# Introduction

This book is the outcome of its author's quest, pursued over many years, to find the reason for man's existence. It is the author's wish to convey this vast material in an abbreviated form for the sake of clarity and simplicity; yet display the awesome mind of its Creator, who planned for eternity. This work is my humble attempt to condense the magnificent volume of the plan of the Creator into a simple design, easily understood by all. Incorporated into the design is the awareness of time, measure, numbers, sacred geometry, Gematria, symbology, allegory, the Bible, and the ancient enigmas. The attempt was to use simple, mathematical proofs for decoding the message. Mathematics is a universal language, and a precise one. It does not lie, but always tells the truth.

This book introduces a circular calendar which encompasses 6,000 years, displayed as one 360-degree circuit of time. This circuit is divided into 24 equal segments of 15 degrees each. This precisely matches our every-day 24-hour clock.

There are two independent calendars operating within the circuit. One calendar is the common-era calendar (the Gregorian), and the second is the Hebrew calendar, which is still in use today. The common-era calendar revolves 250 years for each 15 degrees of its circuit. The Hebrew calendar revolves 240 years for each 15 degrees, ending at the start of their year 5760, which is equivalent to the Gregorian date of September 11, 1999.

No man can claim credit for the invention of this Clock, nor its inner workings. It is simply a display of God's plan for the Earth, and for His human family that He placed upon it.

This calendar was set in motion at the time of Adam, 6,000 years ago, and is subtly recorded and revealed in God's written word for us today. The time-piece incorporates the measurements and movements of the Sun, Earth, and Moon, as well as a

vast array of Judaic and Messianic revelations. Numerical values assigned to the Clock's components all relate back to the significance of events in Scripture, and the astronomical patterns of our universe. This work is a quantitative analysis of theological and esoteric phenomenon. It is an attempt to decode and instill a comprehensive view of time and our place in it—an understanding of man, his Creator, and the universe.

This work is dedicated to the house of Judah and to the house of Israel (Ezekiel 37), with an appreciation of their diligent work in preserving for all mankind, the writings of their ancient fathers and prophets. It is also dedicated to those of the vast world who desire to look into the things of God and search for its gems of beauty, and an understanding of His magnificent Word.

*Andrew Moore*

## Letter from a Friend

This letter is from a newly found friend and his wife, who recently welcomed us into their community. Their names are Randy and Marianne Olsen. They both read the unfinished manuscript, and this is what Randy wrote:

September 18, 2009

Dear Friend,

It is apparent you are well versed in mathematics, religion, and perhaps even quantum theory, obviously you attained an education on the subjects you have written about, with which your knowledge of is far superior to any I have regarding your writings! I know little of you as a person other than you are good hearted, honest, and reliable, but it would be my guess that you once studied as to be a priest, minister, or rabbi.

Be it so, we need not ponder what life circumstances made you the person you are today; to me you are “Holy Mackerel Andy.” A friend to many, father, husband, confidant, and writer.

As to your manuscript, I see it marketable to those that already have knowledge of the subjects, perhaps a few more references, and time for you to write it as a reader. A few minor “tweaks” and you will have done well!

Good luck to you my friend, the pleasure is all mine.

Sincerely,

*Randall E. Olsen*

## Author's Note

Dear Reader,

I have been blessed with the opportunity over the past two decades to communicate with Bonnie Gaunt, a precious author who has spent more than sixty years of her life in study and research, investigating and writing on mysteries lying openly concealed in the Scripture. She has written and published more on the Bible's number code than any modern author. She has appeared on Pat Robertson's 700 Club, as well as on many television documentaries and radio interviews. Her work has received world-wide acclaim.

This wonderful woman, whom God gave me as a friend, read the manuscript for this book and gave her permission to include her comments and her drawings as supplements for this book, without which the pattern and consistency of the whole concept would lack. By reading her work furthers the evidence of God's Grand Design and man's part in it.

When Bonnie read the unfinished manuscript for God's Cosmological Time-Piece, these are the first words that she wrote:

“Dear Andy, First let me tell you what a masterful piece of work you have done. It is magnificent! Thank you for letting me read it. It speaks loudly of God's Grand Design in the creation of all things.”

I urge every reader to read her supplements, and the excerpts from her many books. To those who desire to read more, her books are available at **amazon.com**

## Acknowledgements

I wrote the original manuscript early in 1999. I was very excited when I “saw” how it developed into a fantastic revelation. I wanted to get it “out there” as quickly as possible. This is when there was such a glut of Y2K in the market place (now there is 2012). So I chose to forestall publication to a time when the world was more receptive to the fact that there is a God in heaven that numbered man’s day. Men left to their own devise are on their collision course to self-destruction. This is especially the sign of our time. Over the past ten years I had distributed four-dozen or more copies of the text, which included five of the present figures, with the Clock, unchanged, even to this day. The writing was a fifteen page 8.5 x 11, single spaced 12 point typewritten text, stapled at the corner. I have been carrying the concept of the Clock all these years. This past year I decided to re-emphasize the writing and to add to the text, and to install several more drawings. Now it has grown five-fold.

Having said this, I wish to thank my granddaughter, Tammara Moore, who was the first to grasp the potential of this work in October of 2009. She wrote a few lines of what the work represented. Some of these lines are incorporated into the introduction.

Many thanks to my loyal friend, Robert Tomforde, who has followed this work from its conception to the present. Thank you Michael A. Martinez, Sr., for his participation from its inception, and for video taping the Time-Piece demonstration in 1999; and to Peter J. Hammer and Robert Cornog for their early interest in my work. Thanks to Jose, chief architectural draftsperson; to Harry Fischman Design, and to Edwin Schneider of Left Hand Signs for computerizing my early renderings of the drawings. Thank you to pastors Don and Sandra DeAngelo of Faith Outreach Center of Jamestown, N.Y. for their prayers, and their interest and encouragement

in this work. I thank Kerry Russell for helping me by reading over the entire text several times and offering her experience at writing. Thank you to Holly Richardson, English teacher and owner of Books Off The Beaten Path, located in Lakewood Village, N.Y. Holly was instrumental in getting large portions of the text computerized for the typesetter. Thank you to my friends Dennis and Wanda Ahlgren for their encouragement. Thank you to all my family who have been patient with me. And especially to my wife, Lillian, who braved reading my work dozens of times.

I am especially blessed to have join with me, Bonnie Gaunt, internationally famed authority and writer on the Bible's Time Line. Bonnie Gaunt has also performed the monumental task of reconstructing and editing the entire text for this book. As well, Bonnie has written the Foreword, back cover, and many supplements for this manuscript, which include illustrations of her design, exerpts from her books, and also her Gematria skills of the Hebrew and Greek texts.

Special thanks to Gregory Kellogg for his excellent skills at computer illustrations, which includes the book's cover, and for typesetting the work.

I would also like to express my gratitude to authors past and present, whose work I have read over the years from whence some of my findings were developed. These authors are Bonnie Gaunt, E.W. Bullinger, John Michell, James Harrison, David Fideler, R.A. Schwaller deLubicz, J. Ralston Skinner, Andrew Jukes, Peter Demetris, F.W. Grant, F. Aster Barnwell, Joscelyn Godwin, Zechariah Sitchin, Rabbi Joel C. Dobin, Joseph Seiss, J.J. Hurtak, Dr. Phillip S. Berg, and Peter Tompkins.

# Foreword

*by Bonnie Gaunt*

It has been my joy and privilege to read a preliminary copy of this work by Andrew Moore. And I must admit that I was stunned and amazed at its revelation. I have been studying the chronology of man since my early teens. I am now an old lady, and have never before seen such confirming evidence, purely from mathematics, that confirms the time-line that I struggled many years to obtain through scripture, history, archaeology and astronomy. The evidence that Andy has brought forth in this book reveals the Creator as a Master Mathematician, whose wisdom and foreknowledge surpasses even our wildest imagination. Yet the evidence brought to bear here is displayed in its simplicity and beauty. We don't have to be a mathematician to comprehend it. It's primal beauty speaks for itself.

September 11, 1999 was a point in time to which billions of Christian people looked forward, because it was 2,000 years from the birth of Jesus. And many also knew that it was 6,000 years from the creation of Adam. That day was also Rosh Hoshanah, the New Year on the Hebrew Calendar, beginning their year 5760. However, the day came and passed quietly into history without fulfilling all the expectations of millions of Christian people. Was it a false alarm? Many felt so! And, unfortunately, many became discouraged and even mocked those who looked for the fulfillment of prophecy. In this book, Andrew Moore has shown the amazing and fantastic reality of that date as being a primary pivotal point in the whole plan of God for the salvation of man; and he has confirmed that date by his magnificent use of simple mathematics that a child can easily comprehend.

After reading his manuscript, I felt that some supplements, showing additional related concepts, could take the reader even farther into a comprehension of the beauty and

majesty, yet simplicity, of what our Almighty Creator has planned for His beloved human family. I encourage every reader to explore this confirming evidence.

September 11, 1999 did not come and go in vain. It was the beginning of a magnificent transformation of planet Earth—the beautiful home that our Creator made for man.

*Bonnie Gaunt*

*April, 2010*

## New and Exciting Evidence

The recent discovery of the Cosmological Clock is causing commotion among students of end-time prophecy. Suddenly we have evidence—magnificent evidence of a pre-planned pattern of time and events!

Even a casual observance of the Cosmological Clock settles the age-old question: is time and history random, or does it conform to a plan which brings man to a desired outcome?

The question is profound! In today's tragic and uncertain world, inevitable doom is continually presented to us through television, movies, internet, newspapers, magazines and books. Violence and destruction are what we are being fed. But is this the plan that our Creator had for man—self destruction?

We now have solid evidence that our Creator did not abandon man to his own self-destruction. He had a masterful plan—precise in its mathematics, amazing in its fulfillment, and absolutely beautiful in its outcome. So, follow along as we observe time as its hours have ticked away, and experience the joy of the outcome!

Students of Scripture today are especially interested in the end-time, because we find ourselves living at the end of 6,000 years of man's history. What now?

Many interpretations of prophetic Scripture are being presented, and many predictions are bombarding our hopes. The hope of the return of the Lord is the substance of most of those predictions. Yet, if we only look back through our own generation, every prediction of His return, to date, have all failed to see their reality.

A careful look at the Cosmological Clock will help us find our place in history and prophecy. The hands of the Clock were set in motion 6,000 years ago, with the creation of Adam, and we are now entering a new era. We need to be informed!

Looking back over these last few generations we become aware of the prolific abundance of new concepts—new interpretations—new insights—and, yes, new evidence of a master plan all unfolding into the awareness of today’s generation. Archaeological discoveries are connecting us with the reality of the past, giving confirmation to the truth of Biblical testimony. Such books as *The Bible Code*, and *Gospel in the Stars*, have presented to us new dimensions in the study of prophecy. Book stores are abundant with books which relate current events to prophecies of the Old Testament.

We live in a unique time! These subjects have been placed in careful preserve until now. Today they are being brought to public awareness. Why now? After 6,000 years of existence on this planet, why should the hidden mysteries and ancient enigmas, such as The Great Pyramid, Stonehenge, the Temple at Jerusalem, the Dead Sea Scrolls, all be brought to light and placed at the fingertips of this generation? Many, many evidences have been lying dormant and silent for thousands of years, waiting...waiting...waiting, for the season to testify to us. These silent sentinels have already begun “sounding” forth their mysterious symbolic language, which has been preserved for this end-time. The entire program is divinely orchestrated of God.

## **Is there a Purpose?**

Unexpectedly, mysteriously, and suddenly, mankind is being challenged and wooed to come to its senses—to open its eyes. God is unveiling His Clock that has been ticking through the ages. Man’s long and arduous journey through history has come to its appointed end-time. The revelations that are being brought to view, will effect attention, respect, and confidence, and will bring them to an awareness of His great and glorious Plan. It is a plan that will affect the lives of all mankind. Man’s destiny is a beautiful one.

## Describing the Clock

The Clock is drawn to resemble the everyday clock used by all. But there is a difference. The difference is that the everyday clock compasses a twenty-four hour solar day in two twelve-hour circuits—one series from midnight to noon, and second series from noon to midnight. This Clock's design encompasses a twenty-four hour solar day in one twenty-four hour circuit, from 0000 hours to 2400 hours, like the clock used by the military and the ceaselessly operating world clock kept at Greenwich, England. God's end-time Clock begins at six o'clock in the evening and proceeds to six o'clock in the morning, and from six o'clock in the morning to six o'clock in the evening—one twenty-four hour circuit. Look at the scale drawing designated Figure 1. This is the rendering of the face of the Cosmological Clock.

You will find two small circles drawn within the three larger outer circles. You will find two equilateral triangles, one with its point upward, and one with its point downward, but each pointing to numbers on the face of the Clock as well. The dimensions of each circle composing the Clock's face are not arbitrarily drawn. The innermost circle represents the Moon's circumference—6,788.6 miles (using  $22/7$  for Pi).

The next circle outward from center is arbitrary and used for the purpose of installing numbers; all to be explained. The smallest of the three outer circles represents Earth's circumference—24,883.2 miles.

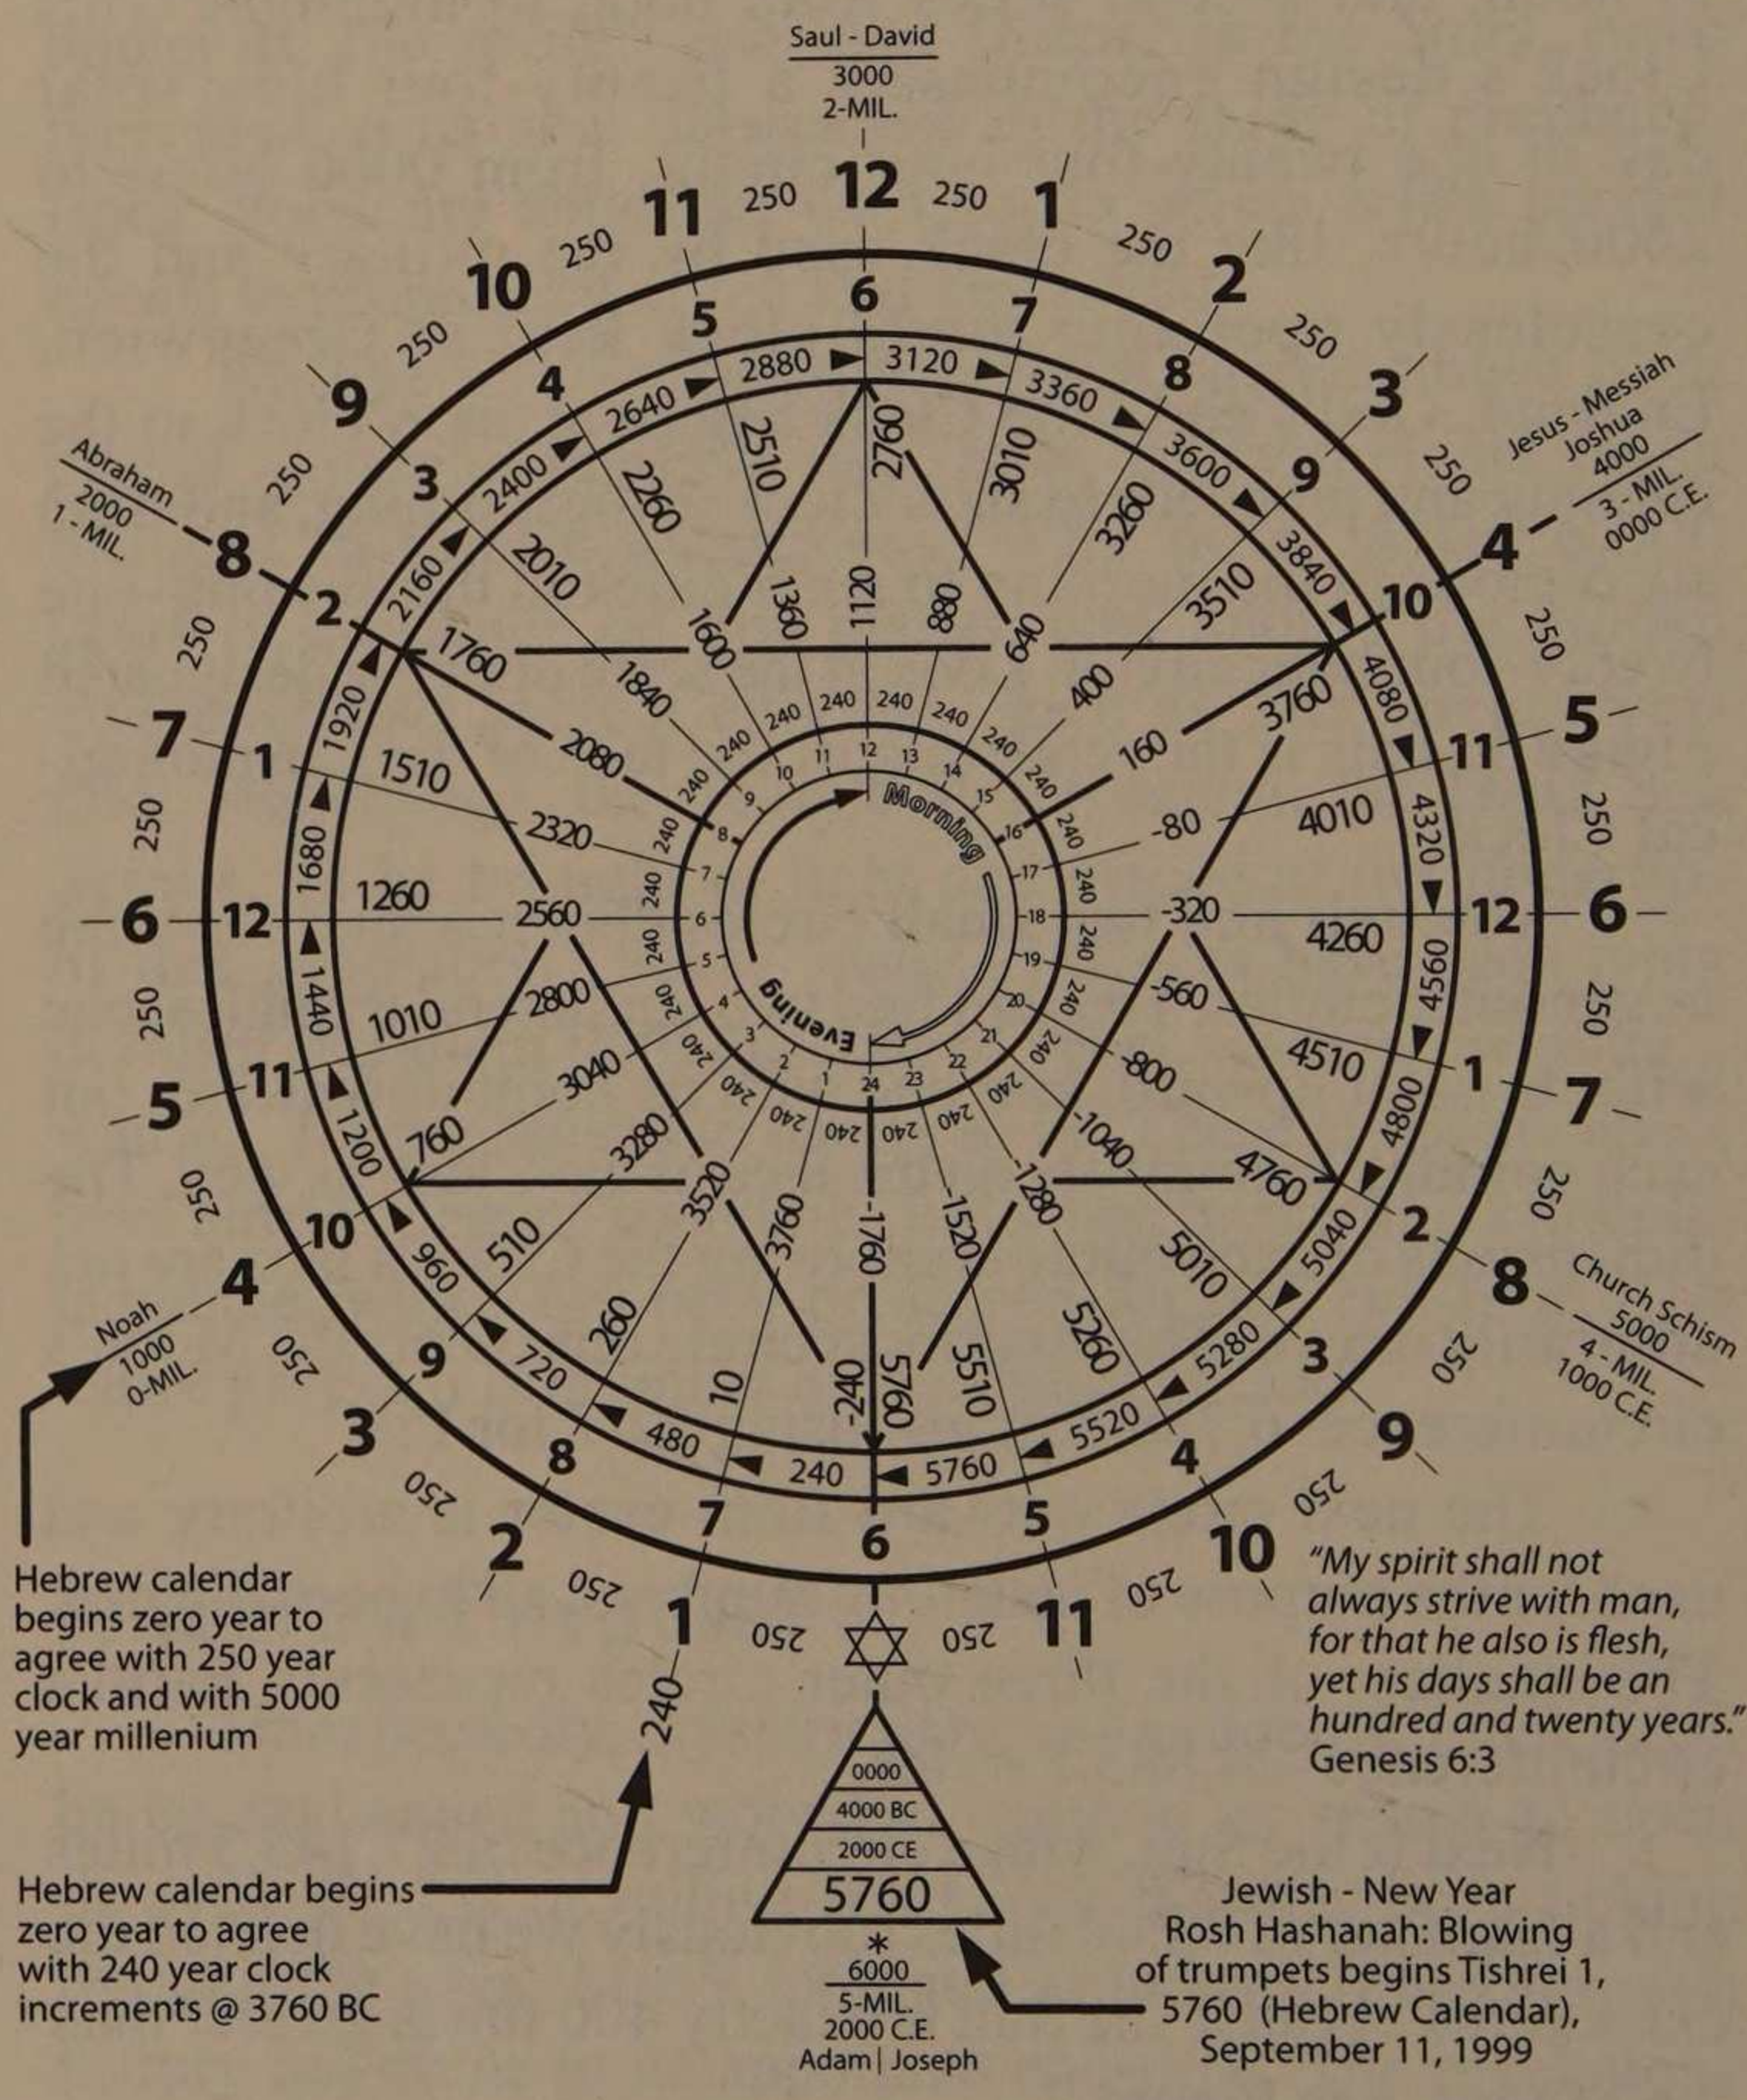

Next is the Sun, with a circumference of 27,145.3 miles and a diameter of 8,640 miles (obviously we have deleted the extra zeros because the Sun is exactly 400 times greater than the Moon). See Figure 2.

The largest and outermost circle combines the Earth's and Moon's circumference (that is, the circumference of a circle drawn on the combined diameters of Earth and Moon.

# Figure 1

## New Day 7th Day Begins

### Last Days - End Time

(This circumference is 31,680 miles. Thus: Earth diameter, 7,920, plus Moon diameter equals 10,080. ( $10,080 \times \text{Pi} = 31,680$ , using  $22/7$  for Pi.)

Much will be said in this book about the number 3168, in its various forms- 3168, 31680, 31.68, etc. Regardless of the zeros, the basic number is the same. It is one of the greatest symbolic numbers in the number code of the Bible. It is the Gematria value of the name **Lord Jesus Christ**, as it appears in the original Greek text of the New Testament. Remember this number—it will be repeated many times as we progress into the working of the Clock.

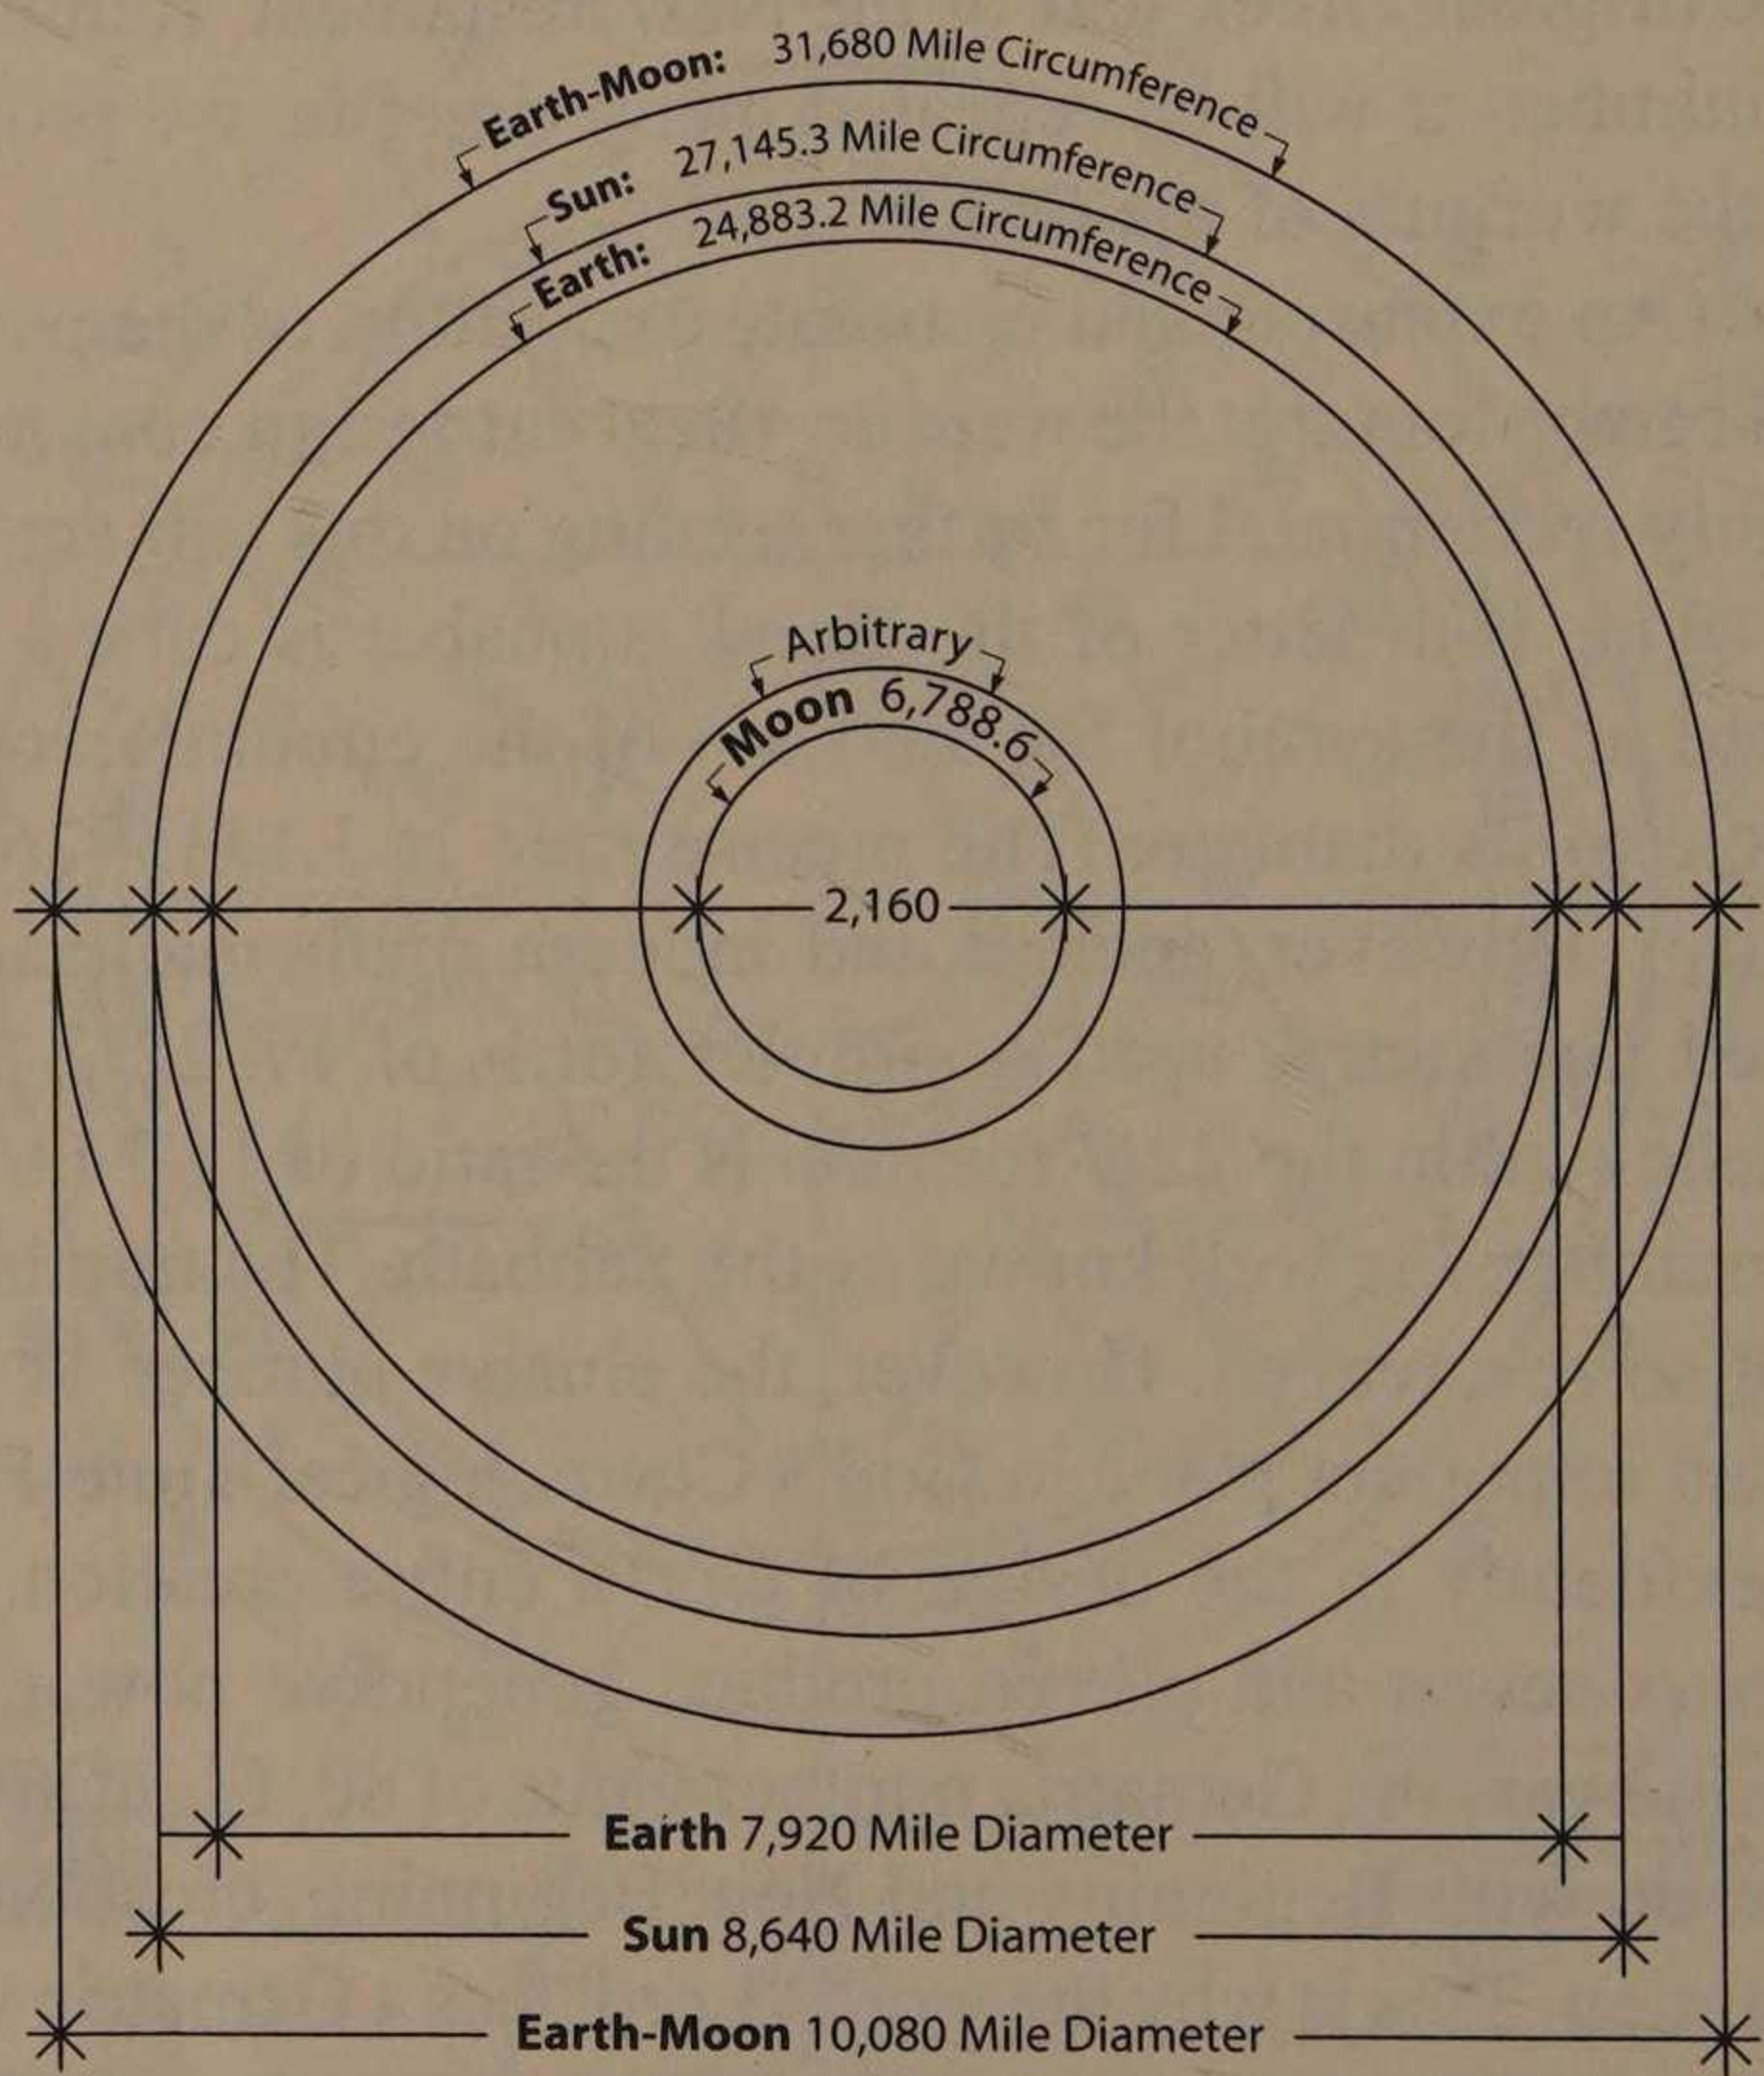

(An extensive and elaborate exposition of the number 3168 can be found at the website [thegreatdesign.com](http://thegreatdesign.com) which I highly recommend for further reading on this subject.)

The 16th letter of the Greek alphabet is called Pi. It is used as the symbol for the ratio of the circumference of a circle to its diameter. The precise ratio is  $3.1415926+$  (to infinity). However, ancient and modern mathematicians of Sacred Geometry, used a simpler form of Pi— $22/7$ . Held intrinsic within the  $22/7$  formula is the ratio of  $11/7$  ( $1/2\text{Pi}$ ). The number 7 is well known as the Sabbath. The number 11 is not so revered. However, the elusive number 11 does hold an important place in God's Cosmological Time-Piece, and evidently in the design of God's entire creation. The numbers seven and eleven produce generative power. The letter Pi bears the Gematria number value of 80. Eight always has to do with Beginning and New Beginning—creation and restoration. This is why the word "Lord" has a Gematria value of 800, and the name "Jesus" has a Gematria value of 888. In fact, the word "*beginning*" in the Hebrew Old Testament has the Gematria value of 8. And the very life-giving oxygen that we breathe bears the atomic number 8. The "*breath of God*" as is symbolized in the Hebrew letter *chet*, has the Gematria value of 8. The association of the letter Pi to the number 11

Figure 2

# Sun, Earth, Moon and Earth-Moon

Includes Arbitrary, As Well

is that when it is capitalized, it is written as two pillars, as a unit, side by side, just like the number 11—thus II.

The first book of the Scriptures is called Genesis—a term which comes from the Greek language, meaning “*generation*.” For emphasis, God in His wisdom supplied a total of eleven generations in the book of Genesis. The eleventh and last generation mentioned is the generations of Jacob (Genesis 31:2). The book ends with Joseph, the eleventh son of the eleventh generation, dying at the age of one hundred ten (11(0) years old. (Genesis 50:26)

After the creation of our planet, God adorned it and gave it an abundance of life. This He did by eleven “utterances” — “*And God said.*”

## **What Does it all Mean?**

Within these four circles whose dimensions are given—Earth, Moon, Sun and Earth/Moon—are important esoteric relationships, each individually and interrelated as well. These esoteric relationships, by careful pondering and comparing with Scripture will activate one’s innate being, and thus bring forth one’s comprehension from the within-realm to the outward man—an enlightening awareness!

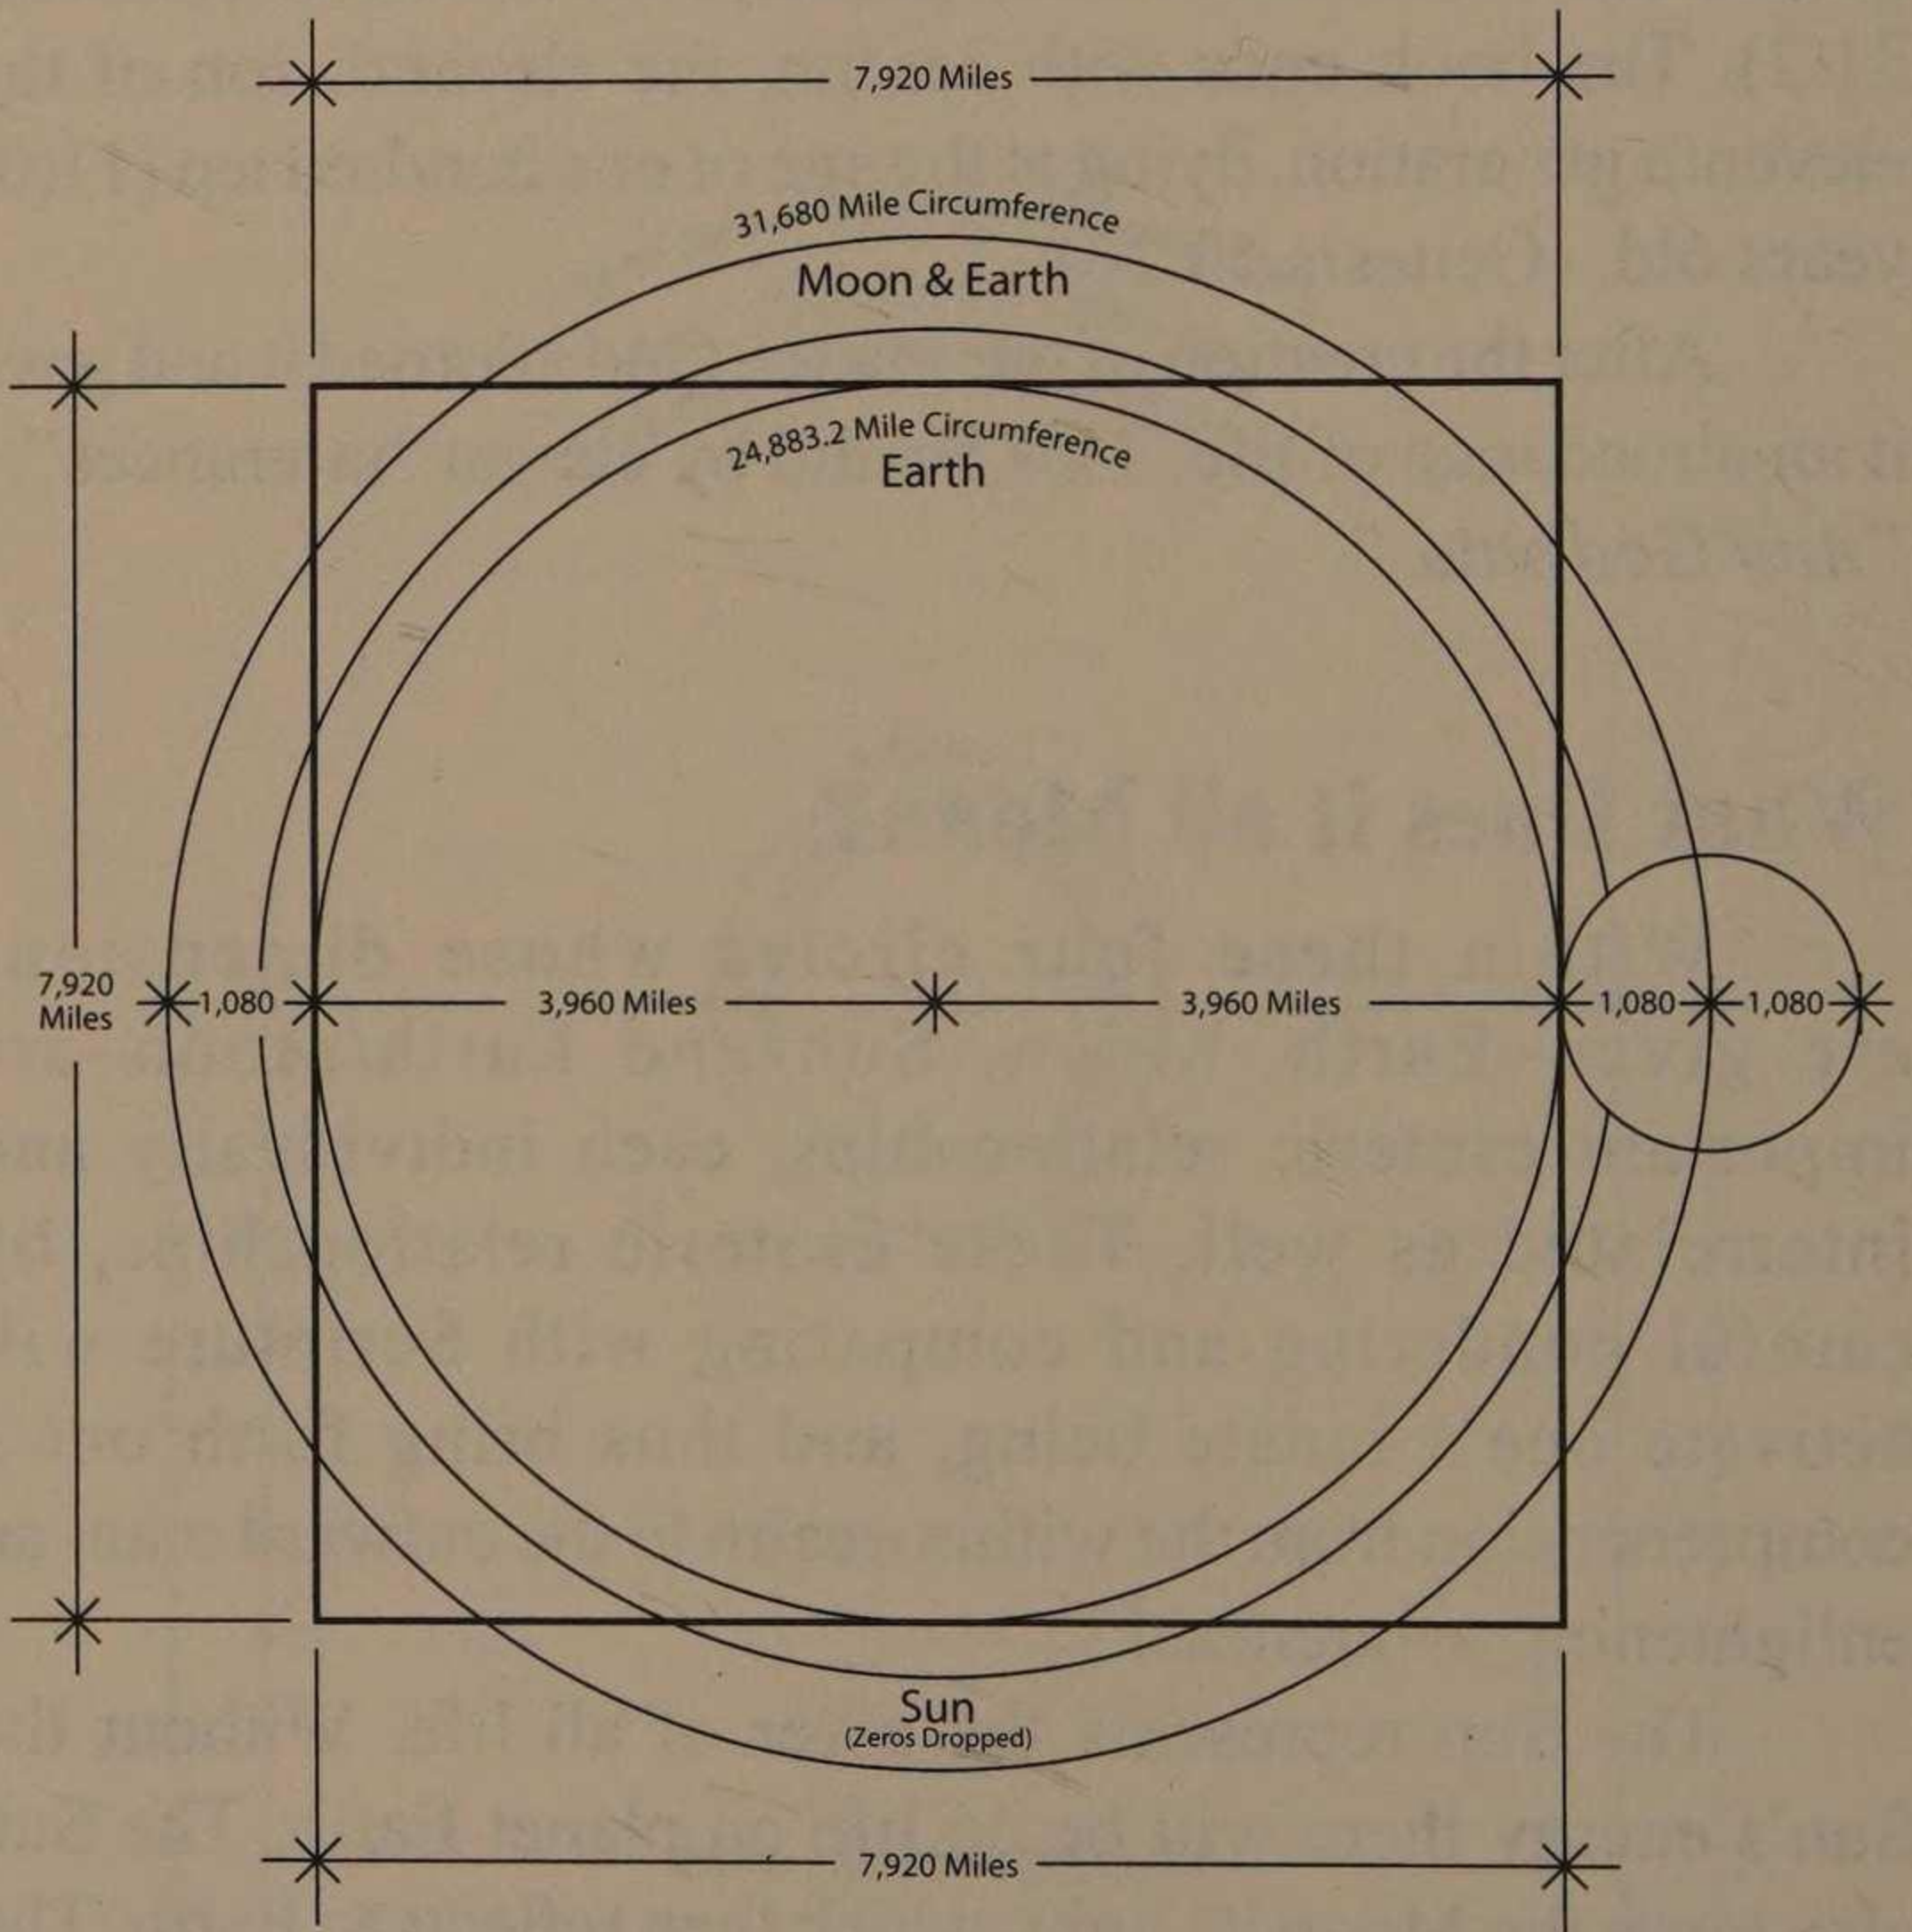

The Sun represents the giver of all life. Without the Sun’s energy there will be no life on planet Earth. The Sun also gives the Moon its light, which then reflects to Earth. The Earth represents mineral, vegetable and animal, and consequently mankind—the home of every living organism.

As for the Moon, it is called the great measurer. In the etymology of the Bible word “*cubit*” we find it has its root in the Hebrew word “*mother*”; properly a mother (i.e., unit) of measure. The word “*measure*” is intrinsically associated with the Moon. The Jews even today measure their holy

Figure 3

# Marriage Of The Circle To The Square

## The Face Of The Clock

Four times 7,920 miles equals 31,680 miles.

days in accordance with the time of each full and new Moon appearance. The Moon influences the rising and falling of tidal waters of the oceans, influencing Earth's vitality, the periods of the female, the unconscious intuitive part of the mind and the spirit that moves oracles. It also relates to the measurement of time and the heavenly bodies. This arises because the Moon is said to be the first source and standard of measure. There is a similarity in the Greek words for measure, mother, moon, and month, i.e., *metron*, *meeteer*, *meenee* and *meen*. The English words menses, menstruation and mensuration are also seen.

## The Perfect Square

The mean diameter of the Earth is 7,920 miles. The perimeter of a square drawn around this diameter measures 31,680 miles—the exact measure of a circle drawn on the combined diameters of the Earth and Moon. Thus giving the relationship of the marriage union of the circle and the square. See Figure 3.

The number eleven is the number for generation, or re-generation, by means of division and addition. As an example: in music, without the number eleven, music will not reverberate and generate concordantly. Knowing this, divide the number 31,680 by 11. The result is 2,880. Add this to 31,680 and the result is 34,560 (the exact perimeter of a square drawn around the Sun, with zeros dropped). Thus showing the marriage relationship of the Sun to the Earth and Moon.

The secret to the 360-degree circle is suggested as well, because  $3 \times 4 \times 5 \times 6 = 360$ . The Sun displays the number 360 twice. For if we consider the Sun's diameter at 8,640 (the same as a square drawn around the Moon), having dropped the extra zeros, and divide it by the number 24 (the divisions of the Clock), the result will be 360.

Furthermore, divide the number 34,560 by eleven, and the result is 3,141.818181, which by moving the decimal three places, reveals another form of Pi—because if we multiply 3.141818181 by 7,920 (earth's diameter), the result is 24,883.199, the earth's mean circumference in miles.

The numbers seven and eleven are intrinsically Pi related because eleven divided by seven is one-half Pi. The numbers seven and eleven hold an important place in God's Plan.

## The Equilateral Triangle

Inscribed within the Clock's face is a six-pointed star called the Star of David (Mogen David) or the Seal of Solomon. It is also a hexagram. The Star of David is the emblem of modern Israel. This symbol is formed by the overlapping of two equilateral triangles placed concentrically with each side of a triangle parallel to a side of the other and on opposite sides of the center. One triangle always points up and the other points down. However, the exciting thing about this six-pointed star is that it is replete with Golden Proportions.

The self-repeating Golden Proportion shows itself in nearly every facet of God's Plan for man. It particularly relates to Israel and Jerusalem. In Isaiah 40:1 God has prophesied that after Israel has been punished for her sins He will bless her. And the prophecy makes the beautiful statement:

*“Comfort, O comfort My people, says your God. Speak lovingly to the heart of Jerusalem—yea, cry to her that her warfare is done, that her iniquity is pardoned; for she has received of the Lord's hand double for all her sins.”* (Isaiah 40:1-2)

In this comforting Scripture, we find the gentle and

soothing effect of the Golden Proportion given as the name for Jerusalem. The statement: "*the heart of Jerusalem*" has a Gematria value of 618 (the Golden Proportion is .618). This Scripture also tells us the One who will effect this comfort—it is their Messiah. The statement, "*she has received of the Lord's hand double for all her sins*" has a Gematria value of 888 (the number 888 is the value of the Greek spelling of "*Jesus.*")

It is fitting that the emblem for Israel bears so many Golden Proportions. As that flag waves above Jerusalem, it is proclaiming the promise that God will comfort Jerusalem and bring her peace. It is also fitting that this six-pointed star adorns the face of the Clock, assuring all mankind (represented by six) that at the conclusion of 6,000 years, a new era begins, which will ultimately bring peace and comfort to a war-weary world.

Notice that the apex of the inverted triangle points to the number 6. It is the time of the creation of Adam. Adam was created perfect, and the number six applied to him. However, when he sinned he lost his perfection, yet the number 6 still applied to him. Thus it applies to all mankind. The number six does not represent sin as many suppose. It represents man and the earth that was given to man for his home. When Adam sinned, the number six still applied to him, thus now we think of six as representing sinful man. But in God's great Millennium, when the Kingdom of Jesus Christ rules the world, the six pointed star (two equilateral triangles) will bring peace and comfort, not only to Israel, but to all mankind.

The prophet Zechariah said: "*In that day, ten men from all languages and nations (the ten divisions of man's New World Order) will take hold of the skirt of the Jew and say, 'Let us go with you, because we have heard that God is with you.'*"

Yes, peace will be brought to this war-weary world through the number six—the number of the Star of David that adorns the face of the clock.

## Sun-Earth-Moon

In Genesis 1:14-19, referring to the Sun, Earth, Moon and stars, God said:

*“Let there be lights in the firmament of the heaven to divide the day from the night; and let them be for signs, for seasons, for days, and years: and let them be for lights in the firmament of the heaven to give light upon the Earth; and it was so. And God made two great lights; the greater light (Sun) to rule the day, and the lesser light (Moon) to rule the night. He made the stars also. And God set them in the firmament of the heaven to give light upon the Earth, and to rule over the day and over the night, and to divide the light from the darkness: and God saw that it was good. And the evening and the morning were the fourth day.”*

God’s day begins in the evening and ends the following evening. We see that the Sun, Earth, Moon and the stars are made to be for *“signs and for seasons and for days and for years.”* Signs! Signs! Signs! Signs made for us to heed! These signs in the Sun, Earth, Moon and stars are telling us many many things, much of which we are yet to understand. However, the relationship of the Sun, Earth and Moon as seen on the face of the Clock is an amazing relationship, showing the inter-dependence of each with the other by the relationship of the amazing mathematics involved.

## The Numbers on the Clock

Before continuing, we should learn what the numbers on the clock represent. (Use Figure 4 for this description.)

There are three different calendar times that circle the Clock, with three different starting times. First is the Hebrew clock of two 12-hour periods in one cycle, in which time begins at six o'clock in the evening; second is the common secular counting of two 12-hour periods in one cycle; and third is the military type clock with one 24-hour cycle.

The outermost numbers on the Clock represent hours beginning at zero; and the number 12 begins at the inverted apex of the equilateral triangle and proceeds to 12 at the apex of the upright triangle. At the top apex the count repeats itself from 12 back to zero—two twelves in one 24-hour cycle. These numbers are the Hebrew counting of time, beginning with the first hour of the day, which is six o'clock in the evening.

The second set of numbers inward denotes secular time beginning at the inverted apex, with six o'clock in the evening, circuiting clockwise in 250-year intervals.

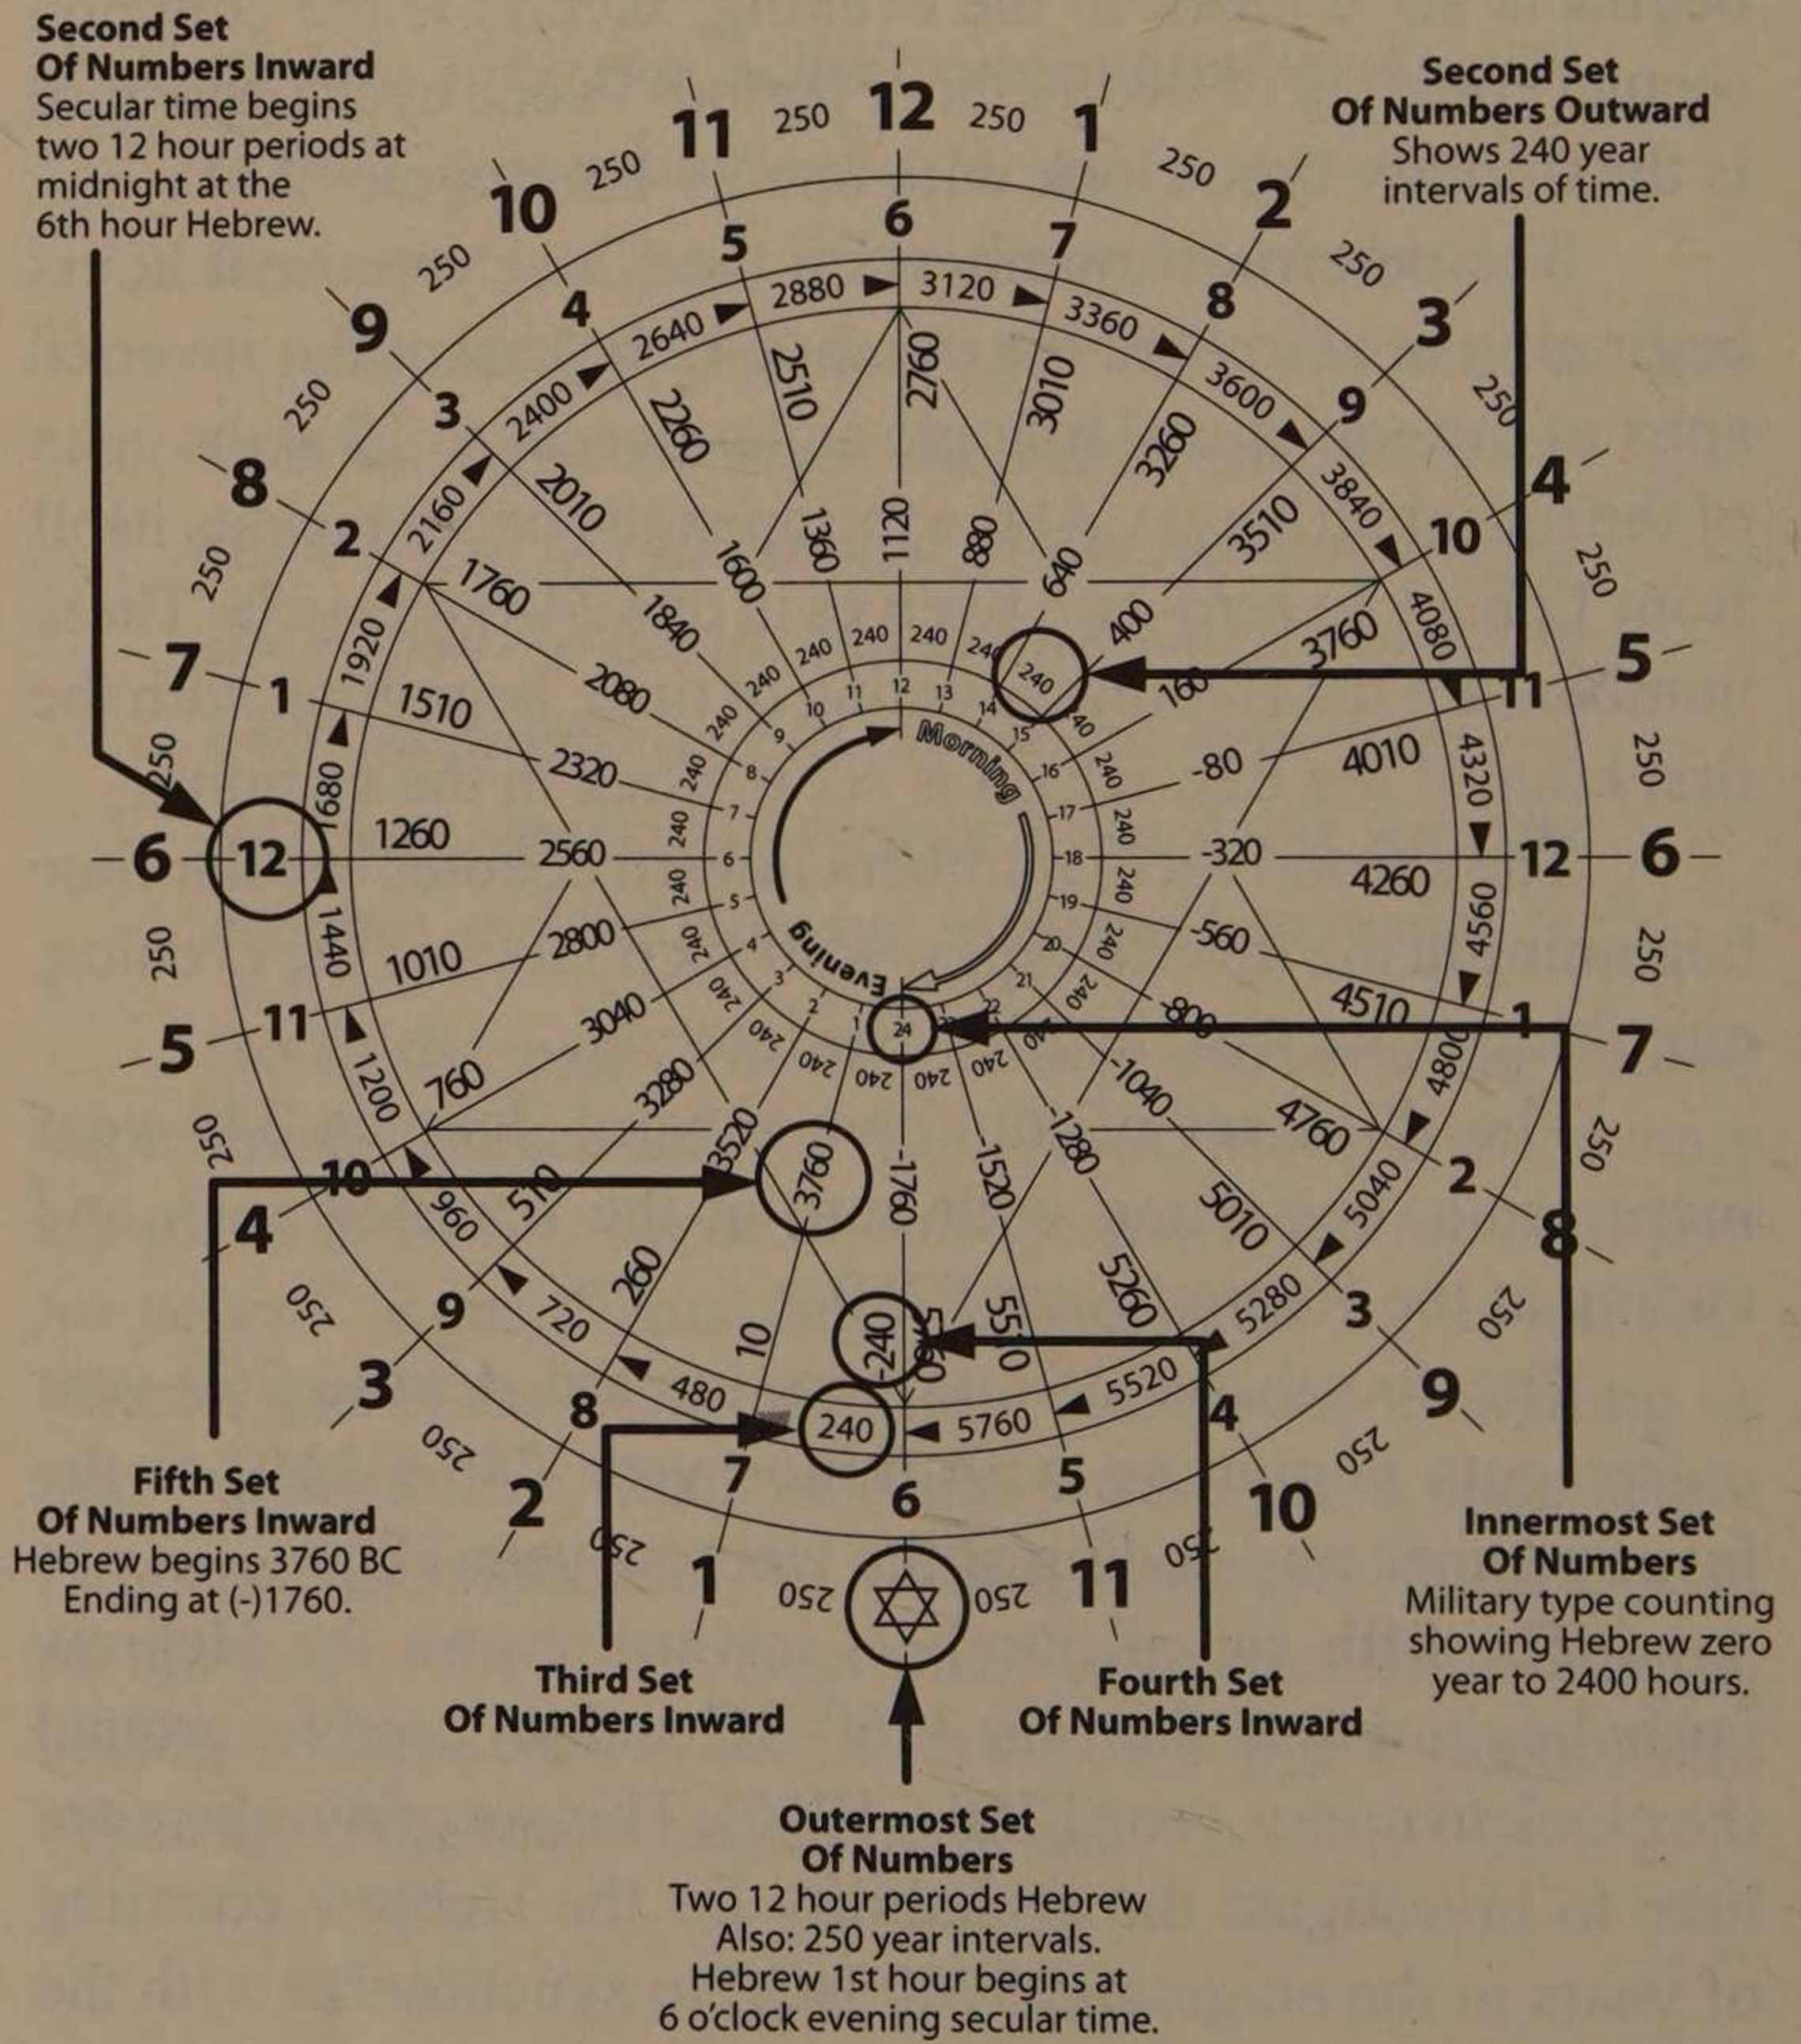

The third set of numbers inward denotes 240-year increments, beginning with zero at the inverted apex and ending at the Hebrew year 5760.

The fourth set of numbers inward denote 250-year increments beginning with minus year 240 (-240) at the inverted apex and ending at the Hebrew year 5760.

The fifth set of numbers inward shows the Hebrew years beginning at the year 3760 BC and proceeding around the clock to minus year 1760 (-1760). This set of numbers are here to investigate the probability for the Hebrew counting of years in the enigmatic 3760 BCE to synchronize with the BCE calendar, year for year.

The second set of numbers outward from center contain 24 numbers, highlighting the number 240 or 24(0) which denotes the amount of years passing for each hour on the clock,

Figure 4  
**Clock Description**

bringing us to the Hebrew year 5760 ( $240 \times 24 = 5760$ ).

The small inmost circle is the military type counting from zero to 24.

## The Amazing Inverted Triangle

Observe the three corners of the inverted triangle and marvel at their relationships chronologically. Beginning at zero-Adam at the inverted apex, which is zero Hebrew and six o'clock secular, follow the inverted triangle upward to the left, clockwise, to the left apex, which lands at number 2. This is the time of Abraham, who was called "*The father of nations*"—the man to whom God gave the promise and the covenant.

Follow the inverted triangle clockwise to the second apex. It points to the number 10. This is the time of Christ-Messiah who was called the Son of God, and through whom God's promise to Abraham was fulfilled. Christ arrived at number 10 on the Clock (year 4000).

From Christ, follow the inverted triangle down to its bottom apex—it points to the lapse of 6,000 years from the beginning, and ending at exactly 24 hours. This is the Hebrew year 5760 and the secular year 1999 (Rosh Hashanah).

The number 5760 is the Gematria value of the Greek word *pneuma*, which is translated spirit (576).

Amazingly these three points of the inverted triangle represent Father (Abraham), Son (Jesus), and Spirit.

But notice on Figure 5 where the three points of this inverted triangle are positioned. They land on three segments of eights—888. We have seen that the number 888 is the Gematria value for Jesus as it is written in the Greek text of the New Testament. Thus, what we have here, in this inverted triangle, is the story of redemption. It goes from Adam to Abraham, to Jesus, and back to Adam. The story it tells is

the complete cycle of man's experience with sin, and the redemption from that sin.

Adam had been created perfect. But he chose to disobey God and therefore experienced the penalty for sin, which is death. Abraham received a promise from God that through his "seed" (which was Christ) all the families of the earth would be blessed. Jesus came to earth and paid the price of the sin of Adam. In so doing, he became the "second Adam." So, in this amazing triangle, we go from Adam to Abraham and back to Adam, but this time it is the "second Adam." This bottom apex of the inverted triangle represents the end of 6,000 years of time from the creation of Adam. It is also the place of the sum of the three eights. Obviously,  $3 \times 8 = 24$ . This point on the Clock is the complete circuit of 24 hours.

This display of 8s is consistent with the circle of the Clock. If we add the sum of the digits from 1 through 8, we get a total of 360—the number of degrees in the circle.

The sum of the digits can be further reduced by adding  $3 + 6 + 0 = 9$ . The number nine denotes finality, because it is the last of the digits. Ancient mathematicians called nine the "horizon." And yes, it is indeed the horizon, because beyond this point on the Clock we come into a new era—one that will bring peace to the earth through the Millennial Kingdom of Jesus Christ.

On the Clock, we went from "beginning" to the "new beginning." This is represented by the numbers 1 and 8, whose sum is 9. The number one represents unity and is the beginning of creation. God made the heavens and the Earth, and all that is therein in six "days." On the seventh day, *i.e.*, the last day, God rested. This is the reason for our seven-day calendar week. When the week following begins with a new day it is called the first day, however, it is also the eighth day (day eight and day one overlap). Likewise, the Earth and all that therein is, has transited through a six-thousand-year "day" since the creation of Adam. There remains a seventh.

Figure 5

# Three Times Eight = 24 Hours

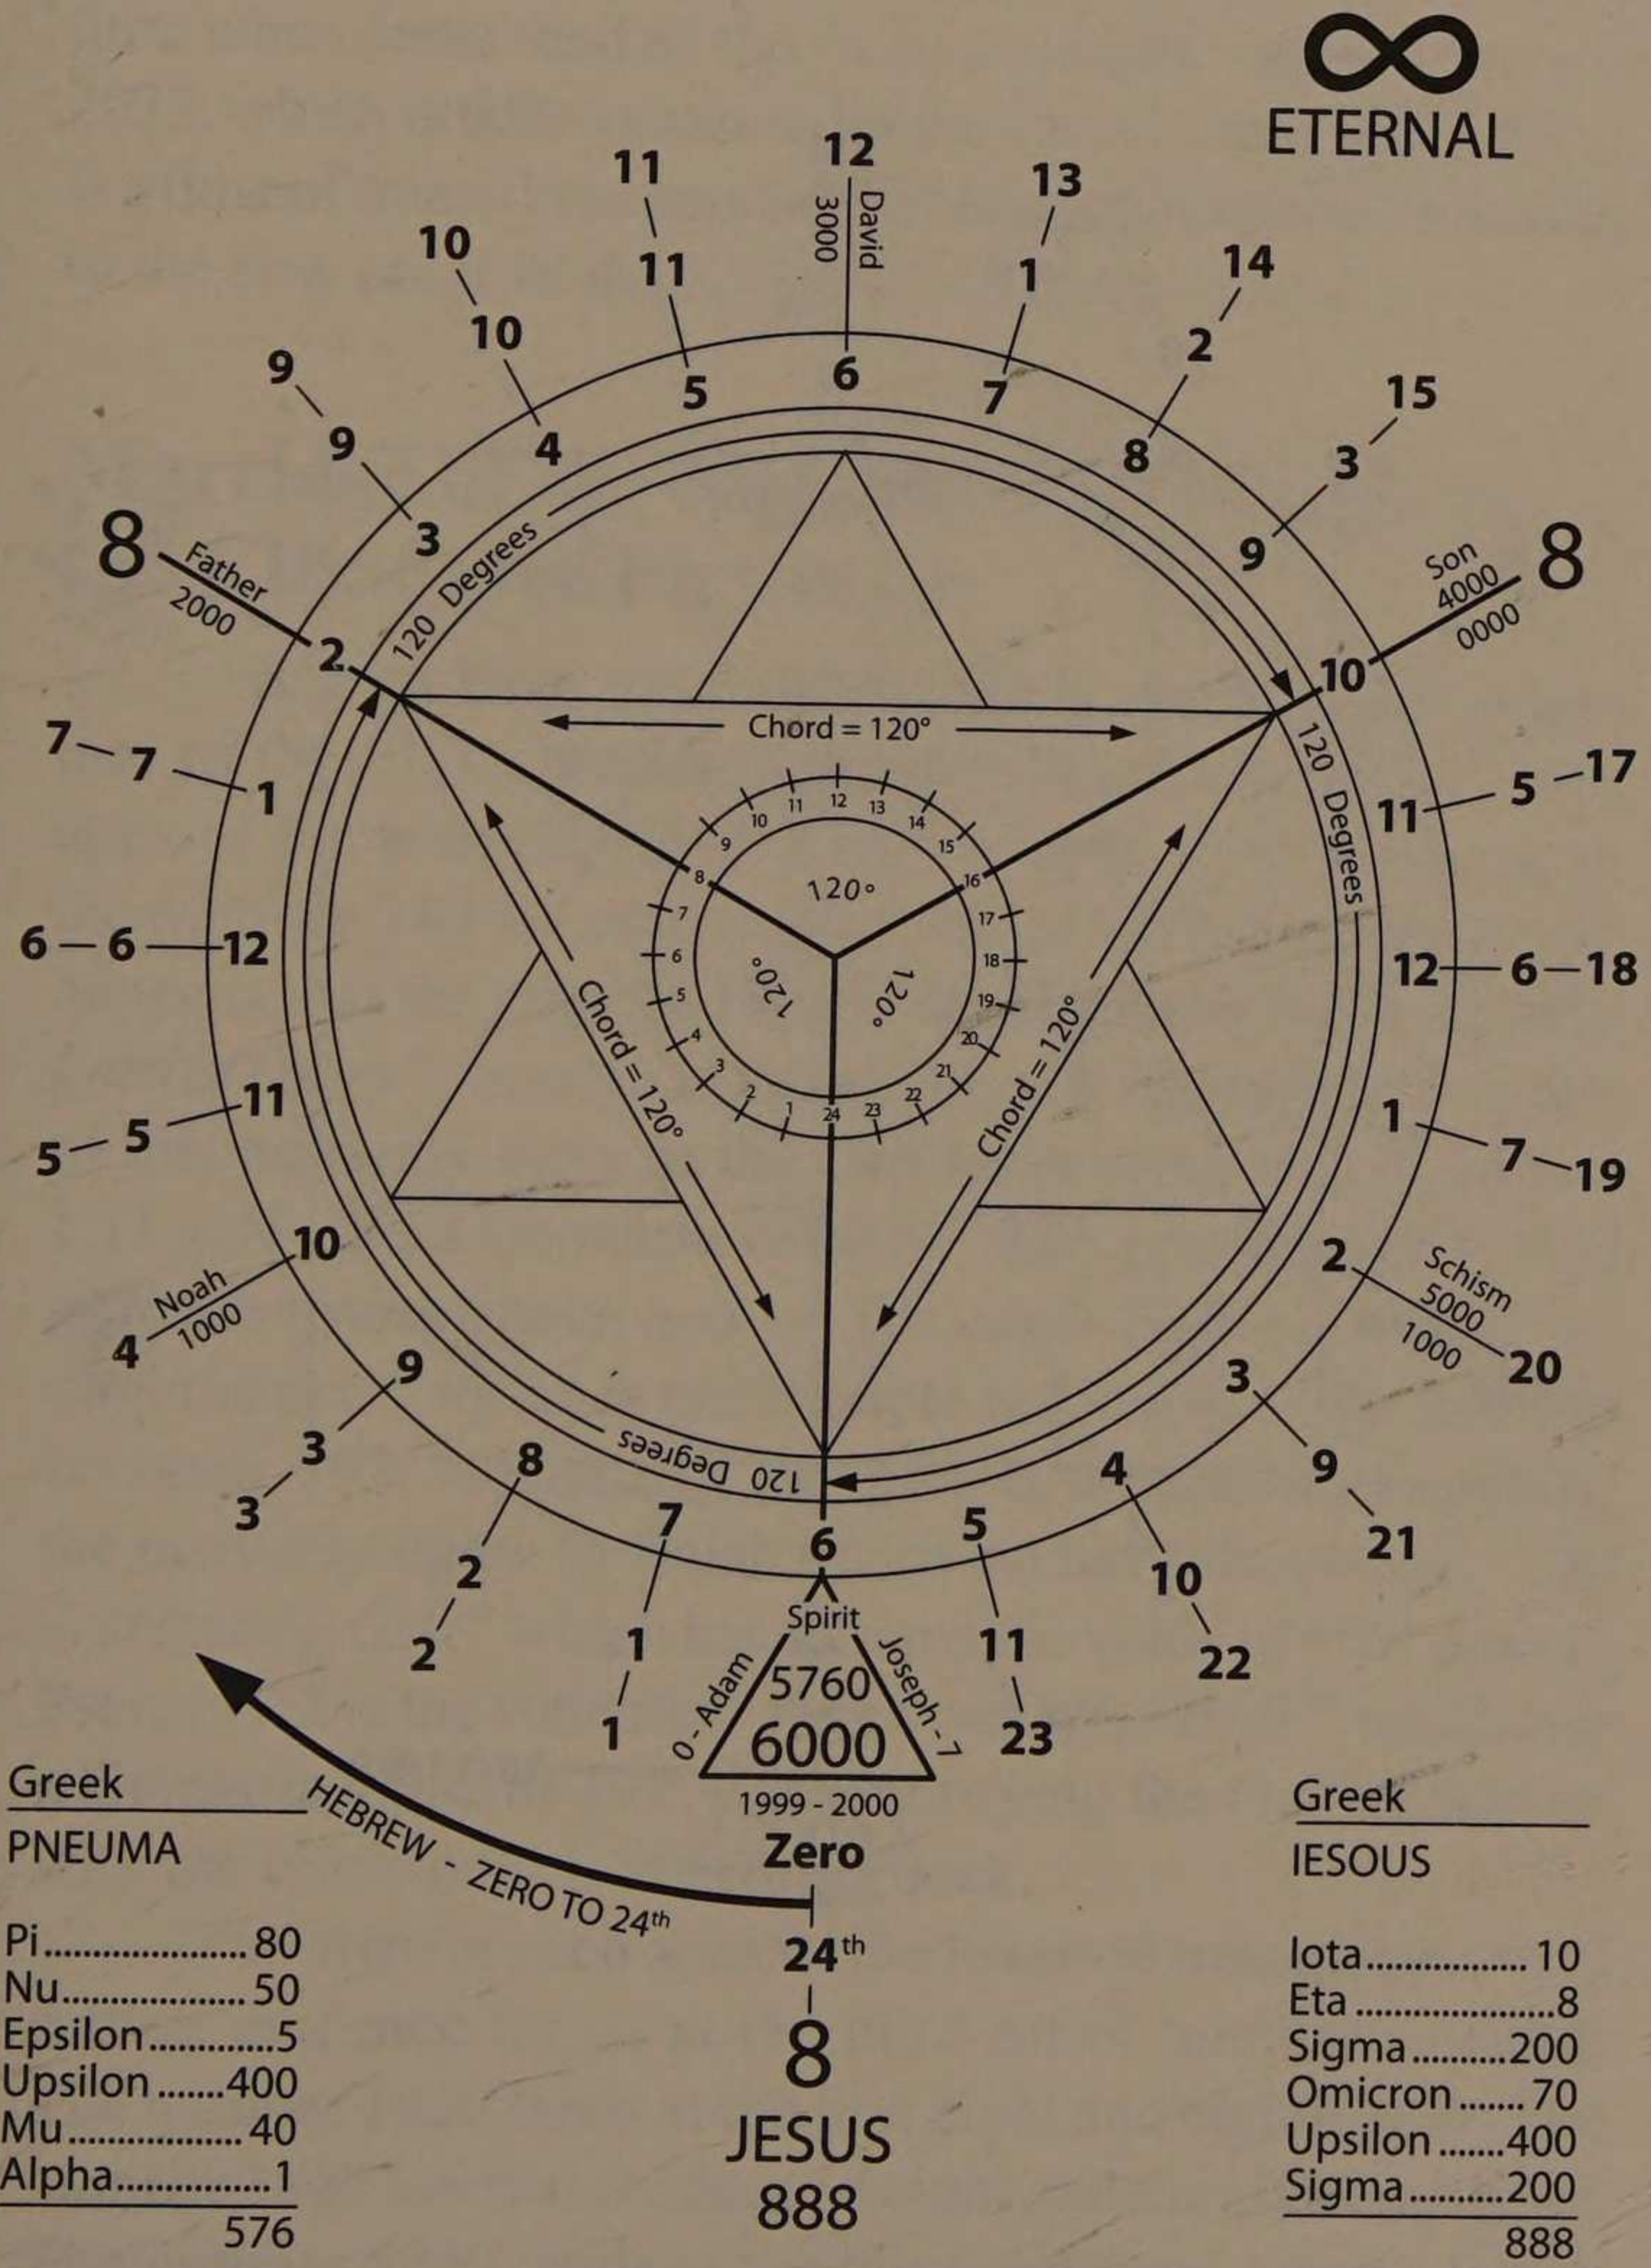

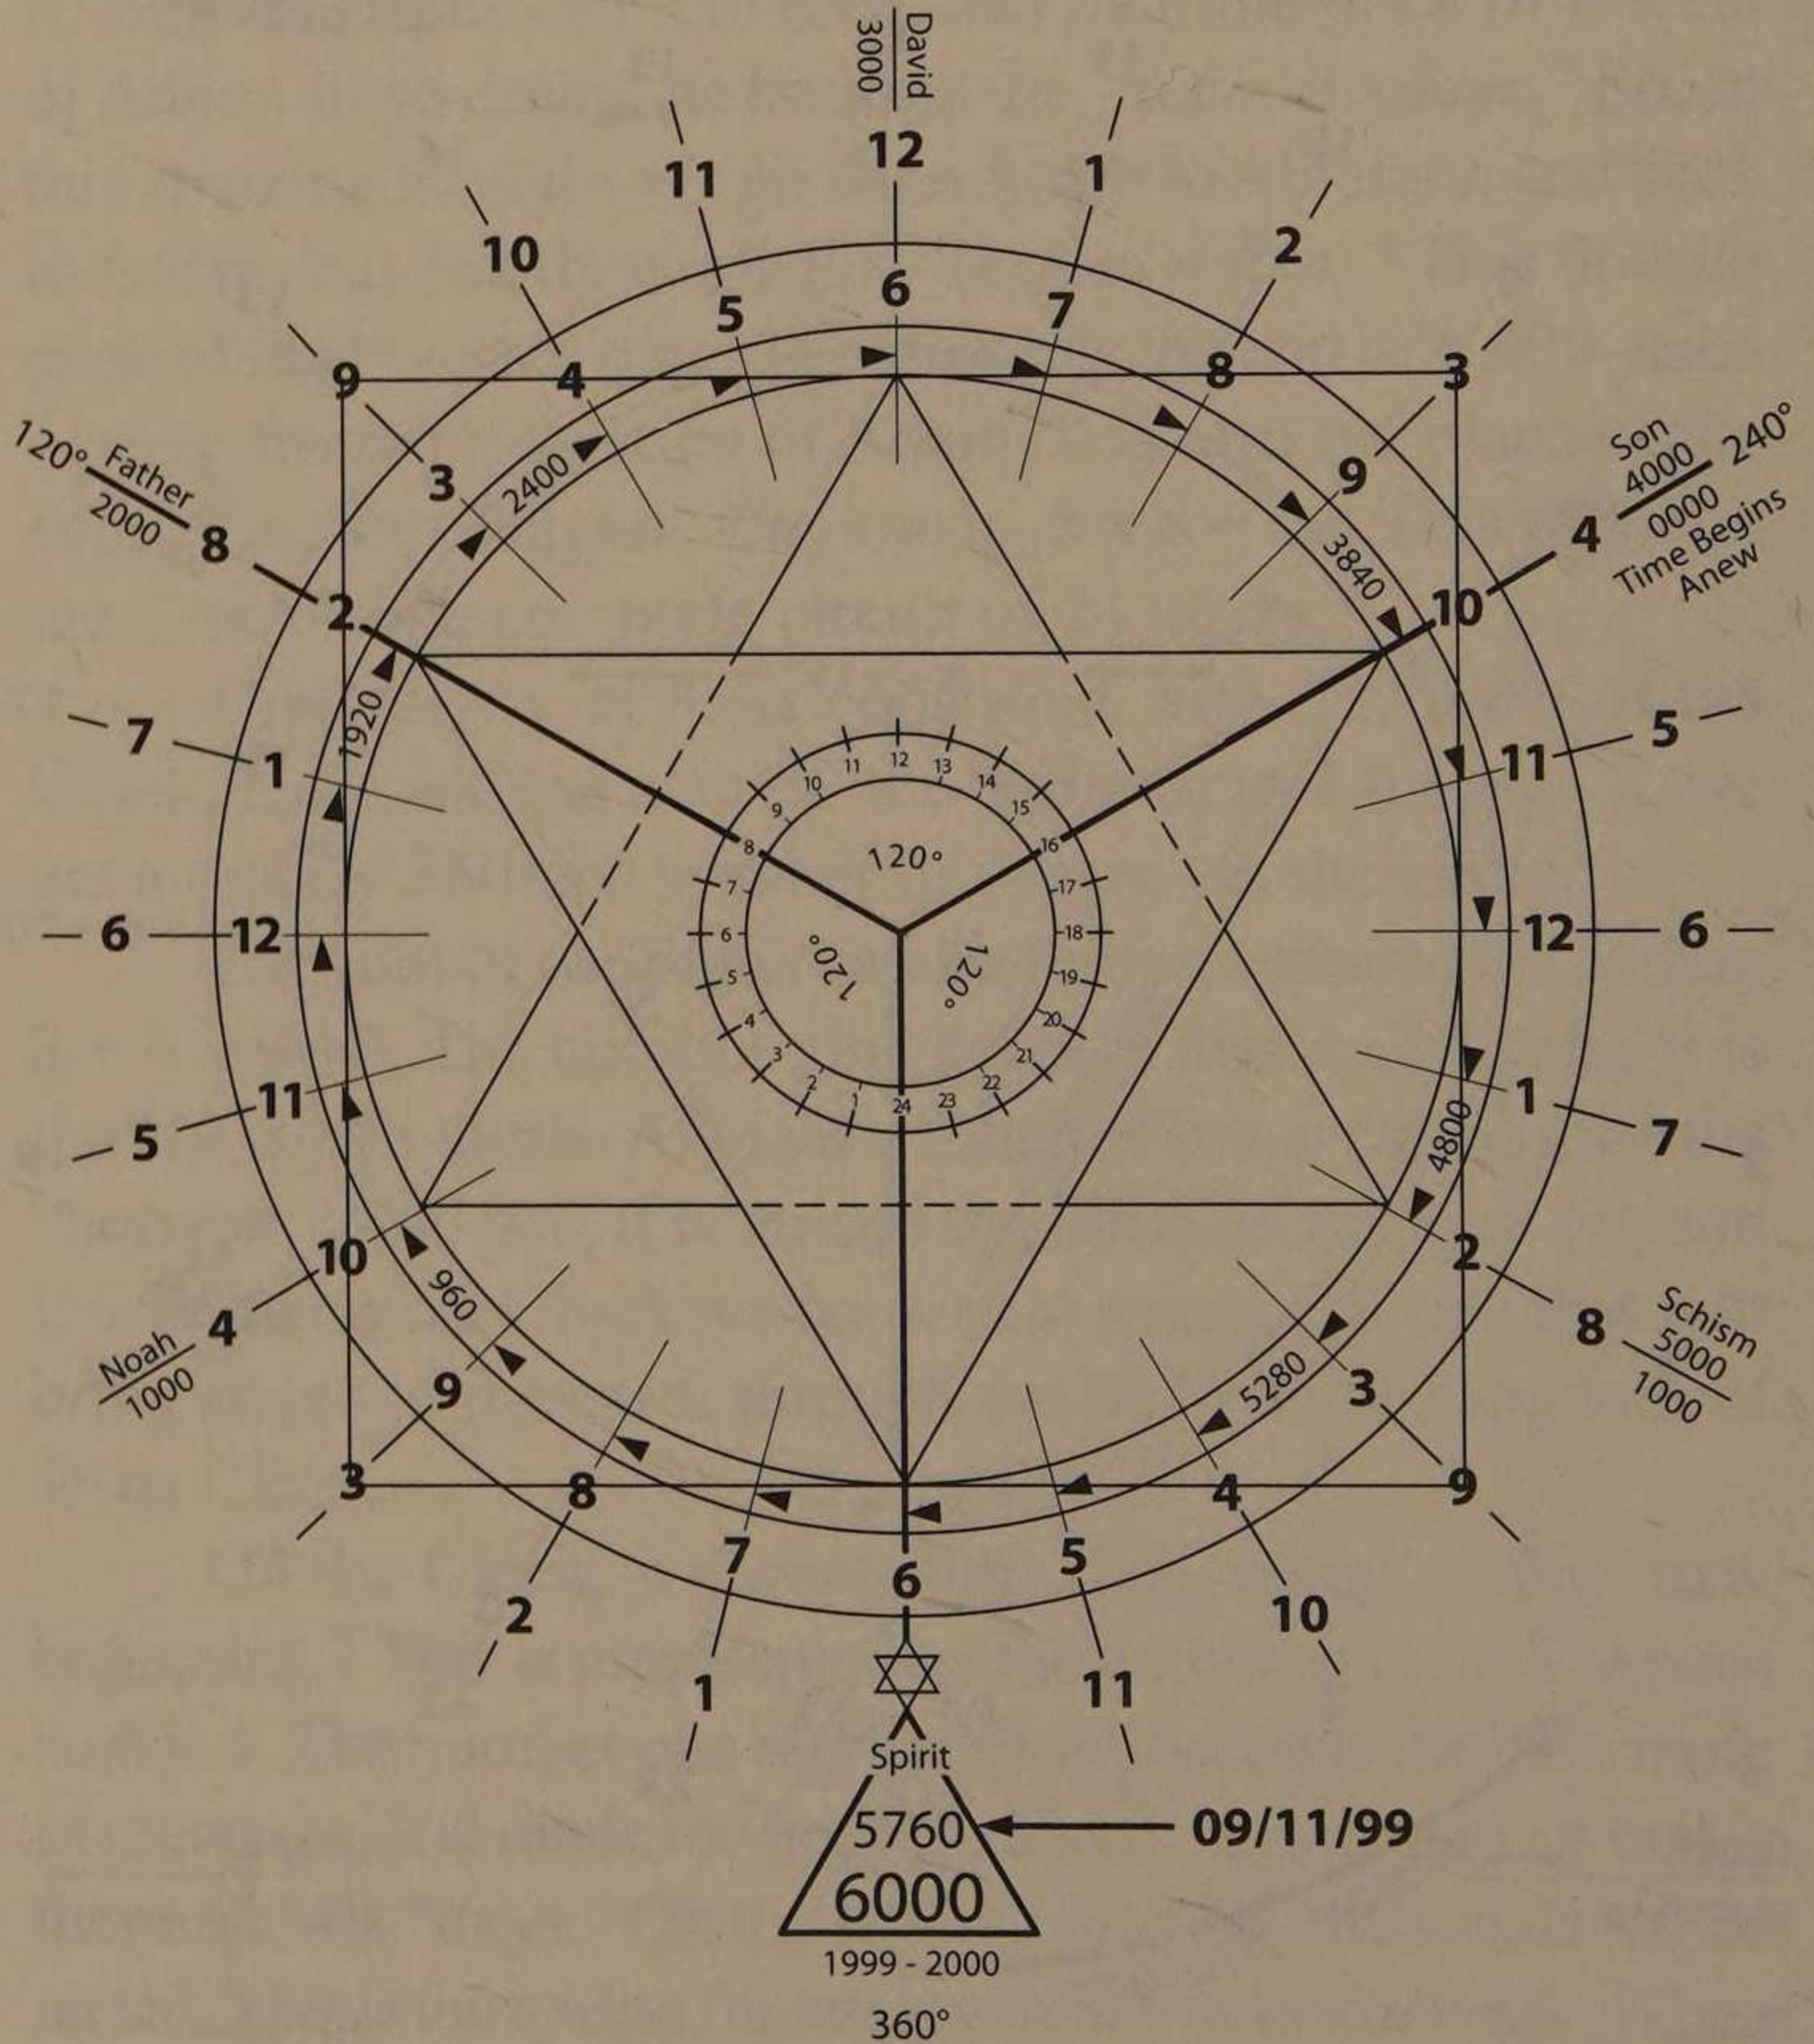

Figure 6

# Marriage Of The Equilateral Triangle To The Circle And Square

The Face Of The Clock

The day of Jesus' birth marked the ending of 4,000 years from the creation of Adam. However, it was 33-1/2 years later when Jesus died. Thus 6,000 years from the creation of Adam brings us to the date of Rosh Hashanah 1999, which is the beginning of the Hebrew year 5760. Yet, 2,000 years from the time when Jesus died as the "*second Adam*" will be the year 2033, which is 6,000 years from the **sin** of Adam. The interim is a time of transition from the old order of man's governments to the new order of the Kingdom of Jesus Christ.

## **Marriage of the Equilateral Triangle to the Circle (see Figure 6)**

We also have the number 240 in each fifteen-degree turn of the circle, landing 8 times between each 120-degree apex of the triangle. Thus if we multiply those 8 places by the number 240 we obtain the number 1920—fantastic! It so happens that the number 1920 is the Gematria value of "*The Lord of Glory*" found in I Corinthians 2:8. Also the description of this heavenly diety in the Old Testament book of Joshua 1:11 again has a Gematria value of 1920. It reads "*He is God in the heavens above and on the earth below.*" And if we drop the zero, which is permissible in Gematria, the number becomes 192. Amazingly this also is a number describing the heavenly deity. In Isaiah 40:28 we have the phrase, "*the everlasting God*" which has a Gematria value of 192. Also in Psalm 47:2 is the statement "*the Lord Most High*" which has a Gematria value of 192. It is identifying the God of heaven with the circle on this amazing Clock.

The eight at each apex of the inverted triangle provides further evidence for us at the third set of numbers inward. The number 1920 lands at the first eight and eighth hour. The number 3840 lands at the second eight and the sixteenth hour. The number 5760 lands at the third eight and twenty-fourth

hour. Divide each of these landing points by 8. ( $1920/8 = 240$ ;  $3840/8 = 480$ ;  $5760/8 = 720$ ) The total of these three numbers becomes 1440. ( $240 + 480 + 720 = 1440$ ) The 144,000 are those who stand with the Lamb of God on Mount Zion in the symbolism of Revelation 7:1 In the 14th chapter of Revelation we find them again.

*“Then I looked, and there before me was the Lamb, standing on Mount Zion, and with him 144,000 who had his name and his Father’s name written on their foreheads.”*

These are the “*elect*” who bear the Gematria value of 144. They are those who have followed the Lamb. They are represented by the inverted triangle, whose three angle points add to 1440, but they are standing with the Lamb, who is represented by the circle. God, the Father, is also represented by the circle. He is from everlasting to everlasting, just like the circle which has no beginning and no ending.

Thus the three points of the equilateral triangle reveals the marriage relationship to the circle of the Clock. And in it we also find the elusive unity of the Father, the Son, and the Holy Spirit—the first point relates to Abraham (father of nations); the second point relates to Jesus (Son); and the third relates to the Holy Spirit (the Messenger).

## **One Hundred and Twenty Years**

In Scripture, the number 40 is associated with a period of probation, chastisement and trial. Noah and his family (eight souls) spent 40 days and 40 nights in the Ark during the down pouring. Moses spent 3 forty-year periods of trial in his lifetime of 120 years. The first 40 were spent in Egypt, being considered an Egyptian (supposedly the son of Pharaoh’s daughter). The second 40 were spent in Midian, and the third 40 were spent with the Israelites wandering in the wilderness

of Sinai. Immediately after leading the Israelites out of Egypt at the time of the Exodus, Moses spent 40 days and nights in the holy mount receiving the Ten Commandments, and later, after the chastisement of the people, he went back up into the holy mount for another 40 days and nights, to receive anew the Ten Commandments.

When Moses brought the people through the wilderness to enter the promised land, God would not let him enter. *“And Moses was an hundred and twenty years old when he died.”* (Deut.34:7)

There are more than a dozen passages of Scripture that speak of 40 years or 40 days as periods of probation, chastisement or trial. Jonah prophesied to the people of Ninevah for 40 days, and the people repented of their evil ways. Jesus spent 40 days and nights in the wilderness being tempted of the devil.

Each 40-degree turn of the Clock is 666.666 years. Three 40-degree segments equals 1999.9, or 2,000 years. (See figure 7.)

120 is made up of three 40s. Applied to time it signifies a divinely appointed period of probation. On the Clock, there are three 40-degree arcs within each 120-degree turn. Three 120-degree arcs equal a 360-degree circle—one complete cycle of the Clock. Each 120-degree segment equals a 2,000-year period of time. Thus 3 times 2,000 equals 6,000 years of time on the face of the Clock.

However, there is another indication of 6,000 years that must be placed forward on the Clock. This is important. It does not negate anything on the Clock, but simply describes the necessary time involved. Adam did not sin on the day that he was created. It is obvious that he lived sinless in the Garden for 33-1/2 years, just as Jesus, his exact counterpart, lived 33-1/2 years as a perfect man, and then died to pay the price for Adam's sin. Therefore, on the day of Adam's sin, God spoke to him and said:

*“My spirit shall not always strive with man, for that he also is flesh: yet his days shall be an hundred and twenty years.”*

This 120 years could not begin with the creation of Adam for at that time he was perfect, and God’s spirit had no reason to “*strive*” with him. Adam was in a sonship relation to God. But when he sinned, it was necessary for God’s spirit to “*strive*” with him, for he had lost his perfection, lost his sonship, and lost his fellowship with God. Therefore the 120 “*years*” would not begin to count at Adam’s creation, but would begin to count at his sin. It is evident that those “*years*” were in actuality “*Jubilee years.*”

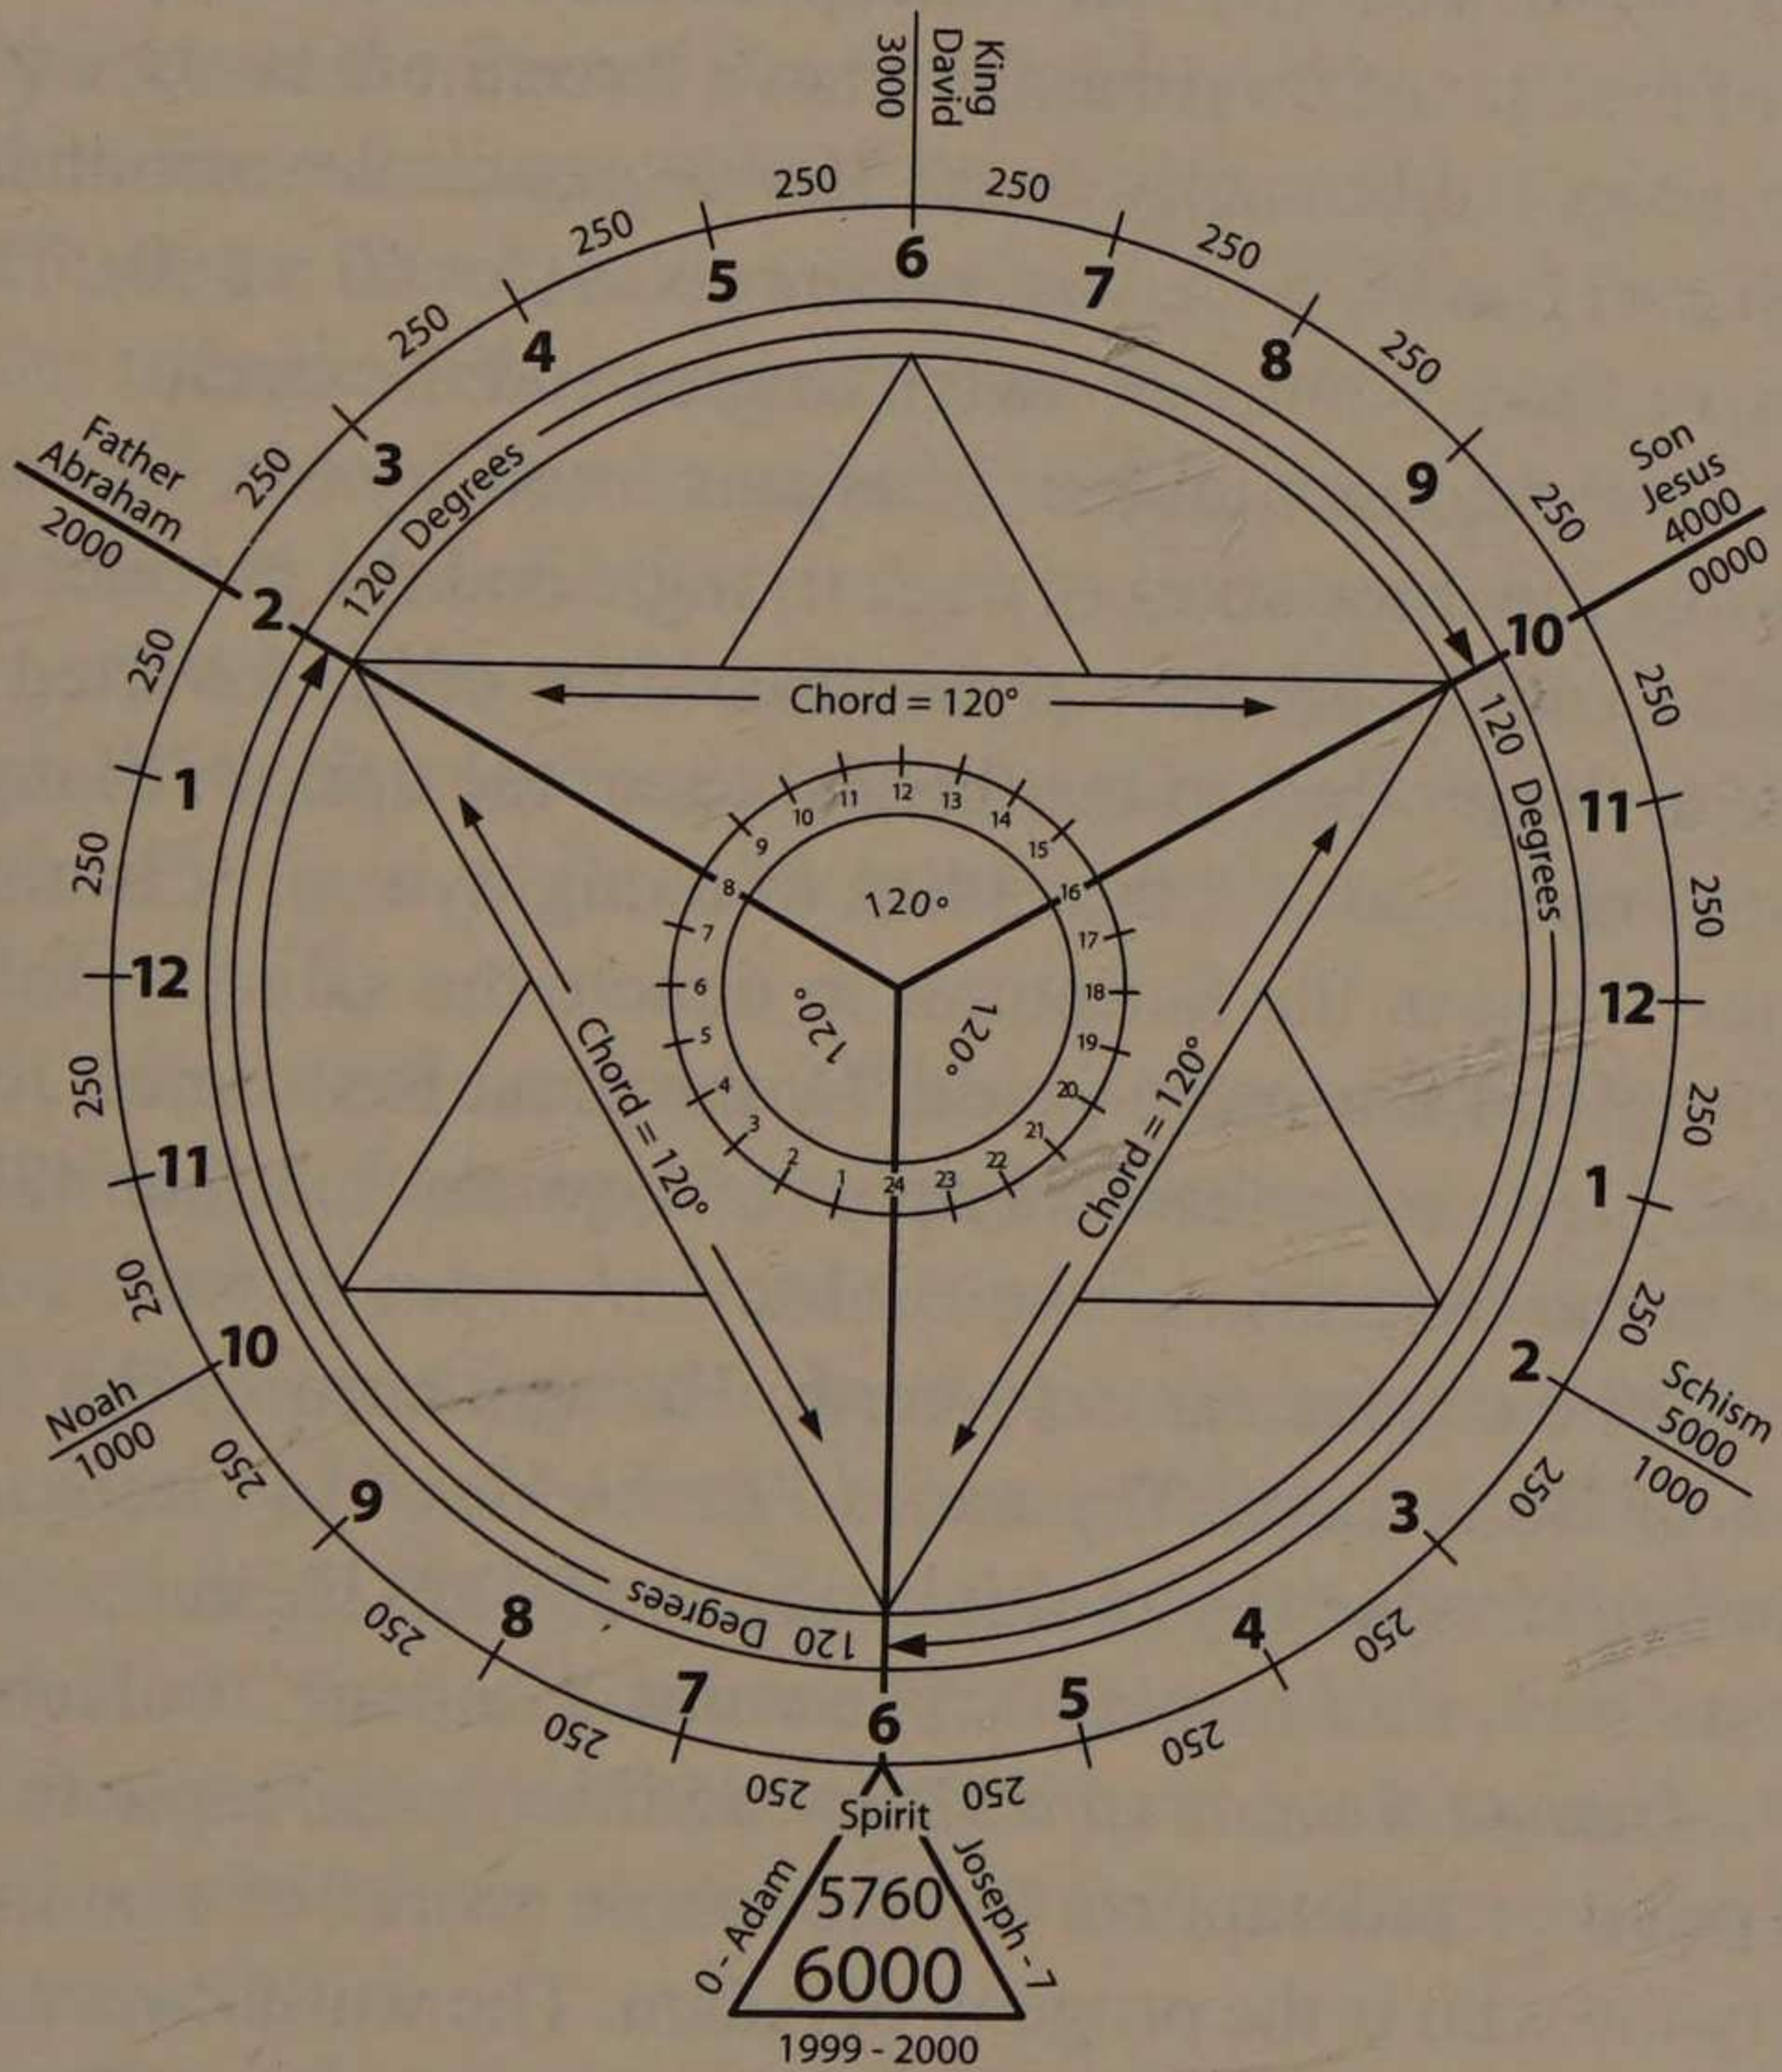

A Jubilee is 50 years. However, in counting multiple Jubilee years we must count them as 49 years each, with the final Jubilee year added at the end. This is because the 50th and the 1st year of each cycle is actually the same year—they overlap, just like the notes 1 and 8 on the music scale. But when counting one complete Jubilee cycle we state it as 50 years. Therefore in counting the 120 “*years*” from the sin of Adam, we are counting complete Jubilees (50 years each), which becomes 6,000 years. This is not the same 6,000 years shown on the Clock. It is the 6,000 years which began to count at the time of Adam’s sin, bringing us to the year A.D. 2033. It is very necessary that this count not begin with the creation of Adam, but must begin with the sin of Adam, because of the content of the pronouncement—it was made because of the sin. Therefore it could not possibly apply prior to the sin.

## **The Cube and the Holy Place**

God ended His work in six “*days,*” and everything of man is stamped with the number six. It is a well known fact that according to Scripture, man works six days, and on the seventh he is commanded to rest. So let’s take one more look at this

Figure 7

*"My Spirit shall not always strive with man, for that he also is flesh: yet his days shall be an hundred and twenty years."*

The third and final 120 degree segment of the Triangle/Circle leads to the Spirit - 5760 in the year 6000, Ending-Time and representing resurrection power as well - no more need of Time; for some, that is - The Quantum Realm.

One hundred and twenty Jubilees: Each Jubilee occurs once in fifty years; Fifty years times one hundred and twenty Jubilees equals 6000 years!

marriage of the equilateral triangle and the circle.

It has already been noted that the three lines of the triangle represent three chords of the circle at 120 degrees each. But now consider the inside angles of the three corners of the triangle, which total 180 degrees. In other words, three 60-degree angles, in which three sixes are observed (deleting zeros) 6-6-6. To ratify this concept of the sixes, add the other half of the Star of David and we have three more sixes; a total of six sixes. Additionally, in the 360-degree circle surrounding the Star of David, we have six more sixes ( $6 \times 60 = 360$ ). Thus we have three witnesses—two triangles and the circle.

The Moon number is represented by six as well. Multiply the three sixes of each triangle and the product will be 216. Add the product of the three sixes of the inverted triangle to the product of the three sixes of the upright triangle, and the result is 432, the radius of almighty sun. It is also a number used in the Scriptures to denote the salvation of all the people of the entire world, by the great Redeemer, Jesus Christ. Here are a few examples of how the number 432 is used in the Gematria of the Bible.

When Jesus came to earth, He was born in the little town of Bethlehem. The name "*Bethlehem*" in Greek, has a Gematria value (by multiplication) of 432. He came to be the saviour of all mankind. The word "*Saviour*" in Hebrew has a Gematria value of 432 (by addition). He came to pay the price of redemption for the whole world of mankind—everyone who is the progeny of Adam. The word "*world*" in the Hebrew text of the Old Testament has a Gematria value of 432 (by addition). Again, in the Old Testament, the word "*all nations*" has a Gematria value of 432 (by multiplication). And the word "*all things*" in the New Testament has a Gematria value of 432 (by addition). The evidence is overwhelming! This number has to do with salvation through Jesus Christ—salvation for all.

It was at Jerusalem that Jesus died on the cross, paying

the price for the sin of Adam, and releasing all of Adam's posterity from the death penalty. It is fitting that the name "*Jerusalem*" has a Gematria value of 432 (by multiplication) in the Old Testament.

Thus His work, from Bethlehem to Calvary, was for the salvation of man, and it all bears the same number—432.

As stated above, this number 432 is obtained from the six points of the Star of David that fits within the circle of the Clock. The marriage of these two equilateral triangles to the circle of the Clock is thus magnified by the very "six-ness" of the triangles. Six represents man. It is really telling us that man will indeed be reconciled to God, and the means is by the death of Jesus Christ.

But hidden within these two equilateral triangles is cube. When first looking at the triangles, the cube is not seen. Stare at it for a while, and suddenly the cube will emerge. (See Figure 8)

First we must connect the six points of the two equilateral triangles, forming a hexagon. Hidden within this hexagon is the elusive cube. Ancient mathematicians considered the cube as representing the universe, particularly as it relates to man. A cube has six sides—obviously relating to man. To the ancients, these four shapes dominated geometry: the cube, the octahedron, the isosahedron, and the tetrahedron. The cube was thought to represent the earth; the octahedron represented air; the isosahedron represented water; and the tetrahedron represented fire.

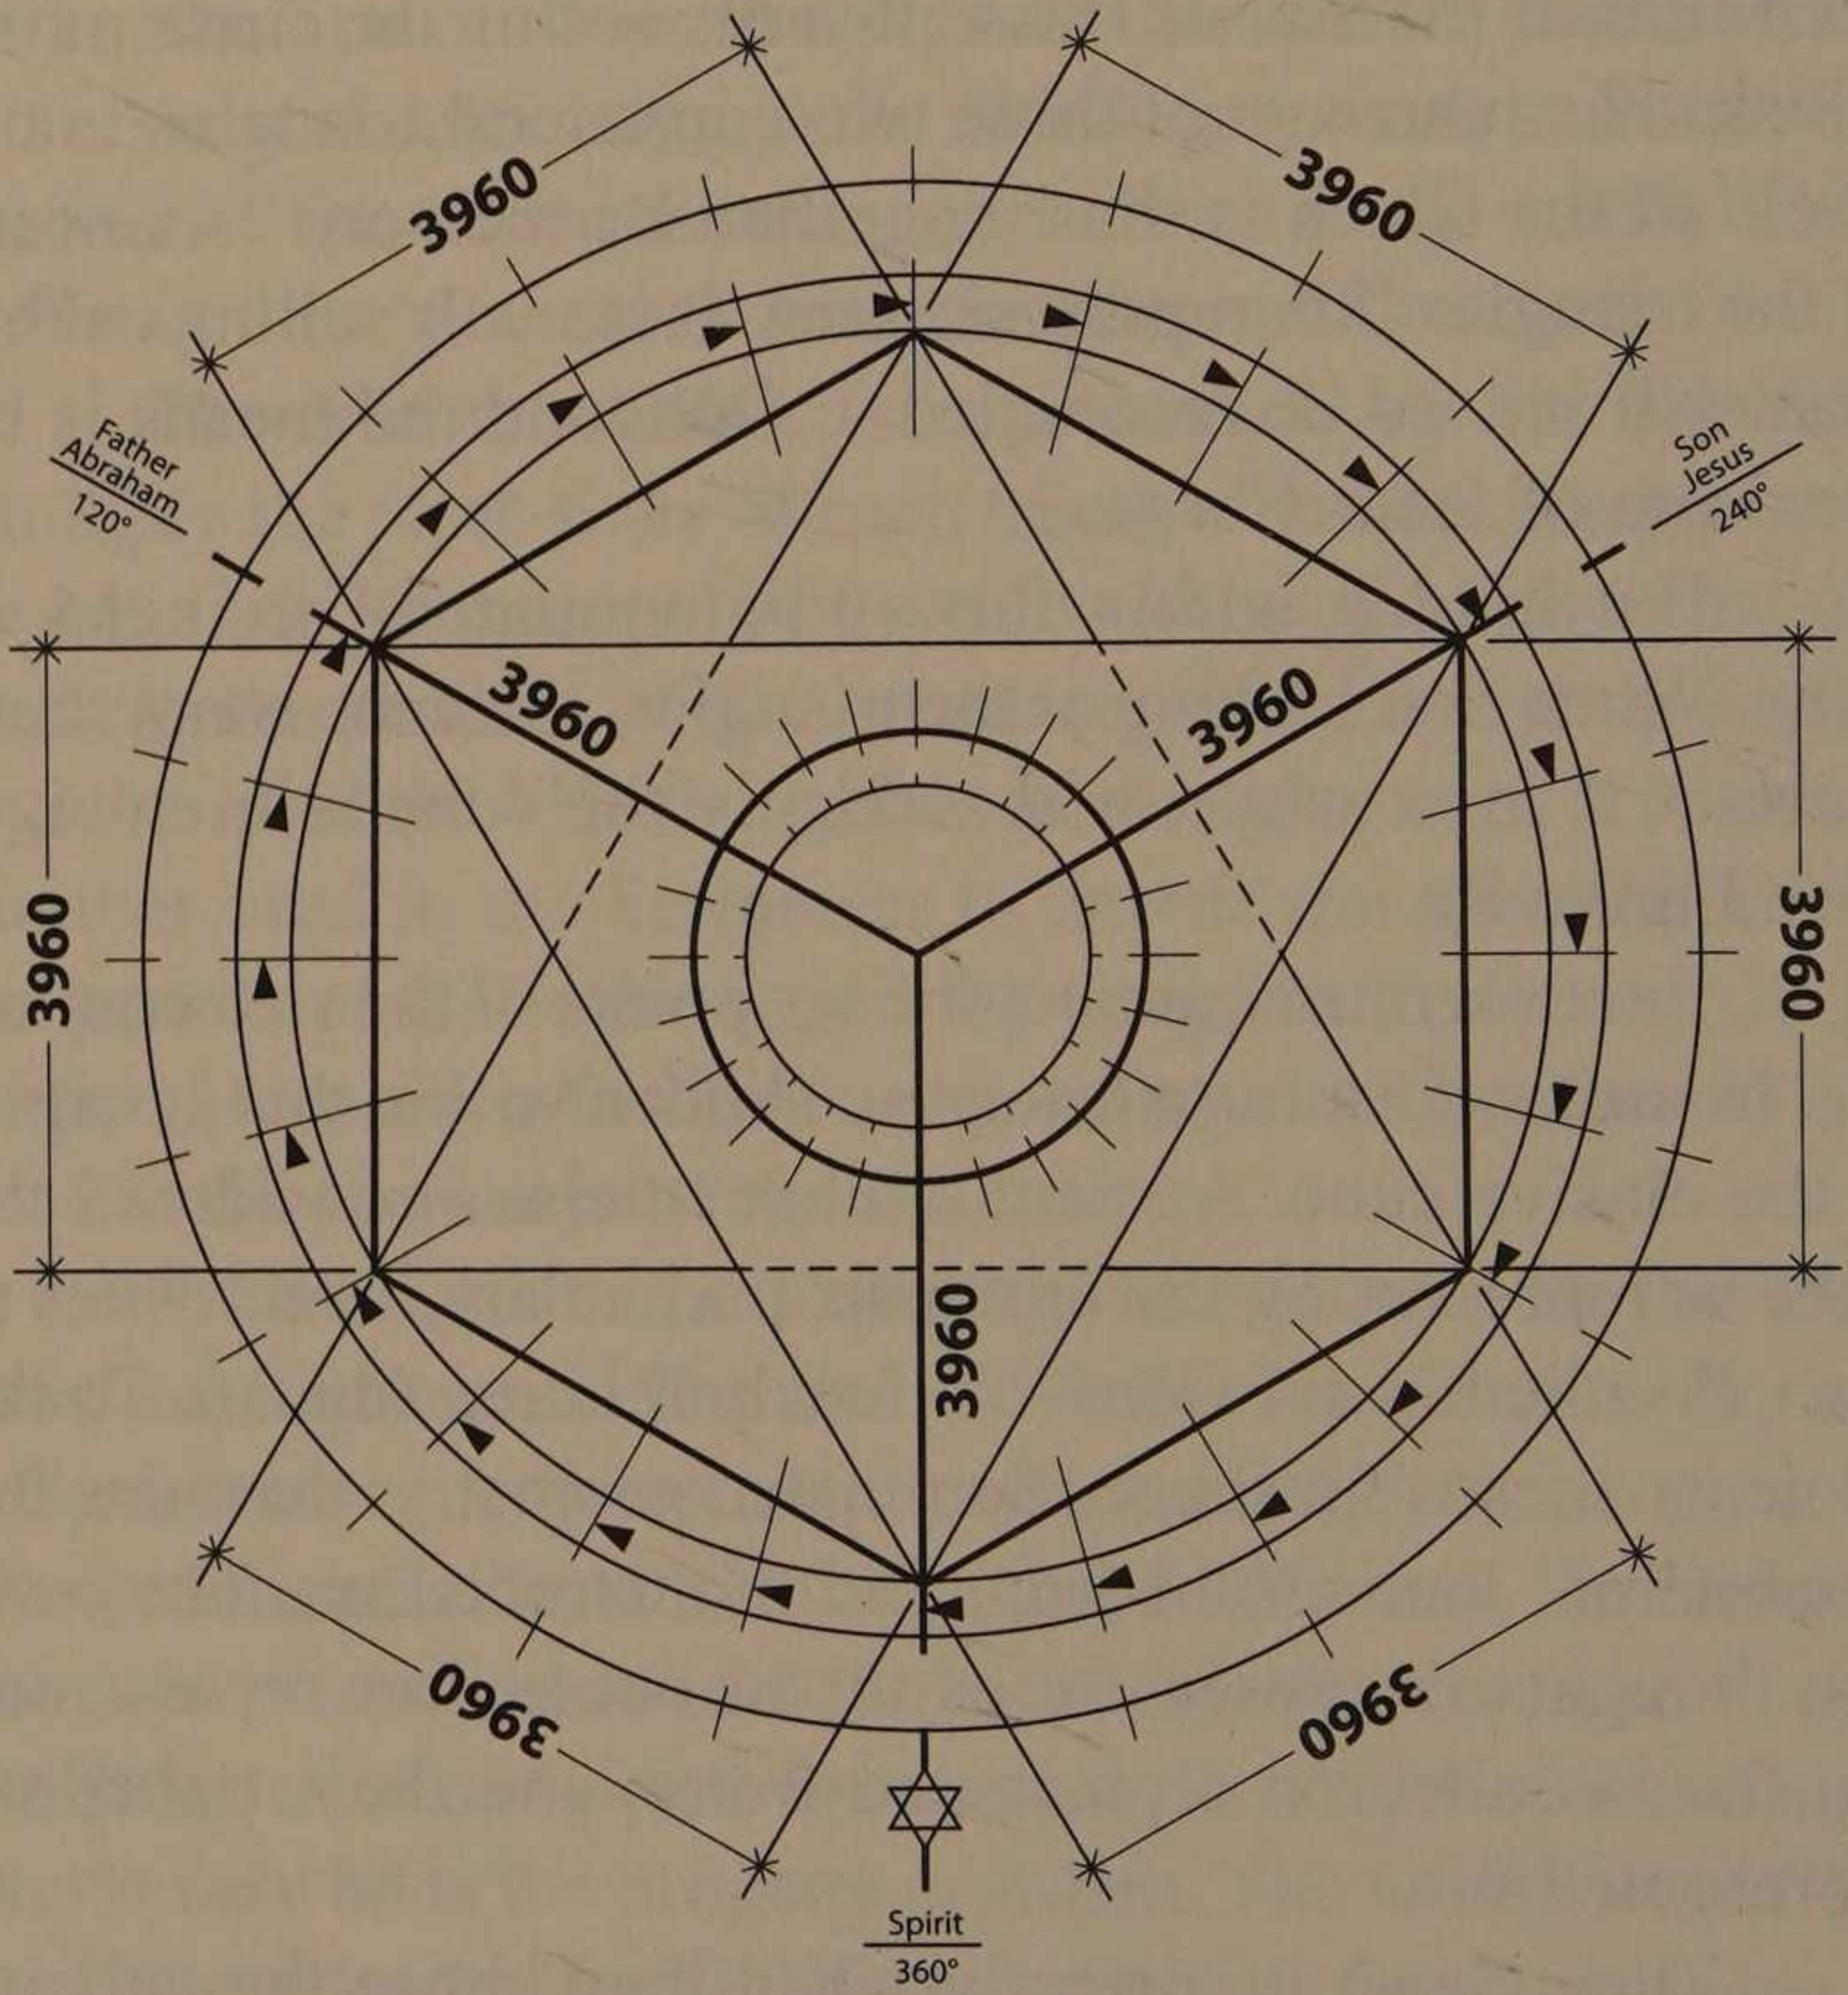

They chose it correctly when they chose the cube to represent earth. The number six dominates the cube. But the cube is also pure, for all of the dimensions of its six sides are precisely alike, each being a perfect square, which has four equal sides. The Bible, when speaking of the entire earth, uses phrases such as "*the four corners of the earth*" or "*the four winds of earth.*"

The four ancient elements of Earth, air, water and fire

Earth radius 3,960 x 6	=	23,760

Earth, Moon, Sun, Stars

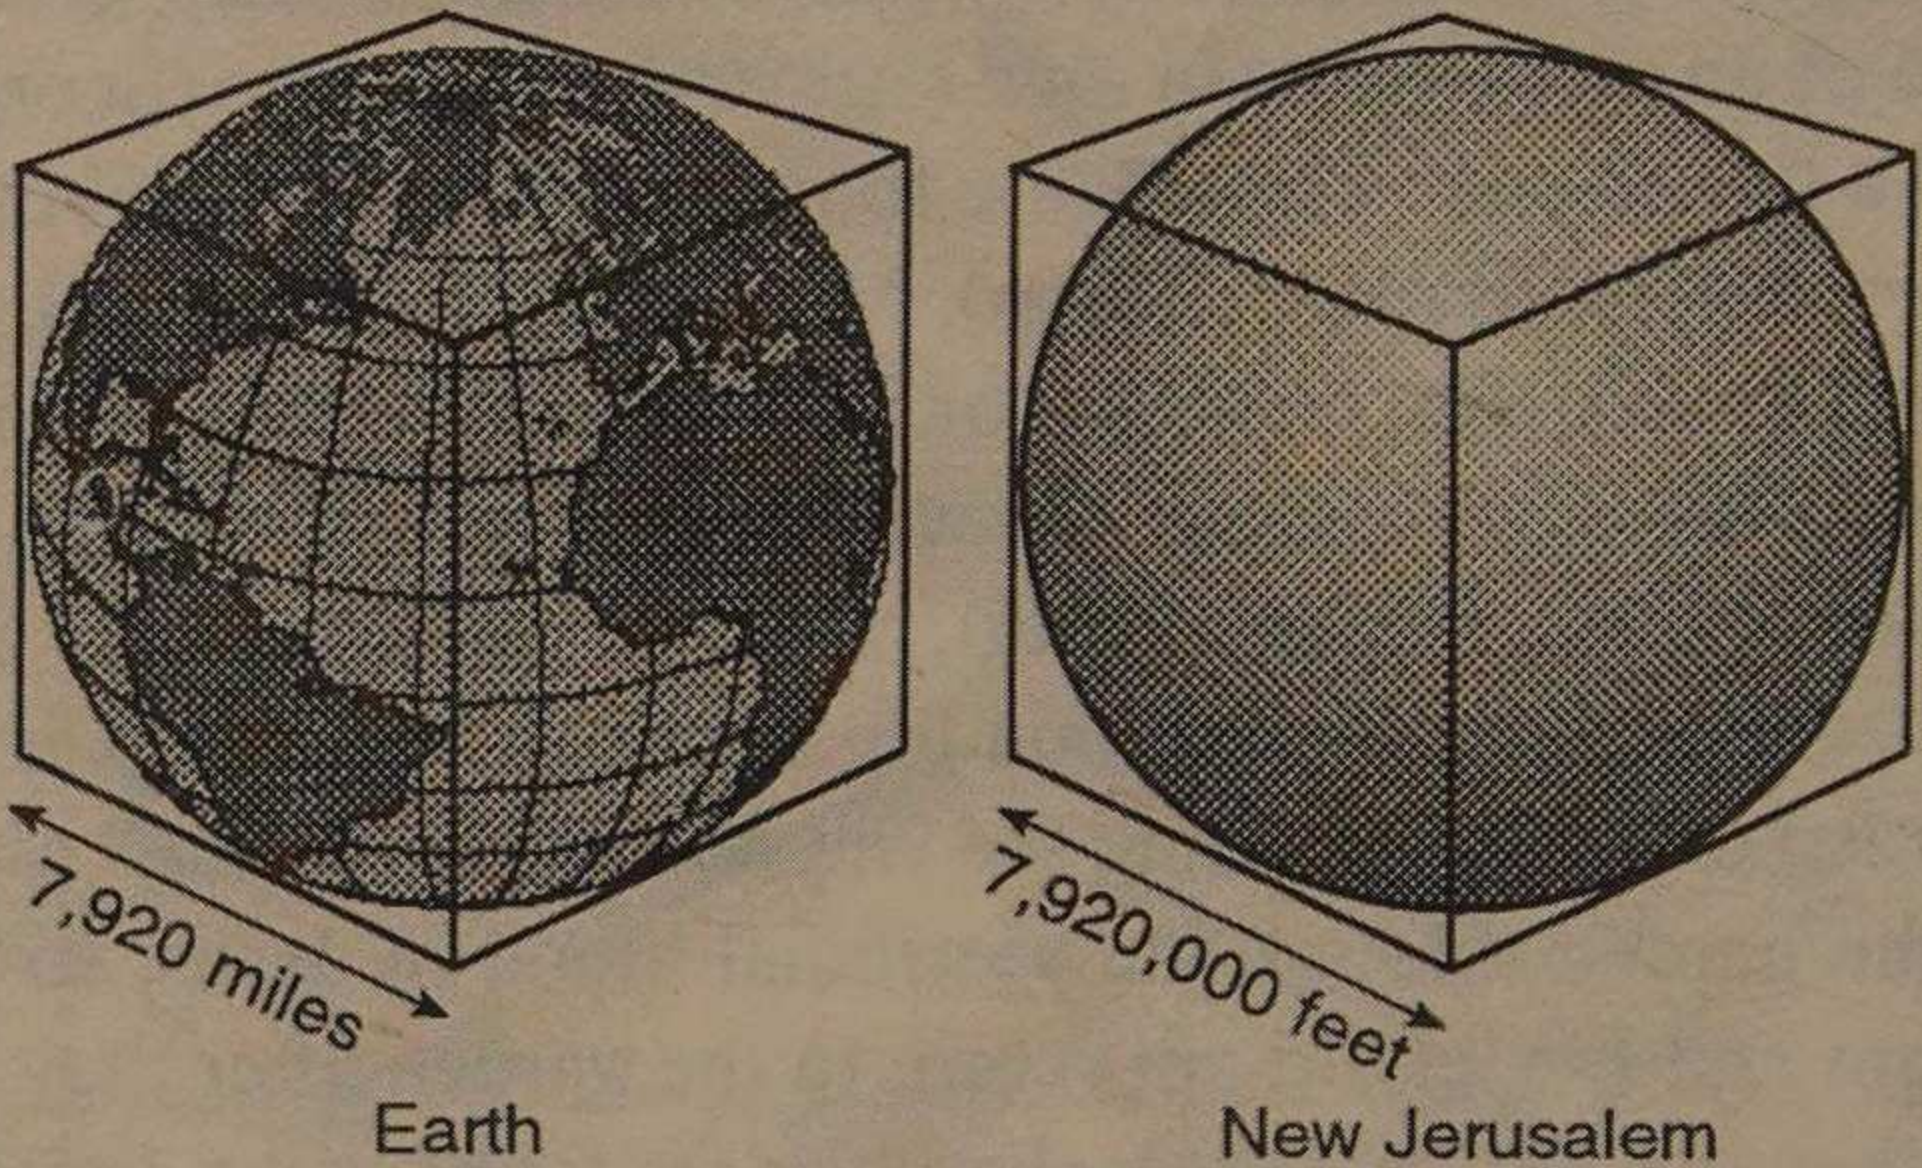

"Let Heaven and Earth Declare!"

are represented by the four fixed signs of the Zodiac: namely, Taurus, Aquarius, Scorpio, and Leo. These four signs are also depicted by the creatures spoken of in the books of Ezekiel and Revelation, where they are called cherubim. They have the face of an ox (Taurus), a man (Aquarius), an eagle (Scorpio) and a lion (Leo). These same four figures are implied in the four gospels: Matthew (Lion), Mark (Ox), Luke (Man), and John (Eagle). The positions of four tribes of Israel stationed around the Tabernacle in the wilderness, were Judah (Lion), Ephraim (Ox), Reuben (Man), and Dan (Scorpio).

The cherubim are found in the book of Genesis in the Garden of Eden, guarding the way for man's "future" return to the garden through the sacrificial blood of Jesus, so that Adam and Eve could not return to the garden after they had disobeyed God. These two cherubim are found in the design of the cover of the Ark of the Covenant, forming the pure golden Mercy Seat, which resided in the Most Holy place within the Tabernacle in the wilderness. Later, when Solomon's temple was built, the Ark of the Covenant, with its golden cherubim, were brought into the Most Holy place of the temple. That Most Holy place was in fact a cube.

But the finality of the cube was yet to be realized. In the book of Revelation. It is found in the description of the New Jerusalem as a cube, which comes down from heaven and engulfs the Earth, surrounding it completely. To illustrate this, I am borrowing an illustration from Bonnie Gaunt's book *Beginnings: the Sacred Design*, with her permission. This illustration shows the dimensions of the Earth in miles, and the dimensions of the New Jerusalem in feet. Both bear the number 7920. It is also worthy of note that the number 792 is the Gematria value for the word "salvation" in the Old Testament, as well as it is the Gematria value of "Lord Jesus Christ" spelled in Hebrew. It is telling us that Jesus came to our Earth to bring salvation, and the result of that is the New Jerusalem, representing Jesus and His bride, who will set up

the Kingdom of Jesus Christ which will engulf the whole world, fully enclosing it within His divine government.

The cube is four-square and has six faces, denoting equality of height, width and length. It is perfect in all its dimensions. Each face has four edges. Four edges times six faces equals twenty four—the same number as the “hours” on the Clock. The cube has twelve external and twelve internal corners ( $12 + 12 = 24$ ). Eight apex corners represent the number for a New Beginning through Jesus Christ. In Revelation 1:8 Jesus said, *“I am the Alpha and Omega, the Beginning and the End, saith the Lord, which is, and which was, and which is to come, the Almighty.”*

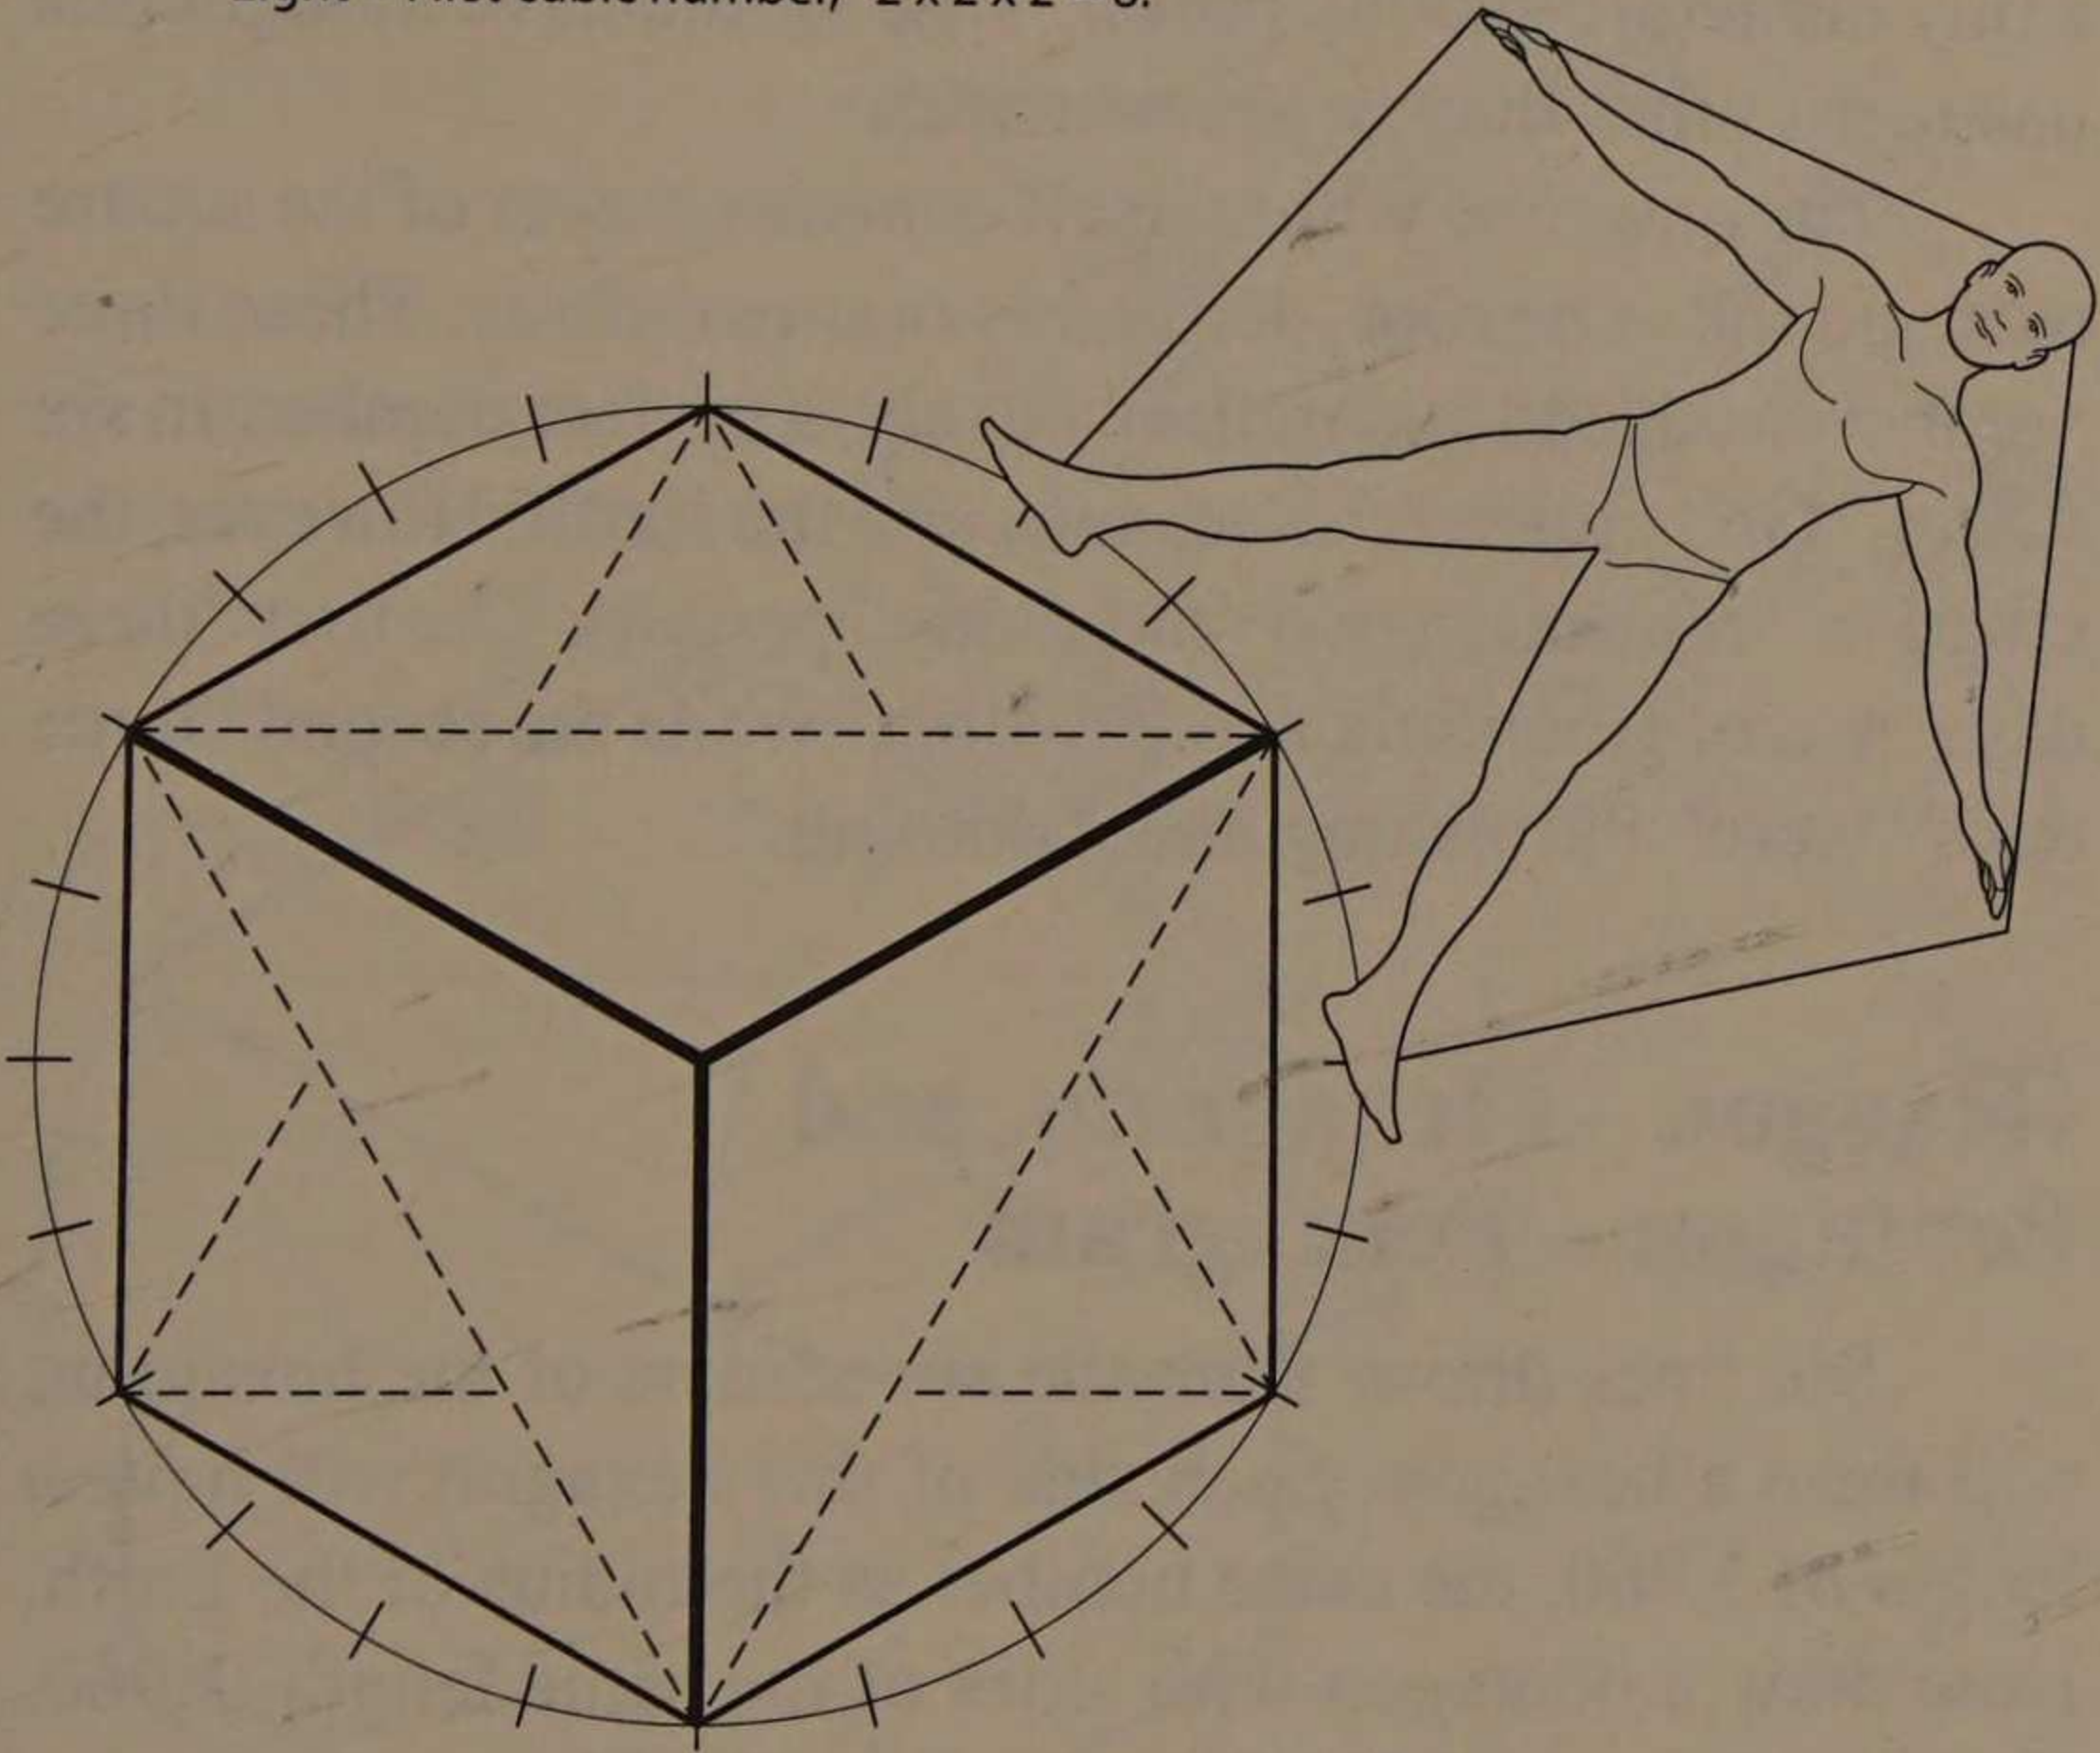

The book of Revelation has come down to us in Greek. The first letter of the Greek alphabet is “Alpha” and the last letter is “Omega,” which is the 24th—the same number as first and last on the Cosmological Clock. The 24th letter also holds the number value of 800. In Greek Gematria the value of 800 is assigned to the word “Lord” (*Kurios*). The name “Jesus” (*Iesous*) in Greek Gematria adds to 888. And  $8 + 8 + 8 = 24$ . See Figure 9.

Figure 9

# The Cube

## Holy Of Holies Most Holy Place

Six faces times Four edges = Twenty four, last letter = Omega.  
One cube = 1, Beginning = First, first letter = Alpha.  
Eight Corners = 8, New Beginning.  
Eight = First cubic number,  $2 \times 2 \times 2 = 8$ .

The number Six is the number for man.  
There are Six different words used in the Bible for MAN.  
The hexagon is Six sided.  
Four edges for each of Six squares,  $4 \times 6 = 24$ .  
Four is the first square number,  $2 \times 2 = 4$ .  
Four represents Earthy.

*"I am the Alpha and Omega, the beginning and the ending," saith the Lord, "Which is and which is to come, the Almighty." Rev. 1:8*

*"I am the First and the Last." Rev. 1:17*

*"The First and the Last." Rev. 2:8*

*"I am Alpha and Omega, the Beginning and the End, the First and the Last." Rev. 22:13*

The symbol for the square root of a number is superscribed beside the number. If it is superscribed with 2, it means to multiply the number by itself. If it is superscribed with 3, then it means to multiply the number by itself and then multiply it by itself again. This is done as many times as the superscribed number indicates. This is called “raising the power.” So the idea is that we have a tiny numeral 2 and a tiny numeral 3 having power. Who would have thought this has merit other than in mathematics.

The one cube within itself contains power of the square root and the cube root—defined as one-two-three. These three numbers both add and multiply to six, a perfect number. In six “*days*” God created the heavens and the Earth. However, the creation occurred in two “three-day” periods. The first “three days” were “Bounding and Dividing” while the second “three days” were “Furnishing and Adorning.”

## **Hexagon – Hexagram, and Pentagon – Pentagram**

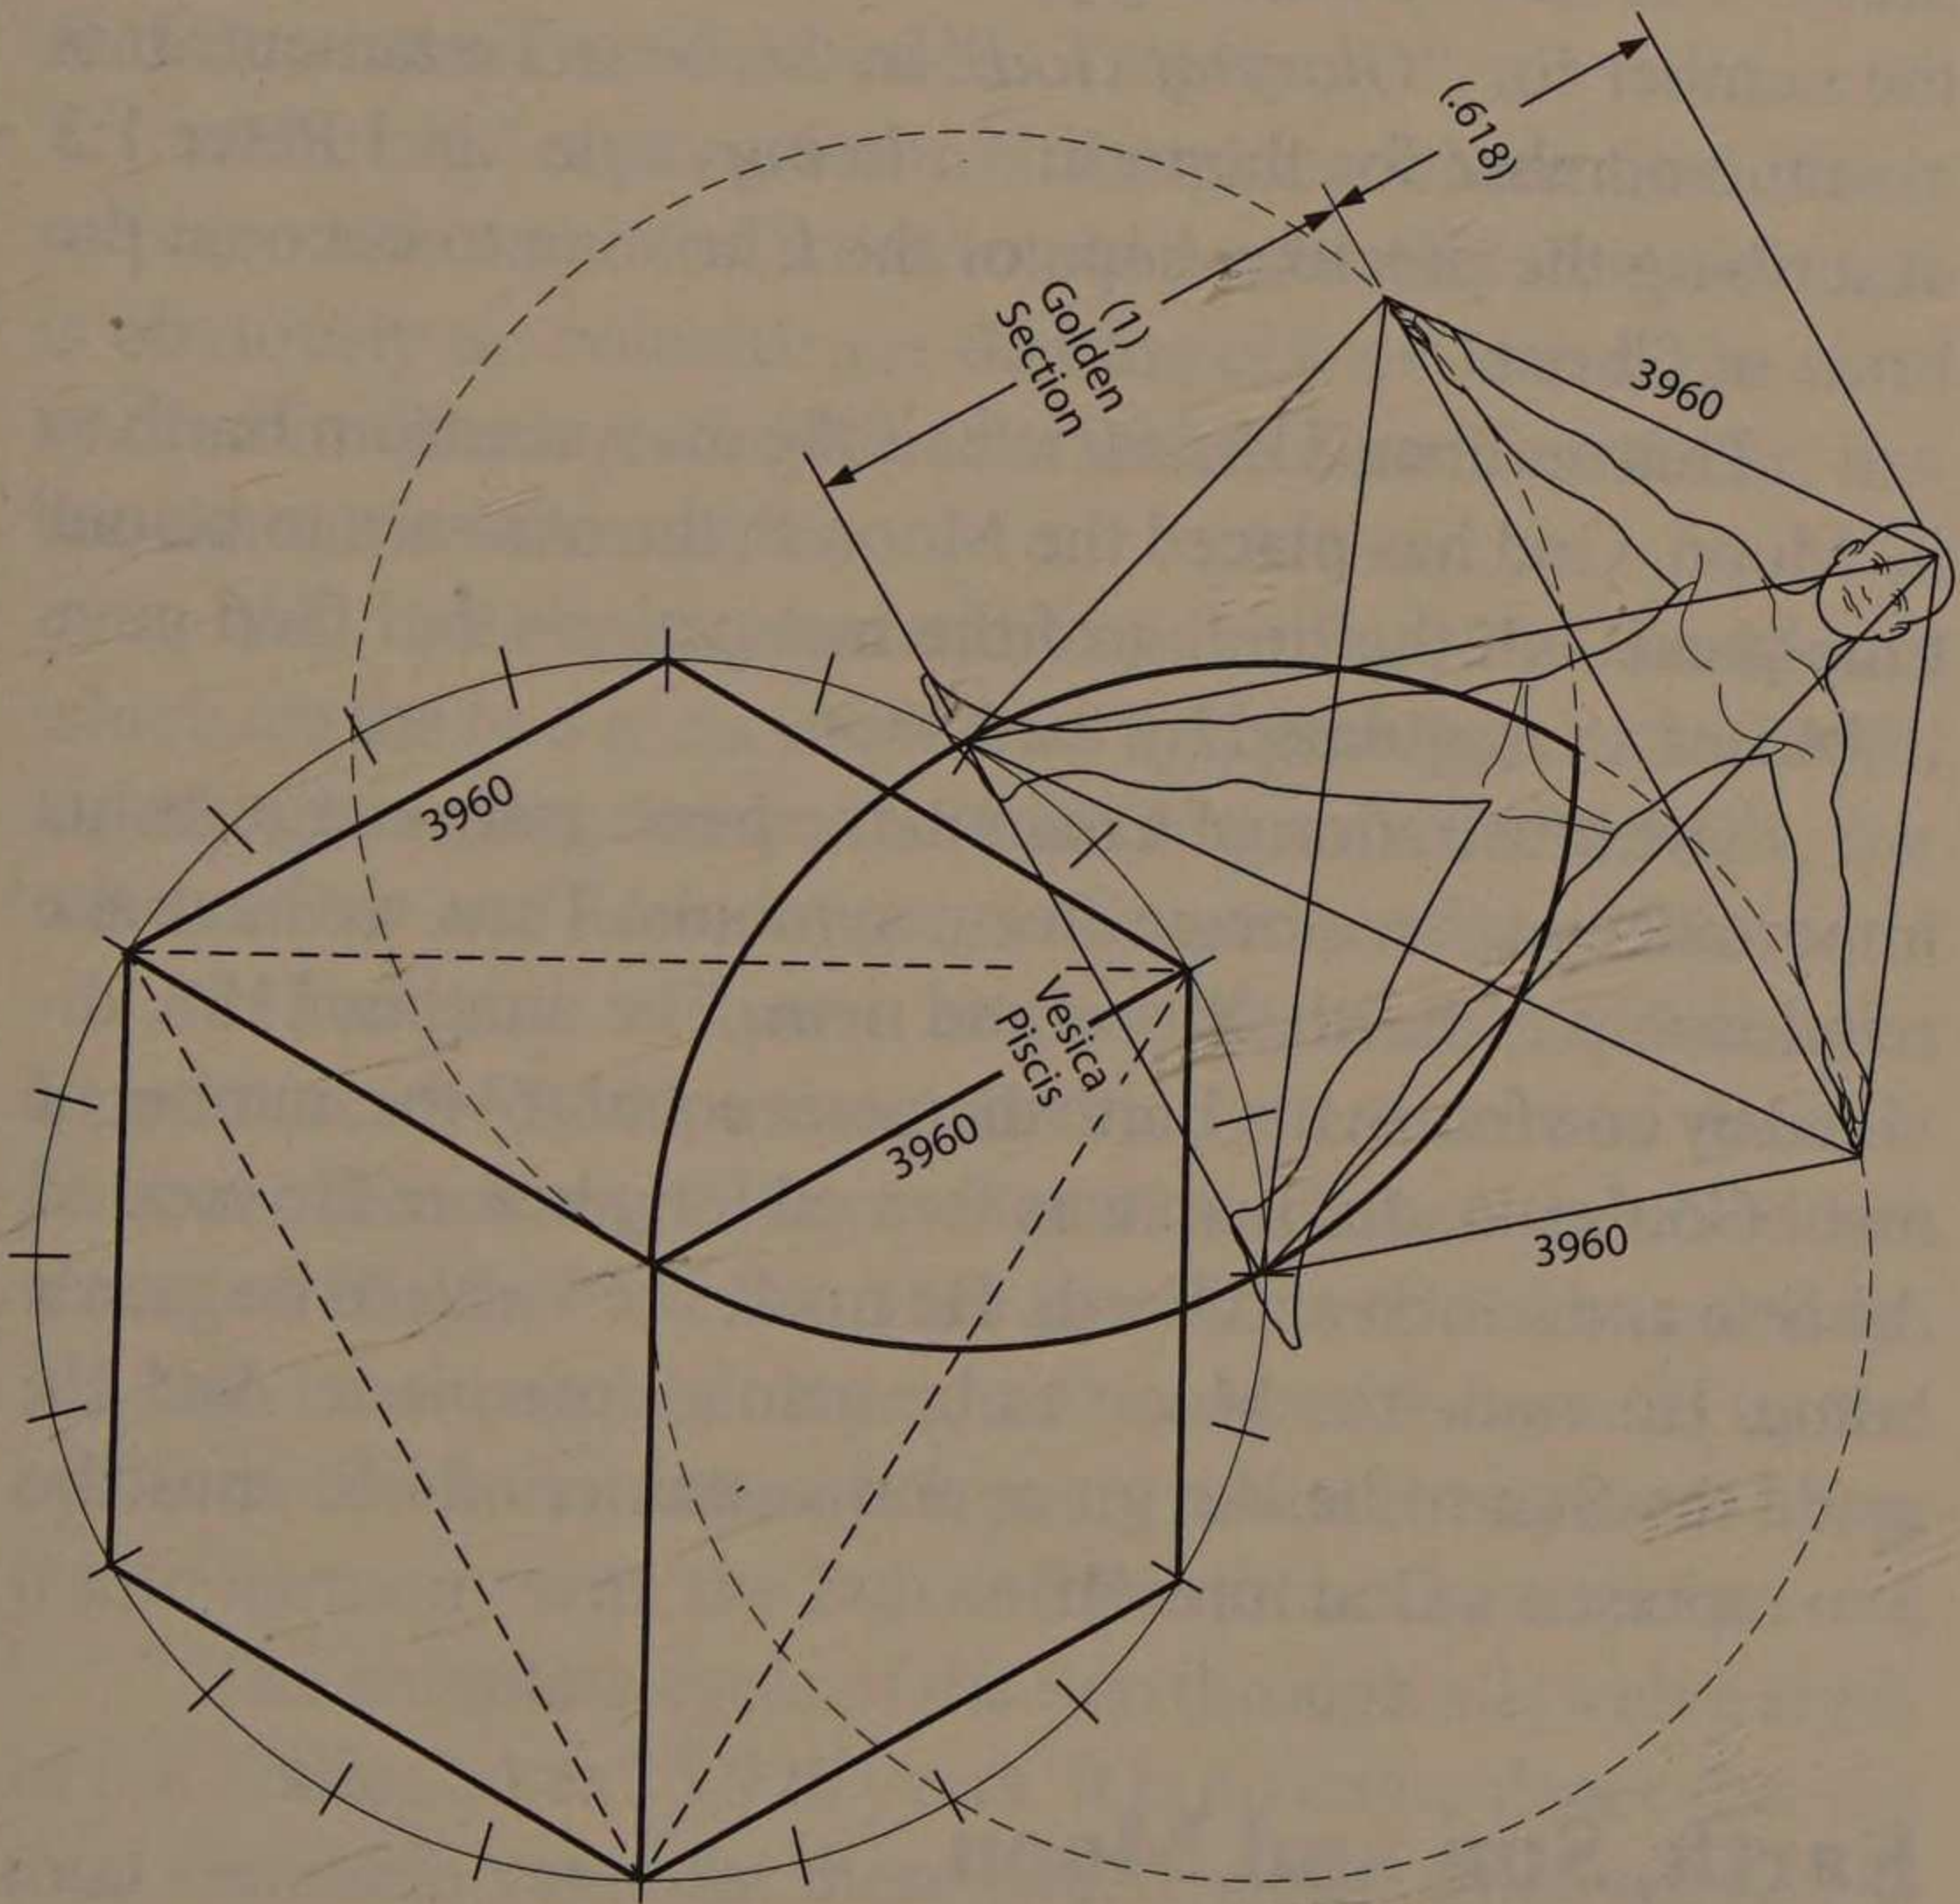

Six lines drawn from the six corners of the hexagram will form a hexagon. Each side of this hexagon will have a length of 3,960, the same number as the radius of the Earth. Now draw a pentagon with sides of the same length—3,960. ( $3960 \times 5 = 19,800$ ). The number 19,800 is exactly one thousand times greater than the “*cubit of the old measure*” which was used in the construction of Solomon’s Temple, which was 19.8 inches.

That this number, 19,800 relates to the Earth, and man, is evident by just a bit more math. Consider the length of the five sides of this pentagon as the length of one side of a square. The perimeter of the square would be 79,200, the number of Earth and the Gematria number of salvation. This number is also the Gematria of the One who brings salvation, namely,

Figure 10

Sign Of The Fish  
**Vesica Piscis**

Golden Mean  
Five Pointed Star  
Fixed Compass

*"There shall come a Star out of Jacob, and a Scepter shall rise out of Israel..." Num. 24:7*

*"I Jesus have sent mine Angel to testify unto you these things in the churches. I am the Root and the Offspring of David, and the bright and morning Star." Rev. 22:16*

the Lord Jesus Christ, spelled in Hebrew. The numbers are all inter-related, and they all tell the same story—the story that Jesus came to Earth to provide salvation for man. It is the greatest story ever told!

Six of these pentagons will fit around the six sides of the hexagon. This makes thirty pentagon sides, thus  $30 \times 3,960 = 118,800$ . Amazingly, the Gematria value of 1188 is the number for “*Glory of God*” in the New Testament. It is also the number for the term “*a living hope*” in I Peter 1:3 describing the precious hope of the Christian to become the bride of Christ.

This number, 118,800 is half the distance from Earth to its Moon. God has placed the Moon in the heavens to be our time-piece. All the timing of the instructions that God gave to Moses are regulated by the Moon.

The illustration of a man in the pentagram suggests his importance in these magnificent symbols. Thus we have the relationship of Earth, Moon and man. The number 1188, divided by one fourth the Earth diameter equals 6—the number of man. God’s plan for man was formed long before He created the Sun and Moon and Earth. He made the Earth to be man’s home. He made the Moon to be man’s time-piece. And He made the Sun to be the giver and sustainer of life—thus the Sun represents God himself!

## **Earth, Sun and Moon**

The harmony in Earth, Sun and Moon is also shown in the path of the ecliptic and the twelve signs of the Zodiac. The ecliptic is the apparent path of the sun through the Zodiac. It takes the sun 2,160 years to pass through each of these twelve signs; thus one complete 360-degree revolution through the Zodiac would equal 25,920 years. For each passing through four of these signs the Sun has traveled 8,640 years—the solar number.

We have stated that the Sun represents God. Our Sun is not only the source of light and life for man on this Earth, its diameter number, 864, is also the Gematria number for God. In the New Testament, one of the Greek ways of spelling God is *theon*, which has a Gematria value of 864.

In Isaiah 43:10 we have the statement: "*Before Me there was no God formed, neither shall there be after me.*" This sentence has a Gematria value of 864.

The city of Jerusalem is the place where God chose to place His name—so we are told in the Old Testament. It is obviously no coincidence that the city of Jerusalem, as is spelled in Greek throughout the entire New Testament, has the Gematria value of 864.

Yet, the close association of the Sun and the Moon, which are the two great luminaries that give light to the Earth, together bear the number 864 in Gematria. In Hebrew, the words "*Sun and Moon*" have a Gematria value of 864.

If we draw a square around the Moon, it will have a perimeter of 8640 miles, showing the union of the two symbols. It is through the cycles of the Moon that God has arranged His time cycles. This is why the Hebrew calendar is a soli-lunar calendar. It primarily counts its months by the cycles of the moon, but leap days are added each year to bring it into harmony with the Sun and therefore the seasons.

The complete cycle of the Sun through all twelve signs of the Zodiac takes 25,920 years. It is no coincidence that the total Gematria value for these twelve signs, when spelled in Hebrew, is 2592. They are listed below by Bonnie Gaunt:

Virgo (virgin)	=	145
Libra (balances)	=	56
Scorpio (scorpion)	=	372
Sagittarius (horse-man)	=	171
Capricornus (goat)	=	580
Aquarius (“Waters flow from his buckets”)	=	180
Pisces (fish)	=	12
Aries (ram)	=	41
Taurus (reem)	=	250
Gemini (twins)	=	441
Cancer (“to bind together”)	=	261
Leo (Lion)	=	83
		<hr/>
		2,592

“*The heart of Jerusalem*” (Isaiah 40:1) has a Gematria value of 2592. It is the place where God chose to place His name.

## Harmony of the Zodiac with Ancient Measures

The Cosmological Time-Piece contains two periods of time in every 15-degree turn of the circle. One is the 240-year period, and the other is the 250-year period. If we take the number 25,920 of the Sun’s circuit through the Zodiac, and divide it by 250, the result will be 103.68; and if we divide it by 240, the result will be 108.

The number 108 speaks of Beginning and New Beginning. However, it also is a lunar number—the radius of the Moon being 1,080 miles. The number 103.68 speaks of a unit of measure which is derived from an ancient unit called the Hebrew sacred cubit, which is a double-foot, measuring 2.0736. Therefore, dividing it by 2 it is 1.0368, the sacred half-cubit, or the sacred foot. Multiply this by the 240 and the result will be

24,883.2, which is the circumference of the Earth in miles. Thus the stars of the Zodiac are a witness of the Cosmological Time-Piece.

Consider the 25,920 years as if they were a diameter of a circle in miles. Draw a square around this circle and its perimeter will be 103,680 miles.

The number 103,680 is the number for miles the Earth travels in one hour, or fifteen degrees of the circle. A completed cycle of the Earth occurs every 24 hours. The earth's mean circumference is 24,883.2 miles. Therefore, divide this by 24 and we have the number of miles the earth travels in one hour— $24,883.2/24 = 1,036.8$  miles. Or, to put it the other way, 1,036.8 miles times 24 hours equals 24,883.2 miles. Each minute will be 17.28 miles.

For each minute that passes, our Earth travels 17.28 miles. This is amazing when we realize that the number 1728, in Gematria, speaks of the precious sacrifice that Jesus made on behalf of all mankind. In Romans 12:1 the Apostle Paul said that Jesus gave himself a "*living sacrifice*" for us. In Gematria, the term "*living sacrifice*" has a value of 1728.

In Psalm 22 we have a prophecy of the event of Jesus hanging on the cross. The prophecy is written as if Jesus were doing the speaking, and He is describing the agony of crucifixion. He says: "*They pierced my hands and my feet.*" Yes, it has a Gematria value of 1728. That was His "*living sacrifice.*"

Yes, every minute of every day of every year, since the creation of the earth, we are reminded of the great sacrifice that He made for us.

We can even divide the minute. Every half-minute the earth travels 8.64 miles. Thus, every half-minute we are reminded that God (864) has an intricately precise plan that is being unfolded minute by minute, as our earth travels in its orbit around the Sun (864).

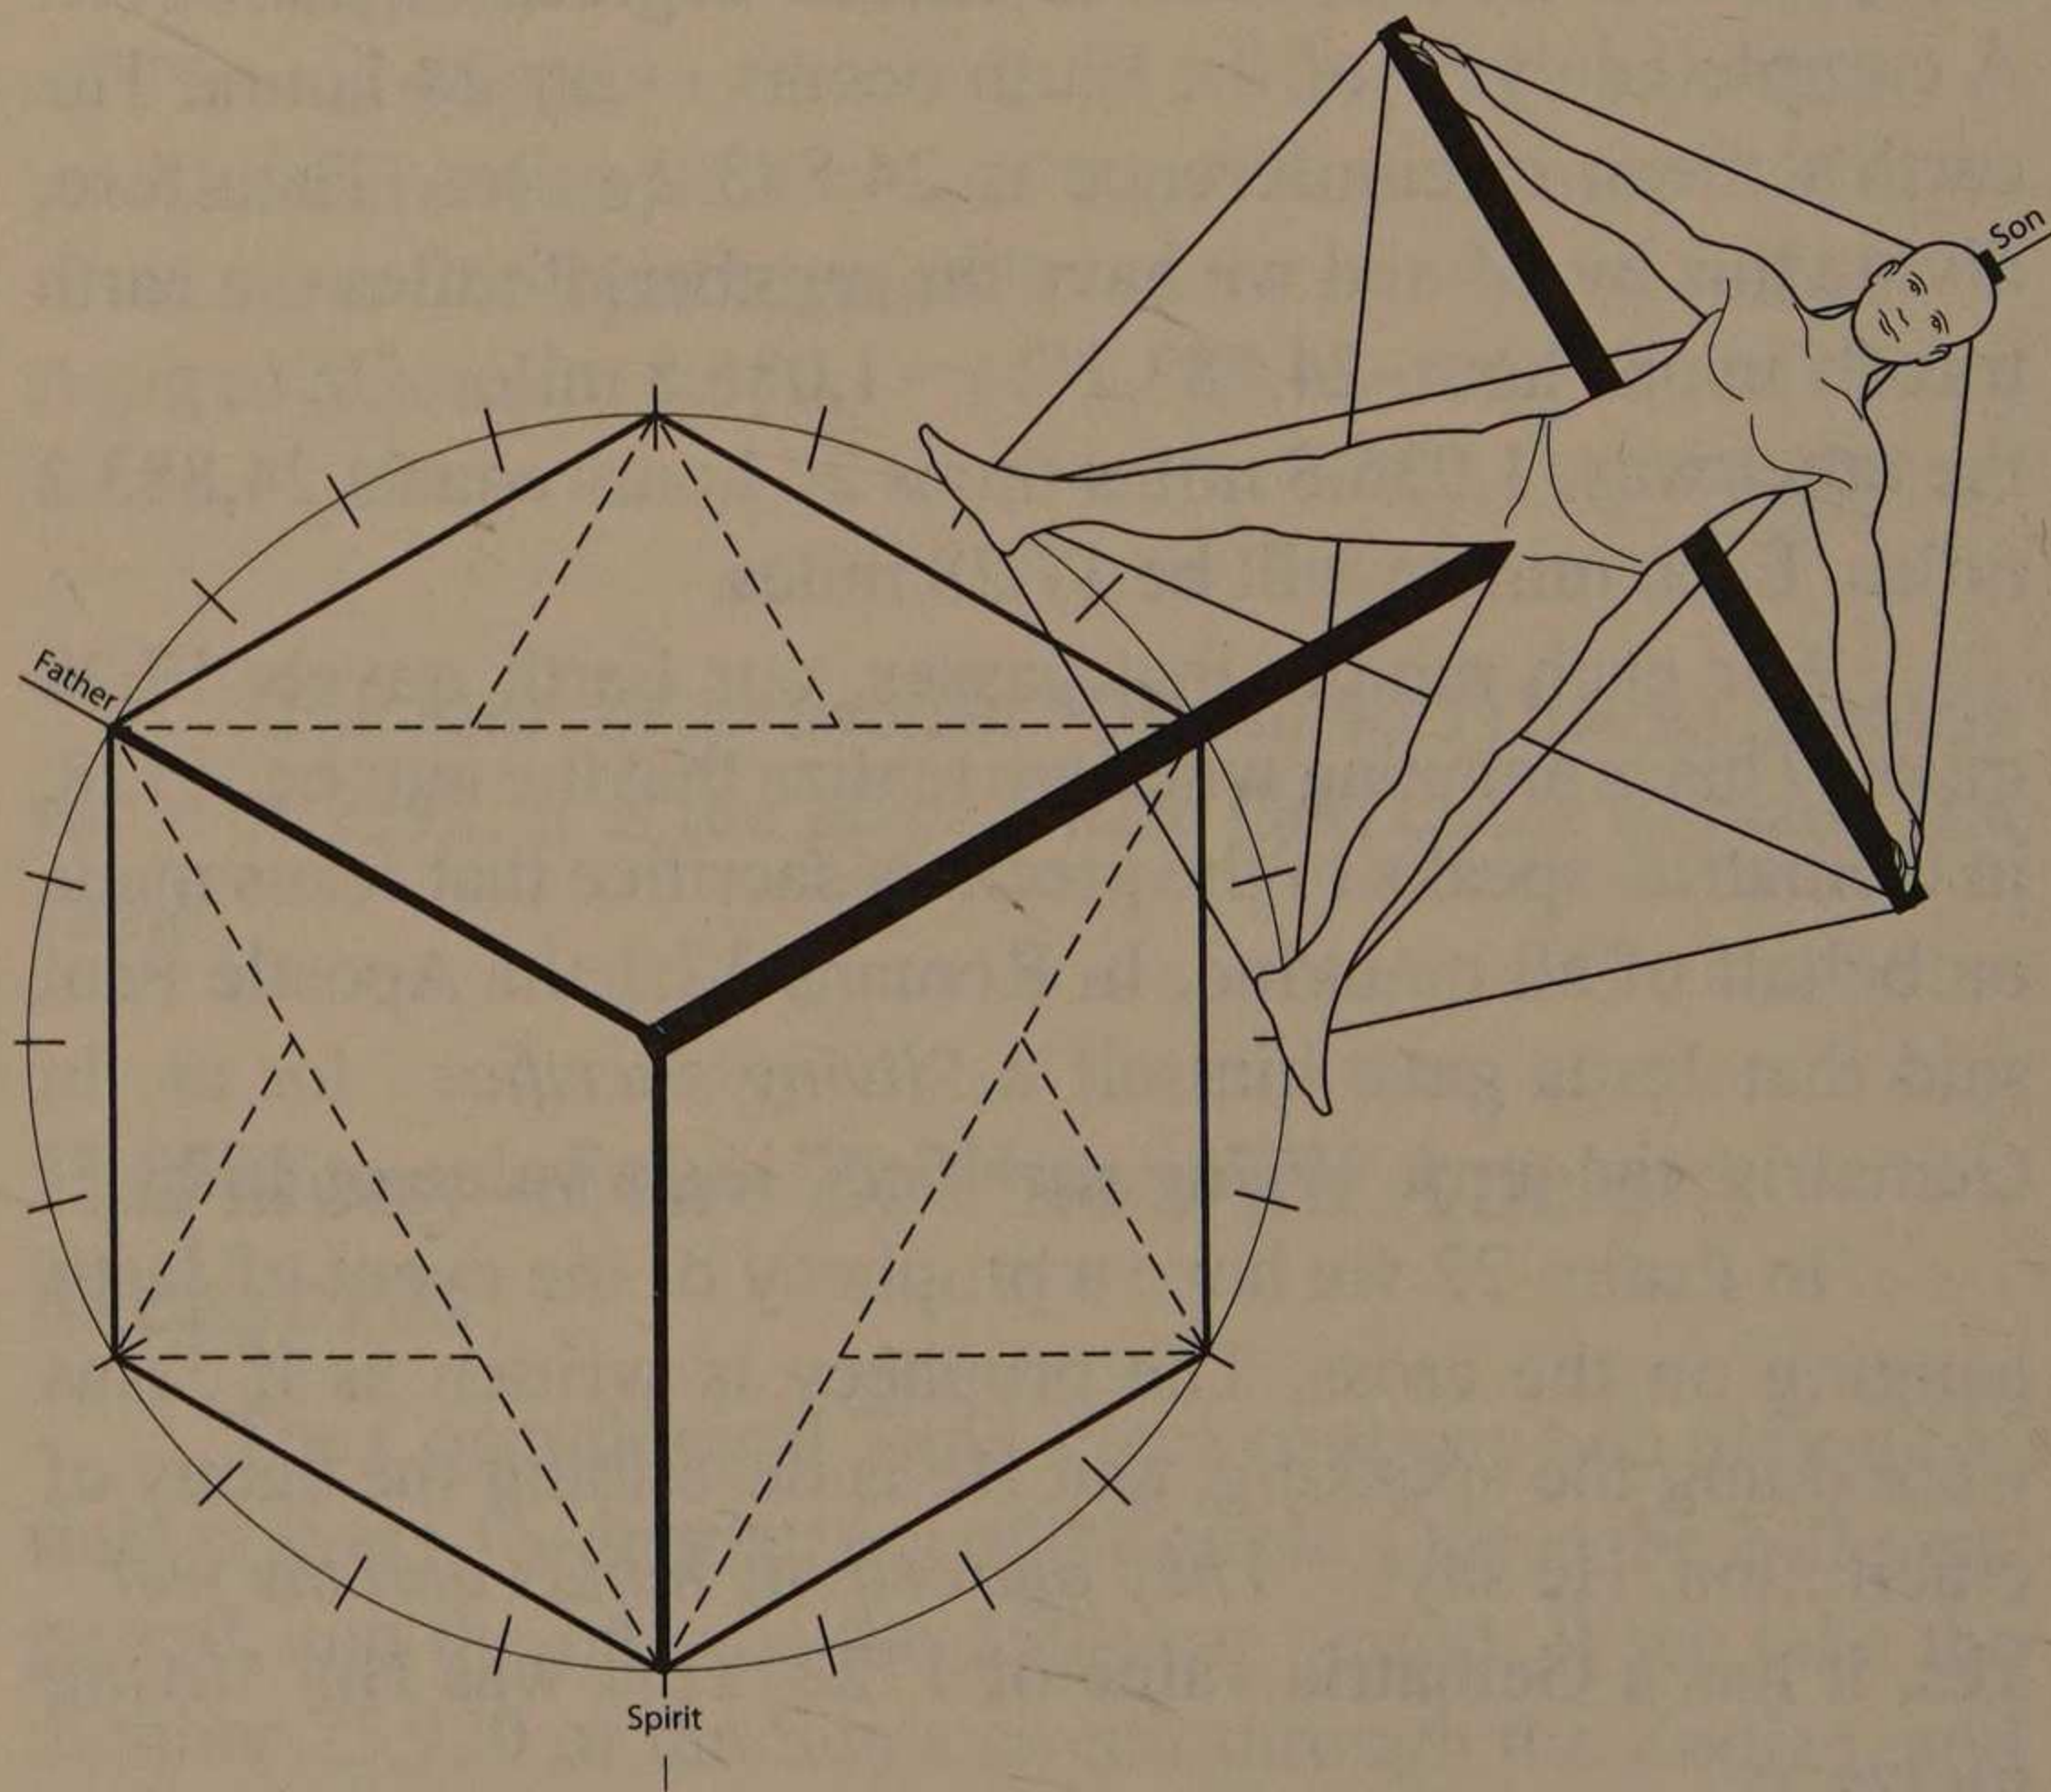

Figure 11

*"And I, if I be lifted up from the Earth, will draw all men unto Me."*

*John 12:32 (Myself)*

*This He said, signifying what death He should die. John 12:33*

*They shall look upon Me Whom they have pierced, and they shall mourn for Him, as one mourneth for his only son, and shall be in bitterness for Him, as one that is in bitterness for his firstborn. Zech. 12:10*

*For the teaching of the cross is to them that perish foolishness. But unto us that are saved it is the Power of God. For it is written "I will destroy the wisdom of the wise and will bring to nothing the understanding of the prudent. ... Because the foolishness of God is wiser than men; and the weakness of God is stronger than men. 1 Cor. 1:19, 25*

Every second of every day the Earth travels 0.288 miles, reminding us of the suffering of Jesus on the cross. Isaiah described it thus: "*Yet it pleased the Lord to bruise Him, he hath put him to grief.*" This has a Gematria value of 288.

A square having sides of .288 will have a perimeter of 1.152, the Egyptian royal foot.

## The Egyptian Royal Foot

Unveiling these sacred and royal measures provides us with a more sensitive understanding of interpreting hidden Scriptural values. The difference between the Hebrew sacred foot of 1.0368 and the Egyptian royal foot of 1.152 is a ratio of 240/216. This ratio contains numbers familiar to us: 240 for the hours and years on the face of the Clock, and 216 for the Moon diameter number. 240 divided by 216 equals 1.111111. The Hebrew sacred foot of 1.0368 multiplied by 1.111111 equals 1.152, the Egyptian royal foot. Half of this becomes 0.576, the number of the End-Time on the Clock.

The ancient Hebrew, the Egyptians, the Greeks and Romans, and yes, even the British, hold to an ancient mile based on their particular measuring standard and multiplied by 5,000 units of their particular foot. The British foot of 1.056 multiplied by 5,000 equals 5,280 feet to the mile. It becomes evident that these were not chosen arbitrarily. They fit a pattern. The most remarkable of which are the British, the Hebrew and the Egyptian.

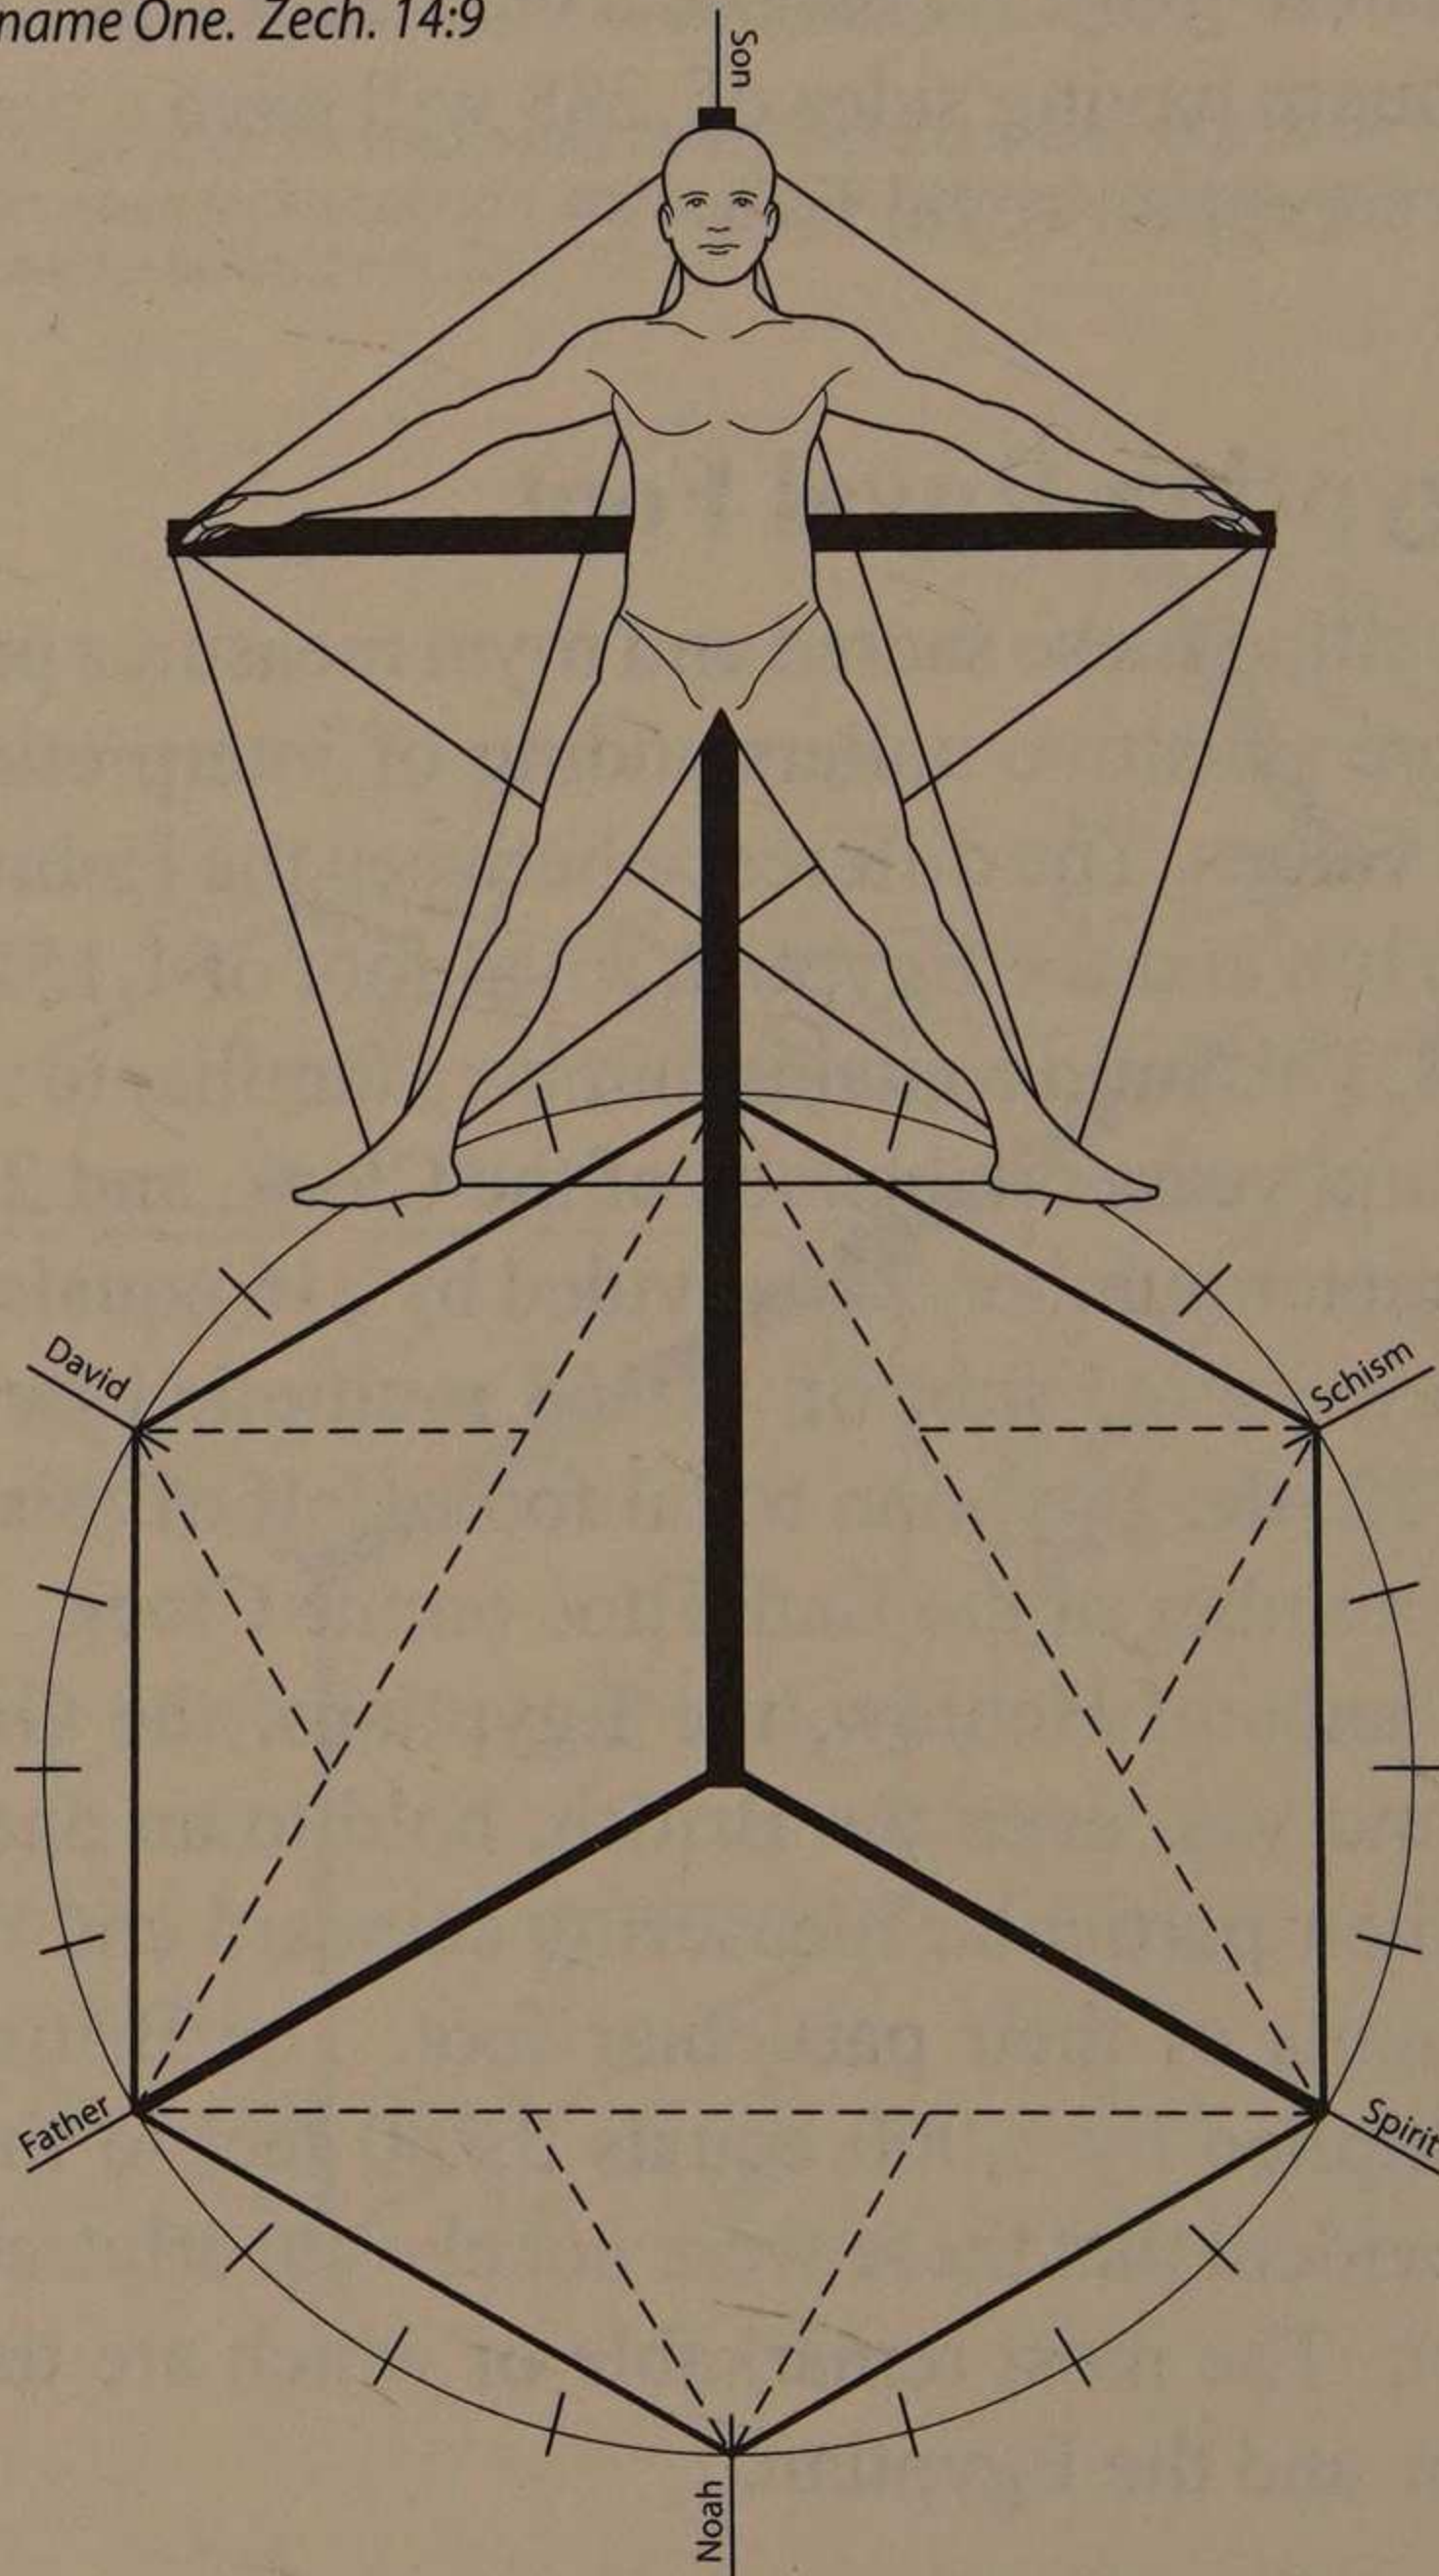

British mile	=	5,280 British feet
Hebrew mile	=	5,184 Hebrew feet
Egyptian mile	=	5,760 Egyptian feet

The British mile tells us of the coming of Jesus and the dawning of a New Beginning. Haggai 2:7 tells us of His time

Figure 12

## Earth Turned 60 Degrees Counter-Clockwise

*And the Lord shall be King over all the earth: in that day shall there be One Lord and His name One. Zech. 14:9*

*Where there is no vision the People perish. Prov. 29:18*

*My People are destroyed for lack of knowledge. Hos. 4:6*

*For the leaders of this People cause them to err; and they that are led of them are destroyed. Isa. 9:16*

*By the traditions of men, ye make the Word of God of none effect.  
Mk. 7:13, Mat. 15:6, Isa. 29:13-24*

*"How beautiful are the feet of them that preach the gospel of peace, and bring glad tidings of good things. Rom. 10:15*

of rulership when He sets up His righteous Kingdom in the Earth. *“I will shake all nations, and the Desire of all nations shall come; and I will fill this house (temple) with glory.”* Some translations state it: *“the Desired of all nations shall come.”* That desired One is none other than Earth’s new King, Jesus Christ. And the phrase, *“and the Desire of all nations shall come”* has a Gematria value of 528.

His coming is at the dawning of Earth’s New Beginning. Hosea said that He will come *“as the dawn,”* which has a Gematria value of 528. And the prophet Malachi simply said *“The day of His coming,”* which also has a Gematria value of 528.

The Hebrew mile gives us a bit more information about this One who is coming. The Hebrew mile bears the number 5,184. The prophet Malachi described Him as *“The Angel of the Covenant.”* He said: *“Behold I am sending my messenger, and he shall prepare the way before me. And the Lord whom ye seek shall suddenly come to his temple, even the Angel of the Covenant, in whom ye delight. Behold He comes!”* It is not surprising that the Gematria value for this whole prophetic statement is the number of Hebrew feet in a Hebrew mile—5184.

When Jesus came at His first advent, he stood up in the synagogue and said: *“The spirit of the Lord God is upon me because the Lord has anointed me to preach the gospel to the poor. He has sent me to bind up the broken hearted, to proclaim liberty to the captives, and to open the prison house for those that are bound.”* It is amazing that this entire verse has a Gematria value of 5184.

Thus we have the number of Hebrew feet in a Hebrew mile relating to Jesus both at his first advent, and at his second.

The Egyptian mile gives us the date for the ending of the 6,000 years of man’s rulership of Earth, and the beginning of their overthrow by *“Him whose right it is.”* This ancient mile contains 5,760 Egyptian feet.

The Hebrew year 5760 is the End-Time on the Cosmological Clock. It is the time of the expiration of man's right of rulership. And in the Gematria of the Scriptures, the number 576 and 5760 relate to the time when Jesus takes up his prophesied place as King on the antitypical throne of David. Psalm 2 is one of the prophecies that speak of this time.

*“Why do the heathen rage, and the people imagine a vain thing? The kings of the earth set themselves, and the rulers take counsel together, against the Lord, and against his anointed, saying, Let us break their bands asunder, and cast away their cords from us. He that sitteth in the heavens shall laugh: the Lord shall have them in derision. Then shall he speak unto them in his wrath, and vex them in his sore displeasure. Yet have I set my king upon my holy hill of Zion.”*

The identity of the One who is conquering man's governments is *“his anointed”* which means *“His Messiah.”* Then he says *“I have set my king”* which has a Gematria value of 5760 (by multiplication). Daniel called Him *“Messiah the Prince”* which also bears the number 5760.

On the Cosmological Clock, this begins to occur at the end of 6,000 years. It is amazing that the words *“Six days,”* as it appears in the Old Testament, has the Gematria value of 5760 (by multiplication).

The ratio between the Egyptian mile and the British mile is 864/792 which equals 1.090909. The number 864 represents the solar diameter, and 792 represents the Earth diameter. Let Heaven and Earth declare!

The ratio of difference between the ancient Roman mile and the Greek mile is 250/240; the same as the two circles of time on the Clock. Not a coincidence! Just like the music scale, the Clock was not an invention of man; it was

discovered. These things were designed into God's creation before time began.

## The Power of the Feet

The Hebrew measure, used above, is called the Hebrew Sacred Cubit, which is derived from the double-foot. The other is the Egyptian Royal Cubit. These two terms—Sacred and Royal—are connected by function. In the Millennial Kingdom Jesus with His bride are said to be a "*Royal Priesthood*," royal and sacred. In the New Testament, the Greek word "*basileus*" means the chief ruler or magistrate. This is taken from the word "*basis*," meaning to walk. Thus by implication it takes on the meaning of a leader, a prince, stepping, as if to measure. It also has the implication to measure time, or the beat of music which is done by the feet.

The foot is the ruler. In this case the Ruler is the Priest-King who has the sacred feet of power. It is not just a play on words. The feet hold up the entire body. The feet take us into paths of righteousness or paths of self indulgence and evil. The feet take us toward God, or they take us on our own journey away from God. It was the feet of Jesus who walked this sinful earth and drew men after him to follow the ways of righteousness. He was called "*The Way*." He was the way to follow.

A few days before His crucifixion a woman anointed His feet with costly ointment. It was a loving and very appropriate gesture, for His feet had taught her love and compassion, and most of all, the ways of righteousness. One of Jesus' last lessons before His crucifixion was to wash the feet of His disciples. He realized they did not know what He was doing, but He told them that they would understand hereafter. He said to them, "*If I wash you not, you will have no part with me*," (John 13:3-17).

When the Roman soldiers led Him to Calvary, they laid Him down on the cross, and pounded a great spike through his feet. His feet were overlapped, so that one spike went through both ankles and into the wood. His feet became helpless—his power, for the moment, had been taken from Him. His feet had come to the end of the way. But He knew the promise that God had given to the prophet Zechariah: “*His feet shall stand in that day upon the Mount of Olives, which is before Jerusalem on the east...*” He knew that He would come back to Earth with great power, because His feet would again stand.

Only three spikes were needed. One in each wrist, and one forced through the thickness of both ankles. We can only imagine the pain it inflicted on His perfect body, and the keenness of His mind to feel each heart-beat of it.

In the Hebrew alphabet, the letter “*vaw*” is written to resemble a spike or nail. It bears the Gematria number 6. Three spikes were used. Thus His agony and death bore the number 666, the number of man. He was “*The Man*.” He had come to Earth to pay the price for the sin of the first man. As He hung there by the strength of these three spikes—these three sixes—He spoke His last words, “*It is finished.*”

## Three Sixes

The three angles of each equilateral triangle within the hexagon are 60 degrees each—reflecting the three sixes. The first three numbers, 1, 2, and 3, when added total 6. Yet, if we multiply the first three numbers we still get 6. This is why we call 6 a perfect number; its factors both add and multiply to the same number.

The number 6 is not chosen arbitrarily. It is displayed in the dimensions of Earth and Moon, and thus related to man. If we consider the circumference of a circle drawn on the combined diameters of Earth and Moon, it will total

31,680 miles. Divide that number by the 24 “hours” on the Clock and the result is 1,320 for each 15-degree arc of the circuit. Throughout the New Testament, the word “*man*” is taken from the Greek word “*anthropos*,” which has a Gematria value of 132, which, as we have seen, both adds and multiplies to 6—the number of man. Another clue to the meaning of 132 can be found in Genesis 5:1, which tells us, “*He made him (man) in the likeness of God.*” This statement has a Gematria value of 1320. Man, being made in the likeness of God tells us that he was created perfect. However, he fell from that perfect condition when he chose to disobey God. But God, in His wisdom and fore-knowledge, planned for a Redeemer to pay the price for the sin and give Adam and all his posterity an opportunity to have the perfect life that had first been given to him. When that Redeemer was planted into the womb of Mary, it was perfect, because its Father was God. The angel who announced to Mary that she would have a son, referred to this embryo as “*The fruit of thy womb,*” which has a Gematria value of 1320.

Thus Jesus bore the three sixes from the womb to the tomb.

But this same Jesus will come again. For it is prophesied in Scripture that He will return, and that He will overthrow man’s governments and set up His divine government in the earth. This great event was told to King Nebuchadnezzar in a dream. But he could not understand it. So Daniel revealed the meaning of the dream to him. Nebuchadnezzar had seen a huge image of a man, who represented the great empires of man. Then he saw a little stone hurled down from the mountain and struck the great image on its toes. And the whole image collapsed, and fell into such tiny pieces that the wind simply blew it away. Then the little stone began to grow, until it filled the whole earth. The little stone, of course, represents divine government as will be set up in the Earth by Jesus Christ. Would you believe—“*The stone cut out of the moun-*

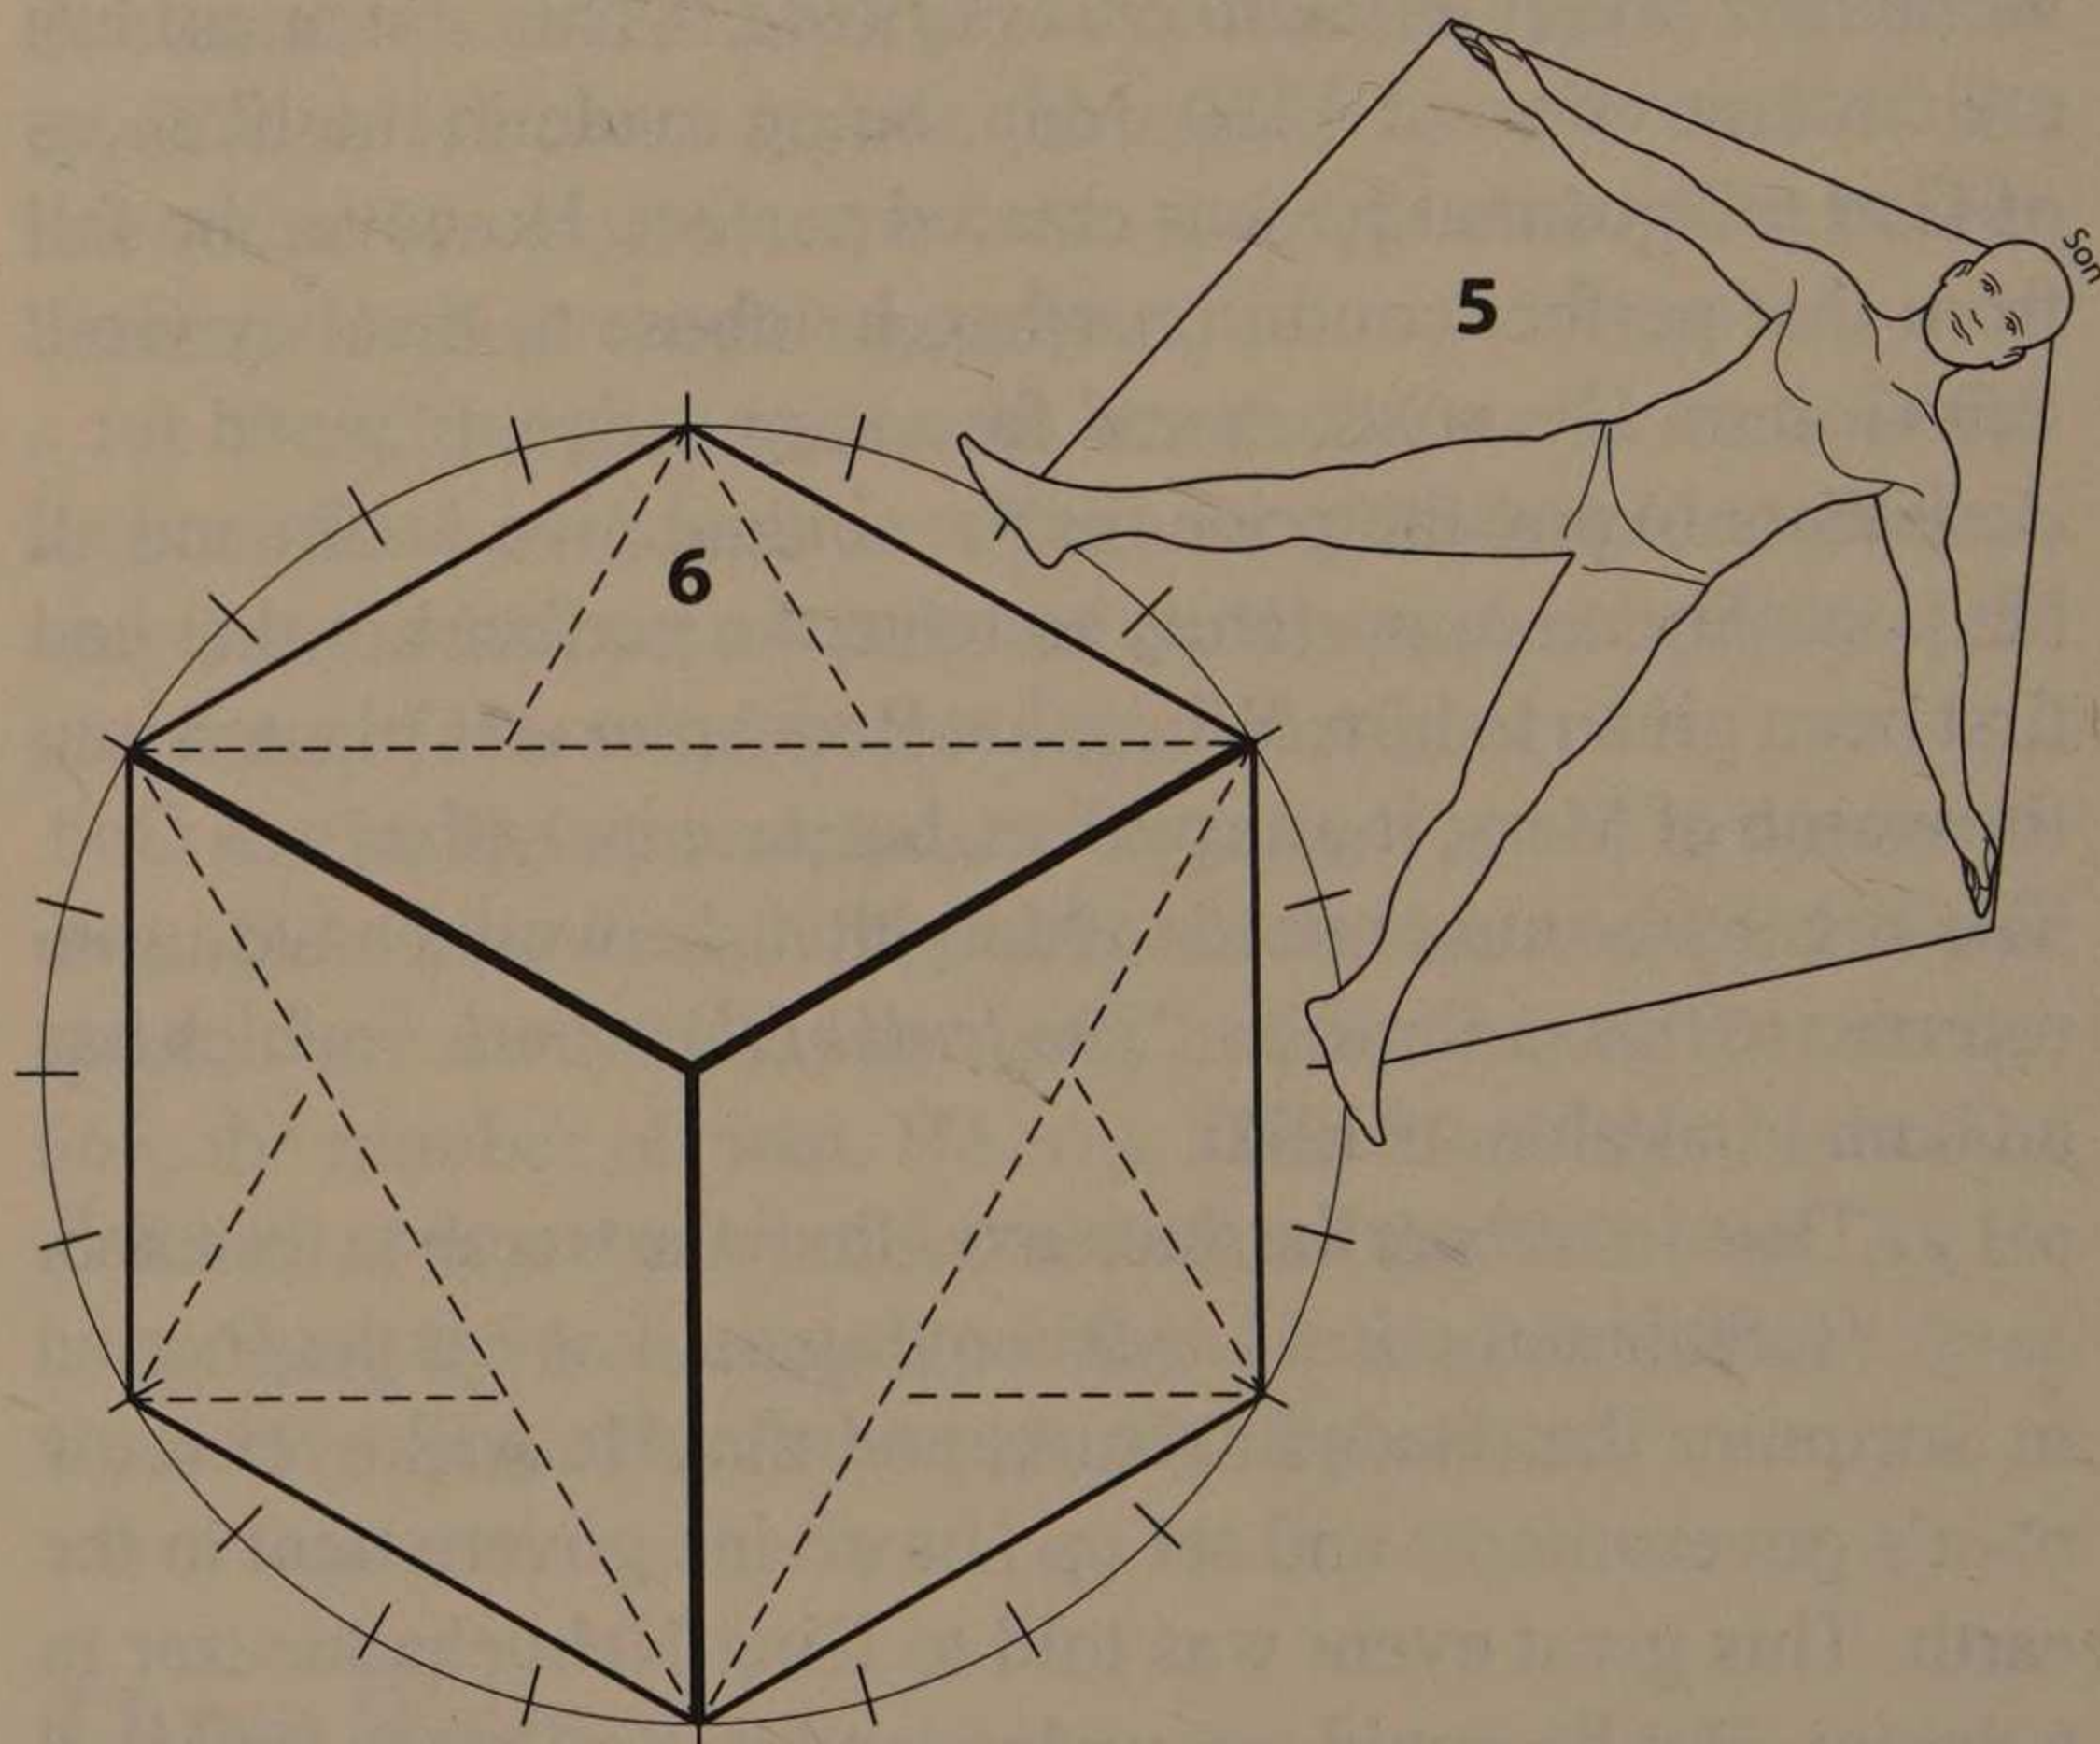

Figure 13

## Victory Over The Cross

Psalm 110 has seven verses 11(0) / 7

*Verse 1: The Lord said unto my Lord, "Sit Thou on My right hand, Until I make Thine enemies Thy footstool."*

*Verse 4: Thou art a priest for ever After the order of Melchizedek.*

*Isaiah 7:11 - Ask thee a sign of the Lord thy God, ...*

*Isaiah 7:14 - Therefore the Lord Himself will give you a sign; Behold, a virgin shall conceive, and bear a son, and shall call his name Immanuel ("God with us").*

*Isaiah 66:1 - "Heaven is My throne, and the earth is My footstool: where is the house that ye build unto Me? and Where is the place of My feet? For all things hath Mine hand made, ..."*

See also 1 Kings 8:27; 2 Chron. 6:18; Acts 7:49.

*tain*” has a Gematria value of 1320. The perfect government that He will set up in the Earth bears the factors of the perfect six.

The world itself bears the number 6. The Greek word that is translated “*world*” in the New Testament, is “*kosmos*” and it has a Gematria value of 600.

## **The Amazing Numbers of the Hebrew and Greek Alphabets**

The Greek alphabet contains 24 letters—the same number as the Clock. The Hebrew alphabet has 22 letters. The ratio between these two numbers is 24/22. This ratio, reduced to a decimal, is 1.090909. Delete the zeros and we have 1999, the same year as the fulfillment date on the Clock. Amazingly this is the same ratio as 864/792. And we have already seen that the number 864 represents the diameter of the Sun, and 792 represents the diameter of the Earth. The 24th and 22nd letters terminate both of these alphabets.

The first, middle and last letters of the Hebrew alphabet becomes an acronym for the Hebrew word for truth—*emet*. This acronym, when spelled out, translates to: “*God is the eternal King, in the infinite past, present and future.*” This is the ultimate meaning of the entire Hebrew alphabet. It came from God. Hebrew is the language in which God gave the Torah to Moses.

Thus it is no surprise to find that the 22nd letter of the Hebrew alphabet is *tau*—which originally looked like a cross. It takes on the meaning of Jesus on the cross, paying the price for sin.

The last letter of the Greek alphabet is *omega*, bearing the number 800. Jesus identified Himself with this letter and this number. He said, “*I am the Alpha and the Omega,*” the first and the last. He is the Beginner and the New Beginner,

represented by the numbers 1 and 8. Add the numbers 1 and 8 and of course we get 9—the number of fulfillment and finality.

It is also amazing that these two numbers—22 and 24—when multiplied gives us the number 528. This number is the Gematria value for the Hebrew word meaning *the dawning of the morning*. After we have the finality of man's evil order, we have the dawning of the Millennium of the divine government of Jesus Christ. This is shown on the clock by the finality at 1999, and the beginning of the dawning of a new day. In this new day, the old order must first be overthrown, before the new order can be set up. We are now living in this time of overthrow, and the time on the clock just keeps ticking, ticking, ticking. This coming generation will experience that dawning in its glorious reality!

Then shall be the fulfillment of the prophecy of Zechariah, when he said, "*And the Lord shall be king over all the earth: in that day shall there be one Lord, and his name One.*"

## **The Hebrew Year and 9-11-1999**

God's Cosmological Time-Piece shows the End-Time to be at the Hebrew New Year—Rosh Hashanah—which was the blowing of trumpets. On the Hebrew calendar, it was Tishrei 1, 5760. This day on our secular (Gregorian) calendar was September 11, 1999. It marked the end of 2,000 years since the birth of Jesus. This unique date, 9-11-1999, when the digits are multiplied, becomes that grand number which is especially significant at the End-Time.  $9 \times 1 \times 1 \times 1 \times 9 \times 9 \times 9 = 6561$ . Remember this amazing number 6561 for it is the Gematria for the last portion of Psalm 93, describing the "*floods*" that will come upon man's governments, and the establishing of the new order of Jesus Christ.

*“The floods have lifted up, O Lord, the floods have lifted up their voice; the floods have lifted up their waves. The Lord on high is mightier than the noise of many waters, yea, than the mighty waves of the sea. Thy testimonies are very sure: holiness becometh thine house, O Lord, for ever.”*

And what happened during the year 5760 that made any difference in the events of the world? A tremendous event happened, and as we look back upon it we see more clearly its impact upon the world today.

On the last day of the Hebrew year 5760, Ariel Sharon and one thousand Israeli soldiers went up on the Temple Mount, as a statement of ownership of the Mount. Ariel Sharon read a passage from the 37th chapter of book of Ezekiel, promising the land of Israel as their inheritance. Well, we all know what happened next. The Arabs launched their Intifada—their holy war—against Israel. In reality the war continues today—2010. Their aim, as they have stated, is to wipe Israel off the face of the Earth.

This was also in fulfillment of the prophecy of Psalm 83. In this Psalm, it states that many nations (all the Arab nations) will say:

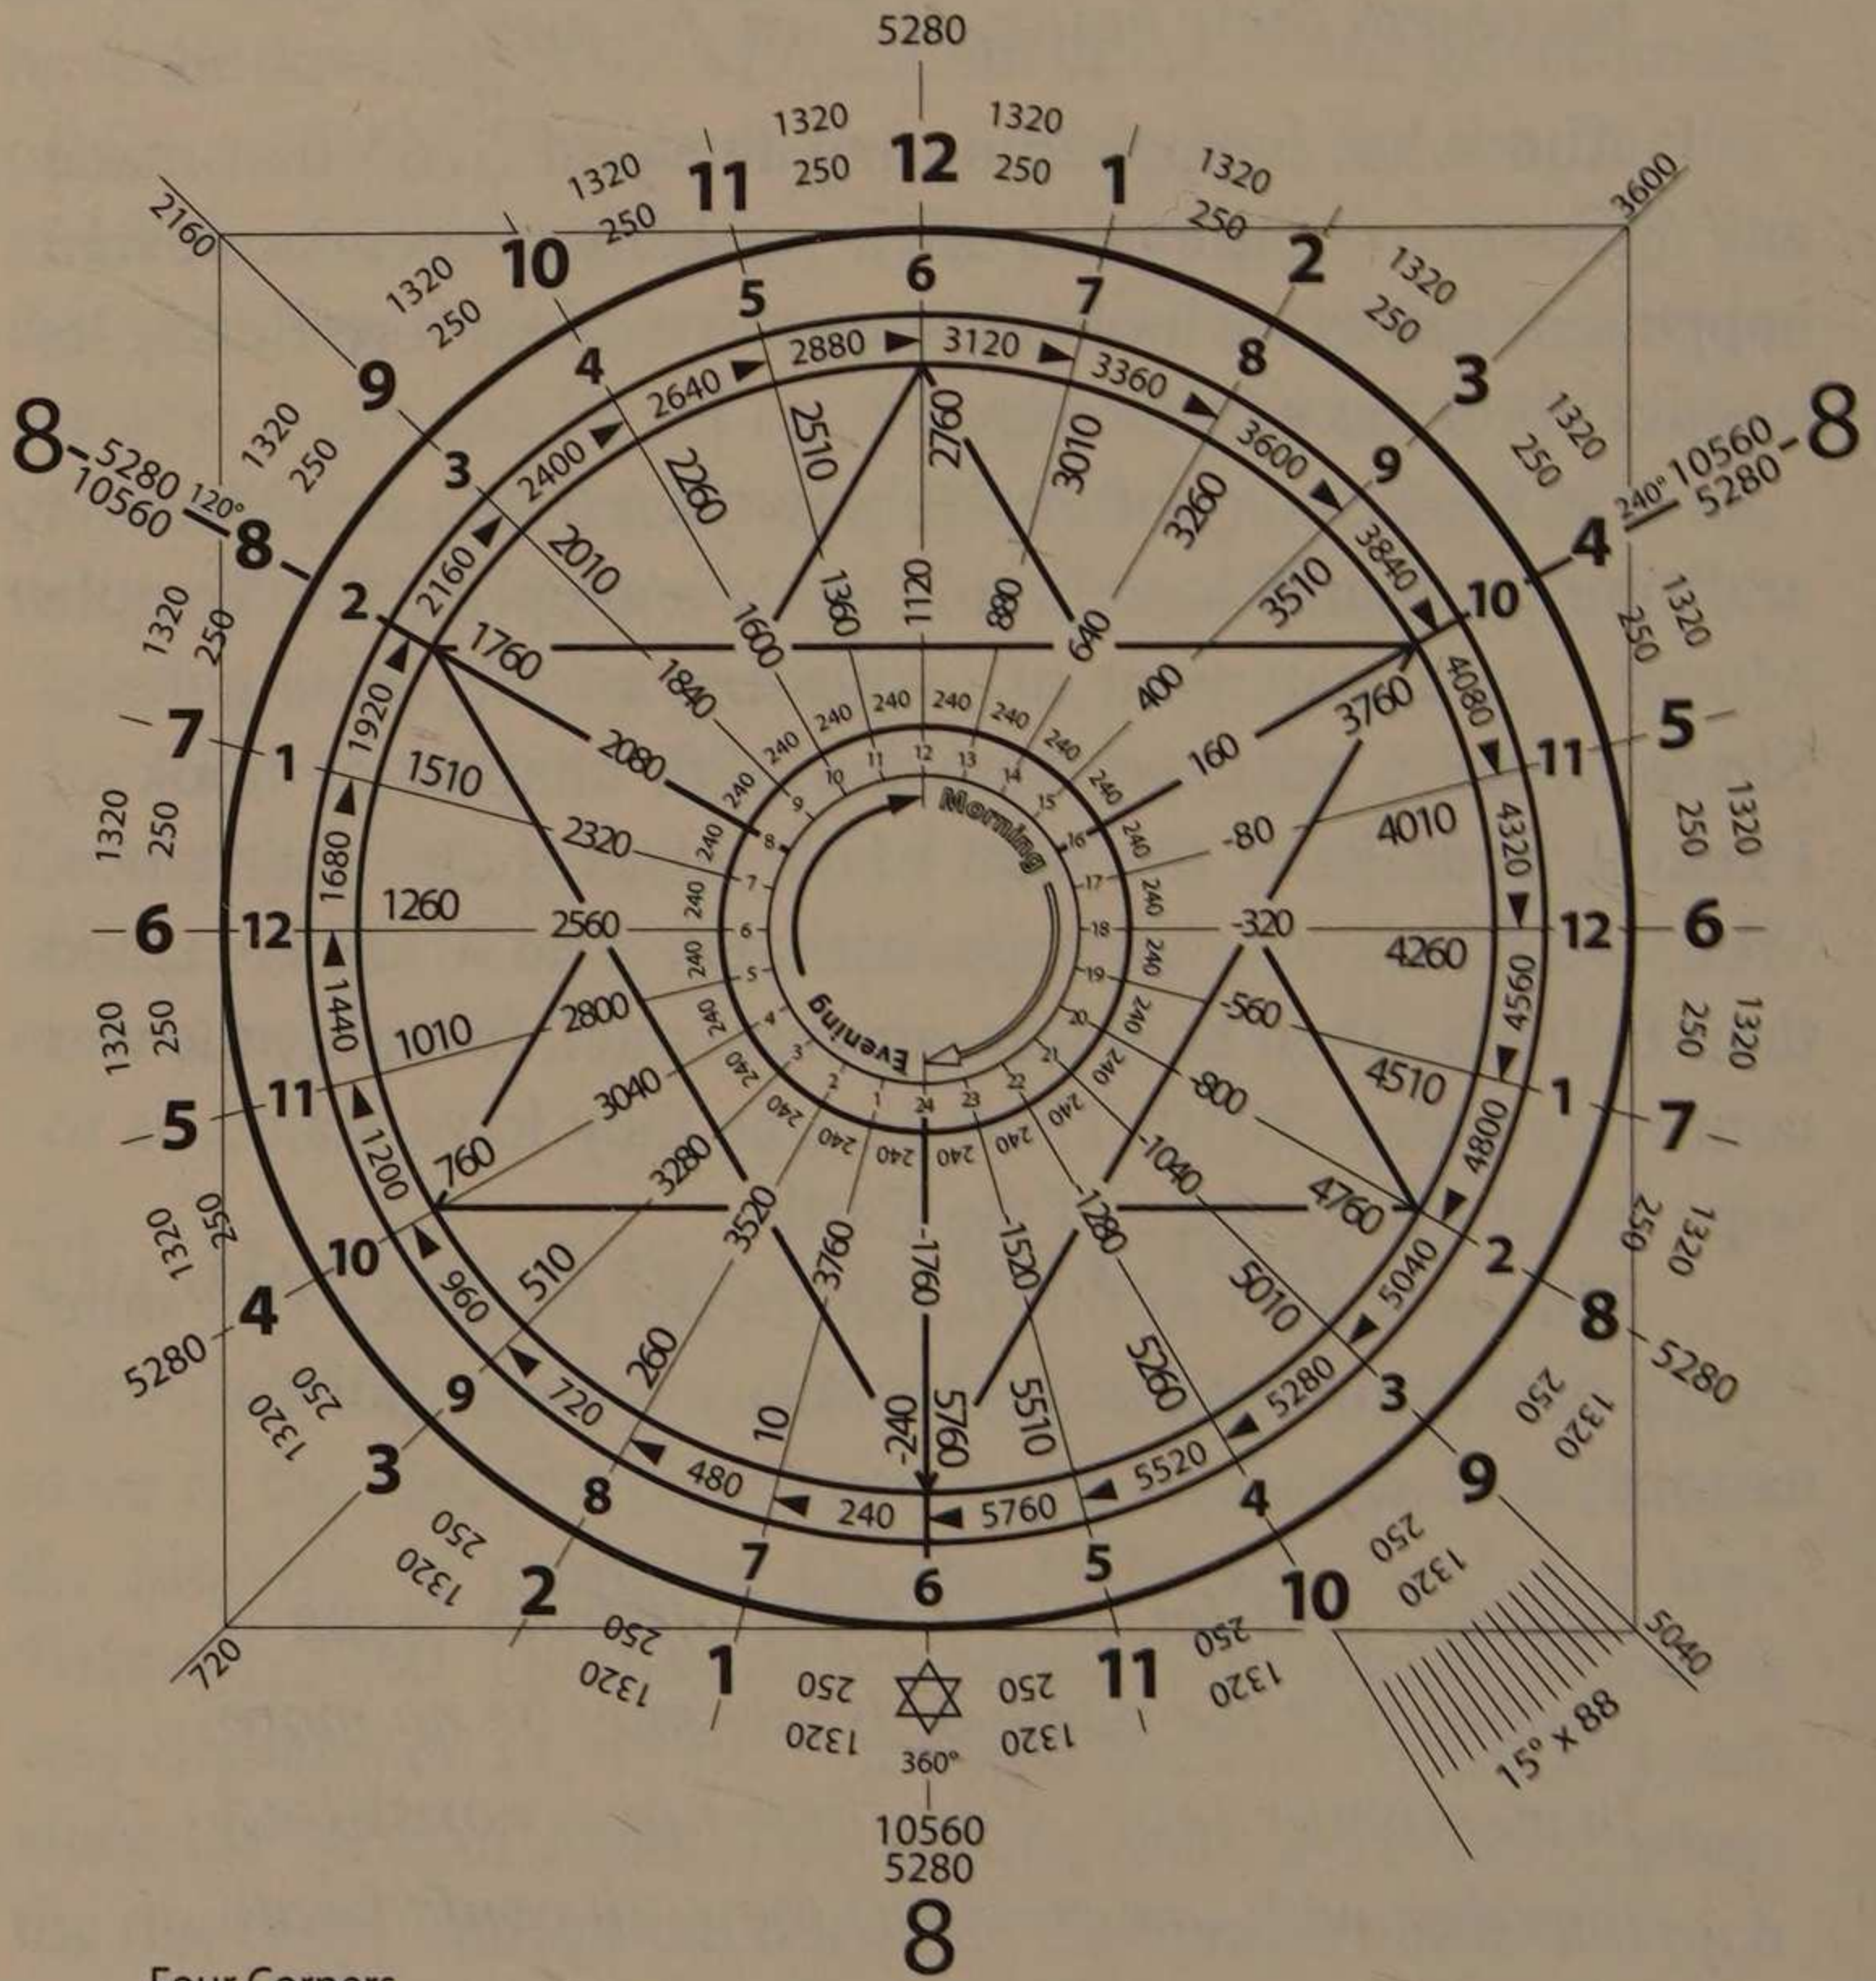

*“Come, and let us cut them off from being a nation; that the name of Israel may be no more in remembrance. For they have consulted together with one consent: they are confederate against thee.”*

This battle, whether cold or hot, is still going on; and the Arab nations are still conspiring to wipe Israel off the face of the Earth. It all began when Ariel Sharon went up on the temple mount and essentially proclaimed possession of it—on the last day of the Hebrew year 5760.

# Earth-Moon Circle

- 1056 "I form the light, I create darkness" Isa. 45:7
- 1056 "He shall send them a Savior and a great one" Isa. 19:20
- 1056 "The heavenly man" 1 Cor. 15:48
- 1056 "His dominion is an everlasting dominion and shall not pass away" Dan. 7:14

## Four Corners

- 720 "The Chosen One" Luke 23:35
- 2160 "He shall appear: Zec. 9:14
- 2160 "All nations shall serve Him" Psalm 22:16
- 3600 "Riches of Christ" Eph. 3:8
- 3600 "One man shall die for the people" John 11:50
- 5040 "The kingdom of our Lord and His Christ" Rev. 11:15
- 5040 "They pierced My hand and My feet" Psalm 22:16

## Earth-Moon Measure 31,680

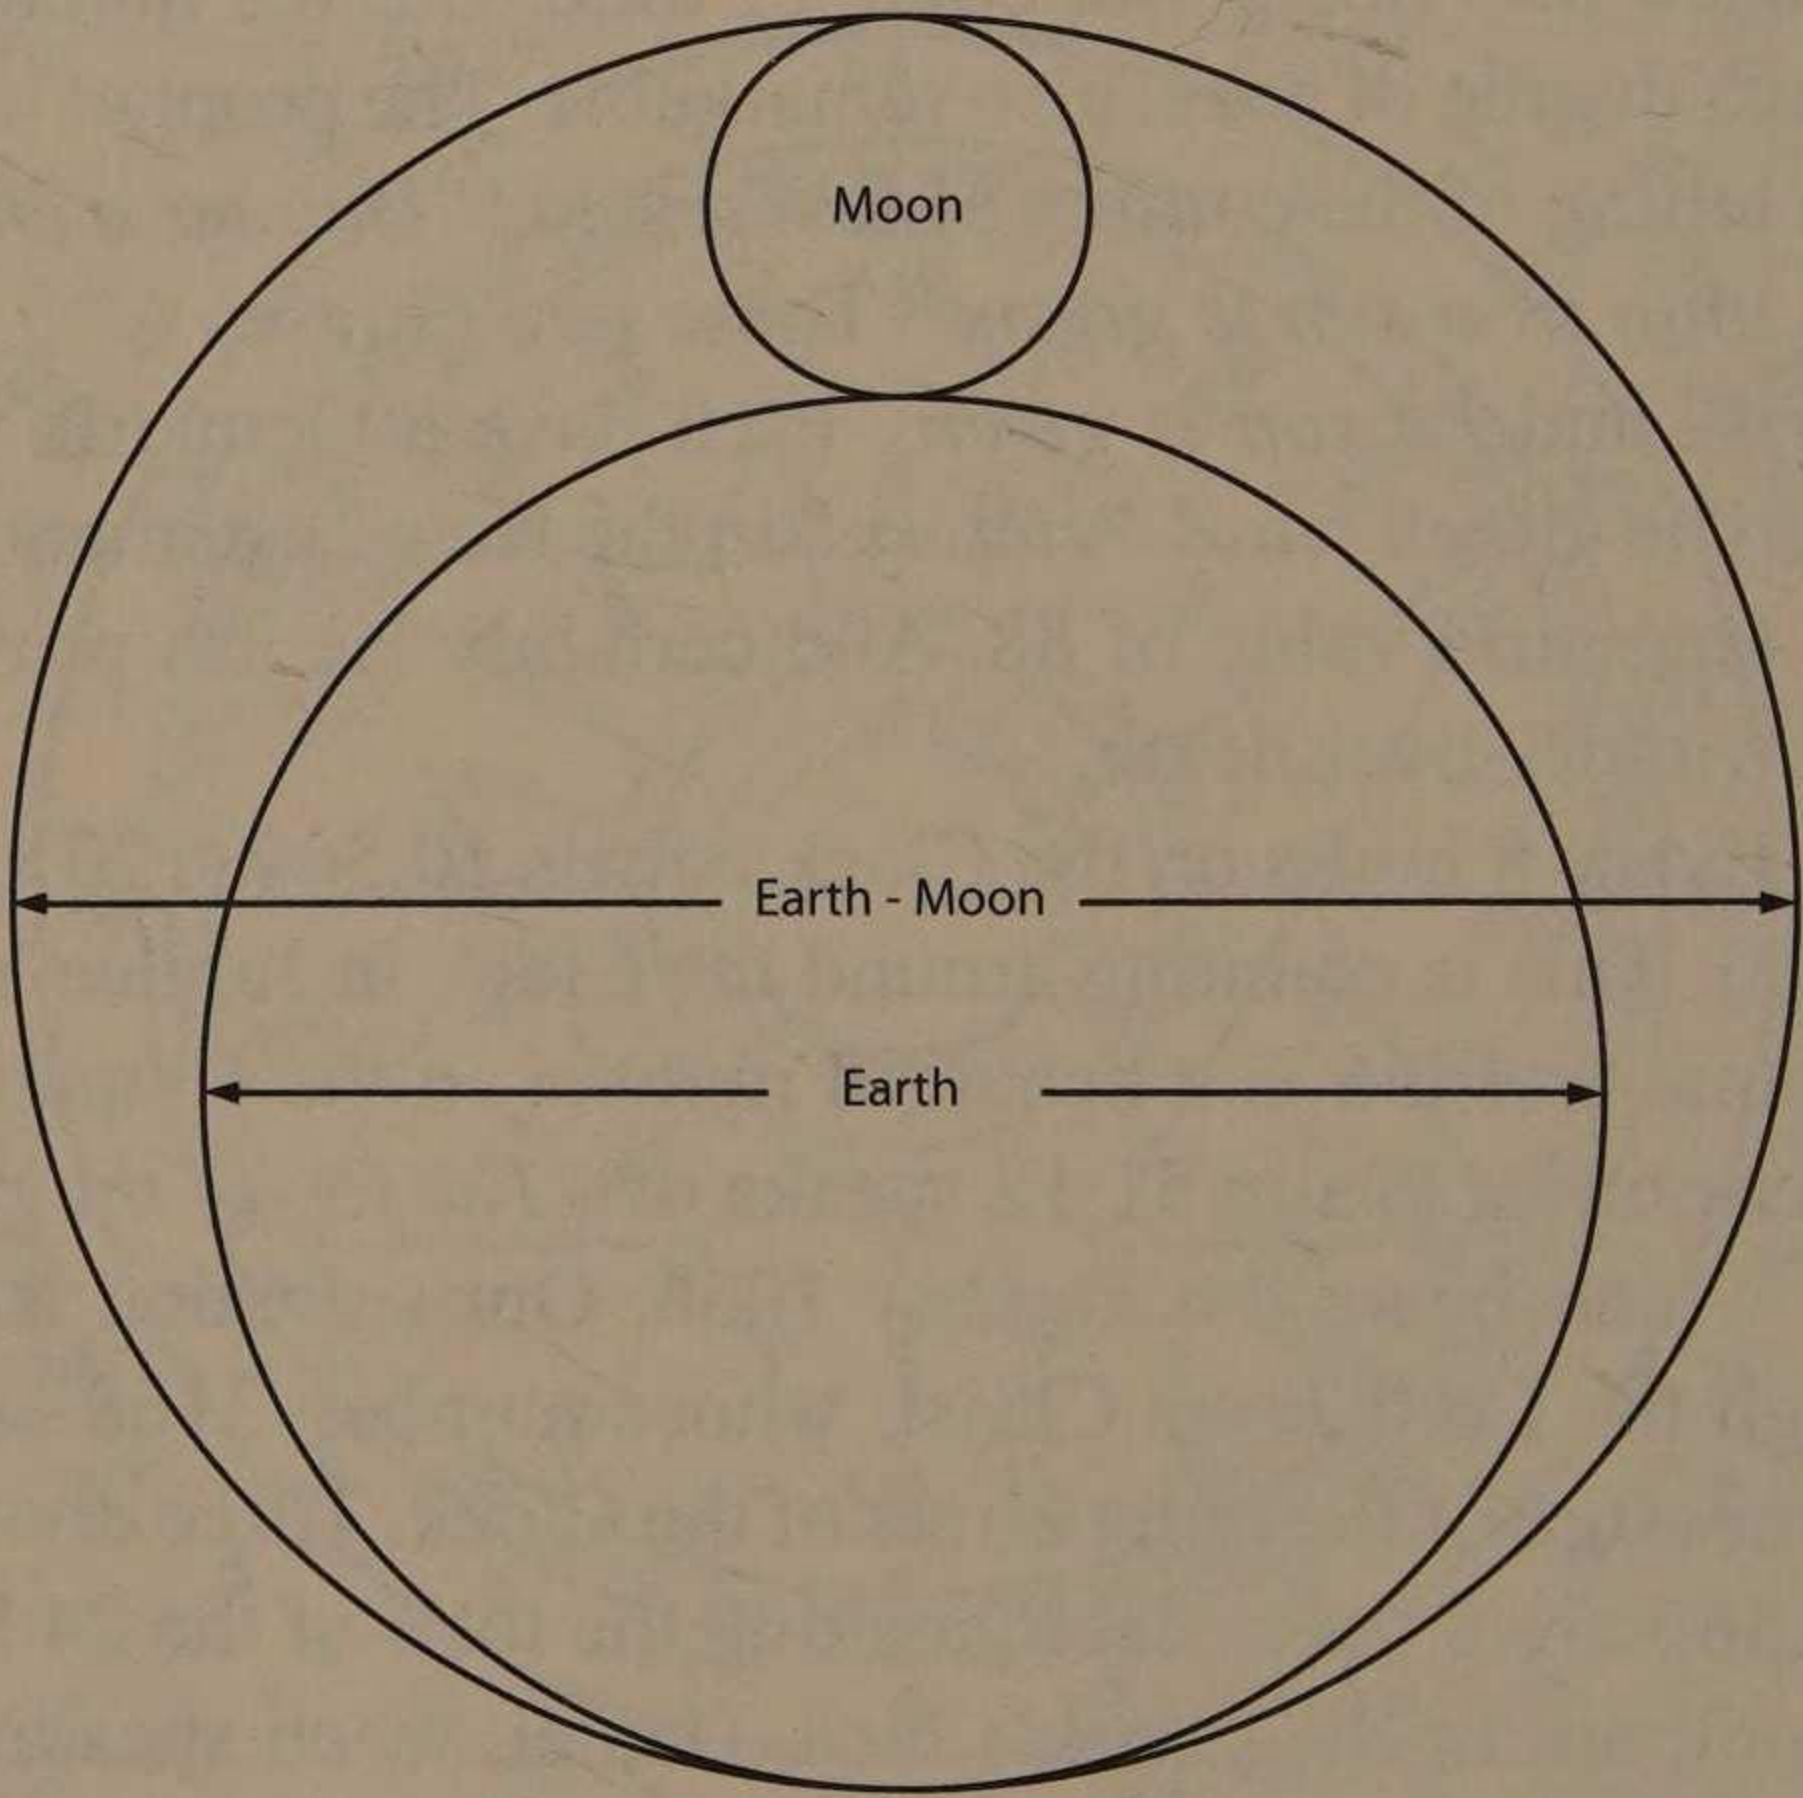

The outer circle on the Cosmological Clock is the circumference of a circle drawn on the combined diameters of Earth and Moon. That circumference is 31,680 miles. Each degree on this circle measures 88 miles ( $88 \times 360 = 31,680$ ). The name Lord Jesus Christ has a Gematria value of 3168, thus His name is imbedded into this grand circle of time. But the number 88 for each degree of arc is also remarkable. The prophet Isaiah, when telling of the coming of Jesus, said: "*Unto us a child is born, unto us a son is given.*" These two phrases – "*a child is born*" and "*a son is given*" each have a Gematria value of 88. The Greek word "*victory*" in the New Testament, also has a Gematria value of 88. And certainly He has provided for us victory over death.

Every 8 hours on the Clock equals 10,560 ( $120 \times 88 = 10,560$ ). This is counting around the Clock in Jubilee Years. The number 1056 is a beautiful number in the Gematria of the Scriptures. Psalm 51:12 speaks of "*The joy of thy salvation*" which bears the number 1056. Our salvation is only through the Lord Jesus Christ, whose number—3168— is the mile measure of the outer circle of the Clock. Three divisions of 10,560 are 8 hours each, making the total of the 24 hours of the circuit of the Clock's face. Daniel, when speaking of the coming kingdom of Jesus Christ, said: "*His dominion is an everlasting dominion that shall not pass away.*" It has a Gematria value of 1056. What a marvelous promise. We have the assurance that divine government will never pass away—it will be forever.

Each hour on the Clock represents 1,320 miles. It pertains to man, *anthropos*, whose Gematria is 1320. ( $1320 \times 24 = 31680$ ) Man's number is 6. Every 60 degrees on the Clock represents 4 hours, or 1,000-year periods. Thus each 60-degree increment represents 5,280 miles. It is the number of

Figure 15

# Earth-Moon Circle

British feet in a British mile. But more importantly, the number 528 is the Gematria value for “*the breaking forth of light*” or “*the dawning.*” When 6 of these 60-degree increments are complete, we have travelled the complete circuit of the Clock, 6,000 years.

Amazingly, the number of miles (5,280) represented in the complete circuit of the Clock, when multiplied by the ratio of the Hebrew alphabet to the Greek alphabet (24/22) gives us the number 5760, which is the Hebrew calendar date for the ending of the complete circuit of the Clock. Wow! How did this happen? It certainly was not put there by the one who discovered the Clock. It was already there—he just discovered it. (See Figures 14 and 15).

This unveiling attests further to the relationship of the Earth to the Moon, and to the marriage of the circle to the square. The four digits used in the Gematria for “*Lord Jesus Christ,*” are 3168. There are 24 permutations of this number. Bonnie Gaunt reveals this whole concept in her book, *Genesis One*. She then lines up the permutations into four columns, each containing the six permutations, making 24 in all. The beginning numbers in each column are the same. Below is her list, copied from her book by permission.

### Permutations of 3168

<b>3168</b>	<b>1368</b>	<b>6318</b>	<b>8316</b>
<b>3681</b>	<b>1683</b>	<b>6813</b>	<b>8613</b>
<b>3816</b>	<b>1386</b>	<b>6138</b>	<b>8136</b>
<b>3618</b>	<b>1836</b>	<b>6831</b>	<b>8631</b>
<b>3861</b>	<b>1638</b>	<b>6381</b>	<b>8163</b>
<b>3186</b>	<b>1863</b>	<b>6183</b>	<b>8361</b>
<b>21330</b>	<b>9774</b>	<b>31664</b>	<b>50220</b>

119988

If we add the first numbers in each column the result is 108. It is the Moon radius number, but it is also the number that always relates to the Beginning and the New Beginning, or the Beginner and the New Beginner—Lord Jesus Christ. This is also the atomic number for silver, which represents redemption.

In her 1995 book *Beginnings: the Sacred Design*, Bonnie wonderfully shows and demonstrates concerning the numbers 1080 and 1056. The first six rectangles through which the Golden Spiral passes have aggregate perimeters of 1056, while all add to 1080. Both numbers are beautiful in their relation to the Creator and creation. The number 1056 shows its link with the first acts of creation in Isaiah 45:7: “*I form the light, I create darkness.*” The Gematria value of this phrase is 1056. The Apostle Paul referred to Jesus as “*The heavenly man*” in I Corinthians 15:48, which also adds to 1056. Isaiah prophesied “*He shall send them a Saviour and a great one,*” which also has a value of 1056. And Daniel told us of His everlasting Kingdom when he said “*His dominion is an everlasting dominion that shall not pass away,*” which also has a Gematria value of 1056. These are not random numbers—they are numbers with a purpose.

The Earth number (7920) and the Moon number (2160) are very significant in the Scriptures, and also in the Cosmological Clock. Subtract the Moon number from the Earth number and we get 5760 which is the End-Time number on the Clock.

A circle drawn on the combined diameters of Earth and Moon will have a circumference of 31,680 miles. If we subtract from this the Sun’s complete path through the Zodiac (25,920 years) we again get the End-Time number—5760. These are not random numbers, nor are they to be ignored. These numbers have been placed there by the Creator, who is the Master Mathematician of the Universe. They are there for us to see, and to take heed. They are there so we can understand

His great plan of the ages and of salvation. They tell us of the 6,000 years of experience with sin, and of the Redeemer who came to purchase life for all who had lost life through the sin of Adam. These numbers are there as an everlasting testimony of God's unerring wisdom in the planning of the scenario of man on this Earth.

We can all see and perceive the precise planning of the Moon's relation to the Earth every time we look up into the sky and see the full Moon. From our stance on Earth, we only see one side of the Moon. In all the ages of man, this has never changed. There is not even the slightest variance in its precise timing. If this were not planned by a Master Mathematician it would appear impossible for it to have happened by chance. The odds are so astronomical that it would not be worth considering. If the relationship were off by the remotest "nth" of a second it would have already become visible to man. This is only what we can see with our eyes. Yet the mathematical relationship of the Moon to the Earth is equally as awesome, and confirms the planning by a Master Architect.

The circumference of the Moon is 6,788.6 miles. Divide this circumference by the 24 hours on the Clock: the result is 282.86. Divide this number by 60 minutes, then divide by 60 seconds and the result is .07857, which is  $\frac{1}{4}$  sacred Pi.

We have shown the relationship of the Moon to the Earth by the illustration of the Moon tangent to Earth and a circle superscribed around their combined diameters, using  $\frac{22}{7}$  for Pi. Now draw a square around that circle, and it will have a perimeter of 40,320 miles. This shows the relationship of Moon and Earth by its magnificent Gematria. In Gematria we have been eliminating the zeros. This time let's leave them in and find something beautiful.

We know that the light we perceive from the Moon is really the reflected light of the Sun. And we have also seen that the moon represents redemption. Thus it tells us that the Author of redemption is the Father himself, but it comes to

us through the Son, Jesus Christ. So, ultimately speaking, redemption comes from the Father, because it was His great plan which was carried out by the Son. This number, 40320 beautifully reveals this relationship of the Creator to His human creation—man.

First in this demonstration, let's just look at the Creator and the man He created. The title "*Almighty*" is used frequently in the Scriptures, and of course refers to God. In the New Testament the word "*Almighty*" has a Gematria value of 40320 by multiplying its letter-numbers. But, amazingly, so does man bear this number. In the New Testament the Greek word for man is "*anthropos*" which also has a Gematria value of 4032 by multiplication. We are told in Genesis that man was created in the image of God, and now we see that man also bears the number of God.

When Jesus came to be man's redeemer, he had to be the exact equivalent of Adam—a perfect man. This is shown by the Gematria. The statement of the Apostle Paul that the "*last Adam*" would pay the price for the first Adam reveals this same number. The title "*last Adam*" also bears the number 40320 by multiplication.

Thus we have the Father, the Son, and man, all bearing the same number 40320. It is not a coincidence. It is part of a magnificent plan that spans eternity.

## **Sun, Moon and Earth**

The relationship of the Sun to the Moon and to the Earth is not just an integral part of our solar system, it also is unique in its interrelationships. The Sun was created to be the source of light and life to the Earth. The Moon was created to be Earth's time-piece. And the Earth was created to be man's home.

The "*two great lights*" that are spoken of in Genesis are, of course, the Sun and the Moon. Their relationship to

each other is not just the giving of light to the Earth, but they have a numerical relationship also. The diameter of the Sun is 864,000 miles; and a square drawn around the Moon has a perimeter of 8,640 miles. This is because the function of the Moon is to reflect the light of the Sun. If we draw a square around the Sun we get the number 3456 with lots of zeros after it. Add the sum of the digits and we get 18—the numbers referring to Beginning and New Beginning. However, if we multiply the digits, we get 360—the number of degrees in the circle.

Or, we can show it another way. The End-Time on the Cosmological Clock is at the Hebrew year 5760. If we multiply that number by the 24 hours on the Clock the result is 138,240. Consider this number as the perimeter of a square, and each side will be 34,560.

This exercise does not end there. Let's bring the Earth into it. We have seen that the circle drawn on the combined diameters of Earth and Moon will have a circumference of 31,680 miles. Draw a square around that circle and it will have a perimeter of 40,320 miles. This is one of the rare numbers that is evenly divisible by 7, and the result is 5,760. The perimeter of the square drawn on the Sun is 34,560; divide it by 6 and the result is still 5,760—the date for the End-Time on the Clock. The end of 6,000 years on the Clock begins the 7th.

Amazingly, if we add the 40,320 miles to the 34,560 miles, and divide by 13 (6 and 7), we still get 5760.

The Sun, Moon and the Earth become a three-fold witness of the 6,000 years represented on the Cosmological Clock. God's excellence!

# The Clock's Amazing Gematria

*By Bonnie Gaunt*

Supplement No. 1

The first time I looked at the Clock design, tingles began going up the back of my neck. I have spent many years working with the Gematria of the Bible, doing it all by hand with a little hand-held calculator. In order to retain all the information I was gathering, I listed the scriptures and their number equivalents and arranged them numerically into notebooks. After doing this for more than forty years I have a pile of fat notebooks. When I first saw Andrew Moore's Clock design, those tingles on the back of my neck were because I recognized all the numbers in one of the circles as being numbers specifically referring to Jesus and His work of salvation. It was amazing! It is one of the outer circles that lists the years in 240-year intervals. Every number around the circle is a number that I had found during more than forty years of research, and as I looked at them, they nearly jumped off the page at me.

Below I will list these numbers, as they appear on the face of the Clock, beginning at the bottom and going clockwise around the circle. These numbers identify the Lord Jesus Christ as the One who came to Earth to be the sacrificial Lamb of God, and take away the sin of Adam, and release all of Adam's posterity from the death penalty—providing life for all mankind. These numbers are all multiples of 120, the number of Jubilee years in the 6,000-year circuit of the Clock. Let's look at them. (See Figure 14)

120 x 2 = 240:

2400 = *“And with the transgressors was counted and he bore the sin of many, and made intercession for the transgressors.”*

Isaiah 53:12

120 x 4 = 480:

4800 = "*The Coming of the Son of Man*"

Matthew 24:27

480 = "*The Breaker has come up*"

(The Breaker is Jesus at his second coming)

Micah 2:13

120 x 6 = 720:

720 = "*The Chosen One*"

(Jesus)

Luke 23:35

120 x 8 = 960:

960 = "*Gift*"

(...of God—referring to Jesus)

John 4:10

120 x 10 = 1200:

1200 = "*I have put my spirit upon Him*"

(upon Jesus)

Isaiah 42:1

120 x 12 = 1440:

1440 = "*Lord Christ*"

Acts 4:26

120 x 14 = 1680:

1680 = "*Christ*"

Acts 4:26

120 x 19 = 2160:

216 = "*Lion*"

(Prophetic of Jesus)

Hebrew

216 = *"All nations shall serve Him"*

(Jesus)

Psalm 72:1

216 = *"He shall appear"*

(Jesus at His second coming)

Zechariah 9:14

120 x 20 = 2640:

2640 = *"the coming of the Lord"*

James 5:8

2640 = *"In the likeness of sinful flesh"*

(Jesus at his first advent)

Romans 8:3

120 x 24 = 2880:

288 = *"He shall be a priest on his throne"*

Zechariah 6:13

288 = *"It pleased the Lord to bruise him; he hath put him to grief"*

(Jesus on the cross)

Isaiah 53:10

120 x 26 = 3120:

312 = *"To make atonement"*

(Jesus made atonement by his death)

Ezekiel 16:63

120 x 28 = 3360:

336 = *"Shiloh"*

(Prophetic of Jesus)

Jeremiah 7:14

120 x 30 = 3600:

3600 = *"One man should die for the people"*

John 11:50

3600 = *"Riches of Christ"*

Ephesians 3:8

120 x 32 = 3840:

3840 = *"The Last Adam a quickening spirit"*

(Jesus)

I Corinthians 15:45

120 x 34 = 4080:

408 = *"Lamb"*

(Jesus was the Lamb of God who made atonement for all mankind)

Numbers 29:18

408 = *"O give thanks unto the Lord, for He is good; for his mercy endureth forever."*

(It was the mercy of God that sent His Son Jesus to be the sacrificial Lamb.)

Psalms 118:1

120 x 36 = 4320:

432 = *"The branch of Jehovah, beautiful and glorious"*

Isaiah 4:2

120 x 38 = 4560:

456 = *"A Savior"*

Isaiah 63:8

456 = *"My servant shall rule wisely."*

(Jesus)  
Isaiah 63:8

120 x 40 = 4800:  
(see 480)

120 x 42 = 5040:  
5040 = "*The kingdom of our Lord and his Christ*"  
Revelation 11:15

504 = "*They pierced my hands and my feet.*"  
Psalm 22:16

120 x 44 = 5280:  
528 = "*And shall come the Desire of all nations*"  
(Jesus)  
Haggai 2:7

528 = "*The day of His coming*"  
Malachi 3:2

120 x 46 = 5520:  
552 = "*The Way*"  
(Jesus said I am the Way, the Truth, and the Life)

120 x 48 = 5760:  
576 = "*Child*"  
(The infant Jesus)  
Luke 2:17

576 = "*Wells of Salvation*"  
(Jesus provided it for all mankind)  
Isaiah 12:3

The end of Supplement 1

## The Triangles within the Earth Circle

As we have seen on the Clock, there are two triangles within the Earth circle. One is upright and the other inverted. For our purposes, let's call the upright one masculine, and the inverted one feminine.

Each line of the triangle measures 6,860 miles, from apex to apex. However, each line becomes bisected by a radiating spoke originating at Earth's center point. The center of the Earth is the same point as the center of the moon on the Clock's face. Thus the number 3430 becomes revealed by the spokes radiating out from the center of both Earth and Moon, by bisecting each of the lines of the feminine and masculine triangles. (See Figure 16)

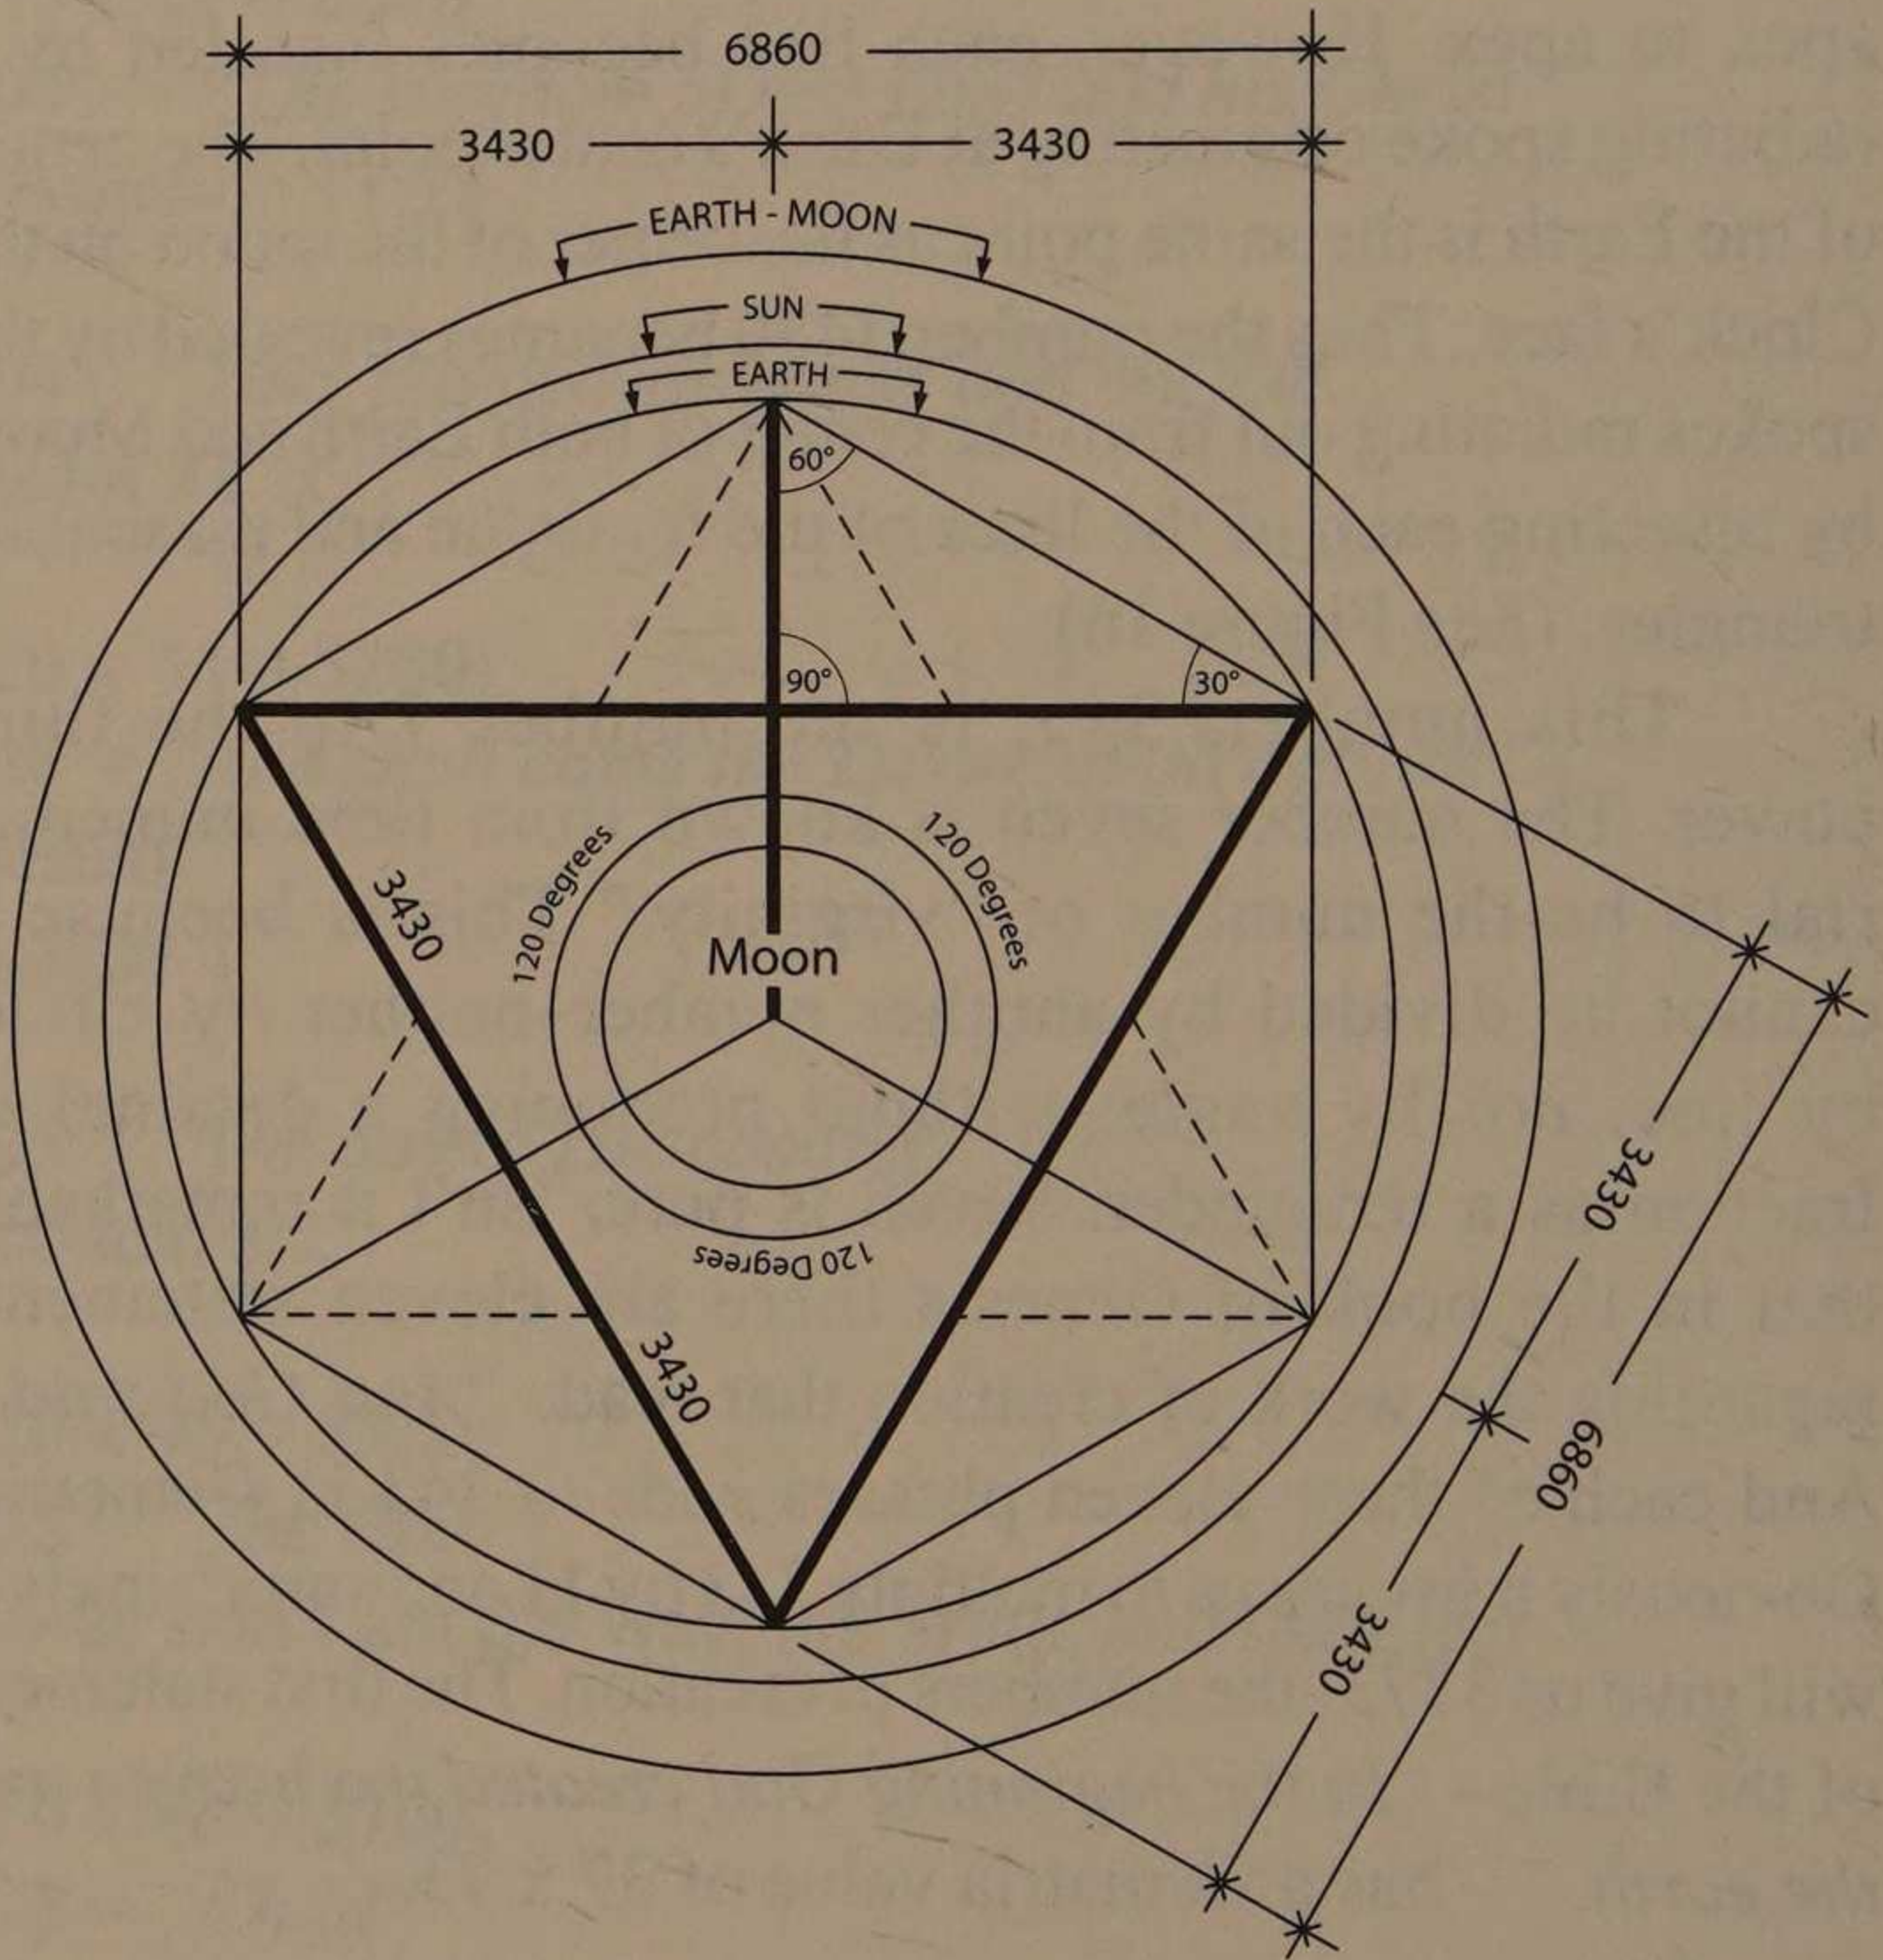

This number, 343, is the number 7 to the third power. The number seven is known from time immemorial to be the number of "virginity." This is because it cannot be divided by another number—neither by circle, by line, nor by angle, without producing a decimal or fraction as a remainder. Seven is pure. Isn't it remarkable that in the book of Genesis there are eleven statements regarding the work of creation that read: "*And God said.*" And each of these eleven phrases adds to 343 in Gematria. Obviously it invites us to multiply 343 by 11 and surprisingly it will give us 3773—the numbers of creation. The first statement of the Bible— "*In the beginning God created the heaven and the earth.*" — has a Gematria value of  $37 \times 73$ .

Figure 16

# The Virgin Seven

## "And GOD Said"

343  
Forty-Nine Sevens

"The Earth is MY footstool" (Isa. 66:1) = 588

There are 5880 sevens in the two equilateral triangles.

# The Amazing Number 343

By Bonnie Gaunt

Supplement No. 2

The span of the inverted triangle drawn on the circumference of the Earth becomes the arm-span of Jesus on the cross, indicating the world-wide application of His sacrifice. It was for all mankind!

Jesus, as the Logos (the Word, or spokesman for Jehovah), was the agent through which all creation was accomplished. The Apostle John said, "*All things were made by Him, and without Him was nothing made.*" In the New Testament He is called Lord Jesus Christ, whose Gematria number is 3168. However, it has not been discussed in this book that the name Lord Jesus Christ also bears the number 3368. This is because when the word "*Lord*" ends with an *upsilon*, it bears the number 1000, and when it ends with a *sigma* it bears the number 800. These spellings of the word "*Lord*" are both used throughout the New Testament, depending upon their placement in the sentence. So we have the name Lord Jesus Christ bearing the numbers 3168 and 3368.

A beautiful prophecy in Isaiah 4:2 uses the 3368 as its identification.

3368 = "*In that day will the Branch of Jehovah be beautiful and glorious, and the fruit of the earth pride and for glory for the survivors of Israel.*"

We know that the "*Branch,*" spoken of by Isaiah, Jeremiah, and Zechariah, is none other than the Lord Jesus Christ. The words "*beautiful and glorious*" in describing Him provide an extra 200 to His number, making the total 3368.

$$\begin{array}{r} 3168 = \text{Lord Jesus Christ} \\ 200 = \text{beautiful and glorious} \\ \hline 3368 \end{array}$$

So, let's look closer at this statement by Isaiah. Within it is the phrase "*beautiful and glorious, the fruit of the earth.*" It has a Gematria value of 792. It is a number with which we are familiar—it is the diameter of our earth (792(0) miles), and it is also the name Lord Jesus Christ spelled in Hebrew. How fitting that the diagram of Jesus on the cross not only spans the inverted triangle, but vertically He spans the diameter of the Earth. It speaks loudly that the Lord Jesus Christ, in the moment that He died on the cross, provided the price for redemption for all mankind—world wide.

His arms stretched forth and nailed to the cross, not only span the inverted triangle, they representatively span the Earth. If that horizontal span were divided in half at His heart, each side would be 343(0) miles.

Isaiah said, "*The Branch of the Lord will be beautiful*"—it has a Gematria value of 343.

In all the works of creation, the Logos (the Word) was the spokesman for Jehovah. "*He spoke and worlds were made.*" In the first chapter of Genesis we find creation spoken by the eleven "*utterances*" of God. Before each act of preparing the Earth to be man's home, the scripture states "*And God said.*" This identification of the acts of creation has a Gematria value of 343. There were eleven such statements. Thus eleven times 343 equals 3773. Genesis 1:1 tells us "*In the beginning God created the heaven and the earth*"—it has a Gematria value of  $37 \times 73$ .

In the diagram we see the close relationship of the number 792(0), the diameter of the Earth, with the number 343, the arm span of Jesus—the span of the inverted triangle. This relationship exists between the "*utterances*" — "*And God said.*"

- 343 = *“And God said”*
- 792 = *Utterance* (in the New Testament)
- 792 = *Lord Jesus Christ* (Hebrew)
- 792 = *Salvation* (Hebrew)

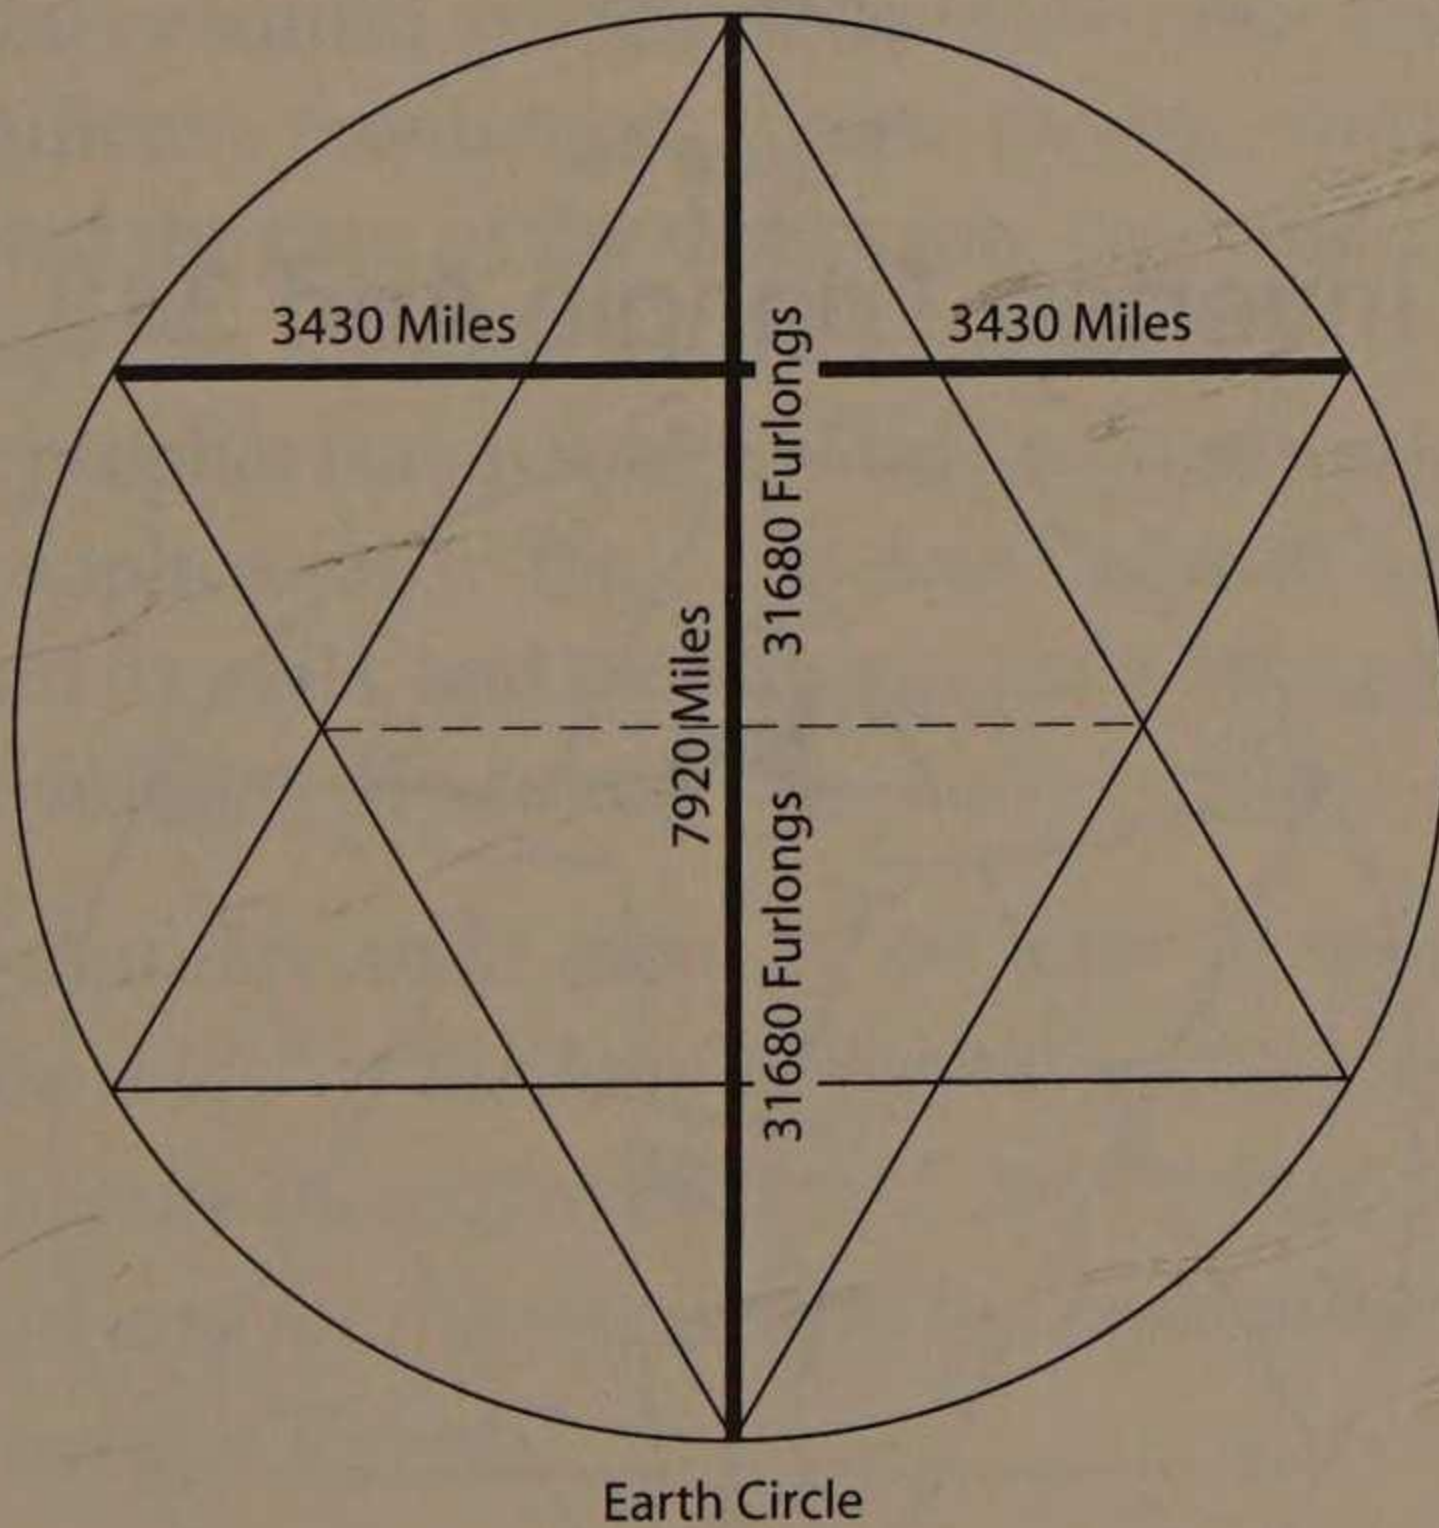

7920 Miles = Diameter of the Earth

(See Figures 17, 18, and 19)

# The Great Pyramid

Figures 20 and 21

Just like the everyday clock, we can put the hour and minute hands on the Cosmological Clock. On an ordinary clock, the hour hand is short and the minute hand is longer. So let's do it that way on the Cosmological Clock. Except it is not an arbitrary matter; the hour hand projects from the middle to the inner circle of the Earth's circumference. The minute hand projects from the middle to the Earth-Moon circumference. When these two hands are placed at exactly a right angle, a line drawn from the point of the hour hand to the point of the minute hand, forming the hypotenuse of the right angle, the angle of the slope from the Earth-hour hand to the Earth-Moon minute hand will be 51 degrees 51 minutes.

Where have we seen this angle? Amazingly it is the angle of the Great Pyramid, from its base to its apex—the angle of the beautiful white casing stones that once covered that magnificent monument. Those casing stones captured and reflected the rays of the desert sun, and could be seen for many miles, like a jewel in a sea of sand.

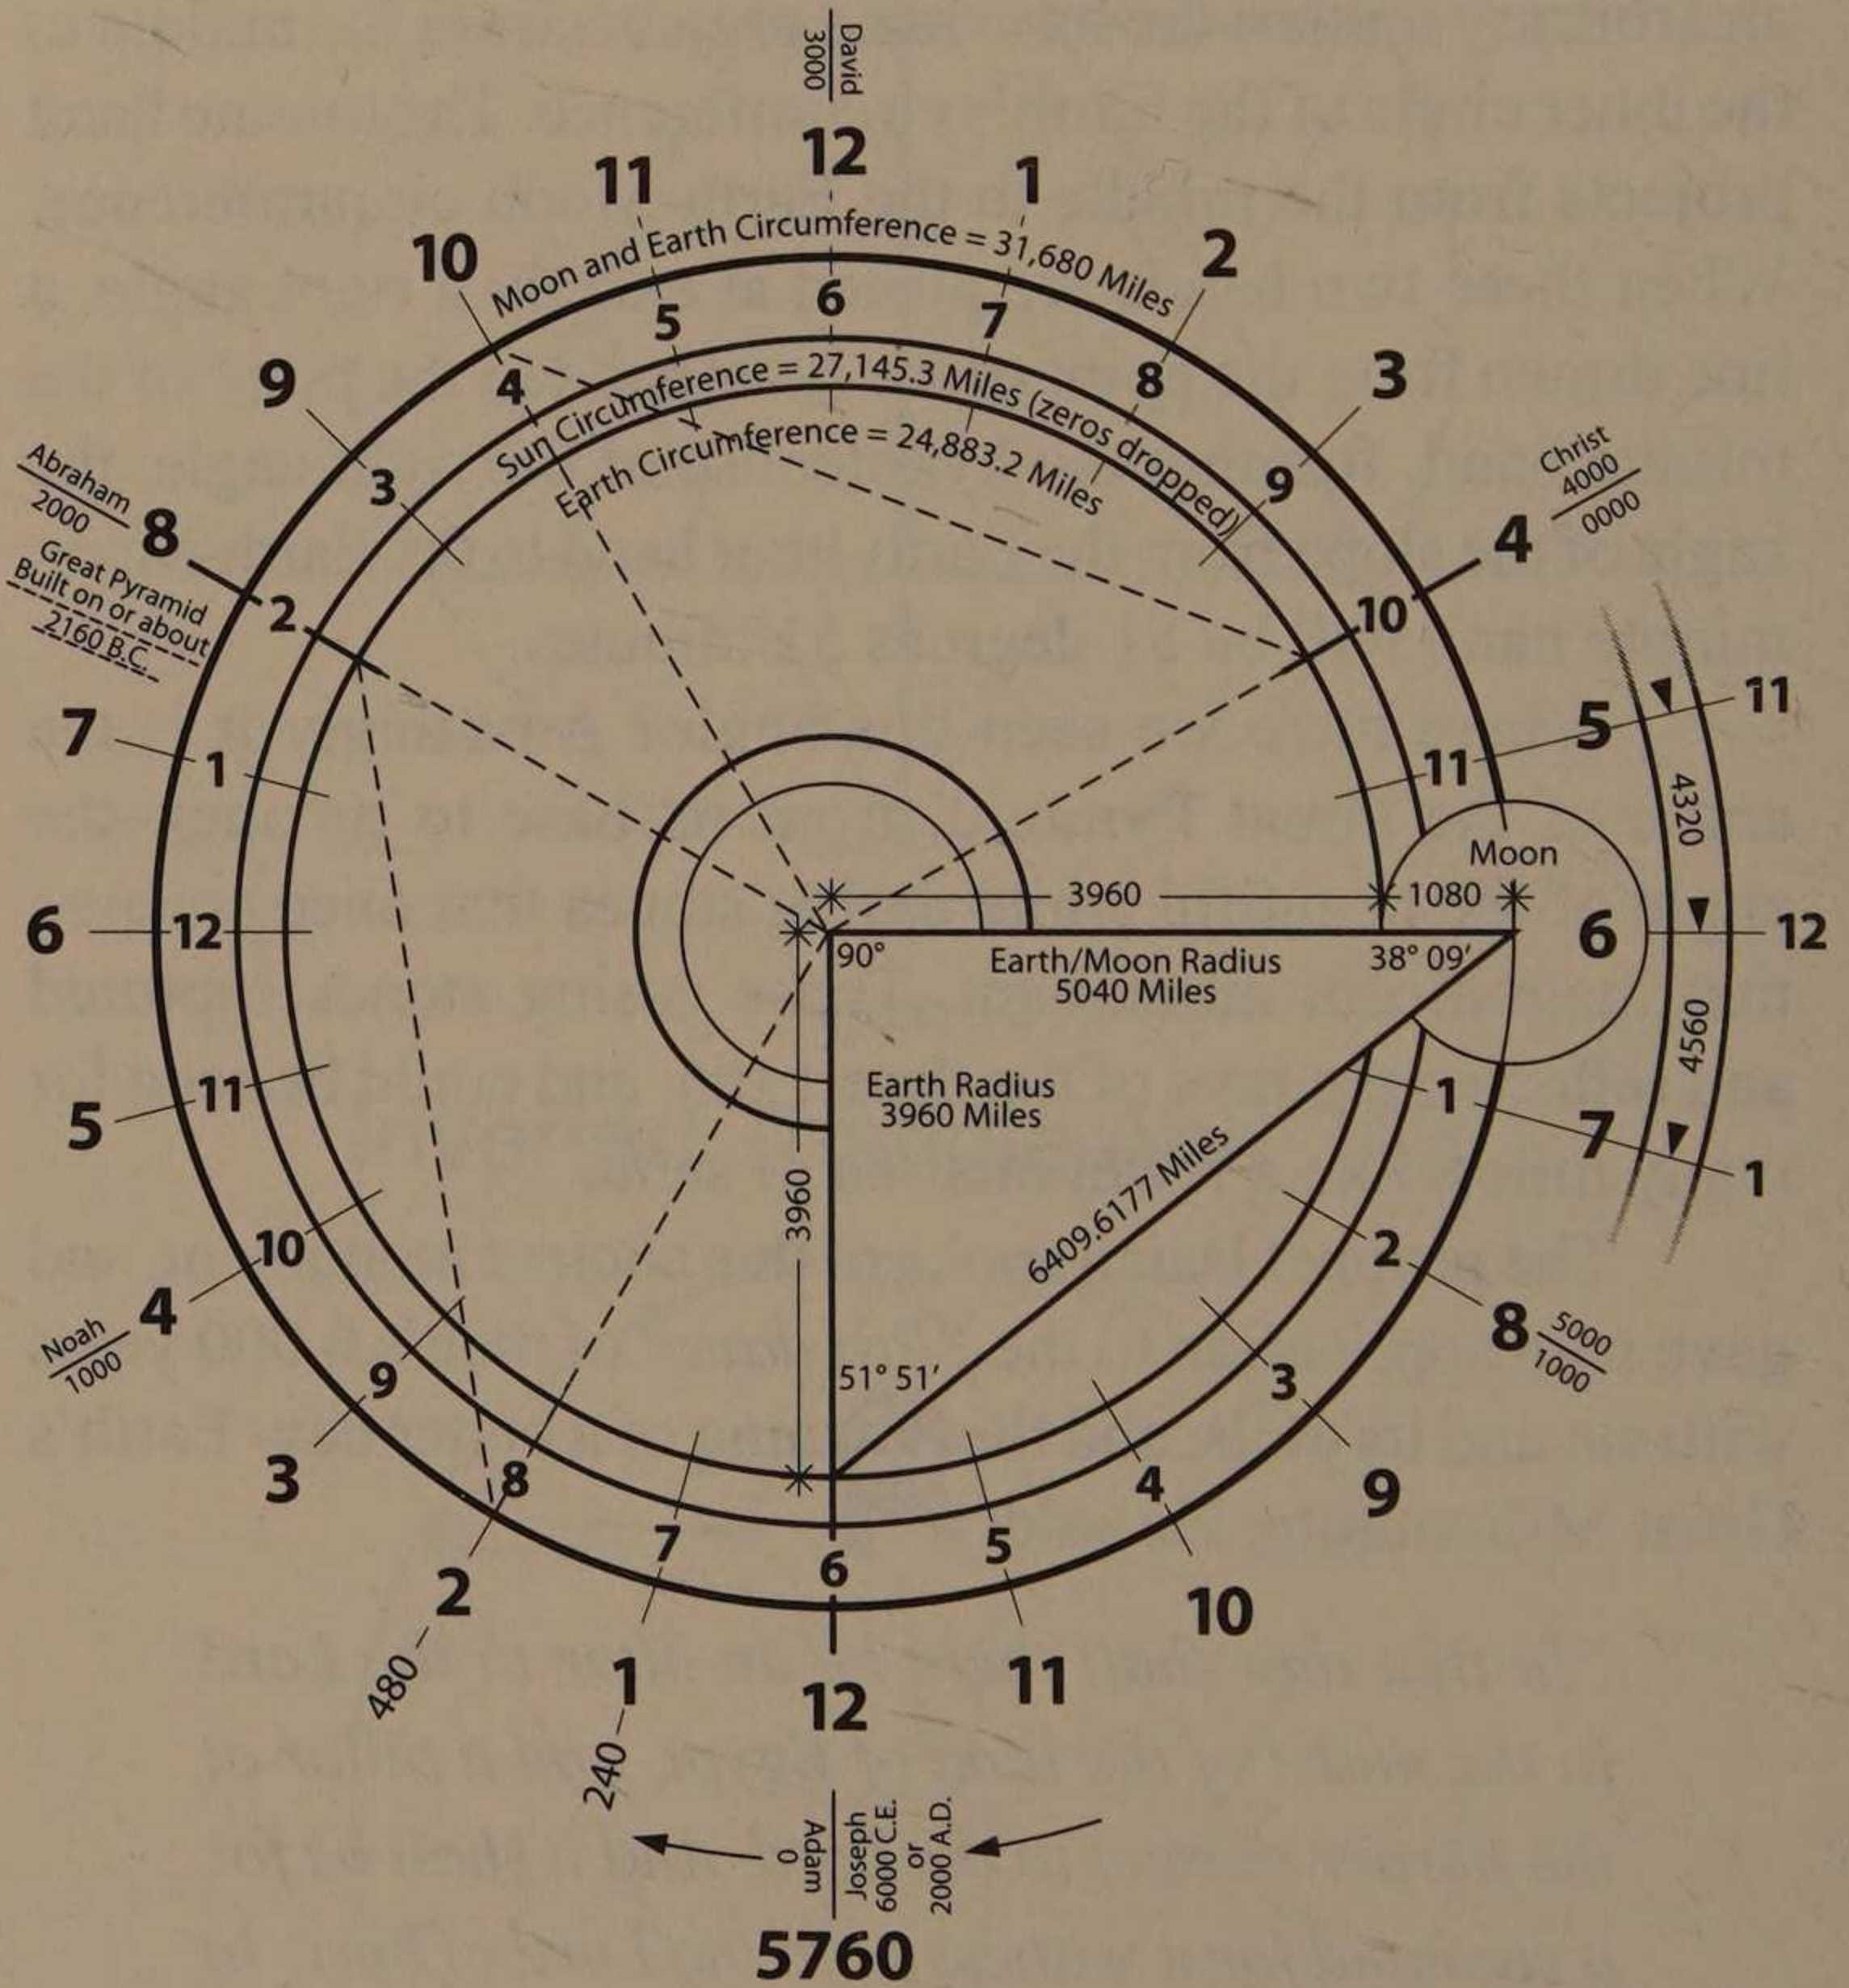

The prophet Isaiah spoke of this ancient monument, and gave it an application to the “*last days*” of man's 6,000 years with sin and its evils, and the dawning of a better day—Earth's Great Millennium. He said:

*“In that day shall there be an altar to the Lord in the midst of the land of Egypt, and a pillar at the border thereof to the Lord. And it shall be for a sign and for a witness unto the Lord of hosts in the land of Egypt.”*

That the right angle of the hands of the clock form this famous Pyramid Angle at its hypotenuse is amazing, and should not be taken lightly. In Figure 20 it is placed with its hour hand and its 51 degree 51 minutes apex at the End-Time, 5760, or 6,000 years from the creation of Adam. And this is

Figure 20

# A Sign And A Witness In The Land Of Egypt Great Pyramid

precisely where it should be.

At midnight on the last day of the 6,000 years, and the beginning of the year 5760, the Egyptian government had planned to place a miniature Topstone on the Pyramid. It was overlaid with gold leaf. It was to be lifted to the apex of the Pyramid by helicopter at midnight; however, because of high winds, they called off the whole procedure. Amazingly, this counterfeit Topstone was not allowed to be placed, because the real Topstone is represented in Jesus Christ. The real Topstone took His place as the rightful ruler of earth on that very night, at midnight, and henceforth is engaged in the overthrow of man's evil governments in preparation for the setting up of His divine government. Is there any doubt who caused the high winds that prevented the counterfeit Topstone from being placed?

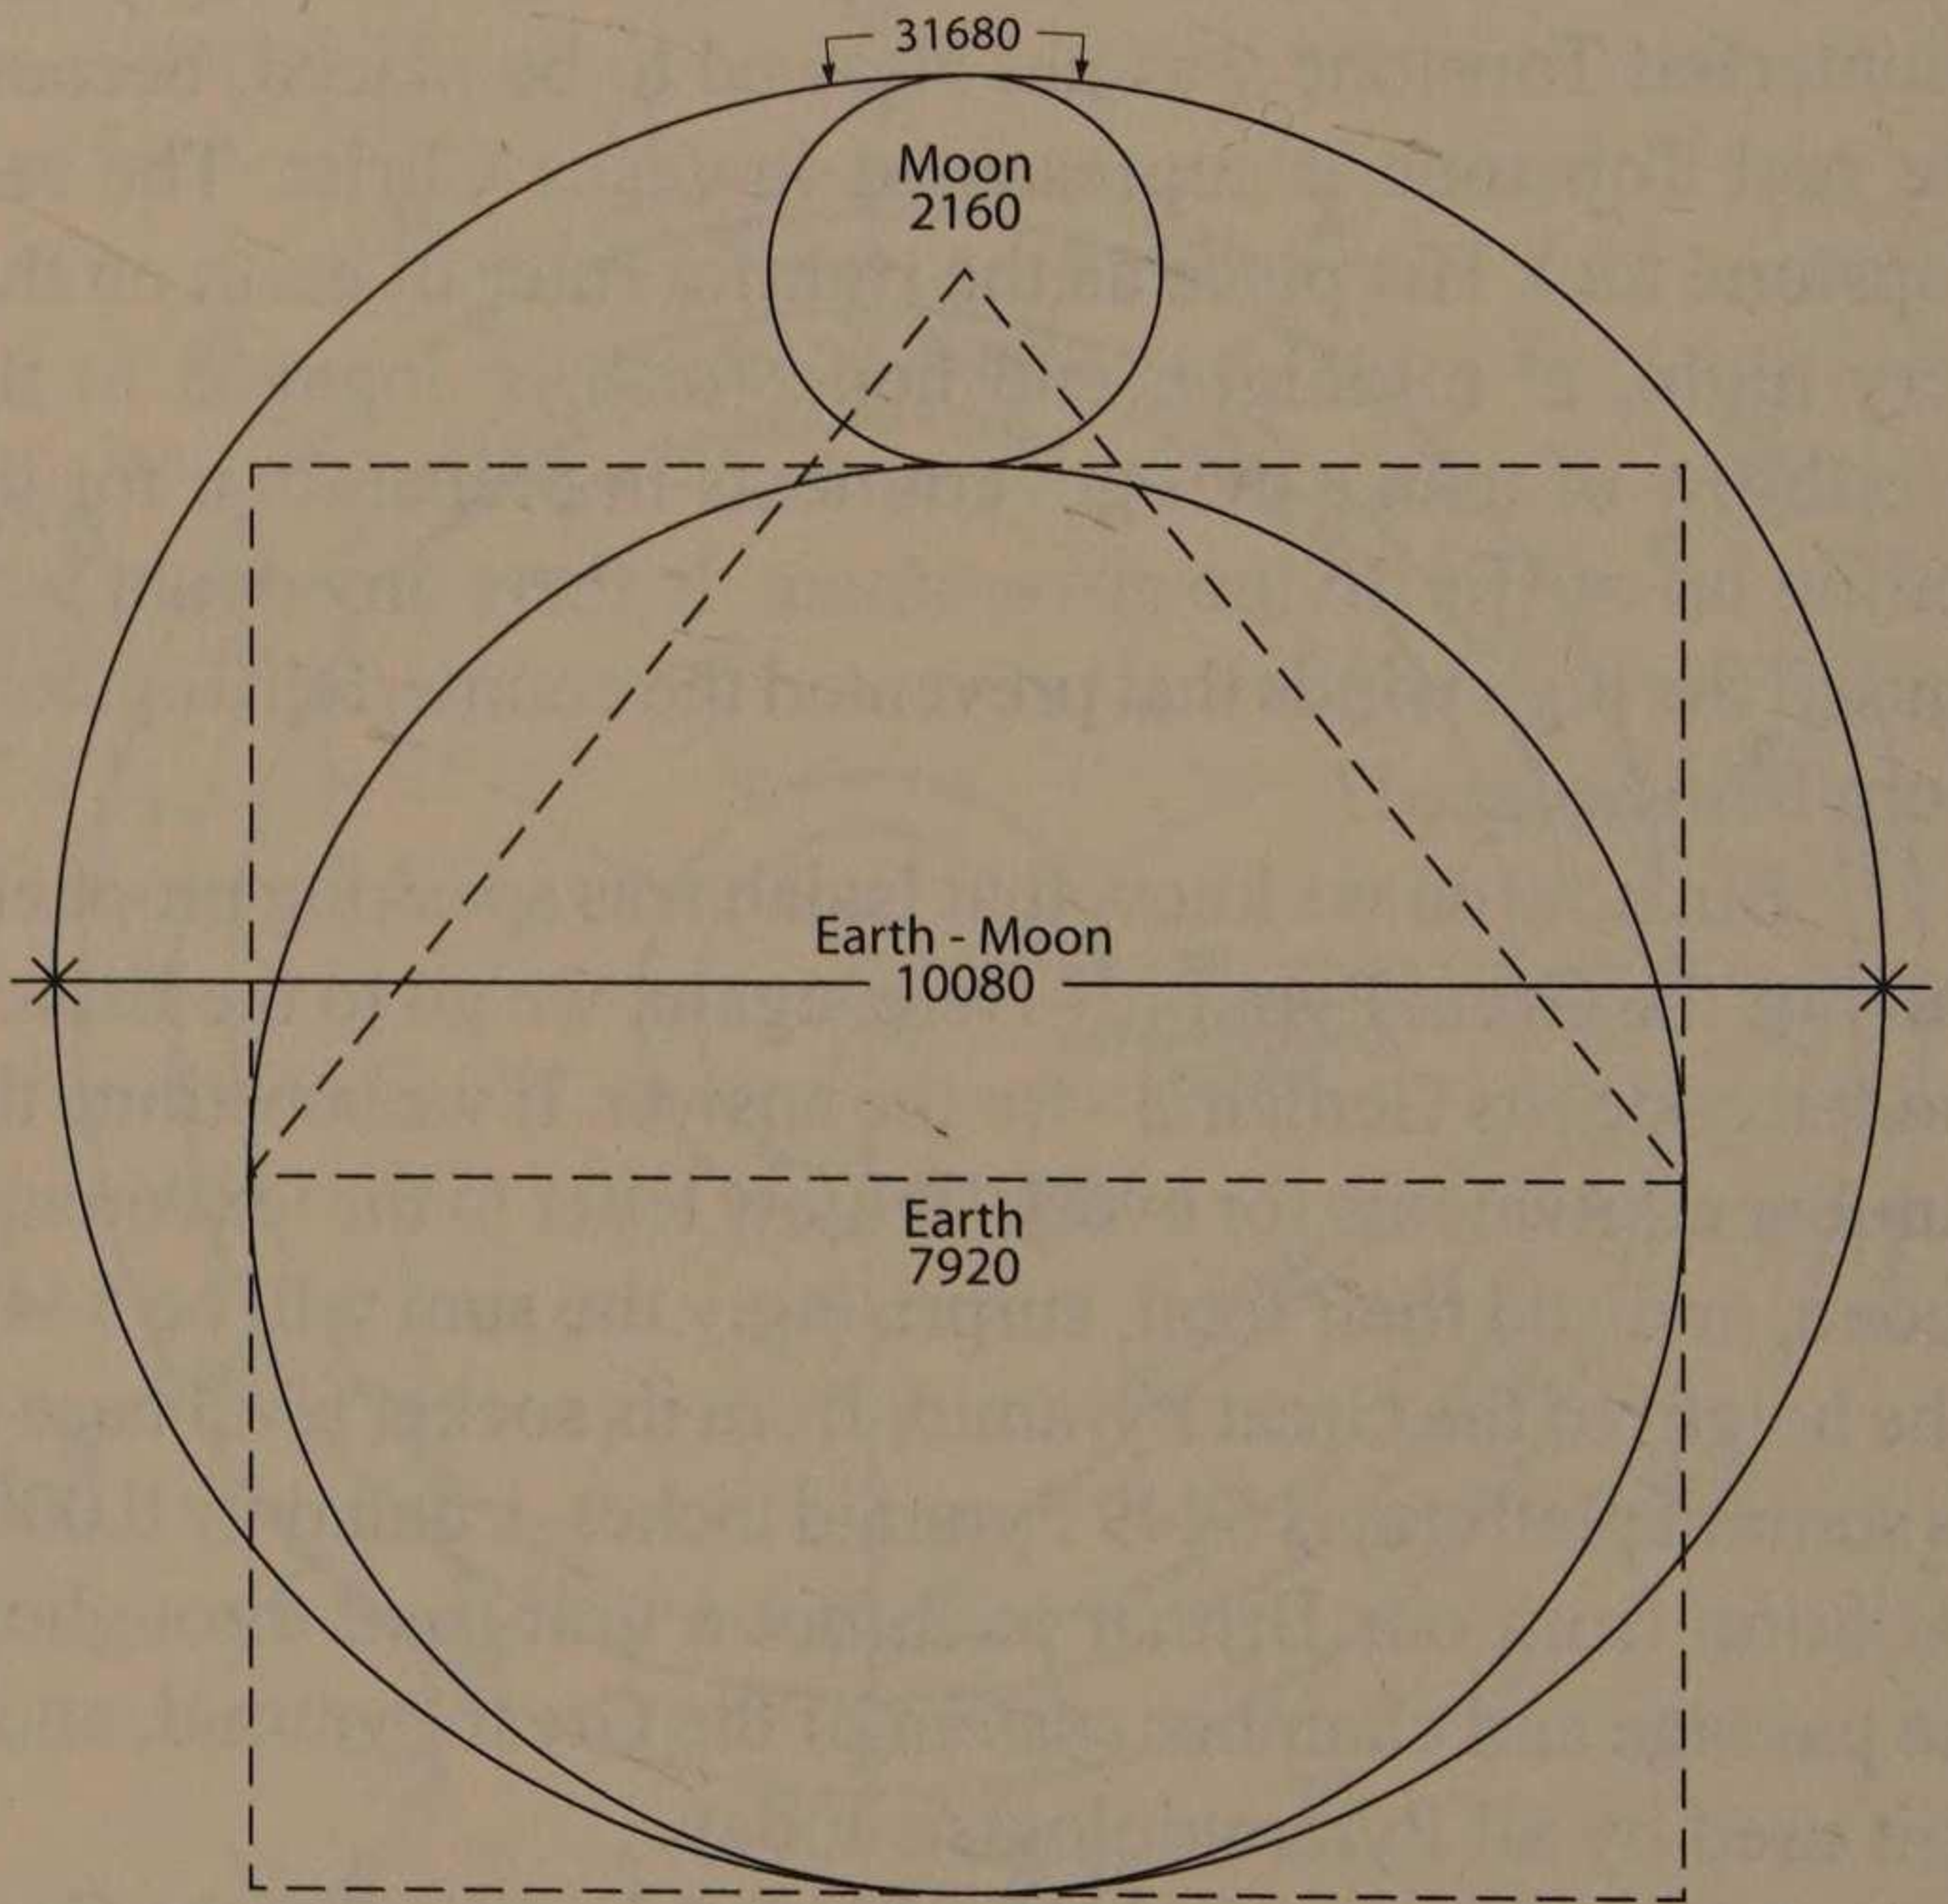

But how do we know that Isaiah was speaking prophetically of the Great Pyramid? Here, again, we go to the Bible's hidden code—its Gematria—for the answer. If we substitute the number equivalents for every Hebrew letter in the text quoted above, and add their total, surprisingly the sum will be 5449. The height of the Great Pyramid, from its socket level base to its summit platform is 5449 Pyramid inches—a unit only 0.0001 variation from our British inch, but a unit used throughout the passage and chamber system of the Great Pyramid, and a unit used by all Pyramidologists today.

It has been established by geodetic survey that the Great Pyramid is located exactly at the border of Upper and Lower Egypt, which is also in the "*midst of the land of Egypt.*" This was first discovered by Henry Mitchell, Chief Hydrographer of the United States Coastal Survey of 1868. The identification of this grand monument which Isaiah described is unmistakable.

As is shown in Figure 21, the width of the Great Pyramid on the face of the Clock is equal to the diameter of the Earth in miles. Its height is equal to the combined Earth/Moon radius

Figure 21

# Earth-Moon Circle and Great Pyramid

dimensions. Its base angle is 51 degrees 51 minutes—the exact angle of the Great Pyramid from base to apex.

The Psalmist prophesied that the Topstone of this grand monument will be placed—and it won't be a cheap substitute covered with gold leaf. It will be Jesus Christ. This was prophesied in Psalm 118:22. *“The stone which the builders rejected is become the head stone of the corner.”* Jesus quoted this statement of the Psalmist, and applied it to Himself. The only stone that can be truly defined as a *“headstone”* is a stone that caps a Pyramid. It is called a Pyramidian.

## Wheel within a Wheel

There appears to be a discrepancy in the counting of Hebrew time and Gregorian time within the wheels of the Clock. I say “appears” because in reality there is no discrepancy. And in the end, one confirms the other.

There are 24 segments around the Clock. These 24 segments exhibit a 240-year increment of time, and a 250 increment of time, traversing clockwise independently at every 15 degrees of the Clock, beginning at zero-Adam. Notice the number 240 written within every segment, 24 times in the outer of the two smaller inner circles. This number highlights the Hebrew calendar beginning at zero-Adam, and ending at 5,760 years ( $24 \times 240 = 5,760$ ).

Also see the wheel with the 250-year increments of time,  $24 \times 250 = 6,000$ . Both of these wheels begin and end at the same time. The Hebrew year 5760 is the same as the Gregorian year 6000. Although the two wheels on the Clock accommodate this apparent discrepancy between the two calendars, we also must recognize that a “year” is determined by the relation of the Earth to the Sun, and we cannot change it. Hebrew scholars and rabbis agree that there is a 240-year discrepancy between the two calendars, and give no expla-

nation as to why. Or, to be more exact, they give differing reasons, leading us to recognize that the real reason has been lost to history.

According to the Encyclopedia Judaica there exists evidence of an Egyptian Calendar that scholars have dated to approximately 4241-4243 B.C., and it is suggested that this is the calendar that the Egyptians handed over to the Hebrews at the enigmatic date of 3760 B.C. It is a guess, but is still not a satisfactory solution. The 240-year increments on the wheel is one way of solving the problem, but we must realize that it is not a true record of Solar time.

However, this 240-year discrepancy has indeed been accounted for on the Clock. Return back to the first 15 degrees at the bottom of the Clock. Note the number 3,760 in line with year 10. Follow the number 3,760 around the Clock, until it lands at the End-Time. You will see that it regresses backward at 240-year increments. It finishes at minus 1,760 at year A.D. 2000. Now deduct the minus-year 1,760 from the year 2000 and the result is 240 years. This exercise confirms the 240 and 250-year calendar, and the wheel within the wheel.

The best authenticity, however, for the apparent 240-year discrepancy is the use of the Gematria of the Scriptures. It has been shown that the numbers 5760 and 576 relate to the return of the Messiah and the taking of His place as King on David's throne. The Psalmist wrote: "*I have set my King upon my holy hill of Zion.*" The placing of this promised King in the seat of authority in Zion bears the number 576.

576 = "*I have set my King*" (by multiplication)

This date—5760 on the Hebrew calendar—appears to be the herald of the Day of the Lord. At the beginning of the year 5760 man had been on this Earth for 6,000 years (6 days). It is not just a coincidence that the Hebrew words for "*six days*" has a Gematria value of 5760 by multiplication. Those six

days ended at the beginning of the year 5760.

In the 12th chapter of Daniel we have a prophecy of the time when "*Michael*" will stand up and take authority. The name Michael, in Hebrew, has a Gematria value of 5760 by multiplication.

In Psalm 2 we have another prophecy of the time when Michael will stand up, but here He is called the *Anointed One*. This also has a Gematria value of 5760 by multiplication.

In Daniel 9 He is called "*Messiah the Prince*" which also has a Gematria value of 5760 by multiplication.

The evidence is overwhelming! "*Blow the trumpet in Zion!*" The Hebrew word for "*trumpet*" has a Gematria value of 576. On the last day of the year 5760, Ariel Sharon took one thousand Israeli soldiers and went up on the Temple Mount to proclaim ownership of it. It was indeed a blast of the trumpet, a pronouncement, a proclamation. The result was the beginning of the "Holy War" against Israel.

*"Write the vision, and make it plain upon tables, that he may run that readeth it. For the vision is yet for an appointed time, but at the end it will speak, and not lie: though it tarry, wait for it; because it will surely come, it will not tarry."*  
(Habakkuk 2:2-3)

# Six Thousand Years and Man's Destiny

*By Bonnie Gaunt*

Supplement No. 3

The previous pages of this book have shown the magnificence of the 6,000-year "Clock," beginning with the creation of Adam in the autumn of 4002 B.C., and ending on Rosh Hoshanah 1999—obviously a God-designed period of time. But it seemed appropriate to show the harmony of this with a larger time frame, into which this fits with "divine" precision. I use that term cautiously because, at best, we can only comprehend a small fraction of what the "divine mind" has created. He planned for eternity—it could be nothing less than that.

The 6,000 years of man's residence on planet earth has been an important part of that eternal plan—yea, the primary focus of that plan. The Creator had supreme love for the man He created in His own "*image and likeness.*" He placed him in a perfect garden and gave him the opportunity to live forever—to pro-create, and expand the garden until it filled the whole world. Perfect mankind, on a perfect earth, living forever!

But in God's wisdom, He saw the necessity of giving man free-will. Adam used that free-will and chose to disobey God's law. But God, in His wisdom and foreknowledge, knew that Adam would choose to disobey, and would, as a consequence need to learn the results of sin. Adam learned it well, and all of his posterity for 6,000 years has learned it, and learned it, and learned it—until today we are pleading "*How long, Oh Lord, how long?*"

Six thousand years, in man's estimation, is a long time. But it is just a cog in the master clock-work of our mighty Creator. So, we ask: Where does this cog fit into the master works? Let's take a look.

Genesis 1 describes the long process of preparing the earth for man's habitation. It describes it as "*days.*" And this

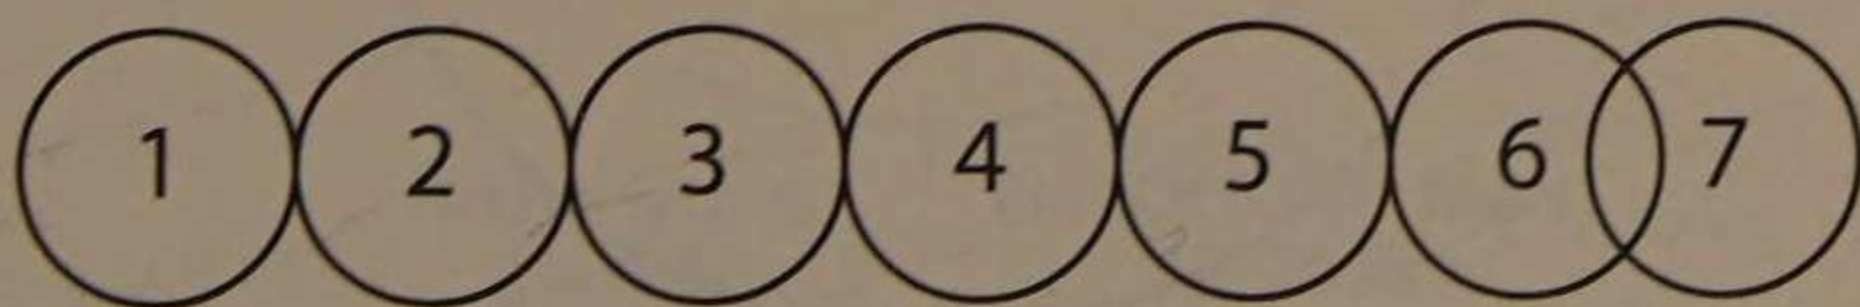

presents no problem when we realize this same word translated “*day*” is also used for various specific periods of time—an era, an epoch, or the time involved for a specific event, and sometimes the lifetime of a person, such as “*Adam’s day*.”

So, in reasoning from the known to the unknown, we are able to place a time frame around the creation week. It is possible, by the study of scripture, history, archaeology, and astronomy, to chart man’s history back 6,000 years. Many have done it, and although we do not all agree on the specific date of the starting point, yet all, without exception agree that man has been on this earth for about 6,000 years. This, of course, excludes those scientists who disregard the Bible and consider it a myth, and thus like to guess the extreme age of man.

We are not told in Genesis 1 the exact length of each “*day*.” However, we are told in Genesis 2 that God rested on the seventh “*day*” from all the work of creation that He had done on the previous six “*days*.” Obviously it is describing a “week.” A week can only have “*days*” that are equal in length, otherwise it is not a week. Nowhere in the Scripture is a week used in any other way. We may have “*days*” of varying length, but it would not form a week. A week pre-supposes that all its seven periods are of equal length.

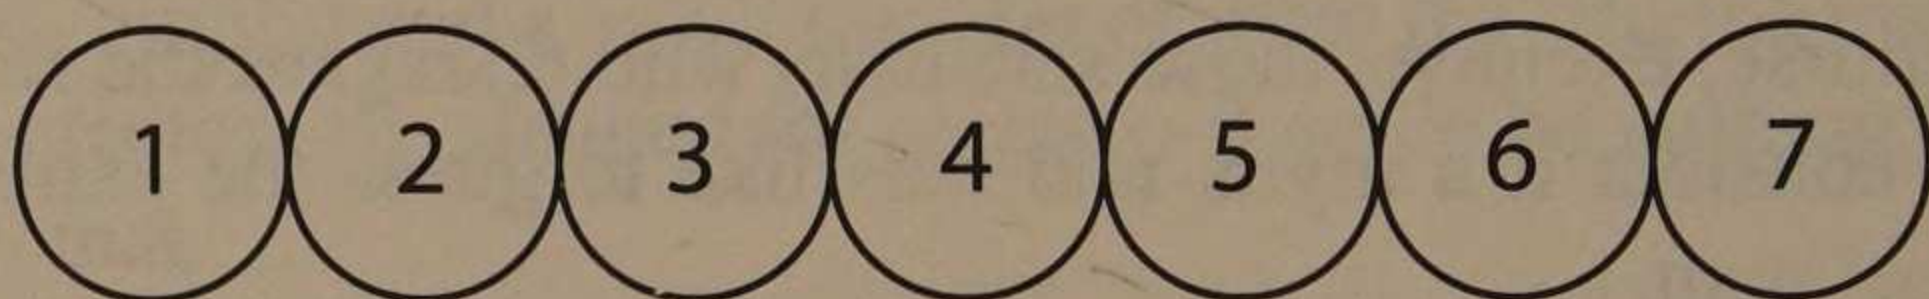

One way of counting man’s week is to begin it with the creation of Adam. This gives 6,000 years to Rosh Hoshanah 1999—the seventh “*day*” becoming the Millennium.

But it must be remembered that Adam was not created at the beginning of the seventh “*day*” of the creation week. He was created near the end of the sixth creation “*day*.”

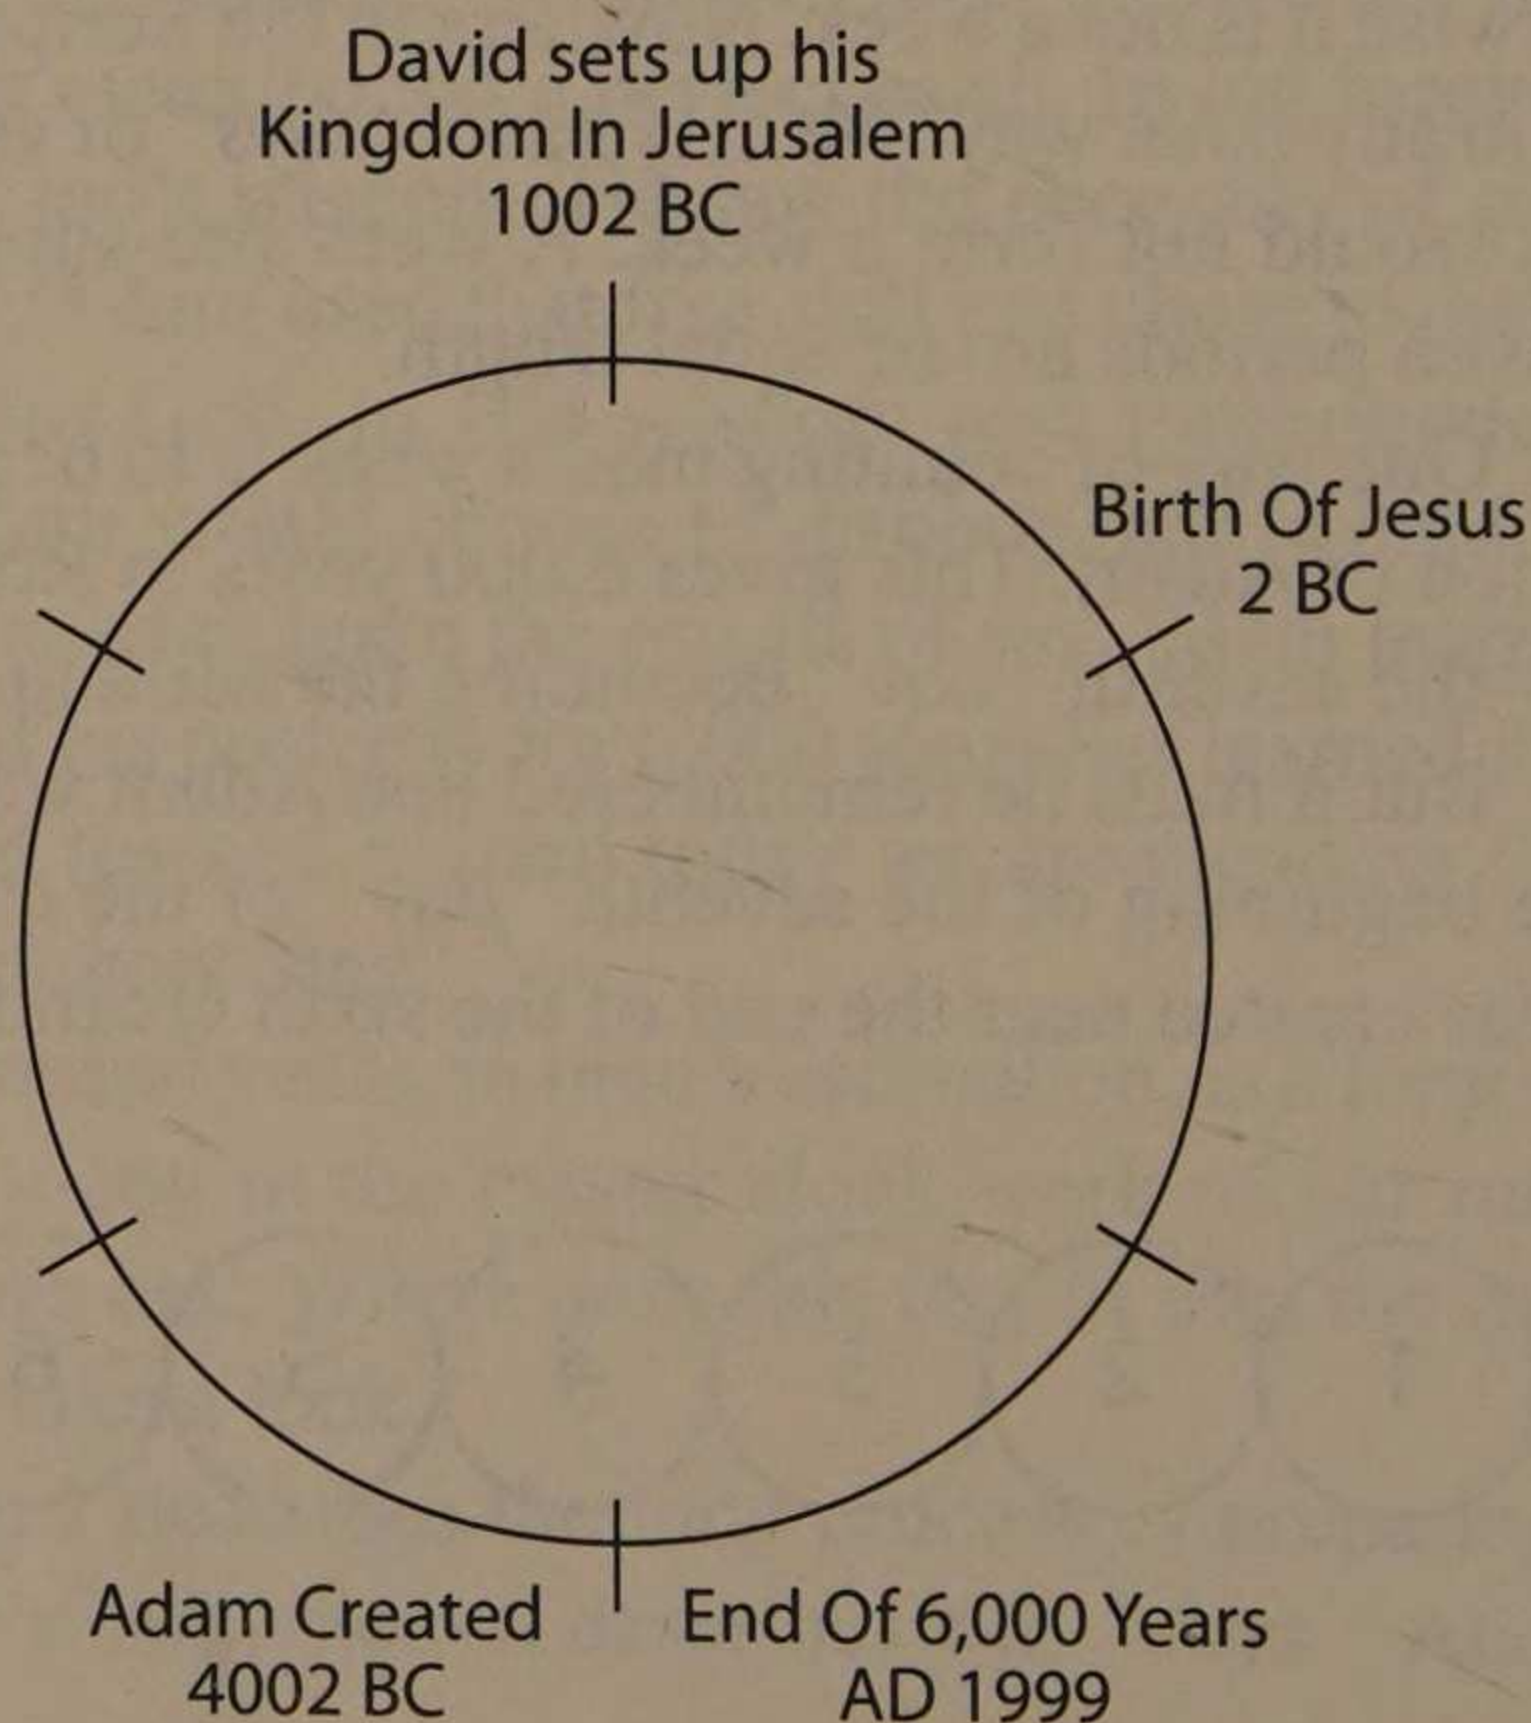

The previous diagram is correct if we are considering the position of the 6,000 years of man's "*dominion*," because that dominion was given to Adam at the time of his creation, and ended on Rosh Hoshanah 1999. And the 6,000 year Clock, as described in this book fits perfectly into that time frame, leaving room for 1,000 more to complete the time.

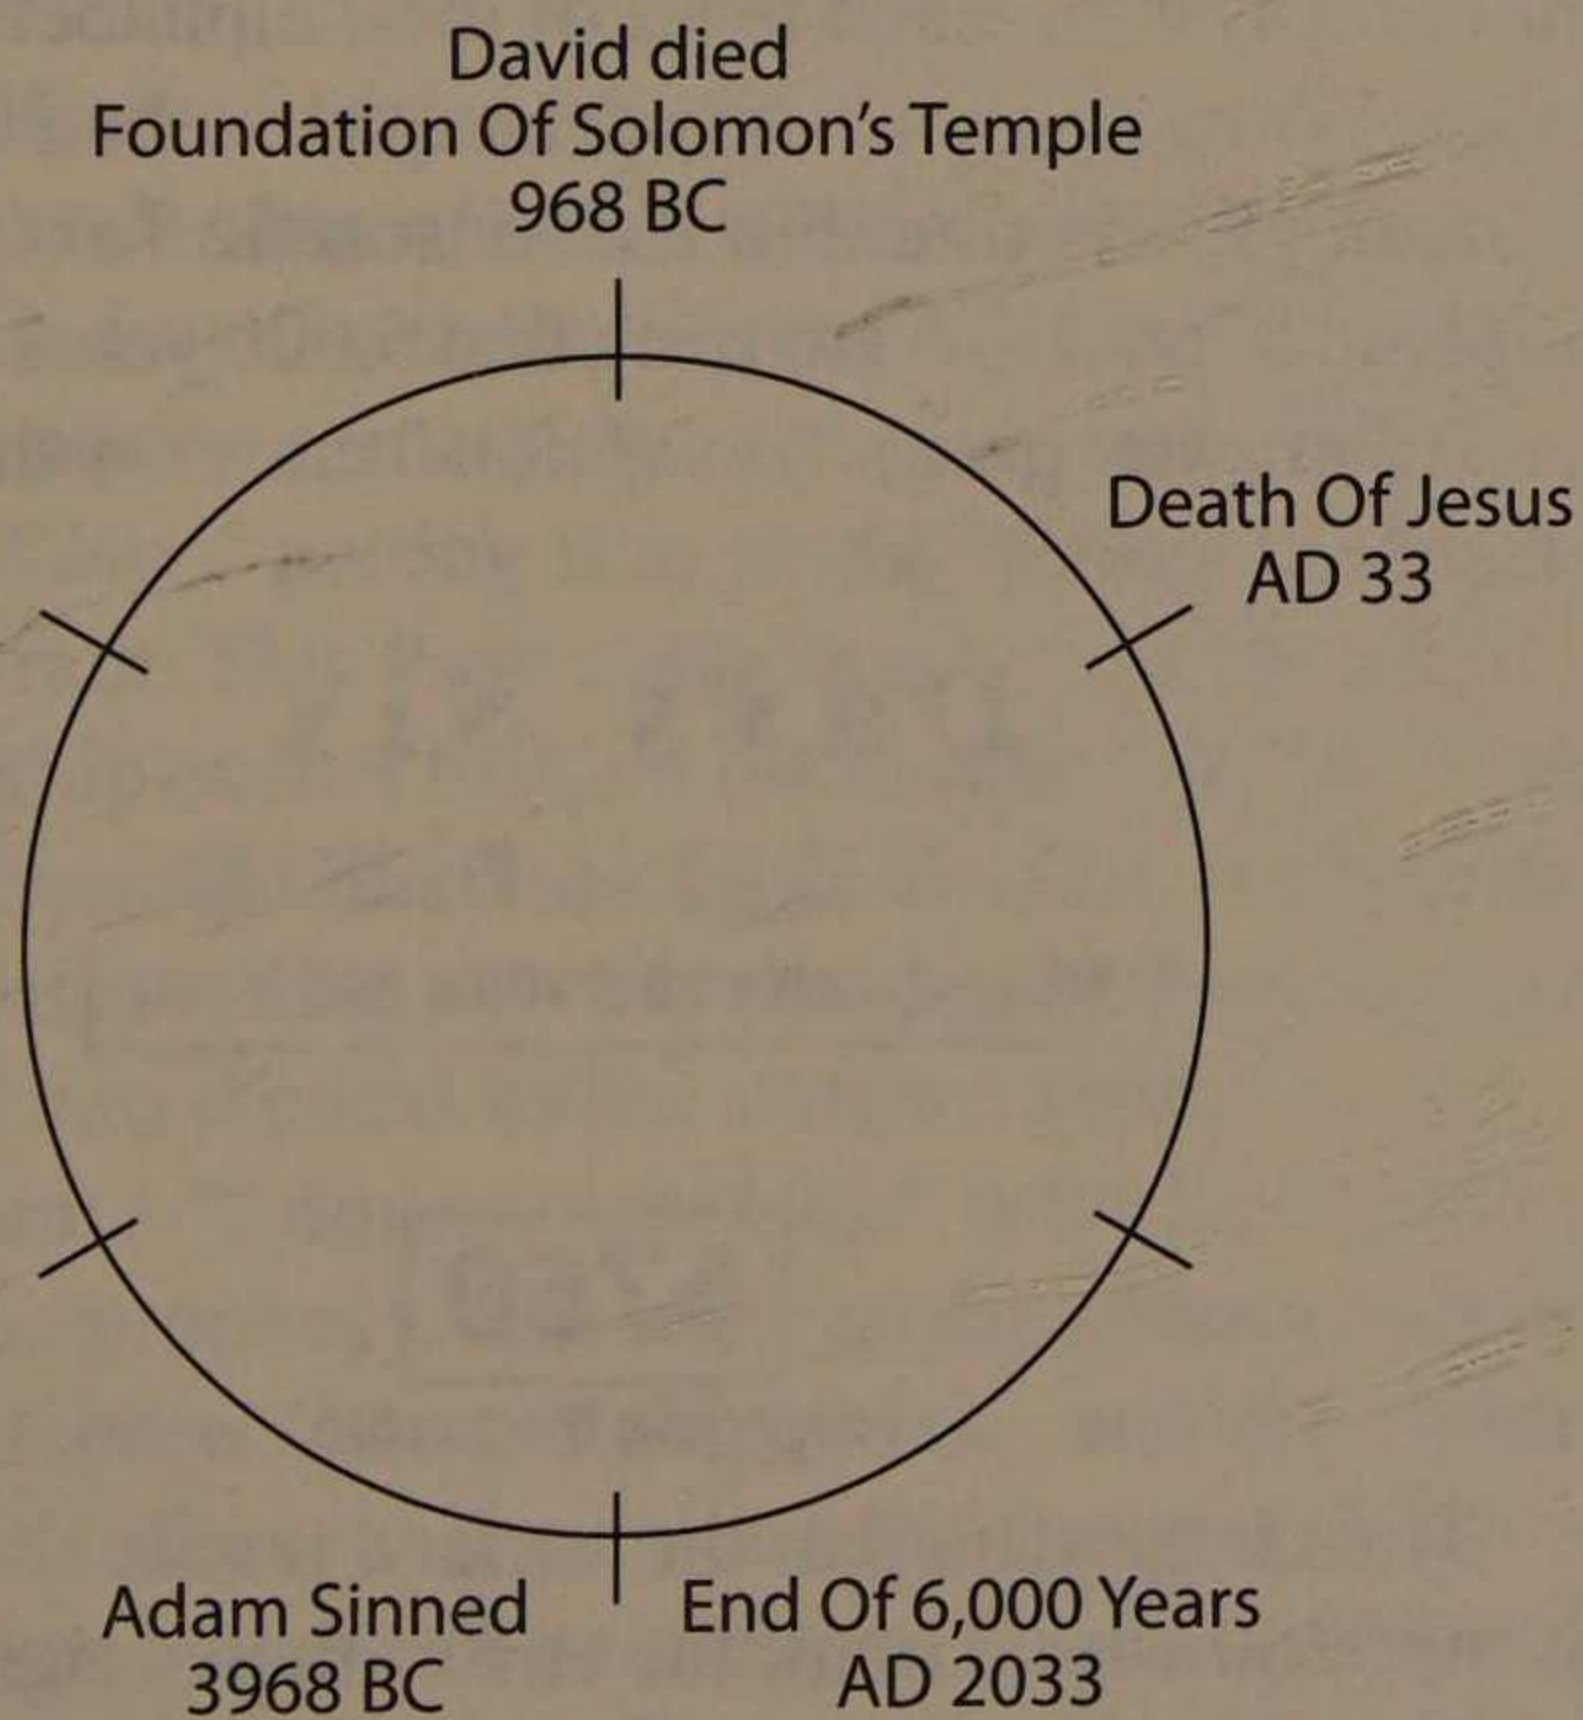

However, the seventh day of a week cannot overlap the sixth day and still be called a "week." The seventh day of the creation week must begin immediately at the end of the sixth day.

So, when did the seventh day begin? Only by finding the pattern can we find the answer. Jesus Christ was the pattern. Jesus was born in the autumn of 2 B.C., which is precisely 4,000 years from the creation of Adam.

The purpose for which Jesus came to earth was to pay the price for the sin of Adam, thereby redeeming Adam and all his posterity from the death penalty. In order for Jesus to be able to do this He must be the exact equivalent for Adam. Thus He was born into this world as a perfect human being—the same condition in which Adam was created. If that perfect little baby had died the day he was born, we would have known that Adam had sinned on the same literal 24-hour day in which he was created. But it didn't happen that way. Jesus lived as a perfect human being for 33-1/2 years and then gave His life blood in payment for the sin of Adam. Jesus died on Nisan 14, A.D. 33. Therefore Adam had to have sinned on Nisan 14, 3968 B.C., exactly 4,000 years previously. We know that 2,000 years forward from the spring of A.D. 33 will bring us to the spring of 2033. Thus we have another precise 6,000-year "clock" that looks like this:

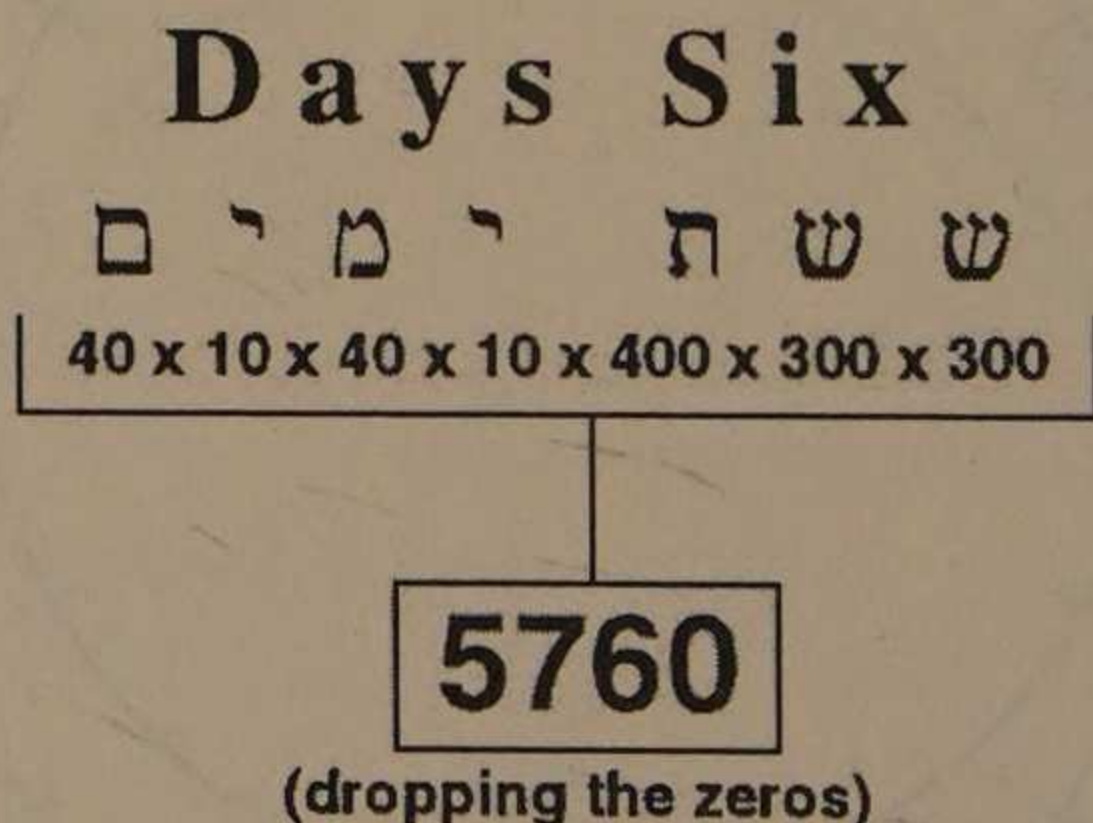

This puts us, today, in the same 33-1/2 year transition. This began on Rosh Hoshanah 1999 and continues to the spring of 2033.

Rosh Hoshanah 1999 was the beginning of the Hebrew year 5760—it was their New Year’s Day. This was, on our calendar, September 11, 1999. It marked the end of 6,000 years of man’s “*dominion*,” or God-given right to rule. Legally man’s right to rule came to an end, and the right of rulership passed to Jesus Christ, the antitypical King David, “*whose right it is.*”

Thus Rosh Hoshanah of 5760 became a pivotal point in the history of man. It brought an end to six “*days*” of man’s experiences here on Earth, and marked the beginning of a new order.

Beneath the surface text of scripture there is found another coded confirmation of its truth. This is called Gematria. It is the use of the ancient Hebrew and Greek alphabets as a numbering system—each letter of their alphabets represents a number. When applying this principle to the Hebrew words for “*six days*,” as found in the Masoretic Text, the numbers multiply to 5760. How amazing that 6,000 years from the time when Adam was given “*dominion*” ends on the first day of the Heberew year 5760.

Thus it appears that the surface text is showing us that the year 5760 would mark the end of man’s right to rule, and the Gematria message is telling us the very same thing. What a confirmation!

But man is still ruling, and still making a mess of it. I suggest that he is no longer ruling by divine right, but ruling by usurpation, and will soon be dethroned by the One to whom it rightfully belongs.

Psalm 2 depicts this period of transition from the kings of this world to King Messiah.

*“Why do the heathen rage, and the people imagine a vain thing? The kings of the earth set themselves, and the rulers take counsel together, against the Lord, and against his anointed (Messiah), saying, Let us break their bands asunder, and cast away their cords from us. He that sitteth in the heavens shall laugh: the Lord shall have them in derision. Then shall he speak unto them in his wrath, and vex them in his sore displeasure. Yet have I set my king upon my holy hill of Zion.”*

The indication in this text is that when King Messiah takes the appointed rulership of earth, it is followed by the time of the wrath of God against those kings and rulers whose time has expired. But notice something important here. He says, *“I have set my King,”* putting it in past tense in relation to the time of the wrath. This Psalm is telling us that the transfer of right of rulership occurs first, and is followed by the wrath of God against those nations and kings whose lease of power has expired. It is also telling us when that lease of power expires. It is encoded into the text by the number code.

The phrase *“I have set my king”* is the key to the time element of the prophecy. If we assign the correct number to each of the Hebrew letters in this phrase, and then multiply those numbers, they will produce the number 5760 with additional zeros which can be dropped. And the new ruler is no other than the One whom Daniel described as *“Messiah the Prince.”* And whoever wrote the book of Daniel used

Hebrew letters for this title which multiply to 5760.

5760 = "*I have set my King*" (by multiplication)

5760 = "*Messiah the Prince*" (by multiplication)

This appointed time for King Messiah to take His rightful place as Earth's new ruler is at the expiration of 6,000 years from the time when dominion was given to Adam in the Garden of Eden, just as it is shown in the 6,000-year Clock. Messiah's rulership begins at the beginning of the Hebrew year 5760. And, amazingly, the prophet Zechariah, when speaking of the coming of Messiah, used the expression, "*Behold your King,*" (Zechariah 9:9). Would you believe, if we multiply the number values of the Hebrew letters in this phrase, it will produce 6000. It was no mistake. It was no accidental coincidence. It was a message, encoded into the text, telling us that Jesus will become Earth's new King at the expiration of the 6,000 years of man's allotted rule.

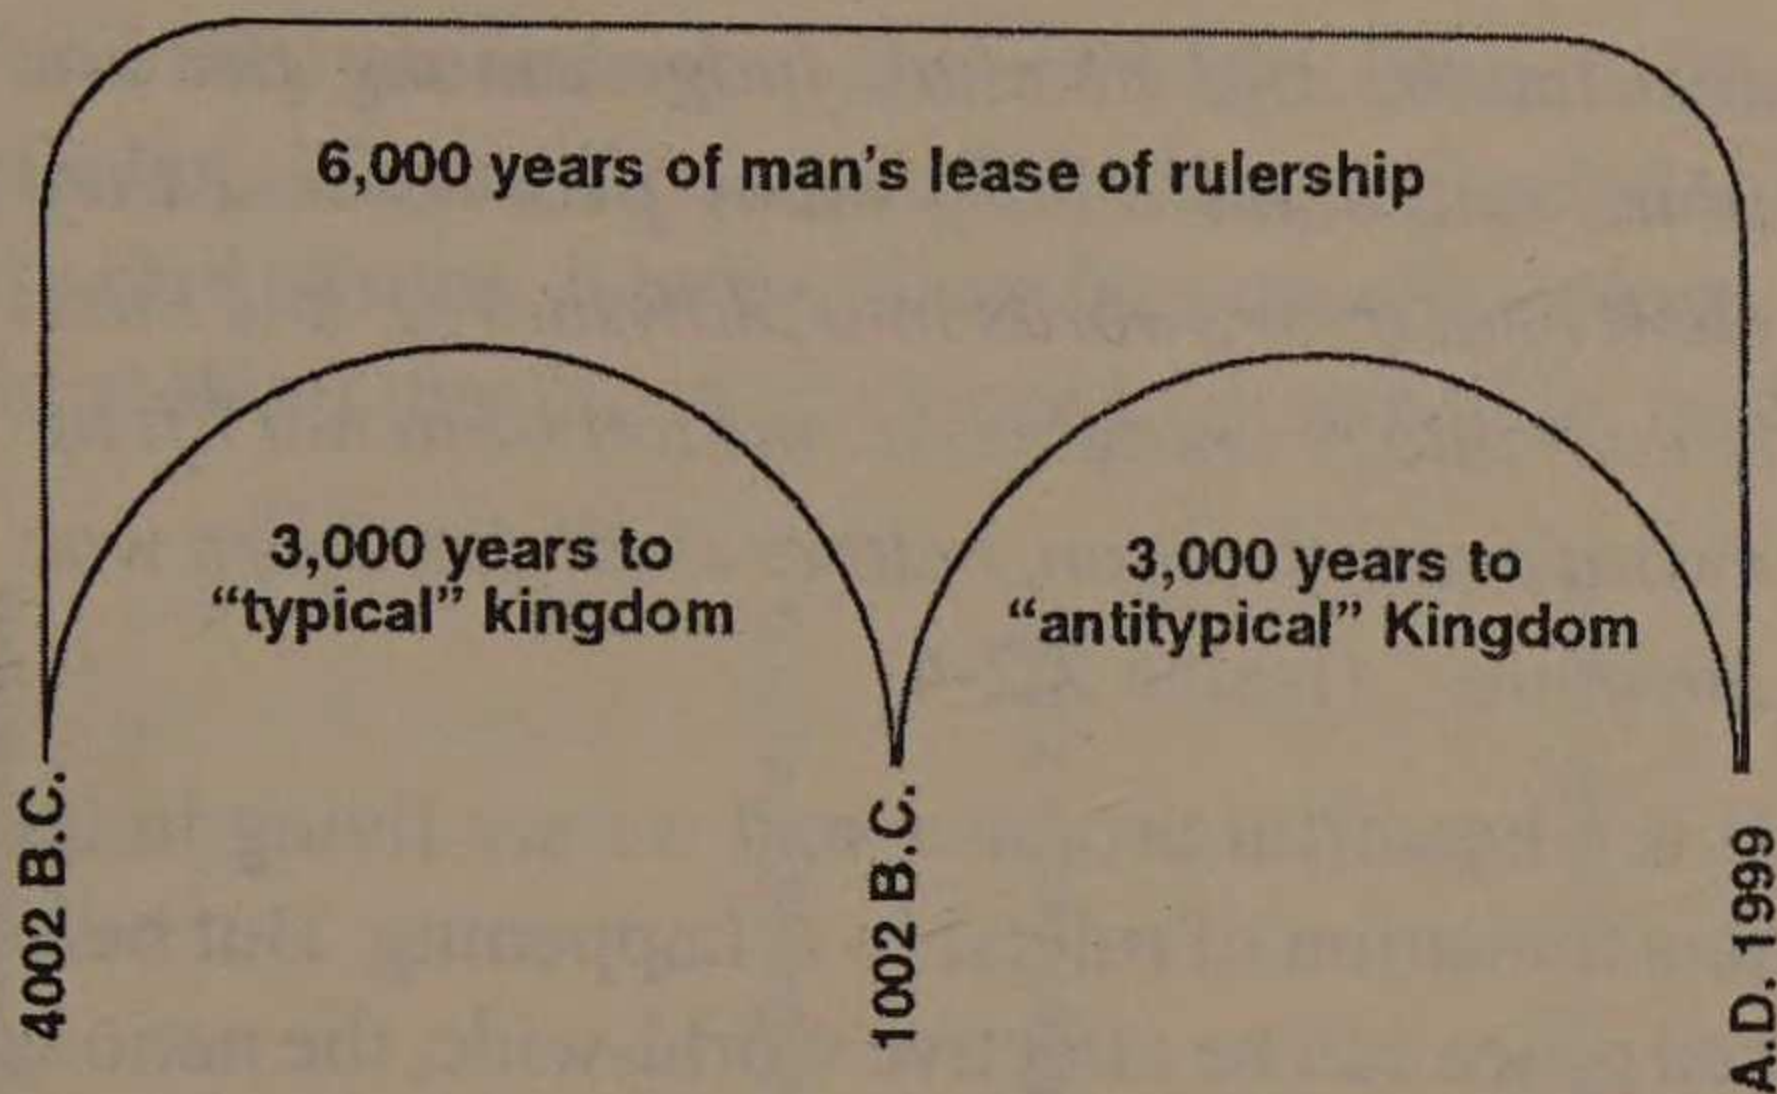

In the New Testament there are three Greek terms that refer to this rulership, and each of them multiply to 6000.

6000 = "*King*"

6000 = "*Kingdom*"

6000 = "*Head*" (meaning Jesus)

The reality is spectacular in its scope, and profoundly simple in its mathematics. It becomes apparent that precisely in the middle of this 6,000 years of man's rulership, God appointed David to be the king over His typical kingdom. I say "typical" because it was a fore-shadowing of the great Kingdom of Jesus Christ which will rule over man during Earth's Great Millennium. The very existence of David's kingdom points to the reality of the Kingdom of Jesus Christ (the antitypical David).

David's 33-1/2 years were spent in subduing and conquering his enemies. Three and one half years prior to his death, he turned the kingdom over to his son, Solomon, who became his co-regent until David died. Solomon brought peace to the nation. Similarly, we can probably expect a parallel period of 33-1/2 years from the date of the transfer of rulership (from man's rulership to the rulership of Jesus Christ—1999) to the time when the nations are fully subdued and brought into the peaceful Kingdom of Jesus Christ (represented by Solomon—2033). For this is what both Isaiah and Micah have prophesied.

*“It shall come to pass in the last days, that the mountain of the Lord's house (Christ's Kingdom) shall be established in the top of the mountains (above the other nations of the world), and it shall be exalted above the hills (smaller nations); and all nations shall flow unto it. And many people shall go and say, Come ye, and let us go up to the mountain of the Lord, to the house of the God of Jacob; and he will teach us of his ways, and we will walk in his paths: for out of Zion shall go forth the law, and the word of the Lord from*

*Jerusalem. And he shall judge among the nations, and shall rebuke many people: and they shall beat their swords into plowshares, and their spears into pruninghooks: nation shall not lift up sword against nation, neither shall they learn war anymore.*” (Isaiah 2:2-4)

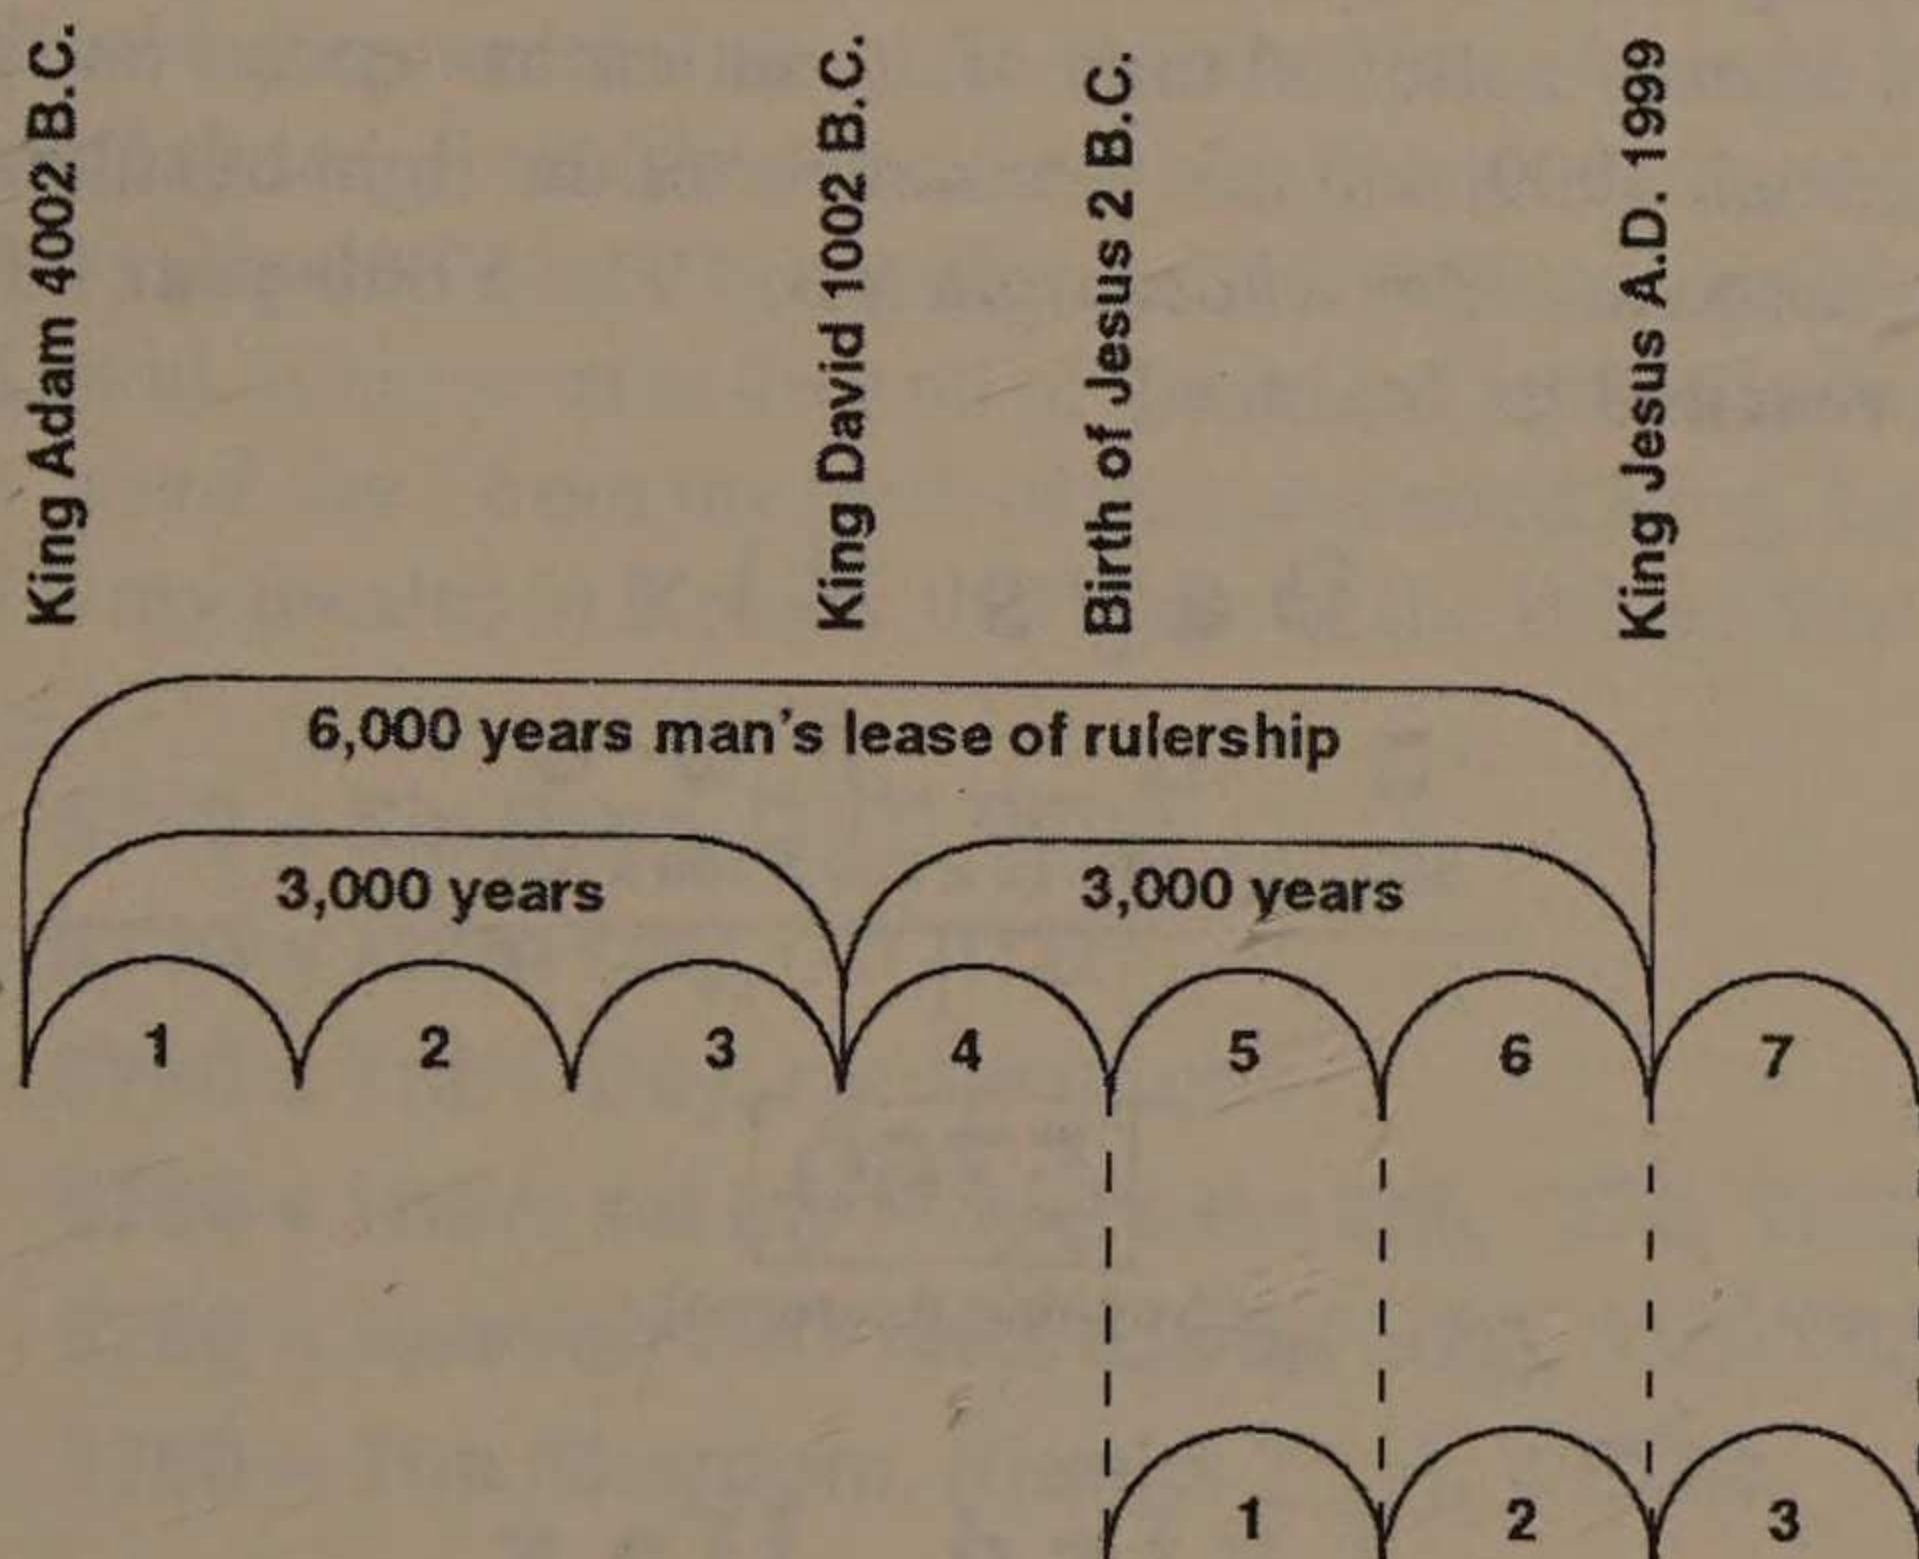

It is a beautiful promise, and we are living in the time when this transition of rulership is happening. But before the promised peace can be effective world-wide, the nations must be subdued and come to the seat of that new government, to receive the blessings it has to offer.

Note in the graphic there appears to be 3,000 years from King Adam to King David, and another 3,000 years from King David to King Jesus. These time periods were evidently known before the time of Jesus’ first advent. An ancient manuscript, which has been entitled II Esdras, was written sometime during the first century before Christ, with its first and last chapters having been added by a later writer sometime during the first century of the Christian era. In this manuscript the writer describes an encounter with an angel named Uriel who told him that there had been 3,000 years between the time of Adam and the time of David (just like on the 6,000-year Clock). We have no way of knowing for sure whether the writer of this manuscript was simply making a good story, or if an angel named Uriel did indeed speak to him. Either way, the information is valuable because it reflects the knowledge available to the writer at the time. And it is in complete harmony with the known facts today.

By dividing these 3,000-year periods into thousand-year “*days*” it is easy to see that since the autumn of 1999 we have entered the third day from Jesus’ first advent—more specifically, from His birth.

From the following graphic it becomes apparent that the third day and the seventh day are one and the same period of

time, and they are indeed spoken of in the Bible in this way. Since the third day and the seventh day are prophesied to be the same period of time, it helps to confirm the chronology. If we separated them, the chain of chronology would be broken.

Not only does this sameness of the third day and the seventh day confirm the chronology, this sameness is also displayed in the Gematria.

The great third day and the great seventh day both begin at the same point in time, namely Rosh Hoshanah 1999. This date marks the end of 6,000 years, of six "*days*," from the creation of Adam. It was thrilling to find that the Gematria for "*six days*" (5760) begins immediately at the end of the "*sixth day*." Both bear the same number, 5760. This is amazing! They are both pin-pointing the same day in time—Rosh Hoshanah of the Hebrew year 5760. And, as if we are being prompted not to miss this remarkable display of harmony in the Number Code and in chronology, the term "*third day*" in the New Testament also shouts at us with the same number—5760. Two completely different spellings of

“*third day*” and in two different languages, using two different alphabets, both produce the same number—5760. I suggest it goes far beyond the idea of a blind coincidence, and into the realm of evidence of a Divine hand in its planning. It is shouting at us the grand and wonderful message that the six days of man’s allotted time of dominion has ended on Rosh Hoshanah 1999, and that the transfer of the right of rulership has passed to “*Him whose right it is.*” **The 6,000-year Clock has reached its fruition!**

## Days Six

ש ש ת י מ י ם

40 x 10 x 40 x 10 x 400 x 300 x 300

5760

(dropping the zeros)

## Third Day

י ו ם ת ל ת ה

5 x 400 x 30 x 400 x 40 x 6 x 10

5760

(dropping the zeros)

## Third Day

α ρ ε μ η ν η τ ι ρ τ

300 x 100 x 10 x 300 x 8 x 50 x 8 x 40 x 5 x 100 x 1

5760

In Psalm 2 we found the statement, “*I have set my king on my holy hill of Zion.*” Amazingly, the phrase “*I have set my king*” has a Gematria value of 5760 when multiplied. Daniel called that future King “*Messiah the Prince,*” which also multiplies to 5760. When we list all of these together they reveal a powerful message—that the Hebrew year 5760 is the appointed, foreordained time when “*I have set my King,*” (5760) who is “*Messiah the Prince*” (5760) upon the throne of David. It happens at the end of “*six days*” (5760) which is the “*third day*” from the birth of this promised King. Let me catch my breath! Is it really that plain in the Bible? Yes!

**5760 = Six Days, ששת ימים**

**5760 = Third Day, יום תלתה**

**5760 = Third Day, τριτην ημερα**

**5760 = I have set my King (Psalm 2:6), נסכתי מלכי**

**5760 = Messiah the Prince (Daniel 9:25), משיח נגיד**

**5760 = The Kingdom, (Daniel 7:27), מלכות**

End of Supplement No. 3

I have been asked by the author of this book to include, following this Supplement, a copy of the Appendix II of my book *Time and the Bible's Number Code*. I do so below. If any desire to own a copy of this book, it may be purchased from Amazon.com. Here is Appendix II as it appears in the book.

**351 Years**

When God ratified the covenant with Abraham (Genesis 15), Abraham still had no children. Yet the Covenant made provision for Abraham's heirs. His wife was old, and past her childbearing years, so she gave her handmaid to Abraham in hopes that an heir would be conceived.

*"...after Abram had been living in Canaan ten years, Sarai his wife took her Egyptian maidservant Hagar and gave her to her husband to be his wife. He slept with Hagar, and she conceived."*  
 (Genesis 16:3-4 NIV)

This event probably took place very soon after God had ratified the Covenant with Abraham. The only dating we have here is the statement that Abraham had been living in Canaan for ten years. However, when the child was born, it is stated that Abraham was 86 years old. (Genesis 16:16)

If the child was conceived after Abraham had been living in Canaan for ten years, then we must go back and find how old he was when he began living in Canaan.

Again, it is not precisely clear. Genesis 12:4 says that *"Abram was seventy-five years old when he set out from Haran"* We don't know how long it took him to reach Canaan from Haran, or how long it took him to settle in Canaan.

If he were still seventy-five years old when he settled in Canaan, then the conception of Hagar's child and the time of the Covenant would have been when Abraham was 85 years old.

In chapter 6 we dealt with time blocks. It became apparent that the age which we called "*Death Reigned from Adam to Moses*" was a period of 2,520 years. This was calculated backward from the date of the Law Covenant that God gave to Moses in the spring that the Israelites left Egypt. It was 1448 B.C. We have seen that the first 1,656 years of that 2,520-year span took us to the date of the Flood, leaving 864 more years to 1448 B.C.

The number 864 is very prominent in the Gematria of the Bible. It is one of the sacred numbers. It is used often in reference to God and His plan for the salvation and restoration of man. And, because other numbers in the time blocks are also sacred numbers, it lends strength to the suggestion that 864 is indeed the proper number of years between the Flood and the Law Covenant.

However, when we actually count the time sequences that are available to us in the Biblical record, it appears to be 866 years. It is entirely possible that within the span of 351 years between the Flood and the birth of Abraham, the two extra years could occur. This is because the Genesis record does not state the exact time, to the month and day, between the births of father and son—it only counts it in whole years, which could increase the apparent time.

The next link in the chronology as given in the Bible is between the giving of the Law, in 1448 B.C. and the laying of the foundation of Solomon's Temple in 968 B.C.—a span of 479 years and 2 months, bringing it into the 480th year. This span is given to us in I Kings 6:1, and was discussed at length in chapter 6.

Following this is the span during which the kings reigned in both Judah and Israel. Synchronizing the reigns of

these kings is a very difficult task, for there were co-regencies, interregna, accession years, and differing regnal years, which are not specifically recorded in the Old Testament record, but can be observed by careful comparison of the text.

Accounting for these irregularities, the space of time that the kings ruled in Israel and Judah can be brought into complete harmony with the records of other nations that existed at the same time, including the cuneiform tablets and stelae, as well as the famed Assyrian Eponym Canon. It can be brought into harmony with the solar and lunar eclipses which have been recorded; and it can also be brought into synchronization with the Jubilee cycle. With all of these “cross-checks” we can say with confidence that the period of time between the setting up of David’s kingdom in Jerusalem, in 1002 B.C., to the destruction of Jerusalem by Nebuchadnezzar in 586 B.C. is indeed 416 years.

The Babylonian Chronicle gives us an accurate record and dating of events leading up to the destruction of Jerusalem.

Persian records give an accurate account of the dating of their kings, including events relating to the people of Israel, all the way to their defeat by Alexander the Great in 330 B.C. These records are also in complete harmony with the known solar and lunar eclipses, which cannot be moved nor altered.

With all of these facts available I submit a timeline from Adam to Jesus.

Counting forward two thousand years from the birth of Jesus in the autumn of 2 B.C. brings us to the autumn of A.D. 1999, thus ending 6,000 years since the creation of Adam.

Counting forward three thousand years from the crucifixion of Jesus in the spring of A.D. 33 brings us to the spring of A.D. 2033, bringing to an end 7,000 years from the sin of Adam. This 7,000 years is the "seventh day" in which God rested from his work of creation.

The Great Eighth Day begins! Hallelujah!

# What is the Great Eighth Day?

*By Bonnie Gaunt*

Supplement No. 4

Until now I've been dealing with sixes and sevens—six days, followed by a seventh, forming a week. For this is the way the creation week was made, and this is the way man's week is progressing. But these groups of sevens are also based on the same principle as the music scale, which is seven tones, followed by an eighth which is the first tone of the next set of seven. Thus the eighth becomes number one of the next set. We call it an octave, meaning eight, but the eighth note is really the beginning of a new octave. It is a new beginning. And that is exactly what the number 8 means in the Gematria of the Bible. The first note of an octave is the same as the eighth note, but a higher pitch. So note number 1 means a beginning, and note number 8 is a new beginning.

**J e s u s**

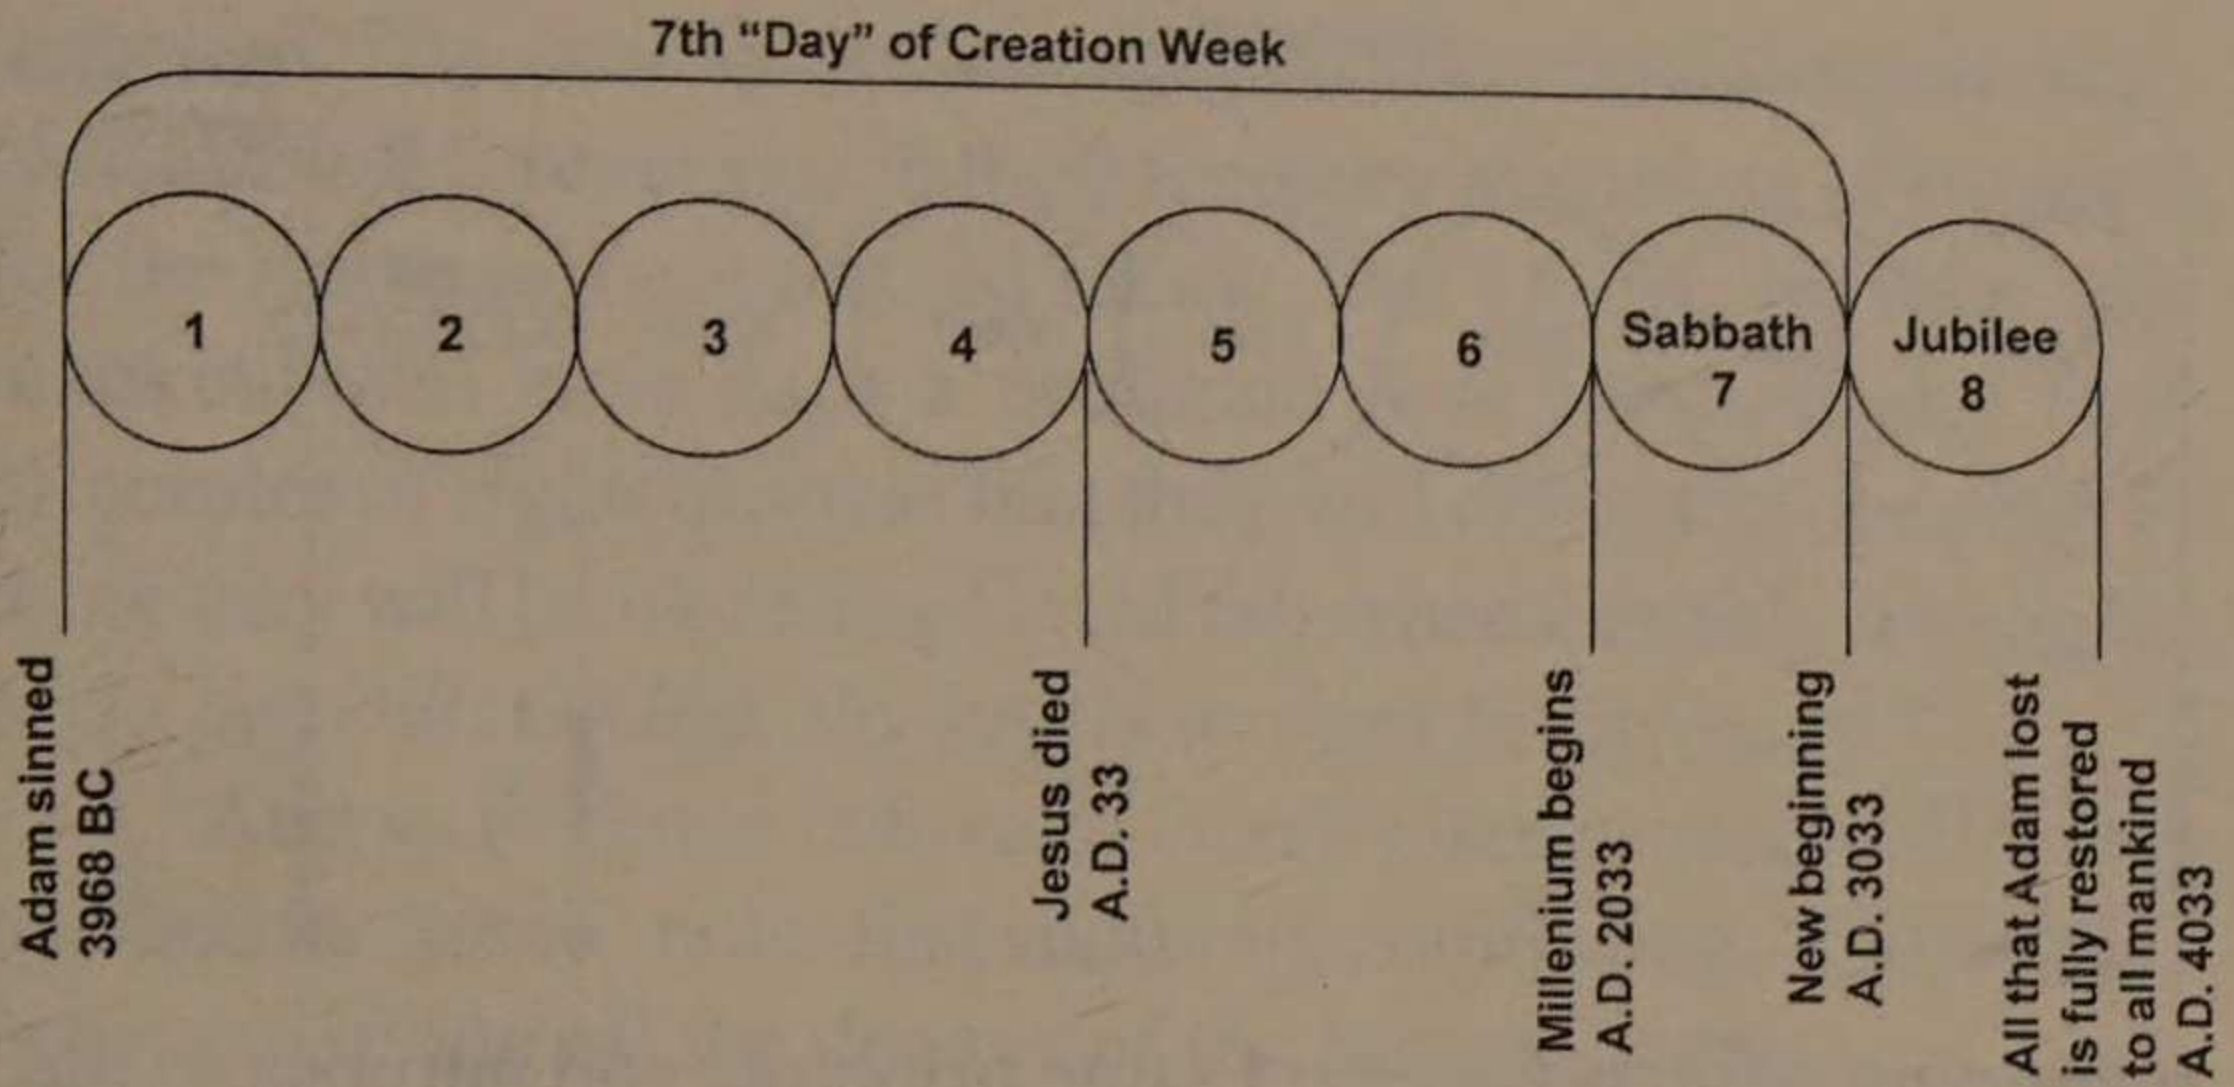

*I η σ ο υ ς*

10+8+200+70+400+200

**888**

The beginning and the new beginning have to do with man's creation and ultimate salvation, through Jesus Christ whose number is 888.

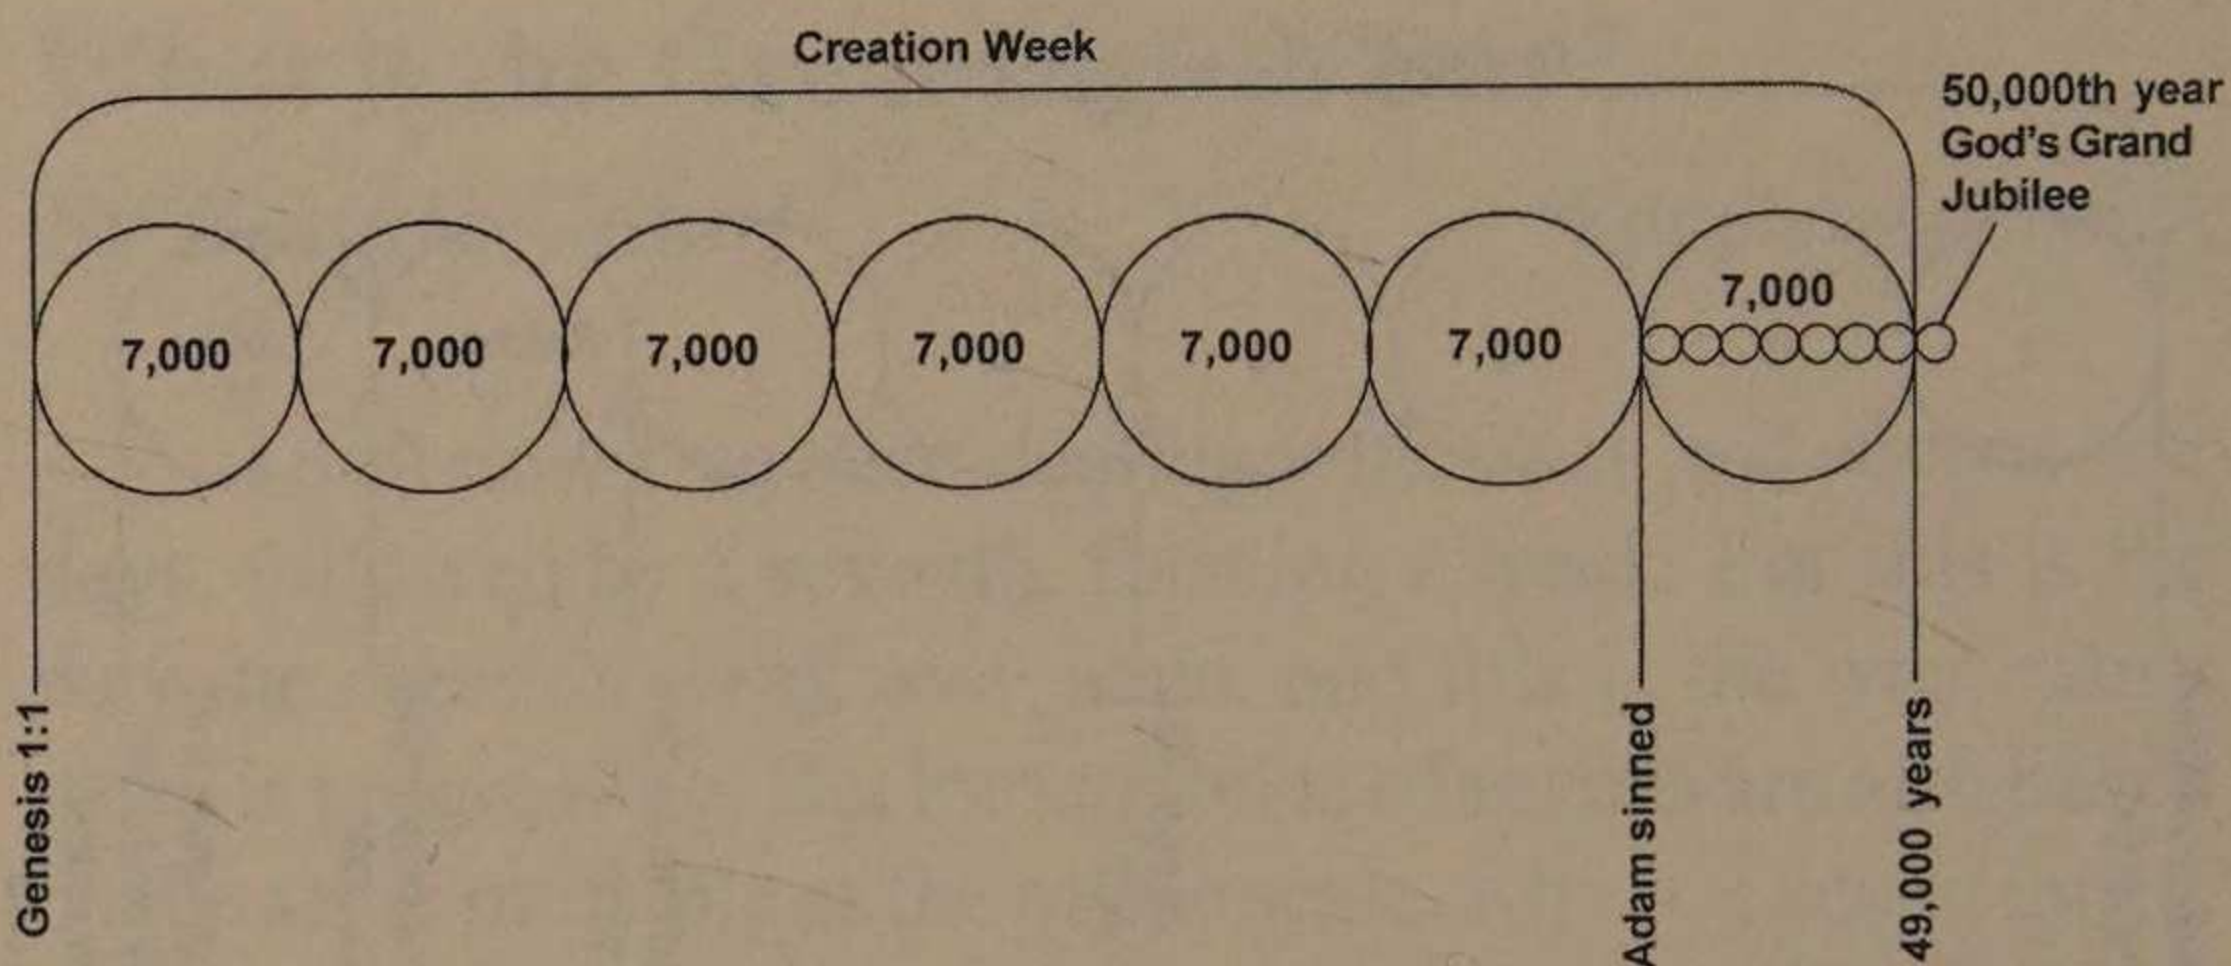

The six-day Clock measured the allotted time man was given for "*dominion.*" However, when dealing with the grand octave of salvation we must begin with the time when sin entered, for it is counting man's right to life—his sin and his redemption. So this grand octave is all about salvation. Let's view it as a series of 8 circles, each representing one "*day*" of man's existence on earth. Thus each "*day*" would represent 1,000 years.

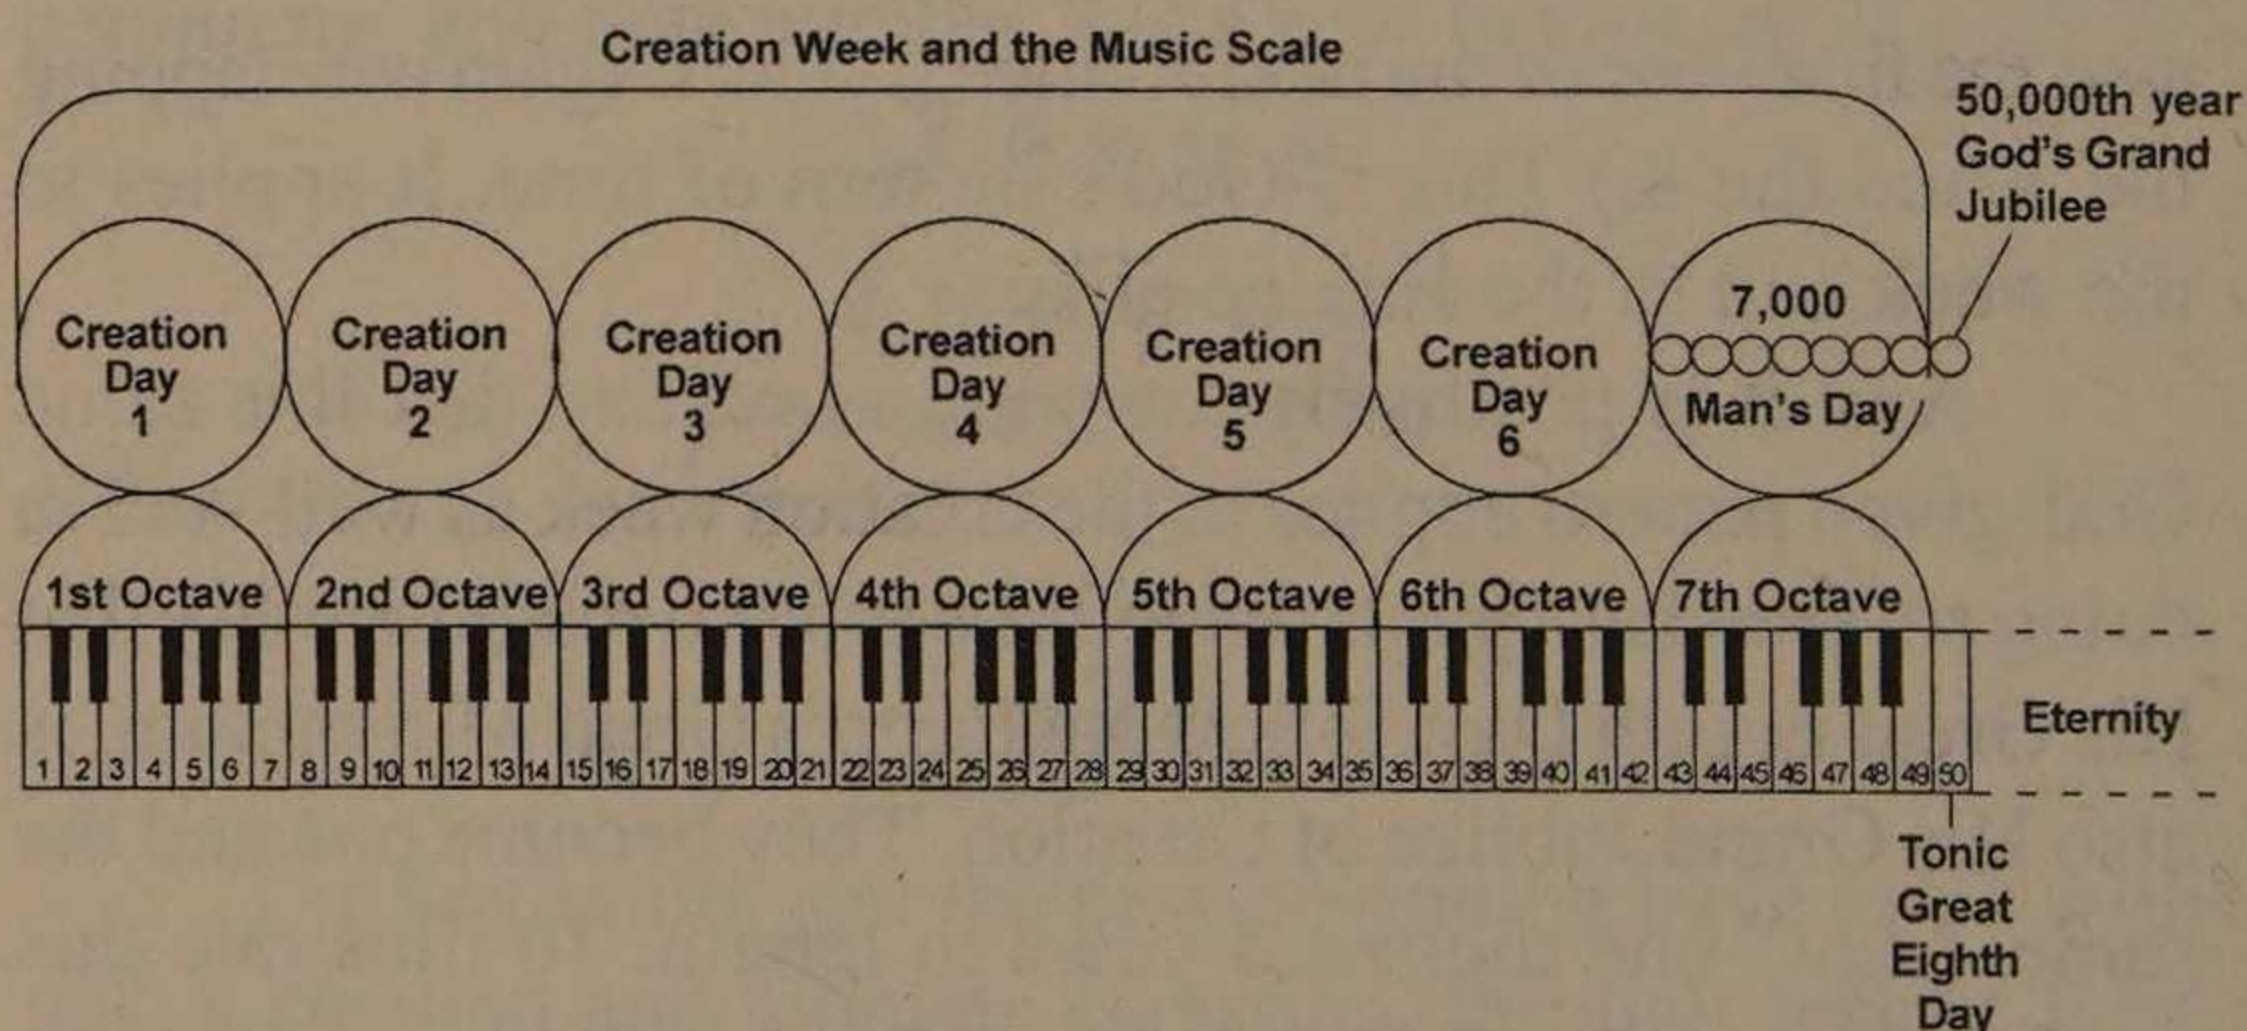

God's pattern of time is simple, yet profound. He pictured this simple pattern in the Law that He gave to Moses, telling him that work would be for six days, followed by a Sabbath of rest. And every 50 years the Sabbath would be followed by the Jubilee—the 50th year is the Jubilee, but it is also the first year of the next Jubilee Cycle. (Again overlapping the 1 and the 8.) This is God's pattern of time. It applies to the week and to the Jubilee alike.

And it is positively amazing to realize that this same God-given pattern applies to the creation week as well—and in doing so, God has synchronized His time so magnificently that His Great Eighth Day, following Earth's Great Millennium, is also His Grand Jubilee of Creation. They become one and the same "*day*" one thousand years in length. To illustrate this remarkable pattern I show below a graphic of the six creation "*days*" which are each 7,000 years in length, followed by the 7th "*day*" in which God rested from His work of creation, totaling 49,000 years, immediately followed by a 50,000th "*day*" which is 1,000 years in length. (The whole of the diagram above fits into the 7th circle below.)

Amazingly, the music scale can be overlaid on this diagram and it will fit precisely with seven octaves, followed by the all-important "tonic" note which satisfies. That "tonic" note, which restores the human ear back to the sound of the

beginning note, is the exact same principle and purpose of the Great Eighth Day—God's Grand Jubilee. It is for the purpose of restoring to Adam and all of his posterity, all that he had lost at the beginning. God's ways are grand and wonderful and beautiful! Take a look at the magnificent harmony of God's "week" with the music scale!

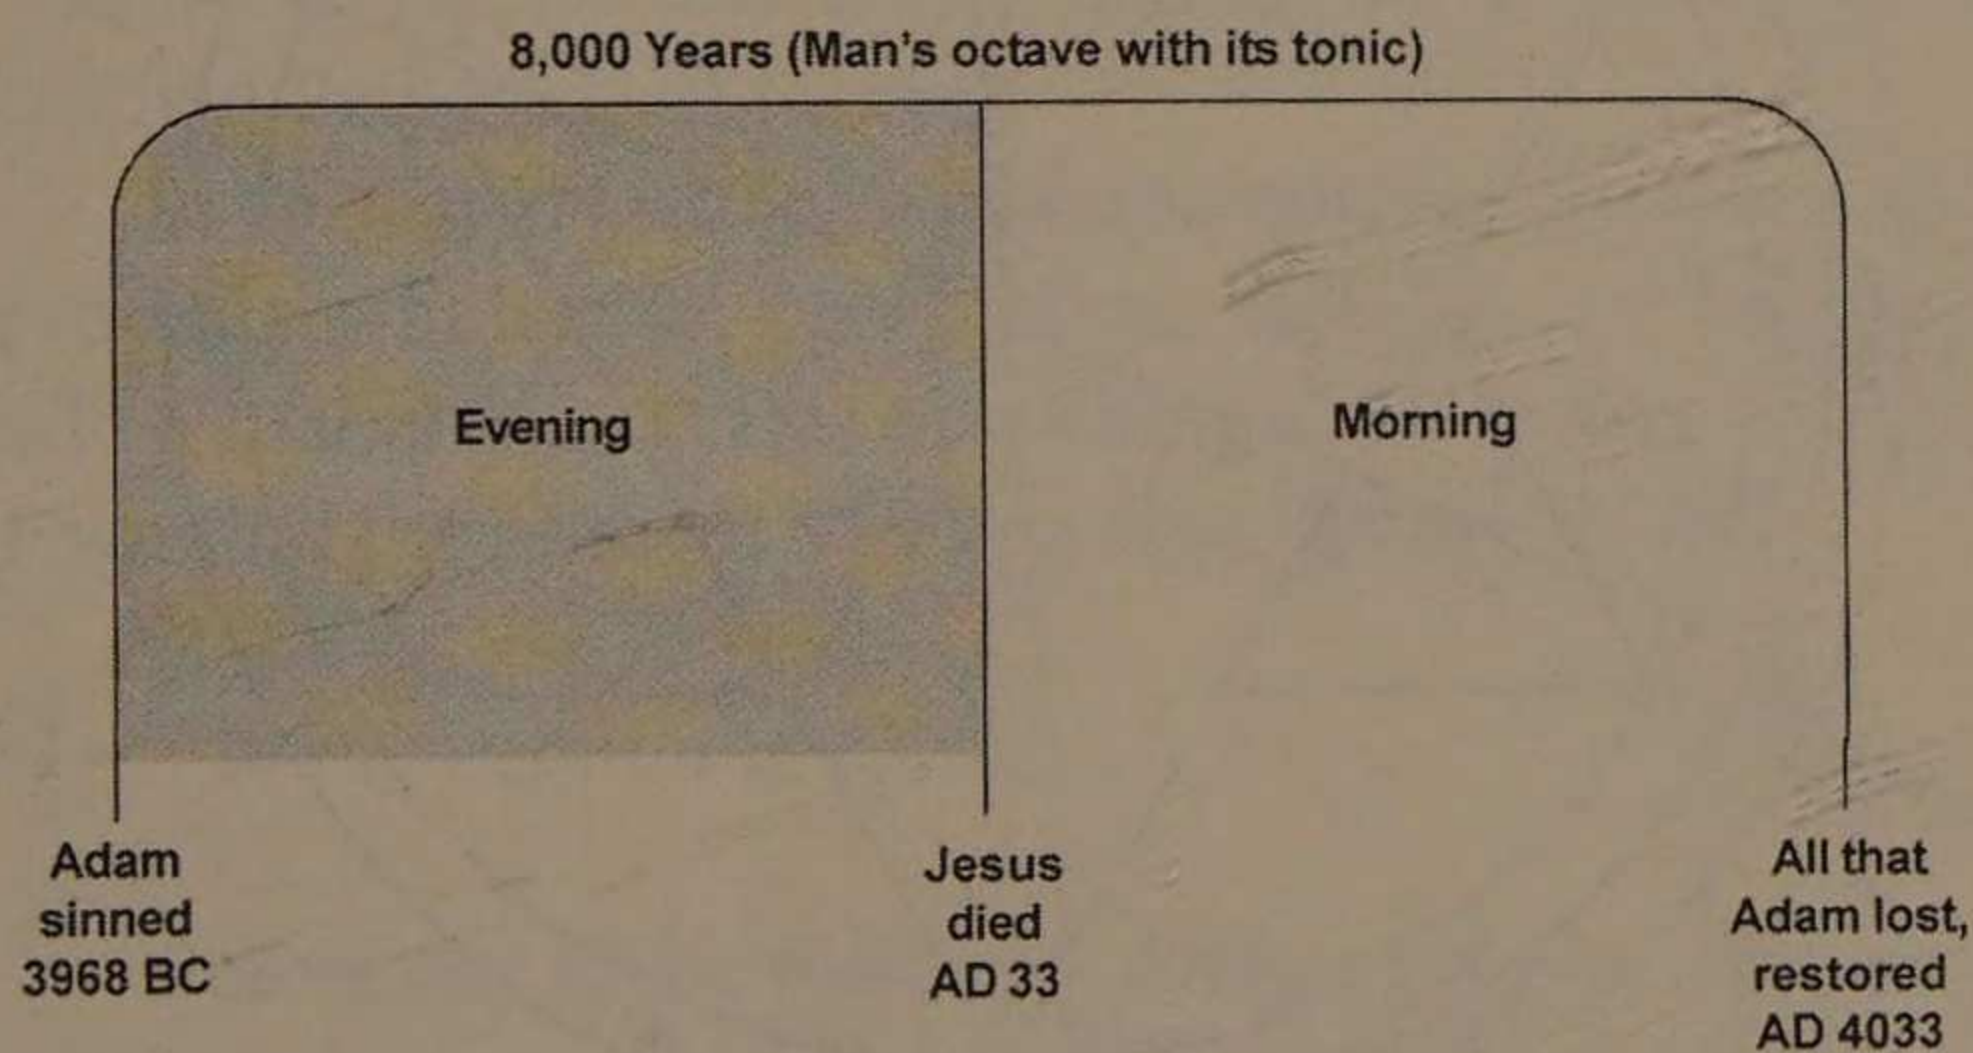

In the beginning Adam had a perfect human life, a perfect home in which to live, and sonship with God. His garden home occupied one spot on this vast globe. But when all that he lost will be restored, it will fill the earth. And most importantly, all mankind will once again be in a "sonship" relationship with their Creator—just like at the beginning.

Mankind will have learned the sad, horrible, terrible nightmare of the consequences of sin. It will be a lesson that will last forever, never to be repeated—yet, never to be

forgotten. The “*smoke*” of that fiery 6,000 years of experience with sin will forever rise in their memory as a token of respect for the righteousness of God’s Law. But I think, by then, all mankind will have such a profound love for God and His principles of righteousness that they will delight in obeying. I think they will be like King David felt when he said, “*I delight to do thy will, O God, thy law is written in my heart.*”

And so the great octave of God’s plan for man will have reached its “tonic” note—that soothing, comforting, “finishing” note, satisfying all the desires of the human heart.

Looking back over the great 8,000 years we observe something astonishing. Precisely in the middle, dividing evening from morning, is the day when Jesus hung on the cross and uttered those immortal words, “*It is finished.*” At that moment in time He became the **pivotal point in the entire plan of God** for the salvation and restoration of man.

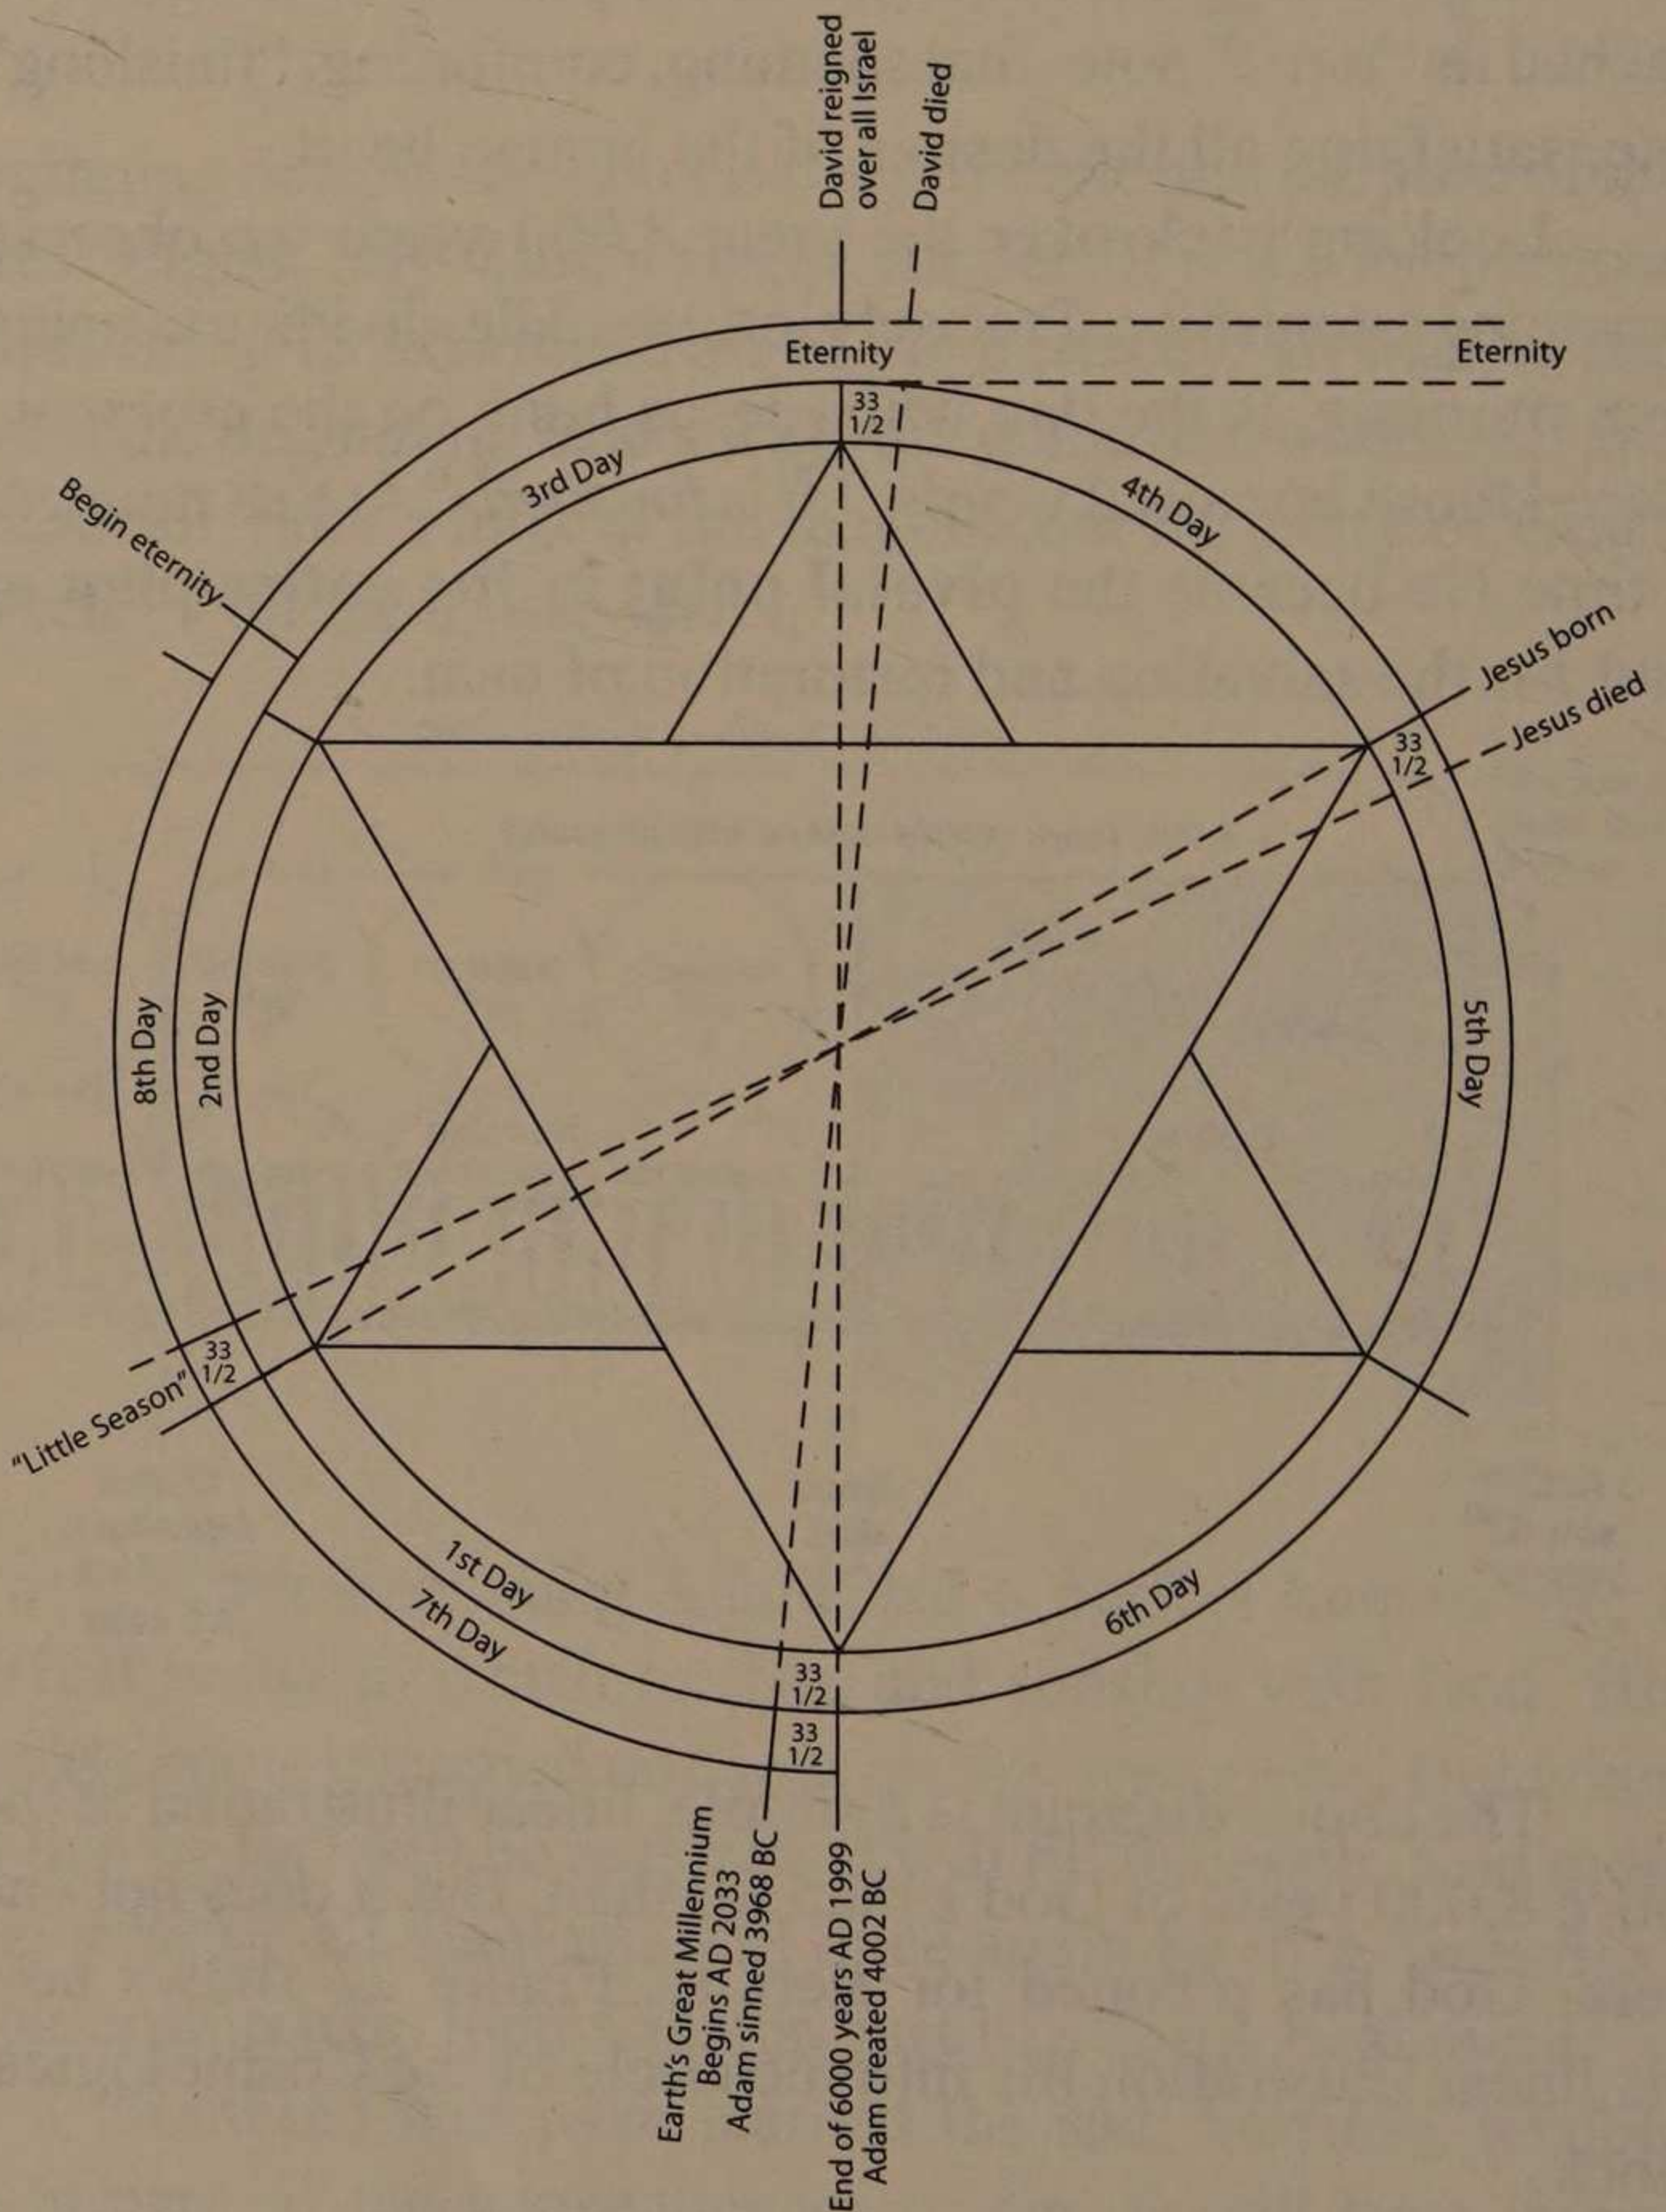

The above diagram is a simple, linear illustration of the entire 8,000 years of God’s plan for man. But it does not end there. God has planned for eternity. Figure 22 shows how this linear illustration fits into the circle of the Cosmological Clock.

Eight is not the last of the digits. There is one more number. Let’s take a look at the final digit.

Figure 22  
**Supplement**  
*By: Bonnie Gaunt*

In keeping with the concept of time as a clock, the Millennium and the Great Eighth Day could be illustrated as below. Christ's overthrow of man's governments would begin with Rosh Hashanah 1999. The 7th day, Earth's Great Millennium, begins 33-1/2 years later, in the spring of 2033, with the setting up of Divine Government. "Thy Kingdom come, thy will be done on earth as it is in heaven."

# Ancient Mathematicians Called Nine The Horizon

*By Bonnie Gaunt*

Supplement No. 5

In this book we have talked much about the circle of time. First we see the 6,000-year Clock, ticking off the years of man's fall into sin. Then we become aware of the great seventh day, or Earth's Great Millennium. But seven is not the end of the digits—there are two more. The number 8, throughout the Bible, speaks of a New Beginning through Jesus, whose name in the New Testament bears the number 888. One of the principles of Gematria is when a digit is raised to its triplet, it is telling us that this number is exalted in power and glory, and the fullness of its function and meaning.

But there is one more digit—the magnificent number nine. Ancient mathematicians called it the “Horizon” because it was the end of the digits, and beyond the horizon is the vast unknown that goes on forever.

In the use of Gematria in the Scriptures, the number nine represents wholeness, completion, fullness, perfection and finality. In this respect it is describing God. In fact, in Genesis 1:1 we find the number 999 is a description of God.

999 = *“In the beginning God”*

Before any of the works of creation He was—He existed—in His wholeness, His fullness, His perfection and His finality. He had it all. There was nothing lacking. It is awesome to realize that the Bible begins with this description of God in His fullness of being, given to us in just two little Hebrew words.

The Psalmist uses a few more words but describes the same thing, using the same numbers—999.

*“Great is the Lord, and greatly to be praised in the city of our God, the mountain of His holiness. Beautiful for situation, the joy of the whole earth is Mount Zion on the sides of the north, the city of the great King.”* (Psalm 48:1-2)

This is the location of God’s dwelling place— *“In the city of our God, the mountain of His holiness.”* It has a Gematria value of 999. It makes us want to shout *“Glory to God”*—and if we did, we would be shouting 999.

999 = *“Glory to God”* (Luke 17:18)

God, using the triplet of nines, has shown us the beginning and the fulfillment of His great plan for man on this Earth. Graphically we have shown it as a circle. And that is precisely what the Greek word *periago* means when it is used in the New Testament. Its meaning in English is “Go in a circle.” *Periago* has a Gematria value of 999. Coincidence? I don’t think so! God’s plan for man began with 999 and it is fulfilled with 999. It comes full circle from man’s creation in perfection to man’s complete restoration to perfection.

The bringing of all mankind back to all that had been given to Adam is the work of Divine Government—the One World Government of Jesus Christ.

Oh! But man thinks he is going to accomplish One World Government and free the world of violence and corruption. There were a couple of icons of man’s proposed world power in New York City. They were called The World Trade Center. On 9-11 of 2001 those icons of man’s world power came crashing down. The bringing down of those icons foreshadow the bringing down of the real towers of man’s world power. It happened on the anniversary of Rosh Hoshanah 1999—the date which marked the end of man’s right of rulership and the beginning of the rule of the *“One whose right it is”*—Jesus

Christ—the antitypical David, who was prophesied to return and take the seat of power on David’s throne. It was a powerful “*sign*” that man’s governments will be brought down.

Man’s attempt at world power and its soon collapse is represented by the collapse of the World Trade Center. The event has come to be know as . . . . . **911**

But Isaiah said “a child is born” (88) and a “Son is given” (88) and the government would be upon His shoulders . . + **88**

---

Ultimate world government through Christ’s kingdom . . . . . **999**

That One World Government under the administration of Jesus Christ will be characterized by the number 9, which tells of its completeness, wholeness, fullness, perfection and finality. It will truly bring peace to the world. And it will bring mankind back into a sonship relationship with their Creator. This One World Government has a Gematria value of 999.

<b>One (<i>yachad</i>)</b> . . . . .	=	<b>22</b>
<b>World (<i>tebel</i>)</b> . . . . .	=	<b>432</b>
<b>Government (<i>misrah</i>)</b> . . . . .	=	<b>545</b>
		<hr/>
		<b>999</b>

That world government will be the means by which all mankind will have the opportunity to learn righteousness, and come full circle back into possession of all that Adam lost.

Mankind on this Earth has had 6,000 years to learn the results of sin. It has been painful beyond description. It is a lesson never to be repeated and never to be forgotten. God

has planned 1,000 more years for man to learn righteousness. The whole process is like a smelting furnace—to burn away the dross and to purify the precious metal. King David described this process of purification in Psalm 12:6-7:

*“The words of the Lord are pure words; as silver tried in a furnace of earth, purified seven times. Thou shalt keep them O Lord, thou shalt preserve them from this generation forever.”*

999 = *“Silver tried in a furnace of earth”*

The purification will be complete, and by the end of Earth's Great Millennium mankind will be able to stand before their Creator in perfection, just as Adam did. Man and his Earth will have come full circle from creation in perfection, back to full restoration and reconciliation with their Creator. That full circle is represented by the triplet of nines.

The Apostle John saw this restoration of man in his vision that we call the Book of Revelation. This is how he described it:

*“I, John, saw the holy city, the New Jerusalem, coming down from God out of heaven, prepared as a bride adorned for her husband. And I heard a great voice out of Heaven saying, Behold, the tabernacle of God is with men, and He will dwell with them, and they shall be His people, and God Himself shall be with them, and be their God. And God shall wipe away all tears from their eyes; and there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain; for the former things are passed away.” (Revelation 21:2-4)*

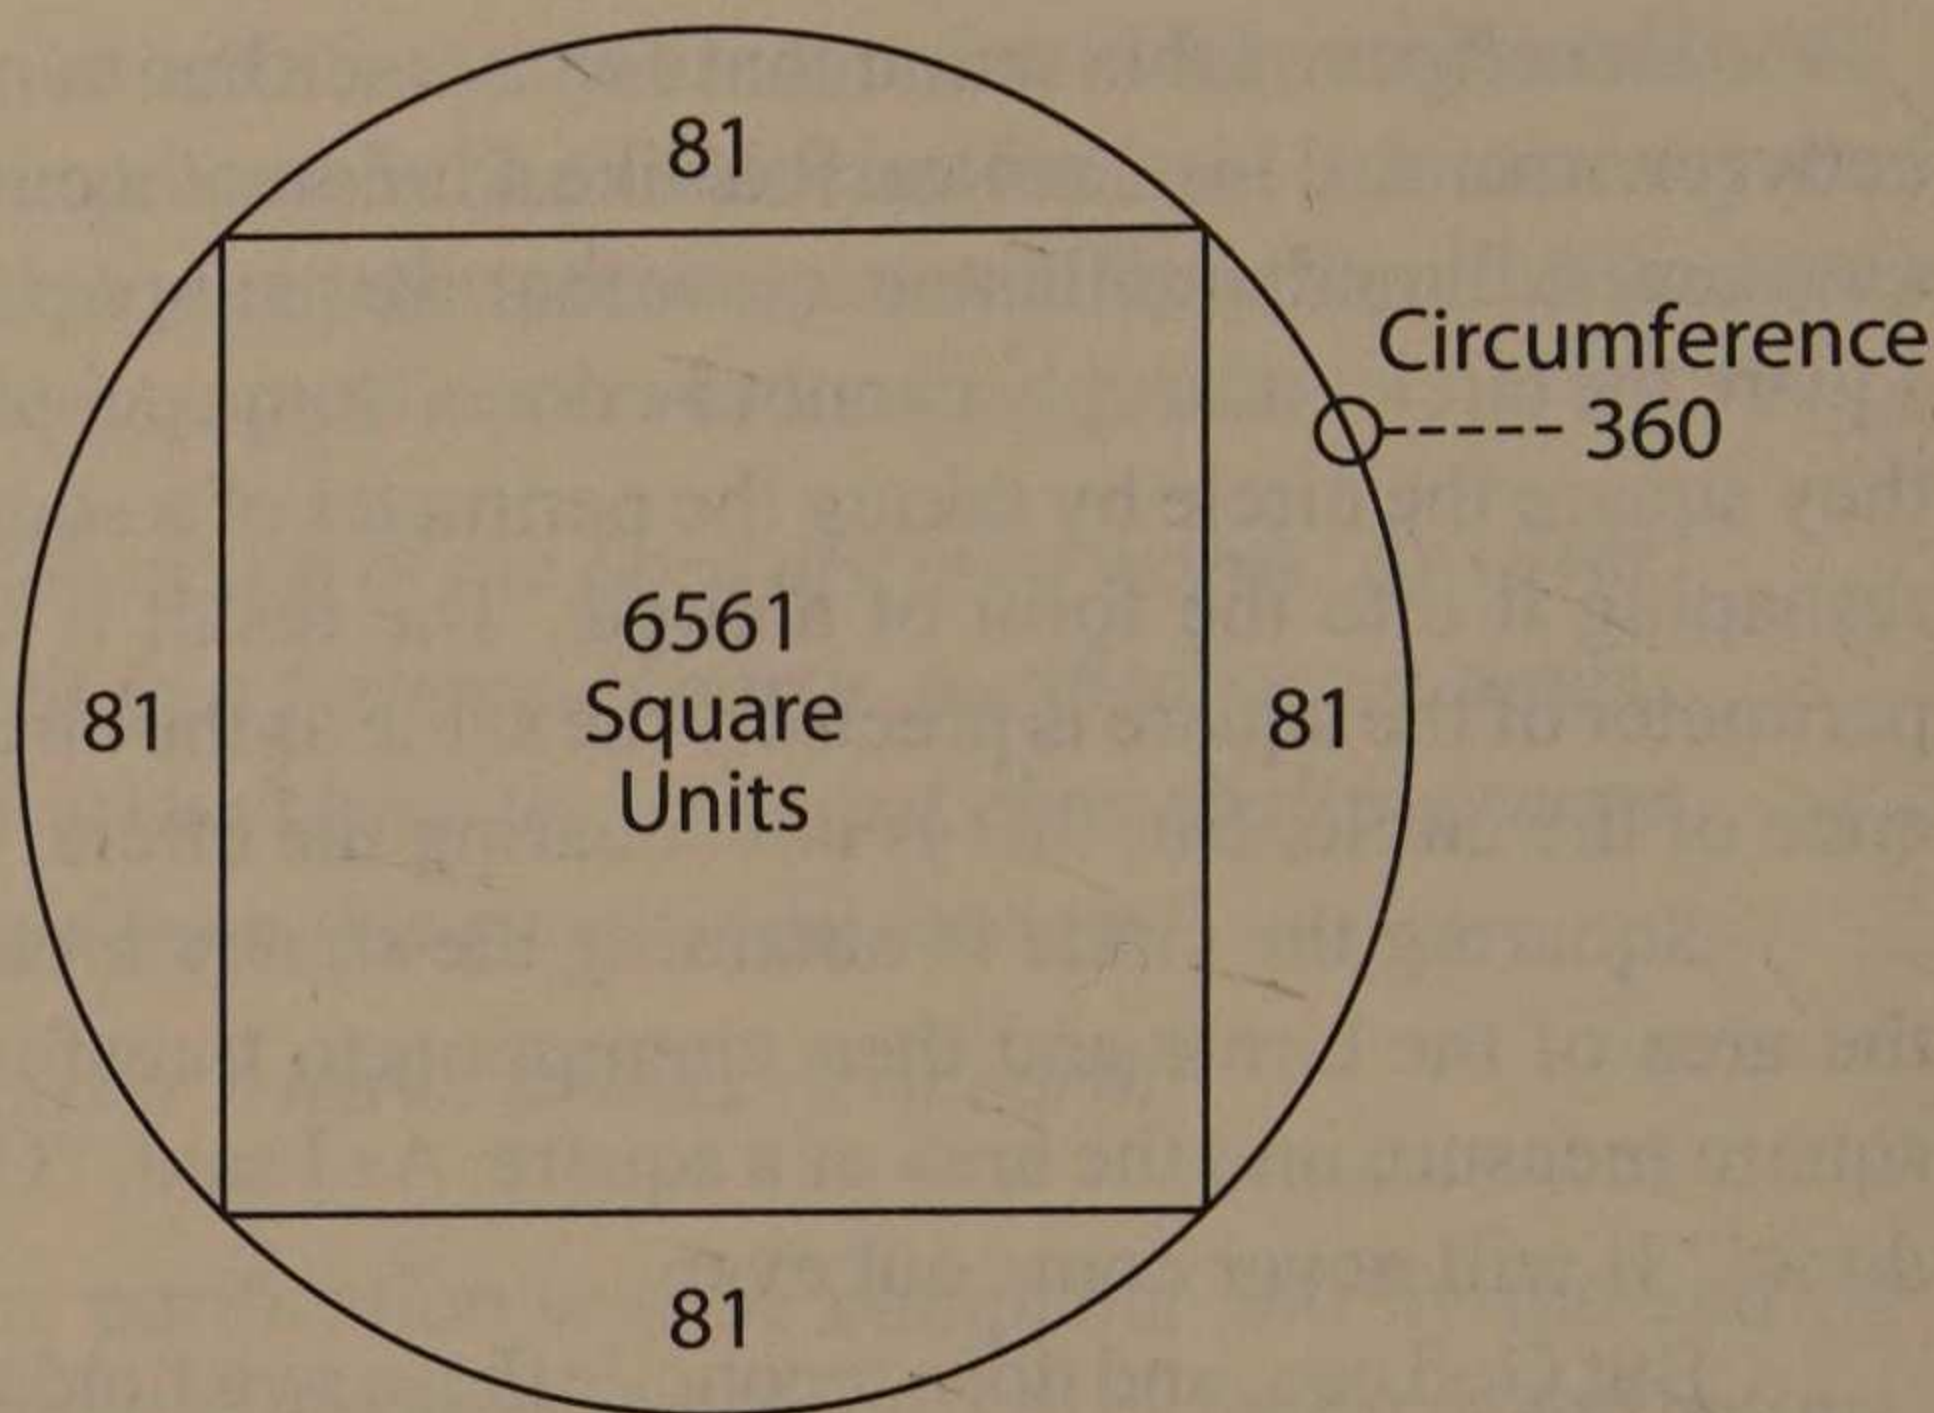

The effect of this union that John described is oneness between man and his Creator. It is like a union of a circle and a square. All mathematicians know that we cannot precisely square the circle—it simply cannot be done. Some people think they square the circle by taking the perimeter of a square and reshaping it into the form of a circle. The result is that the perimeter of the square is precisely the same as the circumference of the circle. But that is not squaring the circle.

Squaring the circle is obtaining the square measure of the area of the circle and then attempting to transform that square measure into the area of a square. As I said, “Can’t be done!” It will never come out even.

But God can, and does reconcile these two fundamental opposites in a beautiful union of the circle and the square. He does it by enclosing the square completely within the circle, showing man as no longer estranged from Him. God is represented by the circle. He is from “*everlasting to everlasting.*” Fallen man is represented by the square. But a union of the two will be accomplished at the end of the 7,000-year circle of time, spanning from the time of the sin of Adam all the way to the restoration of man back to the perfection that Adam lost.

This 7,000-year circle can be represented by the Biblical term “*seven times.*” In the symbology of the Bible, a “*time*” represents 360 years, thus seven “*times*” would be a span of 2,520 years. Let’s begin with a circle 360 units in circumference, since a circle is always defined as 360 degrees. If we draw a square totally within that circle (with all four corners touching the circle), the square will have 81 units and an interior measure of 6,561 square units. What amazing numbers! Notice the 81s, they are, of course,  $9 \times 9$ .

The one and the eight always refer to the Beginning and the New Beginning, thus  $9 + 9 = 18$  and  $9 \times 9 = 81$ .

The 6,000-year Clock brings us to September 11, 1999, which was Rosh Hashanah. Observe what happens when we multiply its digits.

**9-11-1999**

$$9 \times 1 \times 1 \times 1 \times 9 \times 9 \times 9 \times 9 = 6561$$

Let me catch my breath! It brings us to the time when man's right of rulership comes to an end, and the time when "He whose right it is" takes His rightful place on "David's Throne." And that is identified by the remarkable number 6561—the number that shows the fullness of man's estrangement from God, the number of the area of the square within the circle. But this number is hidden in a Psalm that prophesies the rulership of Jesus Christ and the overthrow of man's governments and the establishing of Christ's Kingdom on Earth. Fantastic! Let's take a look at Psalm 93.

*"The Lord reigneth, he is clothed in majesty; the Lord is clothed with strength, he hath girded himself: the world also is established, that it cannot*

*be moved. Thy throne is established of old: thou art from everlasting. The floods have lifted up, O Lord, the floods have lifted up their waves. The Lord on high is mightier than the noise of many waters, the mighty waves of the sea. Thy testimonies are very sure: holiness becometh thine house, O Lord, for ever."*

Verses 1 and 2 identify the Ruler. Verses 3 through 5 describe the trouble that is in the world during the overthrow of man's governments. They are pictured here as a mighty flood—just like in Noah's day.

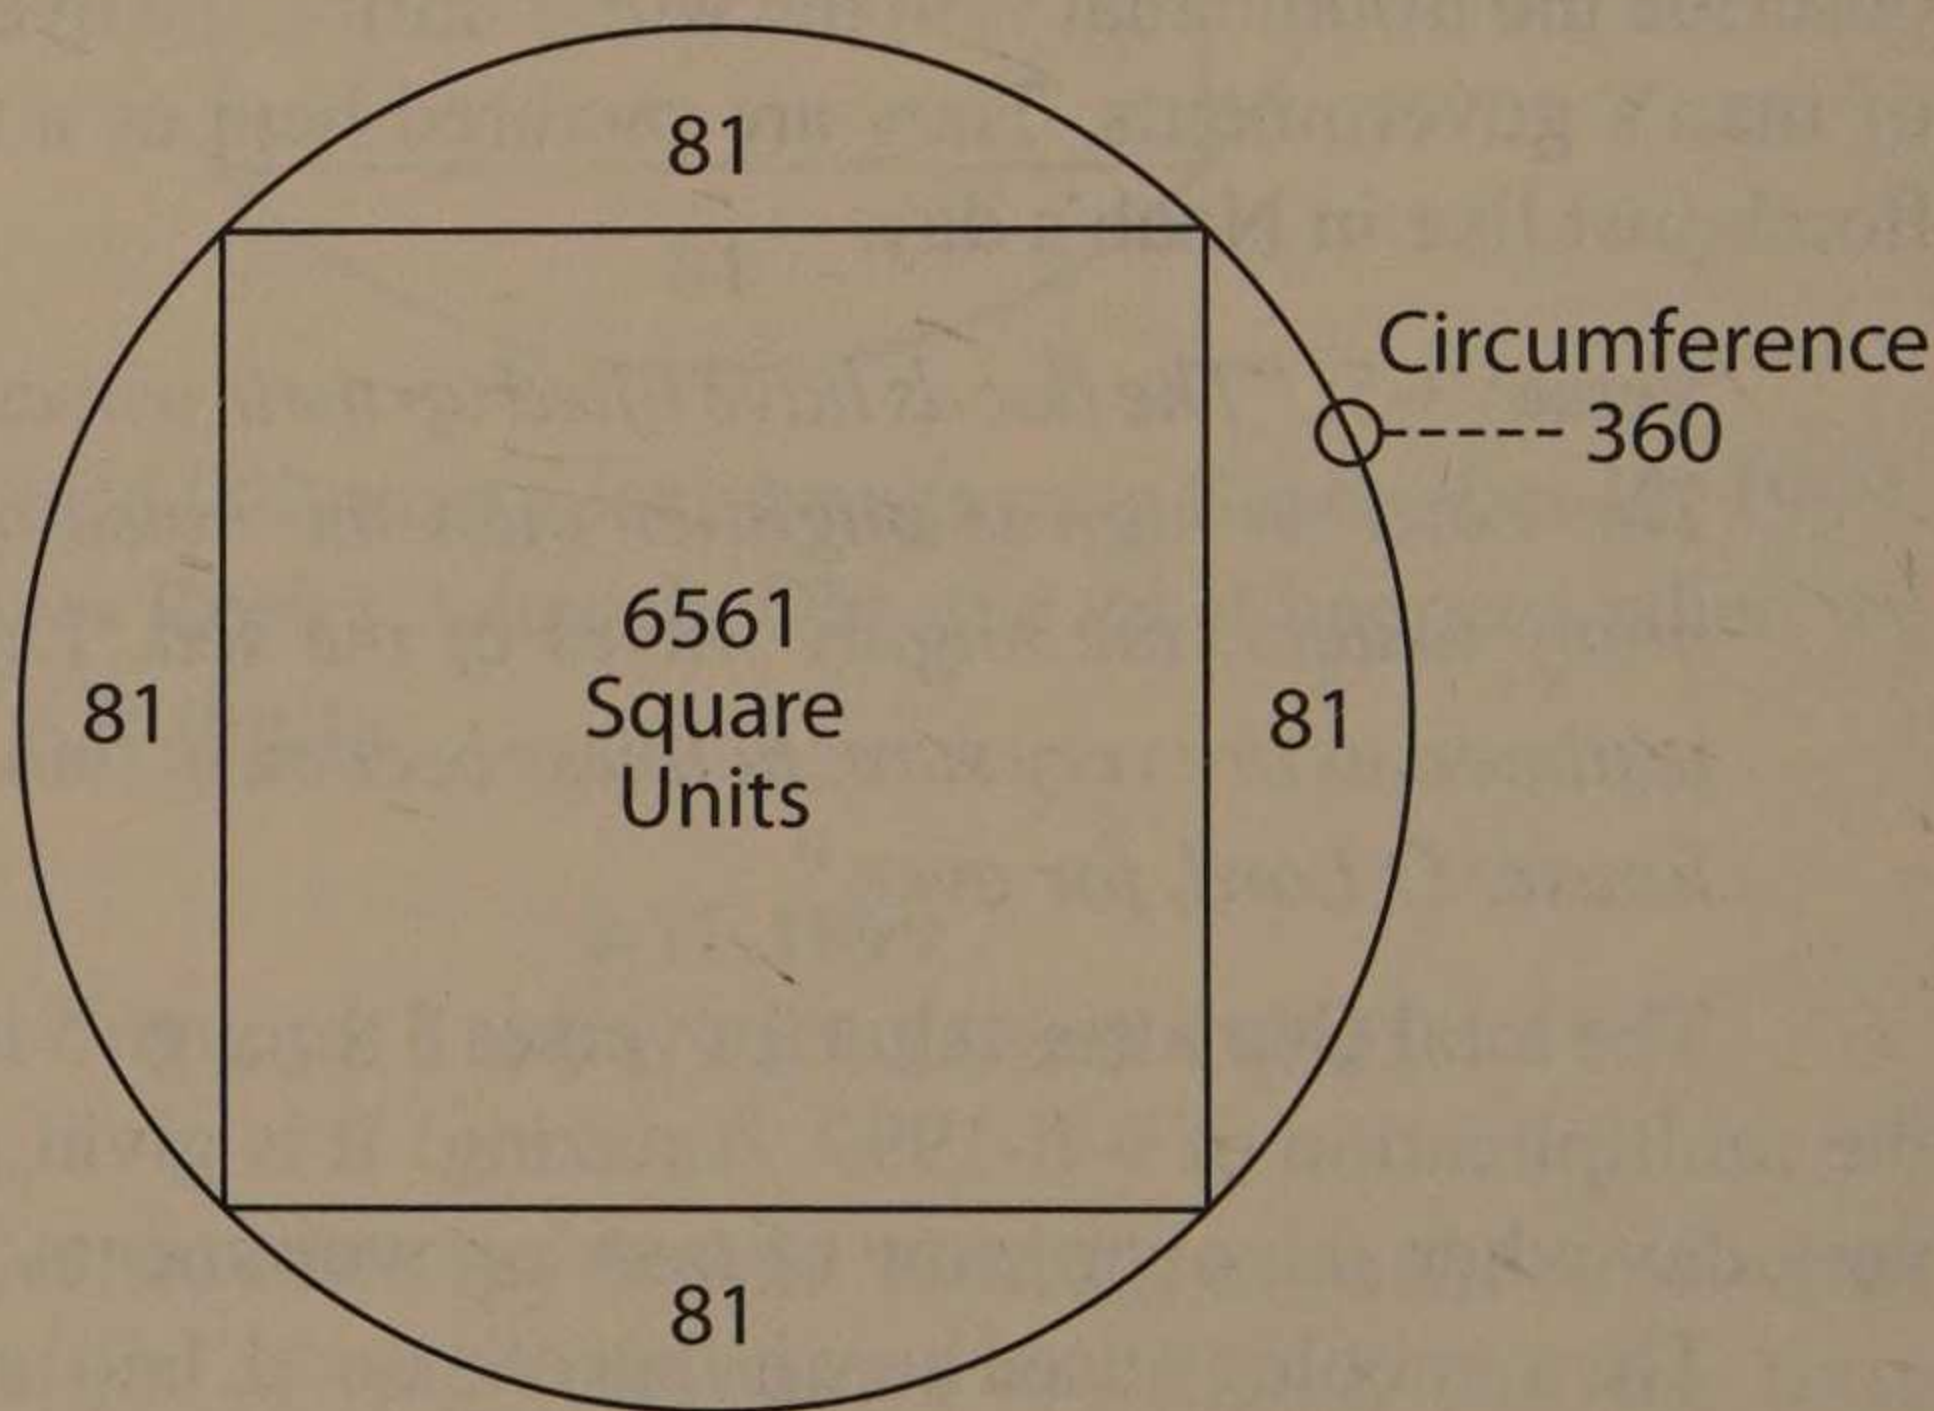

*Verses 3-5: "The floods have lifted up their waves. The Lord on high is mightier than the noise of many waters, the mighty waves of the sea. Thy testimonies are very sure: holiness becometh thine house, O Lord, for ever."*

The total Gematria value for verses 3 through 5 is 6561, the multiplication of 9-11-1999. Amazing! It is giving us the very day when the overthrow of man's governments began.

The symbology used here is that of a flood. I do not think it is mere coincidence that the flood of Noah's day began 1,656 years from the sin of Adam. 1656 is the mirror opposite of 6561. They can be joined together in a palindrome—65611656—and if we add the digits we obtain 36, which relates back to the circle whose circumference is 360, representing God. The number 36, of course, resolves to 9—that wonderful 9! Its triplet multiplies to 729 and its quad multiplies to 6561.

$$\begin{aligned} 36 &= \text{God (Elah)} \\ 9 + 9 + 9 &= 36 \\ 9 \times 9 \times 9 &= 729 \\ 9 \times 9 \times 9 \times 9 &= 6561 \end{aligned}$$

The number 729 is the number of days and nights in one Earth-year (365 + 364), and it is also a permutation of the Earth diameter. It is another way of describing the Earth. The four nines represent the entire Earth. The Scriptures use the term “*four corners of the earth,*” (Isaiah 11:12; Ezekiel 7:2; Revelation 7:1) to mean the entire Earth. It is still a common idiom today. The Earth does not have “*four corners.*” Yet, in the illustration of the union of the circle and the square, that which represents the Earth does indeed have four corners.

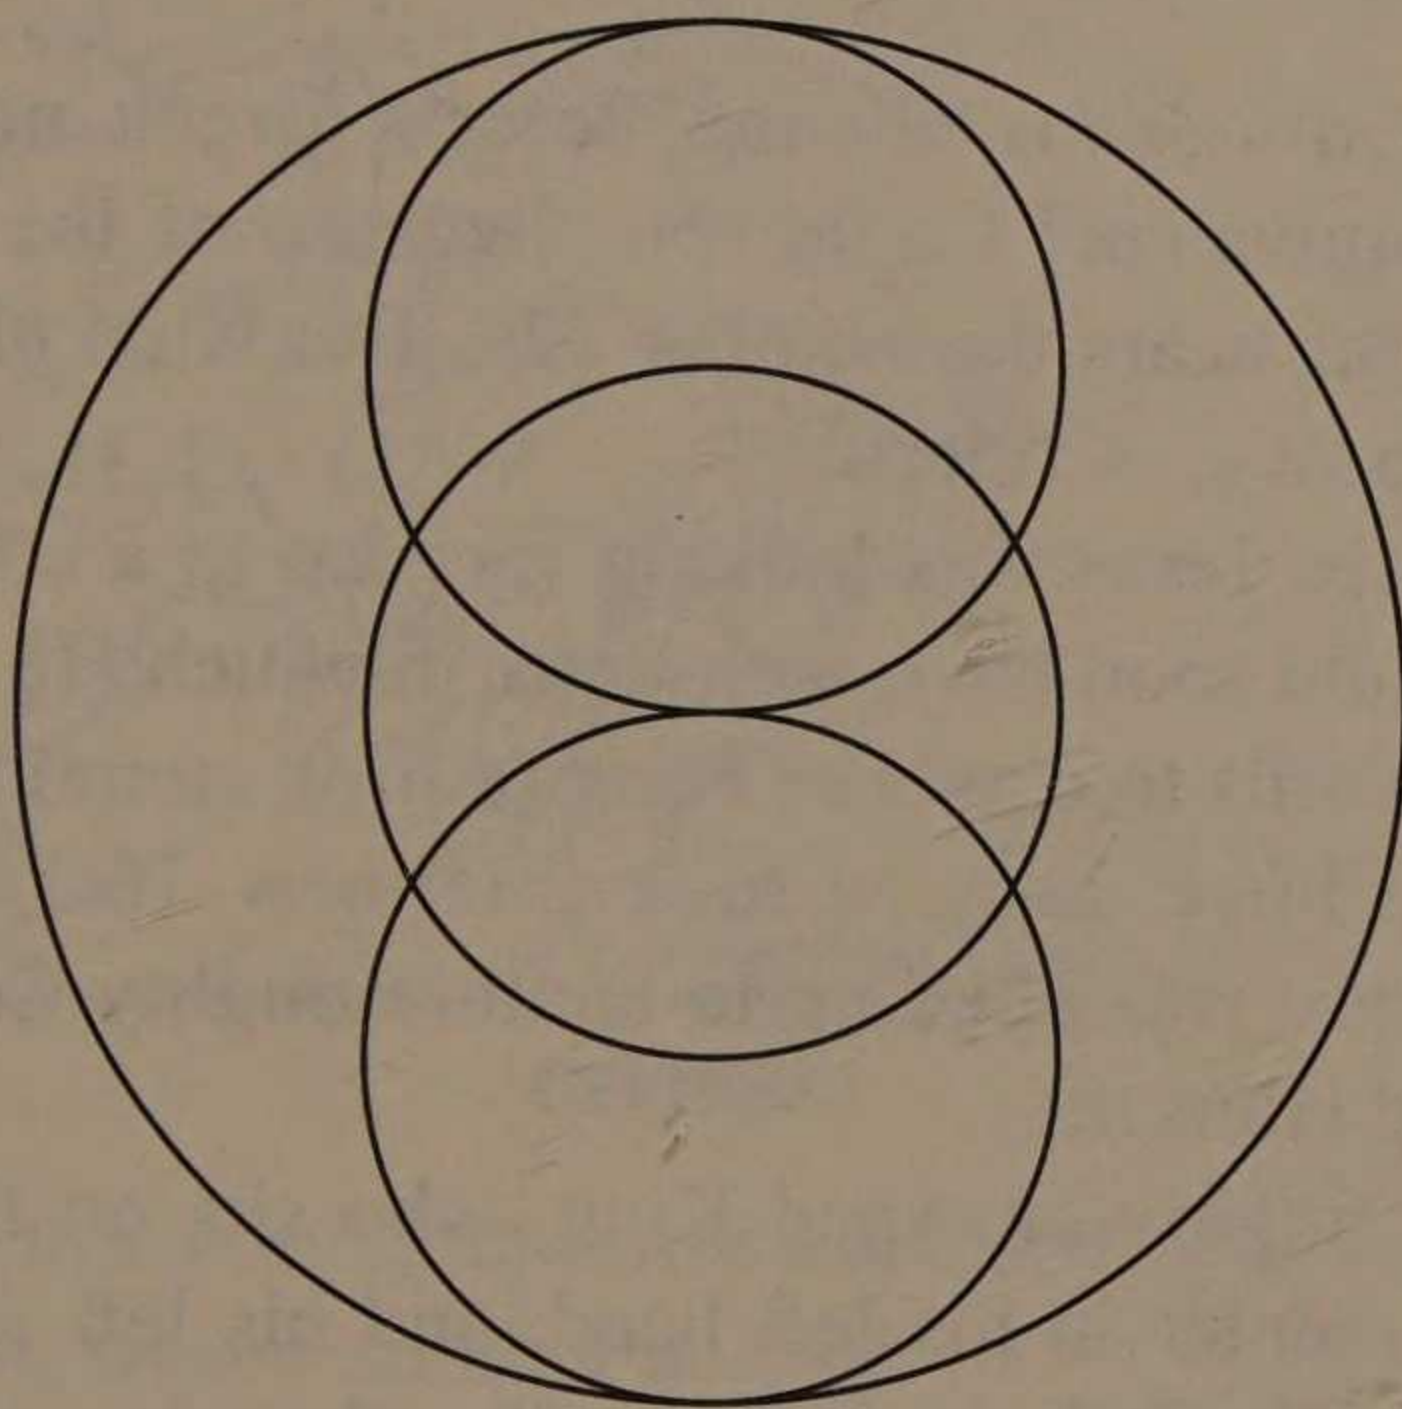

But what, or who, is represented by the 729—the multiplication of the triplet of nine? If the quad of nine pictures the entire Earth, then could the triplet of nines represent the One who will rule the entire Earth? And could it be the One whose Hebrew Gematria adds to the Earth number—792? (Lord Jesus Christ has a Gematria value of 792 in Hebrew) Let’s look at the possibilities.

In Jeremiah 10:13 is a word picture of the creation of the Earth; and to describe the entire globe, Jeremiah uses a term which we still use today—from the “*ends of the earth.*” It has a Gematria value of 486. In Genesis 1:29 a similar term is used— “*the face of all the earth.*” This also has a Gematria

value of 486.

I think we can safely say that the circle of Earth—perfected Earth—is represented by the number 486. But what has this to do with the multiplication of the triplet of nines—729? Another illustration will help to comprehend the idea.

Diameter of large circle 486  
Diameter of each small circle 243  
Combined diameters of small circles 729

The relationship of the diameter of the large circle to the diameters of the three small circles reveals the two numbers, 486 and 729. So, who is represented by 729?

A clue may be given to us by the Hebrew word for “*crown*” in the Old Testament. Its Gematria value is 243. Each of the three small circles has a diameter of 243. A crown speaks of royalty and rulership.

Another clue may be found in John 1:40-42.

*“One of the two which heard John speak, and followed him, was Andrew, Simon Peter’s brother. He first findeth his own brother, Simon, and saith unto him, We have found the Messiah, which is,*

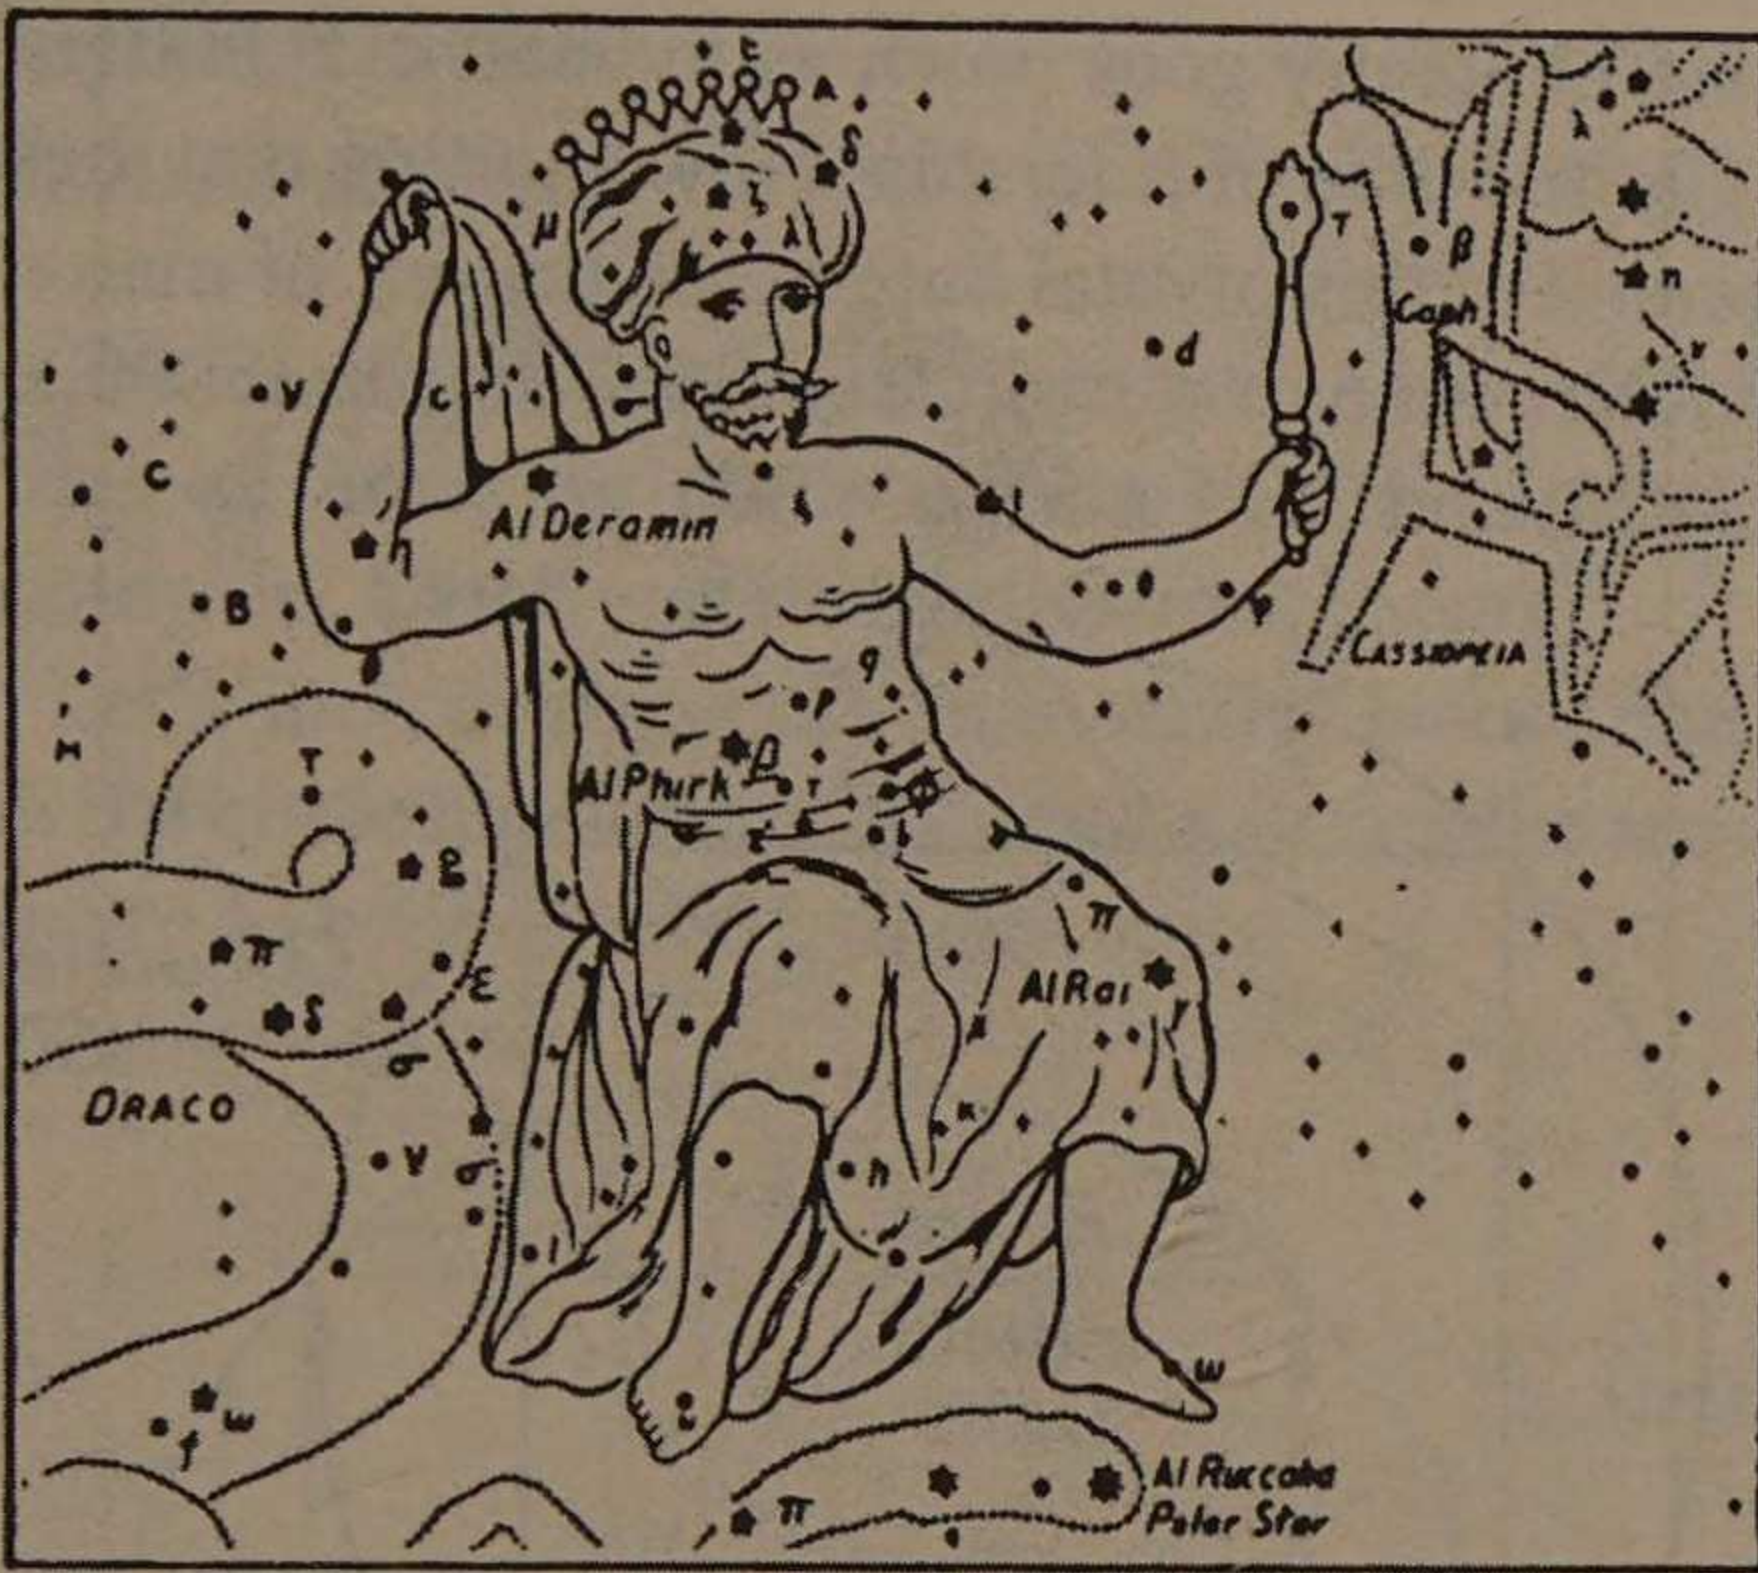

*being interpreted, the Christ. And he brought him to Jesus. And when Jesus beheld him, he said, Thou art Simon the son of Jona: thou shalt be called Cephas, which is by interpretation, a Stone."*

Why did Jesus change Peter's Greek name to its Aramaic equivalent? Could it be because of the number it bore? Cephas bears the number 729. But what has Peter to do with a crown, or rulership?

Perhaps Jesus was looking forward to a conversation that He would soon have with Peter in which He would use a play on words to compare Peter (a little stone) to Himself who was a huge massive rock (Matthew 16:16-18). And in the process was alluding to another mighty Cephas who represented Himself.

That mighty crowned King, who sits on His throne, holding a scepter in his left hand, and his left foot resting on the pole star (Polaris) is none other than the constellation Cephas, the Crowned King! Its Arabic spelling is Cepheus, which means "the royal Branch." We recognize the use of the name "*Branch*" as one of the prophetic names of Jesus. Zechariah said:

*"The Man whose name is the Branch, He shall grow up out of His place, and He shall build the temple of Jehovah. Even He shall build the temple of Jehovah. And He shall bear the majesty and shall sit and rule on His throne."*

## CEPHEUS

The One wearing the crown and sitting on the throne is Jesus Christ, whose number is 2368.

2368 = "Jesus Christ"

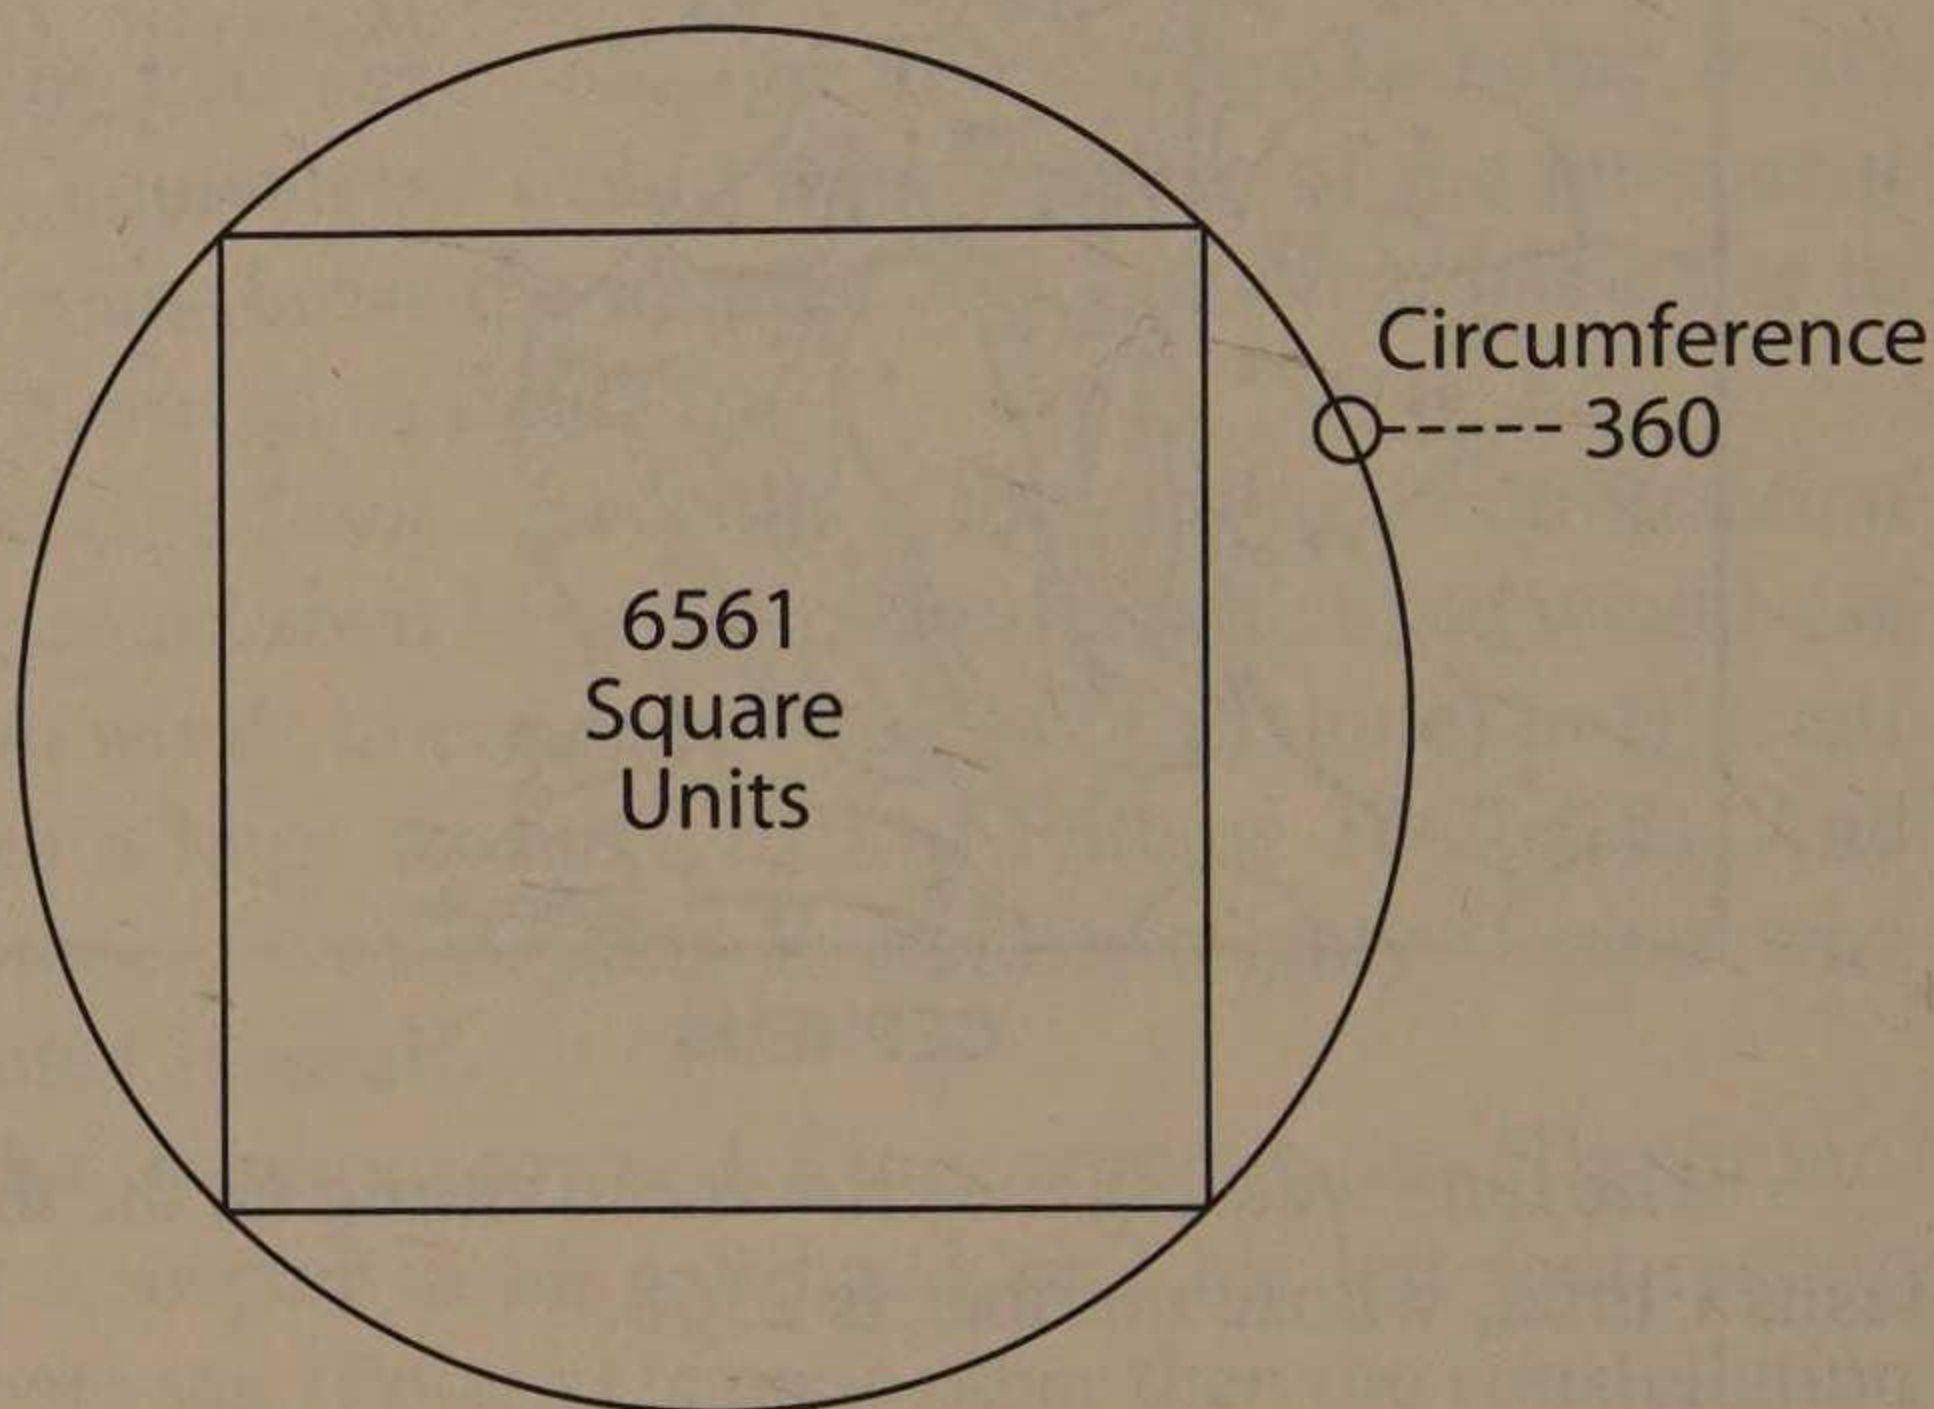

2368 = "The Man whose name is The Branch, He shall grow up out of His place, and He shall build the temple of Jehovah."

This constellation whose left foot rests on the North Star—the "sides of the north" (Psalm 48:2), is named Cephas, whose number is 729.

From our stance here on Earth, all the constellations appear to be circling around the North Star. The story of the whole plan of God for the salvation of man is told by those constellations. And indeed, that whole plan of God for man pivots around its central figure—Jesus Christ.

Cephas is the triplet of nines:  $9 \times 9 \times 9 = 729$ . He took His rightful place as King on David's throne on Rosh Hashanah 1999—the beginning of the Hebrew year 5760.

That date in history goes down as the end of 6,000 years of man's allotted time of rulership. How exciting that these two descriptions of this pivotal date in the history of man should relate to the union of the circle and the square.  $6000 \times 5760 = 3456(000)$  and  $3 \times 4 \times 5 \times 6 = 360$ .

**Rosh Hashanah 5760 was 9-11-1999**

$$9 \times 1 \times 1 \times 1 \times 9 \times 9 \times 9 = 6561$$

**I bow in silent reverence before the great  
Mathematician of the Universe!**

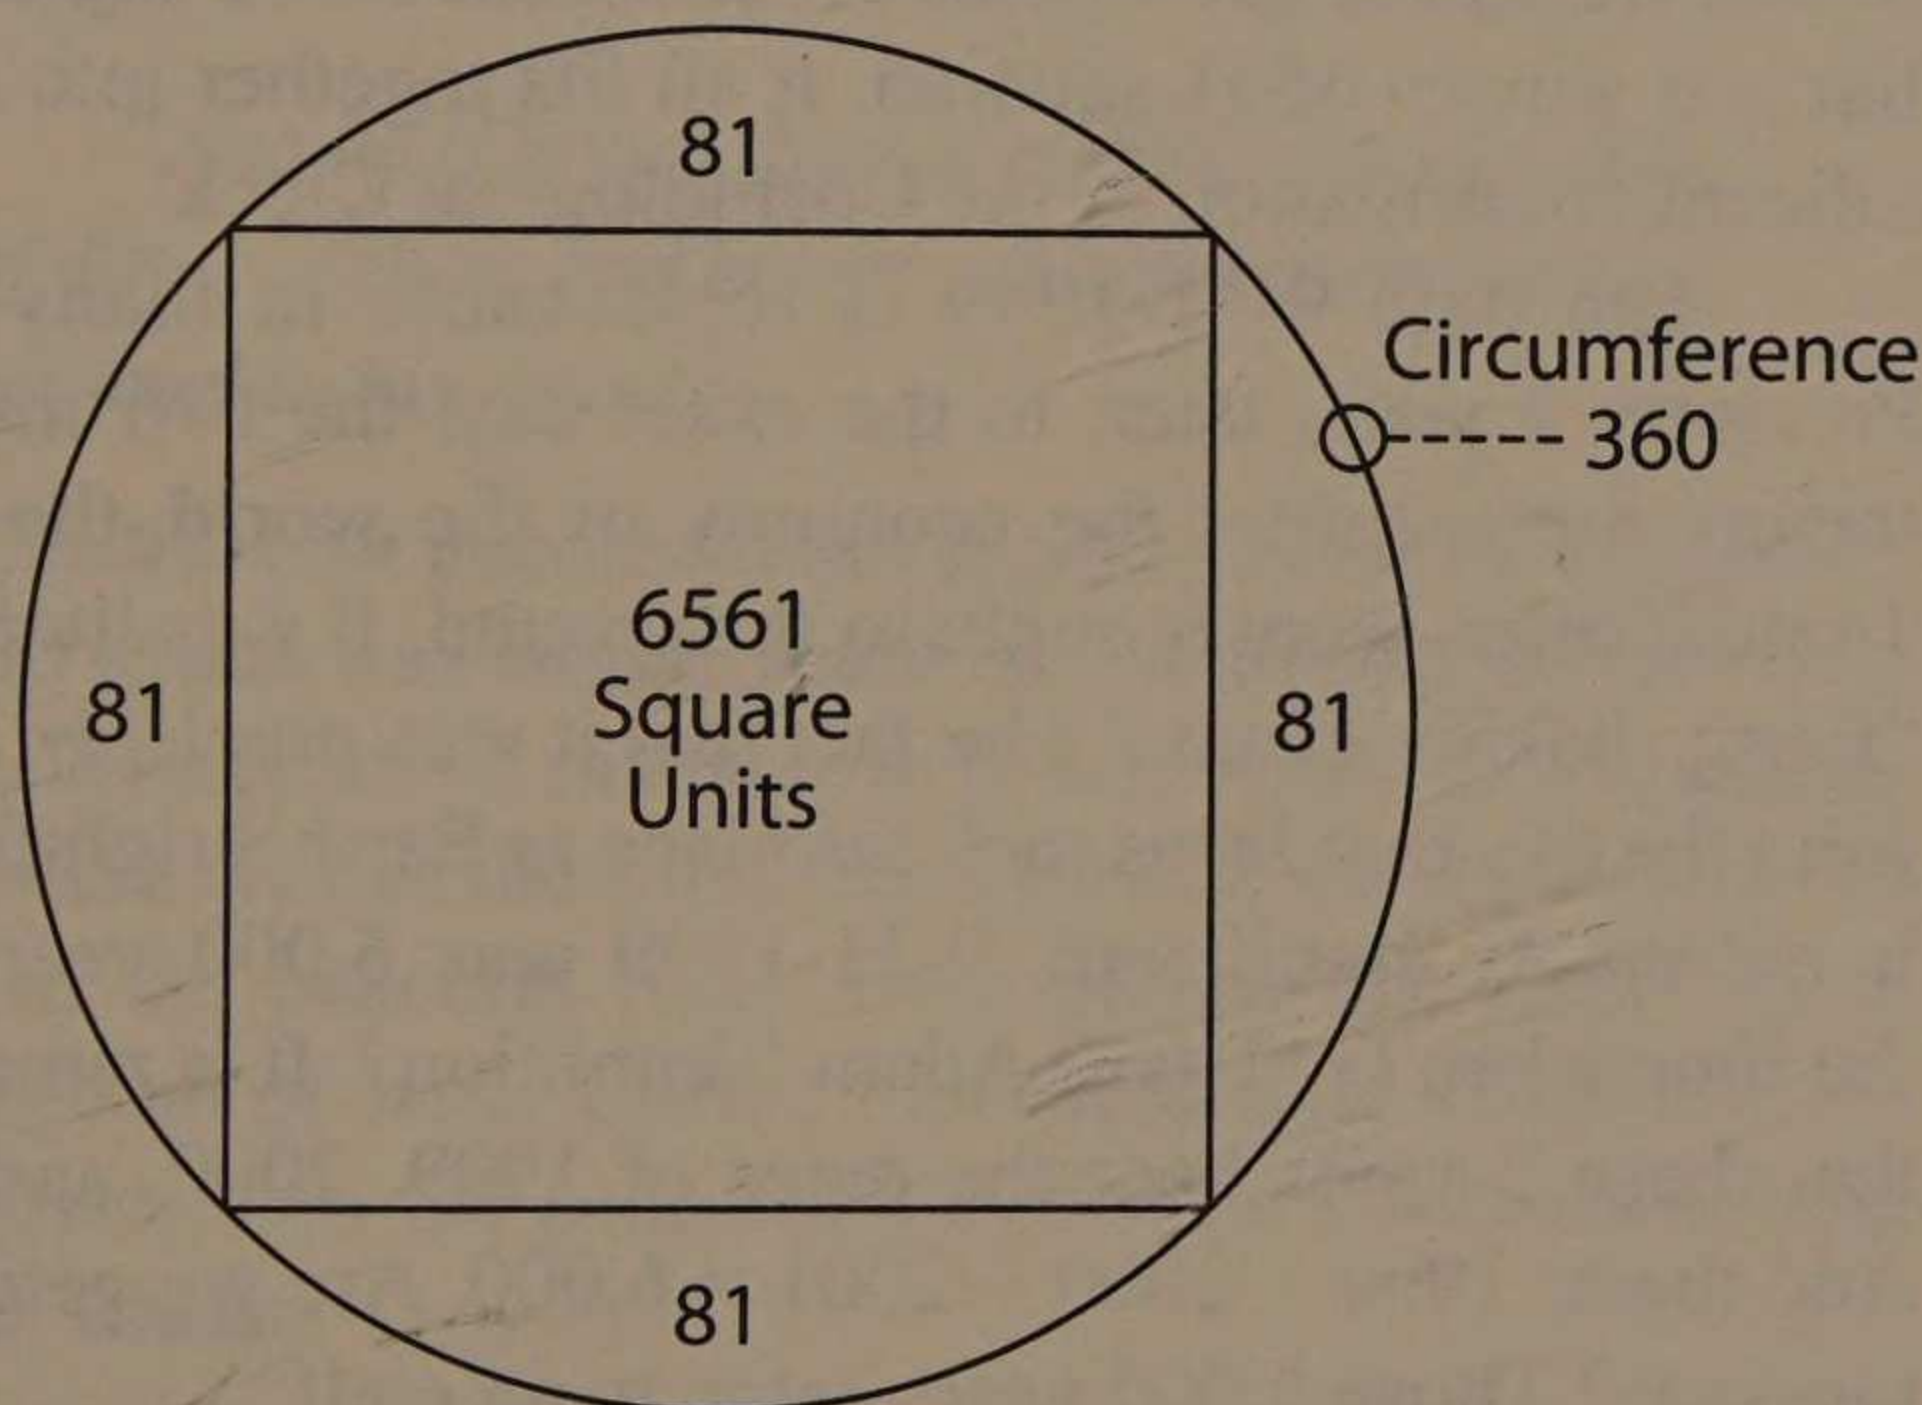

## A Confirmation

*By Bonnie Gaunt*

Appendix I

The circle of 360 units (which is also 360 degrees) provides an amazing confirmation of the concept of the Cosmological Clock and its 24 divisions (hours).

Let's look at the illustration again. Notice the square within the circle has sides of 81 units, causing the area within the square to become 6561 square units.

This shows the square within the circle on a flat plane. Let's make it 3D and call it a cube within a sphere. The area of the cube will now have 531,441 square units. The product of the digits will be 240, which is the number of years depicted in one hour on the Clock.

$$5 \times 3 \times 1 \times 4 \times 4 \times 1 = 240$$

It is also represented by 15 degrees on the Clock. Each hour (240) multiplied by 24 produces 5,760, the End date for the 6,000-year Clock on the Hebrew Calendar.

Or, we can arrive at the same date by making a palindrome of the number 531,441 and multiplying the digits. It would look like this.

$$5 \times 3 \times 1 \times 4 \times 4 \times 1 \times 1 \times 4 \times 4 \times 1 \times 3 \times 5 = 57600$$

The end date on the Clock is 9-11-1999. Multiply the digits and we have 6561. However, if we made this date into a palindrome (9-11-1999-9991-11-9), and then multiplied the digits, we would get 43046721. It sounds like a big number, but it is simply 6561 squared. It all fits together into a magnificent confirmation of the Cosmological Clock.

The date 9-11-1999 is remarkable in many ways. Precisely 2 years later, to the exact day, the two imposing towers representing the economy of the world—the World Trade Center—were brought to the ground. It was literally an “Earth shaking event.” The fact that it was precisely 2 years from the day that Jesus took his place as Earth’s rightful ruler is extremely significant. 9-11-1999 was 6,000 years from the time when God gave Adam “dominion.” It is remarkable that these 2 years bear the dates of 1999, 2000, and 2001. Add them:  $1999 + 2000 + 2001 = 6,000$ . Are we getting the message? Those 6,000 years came to an end!

Precisely 2 years after it came to an end, the world was given a “sign.” That sign said loudly: “Your right of rulership came to an end 2 years ago.” To illustrate this fact, the two icons of world power came crumbling down. It was a sign, telling us that the real towers of world power will indeed come crumbling down, just like the great metal image of Nebuchadnezzar’s dream. But, just as in Nebuchadnezzar’s dream, the little stone (Cephas) which brought it down, grows and soon fills the Earth with Divine Government—the Kingdom of Jesus Christ.

Jesus is the antitypical King David. On Rosh Hoshanna 1999 the right of rulership was given to him—he became the prophesied King on David’s throne. 6,000 years of man’s right of rulership came to an end. On the Cosmological Clock, this is shown as Rosh Hoshanna 1999, and the first day of 5760 on the Hebrew Calendar. Since that date the overthrow of man’s governments has been in progress.

David’s reign in Jerusalem was 33-1/2 years (during the final 3-1/2 years his son Solomon was co-regent with him). The account of his death is given in I Chronicles 29:28:

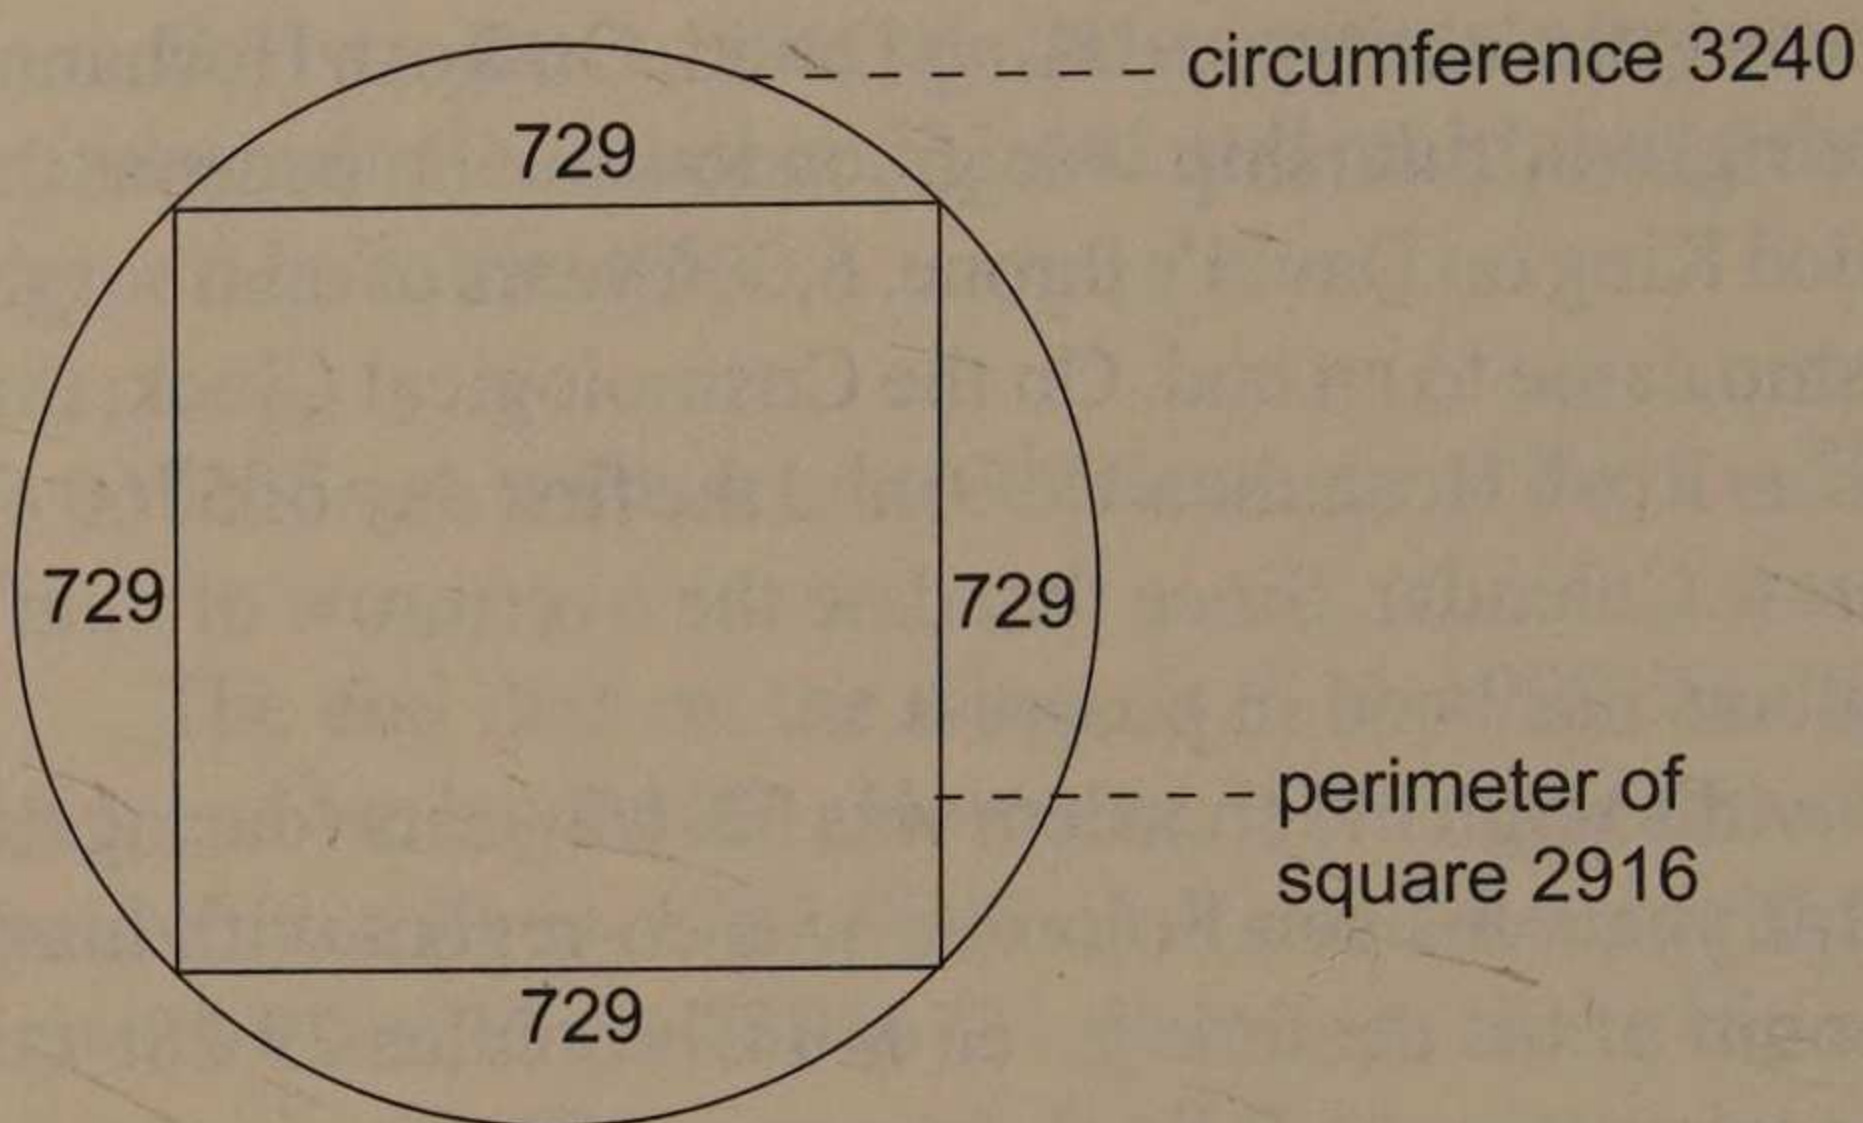

*“And he (David) died in a good old age, full of days, riches, and honor: and Solomon his son reigned in his stead.”*

Consider for a moment this typology. It would suggest a rulership which was largely spent in conquering his enemies; followed by a peaceful rulership in which the people prospered. David was a type of the conquering power; and Solomon was a type of the peaceful ruler. Both picture the rulership of the Kingdom of Jesus Christ: first the enemy kingdoms are overthrown, then the peaceful kingdom is established—both by Jesus Christ.

Consider the remarkable Gematria of the scripture quoted above (I Chronicles 29:28).

3240 = *“And he died in a good old age, full of days, riches, and honor: and Solomon his son reigned in his stead.”*

The circle of time representing the type and the antitype can be shown graphically by a circle with a circumference of 3240 units.

Do any of these numbers look familiar? Yes! The 729 is the Gematria for Cephas, the “crowned King” which was discussed on pages 106 - 107. This is amazing!

But why is the perimeter of the square 2916? Let’s go back to the three dates 1999, 2000, and 2001 and multiply them thus:

$$1 \times 9 \times 9 \times 9 \times 2 \times 0 \times 0 \times 0 \times 2 \times 0 \times 0 \times 1 = 2916$$

729 is the Gematria for Cephas. In the constellations which God has spread across the heavens, Cephas represents Jesus Christ in his Kingdom authority. He is also represented by the number 33, for he was 33 years old when he paid the price for the sin of Adam, and redeemed the entire race of Adam. His death was in A.D. 33. So, instead of multiplying the digits in these three remarkable dates, let’s add them.

$$1 + 9 + 9 + 9 + 2 + 0 + 0 + 0 + 2 + 0 + 0 + 1 = 33$$

A magnificent confirmation of the Cosmological Clock!

# The Clock and the Ten Commandments

*By Bonnie Gaunt*

Appendix II

The Ten Commandments are God's Law. These are the principles inherent in the Creator. They never change. However, the application of these principles to man has a sad history and a glorious future.

The Ten Commandments, as we have come to know them, are a concise outline of God's requirements for man. They are an expression of His righteousness. When God's righteousness is written in the human heart, then "*oneness*" with God can be the beautiful result. This is the relationship which Adam had with God before he sinned. It was called "*sonship*." This is the relationship that mankind will have with their Creator by the end of Earth's Great Millennium, when they enter into the Great Eighth Day.

These principles were given to Moses at Mount Sinai, and written on stone tablets. Moses read them to the people, and the people said "*All these things we will do*." This contract between God and Israel is spoken of in the Bible as a "marriage covenant." Israel, by not keeping this Law, broke the marriage covenant. They had broken their side of the agreement, so God divorced them. The divorce was finalized when Jesus hung on the cross and said "*It is finished*." The Apostle Paul said that Jesus "*nailed it (the marriage covenant) to the cross*."

Thus the marriage between God and Israel was ended. Yet those principles stated in the Ten Commandments will never end. They are the principles which God has laid down for man, and they will stand forever. And, whereas He gave them to Moses on tables of stone, He will require them of man to be written in the heart.

This is the work of the Millennium—writing God's Law in the heart. Isaiah foretold: "*When the judgments of the Lord are in the earth, the inhabitants of the world will learn*

*righteousness.*” Thus by the end of the seventh “*day*” and the beginning of the eighth “*day,*” God’s righteous principles will be written in the hearts of all mankind.

These principles were from the beginning—from the time of the creation of Adam. Therefore they relate to the 6,000 years of the Cosmological Clock. This amazing relationship is revealed in the numbers.

By converting the Ten Commandments into their Gematria equivalents, the total becomes the number 21312. It is a remarkable number. To read all the details of how to obtain this number, please see my 2002 book: *Apocalypse and the Magnificent Sevens*. A listing of each Commandment and its Gematria is shown on the next page.

The number 21312 is a palindrome, which means that it reads the same forward or backward. If we add the digits the total is 9—the number of perfection and finality, as well as the horizon and eternity.

$$2 + 1 + 3 + 1 + 2 = 9$$

But if we multiply the digits, we get the wonderful number 12, which is the number that represents divine government. And divine government can only be fully operative in the Earth when the principles of the Law are written in the hearts of all mankind.

$$2 \times 1 \times 3 \times 1 \times 2 = 12$$

Consider, for a moment, the face of the Clock as representing the number 21312. The 24 hours on its face would each be 888 ( $21312 / 24 = 888$ ). As we have seen, the number 888 is the Gematria value of Jesus. He, and He alone, is the means by which all mankind will have an opportunity to learn righteousness during the thousand-year “*day*” of judgment. He was the One “*slain from the foundation of the world,*” who

## The Ten Commandments

1. You shall have no other god before me.  
 לאִיְהוָה-לֵךְ אֱלֹהִים אַחֲרַי עַל-פָּנַי  
 140 100 259 36 50 30 31 .....646
  
2. You shall not make for yourself an idol in the form of anything in heaven above or on the earth beneath or in the waters below. You shall not bow down to them or worship them.  
 לֹא תַעֲשֶׂה-לְךָ פֶסֶל וְכָל-תְמוּנָה אֲשֶׁר בַּשָּׁמַיִם מִמַּעַל וְאֲשֶׁר בָּאָרֶץ  
 293 507 180 392 501 501 56 170 50 775 31  
 מִתַּחַת וְאֲשֶׁר בַּמַּיִם מִתַּחַת לָאָרֶץ לֹא-תִשְׁתַּחֲוֶה לָהֶם וְלֹא תַעֲבֹדֵם  
 516 37 75 1119 31 321 848 92 507 848 .....7850
  
3. You shall not misuse the name of the LORD your God.  
 לֹא תִשָּׂא אֶת-שֵׁם-יְהוָה אֱלֹהֶיךָ לְשׁוֹן  
 337 66 26 340 401 701 31.....1902
  
4. Remember the Sabbath day by keeping it holy.  
 זָכוֹר אֶת-יְוֹם שַׁבָּת לְקַדְּשׁוֹ  
 440 702 56 401 233.....1832
  
5. Honour your father and your mother.  
 כָּבֵד אֶת-אָבִיךָ וְאֶת-אִמְךָ  
 61 407 33 401 26 .....928
  
6. You shall not murder.  
 לֹא תִרְצַח  
 698 31 .....729
  
7. You shall not commit adultery.  
 לֹא תִנְאֻף  
 531 31 .....562
  
8. You shall not steal.  
 לֹא תִגְנוֹב  
 455 31 .....486
  
9. You shall not give false testimony against your neighbor.  
 לֹא-תַעֲנֶה בְרֵעֶךָ עַד שֶׁקֶר  
 600 74 292 525 31 .....1522
  
10. You shall not covet your neighbour's house. You shall not covet your neighbour's wife, or his manservant or maidservant, his ox or donkey, or anything that belongs to your neighbor.  
 לֹא תַחְמֹד בֵּית רֵעֶךָ לֹא-תַחְמֹד אִשְׁתּוֹ רֵעֶךָ וְעַבְדּוֹ וְאִמָּתוֹ  
 453 88 290 701 452 31 290 412 452 31  
 וְשׁוֹרֹוֹ וְחֲמֹרֹוֹ וְכָל אֲשֶׁר לְרֵעֶךָ  
 320 501 56 260 518 .....4855

**21312**

provides the right to life that Adam forfeited. And He is seen as representing every hour on the 6,000-year Clock.

The sum of the digits in 21312 is 9. If we divide 21312 by 9 we get 2368. The Gematria value for Jesus Christ is 2368.

Or, if we consider each hour on the Clock as representing 21312—the Law of God—the total of 24 hours will be 511488. Divide it by Jesus (888) and we get 576—the End-Time date on the Clock ( $511488 / 888 = 576$ ).

These are not random numbers. They are numbers with a purpose. They tell the whole story of creation, fall, redemption, and reconciliation—everlasting sonship with God!

# The Great Prophetic Design ... found in Africa

by Bonnie Gaunt

The amazing coordinates of Bethlehem are the same numbers as the Gematria for Lord Jesus Christ!

**3168 = Lord Jesus Christ (Greek)**

**792 = Lord Jesus Christ (Hebrew)**

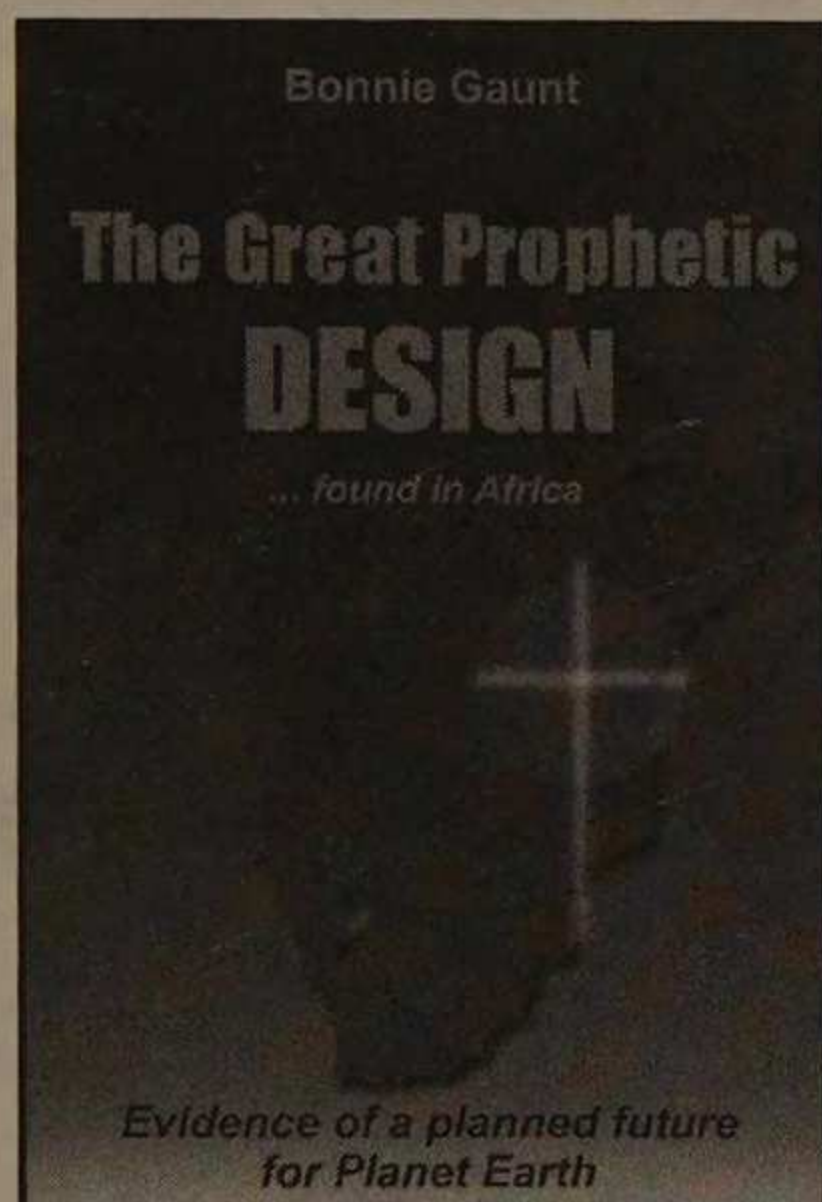

**352 = His Name (Hebrew)**

**352 = The Way**

These magnificent numbers of His Name are found in the design of the continent of Africa, and they tell the story of the creation of man in perfection, of his fall into sin, of the sending of a Redeemer, and of his eventual restoration to all that had been lost. These amazing coordinates of the place where that Redeemer was born into this world are the same numbers that surround Lake Victoria. This vast freshwater lake is so positioned above the

Great Rift Valley that its waters plunge down into the Rift and flow north as the river Nile. This gigantic Rift illustrates the great rift between God and man resulting from the disobedience of Adam. But the healing waters from Lake Victoria provide life. How amazing it is to realize the most southern extremity of Lake Victoria is on 3.168° S Latitude, still bearing the number of the Lord Jesus Christ. The square that these coordinates form, surrounding Lake Victoria has sides of 3.52° distance, bearing the number of His Name. And most amazing of all: the latitude of 3.168° S

passes through the summit of Mt. Kilimanjaro. This lofty snow covered mountain is positioned in the exact center of a circle one tenth the size of our earth, the circumference of which extends to the 31.68° E. Longitude meridian. At its summit is a circular crater whose diameter is 7,920 feet; precisely the same number of miles in the diameter of our earth. It is a precise design, formed long before the creation of man on this earth, meant to illustrate the redemption and restoration of earth's inhabitants – all mankind.. This is why I call it "The Great Prophetic Design!"

**The Great Prophetic Design  
... found in Africa**

*Evidence of a planned future  
for Planet Earth*

These books may be obtained from

or ordered from your local bookstore.

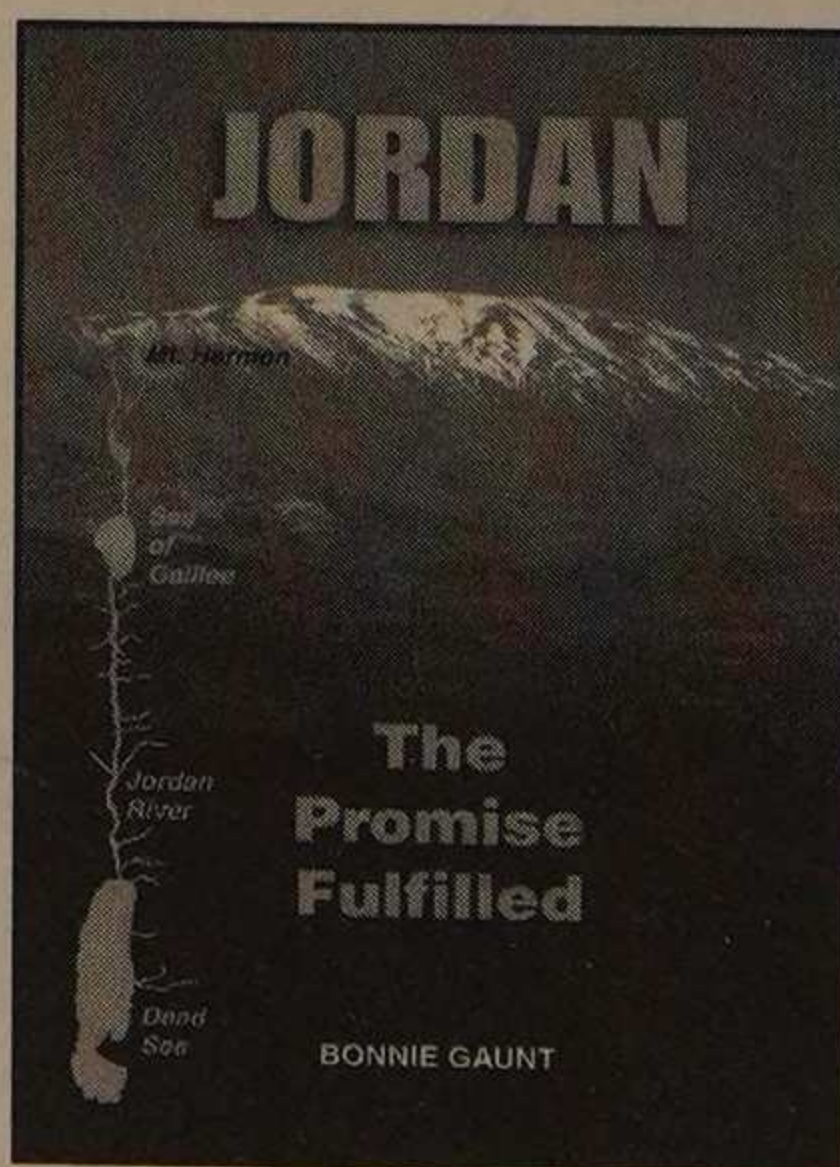

Companion books to  
***The Great Prophetic Design***

For a more comprehensive understanding of *The Great Prophetic Design* you may want to read these two companion books, dealing with the amazing prophetic significance of these two rivers in the Great Rift Valley – the Nile and the Jordan.

**NILE**

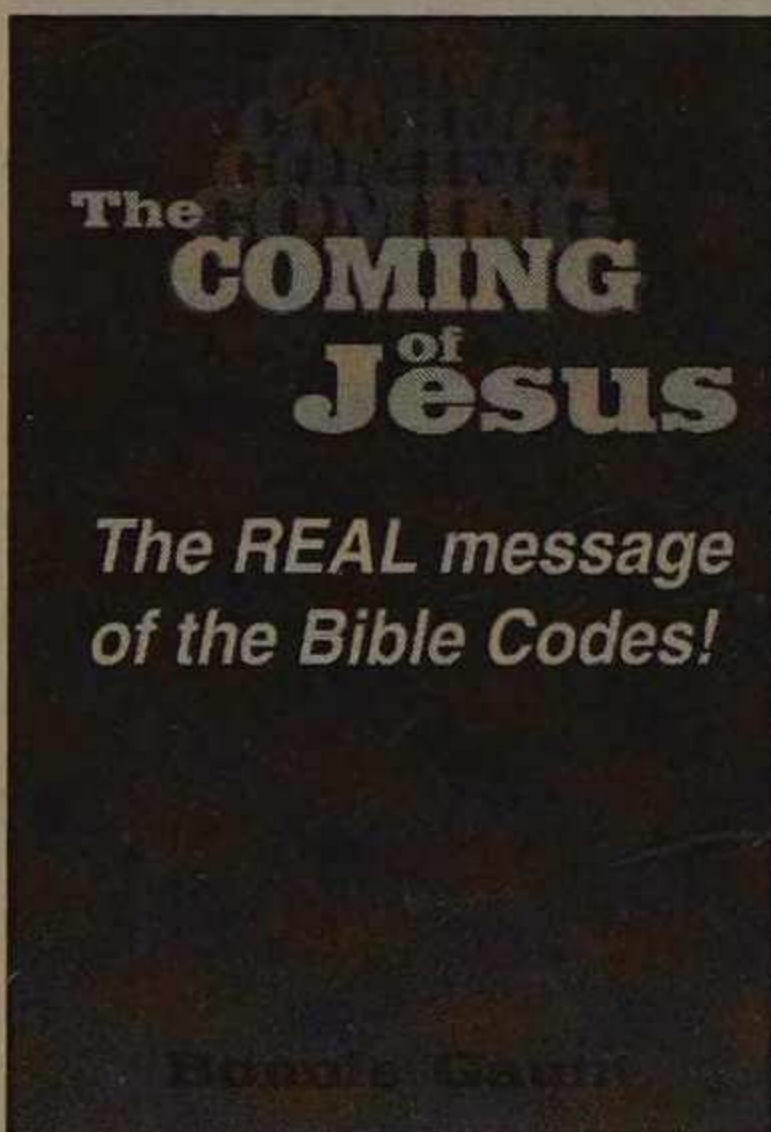

**The Promise Written in Sand**

**JORDAN**

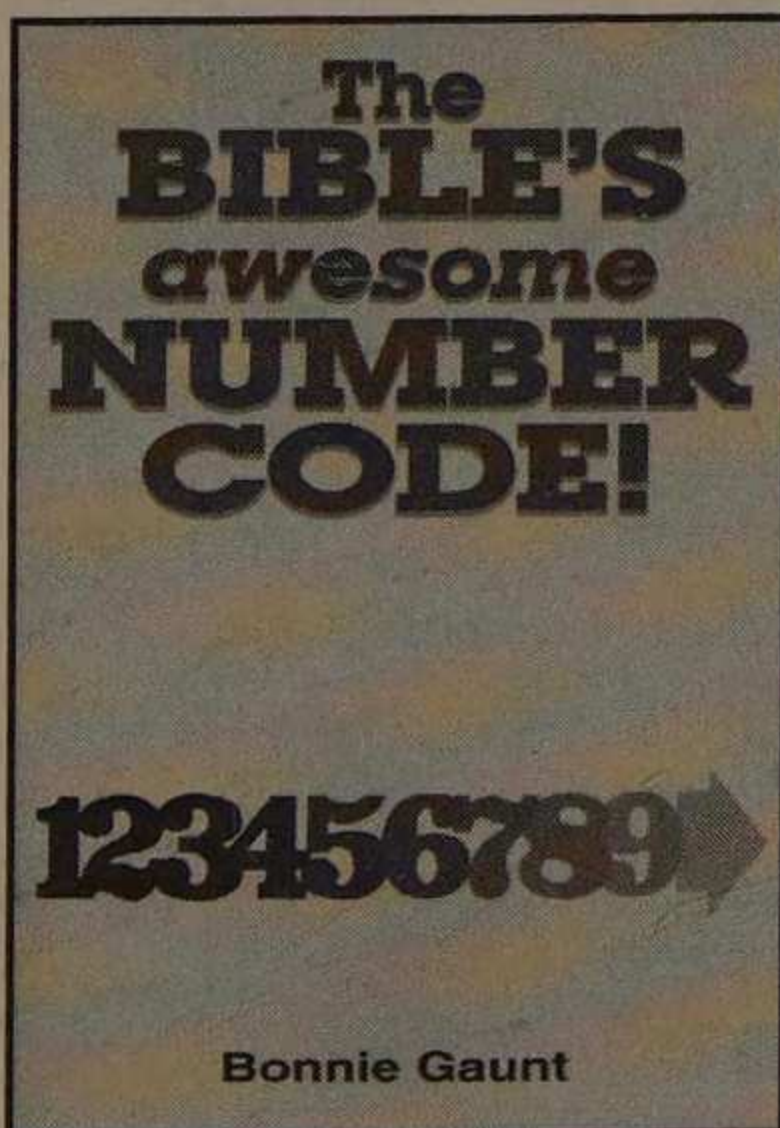

**The Promise Fulfilled**

Bonnie Gaunt has written more books on the Gematria of the Bible than any other modern author. It is amazing how the Number Code (Gematria) confirms the Bible's story of mankind, his creation in perfection, his fall into sin, and his redemption and restoration. This code was hidden in the original Hebrew and Greek texts of the Bible, and is a magnificent confirmation of the meaning of the surface text. Below are listed some of her books that will bring you great joy and amazement.

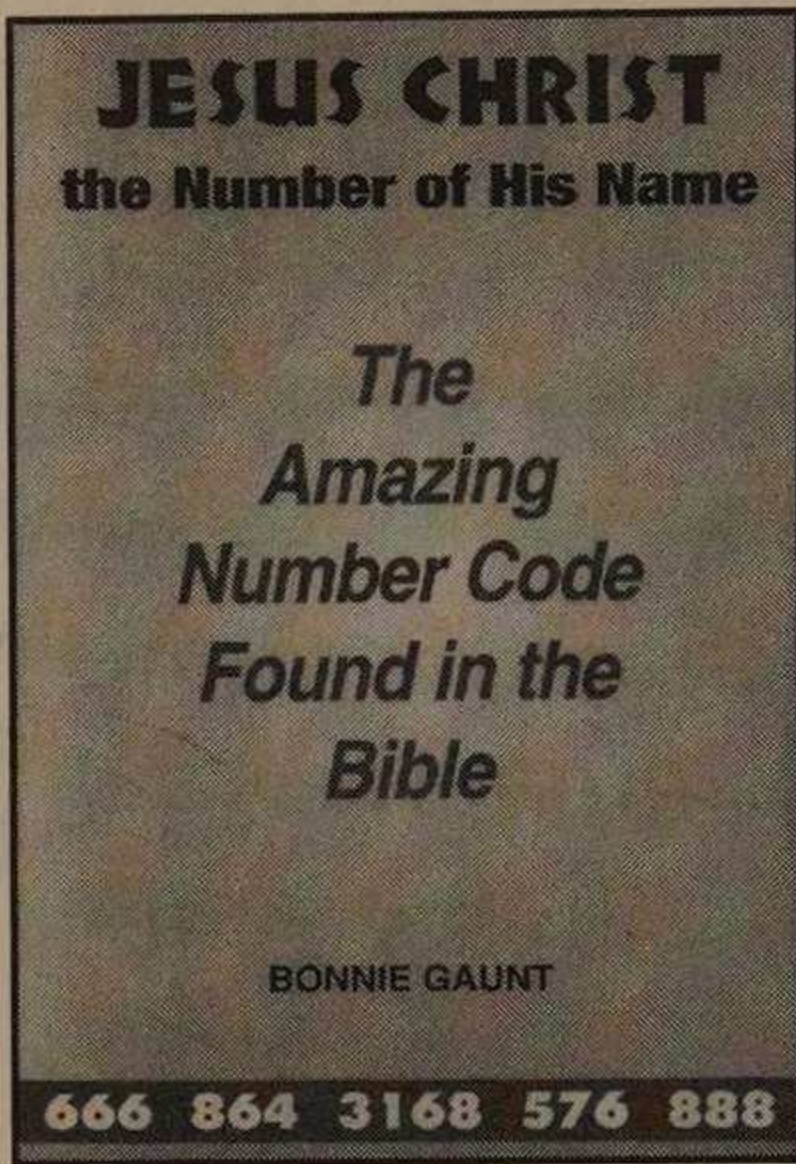

### *The Coming of Jesus*

The Hebrew Gematria for the constellations of the Zodiac tell the whole story of salvation and the second coming of Jesus Christ, confirming the date of September 11, 1999 as the end of 6,000 years from the creation of Adam

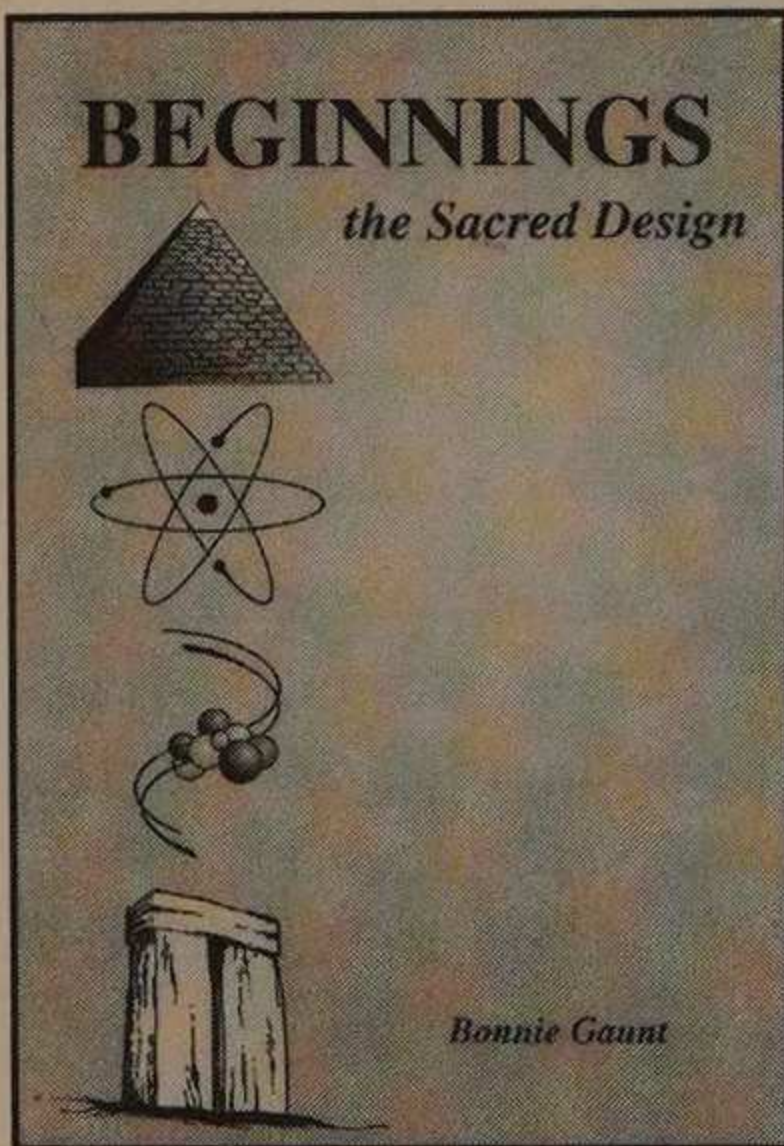

### *The Bible's Awesome Number Code*

This is an exciting study of the number patterns and prophetic time lines in the Bible. It takes us on a journey from Bethlehem to Golgotha, and into the Kingdom of Jesus Christ.

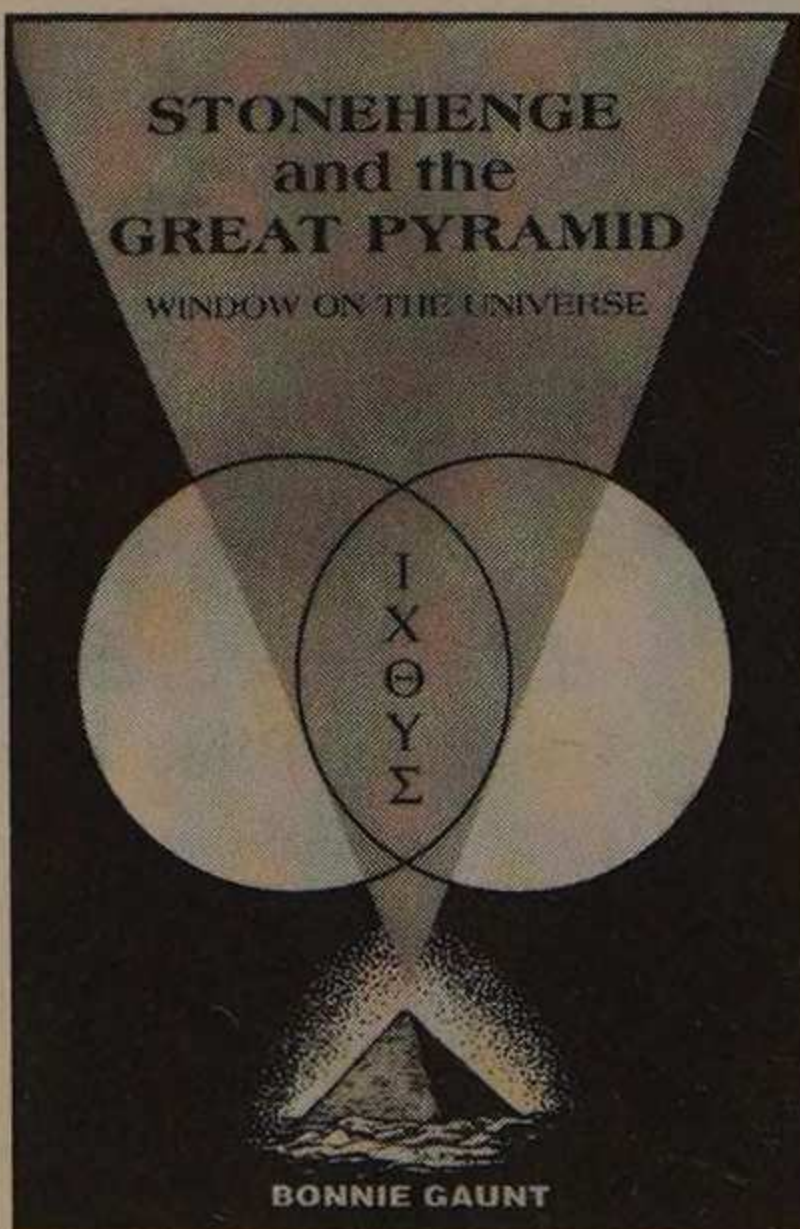

## ***Jesus Christ: the Number of His Name***

The Gematria of the Bible tells us of the new Millennium and the "Grand Octave of Time" for man. In this book, Bonnie Gaunt explores the amazing use of the Golden Proportion in the names of Jesus and in the time features of God's 6,000-year plan for man.

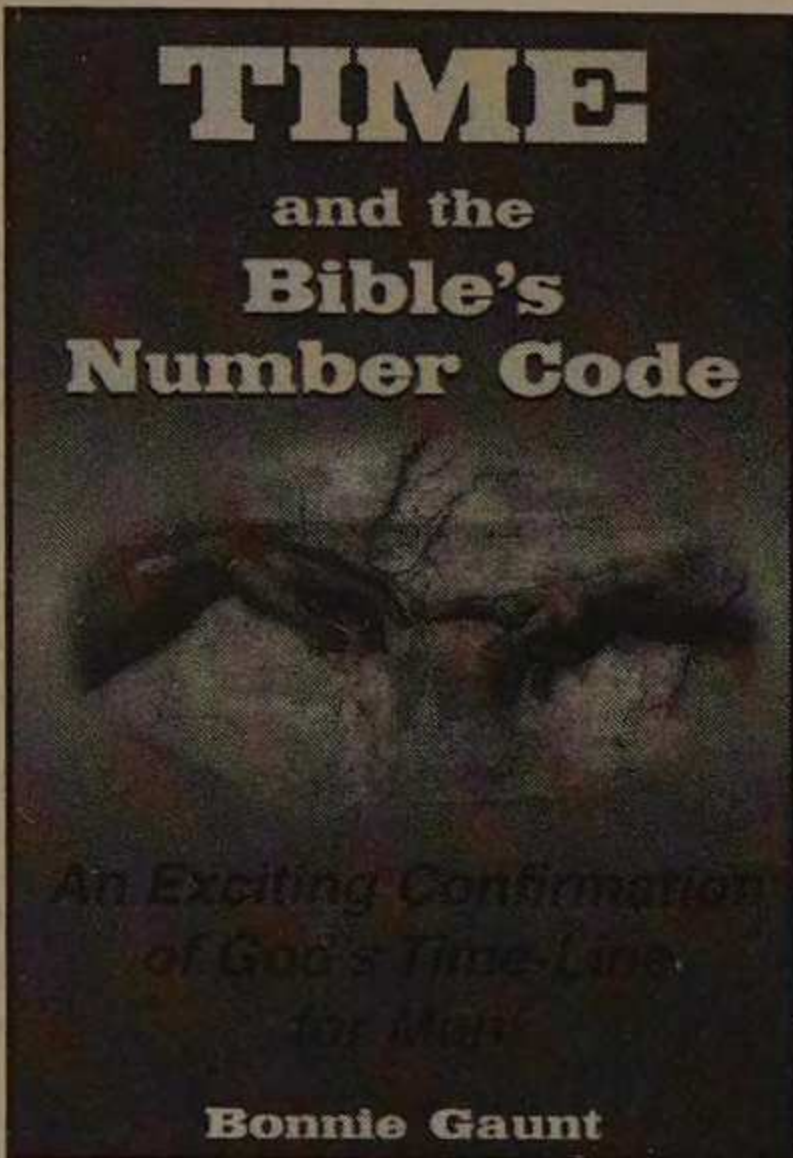

## ***Beginnings: the Sacred Design***

This book explores the "what," "when," and "how" of the origins of man, our earth, our solar system, and our universe. The Gematria of the Bible reveals an amazing design inter-woven into all creation – even the vibrations of the music scale. It is a design of which we are a part.

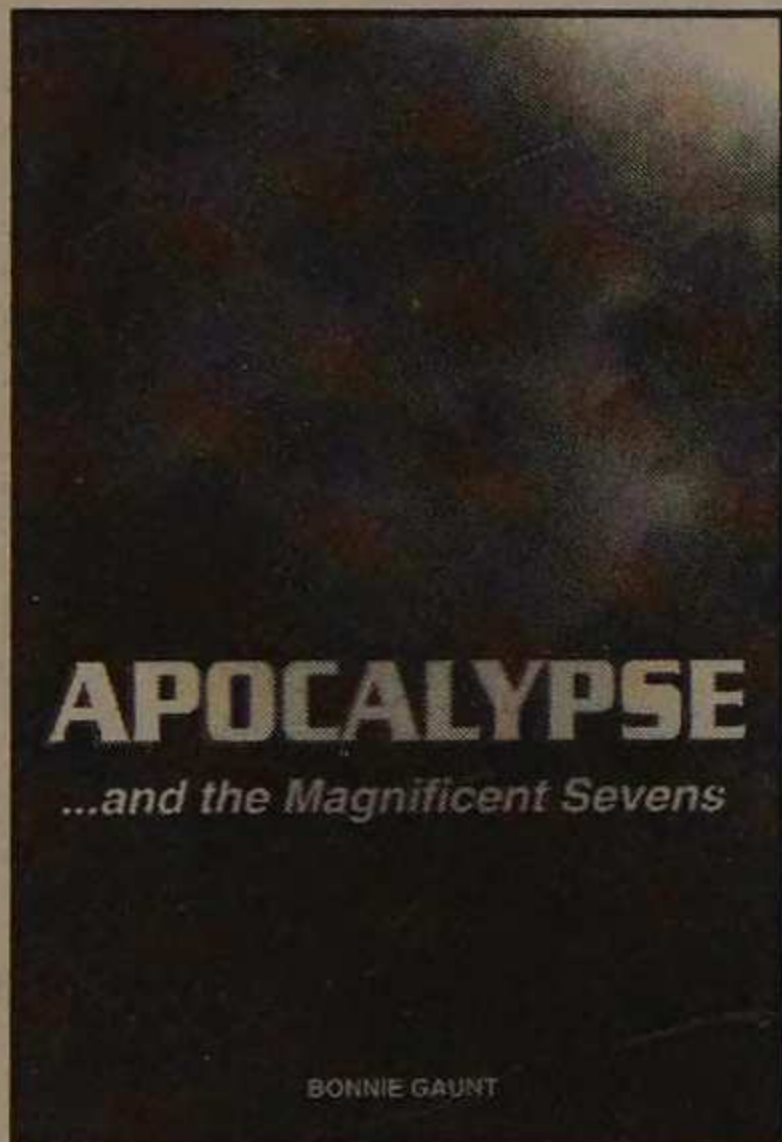

## ***Stonehenge and the Great Pyramid***

These two great ancient wonders reveal the secrets of the Bible's Number Code. This book explores the inner passages and chambers of the Great Pyramid and reveals its awesome message for today's world.

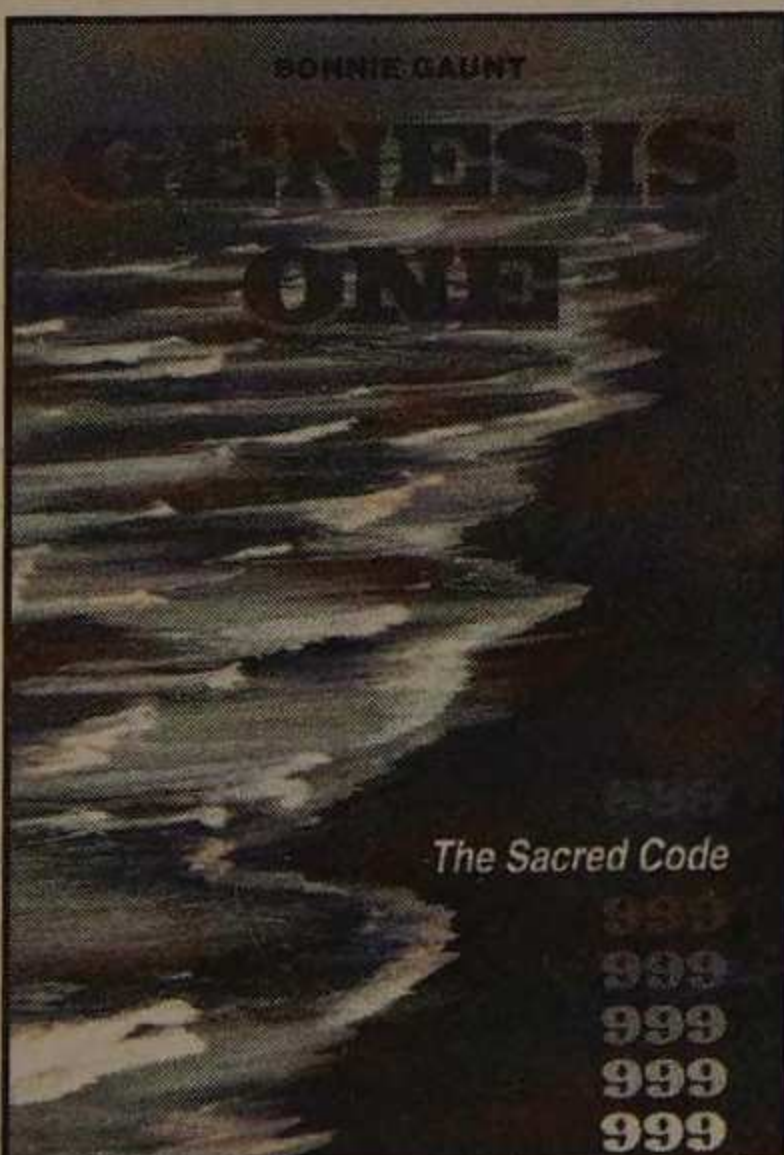

## ***Time and the Bible's Number Code***

The 6,000-year timeline for man, confirming the patterns of the Number Code and the patterns of the Golden Proportion, to tell God's magnificent story, and confirm our place, today, in His plan for man.

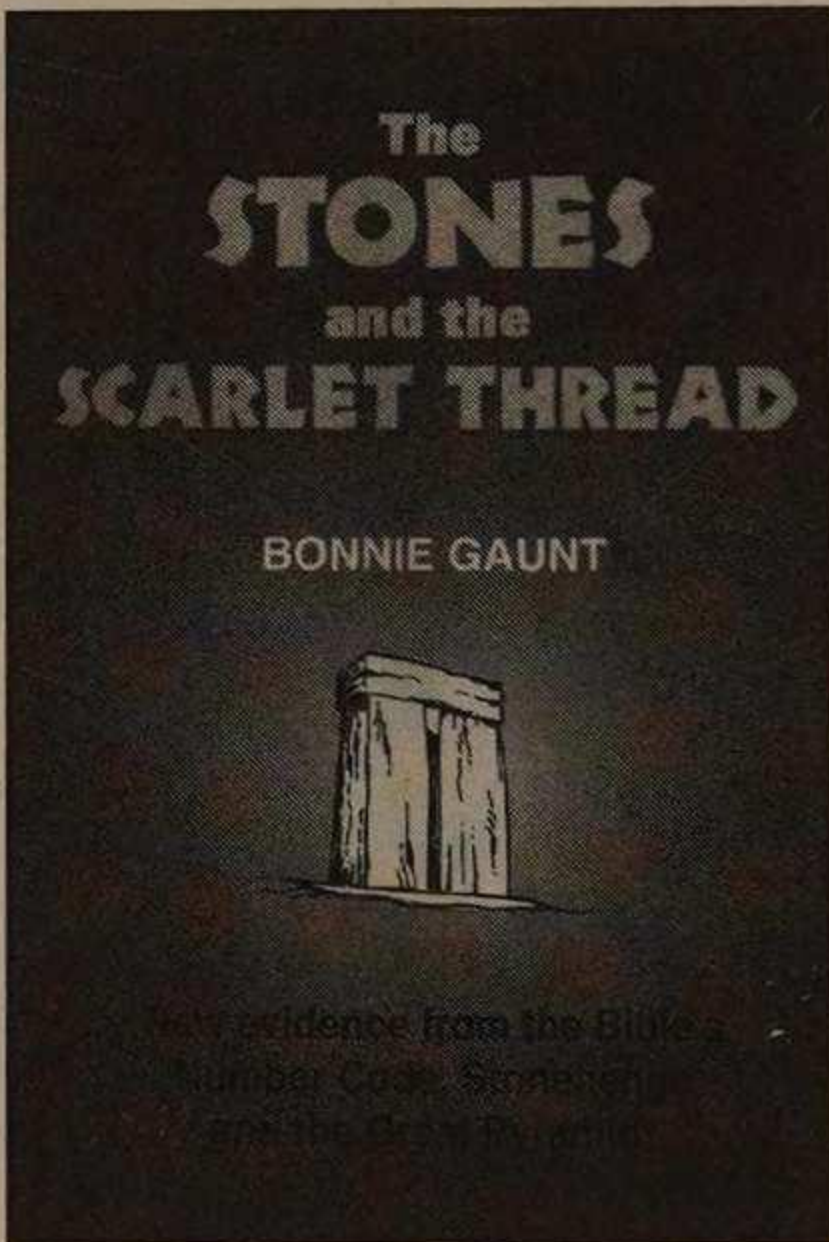

## ***Apocalypse and the Magnificent Sevens***

The application of the Number Code opens doors to an understanding of the book of Revelation, making the complicated simple, the feared an anticipation, and the outcome a magnificent joy.

## ***Genesis One***

An amazing discovery of the relationship of the book of Revelation to the first chapter of Genesis. It is the Gematria that ties them together into a magnificent circle of time, like the face of the clock.

## ***The Stones and the Scarlet Thread***

The story of the scarlet thread is woven through the pages of time. It is the remarkable story of Jesus Christ, told through its Gematria and the Golden Proportion. It tells God's magnificent story of His purpose for mankind, and will confirm our place, today, in His magnificent plan for man.

These books may be obtained from

or

**[amazon.com](http://amazon.com)**

or ordered from your local bookstore.

\$14.95

This work by Andrew Moore is a magnificent display of the patterns of time that rule our past, present and future. I have spent a lifetime pursuing the intricacies of the chronology of man, and exploring the amazing interaction of its mathematical patterns. In this book, Andrew Moore has taken a giant leap forward and laid out those magnificent patterns on the simple concept of a clock. As the hands of the clock tick off the ages, they confirm the obvious - that our history is the work of Intelligent Design. They are the footprints of a Divine Mathematician, who not only designed our past, but has revealed His plan for our glorious future.
