance regarding the physical appearance is a major pitfall to spiritual advancement. Linked to such a flaw is the need to be seen as a highly sexually-desirable person. From such flaws come jealousy, vanity and energy wasted on keeping up appearances. The spiritual student must develop a sense of humor regarding his physical limitations and appearances.

This is not to imply that one should neglect health or grooming. To facilitate other peoples’ learning, one needs to appear fairly attractive and normal so as not to repulse one’s fellow man. To make a great show of how Holy one is by wearing rags is a vanity in itself.

## Character

If a person feels insulted because he believes someone has misjudged his character or the character of a loved one, then he needs to examine the situation carefully. If someone went up to a devout nun and muttered, “Whore!” at her repeatedly, the nun would not tend to lose her composure. She would know she was not a whore and that even her thoughts were free from carnal excess, so there would be nothing to defend. She would look with love on the poor misguided individual and wonder how she could help him out of his delusion. She would know that anger is merely the response of a perceived threat to one’s identity and that she could not be threatened.

If, however, she was a secret reader of pornographic novels, she would react in anger. To her conscious mind, the man had defamed her character, because she was not physically a whore. To her subconscious mind, though, she was a whore by her choice of reading material. To protect her conscious belief that she was not a whore from the subconscious knowledge that she was a mental whore, she would react in rage and righteous indignation. Anger successfully prevents truth from reaching the conscious mind. That is its purpose.

## **Money**

If a person feels angry and insulted because someone has tried to cheat him in a money situation, then his subconscious mind feels like a thief and a con artist. If a pure person is cheated or insulted by a materialistic person, he feels little attachment. He feels sadness for the soul of the thief but no rage or desire for revenge. He knows he may have to cut off any business or personal relationship to avoid being a fool, but he has no real anger. Only if a part of himself contains the same flaw does he feel anger.

If a person feels anger because someone has insulted his job performance or his chosen profession, then he needs to examine the reasons he is in that profession. Nothing Holy can be defiled; Holiness stands unscathed despite any insult. If the student knows his work is good, he is unmoved by criticism. If his work expression is congruent with his subconscious understanding of his higher self, then he feels confident and inner-directed. An inner-directed person does not need outer reassurance of his value and is untroubled by rejection. An outer-directed person craves compliments and feels anger at any criticism. His sense of self-value is dependent on other peoples' comments.

The student must look at all potentially humiliating situations as opportunities to reassess his values and explore inner weaknesses.

## **Three Fundamental Flaws**

As the student evolves, he begins to notice that deeper flaws begin to come to the surface through the mechanism of painful situations. The three fundamental flaws are glamour, love of money or things, and inability to control the sexual urge.

In most of the great men of all time, one of those flaws surfaced in a major way. John F. Kennedy, Martin Luther King Jr. and other great men were unable to achieve sexual self-control and so their great works appear tainted in history. The more potential for good a student possesses, the more temptation he will face.

The prosperity philosophy of Dale Carnegie, José Silva and others has been the down fall of many preachers and spiritual leaders who have become enmeshed in Ahriman. Instead of using money simply as a vehicle for a balanced life, many prosperity philosophy advocates begin to sell their souls in subtle ways.

For instance, they may do work that is somehow reinforcing dark force attitudes or values. Their conscious minds think the work is spiritually neutral and that they will make enough money to free themselves to do spiritual study. They may even believe they are helping the cause of justice by their work, although it is increasing darkness on the Planet.

## **Free Speech**

For instance, a lawyer may defend a child pornographer, consciously because he believes in free speech. However, the child who was abused is wounded each time someone views his tragic picture. The lawyer may wax eloquent about Big Brother government abusing the First Amendment, but his choices of clients reflect his own personal weaknesses. If a teacher were to point out that he was reinforcing the violation of innocent children by defending such a slime-ball, the lawyer would react with rage, because a part of him knows it is true.

A film producer may produce beautifully-crafted erotic movies that suggest obsessive sexual attitudes or encourage deception between loving couples. There may be a message of "living life with gusto" that is materialistic and bereft of Holiness. If someone implies that he is producing films that are filthy and superficial despite their gloss, he will become enraged, because on one level he knows the criticism is valid.

Whenever the higher self clashes with the lower self, the conscious mind uses anger to block awareness.

## **Repressed Fury**

There is another situation in which anger is vented due to unrelated causes. Throughout lifetimes, the poison of repressed fury gathers in a person who does not choose to transmute resentment into love. Seldom is it advisable for a person to vent anger, although there are situations in which such venting is beneficial when directed at dark forces in spiritual warfare. In such situations, anger pulls the willpower and intention into alignment so that an exhausted Holy Warrior can rally for another battle.

In the case of the average person, though, anger should be transmuted into love through Holy service. If it is not transmuted in such a fashion, passive aggressive behavior will result or the student will become depressed as the talons of anger point inward.

There is a difference between true Holy confrontation and petty anger. When Jesus overthrew the tables of the money changers in the temple, He appeared to be angry at the thieves who had attempted to rob the worshippers. In fact, he was directing a strong willpower with intention in order to disable the dark forces inhabiting the vicinity. He was exercising power instead of anger. He had complete control over the situation and exercised His power for the good of the world, rather than simply venting a little steam.

## **Spiritual Confrontation Needed**

In fact, there are many times when such spiritual confrontation is needed in the world today. The lies of Lucifer and Ahriman abound on every corner. The lust for money, physical thrills and glamour far outweigh the desire for Holy understanding in almost every heart. The warrior who carefully measures his words will still be hated if he confronts the darkness within and without the human heart.

With love, strength, precision and courage, the spiritual warrior must confront evil within and without himself every day of his life if he is to progress. If he hates the teacher or the learning situation, then he has failed the major initiation that will enable him to become a Master. If he calmly smiles in the face of Ahriman and Lucifer, then he lives a lie and will fall to darkness. He who entertains the dark brothers by an act of will or by an act of omission loses his guides and Guardian Angels.

If every Sun on the Planet reacted with physical pain at the presence of lies or evil, then the Earth would have hope of spiritual purification. A Sun must embrace the very pain that shows him the cancer in his own soul in hopes of excising the tumor. If he drinks his morphine of affirmations, he risks losing all he seeks to affirm. It is only by staring evil in the face that one can hope to understand and eradicate such evil.

Only with courage can one hope to withstand the pain of purification of the lower self so it can align with the soul. Only when the soul and the lower self align can one hope to be of any value to the planet.

# The Mystery of Love and Work

One of the metaphysical student's principle difficulties is his trouble understanding the paradox of grace and karma. At the heart of this paradox rests the mystery of Divine love.

Many students judge their teacher by his apparent presence or absence of unconditional love. The student assumes he knows how to recognize unconditional love. In most cases, the student merely wants to be unaccountable for his own spiritual progress and so attempts to externalize his failure on a teacher.

To characterize unconditional love, one must first define love. Depending on the interpretation, the word love refers to platonic love, sexual love, parental love or casual friendships. Many people sign the word "love" at the close of every letter. Other people think of love only in romantic terms.

## Congruency

The true meaning of love rests in the desire for another person to align with his soul's purpose within Cosmic Law. If you truly love someone, you want him to be congruent with his Higher Self. That is the only true love. The other types of feeling commonly called love are really more appropriately termed affection, lust, compassion, duty and affinity.

A person with true love for another person does not withdraw that love because the loved one has misbehaved. There is no such thing as conditional love because any person who is Holy enough to know true love is unmoved by the loved one's superficial behavior.

A true teacher's love for his students cannot be altered by events. Often the teacher may appear to have withdrawn his love for the student because he does not pamper the student's lower self. True love can be quite brutal in that no stone is left unturned as the teacher pushes the student into congruency with his soul and with Cosmic Law. If his efforts fall on deaf ears, the teacher may depart abruptly and sever the relationship. The student may perceive this incorrectly as a lack of love. However, withdrawing one's presence is not the same thing as withdrawing love. Although the poor student cannot recognize it, the love is eternal.

## Laziness

The teacher knows he must not reinforce his student's shabby lower self behavior by his continued presence. The student must advance in his physical, mental and spiritual powers and in his control. It is always the lazy student who moans about the need for what he terms "unconditional love." What such a lazy student really wants is to remain a spiritual baby.

Out of such pathetic attitudes have arisen many sicknesses in metaphysical communities. If you study most channeled writings, you will notice a great emphasis on "love and light" with no real attempt at definition. This is a hypnotic technique used by the dark forces who understand that the majority of humans just want to sit around and smile euphorically. The word "love" has an anchored feeling from babyhood that implies safety and rest. One of the first things people hear in life is parental words of love.

Charles Manson was able to control his murderous menagerie by repeatedly telling them he loved them. If you listen to people talking in bars, you will hear casual sex referred to as "making love." Out of such hypnotic techniques great societal disorders have emerged. "Make love not war" was the slogan of the sixties that brought us AIDS and the welfare crisis of fatherless children. It is interesting that the masses have been led to believe the opposite of war is casual sexual relationships.

## **Peace Symbol**

It is equally interesting to observe that the much lauded “peace” symbol has been used for centuries to represent Satan’s goat horns in black magic rituals with blood sacrifice. The symbol represented on countless jewelry and clothing items in the sixties was actually a radionic tool allowing the entry of demonic forces into the wearer’s aura. In Akasha the peace symbol represents Satan, not true peace.

Misusing words is a common dark force ploy to entice the ignorant student into a life of disorder and destruction. Biblical verses are often quoted out of context for evil purposes. In metaphysical communities, the Course of Miracles has been grossly perverted for evil purposes. What was intended as a learning device to help humans control their thoughts has ended up as mental morphine to block the pain of spiritual growth.

By insisting there is no evil but fear, many Course advocates become like the Jews who walked trustingly into the gas chambers. I doubt such metaphysical one-liners would hold out one night in Harlem. He could smile in a loving fashion all night, but by morning he would be raped, robbed and murdered. Most people who insist there is no evil live safely behind locked doors. Course advocates get very upset at what they see as “separatism.” Their contention is that we should all be “one.”

## **One True God**

We are indeed all flesh and blood, arisen from the one true God. Unfortunately, according to Cosmic Law, anything in physical form is not simply of the One but is split by the Law of Polarity and the Law of Gender. Once manifested, nothing can be truly One, because the One is the Creator and not the Created.

Many people bring up the Ramtha argument, “Ye are Gods”. I have a hard time accepting the guy who stole my watch on the subway as the same guy painted on the ceilings of Italian churches. He might be a distant relative.

Experiencing separateness is essential to learning how to return to Oneness. I can meditate and visualize myself as a rocket scientist all I want, but in the end I would need to go to school and study the basics. I wouldn’t want someone doing brain surgery on me because Ramtha said he was a neurosurgeon.

To get yourself clean you have to know when you are dirty. It is the teacher’s job to let you know when you’re dirty so you can clean yourself. A true friend tells you when you have spinach between your front teeth before you give a lecture.

Few teachers praise their students overly since it slows their development. If a student gets to assuming he does no wrong, he is bound to be shot down. There is a need to develop an inner desire for soul congruency, rather than simply a desire for the teacher’s attention.

## **Modesty**

Modesty and balance are important traits for the student to develop. If a student is praised and given effusive “love” by the teacher, he experiences waves of euphoria and excitement that will soon be followed by depression according to the Law of Rhythm.

The student who does his spiritual work and study even without show of advancement or success will end up doing much better than the flamboyant student. If the student is dependent on the teacher’s approval or praise, he falls apart when the teacher leaves. The student’s responsibility is to incorporate his lessons independent of the teacher.

In Planetary healing work especially, sobriety is paramount. Sometimes the simplest work has the greatest impact when viewed from a spiritual perspective.

The student should approach his work with a “don’t know” attitude. Emptying his mind of what he thinks would be important; he can meditate on what he needs to do. “God’s will be done” is the same affirmation as “Let my lower self align with my higher self in whatever service I am to perform today.”

### **Assumptions**

If a student assumes the most important work on the Planet is the removal of a certain type of dark force, he may energetically go about radionically removing such forces with abandon. He has Holy desire but lacks the sense of timing and “don’t know” required for effective work. The same idea holds true for retrieving information from Akasha. There is an appropriate time to know mysteries and an appropriate time to do different forms of Holy study and service.

If a strong belief is already in place, the student may not be able to dowse the truth because his mind is not centered and open. Just as true Holiness rests in the **balance** of the virtues of the Tree of Life, so true dowsing rests in harmony and serenity of a “don’t know” attitude balanced with Holy Love and Divine willpower.

Above all, the student must work relentlessly while avoiding a need for glamour or approval from others. He must be assured in the quiet of his soul that he has the seed of Holiness waiting to unfold within him. He does not need Angels or teachers to love or rescue him, because he is willing to perfect himself into a Holy Being through hard work.

### **Grace**

He knows that grace is bestowed on the man who dares to face his own frailties. He does not wait for some spaceship to rescue him in a metaphysical rapture, because he knows that his own Holiness is his ticket to Heaven. He doesn’t expect some other Being to die for his sins; he goes about cleaning up his own sins. He doesn’t sit in a spiritual pigsty and pretend he is in Buckingham Palace. He goes about the slow, painful process of becoming Holy in thought, word and deed. He doesn’t sit and whine about being unloved; he starts to love others in the purest sense of the word.

When the student learns the true meaning of love, he will be hated by many people. When he carefully weighs the soul implications of every act, he appears to be an idiot in the eyes of the world. To the world he loves nobody; in truth he loves all. That is the paradox of love. True love can cause more pain to the lower self than any other thing. True love forces the recipient to look into the mirror of his soul and either align the lower self with the soul or suffer.

### **Teacher’s Function**

The teacher’s function is to hold that soul mirror relentlessly before the student. The disparity between the lower self and the soul is the true meaning of separation. The confusion comes when the student thinks the mirror is the separation and begins to hate the mirror holder. He then accuses the teacher of fostering separation or the Fall of Man.

It is ironic indeed that the very person capable of shining light on the snakes underfoot is accused of bringing in the snakes.

The teacher’s true role is not to make syrupy sounding messages glorifying the student or to preach the wonders of “love.” The teacher’s role is to point out the snakes on the path and to walk before the student, illuminating the way to Holiness, with the mirror of reflection constantly on his back.

Many students prefer to poke out their spiritual eyes rather than face that mirror. They then fall into the snake pit and assume the snakes are the arms of their Guardian Angels.

Only the brave can endure the path to Holiness.

# Abbreviated World Broadcast System

Much of the material in this book is based on the foundations of spiritual science found in *Gnostic Book of Earth Changes*. (2014 Publisher's Note: *World Broadcast System is updated in the book "1995 September Lectures" by Anonymous*)

Of primary importance to the radionic student is the understanding that patterns, numbers and directions exert forces that are independent of the practitioner's desire. They represent primal energies of the cosmos, and their use in radionics is not impacted by the thoughts or wishes of the practitioner. Such understanding sets this approach distinctly apart from other systems of healing.

The World Radionic System differs from other types of radionics in that it blocks harmful energies that have come through the veil between our Holy universe and the destructive inverse universe of darkness. It recognizes that the Earth was designed to exist only in harmony and that disharmony was meant to be confined to a type of black hole far from mankind. The System returns those harmful energies to their rightful home.

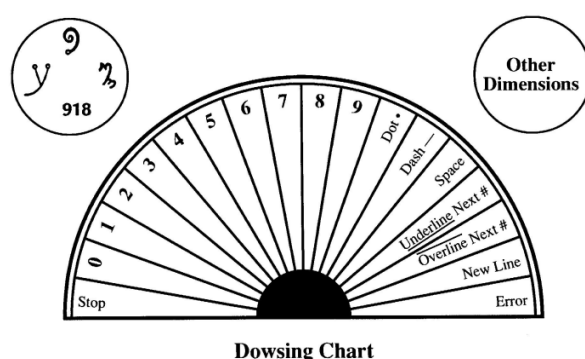

If the practitioner uses the full World Radionics Map System or the small Mobile Map System according to directions and without alteration, no harm can come to any living thing or to the Earth. It is forbidden to alter any aspect of the System at all.

In the Mobile Map System, clearing of the negative energies is somewhat slower than using the full 31 dimensional Map, but the convenience and ease of dowsing may make it a more desirable system for some dowsers. Clearing negative energies by using the Mobile Map may take an hour, whereas the full System can clear most harmful energies within seconds.

If one desires to use only the Mobile Map System, very few items are required. A black video box (not metal), sample Seal of Solomon stars (in appendix), reinforcement symbols for the Akasha dimensions and a small map are all that is needed.

The small Earth map (in appendix) should be placed in the bottom of the box. The spiritual causes Layer of the Akasha symbol should be placed with the top to north on the United States. A blank star should be placed to the right of that symbol. On top of the Akasha symbol, place the material effects Akasha symbol (marked in appendix). Now your Mobile map box is ready.

Make copies of the blank stars in the appendix. Laminate a copy of the dowsing chart given below that contains the ratio dowsing symbols and a choice between the Akasha dimension and all the other dimensions.

Many of the numbers that would have been put into other dimensions when one uses the full Map System can safely be placed onto the Akasha dimension of the Mobile Map. This removes the root of the pattern of disharmony. There are other cases in which one should not place the ratios into Akasha, and so one can merely place those upon the blank star symbol to the right of the Akasha symbol within the Mobile Map.

When one dowses a ratio, it is very helpful to dowse into a tape recorder, so that the rhythm is not lost. Dowse in counts, like music, at a constant tempo. The numbers and symbols should be written into the stars very neatly, with a form that approximates these:

1 2 3 4 5 6 7 8 9

For the Akasha clearing ratios, one should reinforce the symbols by placing new copies of both the spiritual causes and material effects symbols approximately every 20 ratios. When the box gets full, orient it correctly to direction (the north of the map inside facing north on the Planet), and leave it in a quiet place for three weeks. After three weeks you can burn the ratios and reuse the box. It is advisable to keep an extra box handy. ***(2014 Publisher's Note: This system remains in the book for historical reference. Some similar method of Dark Broadcasting may be valid now or again at some point in the future).***

The full World ***(Updated)*** Radionic Map System and the mobile Map System can be ordered from:

***Sophia Johanson Library and Press***

**P.O. Box 972**

**[sophiajohanson.wordpress.com](http://sophiajohanson.wordpress.com)**

Every dark force cleared in this system helps hundreds of people, because the same dark force duplicates itself over and over. After three weeks of radionics, such energy is barred from the earth forever. It is effective in the clearing of all manner of disorders, including hate thoughtforms, hexes, voodooos, demonic possessions, alien contamination and many major illnesses.

# Conclusion

In the previous chapters, we have elucidated the state of spiritual crisis on the Earth.

Many people will complain that the information given is too fear-provoking.

If a lion had your child's head in his mouth, would you not react quickly and with some fear? The Earth is the child of the Logos and is indeed in the lion's mouth.

The favored Asurian mental control method recently has been to channel messages that advise people to accept "the new energies" (translation: doppelgangers) as beneficial. Such channeling says that mankind is at the threshold of his awakening of a glorious new age, that all mankind must do is relax and assume that there is nothing to fear and that there is no evil.

I am reminded of the Texas gubernatorial candidate who advised a group of women, "If you know you are going to be raped, you might as well just lay back and enjoy it."

This book was written to tell humanity. "You don't have to be raped. You can and should **resist!**"

*finis*

# Epilogue

## The Reluctant Soldier

Long ago in a distant country, lived a man with his son in the shadow of a grand castle.

Here was a kingdom that had been in peace with all other kingdoms for many years, yet the old man kept his sword ready, knowing that it was his duty to be a soldier if the need should arise. Many years before, he had fought for the loving King in a battle against a violent band known as the Black Warriors that had tried to destroy the peaceful kingdom. Before that, his father had been a soldier and his father before him.

There were others in the shadow of the castle that were farmers or herbalists or teachers. Yet the fate of the old man and his son, whose name was William, remained always to be ready for battle.

At night, the old man would stand on the hill with his face against the wind. Listening for the sounds of hoofs or battle-cries. Despite his great age his back was straight. His hands were gnarled yet strong.

One afternoon, a messenger from the King came racing on horseback throughout the village, crying out, "All soldiers, prepare! The Dark Ones have attacked the neighboring kingdom and will next attack us!"

The old man took down his suit of armor and his sword. Out of a box that had been hidden under a bed he withdrew a new sword and armor for William. Wordlessly, he walked into the field to William and handed him the sword and armor.

William paled and protested. "Father, I do not want to be a soldier. I do not want to fight or kill for any reason. I will stay here and grow the crops." His father looked at him sternly. "It is your caste to be a soldier. You have no choice, because your fate has led you to this family. Should you refuse to accept the task that your soul has laid before you, then you are no better than Lucifer himself. Whether you like the idea or not means little. It is the task at hand and must be done, or all order will be lost in the kingdom."

William accepted the sword in silence with a heavy heart. Donning the armor, he followed his aged father to the battlefield.

The battle was prolonged, and many people died. William fulfilled his tasks and did not complain, even when his father was slain.

Gradually, William began to change. His strength of willpower and his ability to focus his thought became keen. He could dance through battles with grace and agility. He found great solace in the smallest of things: a butterfly upon his arm, a sudden rainbow, sparking sun on the wet grasses.

He found he could see the spirits of the dead arise from the corpses and marveled in the night at the spirits around him. He learned to merge his awareness with other beings and thus learn from them powerful lessons. From a lizard, he could learn about the caves and the earth spirits. From the nightingale, he learned the meaning of songs.

As a warrior, William became a seer, a poet, an exorcist and a man of great wisdom. He could see that the perils of battle had the ability to change a person much more rapidly than possible within a normal life.

One day the battle was over and he wandered home. He resumed his life as a farmer. The days became slow and easy.

Sometimes at night, he would stand out on the hill, with his face into the wind, listening for sounds of hoofs in the distance.

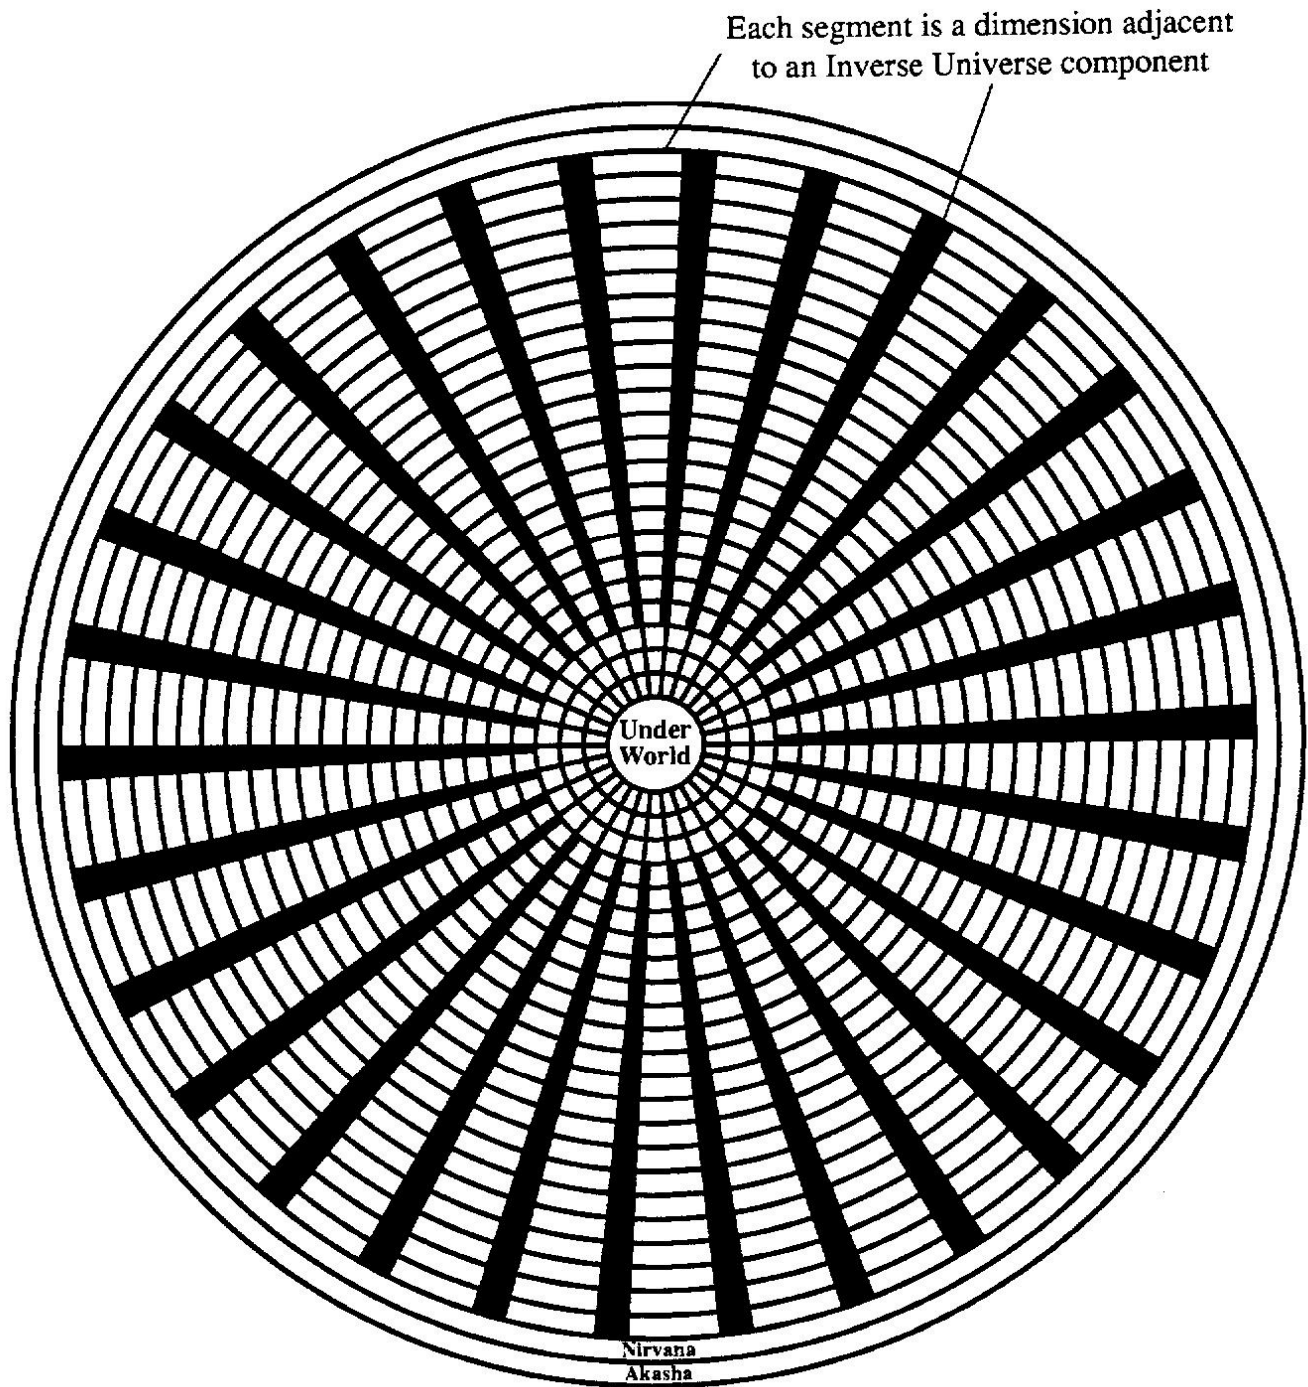

He had learned a powerful truth: To increase your ability to perceive higher truth, you must increase your necessity.

War had given him necessity. Now he knew why his soul had put him into the warrior caste. Throughout many lifetimes, he had moved toward the destiny of a warrior.

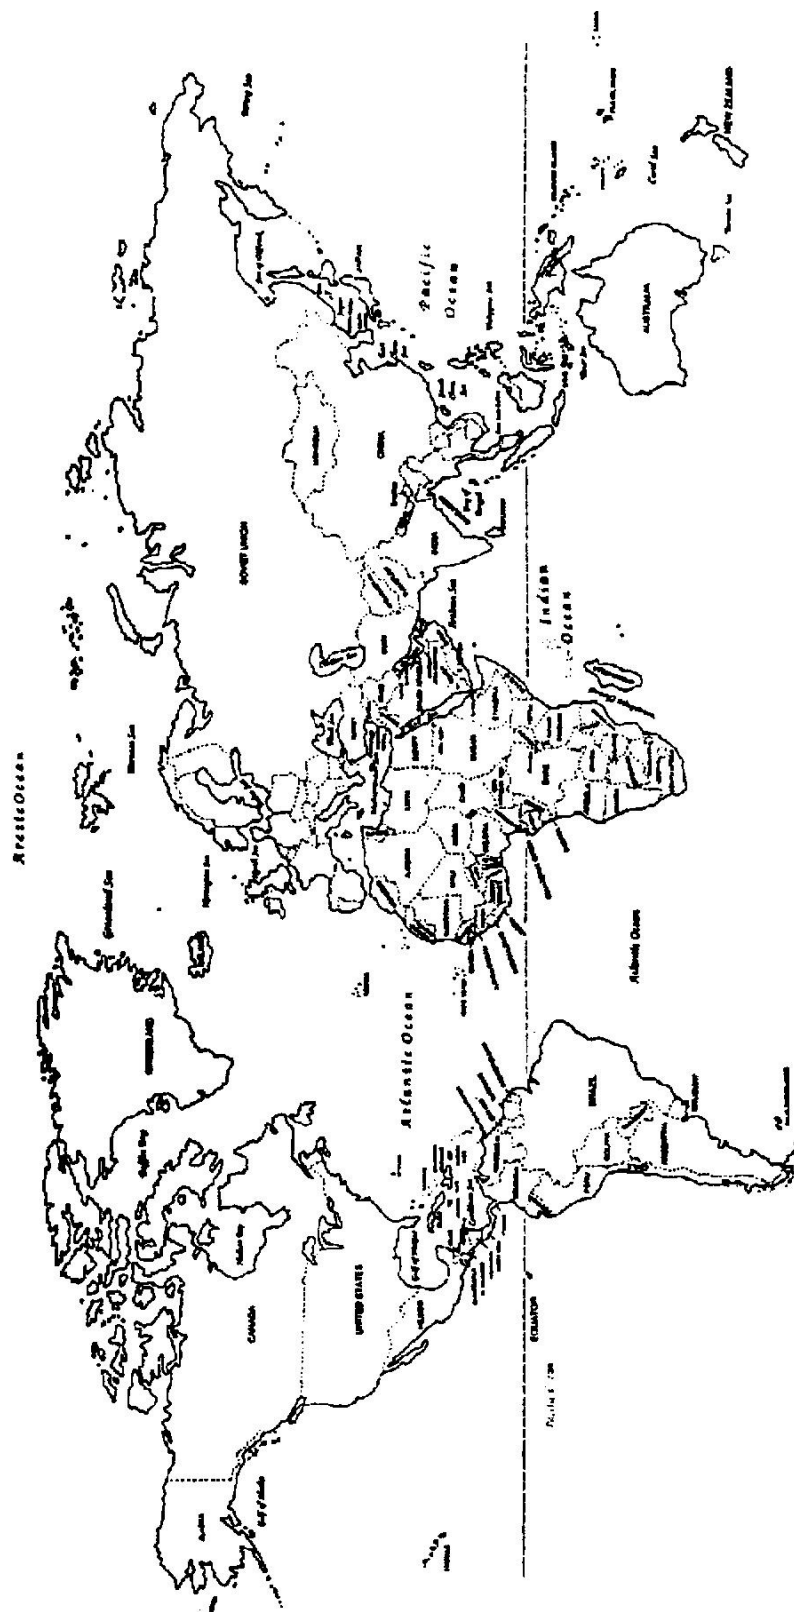

He now knew that holy truth could only be endured by a warrior.

## children

- abuse of, is reinforced by lawyers' defense of criminals, 67
- abuse of, reflects spiritual Earth crisis, 20
- are balanced, in male/female families, 65
- can be attacked by thoughtforms, 5
- future salvation, the tools have been given, 35
- heroin use likely, with vicinity daemon exposure,, 58
- in pornographic slavery and 'snuff' films, 65
- many are born with doppelgangers, 19
- mixed breeds w/aliens, traits listed, 14
- mixed Suns/aliens are cruel and intelligent Deros, 17
- of Suns, deformed DNA through experiments, 14
- spiritual healing, based on past life usually, 48
- spiritual healing, parental mental habits can restructure, 48
- suicides/murders, symptom of mature doppelganger, 15

## chronic fatigue syndrome

- doppelganger infection of the masses through water, 36
- doppelganger is present, 15

## chronic viral syndrome

- largely due to daemon possession, 59
- possible Cell Wall Micro-Fungi, 13

## circular fields, re. alien monitors, 10

clients, can be taught to take responsibility, 61

## clothing

- brand tags are like radionic treatment, 45
- some patterns weakening, *list of*, 45

## cocaine daemons 'like' water imbalances, 58

## colon

- flora, ferments plant daemons, 58
- toxic, reflected in skin problems, 44

## color

- has sounds or songs, 60
- theatrical gels, used in Light Broadcast, 6

## Comforter, in the Bible, is the Light Nagual, 7

*Communion*, Whitley Strieber author, Deros implanted, 13

communism, re. Ahimanic materialism, 2

## computer

- bar codes are very weakening, 45
- systems world wide, dark forces behind them, 56

## CONCLUSION, 74

*Confucius*, Disseminator of Holy Knowledge, 6, 12

## conscious mind

- not aware of vampiring others, 8
- translates dowsing information visually, 38

## consciousness

- individual, makes a living soul, 21
- is the 1st attention dreaming body aspect, 27
- merges spiritually w/others by dowsing, 60
- merging, Native Americans vs. Anglos, 57
- within 1 dimension has 25 screens *see* CHARTS, 28

copper, speeds radionic healing, 56

cosmic dust. *See also* Glossary

- one may be returned to, from Nirvana, 28
- soul returns to, by embracing disorder, 21

Cosmic Laws. *See also* Glossary

- a master is in harmony with all, 64
- alignment with, is a soul immortal/individual, 21
- always present in miracles, 20
- are principles on which all worlds are based, 5
- Asuras invited within Law by channeling, 4
- guides Earth into heaven, 65
- Messengers are committed to work within, 10

one learns when actions/thoughts impacts harmony, 62

pattern of worlds, 28

re. Light Nagual, 7

revealed to true seeker, never dilettante, 62

some, are immutable while in physical form, 62

when lawlessness is supported, society destroyed, 62

courage, withstands pain of lower self purification, 68

## *Course of Miracles*

holy source, for the less developed, reasons, 23

offered, to decrease hate-filled thoughtforms, 23

used as mental morphine instead of thought control, 70

## cranial nerves

are the first weakened by doppelganger, 36

correlate to specific body organs, *see* CHARTS, 45

inflammation, ringing in ears may be doppelganger, 36

on CHARTS, check nerve prana on each, 80% optimal, 39

## crisis

can be developmental, appears in spiritual/physical healing, 48

in world history, brings new teachings, 2

*Crowley, Aleister*, sexual torture re. demonic power, 25

cruelty, reflects depression turned outward, 16

crystals, programmed as electromagnetic shielding, 54

*Cuba*, 10% ripe doppelgangers, 37

## D

## daemons

cocaine, heroin, peyote, mescalito explained, 58

crystallized w/fermentation, 58

devas, partake of archetypal spiritual essence of plants, 5

dowse as 'mutant spirit possession', 59

fermented in colon when plants eaten, 58

marijuana, harmful/beneficial, 58

microcosms contaminate dreaming bodies, 58

mutated by nuclear/microwave/chemicals, 59

plant, are nature spirits, 57

possessions, removed in layers w/radionics, 59

smoking is a direct plant interface re. possessions, 58

spiritual archetypes of plants, 58

Dark Broadcast. *See* Glossary, blocks fallen angel patterns

## dark forces

easily manipulate visions, discernment needed, 33

ploy, misuse of common words, 70

Dark Nagual. *See* Glossary, hells of all worlds is home

dark world. *See* inverse world

## death

fear of is lost, in study of dimensions, 27

obsessed dreaming bodies can haunt after, 33

rays, are projected by Asuras, 10

deformity, reflects hatred over lifetimes, explained, 20

demi-urges, Keepers of the Law in ancient Greece, 6

## demons

aliens, normal exorcism doesn't work, 21

form created when spiritual potential not met, 12

inverse universe vs. other world, 23

of murder, created by TV shows, 5

partake of archetypal spiritual essence of forces of Earth, 5

seeds of, ride on light waves, explained, 10

## density

Earth is approaching the 4th, 12

Earth, changes re. Aquarian Age, 4

is relative, and not the same as hierarchy, 12

of elemental substances higher than material, 5  
space between cosmic dust particles, 8  
depravity occurs, when spiritual beings Fall, 16  
depression  
anger pointed in, transmute with love/service, 68  
daily dowsing dark forces aids, 39  
developing doppelganger possible, 36  
diet high in soy foods, 44  
naturopathic use of hot/cold treatments, 53  
people linked to chakras, can be cleared, 61  
re. thyroid malfunction, 42  
turned outward becomes cruelty/sexual obsession, 16  
Deros. *See also* Glossary  
aid Asuras, have part Sun DNA, 5  
are controlled only by Asuras and Messengers, 13  
enter Earth by Law through meditation, 14  
exit hell by dimensional doorways in physical form, 16  
jolted from hells and survive, through sacrifice/other, 16  
legions released by nuclear explosions, 14  
many disappeared 01/11/92, 26  
mixed Zeta Reticuli/human DNA of inverse universe, 13  
need prana to exit hells, receive by sacrifices/other, 16  
power/magic through sorcery/torture, 17  
ravaging Earth, can dematerialize/materialize, 17, 18  
receive pleasure from suffering of others, 16  
seen with peripheral vision and other traits, 13  
sent to hell prisons over time by Messengers, 16, 17  
slaves include Lizard aliens/Lizard Moon Gnomes, 13  
virus carries doppelganger clone's DNA, 18  
when invisible, aurameters can always dowse, 18  
deva. *See* daemon  
developmental stages, 25 stops in each dimension, explained, 29  
diabetes, reflected in mix of Anglos/Native Americans, 57  
diet  
one diet is not appropriate for all, 44  
weeds have all necessary vitamins/minerals, 44  
dimensions  
25 developmental stages explained *see* CHARTS, 29  
2nd, affected by opium daemon, 58  
31, and dreaming bodies transmute disharmony, 8

- daemon 'likes' hatred for authority, 58
- smokers, risk daemon possession, 58
- some smokers never get daemon, reason, 59
- when soaked in alcohol, many beneficial uses, 58

martyrs, world needs surviving heroes more than, 43

## master

- confident, inner-directed, other traits, 67
- courage, necessary trait, 66
- feels little attachment to insults, 67
- in harmony with all Cosmic Laws, 64
- reviled, reflects hatred of authority, 59
- weapon, is transmutation not denial, 46

masturbation, re. release of sexual prana, 64

## materialism

- Ahrimanic, re. Soviet Union, 2
- feeds doppelganger doubles, 10
- superficial harmony is sorcery, 60
- the ultimate, to get rich from holy work, 49
- world's idea of good is often reverse in spirit, 60

materialization, into form explained, 5

math, has harmonic correspondence to dimensions/grid lines, 16

maya, an Eastern concept, vs. changing focus of attention, 27

Mayans. *See* American Indians

meat or milk products, some people need for health, 44

## medications

- sometimes needed for lack of soul energy in system, 42
- toxic reabsorption, may cause thyroid disfunction, 42

## meditation

- cannot cure spiritual problems with mental plane, 20
- dowsing is quicker to stop internal dialogues, 60
- for space brothers, calls in Deros, 14
- groups, recruiting aliens is devastating, reasons, 11, 21, 17
- on complete absence of evil, sedates, 24
- one can mentally talk to dual soul re. healing, 43
- re. story of Eastern guru in crime-ridden city, 20
- world-wide on 11/11/91 was destructive, 26

## memory

- of childhood, lowers frequency of 1st Attention, 29
- poor, developing doppelganger possible, 36

## mental

- body, deteriorates w/tobacco daemon, 59
- control, of Deros by Asurians, 14
- degeneration continues, with a ripe doppelganger, 36
- disease, physical methods cannot heal higher plane's cause, 20
- habits, can restructure spiritual illness, 48
- habits, improve by frequency/intensity/duration, 50
- illness, spiritual crisis healed by spirit, 2
- imbalance, may cause kidney problem, 41
- methods, cannot clear spiritual problems, 20
- patterns ethers, physical problems follow, 48
- patterns, of illnesses can restructure, 48
- plane causation, fear/hate are examples, 41
- repulsion to meat is an emotional bias, 44
- self control, vital for health, 39

mercury tooth fillings, re. thyroid disfunction, 42

## meridians

- acupuncture, have correspondence w/cranial nerves, 39
- network, prana reverberates with, 25

mescalito daemon affinities, re. possessions, 58

## Messengers

- can control Asura driven Deros, 13
- have sent Deros to hell prisons over time, 16, 17
- incarnate during an Earth crisis, on trait of Love, 12
- must obey Law of Cause and Effect re. humans, 15
- only they control the Asuras/Deros, 5
- recently stopped Zeta Reticuli activity, 17
- sometimes die before completing task, 12
- teach mankind how to fight Asuras, 10

metals, speeds healing i.e. silver/copper, 56

## metaphysical communities

- Course of Miracles, message was perverted, 70
- pathetic attitudes have arisen, examples, 69

metaphysical students. *See* student

*Miami, Florida*, 50% ripe doppelgangers, 37

microwaved food, reflect daemon mutations, 59

minerals, better found in weeds vs. diet supplements, 44

## miracle

- alien removal from Earth possible for all time, 21
- high level Cosmic Law to change lower nature, 20
- re. Earth crisis offered at this time, not magic, 20

## mirror

- is held by teacher, student may be confused, 71
- of lower self purified, one can see both holiness/evil, 32
- of lower self, shown at the threshold, 32

mistletoe, feeds doppelganger, 19

MOBILE MAP SYSTEM. *See also* WORLD RADIONIC DIAGRAM

- defined and how to, 72
- example for use, 38
- method used, could save Earth, 15
- removes hate demons, 41

mobs, reflect growing doppelganger seeds, 15

## Mold of Man

- another term for Nirvana, 31
- needs agility in dimensions to survive within, 28

## monastery

- hiding out now, is not best interest of Planet, 43
- reclusives, are conserving life force for worthy, 43

money, love of and obsessions, reflect Ahrimanic influence, 9

monitors, alien, re. circular fields, 10

*Montreal*, 60% ripe doppelgangers, 37

*Mother Theresa*, life of service example, even in discomfort, 49

mouth, over large, reflects digestion, 44

movies, slasher films poisons Earth, 63

## murder

- allowed by an apathetic person, no less sinless, 16
- random thrill seeking, reflects ripe doppelgangers, 36
- ritual, reflects spiritual Earth crisis, 20
- ritual, releases Deros from hell to roam physically, 17
- watched on TV, creates demons of, 5

muscle testing, very weak

- developing doppelganger possible, 36
- near a vampire, 8, 42
- near bar codes/trademarks, 45

## music

- classical, one may see with inner eye, 60
- satanic lyrics, symptom of doppelganger, 15

mutilations of animals/humans, Deros caused, 13

## Mysteries

- re. world broadcast/archetypal symbols and dimensions, 8
- teachings, can flower spiritual sensory organs, 60
- translated through 31 dimensional doorways, 8

mystery schools. *See also* Glossary  
alchemical teachings not public, 7  
Deros bribed channelers with information, 17

## N

nagual, *see* Glossary, spirit aspect which accesses Akasha, 7

robberies

- high incidence, reflects ripe doppelgangers, 36
- rampant, spiritual Earth crisis healed by spirit, 2, 20
- robot control possible, through Asuras and etheric body, 14
- romantic love, re. unity of dual soul, 64
- Russia*. See Soviet Union

## S

sacrifice

- blood, pranic energy tapped by Deros, 16
- blood, re. satanists/sorcerers, 14
- human, Deros are found in locations of, 13
- of animals was symbolic, few Deros attracted, 13
- re. satanic use of 'Peace Symbol', 70
- used by Deros for magic/power, 17

*Saddam Hussein*, ripe doppelganger, 15

sadistic, an apathetic person becomes, 16

sage, is understood w/in culture/time, 23

*Saint Michael's Sword* prayer

- method used to neutralize bar codes, 56
- repetition influences the Earth, 63
- used in exorcism, 23

salvation

- Ahriman blinds one to soul, 9
- for future children, the tools have been given, 35
- lies in understanding the 1st attention, 27

*San Francisco*

- 70% ripe doppelgangers, 36
- worship of physical body reflects Ahriman, 9

Satan

- re. 'Peace Symbol' and black magic, 70
- the original Adam, 6

satanic musical lyrics, symptoms of doppelganger, 15

Satanists. See sacrifice

science

- material, has Ahrimanic influence, 9
- study of natural, quides correct questions for Akasha, 34

séances

- destructive to Earth at this time, 10
- one in particular invited aliens, 17

second. See 2nd

secret knowledge, known through gnosis, 6

*Sedona, Arizona*, 60% ripe doppelgangers, 37

seeds and nuts, sufficient diet protein, 44

self-hypnosis

- includes concept, 'love is all you need', 22
- some teachings offered to Suns unable to cope, 23

selfishness, trait 'liked' by opium demon, 58

sensitive person

- is to be intuitive, while virtue advances, 50
- pitfall, seeks pain relief vs. spiritual progress, 50

serenity given, to holy warrior, 61

service includes, hours spent clearing other people, 61

seven/seventh. See 7

sexual

- centers, excessive stimulation/doppelgangers, 26
- contact, spreads doppelganger virus, 19
- contact, transmits Asura seed, 14
- energies, pathological when released into anus, 64
- excess, pranic energy tapped by Deros, 16
- experiences, reverberate on whole Planet, 63

- focus excessive, reflects both Ahrimanic/Luciferic influence, 9
- identity confusion, dreaming body grid clouds can cause, 33
- life, of each person impacts Earth, 62
- magic, Lizard Moon Gnomes described, 25
- mores, reflect breakdown of society, 65
- obsession, reflects depression turned outward, 16
- obsessive behavior, instead of gentle love, 65
- prana, has tremendous creative potential for Earth, 64
- prana, not digested in wrong orifice, 64
- prana, re. pelvis/throat, 26
- relationships need to be congruent, God/man co-creators, 65
- relationships, disorders of 1960's-70's, 69
- self-control spiritually necessary, 67
- thoughtforms, increase around Lizards, 26
- thoughts, dreaming body freezes/imprints, 33
- torture, re. demonic power, 25
- union, meant to create new physical forms, 64
- union, reflects spiritual expression of dual soul matrix, 64
- violation UFO, Asura seed, 14

shapes of buildings, some open hell doors, 16

*Silent Holocaust*, is the destruction of society, 20

*Silva, José*, enmeshed in Ahriman, 67

silver, speeds radionic healing, 56

singing uplifting songs, keep thoughts from clinging, 33

sinus

six/sixth. See 6

skin, mottled/pimpily/warty?

reflects liver/lung toxicity, fallen angel imprints, 44

slander, of holiness occurs through fear of 'mirror', 32

sleep

- head pointed North is strengthening, 64

'spooning' position weakening, 64

within Natural Law, strengthens the Earth, 64

smoking a plant is a direct daemon interface re. possessions, 58

sobriety in lower personality, important re. dreaming bodies, 32

solar plexus, prana beam by Lizard Moon Gnomes, 25

*Sophia Johanson Library and Press*, 73

sorcerers

- blood sacrifice attracts destruction elementals, 14
- given secret knowledge for releasing Deros from hells, 16
- open hells for Asurian knowledge, 16
- re. Black Brotherhood, 11
- released Deros from inverse universe as trained demons, 13
- ritual murders release Deros from hell to roam physically, 17
- sacrifice, sexual excess, torture gives off prana, 16

sorcery

- Deros have knowledge of the Asuras, 5
- misused power, changes physical not causative plane, 20
- Nephilim manipulate ignorant masses w/alchemy, 12
- re. generative energy, sexual torture, 25
- the superficial harmony of the materialist, 60

soul. See also Suns

- aligned w/Cosmic Law is immortal/individual., 21
- all Suns created in one blast of Logos, 30
- blinded by Ahrimanic dark force patterns, 9
- both aspects of dual soul need purification, 64
- by embracing disorder, returns to Cosmic Dust, 21
- call of, and the answer, 61
- cut off from higher self, with decision to hate, 8
- death chosen, if one prefers ignorance, 21

dreaming body of soul, is physical body, 27  
 energy, is like a rainbow spectrum, 7  
 energy, is more complex than prana, 41  
 has a planetary value, when aligned w/lower self, 68  
 individual consciousness destroyed with free will, 21  
 intellectualization of, reflects spiritual Ahrimanism, 9  
 is mortal, the 'fabric' is immortal, explained, 21  
 life's work may need a varied diet, 44  
 look to, rather than the shell of person, 60  
 necessity of spirit, 75  
 of Suns, bud off into new, 30  
 prana is a lower component of, 7  
 progression, of loved ones most important, 51  
 purpose, is congruent with Higher Self, 69  
 purpose, thwarted when dreaming body stuck in past, 33  
 single, is shared by dual soul, 5  
 Suns, reflect joy, love and desire to serve, 39  
 when cut off from, becomes pranic vampire, 41  
 without individual consciousness is dead, 21

sounds

- in some chants, open hell doors, 16
- used in radionic healing, 7

*Soviet Union*

- former, represents dehumanized materialism, 2
- is 40% ripe doppelgangers, 37

soy products, many Westerners lack digestive enzyme, 44

space

- composed of cosmic dust particles, not a vacuum, 27
- is impacted by karma, 7

space brothers

- channeled, is to risk a complete control over Man, 11
- meditations, calls in Deros, 14

Spark of God

- hating another person is hating God, 41
- it can be refused, 23

species of people

- not addressed by religions, 22
- understanding of, necessary to avoid karmic errors, 43

spherical thinking

- an aspect of spiritual discernment, 11
- of spiritual bodies vs. linear, 9

spirit becomes evil, the dreaming body of obsessives, 33

spiritual

- advancement, discomfort is inherent, 48
- advancement, knowing when to use life forces, 43
- advancement, needs sense self-worth and resilience., 50
- archetypes, of plant daemons, 58
- basic flaws, glamour/money/sex, examples, 67
- blueprint of food altered with irradiation, 59
