INTRODUCTION

Not much can be said for the introduction, except for the fact, that this is probably one of the most dangerous Reports ever written on the subject of Time Travel. I can't even begin to stress the possible dangers which are involved in constructing a Time Portal. All I can say is, be careful. There are forces out there which may have the power to destroy us, especially if the information contained in this Report is mis-used.

There is also the danger of getting trapped in some other Time dimension. Whether it be the Past or Future, the danger still exists. Sense the Time Portal shifts from one Time Frame to the next, the only way that you can lower this danger factor, is by hooking up a Radionics Machine to the Portal. There are many ways in which to do this, most of which will be discussed later on in my Report. I think you will find this information to be quite helpful, especially if you are interested in Psychic Phenomenon.

Among other things, I will also show you how to construct an artificial Grid Point. This is the first time that information of this nature, has been revealed to the Public. I hope and pray that the people who use this knowledge, will not mis-use it. Because in doing so, could bring an end to life as we know it.

Beware! There is a sign post up ahead,
and on it reads the Twilight Zone.

DEDICATION

I would like to dedicate this Report
to Jesus Christ, who is the best
friend a person could ever have. I
would also like to thank Jim Girouard
for giving me the knowledge which was
necessary for writing this Report.

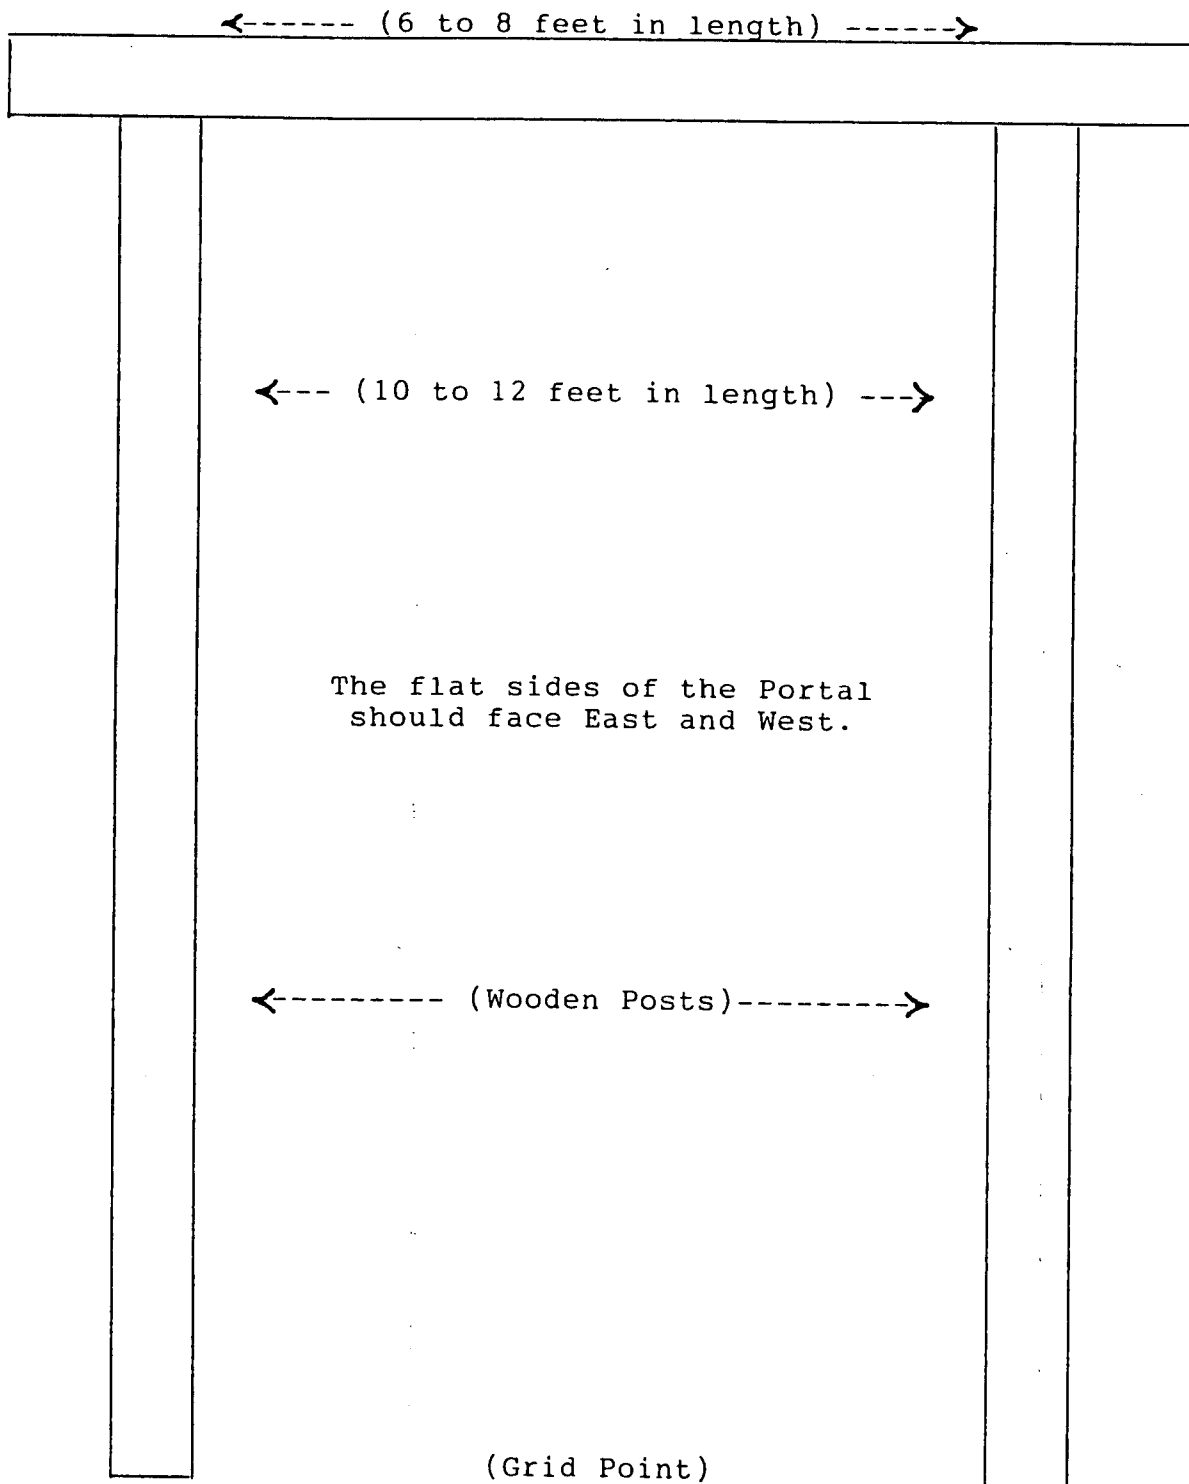

As I have mentioned earlier, there are many ways to construct a Time Portal. These portals can vary in height, width, or by the materials in which they are constructed with. They can be made into an Orgone Accumulator, or into a large Electromagnet which is built in the form of a Mobius Coil. Whatever way you decide to do it, will depend largely on how much time and effort you are willing to spend to make your dream become a reality.

One of the many ways in which to construct a Time Portal, is shown on page (2). However, before we can begin to build one of these things, we must first find a Grid Point.

To find a Grid Point, you will probably have to dowse for one. If you like me, you will probably want to use an Aura Meter which is a highly effective instrument for locating Vortexes. If you can't obtain one of these Aura Meters, then the next best thing to use is a Pendulum.

When using the Pendulum, ask it, (In what direction should I go in order to find a Grid Point?) As soon as Pendulum starts to swing, follow the direction in which it is moving. As soon as you hit the Grid Point, the Pendulum will begin to gyrate in a clock-wise or counter-clockwise rotation.

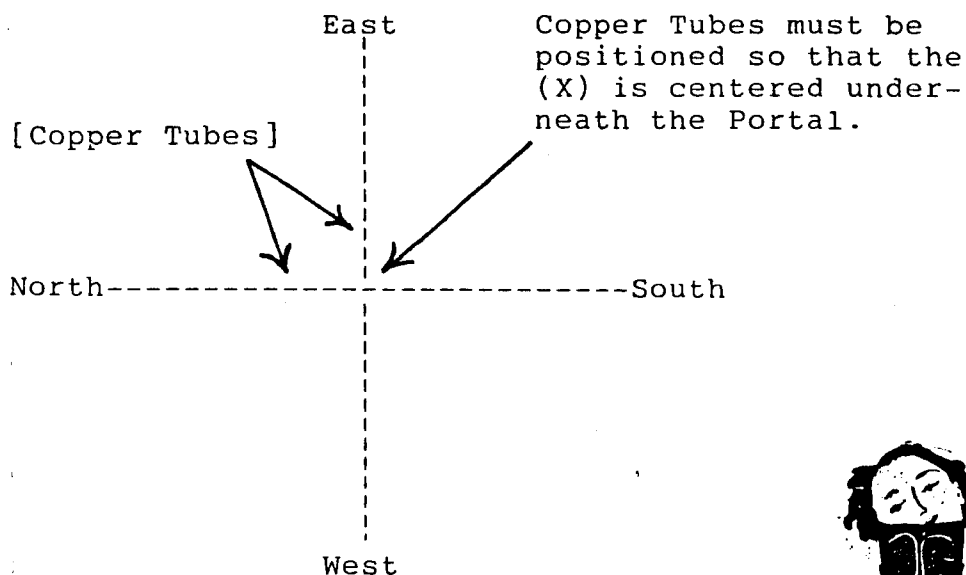

Once you have found the Grid Point, you can begin with the construction of the Time Portal as shown on page (2).

If your like some people who have a difficult time trying to find a Grid Point, you may want to construct an Artificial Grid Point yourself. To do this, all that is necessary is to overlap two pieces of Copper Tubing in an (X) type fashion underneath the Time Portal. This is done in such a way, so that each piece of Copper Tubing is pointing towards the (North an South) and (East an West). (See Fig.1 in the illustration below)

(Fig.1)

[Top View]

When positioning the Copper Tubes underneath the Time Portal, they should be buried at least 7 to 12 inches underneath the ground. The reason for this lie's in the fact, that the Earth itself contains a tremendous amount of Electricity. And when the Copper Tubes have been buried underneath the ground, the Copper

itself conducts this Electricity which sets up an Electromagnetic Mobius Coil. In other words, the Copper Tubes create the 1st and 2nd field, the Time Portal produces the 3rd field, and the 4th field is set into motion when the Portal is facing East and West.

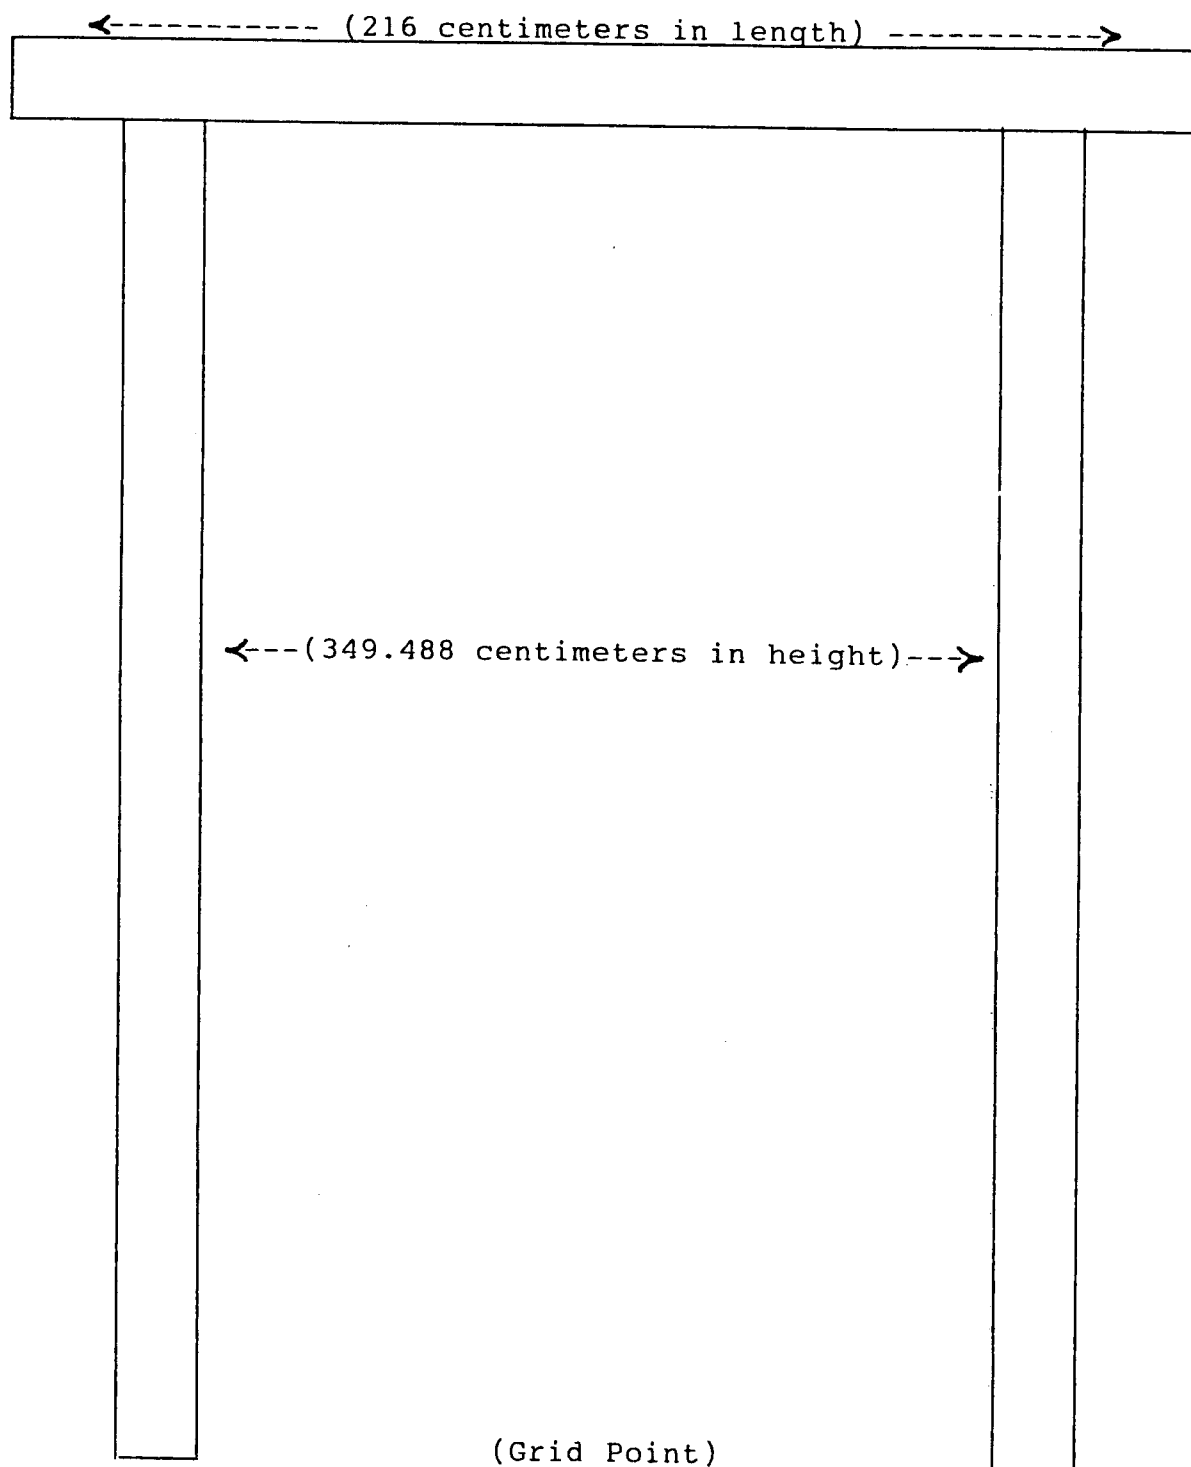

Another thing that you can do, which can amplify the 4-dimensional energies, is to insert a Copper End Cap over each end of the Copper Tubes. Each of these tubes will then form an Air Capacitor which will act as an Orgone Accumulator. Not only that, but the pressure which builds up inside of each tube, will Amplify the Gravitational Fields which surrounds the Portal.

In getting back to the Time Portal which is shown on page (2). This is fine if you want to take the easy way out. However, for those of you who would like to obtain better results, I suggest that you build the Portal which is shown on page (5).

If we examine the Portal in Fig. 2 on page 5, we will find that the cross-piece is approximately 216 centimeters in length. Also the up-rights are 349.488 centimeters high. If we now take the number 349.488, and divide it by the Harmonic Value of 216, we will obtain the (PHI Value) which is (1.618). It is this value and the 216 Harmonic, which gives the Portal super dynamic capabilities. This makes the Portal which was described on page (2), look like a toy.

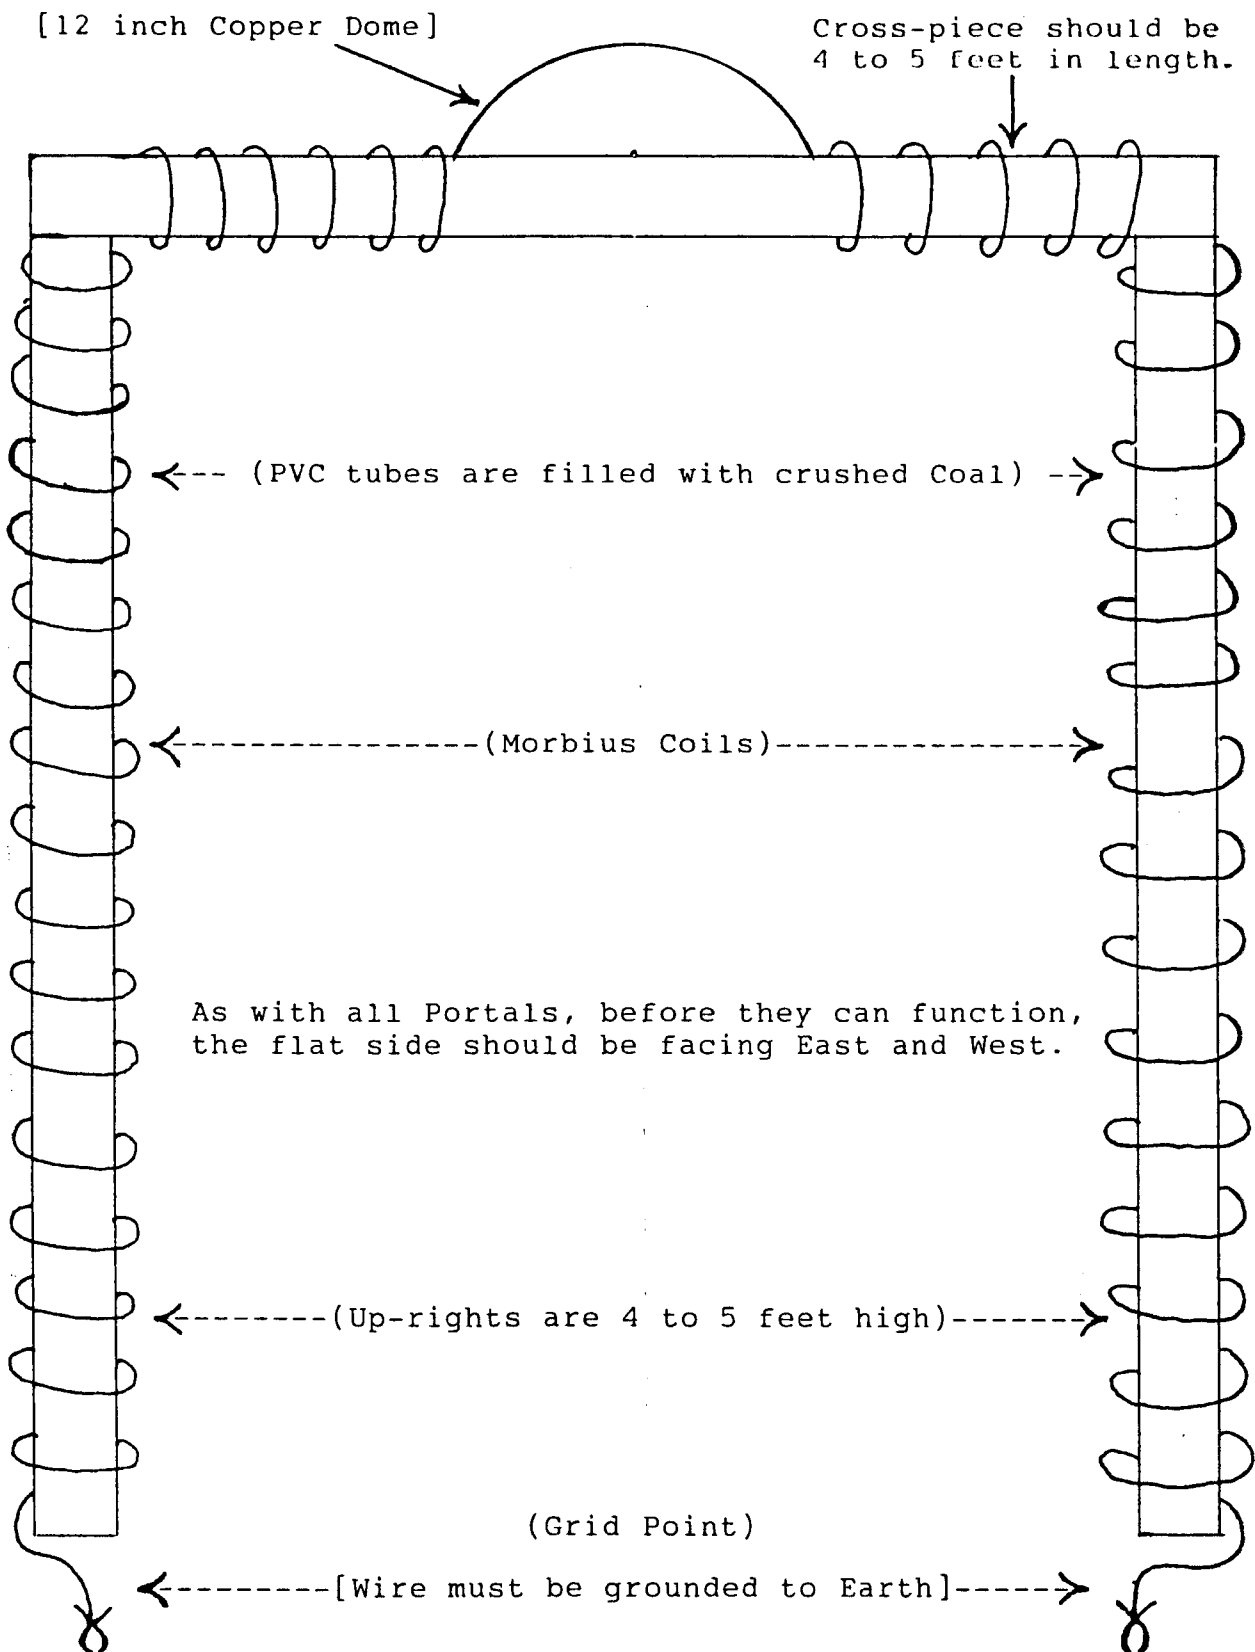

(Fig.2)

Another way to construct a Time Portal is revealed on page 7. I am not quite certain as to whether or not this Portal will work, as alot of it is still in the Experimental Stages. I guess you will just have to build it and find out for yourself.

There is alot about this Portal which differs from the original design. In other words, instead of using wooden posts as in the previous designs, it uses PVC Pipe instead. It also has coils of wire which is wrapped around each pole in the form of a Mobius Coil. Not only that, but each row of coils is grounded to the Earth. Now one of the reasons why these coils are grounded, lie's in the fact, that when this is done, an AC an DC field is created around the Portal. This AC an DC Field pulses at precisely 7.853975 Hz. c.p.s. It is this frequency which enables the individual to travel through time when he steps through the portal. It should also be pointed out, that in my other designs on pages (2) and (5), also create an AC an DC field. But this is not as strong as the field created, when coils of wire are wrapped around the Portal. Another thing, once the Portal becomes fully operational, whoever is in close range of the Portal, that persons brain waves will also vibrate at the rate of 7.853975 Hz. c.p.s. When this happens, no matter what the person is thinking of, he will still be able to see images within the Portal. This is because his mind is now adjusted to the Time Travel Frequency. Therefore, it should become possible for the individual to control the Time Frame of the place he wishes to travel to.

This device is intended for Scientists who wish to obtain maximum results when constructing an Artificial Grid Point.

For those of you who would like to learn how to construct this Artificial Grid Point, see the illustration on page 9.

As you can see, all that is necessary in order to construct this device, is to connect two Hyper-dimensional Resonators to two Electromagnets which are positioned at right angles to that of the first.

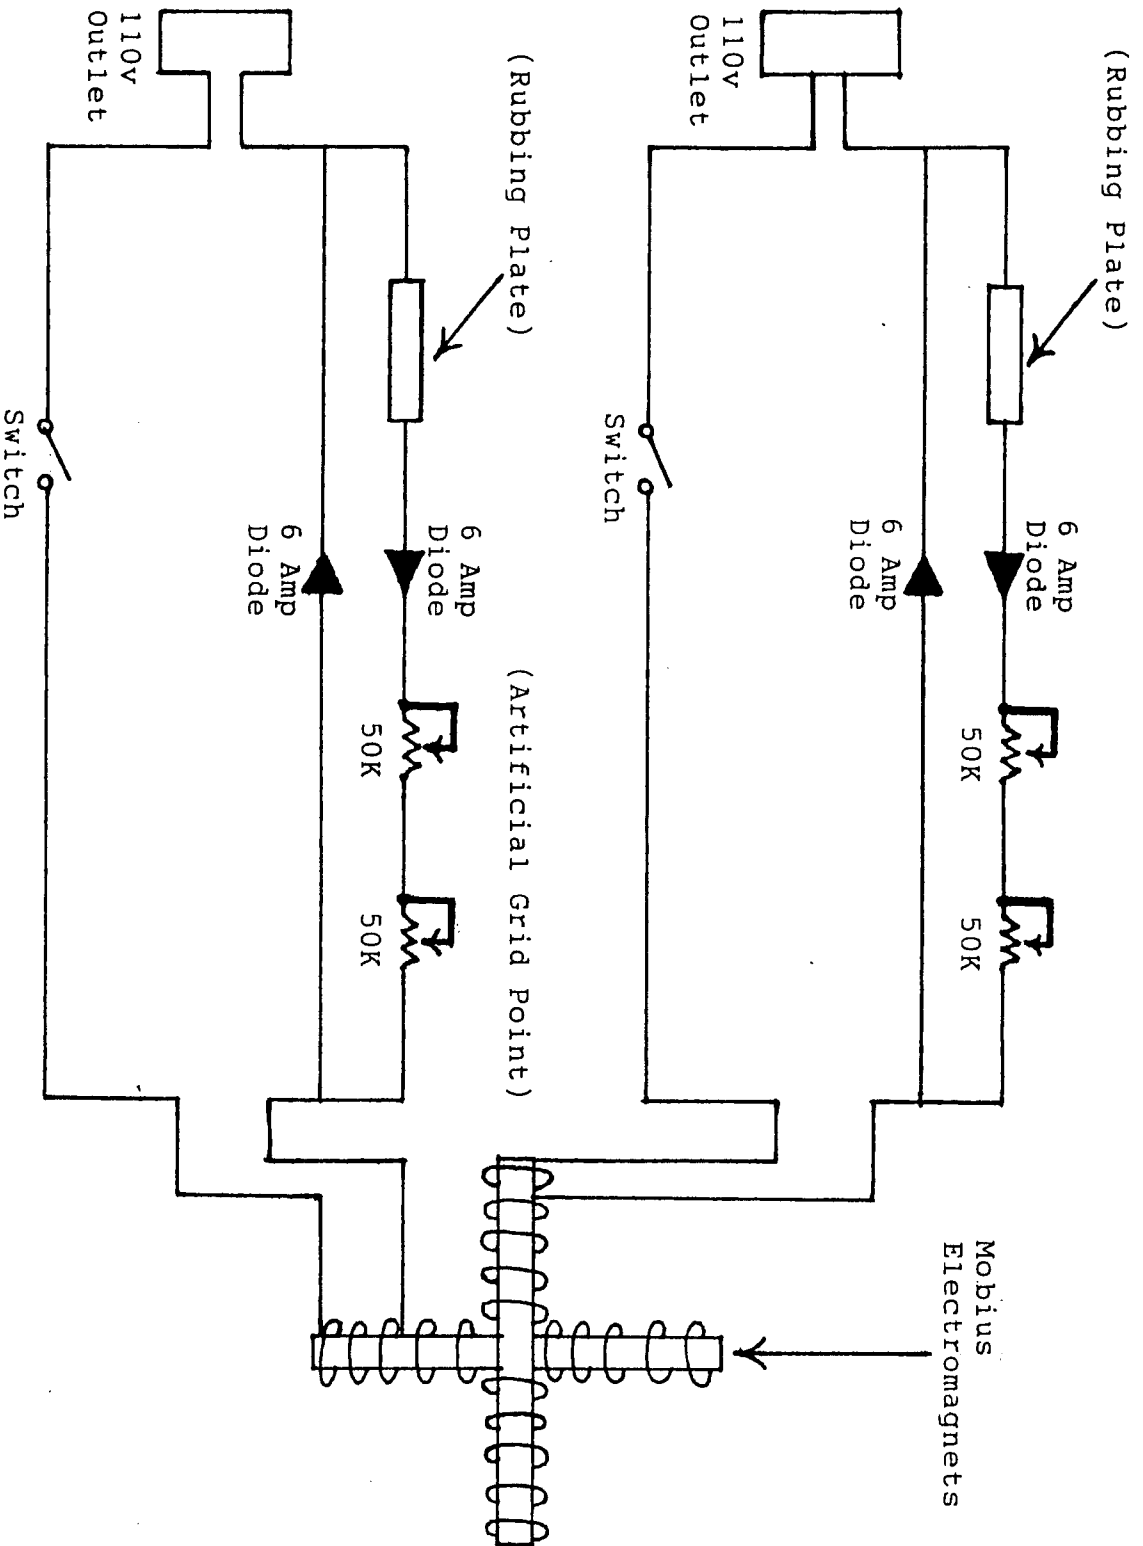

When constructing these Electromagnets it should be pointed out, that the wire used may be wrapped in the form of a Mobius Coil. Page 10 will show you how the coils should be wrapped.

If you do decide to build this Artificial Grid Point, be very careful you do not create an entrance leading into Hell. The best way to prevent this from happening, is to program the Hyper-dimensional Resonators while stroking the Rubbing Plates. In other words, while stroking the Rubbing Plates, concentrate on the following suggestion: (Do not create entrances leading into Hell). Once you obtain the stick, the units will be fully programmed. You should also program the units each time before you activate the Artificial Grid Point. If you don't, then you better watch out. Don't ever under-estimate the power of this device. It is extremely dangerous!!!

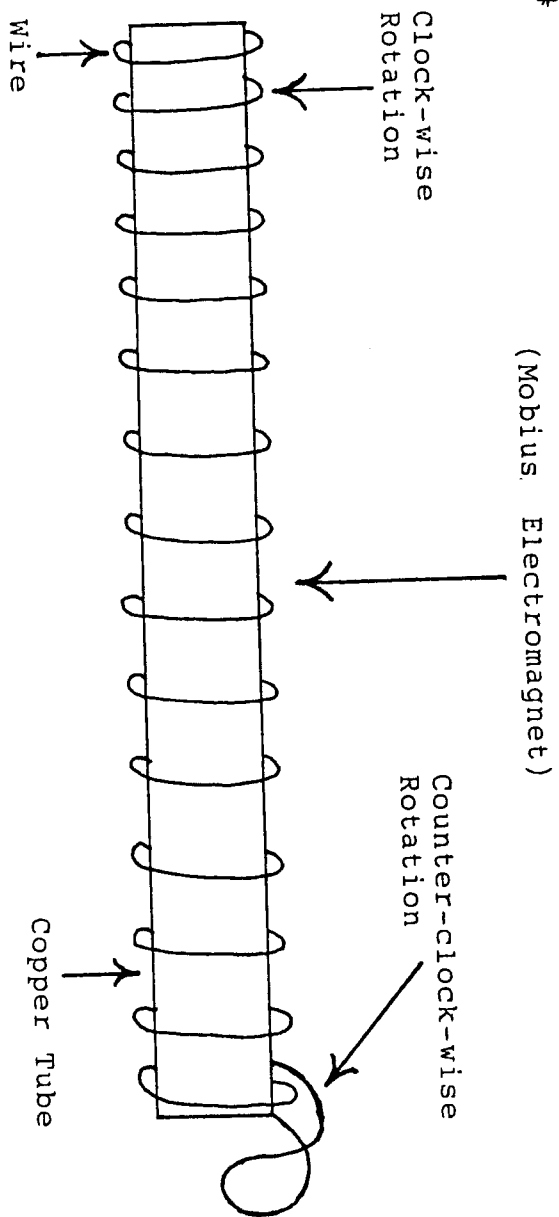

Editors Note: The Hell of the lower Astral regions can easily be avoided by simply asking your Soul to keep you out of Domination oriented or negative, dimensions and planes...that could endanger your body or minds.... Fry

[THE HYPER-DIMENSIONAL GRID POINT]

(9)

[DIAGRAM WHICH SHOWS YOU HOW TO CONSTRUCT A MOBIUS COIL]

*Note: When wrapping the Copper Tubes, 21 gauge Magnet Wire should be used.

It is fairly safe to travel physically through time the danger however exists, when one is trying to get back to his own present time frame.

Now the reason it becomes extremely difficult for the individual to get back to his own present time frame lies in the fact, that the Time Frame within the Portal shifts once every two to five minutes. In other words, if the Time Frame happens to shift after you have walked through the Portal, you will end up getting trapped in some other time or dimension.

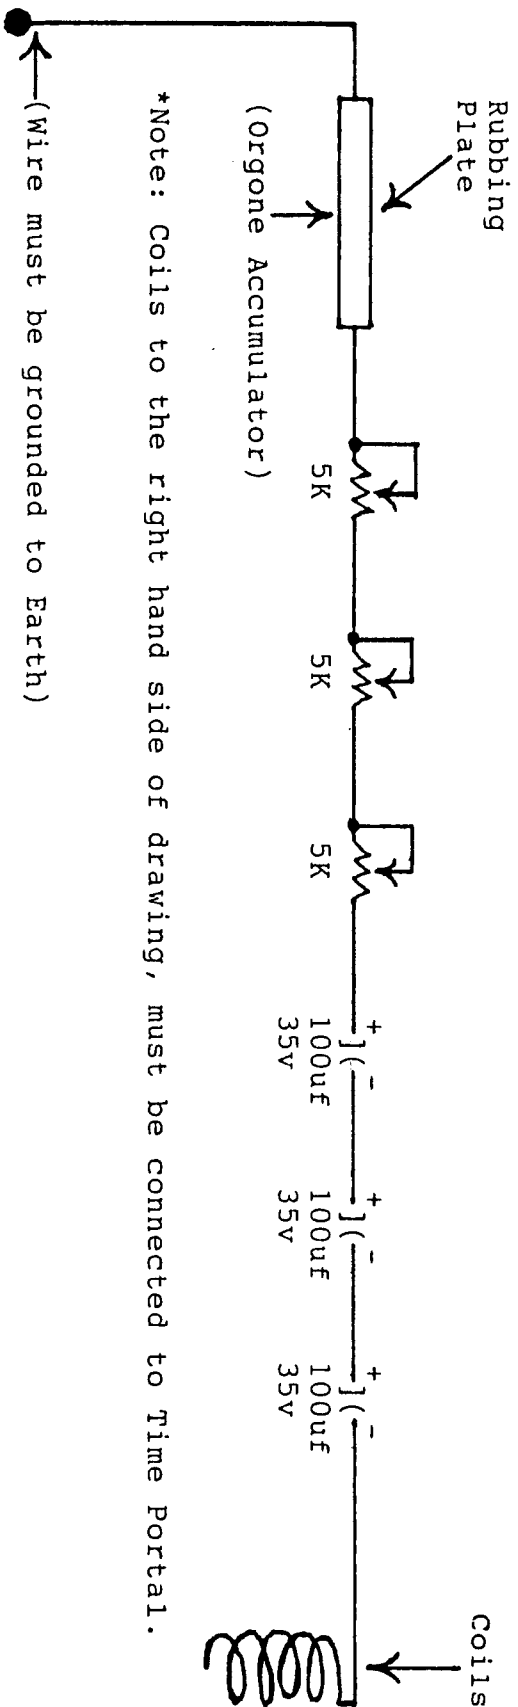

Now the way to avoid this danger, is to connect a Radionics Machine to the Portal. When doing this, the wire which extends from the circuit, should be wrapped around the Portal so that it creates a step-up induction Thought Transformer.

A drawing of what this Radionics Machine looks like, is revealed on page (12).

It should also be pointed out, that when your operating this machine, you should program the Portal with the following suggestion: (Create a continuous time frame for the YEAR and DATE). This suggestion or command should be repeated to yourself while stroking the Rubbing Plate until you get the stick. The dials are also tuned in almost the same exact way, except for the fact, that while you are turning the dials and stroking the Rubbing Plate, concentrate on the following question: (What are the rates

(Continued on page 13)

[DRAWING OF RADIONICS MACHINE]

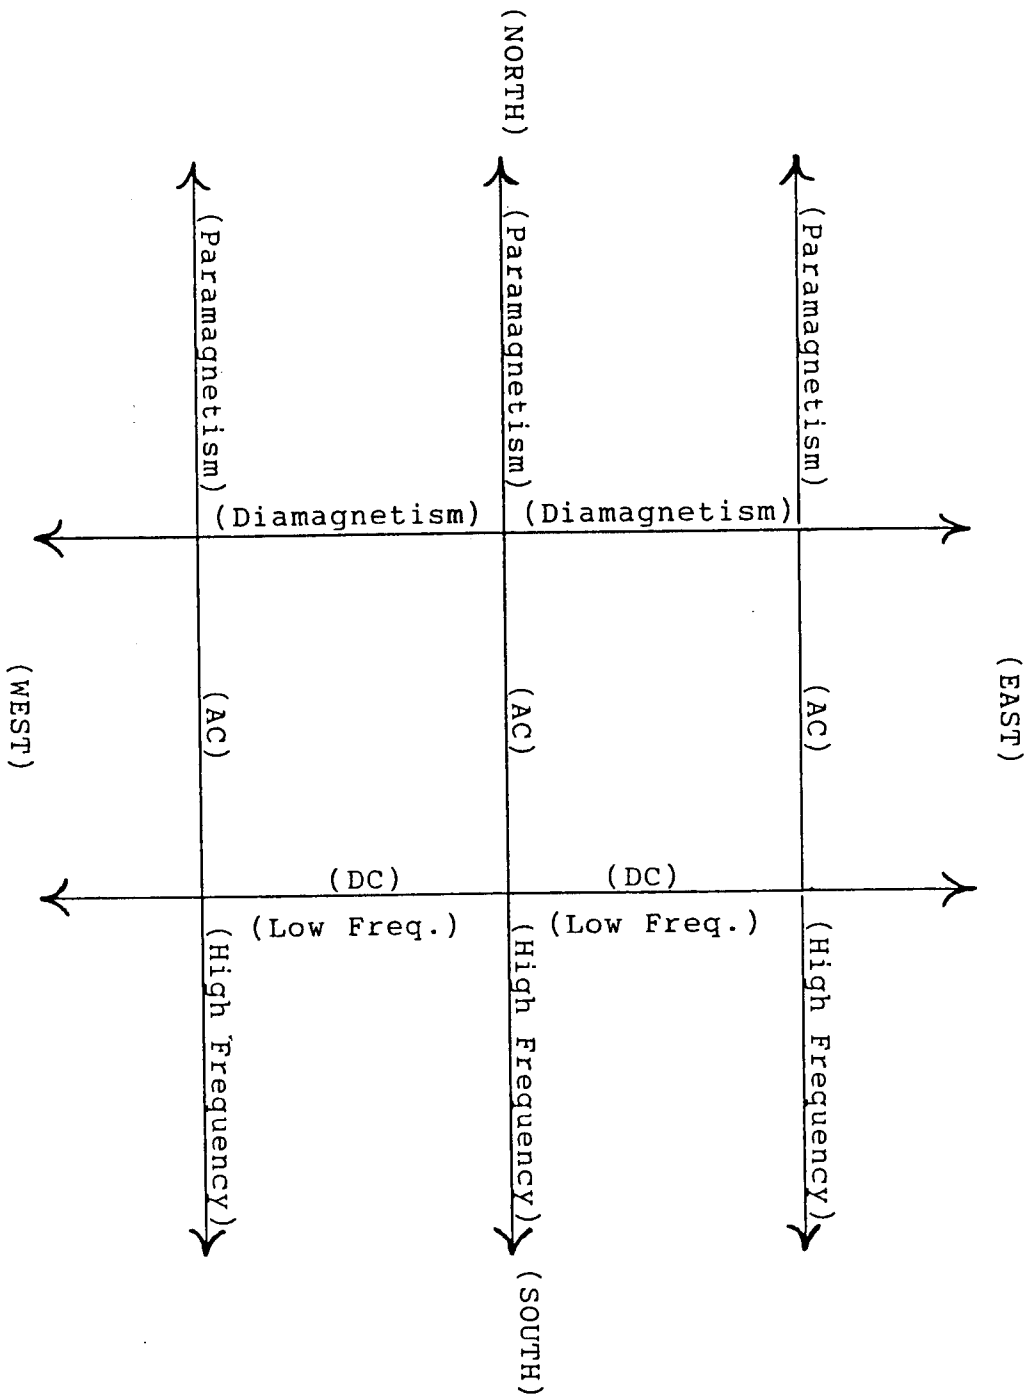

which will lock onto this Time Portal?). Once you get the stick for each of the dials, the unit will be fully programmed. Whether you tune the dials first and program the Portal last or Vice-versa, doesn't matter, just so long as nothing is omitted from these instructions.

As far as other matters are concerned, it is possible to activate a Time Portal without positioning it over a Grid Point. There are many ways of doing this, however the method that I would use to activate a Time Portal no matter where it is located, is to hook-up the Radionics Machine which is shown on page (12), to the Time Portal. After you have tuned the dials, program the Portal with the following command: (Create a Time Frame for the YEAR and DATE). Once you have done this, it shouldn't take long for the image to appear within the Portal. One should remember however, that the more Power that you use, the faster the image will appear. Therefore it may be to your advantage, to use as much power as you can, especially in this type of situation.

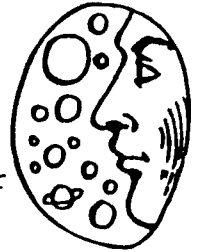

There are some other interesting things to consider when dealing with time space. In other words, sense Paramagnetic Fields on this planet extend from North to South, and the Diamagnetic Fields from East to West, then time itself must also have diamagnetic Properties. Sense this is the case, it should be possible to construct an Instrument that generates a Diamagnetic Frequency. To illustrate how these different fields inter-connect with one another, see diagram on page (14).

[MAGNETIC GRID CHART]

1. It usually takes anywhere from 2 to 5 days before the Time Portal becomes activated.
2. One can increase its effects by lining the interior of the Portal with Copper Foil.
3. Don't under any circumstances use Aluminum Foil. Aluminum Foil gives off Toxic Vibrations which can endanger your life.
4. If one were to examine our Universe on a higher plane of Consciousness, it would resemble a large Crystal Orb.
5. The frequency for Time Travel is 7.853975 Hz. c.p.s. It is this frequency which enables a person to travel physically through Time and Space, when walking through a Time Portal, but only when an AC/DC Field is present.
6. Time is a product of belief. Belief is a product of Ecktoplasm, and Ecktoplasm originates from God.
7. To travel physically through Time without a faith in Jesus Christ, is like walking into the snares of a huge gigantic mouse trap. Not only that, but Satan would roast you like a hot dog. Editors note: The domination or 'reflection system which is mentioned in our Bible as the realm of Satan, can be dangerous IF an individual does not know their rights under the choice laws of the creator. Once you understand your spiritual rights you can safely face any situation. Refer to Psychic Defence Reports by myself or others of knowledge. Fry

8. TIME PORTALS USUALLY ACTIVATE ON THE DAY OF A FULL MOON, AND IMBETWEEN THE HOURS OF 6:00 A.M. TO 12:00 NOON IN THE MORNING. ALL THINGS BECOME POSSIBLE ON THESE DAYS!!!

9. 2 BY 4'S OR 4 BY 6'S MAY BE USED IN PLACE OF WOODEN POSTS. THE PROBLEM WITH PORTALS THAT USE WOODEN POSTS IS THE FACT, THAT THE POSTS HAVE A TENDENCY TO SCATTER TO MUCH OF THE TIME FIELDS, THUS CAUSING EVERYTHING WITHIN A HUNDRED FOOT RADIUS TO BE TRANSPORTED PHYSICALLY THROUGH TIME!!!

10. IN SOME CASES DUE TO THE TIME FIELDS, THE TIME PORTAL ITSELF MAY VANISH INTO THIN AIR. A SITUATION LIKE THIS HAPPENED TO A FRIEND OF MINE WHO LIVES IN MOUNT VERNON, NEW YORK. ACCORDING TO THE STORY, AFTER HE HAD SPENT OVER A HUNDRED DOLLARS BUILDING HIS PORTAL, AS HE WAS APPROACHING ONE DAY, THE TIME PORTAL VANISHED, RIGHT IN FRONT OF HIS EYES. SO NOW THE MONEY HE SPENT, HAS GONE DOWN THE TUBES.

11. BE CAREFUL WHEN USING A TIME PORTAL CONSTRUCTED OUT OF PVC PIPE. WHEN ACTIVATED, THESE THINGS HAVE BEEN KNOWN TO ALTER PAST EVENTS.

12. AFTER YOU HAVE BEEN TRANSPORTED PHYSICALLY THROUGH TIME, YOU MUST MAKE CERTAIN THAT YOU MARK THE SPOT WHERE YOU APPEARED, BECAUSE IF YOU DON'T, AND YOU WISH TO GET BACK TO YOUR OWN PRESENT TIME FRAME, YOU MAY HAVE A DIFFICULT TIME FINDING THE PORTAL ENTRANCE.
