TIME TRAVEL

HOW TO CONSTRUCT THE PHILADELPHIA
EXPERIMENT ON A SIMPLIFIED SCALE

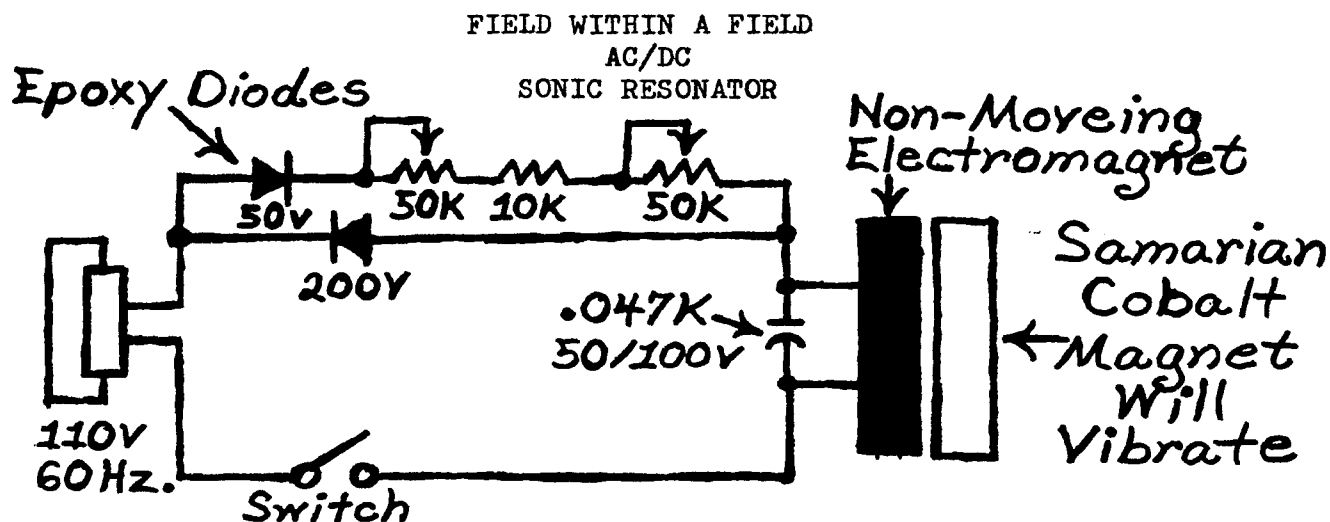

© 1986 By Steven Gibbs & A.H.Fry
22511 Markham, Perris, CA. 92370 USA

The mechanics of how the material world and universe is made up is still a mystery to the manipulated and controlled science & texts of our time.

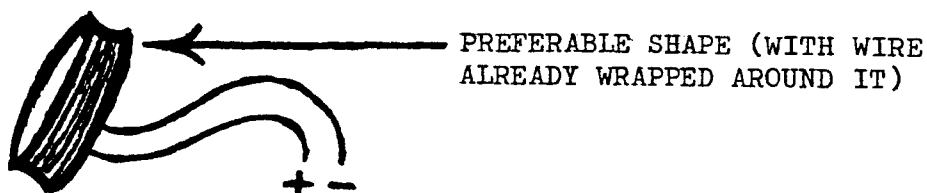

To use your non material components to travel in time and space, you will either need some background from other sources, or you will need to tap your 'inner' high level 'flowline' knowledge. A couple of your 'Mind' components know how to trip around in time, but to your animal brain this is dangerous uncharted territory and it will keep the walls up until you can convince it otherwise. Getting your many components working together then is vital, and one of the things the Modern Human Comprehension courses can do for you. The 4th comp course will even detail how the energy bands of the universe are held together. Aliens and their craft will tap these bands and get a free ride from planet to planet.

Thanks to Steven Gibbs and his Time Travel device much of the usual training and component balance can now be dispensed with. Anyone who will follow follow his directions in detail and make the necessary effort, can have some of the greatest adventures known to a human being. At the end of this report I have added a few observations and clippings that I felt would be of help. Feel free to contact Gibbs or myself if questions.

Al. Fry

As you can see, this is a very simple unit to construct. The Electromagnet you may have to build yourself, and this you can do, by obtaining some *Soft Iron preferably round in shape, but it is not crucial as to what shape it is in. (See below)

It could be oblong, and that would do just as good, so long as it becomes Electromagnetic. The wire to use should be 21 gage Magnet Wire. This can be obtained at a shop where they repair Electric Motors.

Turn the unit on, and place it against a piece of wood with the Samaritan touching the wood. Press the Electromagnet against the Samaritan and hold it. The reason I say this, is because the Samaritan will be vibrating and the Electromagnet will be still. So hold the two together in your hands, and press on the wood with the Samaritan touching the wood. The wood should turn into a magnet. Try putting the Samaritan Magnet on the wood after the Experiment. It should stay.

1. The Sonic Resonator can be used for Astral Projection, Invisibility, Spiritual Time Travel, Physical Time Travel, Inter-dimensional Travel, and Teleportation from one location to another. The only draw-back with acheiveing these things, is that you must be positioned over a Grid Point when activateing the unit. If you are not positioned over a Grid Point, then the unit can only be used for Spiritual Time Travel and Astral Projection, but of course, this would depend on how many stages you wish to add to it. What I am trying to say is, that the more stages you add to it, the least chance you have of standing over a Grid Point to acheive all of the above.

2. The Electromagnet on the Sonic Resonator, generates an AC/DC Field which can lock onto the Physical an Spiritual Aspects of the body. In other words AC (Physical) an DC (Astral).

3. For Astral Projection, place the Samarian Bar Magnet over the 3rd Chakra Point (Negative North Pole side touching the Stomach region). Next place the Electromagnet over the Bar Magnet, and activate the unit. You should have an out of the body experience sometime after the Treatment. For this purpose the units should be set at the highest possible number. But of course, this may vary from person to person.

4. The Sonic Resonator can be tuned while useing a pendulum or Radionics Rubbing Plate. Example: let's say you wish to tune into a frequency for Astral Projection, While concenstrating on the queston, hold the Pendulum over the Sonic Resonator while turning the dials. As soon as you get a reaction on the Pendulum "STOP". This should then give you the G-Field you need. If you use a rubbing plate, concenstrate on the queston until you get the stick.

5. By useing the method in paragraph 4, the Sonic Resonator can be used effectively for healing the sick. You may place his witness on the end of the Bar Magnet for a Broadcast treatment, or you may hook it up directly to the individual.

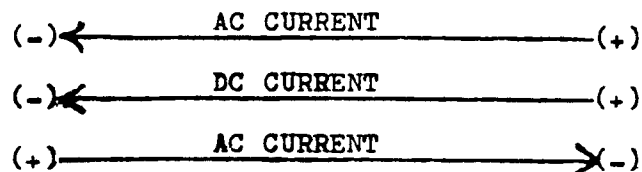

6. The Sonic Resonator creates a Hyper Field which is basically reversed magnetism in the truest sense.

7. The diodes within Sonic Resonator act as miniature Pyramids which lock onto the resonance value of ($\phi = 1.618$). In other words, whenever the device is activated, you are in resonance with the still point.

8. Sense diodes, Electromagnet, and Bar Magnet all create a vortex, the device when activated creates what could be termed as a bridge or doorway leading into another dimension or time frame. This other dimension or time frame if you could call it that, could be referred to as Zero Space where everything becomes infinitely possible depending of course on what the dial setting is.

9. In order to explain how an AC/DC Field can change your physical awareness, we must first examine the diagram below:

(GRAVITY EXPLAINED)

By examining the above diagram we can see that AC current alternates from positive to negative and from negative to positive. However DC current only travels in one direction which produces a stress factor on one of the AC lines. Since the Sonic Resonator varies DC current, we can also vary the gravity because we are putting pressure on one of the AC lines. It is interesting to note, that if we change the Gravity factor, we also can change our time frame, location, or dimension.

10. The Sonic Resonator varies the time flow or Gravity Factor. In other words: (Electromagnetism x Electricity = Gravity).

11. If glass Globe filled with Argon Gas is placed around Electromagnet and bar magnet, you can create a Cosmic Diode.

12. In order to amplify the power of the SONIC RESONATOR, connect a Tesla Coil to the Electromagnet. You may have an experience you will never forget. Seriously!!

I3. By tuning to certain Harmonics it is possible to adjust the Sonic resonator to travel to a specific year.

I4. If we subtract 60 Hz. from the 7.8 Hz. frequency at which the Earth's power grid oscillates at, we will arrive at 52 degrees. This is razor close to the slope angle of the Pyramid of Giza. In other words, when you activate the Sonic Resonator over a Grid point, you create a 52 degree Pyramid or force field around yourself.

I5. For an Experiment, you can try to adjust one dial to 60 meters and the other dial to 24 meters to see what happens. The reason I say this is because $60 \times 24 = 1440$ which is one of the Harmonics of the Speed of light.

I6. The reason why soft iron and Cobalt are used in the construction of the unit, lies in the fact that large amounts of Cobalt, Nickel, and Manganese metals have been found in the Bermuda Triangle Area. When a ship crosses a certain point within this area its engines lock onto a certain grid point frequency and is flung into another dimension.

I7. In the Philadelphia Experiment they used Vacuum tubes instead of Diodes for crossing the dimensional barrier. However to simplify things, I think one should use diodes instead of Vacuum Tubes.

I8. As far as the Capacitor is concerned on the Sonic Resonator, you may want to hook this up to a switch type relay system to see which way works the best. I prefer to switch it off myself.

I9. In some experiment, you may want better results. Remember! the more powerful the Bar Magnet, the better it works.

20. For Astral Projection or Spiritual Time Travel, you may want to try experimenting with Pyramid Energy. In other words, after you have placed a Pyramid over your head, place the Electromagnet and Samarian Magnet on top of it for a few minutes to see what happens. You may be surprised at what you experience.

21. Sense the Earths power grid also oscillates at 60 Hz. c.p.s. By activating the Sonic Resonator over a grid point, we create what could be termed as a dimensional push. This is because both the Sonic Resonator and power grid are in resonance with one another.
22. In the area of PSIONICS, the Sonic Resonator can treat 10 toxics and 12 organs. It can also treat through the Ultraviolet region.
23. The Sonic Resonator can be tuned to a Zero Positive, Zero Negative, or Zero Zero Vector. Each of these exist at right angles to one another.
24. It has been proven that the current which flows inside most electrical systems, travel from Inferred to Ultraviolet. However when dealing with the Sonic Resonator, the current which flows through the diodes travel from Ultraviolet to Infrared, this in turn reverses the fields which surround the Bar Magnet. Also the fields which exist around the Electromagnet are also reversed. This is why a Hyper Field is created.
25. For those who like to take chances, you may want to try to insert a ELF Circuit into the Sonic Resonator to amplify your own thoughts.
26. The frequency to amplify thoughts is 7.853975 Hz. c.p.s.
27. If you wish to amplify the power within the Sonic Resonator to the limit, you may want to insert a Morbius Coil somewhere in the circuit.
28. A Morbius coil constructed of Zero intensity metals would do the job.
29. Useing a quartz crystal in some way or another, could have some interesting possibilities.
30. WARNING: Do not under any circumstances misuse this knowledge. There are powerfull beings who dis-like people who go out of their way to create misery for others. Besides, Jesus Christ does not like people who use it to acquire power. I myself only use it to help mankind and not to harm it in any way what so ever. Remember you will be dealt with severely!
(Refer to sheet on Karma at the end of this report. AF)

ADDED INFORMATION

31. It has been known that the Sonic Resonator gives off Ultraviolet Radiation, more so if soft iron core is used when constructing Electromagnet.

32. Since the Sonic Resonator gives off Ultraviolet Radiation, it thus becomes possible to travel in Zero Time because there is no resistance to Ultraviolet Radiation. Its all pervading!!!

33. Since the Sonic Resonator can be tuned to a specific year or time, it becomes necessary to know what Harmonics can be associated with each dial setting. (See below)

(1 to 8.4 = 144 x 0)
(8.4 to 16.8 = 144 x 20)
(16.8 to 25.2 = 144 x 30)
(25.2 to 33.6 = 144 x 50)
(33.6 to 42 = 144 x 80)
(42 to 50.4 = 144 x 130)
(50.4 to 58.8 = 144 x 210)
(58.8 to 67.2 = 144 x 340)
(67.2 to 75.6 = 144 x 550)
(75.6 to 84 = 144 x 890)

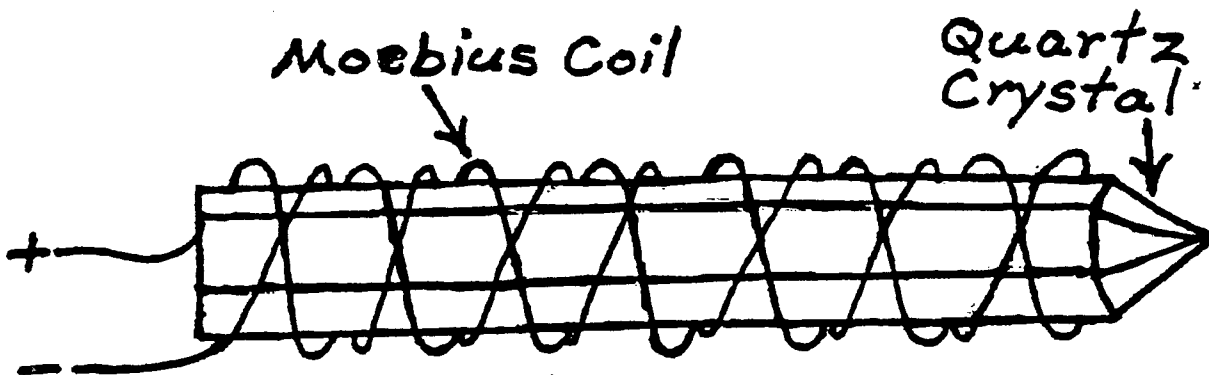

These dial settings can only be applied to a Radio Shack dial calibrated from 1 to 100. When these dials have been installed on a potentiometer, they can only be calibrated from 1 to 84 meters which would correspond with the chart up above.

To work out these equations is really quite simple. As for example, let's say you wish to find the Harmonic value of dial setting 1 to 8.4 meters. All you would have to do is multiply 144 (Harmonic of Light) x 1.618 this will give you the Harmonic value of 232.992. Dial setting 8.4 to 16.8 will give you the value of 465.984 because $144 \times 3.236 = 465.984$.

To arrive at the year 2000 A.D. you would probably have to set the dials somewhere inbetween 33.6 to 50.4. This is because the Harmonic number 2000 ly's within this range. This is only theory, but it is interesting none the less.

34. As mentioned earilier, Quartz Crystals can be used to amplify the dimensional effects of the Sonic Resonator. Not only that, but they can also be prograded to obey your commands. The best way to use Quartz crystals to create a dimensional cross-over, is to wrap a Moebius coil around it. This is then inserted into the circuit, probably somewhere inbetween the Diodes an Electromagnet. Down below gives a pretty good example of how to wrap the Moebius coil around the Crystal.

(QUARTZ CRYSTAL WITH MOEBIUS COIL WRAPPED)
(AROUND IT)

Crystal must not have
Any Flaws in it.

* MAY BE SHORTER
THAN XTAL PICTURED -

WARNING! The use of Quartz Crystals in this unit are extremely dangerous. If the Quartz Crystal is installed directly into this unit, the device can an will develop a mind of its own. This means that the unit will function on its own will and not yours. People who experiment in this area should be aware of the possible pitfalls. Remember! Quartz Crystals have a built in Consciousness or Elemental Spirit which can attack the user, so beware!!!

35. The safest way to determine wheather the Crystal is good or bad, is to run it through a PSIONIC ANALIZER. This is the safest way I know to prevent any sudden attacks.

(Note; Negative energy charges will usually be dispursed by setting such crystals in the sunlight a few hours....or in water to ground them...af)

36. When wrapping the Moebius coil around the Quartz Crystal, there should be 12 bumps on each side. These are where the wires over-lap one another. So in other words, there should be 24 bumps in all. Now the reason why there should be 12 bumps on both the top and bottom of crystal ly's is in the fact that $24 \times 60 \text{ Hz.} = 1440$. As mentioned earlier, 1440 is the Harmonic of the Speed of Light. By inserting a crystal and a Moebius Coil, we can lock onto Universal Harmonics thus creating a vortex and Zero Space activity.

37. When hooking up the Electromagnet to unit, use some electrode plugs and sockets. This way you can dis-connect the Electromagnet from the unit any time you want.

38. The device I made, uses a steel core for an Electromagnet, in other words the Magnet wire is wrapped around a steel core. The reason I did this was to insure that nothing bad would happen. Also instead of using a Samarian, I use ceramic magnets instead. This doesn't work as good, but for what I use it for, it does the job.

39. When constructing the Electromagnet you must use a highly heat resistant tape. The best place to obtain this tape is at a place where they work on or repair Electric motors. It is kind of a paper like tape which is shiny in appearance.

40. When you start to construct the Electromagnet, make sure that the soft iron is covered with this heat resistance so that the current cannot ark to the core. After you have finished wrapping the wire around it, use some more of this tape to keep the wire in place. Remember! this Electromagnet gets extremely hot.

41. The amount of Magnet Wire needed to construct the Electromagnet should be 400 feet in length. Use 21 gage magnet wire for this purpose.

42. If you want to be a little bit more fancy, you can install a handle on one end of the Electromagnet. Make sure that these handles are well insulated from your hands. You don't want to get shocked to death in case something went wrong.

43. All parts for Sonic Resonator can easily be obtained at your local Radio Shack Store. However the Electromagnet may be a problem to construct.

44. The Electromagnet on SONIC RESONATOR device represents the Cathode inside a Vacuum Tube. The Samarian Bar Magnet represents the Anode.

45. For multi-dimensional experiments, the gap space inbetween Electromagnet and Bar Magnet should equal ($\phi = 1.618$). For this purpose you should only use the metric system of measurement.

46. From what I know, there exists at least 5 different types of Grid point frequencys which surround the Earth. The frequencys which I give here have been calculated through mathimatics, but none the less, I believe they are extremly accurate. These frequencys are as follows: 60 Hz. c.p.s., 7.853975 Hz. c.p.s., 471.2385 Hz. c.p.s., 52.146025 Hz. c.p.s., and 295.61924 Hz. c.p.s.

47. Each of these Grid point frequencys can create a doorway leading into another dimension. Perhaps the 295.61924 Hz. frequency could make this possible, because it is the averaging frequency of the other four.

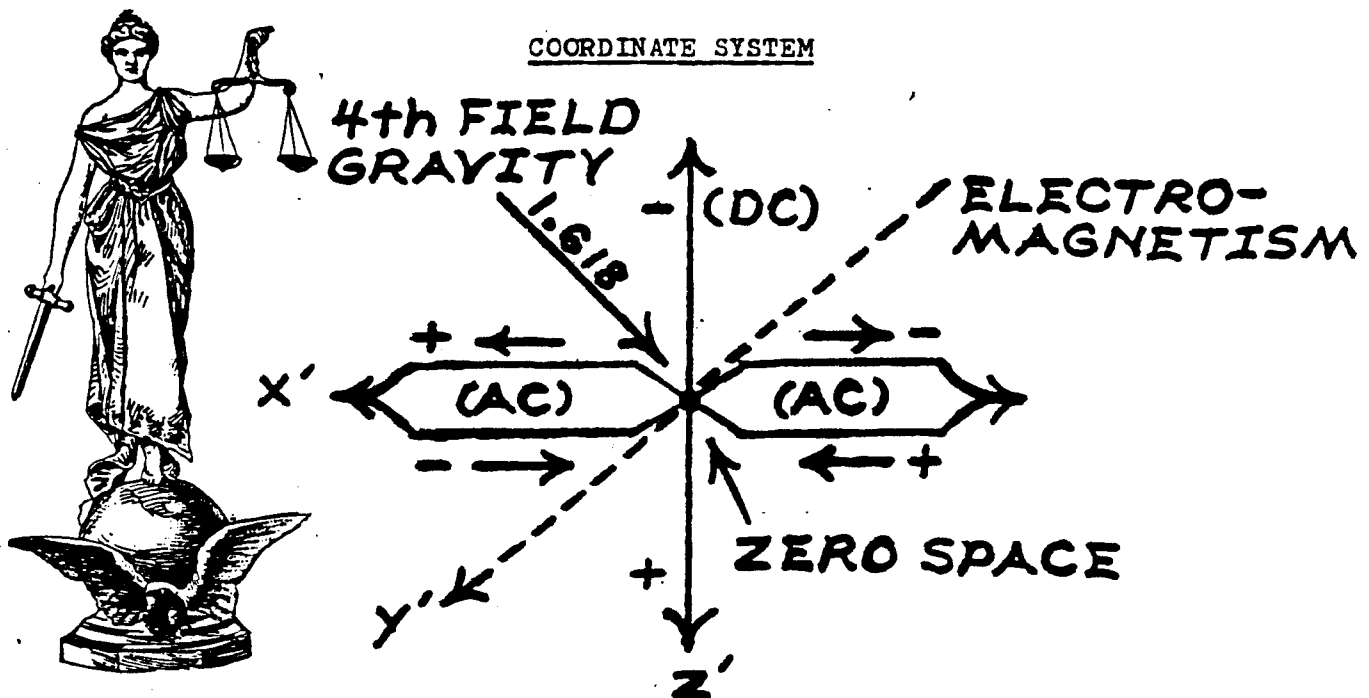

48. The use of the 7.8 Hz. frequency can be used for Spiritual Time Travel and Astral Projection.

49. After useing the Sonic Resonator in one experiment, I managed to travel Spiritually to the year ~~1924~~ A.D. I have seen the horrible fate which awaits mankind. There will be a vast military struggle during this time which will bring an end to mankind as we know it. I am not sure who wins battle. Perhaps nobody does.

50. By useing a 7.8 Hz. frequency, I also traveled backwards in time to the year 1924 A.D. However this experience was somewhat unusual. In other words, I landed in a different time sector which did not correspond at all to this particular time. But I did recognize a few people which did make me feel more at ease.

By Steven Gibbs

By reproduceing the Philadelphia Experiment on a simplified scale, I have discovered that the AC/DC current which is generated from the Sonic Resonator creates what could be termed as a vortex or doorway leading in- to another Time dimension. To explain how this occurs deals with the fact that whenever the AC an DC Polarity's come together within the Electro- magnet, a coordinate system composed of x, y, z, t, is created. In other words, AC is traveling in one direction, DC in another, and Electromagne- tism at right angles to that of the first ones. The 4th Field which is represented by Gravity or Time, is what varys the point of Zero Space which exists at the center of the x, y, z, coordinate system. (See below)

As we can see, the point of Zero Space exists at the center of the x, y, z, coordinate systems. This is the point where all things become, infinitely possible, even Time Travel. By varying the intensity of the 4th Field, we can also vary the intensity of Zero Space. Very few people knew about this, however Tesla and Einstein knew!!!

It now becomes apparent, that there are many ways to create this Zero Space Phenomenon. Most ways are so simple you wouldn't believe it. As for Tesla's Research, he also discovered that when High Frequency Static Electricity is applied acrossed a 2-D vortex screen, the point of Zero Space can be dramatically Amplified. →

Just think what would happen if High Frequency Static Electricity was used on the Sonic Resonator! WOW! Not only that! but if the Sonic Resonator was activated over a grid point, we would create a triple doorway leading into another time dimension!

To sum up this article, the Unified Principle which holds together the fabric of our Universe is PHI or 1.618. By examining the previous diagram we will find that Gravity is directly related to this number. It is interesting to note, that whenever the PHI value is used in constructing an object of any type, a time distortion occurs, either inside of the object or close to it. So there you have it, the theory behind AC/DC.

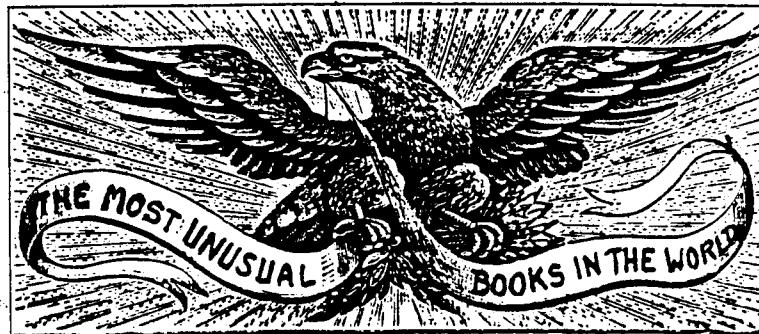

Steven Gibbs

Because time is only an element of this physical dimension of ours influences that come from realms beyond this dimension are confusing in their freedom from this limitation. Throughout history there have been persons who were able to escape time for a brief period through mental means, yet it has only been recently that the technology for doing so physically has been available.

The so called 'Philadelphia experiment' after WWII was the 1st physical step. The U S Navy space warped a destroyer escort ship from their naval yard to Norfolk Virginia & back again.

Since this experiment, the government has done it's research under high security and the public has heard little outside the concepts cranked out by futuristic movie makers. Many feel that the teleportation machines of 'Star Trek' & other video offerings are generally available & only being withheld from use by a system dependent on absolute control & financial gains. When teleportation can be strictly controlled it will be made available.

KARMIC PRINCIPLES... You can easily recognize working.... By Al Fry

To anyone who gives some deeper thought to all that is going on around us, it becomes pretty obvious that our Universe is not running by accident. Just one stray Atom out of control would create a gigantic junkpile. While there are obviously imperfections in our imperfect material world.. such as a genetic deformity here & there, it would be a discredit to our intelligence to believe there are no laws governing our world & actions. Under our creators law which governs actions concerning FREE CHOICE, there is a safeguard against unworkable DOMINATION actions. The ancients were well aware of this principle & called it KARMA.

Under Karmic law persons who take the free choice or rights of another by intent... against their inward sense of 'ethics', will suffer the same emotional experience in return. This engraves the experience in their components cellular memory banks until a strong knowledge or feeling against 'choice' violation is developed. Eventually, persons come to have a strong sense of 'wright' or 'wrong', by 1st hand experience. To persons who become observant, life no longer seems so chaotic & unordered. The constant disasters' that seem to crop up so frequently, can easily be recognized as little testing or learning situations. They may be for people or nations. On more mundane levels, bad check writers will suffer similar losses at a later date. Someone will cause them to feel what the experience feels like by cheating them. Persons who welch on agreements or fail to pay owed debts on purpose, will invariably experience a similar experience themselves... and usually in greater measure. All of the truly great spiritual leaders of the world pointed out that the things we demand of others, against their choice, we pay for ourselves. While this usually takes place in the physical, it is the emotional feeling that 'fixes' the experience in the memory banks. If you recognize your unethical action & intent toward another, you can actually erase negative Karma if you emotionally are repentant. The Christian 'Bible' touches upon this subject.

Persons who remain out of the Creators affection energy fields also reap automatic rewards of a negative nature. Persons who hate their neighbor can easily weaken their heart & poison themselves. Persons who ignore the inner promptings to choose their own natural & pleasurable life style, will continue to be miserable under the control & domination of others.

Since it is usual for the various Karmic visitations to carry over from the actions of other time periods, a person who blinded others might be born blind in a later body. Such carry over, is difficult to discern. Christ & other healers would often not heal persons who required more time to learn the lessons their problems taught. As we end a major time cycle, & go to a final time of CHOICE. Karma is speeded up. This allows slow learners to advance more quickly. A great influx of high level knowledge is covering the planet for those who will listen. The final end choice will be very simple.

From the time that our species 'ate of the fruit of knowledge' we have had components or 'Minds' that were no longer in the natural and perfect Animal 'instinct' flow. We were 'cursed' with free choice so that our inner components could learn control over our new multi component conditions and influences. In our drive back to perfection, we must either learn how to use our new components in a state of 'ethical' control, or we must lose such components & 'flunk' our little ten thousand year class & test. Karma is the system that assures us constant lessons for this final CHOICE..... "one jot or tittle shall in no wise pass from the law, till all be fulfilled" Matthew V:18

PARTS

Perf Board
50v Epoxy Diode
200v Epoxy Diode
.047K 50/100v Capacitor
Two 50K ohm Potentiometers
One Switch
Two Enclosed Phone Jacks
Two Phone Plugs to connect Electromagnet to unit
Two 12" inch long Phone Cords to help hook-up Electromagnet to unit
400 ft. of 21 gage Magnet Wire (The type used to construct Electric Motors)
Some Soft Iron preferably round in shape.
One Samarian Cobalt Magnet (Can be obtained through Edmund Scientific)
Some Special Heat resistant Tape (Type used to construct Electric Motors)
Extension Cord to hook circuit up to 110 VAC outlet
One Plastic Project Box (Preferably heat resistant)

CONSTRUCTION

To begin with, the Schematic of the Sonic Resonator is shown on page I. As you can see this is extremely simple to construct.

The Epoxy diodes and Capacitor should be mounted on a 2 by 3 inch Perf Board. All items should be spaced far enough away from one another, so that no electricity arcs across to other components. If this occurs you will probably blow a fuse.

*The Enclosed Phone Jacks are to be connected where the Capacitor hooks up to the circuit. This is so that the Phone Plugs which extend from the Electromagnet can be hooked up to the Enclosed Phone Jacks.

As for the Electromagnet, the Soft Iron rod should first be wrapped with Heat Resistant Tape. Also after the Magnet Wire has been wrapped around the core, you should also wrap some Heat resistant tape around the outer surface of the coils. The reason for this is because the Electromagnet becomes extremely Hot, and you will probably want to handle it.

After this has been accomplished, all you have left to do is to hook-up the Phone Cords to the 2 wires which extend from your Electromagnet. Be sure that these connections are insulated with heat resistant tape. Next, connect the Phone Plugs to the other end of the Phone Cords. These may be soldered into place if desired. Once this is done, your Electromagnet can now be hooked up to the Enclosed Phone Jacks which are already hooked up to the circuit.

All of the above items can easily be obtained at your local Radio Shack Store. However the Electromagnet may present a problem.

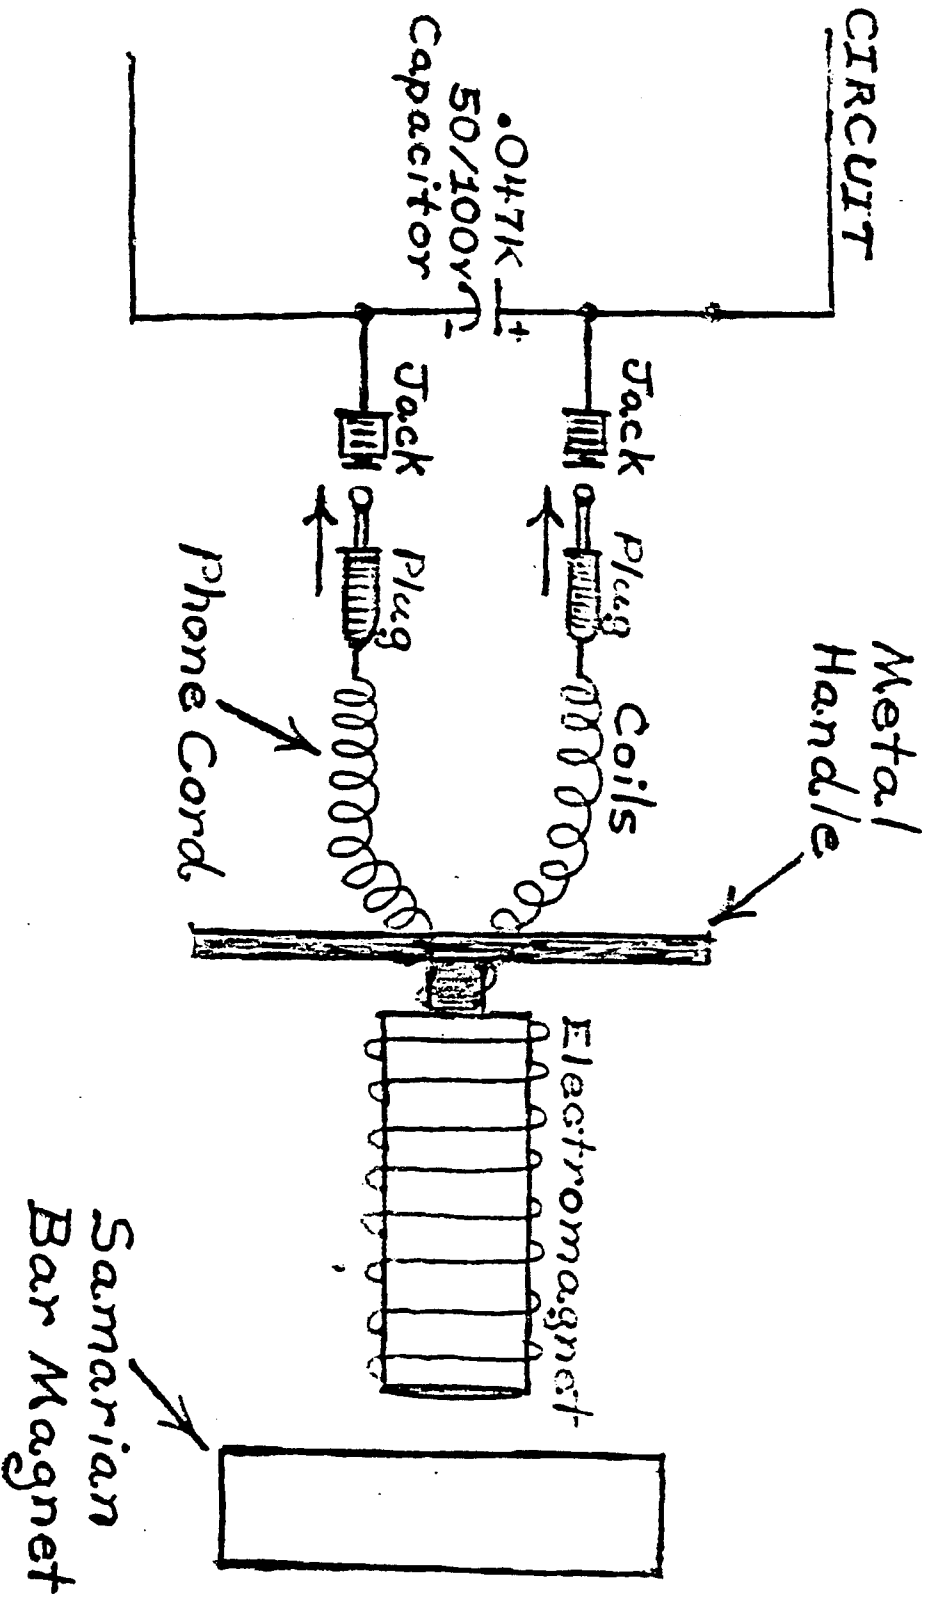

WARNING! Do not run your Electromagnet or Sonic Resonator for any longer 7 minutes at any given time, otherwise you risk burning up your coil.

*Note: Please examine Blueprint #I for a close-up view of connection points where the Electromagnet hooks up to circuit.

CLOSE-UP VIEW OF CONNECTIONS

12.12.5/85

Blueprint #1

SPIRITUAL TIME TRAVEL

Before Spiritual Time Travel can become possible, you must first place the Samarian Bar Magnet (Negative side down) over the 7th Chakra Point which is located right on top of the head. Next, place the Electromagnet over the Positive side of the bar magnet. Set dials at highest possible setting and activate the unit. If unit is activated for the space of one minute, you will have one out of the body experience, if unit is activated for two minutes, you will have two out of the body experiences etc, etc.,.

*Note: It isn't so difficult having an out of the body experience, it's getting back to your physical body that presents the problem. So my advice is, exercise extreme caution. Remember! the longer you expose yourself to these Gravitational Fields, the more difficult it will become for you to get back to your own physical body.

PHYSICAL TIME TRAVEL

To travel physically through time, you must activate the Sonic Resonator over a Positive or Negative Grid Point. I am not sure what the dial settings should be, and for this purpose I leave this choice to the operator. (Revert back to page 6 to learn how to find Grid Points) A friend of mine told me that he traveled 3 months or 3 years into the future by using this method. I am not sure if he was telling me the truth.

*Note: Grid points can only be activated on certain times of the day. I am not sure when these times are.

"Cycles Of Life" is helpful in this regard (\$12-Fry's) Astro Page #1 gives basic signs & is included here later.

INVISIBILITY

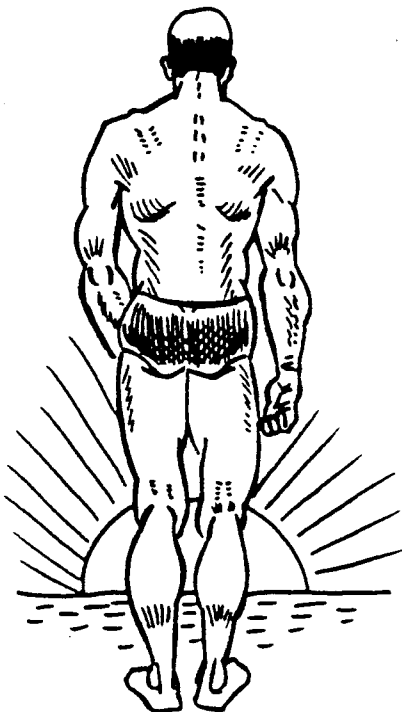

Invisibility can only be achieved by activating the Sonic Resonator over a Grid Point.

TELEPORTATION

Uses the same principle as for Physical Time Travel, but don't be surprised if you end up zapping yourself clear to China!!!

Both teleportation & levitation are covered in the book "STAR WARDS—WELCOME HOME EARTHPERMAN". This book came out briefly in 1979 and was a compilation of 25 years of channeling of data from extraterrestrials. In this work several identities claimed that it was not really any great problem to 'similarity transfer' or teleport to distant places if only ones own components were involved. They spoke of the Mind being only a converter for other energies to flow through, and of being able to easily set up mental shields of protection or 'force fields' around the body. Few deeper concepts on how this was done were available in the soon out of print book, but a couple of years later there were some concrete ideas on just how higher level energies could be moved around mentally. In 1981 the Modern Human Comprehension Course number 4 was finally released to eager students & the bombshell of knowledge in these areas exploded for those who got the course. It explained how material & immaterial atoms functioned & differed.... and could even be moved by mental energies. The catch was, that a person could easily go to far in ignorance & burn themselves up or 'blue flame' out unless they had high control of body components. This control was achieved by comprehending the 1st 3 Compo courses & putting the theories to action in life situations. (see MH data)

Of even greater significance, the Russians claim that the human mind, voice, and image together with everything they transmit are recorded in matter and in light & sound waves traveling in an endless continuum—forever. The Russian scientists are very near to being able to 'play back' every sound and image of the past via some sort of detection and amplification machine, we guess. The obvious advantage to researchers would be a rapid decline in murders and serious crimes, since we could immediately plug in to the 'cosmos' and find out who did it and why. Murder to silence people would no longer be very effective." [[Would like to give credit to the source, but no info is available; how about you, #631?? And thanks!—HL]]

Above and Beyond

BY GEORGE WE'VE FOUND IT!

OF TIME TRAVEL AND PSYCHOMETRY

by Marcotte Croft

Psychometry is the ability to pick up impressions about the history of an object and its owner by concentrating on it. It is thought that people have an emotional impression on the things they touch or the rooms they live in and that a psychic can tell if there has been an emotionally intense situation in a room, without having been told about it beforehand. He can just pick up the "vibrations" and describe what has happened there.

This is what the well-known psychic, Sybil Leek was able to do when she went to Stonehenge in England and reported "seeing" a young man being sacrificed by men and women in togas. The technique of psychometry could lead to the unravelling of the Stonehenge mystery which some say may have been the work

of a sub-Atlantic culture.

The Dutch clairvoyant, Croiset, is another well-known psychic who has used psychometry in order to help the police solve murders by "seeing" them happen, thus being able to describe the murderers.

There is a Canadian psychic living somewhere around Ontario who wants to remain anonymous and who often helps archaeologists find buried villages and explains what happens to them. His name is George. You could call him a time-machine or you could say that he has powerful talents in psychometry.

George has the ability to explore both the past and the future without going into a trance. He can see villages that existed up to 10,000 years ago and his experiences are so vivid that he is also aware of colors and temperatures and can com-

municate with the inhabitants of the past. He sometimes leaves suddenly, unwilling to express what gray thing happened in a particular spot. George shares the information he gains with Dr. Norman Emerson, an archaeologist and close friend.

According to the Canadian Magazine, Dr. Emerson presented George with some coins found on the bodies of two Indians returned near Orillia. With the coins were swears of long, black hair. George pinpointed the location of their burial spot within a few miles. And after handling the coins for awhile he made an astounding statement: "It's strange, but I keep seeing long, black hair." Neither of the Emersons, of course, had mentioned the hair.

George often helps archaeologists with their diggings, but refuses to receive

any payment for his services. He believes that if he did his powers would be lost so he uses them only for helping friends or aiding in our discovery of man's history. He says that his powers can only be used for good.

Just imagine what a boon it would be if there were more "Georges" in our society. Instead of reading drab history books, students could get a "live" demonstration of what life was really like through the ages. Lost civilizations, such as Atlantis, could be easily located along with buried pirate treasure. Writers and producers would have an excellent source of factual information. We need more Georges to open the long-locked doors to our past and show us where we've been so that we may draw up a feasible plan of where we should go from here. ©

Atlantean Inc April 18, 1980

I need not say more, however, to bring about changing of the Planck-Constant to higher-power multiples (dimensional-timing-principle) into a physical-translation of theory into practice it becomes imperative to have FUSION-GENERATORS to build-up the very-intense MAGNETIC-FORCE-FIELDS required for hyperspace starship travel: no fusion-generator, no starship propulsion-system, no alteration of frames of reference interdimensionally of the space-time coordinates: magnetics, rather, 2-magnetics the key in altering the frame of reference of space-time coordinates (the pea-brained Einstein never saw with his 'old-eyes' of 'perceiving' other x-realities: in fact, the H-book tells us that on the 4-space level, the 3-space frames of reference are infinite, etc).

New-astounding breakthroughs on the prime-arithmetic—have now around 312-pages and still going strong with it, maybe someday I will publish it in compendium-form after abstracting-out the core-material around which it is built.

TIME TRAVEL IS POSSIBLE!

Don't let modern science fool you. Bill Cox insists that time travel is within the realm of possibility and that within the last few years research into a seldom discussed energy known as "tachyon" has taken the academic community by surprise. Bill believes that residents of other realms find time travel an easy means of transportation and that mystics and holy men have accomplished similar feats of "bi-location." He even offers a fascinating theory which links together mysterious disappearances in the Bermuda Triangle and the black holes of space. In a down to earth manner, he also delves into research being done in the area of anti-gravity devices and the "Searl Levity Disk," a ten foot in diameter craft in the shape of a "saucer" which operates without fuel, and which supposedly has already traveled within a few miles of the moon. UFO REVIEW, 316 Fifth Avenue
New York, New York 10001

Eric Anderson, 28, of Quebec, Canada, recounted his recent unnerving experience to *Astrology & Psychic News*.

"I had been dropped out of the plane twice that day, and each time I felt something was wrong, something was out of kilter. I couldn't explain it and when I mentioned it to my girlfriend who was waiting for me on the ground, she, too, said she had an eerie feeling all morning.

"I planned to go up one more time and asked the pilot to go up higher, another 1,000 feet or so. I wanted more time in the air during the dive so I could see what was going on. In retrospect, I'm not so sure I should have asked him.

"As soon as I jumped I knew something was wrong. I blacked out for a second or two, but when I looked down at the ground — there was no ground. No earth, no buildings, no clouds — nothing. I thought I was dreaming. I looked up and couldn't see the plane, or the sun, or, if you can believe this, the sky.

"I saw a greyish-black haze all around me. I saw things move that are indescribable. I was falling very, very slowly as if I were in a dream; but I swear I was awake. I wasn't dreaming.

He Sees What No Other Has Seen"

"The shapes I saw seemed more like a bunch of thick ribbons flapping in the wind. Yet, there was a uniform shape to all of them. I say 'them' because they were alive. I had somehow fallen into another dimension.

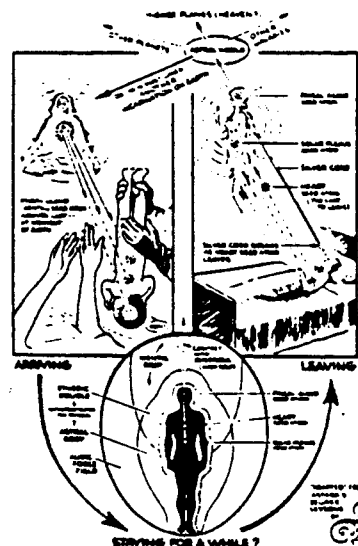

"I know it sounds like the Twilight Zone and if I hadn't experienced it I wouldn't believe it. In fact, as I retell the story I find it difficult to believe it actually happened to me.

"Then just as suddenly, I started falling at my normal speed and when I looked down, there was the ground, that big, beautiful ground. The shapes had disappeared, too, and I was glad of that. I had thought for a moment I might be trapped up there.

"I took off my parachute, grabbed my girl's arm and we were in the car and out of the area in minutes. I have since heard that other sky divers have had similar experiences, but I haven't been up since, and I'm not sure I want to."

Note; The temporary passing into and out of a time portal is described in the article on the left.

The case below describes what can happen to careless or very ignorant time travelers. If you Soul travel you can avoid this by setting an alarm clock to jangle you back in 15 minutes or so. You can also get assistance from the so called Astral 'guides'. Challenge them however to find out if they are of the reflection or dominion system. You can only depend on those of the FREE or with allegiance to the 'light behind the light'. Most are of dominion... and will either admit it or leave....

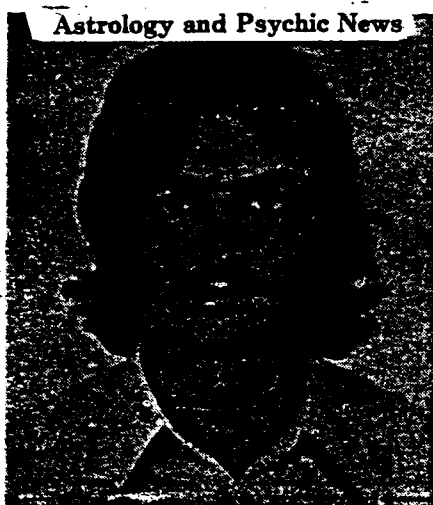

Fry

Connie Westlake's spirit has reunited with late boyfriend's spirit.

A story of tragic proportions comes out of Kansas City, Missouri. Connie Westlake, 18, a student at a local junior college, lapsed into a coma 14 months ago after experimenting with astral travel.

A companion, Lionel Benton, was with the coed at the time, and he sadly recounted

Astrology and Psychic News

the story to *Astrology & Psychic News*.

"It was late at night, and Connie, who believed in psychic phenomena, concentrated on being in another place. She wouldn't tell me where it was or who she wanted to see, but I have an idea it was an old boyfriend who had died in Vietnam.

She had talked about him often. They had been engaged at the time of his death.

"After about 15 minutes of very intense concentration, her body suddenly relaxed and she fell over in a heap. I tried to revive her but she had the funniest look on her face. I knew something was terribly wrong.

"I called the medics but they didn't have any luck, either. That was 14 months ago. She is taken care of by her parents now. She can move around the house but she hasn't spoken a word since that night. Frankly, I don't think she's there. I mean, her body is staying at her parent's home, but her spirit, I believe, found her old lover. It could be that they are living in another dimension, in another life. But I don't believe she'll ever come back."

Various experts in astral travel have visited with the girl, and there is a disparity of opinion about what actually happened to her. The consensus, however, does appear to reinforce Mr. Benton's theory that Connie Westlake's spirit did reunite with her late boyfriend. Somehow, her spirit has broken through the barrier of life death, and she did, indeed, find her lo.

Talking With The Past. Psychotronic Systems By Richard L. Clark Ph. D.

In the research of Friedrich Jugenon, the recording of past human conversations in white noise systems has been accomplished. Some later research in this area has actually recorded two way conversations with individuals who were physically dead. The time limit of these recordings-recovery systems appears to be 100 yrs ago to the present. The recording method is basically a simple crystal radio input into a high speed tape recorder. The questions are often asked aloud & in the silence to follow the recorder is operated at top recording speed. Using an extremely slow playback mode, the 'voices' can be detected in the recorded 'white noise' of the answer silence period. The questions can be asked of any person dead for a length of about one hundred years.

The living human voice of the questioner must pass through the electromagnetic field (C), the virtual photon field (C2) & the virtual neutrino field (C3) to reach the mind energy field itself. The answers then slow down through the same fields to be recorded in the here & now instant. Interestingly, if we set C-1 and use the exponents as octaves, then C2-10 & C-100, and we match the 100 yr penetration span or range of the system C (the speed of light) then would have a year of value in this system & matches the standing wave points on our revolution around the sun as a unitary measure.

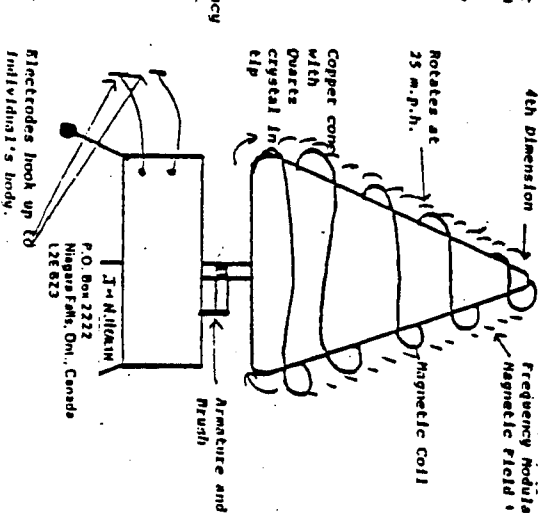

The current problem in detecting or hearing the recorded answers can be solved by the knowledge that the returning answers, like all psychotronic signals, has been doubly differentiated in the boundary transitions. This means we have recorded very sharp spikes & NOT the approximate sine wave of normal conversations. Therefore, the playing of the recorded reply and white noise background or carrier must be double integrated and restored to longer smoother waveforms of normal voice communications. The optional addition of frequency cutoff filters eliminated most of the background white noise or 'hiss', but passes the voice data easily if properly selected. With such equipment, light can be shed on the historical hoaxes of the century & Murder victims could identify their killers. These later psychotronic devices are all later developments based on the original discoveries of Nikola Tesla.

Persons wishing to build such units as described here may find exact details in the book "How To Build a Lie Detector, Brain Wave Monitor & Other Secret Parapsychological Electronics Projects" \$12.95 + p&g. (Fry's, 22311 Marham, Perris, CA.

Time travel has long been thought of as being utterly impossible until just recently. Articles and articles have been written on the subject, but no one seems to know what they are talking about. The purpose of this article is to separate the truth from the facts, or to say it more bluntly, to know the ultimate in knowledge.

In the past couple of years I have done considerable research on the Bermuda Triangle area, and have discovered that there exists a time vortex within this area. Research has shown that the reason for this occurrence may be caused by some element or group of elements being exposed to some sort of high frequency magnetism. The elements which I believe to exist in the Bermuda Triangle area are Strontium, Barium, Thallium, Mercury, Silicon, and Sulfuric Acid. Whether these elements are in some sort of crystal or not is besides the point. The biggest concern is what type of magnetic frequency does it take when applied across these elements to activate the time travel mode or 4th dimension. I think the answer may lie in the green portion of the magneto spectrum. Now the reason why I have mentioned the green portion of the magneto spectrum lies in the fact that the ships that have sailed across this area have reported seeing a mysterious greenish fog which I believe is distinctly caused by high frequency magnetism. These frequencies may very well lie somewhere in the cosmic portion of the magneto spectrum.

When constructing a time travel unit, there are three things that a person must use before it can ever be achieved, and these are magnetic frequencies, elements, and a properly pulsed current which is to be transmitted through the elements on into the individual's body. This is to accelerate or slow down the pulse rate of the individual's aura.

Peter: I don't know. I don't know what happened. What happens to anybody who is contacted by a UFO or those who have sightings or are directly touched by them.

Doc: Did they take any samples from your body?
Peter: My tears, my sinuses, brain readings, finger nails, blood samples, heart.

Doc: They took everything?
Peter: Not everything.

Dr. Carl Van Vliet told the Dicksons on the tape that this hypnotic session ended here. There was another one later in which he had the opportunity to ask Peter a few more questions himself.
Van: Was the policeman you saw at the side of the road a real policeman or a metallic clad form?

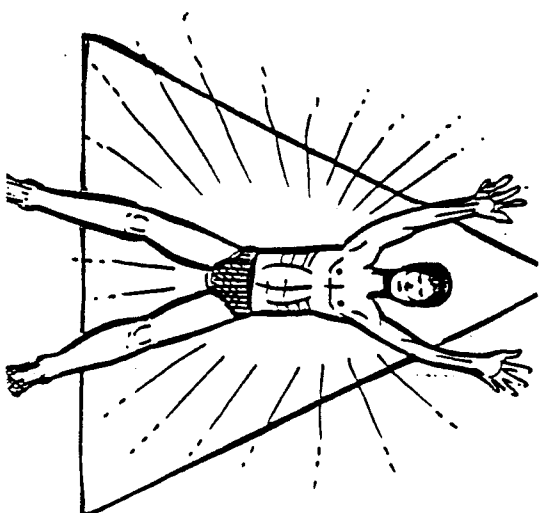

Peter: It was an initial monitor.

Van: (To the Dicksons) It appears that this robot was the initial monitor which picked them up on the road and sent the message that they had actually arrived, because, from that moment things started to happen to them, their car lights faded, etc. Bus loads of Africans behind them on the road were scared out of their wits. The buses stopped and all the Africans took their belongings, ran into the void and disappeared. These flying Saucers were too much for them to take and they were just gone.

Asked about propulsion Peter replied that they were able to use a method of translocation from point to point, or from one to another in space. Disintegration from one point and reconstruction at another point, with lapse of NO TIME. Asked if Magnetic Fields came into this, Peter replied that this was the case.

* * *

Materialization and Dematerialization -- Hat and Demat -- as a form of Saucer propulsion was suggested by Associate Ed Schultz to Heede Layne our founder-director in the early 1950s. By mental power primarily, the body of the spaceship and all that is in it is caused to go up and down the scale of tangibility, and in this mode a change of vibration is a change of location! So Space-Time warps, as experienced by Peter and Frances, are a new, radical, cheap source of power which would relegate electricity and petroleum to second-class status in civilized countries of the earth. If you want to struggle through the understanding of this concept read Heede Layne's pioneering efforts in "The Coming of the Guardians", 90 pages, illustrated, \$9.00 (BSRF No. 3), in "The Ether Ship (Flying Saucer) Mystery and its Solution", \$9.50 (BSRF No. 4), and "The Ether of Space", \$150 (BSRF No. 5).

By the Late Ralph M. Holland
From "Colliers"

One night in June 1950 an oddly dressed man was seen in Times Square in New York City -- which eventually led to the most baffling mystery in the history of the New York Police Department.

Captain Hubert V. Rilm was in the Missing Persons Bureau at the time, and took an active part in the investigation. He is now retired and, since he does not have the records of the case in his possession, could not quote exact dates and addresses in all instances. He did, however, remember the main details. It was somewhere near the middle of the month, about 11:15 p.m., right at the height of the after theatre traffic rush.

The man appeared to be about 30 years of age. His most noticeable feature, aside from his clothing, was a luxuriant set of mul-ton-chop whiskers, which went out of style many years ago. He wore a high silk hat, a cutaway coat with cloth covered buttons at the back, and a high cut vest with lapels. The trousers were black and white checked material, rather tight, without cuffs and pressed without a crease. He wore high button shoes.

No one saw him walk out into the street. Witnesses first noticed him standing in the middle of the intersection "gawking" at the signs as if he'd never seen an electric sign before. Then he seemed to become aware of the traffic and began to make frantic movements to dodge it. The police officer at the corner saw him, and started out to lead him to safety. Before he could reach him, the man made a sudden dash for the curb. A taxicab hit him, and he was dead when they picked him up.

The attendants at the morgue took the whiskers and the clothing in their stride. One meets some odd characters during 20 or 30 years on the force, some of them much odder than he. When they began to search his pockets, their brows began to wrinkle. "One brass slug, good for one 5¢ beer." The name of the saloon was unfamiliar even to the old timers. "One bill from a livery stable on Lexington Ave.; to the feeding and stabling of one horse, and the washing of one cartilage \$3.00." The name of the stable did not appear in the directory. "About \$70 in currency, all old style notes, and including two gold certificates." Cards bearing the name "Rudolph Fentz" and an address on Fifth Ave., with a letter to the same name and address, postmarked in Philadelphia June 1876. "None of the items showed any signs of age."

The Fifth Ave. address was a store. So far as the present occupants knew, it had always been a store. None of them had ever heard of "Rudolph Fentz". The name did not appear in the directory. A finger print check, both in New York and Washington brought no results. No one ever called, or made enquiries at the morgue. Capt. Rilm continued to investigate the case. He checked back thru old phone books, looking for the name "Fentz". Finally, in the 1939 directory, he found a "Rudolph Fentz, Jr." with an uptown apartment address. They remembered Fentz at the apartment; a man in his 60s, who worked at a nearby bank. He had retired in 1940 and moved away. They had not heard from him since.

At the bank, Rilm learned that Fentz had died about 5 years before, but that his widow was still alive in Florida. In reply to Rilm's letter, she said that her husband's father had mysteriously disappeared sometime during the spring of 1876. It seems that here, Fentz, Sr. didn't like to have him smoke in the house. She thought it smelled up the curtains. So it had been his custom to go out for a walk every evening about 10 and enjoy a final cigar before retiring. One night he went out as usual and never returned. The family spent quite a bit of money trying to find him but he was never seen or heard of again.

Capt. Rilm found Rudolph Fentz listed in the "Missing Persons" file for 1876. The address given was the same as that appearing on the cards and letters, so the place was evidently a private residence at that time. He was 29 years of age, and wore mul-ton chop whiskers. The description of the clothing which he was wearing when last seen agreed exactly with that worn by the mysterious traffic victim. The case was still listed as "unsolved".

NOT THIN AIR BUT A FOURTH DIMENSIONAL PORTAL!

From Holland's "A Voice In The Gallery" No. 4, 1953 until March 1969 we had to wait for the occult explanation of the Fentz disappearance and reappearance. Marian Hartill was the channel, Hyron the communicating teacher.

"I see you wish information as to what exactly happens when humans suddenly disappear from the Earth without a trace being found of remains. This is a very common occurrence, more common than is ever accepted; for in this day and age family ties are not as they once were and people travel far and wide.

"Picture if you will two large spheres or balls one within the other, the inner smaller being the 3rd Dimension, and the larger outer sphere being the 4th Dimension. Now imagine that both of them were nothing to do but accept the fact of the attraction and ship him back to his outfit, a 9,000 mile journey which he had previously made in the time "It takes a cock to crow".

ETHERIC "NO-MAN'S-LAND"

"There is a very real no-man's-land between the two Dimensions," continued Hyron, "and if one were truly clairvoyant they would see right through these revolving holes as they turn. This is one of the reasons people claim to see events of the past played before their eyes only to quickly fade in a few minutes; for the two spheres have turned so as to close the openings where the scene was being re-played on the spirit side by Earthbound entities.

"What happens to the bodies? Of these unlucky beings who vanish? They die, or wander in shock, growing weaker and weaker. This enveloping fog-like vapor takes care of the tissue and bone unless negative scavengers have found it first and use its life forces for their own purposes.

"We have seen strongly religious people stumble into these openings, and we find that their auroic-field takes on a radiant protective shell that while it does not solve their dilemma it does attract spiritual workers who are able to ease their panic, and they are protected from the dark forces that would vampirize them.

"There are spots all over the Earth where these holes align themselves with regularly (in the Bermuda Triangle for instance?). Many are in thinly populated areas or over your vast ocean stretches. This accounts for ships often sailing right through one hole and out another, while the crews are never found; for often they are seized with complete panic and jump off the ship into the vacuum while if they had stayed with the ship they would perhaps have sailed out another hole back onto the 3-D surface. The time elapses could be minutes or weeks, depending on how long it took for another hole to align itself with their position.

"Atmospheric changes are causing the space between these two spheres to be push-pulled. This causes uncanny events to happen all over the surface of the Earth. There is a kind of a suction or pull when two holes become lined up. Now, as never before, hold tight to that Lantern within which contains the protective CHRIST LIGHT."

Well, students of the Mysteries, here's another working hypothesis to explain teleportation! The 3-D-4-D Portals and their random effects. If we are going to use it to explain Rudolph Fentz's disappearance in New York City in 1876, and reappearance there in 1950, we are going to have to stretch it beyond Hyron's outlining; for Fentz showed no loss of vitality or youth in 74 years of earth time while parked in the 4th Dimension!

Another Voice From The Gallery is Vincent Gaddie, BSR associate and author of "Invisible Horizons". Vince and his wife Margaret have collaborated on another excellent borderland book, "The Strange World of Animals and Pets". We have this choice item from them to May-June 1972 RA, Page 18 BSRG BOX 541, MESA, AZ FRY'S

ISSUE 460-May/June, 1985 THE LARSEN FILE/CRYSTAL BALL ^{Page 1}
[ENERGY GRIDS, contd.] ^{Page 2}

Davidic forces use these positively cokey energies to run the planet, and animal life of our world via Kingdoms of Fire, Earth, Air, and Water. But when the five elementals get grubby ethers to work with, we get droughts and volcanoes. Earth elementals turn tacky etheric energies into earthquakes, and Air and Water splits manifest these mangled energies to the objective world as tornados, hurricanes, and windstorms.

Up till now, we have been asked to counter these negative energies by thinking good thoughts, and radiate love into the etheric surround. And such acts have greatly reduced what the press calls catastrophe or acts of God.

But now, meditating and thinking good thoughts into the air is not enough. Gathering karmic forces that almost certainly must result in sweeping earthquakes need much stronger metaphysical "first aid".

And such first aid must come from the same (same?) enlightened and capable ones---but this time the corrective thinking must take place right on earth energy lines. Meditating right on etheric lines is like getting a shot of energy-and-stemline producing vitamin B₁₂. Meditating willy-nilly would be like giving earth a pep talk as opposed to a "pep (Vit. B₁₂) shot".

Be you starchy or earth critter, you need to know how to find etheric lines and grids before you can gather on them and call down and anchor finer, stabilizing forces directly into the etheric body of mother Earth.

Dear hearts, you find these lines by dowsing for them. I am confident new age will these lines by dowsing for them because they are conduits of lots of energy due to high vibes inherent in their thought processes. Another reason I am certain new agers can "dows out" (find by dowsing) etheric lines is that I've taught hundreds to do precisely that---through the mail and by phone.

All there is to it, is to get 2 wire coat hangers. Hold them in front of you by the bottom till them down, away from you to keep them from swaying around a lot.

Then breathe normally and walk slowly, slowly in a straight line. Do this about 10 times to get used to the wire hangers. The idea is to infuse your personal magnetism into the coat hangers. Anyway, practice walking a dozen or so times with the hangers.

At first, they will move towards each other a little, then more and more with practice.

It's best to try in the morning or when your energy level is high. Kids are full of zip, and they often succeed right off. So try with a high

energy level for best results. Try rubbing and breathing on the wire coat hangers; it helps.

So, after you get the wire hangers to "close", you should mark the places where they close (I use a deck of cards).

When you mark enough places on the ground, you'll see a rectangle like the illustration form.

These lines are inside, outside, upstairs, downstairs---all over. And the "long" of the rectangles are always oriented to magnetic north. The lines themselves are about a foot wide.

Once you find the lines and plot out the grids, notice where they cross. These are the darkened intersections in the illustration above. And it's precisely on these intersections that we should be when we generate benedictions for our troubled little planet.

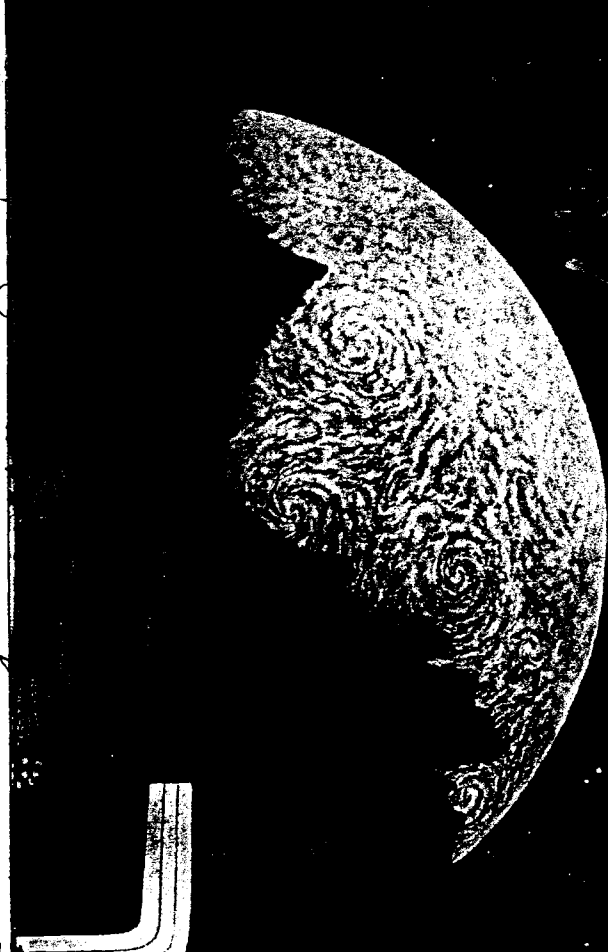

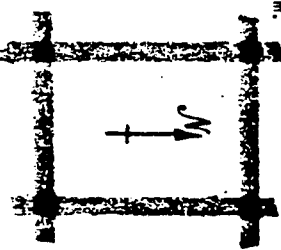

These grid or rectangle intersections are many times more powerful than quartz crystals in that you can generate elements on them. They are not for flooding around. (Remember that---H.L.)

Historical note: practitioners of wicca used similar lines of force to empower spells, the vestiges of which are known as Ley Lines. The subtle energies coursing through these lines you find by dowsing get most energy during the solstices and equinoxes. Full moon time is relatively high energy time, too.

Aquarian High Magic is practiced on Ley Lines by the Fountain People of Brighton, England, with impressive results. They are healing the world slowly just as an acupuncturist heals pain.

So if you are in the biz of wielding light forces, anchoring light, establishing anchors, or creating voice-cords of energies of a high karmic and enduring order, I urge you to join the growing numbers of us who daily use these mini-Ley Lines to do neat things for planet Earth.

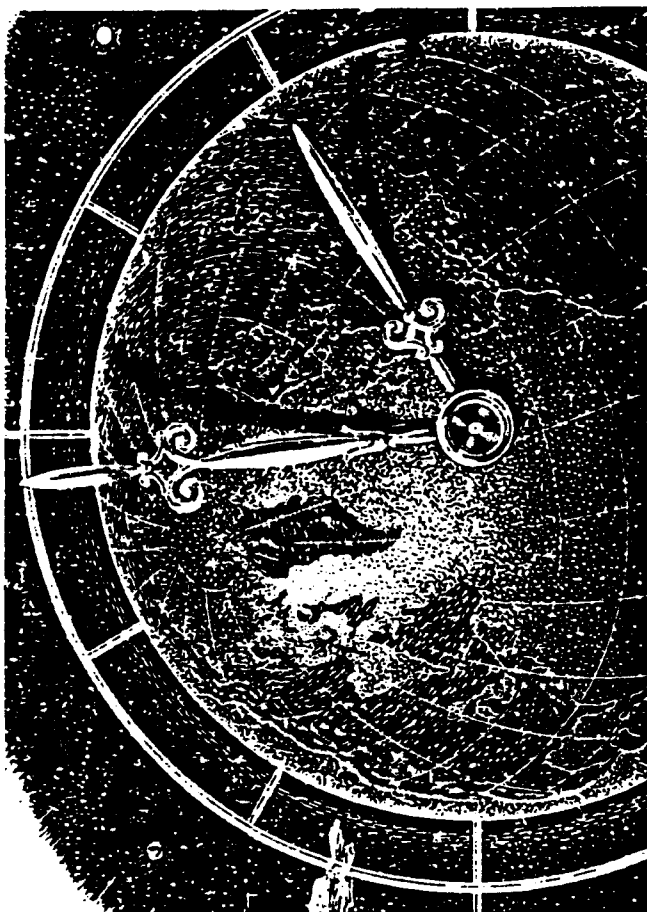

Oh yes, not to forget: These grids measure about 5 x 8 feet. Some places smaller, some places bigger.

Locating the Grid or Ley Lines and intersecting points to operate Time Travel machines from is reasonably easy with a dowsing instrument. The instruments can be of most any type but the 'L' wands are especially effective and simple to make up. Just get some heavy wire and bend it in an 'L' shape with about 18 inches for the pointer and 5 inches for the handle. The handles can have a thicker wood dowel over the wire if desirable. Just bore a hole in the wood. It is sometimes helpful to attach a little quartz or Calcite crystal to the points of these two rods to boost the sensitivity. To use the devices simply put out a mental order to have the rods activate and cross when you walk up to a ley line or power point. The rods will cross when you come upon such a power line and by following such lines, you can eventually locate the point where two such lines meet. It is at such intersections that you can set up the Time Travel devices. The power grids run all across the planet and by following such grids you can even come upon the power spots that link up with other planets. Certain types of UFO's use energy grid lines between planets to get a free ride between planets. These lines between planets are not in a straight line but are a band that is circular...around the planet. A subject diagrammed & covered in Glasers Modern Human Comp text#4. For

tion water purifier, even for cooking.

FANTASTIC JOURNEYS

JOURNEY FROM THE BEGINNING TO THE END OF TIME

□ When H.G. Wells, in *The Time Machine*, introduced the notion that time is a dimension akin to length, width and depth, the scientific community didn't take him very seriously until, two decades later, Einstein made the "fourth dimension" an essential part of his concept of the universe. The real life goal of scientists then was to journey from the beginning to the end of time. When that goal was achieved in the 1970's science had taken its most fantastic journey.

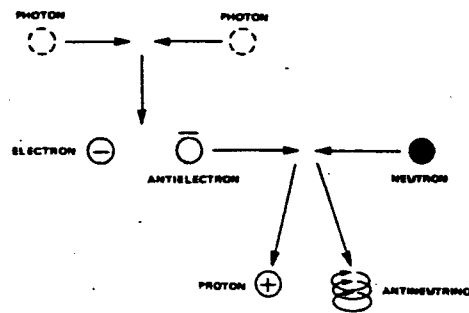

Einstein's theory predicted a universe in which galaxies are flying apart from one another—an expanding universe. But when it was first proposed, astronomers could observe only a universe at seeming rest. Einstein actually thought he had blundered, and changed his theory to conform with known "facts." Years later, other scientists proved Einstein had been right in the first place.

Scientific time travelers were on track again and, in 1948, George Gamov initiated the Big Bang theory of creation. This theory assumed a *changeless* primordial

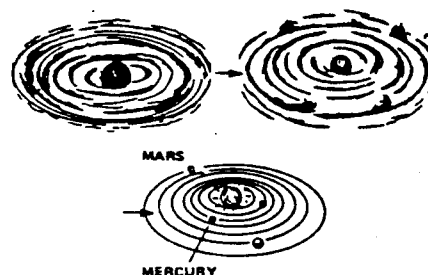

neutron glob. No change also meant there could be no time, hence time began only at the moment of the Bang.

The Big Bang theory won out over an opposing Steady State theory after there was clear evidence of a fantastic primordial explosion. Gamov had argued that an "echo" of the explosion still exists, but this idea was substantiated only after development of equipment able to detect micro-

IN THE FIRST ONE MILLIONTH SECOND OF CREATION, COLLISIONS OF ELEMENTARY PARTICLES PRODUCED NEW PARTICLES.

BUT THE NEW PARTICLES COLLIDED TO REPRODUCE THE ORIGINAL PARTICLES.

THE EDDIES IN THE GALACTIC CLOUD CONDENSED TO FORM THE SUN AND PLANETS.

In the journey back to the beginning of time, scientists theorize that in the first millionth of a second after the "big bang," photons collided to form electrons and antielectrons, which collided with neutrons to form protons and antineutrons, top drawing. More complex elements formed until, 200 million years later, stars began to form. Bottom drawing shows how the solar system may have formed out of a condensing galactic cloud of gas.

wave energy. When that happened, a most remarkable scenario ensued.

During the first *one-millionth of a second* that the universe existed, following the big explosion, all manner of particles collided to form other particles. But being packed tightly together, they quickly recombined to their original forms.

However, this reversal of creation could not go on for long. At the end of *1 second* there was so much space between particles that protons in particular no longer recombined.

At the end of *3 minutes*, the universe had expanded vastly and, being a gas, cooled as it expanded. The cooler particles now began "sticking" to each other to form deuter-

1980

(Continued on page 131)

ANNIVERSARY ISSUE

One little know phase of Wilhelm Reichs work on Orgone energy was his contribution in the form of a secret weather modification device. Millions remember the so called weather monitoring balloons that were so prevelant a few years ago. These were weather monitors in every respect..except that they broadcast at a frequency that toned down the intesity of storms. Reich presented his DOR busting device to the government in the mid 40's and they found the thing actually worked. The transmitter broadcast at 403 mega hertz for up to around 100 miles. Later the occillator was set for 1680 mega hertz. While the device seemed weak the affect actually equaled a much larger 250 watt transmitter. These units had mumidity sensors which were small plastic plates with a unique chemical mixture on them ..and an antenna that attracted orgone and irradiated DOR (refer to Reich background) It was this early pulse & cycle transmission work that later led to the Phoenix experiments on mind control. The Reich techniques were pretty much replaced by more sphisticated approaches later. Once the technique of starting the machines off with a zero point reference point safety factor or stabalization key was used, Time Travel was simple. Huge half gigowatte machinery could generate time warp vortex large enough for whole cars to be sent off in. Humans or objects would be sent off into the past or fuure with little hazard. Being monitored, the subjects could be pulled back the moment any dangers threatened. The 1st technitians and travelers were tested by sending them to an abandoned city of 6030. There was a large gold horse in the center of this city and the travelers were quired later as to the physical aspects of the horse and surrounding area. Sharp clear views of the future ended at around the year 2012 and slightly less tangible realities were in place up to ten thousand years in the future. Since what we percieve as time does not exist in hyperspace, the future hopping events would take place and many times there would seem to be no time elapse upon return. The ending of the Poenix projects evidently came about when huge mental consructs got loose and would not remain under control. It is speculated that some persons involved deliberately sabbataged the project in '83' by constructing such a 'monster'. It went about ripping things apart a scaring project personell. It looked like a large big foot moster 25 or 30 ft high.

As the Elderige generators were cut off (Very much like the scenario in The Phil.Exp. movie) The monster in the Phoenix experiment,,40 years in the future,faded away and the machinery was shut off for good...or at least that is the story of several 1st person scientists & personnel...who later retrieved their memory of these events.

One intersting spin off of these experiments was the Age Regression techniques. Tesla evidently came up with the concept. By pushing a person 20 years back or forward, the age was automatically altered accordingly. Another sheet on Time Travel Data gives some further background on the equipment involved. One of the few things that apparently proved a real danger in going forward in time, was in vearing off on one of the side shoots in the tunnel or vortex that was generated. While the vortex would wind and twist a little, the main passage was obvious and would lead to the programmed time and place. If one of the smaller side passages was used it seemed to lead to problems....

Persons who set up and construct Time Travel devices that do not use the huge energy loads put into the grid-vortex areas of these higher funded experiments, must rely more on inner guidance for safety. Any time there is an inner feeling of 'something is not right', it is imparative defense measures-or a return be acted on quickly. The Soul and other body components can set up various time & control factors equal to the best computers, the trick is to get the necessary balance and cooperation. Such balance is not easy to explain, but is detailed in A.B.Glasers Modern Humans texts. Outside tamper from entities can sometimes occur and this can easily be handled by knowing your rights under free choice law..Our Psychic Self Defense reports give a detailed background on this....

Since the vortex created by two grid lines coming together is necessary for most types of T.T. it is necessary to learn to locate such spots with a dowsing device or pendulum. This dowsing data can be found in a number of dowsing books or our \$5 Dowsing report. In dowsing or any other extra censory ability, the trick is in programing your mind components with specific data or requests. If you think of your body-minds construct as a very sophisticated computer it might help. You can't just program in sloppy requests. You need exacting details. "I request a trip to the year 1998 IF it is not a danger to me or my body & I request a safe return with a full memory pattern etc etc"

DOUBLE-TWO—plague by a jealous partner.

TWO-ONE—you will mortgage or pledge some property very soon.

DOUBLE-ONE—you will soon find something to your advantage in the street or road.

DOUBLE-BLANK—the worst presage in all the set of dominoes; you will soon have trouble from a quarter you little expect.

It is useless to draw more than three dominoes at one time, or in the same month, as they will deceive yourself; shuffle the dominoes each time of choosing; to draw a domino twice makes the answer stronger.

FORTUNATE DAYS, WEEKS, MONTHS, AND YEARS.

THE day of the week in which you were born, is the best; it is lucky to receive a letter on the third, fifth, or ninth of the month, or on a Tuesday or Saturday. The first week in May is fortunate for a new undertaking to men; the second to women. June is a good month, in which to contract, or receive promise of marriage, as it generally prospers.

It has often been recorded, and experience has shown it to be true, that some event of importance is sure to happen to a woman in her thirty-first year, whether single or married; it may prove for her good, or it may be some great evil or temptation; therefore, let her be cautious and circumspect in all her actions. If she is a maiden or a widow, it is probable that she marries this year. And so with men in their forty-second year; observe always, to grant or take a lease for an odd number of years; even are not prosperous. The three first days of

the moon, are the best for signing papers; and the first five days, and the twenty-fourth, for any fresh undertaking. But it must be allowed that people's industry and perseverance often overcome a bad planet, or a day marked unlucky in the book of fate.

Mondays, Wednesdays, and Fridays, are the best for men; Tuesdays, Thursdays, and Saturdays, for women. To travel by land, choose the increase of the moon, the decrease for a voyage; and about the full to write letters in which you ask a favour; to beg wafers is not lucky on this occasion. It is not good to marry on your birth-day, for a woman, but it is fortunate for a man; it is good to christen a child on the day of the week in which it was born. It is fortunate to be born on a Sunday.

TRADITIONAL OBSERVATIONS.

It is not good for a maiden to marry in colours, or a widow in white; yet let her avoid green or yellow, and the thirteenth of the month.

To see a flight of birds as you go to the church on your nuptial day, foretells many children.

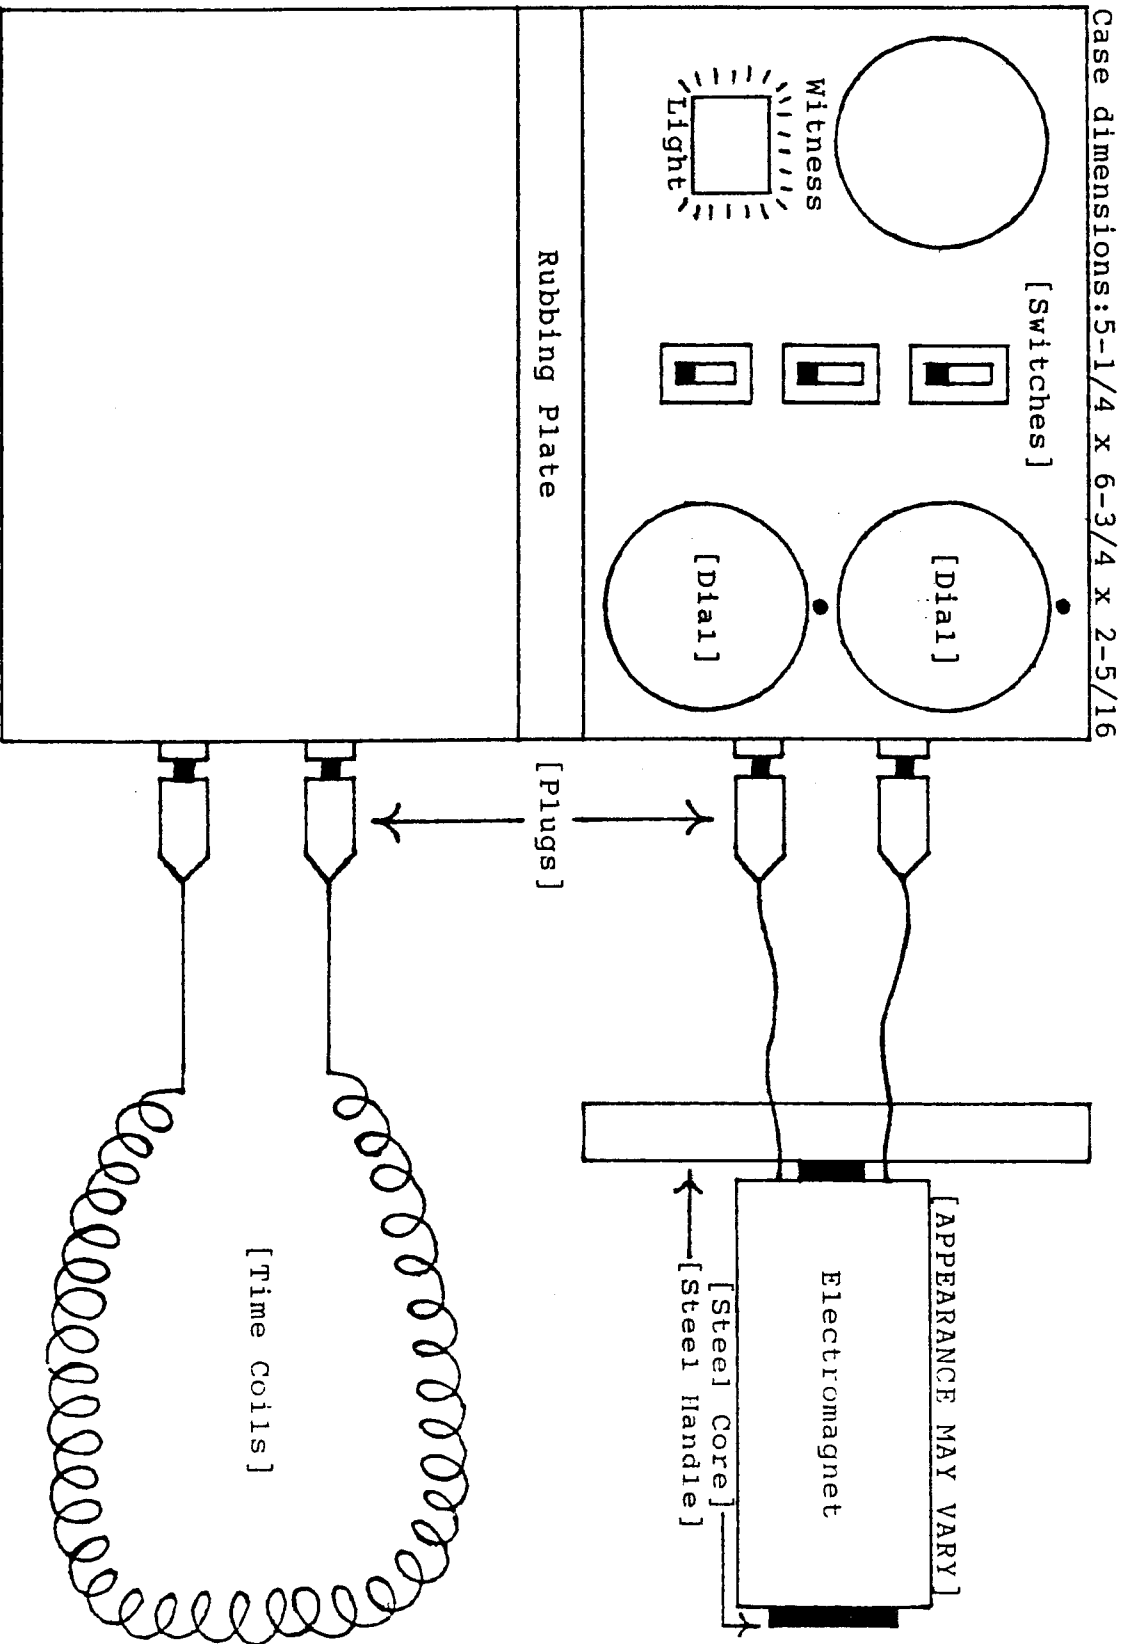

To meet a funeral is ominous at the time of speedy separation.

The sun to emerge suddenly from a cloud, and shine on the altar as the nuptials are celebrating, denotes prosperity and connubial love.

It is unlucky to pick up an odd glove in the street; you had better pass it.

Never tell a dream till you have broken your fast; if you have the same dream repeated twice or thrice, attend to it, it must have more than a common meaning.

THE HYPER DIMENSIONAL RESONATOR

THIS HERE IS A TWO DIAL, ONE BANK TREATMENT INSTRUMENT, WHICH PLUGS INTO A NORMAL 110V OUTLET. THIS DEVICE GENERATES AN AC/DC, 60-CYCLE, ALTERNATING FREQUENCY WHICH GENERATES AN UNLIMITED AMOUNT OF WHITE LIGHT ENERGY. THIS DEVICE COMES EQUIPPED WITH A WITNESS WELL, PHENOLIC RUBBING PLATE, MULTI-DIMENSIONAL STABILIZER, CLEAR SWITCH, POWER SWITCH, TIME COILS, AND ONE ELECTROMAGNET. THE NICE THING ABOUT THIS UNIT IS, WHEN GIVING A TREATMENT, YOU MAY BROADCAST THE FREQUENCY BY MEANS OF A WITNESS, OR YOU MAY HOOK-UP THE ELECTROMAGNET DIRECTLY TO THE PERSON. AMONG OTHER THINGS, THIS UNIT CAN ALSO BE USED FOR OUT OF THE BODY TIME TRAVEL. AS FAR AS THE PHYSICAL ASPECTS ARE CONCERNED, YES YOU CAN USE THE HYPER-DIMENSIONAL RESONATOR FOR PHYSICAL TIME TRAVEL, BUT ONLY WHEN ACTIVATED OVER A NATURAL GRID POINT, OR IN A PLACE WHERE UFO'S ARE SIGHTED.

BONUS FEATURES

EACH UNIT THAT I SELL HAS A BUILT IN ELECTRONIC SENSOR COIL WHICH IS LOCATED DIRECTLY BENEATH THE RUBBING PLATE. THESE COILS ARE SPECIFICALLY DESIGNED TO PICK-UP AND AMPLIFY THOUGHT INDUCED WHITE LIGHT ENERGY. NOT ONLY THAT, BUT THESE COILS ARE ALSO DESIGNED TO HELP INCREASE THE STICK REACTION WHEN USING THE RUBBING PLATE.

OPERATION PROCEDURES

THIS DEVICE WORKS JUST LIKE A RADIONICS MACHINE. IN OTHER WORDS, AFTER THE UNIT HAS BEEN CONNECTED TO A 110V OUTLET, THE DIALS ON THE MACHINE ARE THEN TUNED RADIONICALLY FOR THE YEAR, MONTH, AND DAY THAT YOU WISH TO TRAVEL TO. THIS IS DONE WHILE THE TIME COILS ARE POSITIONED AROUND THE HEAD. BUT ANYHOW, AFTER THE RATES HAVE BEEN FOUND, THE UNIT IS ACTIVATED, AND THE ELECTROMAGNET IS PLACED OVER THE SOLAR PLEXUS FOR THE SPACE OF 3 MINUTES. AFTER THE TREATMENT IS OVER WITH, THE UNIT IS DE-ACTIVATED AND THE TIME COILS REMOVED. THE PERSON NOW FINDS A COMFORTABLE PLACE TO RELAX IN ORDER FOR THE ENERGIES TO TAKE EFFECT. IF YOU HAVE DONE EVERYTHING CORRECTLY, YOU WILL THEN BE PROJECTED TO THE YEAR, MONTH, AND DAY. AS FOR THE HEALING PROCEDURES, THIS INFORMATION IS INCLUDED IN MY INSTRUCTION MANUAL.

THE HYPER DIMENSIONAL RESONATOR WITH TIME COILS AND ONE ELECTROMAGNET, SELLS FOR \$360.00, INSTRUCTION MANUAL IS INCLUDED. ITEM (#11).

DOUBLE TERMINATED QUARTZ CRYSTALS

IT HAS BEEN PROVEN THAT IF A DOUBLE TERMINATED QUARTZ CRYSTAL IS PLACED INSIDE THE WITNESS WELL ON THE HYPER DIMENSIONAL RESONATOR, IT WILL GREATLY IMPROVE ITS PERFORMANCE FOR WHATEVER THE PURPOSE MIGHT BE. THESE CRYSTALS AVERAGE FROM 1 TO 3 INCHES IN LENGTH. PRICE: \$12.00 PER CRYSTAL. ITEM (#12).

HOW TO LOCATE GRID POINTS

The only way which is practical for locating Grid Points, is to Dowse for them. This can be accomplished in a number of ways. If you use some Dowseing rods, all you have to do is start walking in a straight line East or West or North or South. As soon as rods point towards each other, this means that you have found a Grid point. All you have to do then is to set up your unit and see what happens.

It is important to note, that there exists both Positive and Negative Grid Points. It is up to the individual to find the correct Grid Point.

If the Grid point is too far away from an electrical power source, you may want to get a DC to AC inverter. If you connect this DC/AC inverter to your Car Battery, you will be able to activate the Sonic Resonator almost anywhere.

You may wish to connect the Sonic Resonator to the bottom of your car so that when you are over a Grid Point, all you have to do is activate it and you will teleport your car and yourself into a different time dimension.

*Note: I think it is safe to say, that Grid Points can only be activated at certain times of the day. I don't know why this is so. Perhaps it has something to do with Gravity.

If you have any further questions, please write or call me. My phone number and Address is given below:
