

WITH THE

TIME CAMERA

Discover the secrets which let the pioneers of psychotronics take pictures of the PAST, PRESENT & FUTURE, ANYWHERE IN THE WORLD!!! With the TIME CAMERA FOLIO you can assemble a unit which will do just that using ordinary photographic film. The TIME CAMERA FOLIO lavishly illustrates 3 different configurations for time photography. Model #1 can only be used with the OMNITRON psychotronic unit and is simple to construct. Model #2 has combined space & time tuning capabilities and is self-powered by a specially developed "Counter Magnetic Amplifier", never requiring batteries or external power! The 3rd model is also self-powered by counter magnetic amplifiers but uses a unique xtal/coil/plate assembly for inherent self-tuning without dials or moving parts! Each of the 3 configurations uses an identical "Film Exposure Well" to affect single pieces of film if you choose to develop the pictures yourself or, in a few simple moves, can be adapted for use with most standard cameras.

TIME CAMERA FOLIO An in-depth discussion on the fundamentals and background of time photography with plans for all three configurations!!!

CODE: PICTUR .....

TIME CAMERA UNIT MODEL #1 & Time Camera Folio for use with the OMNITRON. range:-999yrs-+999yrs. induction and direct coupling capabilities. Complete, hand-assembled and fully tested.

CODE: TIMCM1 .....

TIME CAMERA UNIT MODEL #2 & Time Camera Folio combined space & time tuning and self-powered. Theoretically infinite range! Complete, hand-assembled and fully tested.

CODE: TIMCM2 .....

TIME CAMERA UNIT MODEL #3 & Time Camera Folio self-powered & self tuning, infinite range! Complete, hand-assembled & fully tested.

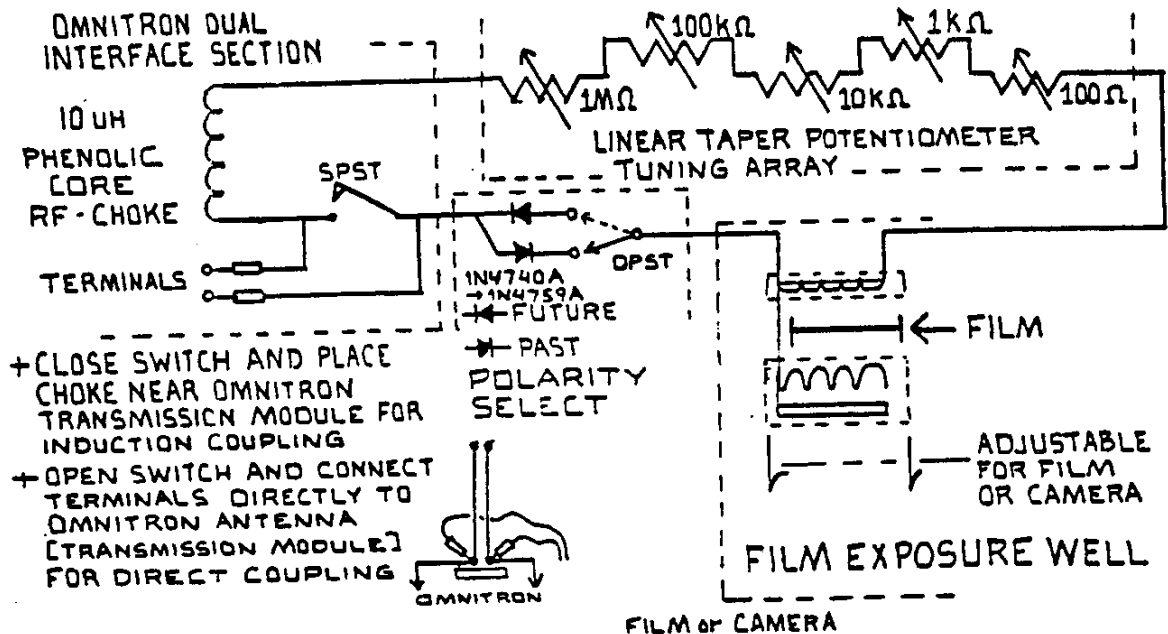

CODE: TIMCM3 .....

IMPORTANT

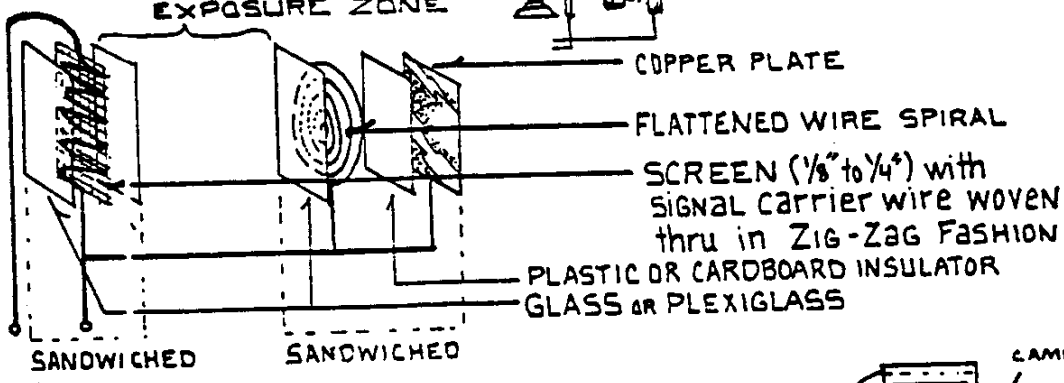

DISCLAIMER: Even though psychotronics is proven and used extensively by the governments & medical professions in several countries, including England and the USSR, the AMA and U.S. FDA do not as of yet recognize the validity of psychotronics. To insure against violation of the intent or purpose of government regulations concerning the sale of devices which assist the body, ARD can offer no Guarantee regarding results obtained from a psychotronic device.

# CONFIGURATION #1

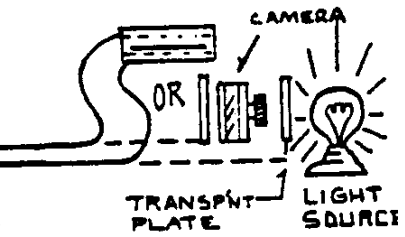

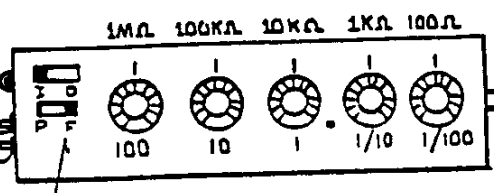

- + CLOSE SWITCH AND PLACE CHOKE NEAR OMNITRON TRANSMISSION MODULE FOR INDUCTION COUPLING
- + OPEN SWITCH AND CONNECT TERMINALS DIRECTLY TO OMNITRON ANTENNA [TRANSMISSION MODULE] FOR DIRECT COUPLING

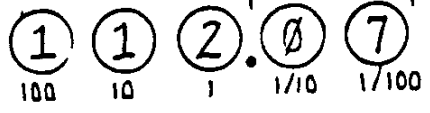

## \* FILM EXPOSURE WELL

OMNITRON TUNES INTO TARGET AREA LOCATION

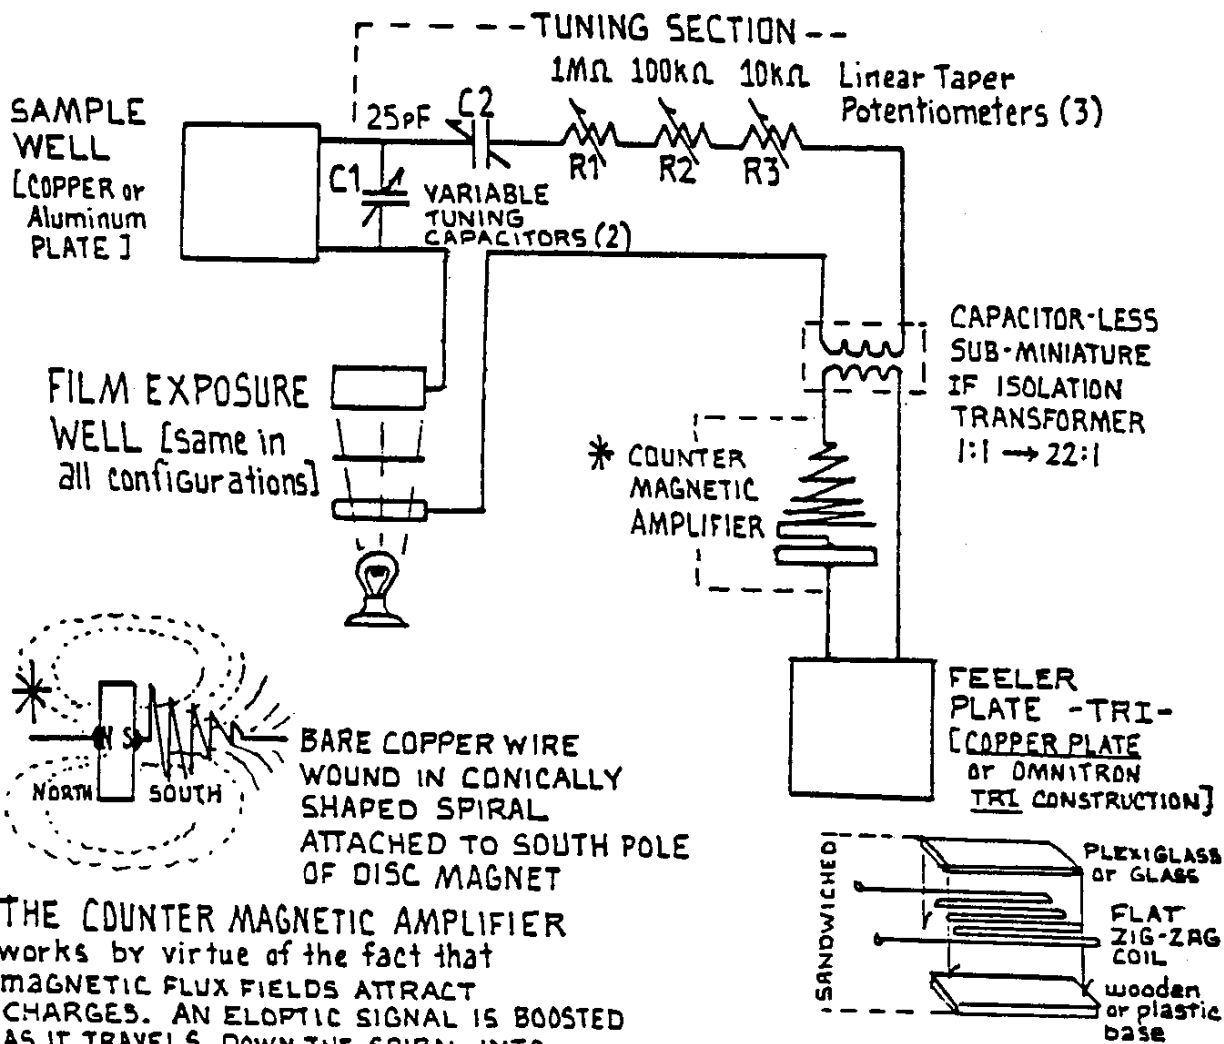

\* TO SET TIME CAMERA FOR 112 YRS 27 DAYS (FUTURE)

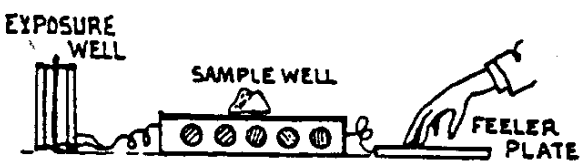

$$.07397... \Rightarrow \frac{27 \text{ days}}{365 \text{ days/yr}}$$

$$365 \overline{) 27}$$

# CONFIGURATION #2

THE COUNTER MAGNETIC AMPLIFIER works by virtue of the fact that MAGNETIC FLUX FIELDS ATTRACT CHARGES. AN ELECTRIC SIGNAL IS BOOSTED AS IT TRAVELS DOWN THE SPIRAL INTO SUCCESSIVE, MORE INTENSE, FLUX REGIONS CLOSER TO THE MAGNET.

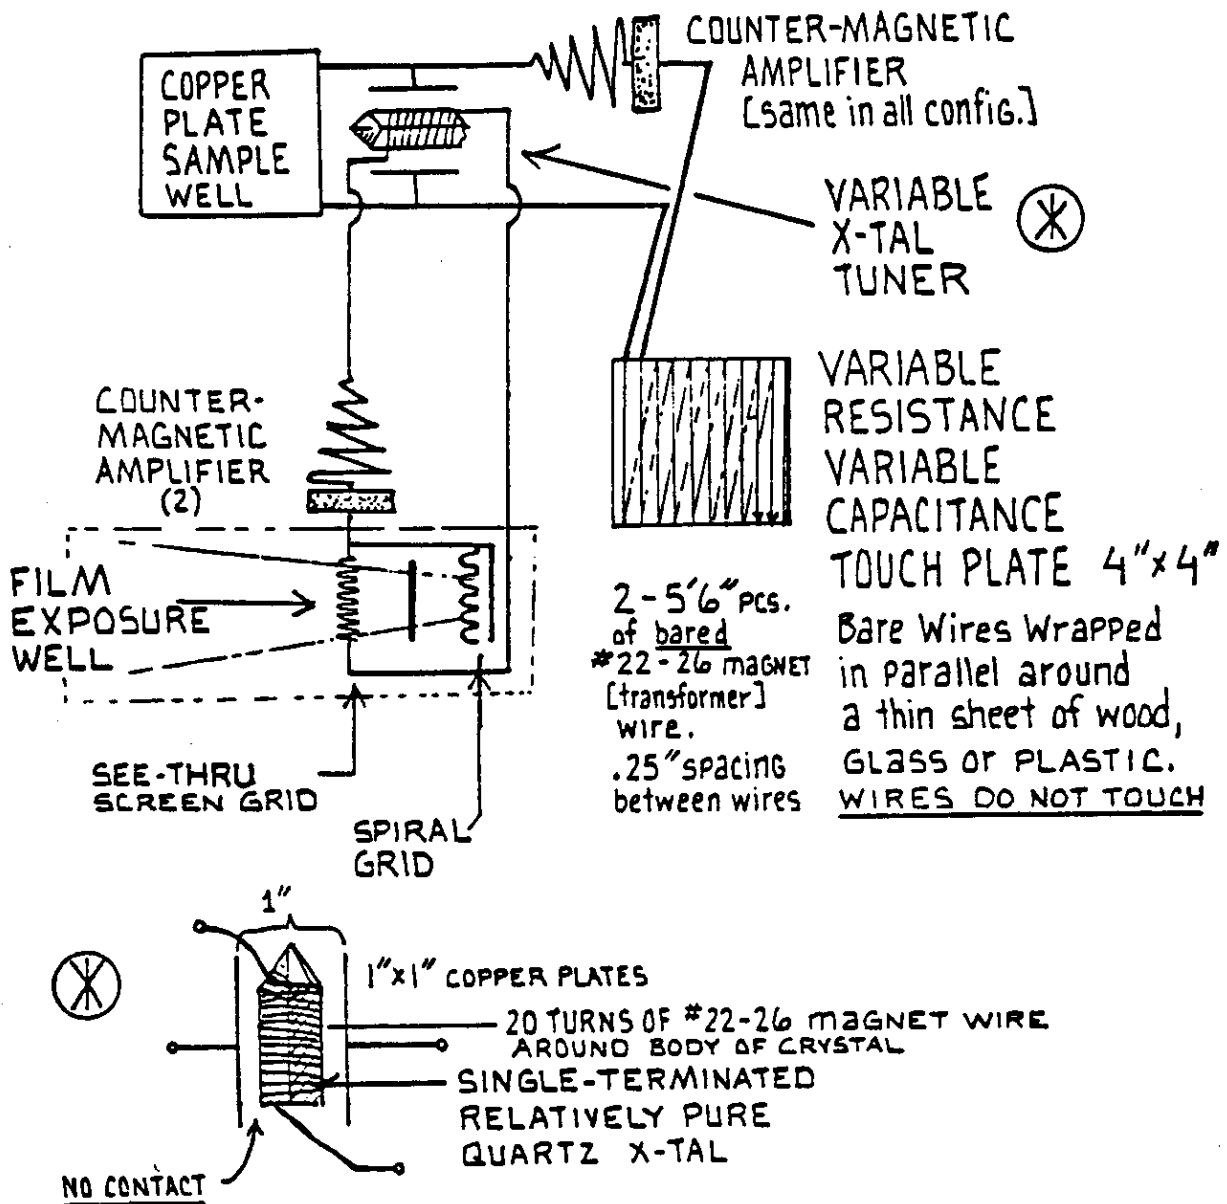

THE FEELER PLATE PRODUCES A "GRABBING" SENSATION AS THE DEVICE IS TUNED INTO THE TARGETED SPACIALTIME FRAME

As the USER Concentrates On The TARGETED SPACE-TIME ZONE C1 is turned while the FINGERTIPS of the other hand GLIDE BACK & FORTH LIGHTLY OVER THE FEELER PLATE UNTIL A GRABBING OR STICKING SENSATION IS FELT. THE PROCESS IS CONTINUED WITH C2, R1, R2, R3 RESPECTIVELY UNTIL THE FEELER PLATE SENSATION IS MAXIMIZED. THE FILM OR CAMERA IS LEFT IN THE EXPOSURE WELL FOR 20-60 SECONDS, DEPENDING ON THE DEGREE OF DESIRED CLARITY.

# CONFIGURATION #3

## SOLID STATE SELF-TUNING

THE SPECIALIZED TOUCH PLATE COMBINED WITH THE VARIABLE CRYSTAL TUNER RESULT IN SOLID STATE TUNING CAPABILITIES. WHILE CONCENTRATING ON THE SPACE-TIME ZONE TARGET THE FINGER-TIPS ARE MOVED ACROSS THE TOUCH PLATE UNTIL THE MOST INTENSE REGION OF 'GRAB' OR 'STICK' IS FELT. KEEP THE FINGERS MOTIONLESS, MAINTAIN CONCENTRATION & LEAVE THE FILM IN THE WELL FOR 1-2 minutes before developing.

ATTENTION:

Active Research & Development is now offering completely assembled and tested TIME CAMERA units to those of you who feel you don't have the skill or motivation to build your own. Each unit is hand assembled using the finest electronic components and mounted in a durable plastic chassis. All three configurations are available. Each unit comes with adaptations for using an ordinary camera.

CONFIGURATION #1

for use with the OMNITRON

calibrated to 1/100th of a year  
range: -999yrs to +999yrs

With induction and direct coupling  
capabilities

---

CONFIGURATION #2

Combined space/time tuning  
capabilities without OMNITRON

calibration dependent on user  
range:  $-\infty$  to  $+\infty$  (theoretically)

Self-powered amplification  
by described magnetic circuitry

---

CONFIGURATION #3

Combined space/time self-tuning  
without OMNITRON

calibration dependent on user  
range:  $-\infty$  to  $+\infty$  (theoretically)

Self-powered amplification  
by described magnetic circuitry

---
